Mr. COLEMAN. I believe I was the one who said that the inspector general of the city of New York had these powers. I believe the gentleman corrected me in saying it was what agency?

Mr. WEISS. The department of investigation, which is the equivalent of the FBI of the city of New York.

Mr. COLEMAN. Which again I think is an analogous argument, that they are pursuing food stamp fraud in the city of New York, and welfare fraud also, and they have the same powers that we are trying to extend.

Mr. WEISS. If the gentleman will allow me, that is right. But what is being done is that the department of investigation is, in essence, the Justice Department of the city of New York. They have police officers and special investigators who are peace officers by training and by occupation to do that work.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I am pleased to yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding. I appreciate his statement.

I hope that his amendment does resolve his concerns about this.

The action does give me a bit of a problem. Does the gentleman know any other agency of the Federal Government involved in the kind of investigatory activities that are involved in food stamp fraud where this kind of joint authority is required? For instance, the Secret Service, in investigating counterfeiting cases, do they have to go to the Attorney General; or Postal Service officials involved in similar things, do they have to go to the Attorney General? Could the gentleman tell me that?

Mr. WEISS. If the gentleman will allow, what we have here, as the gentleman from Ohio (Mr. KINDNESS) and the gentleman from New Jersey (Mr. RODINO) have pointed out, is a unique devolution of authority upon people who were never intended originally to have such authority, or such function. So it is not analogous to any other law enforcement function, because what we have here are auditors and investigators in the auditing field all of a sudden being made law enforcement people. In order for that to be done, I

think it is the better part of wisdom, and I am pleased the amendment has been accepted, that the Attorney General play a role.

Mr. WALKER. Will the gentleman yield further?

Mr. WEISS. I would be pleased to yield further.

Mr. WALKER. I thank the gentleman for yielding, because I think we do have an analogous situation, for instance, to the Secret Service because we never intended to turn food stamps into currency, but that, in fact, is what we have done. So, therefore, the only place that we have given enforcement powers to do something about the fraud that has resulted from that kind of a change was in the Office of Inspections that happens to be under the Inspector General. Yet it seems to me what the gentleman's amendment has done is put at least somewhat of a restraint on that Office of Inspections that does not exist in any other law enforcement unit of the Federal Government.

Mr. WEISS. If the gentleman will allow, quite the contrary. I am sensitive to some of the comments the gentleman made yesterday about his concern for fraud, waste, and abuse in the food stamp field. No one is more concerned about that than I am because every bit of fraud and corruption deprives and cheats people who are legitimately entitled to those food stamps of the right to eat. What my amendment does, I believe, is, in fact, to bring the Justice Department into the picture so there will be additional personnel from the Justice Department who will be into the act, and perhaps will provide the resources which the Department of Agriculture may not have available.

Mr. WALKER. I thank the gentleman.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I am pleased to yield to the gentleman from Missouri.

Mr. COLEMAN. I think, as we indicated before, the Attorney General in the Justice Department is already in on the act, and this simply spells out a joint participation. I do not know that I can accept this, but I will not oppose it. I do think it might divide somewhat the responsibility for this program, but it will bring to a head, I think, the roles of these two agencies that have so far allowed the U.S. Department of Agriculture to carry the load on this.

Mr. WEAVER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to commend those whose concern about this language has led to the compromise. I find that the true conservatives who have worked on this are much to be congratulated. I would myself like to see the entire section struck, but I appreciate very much the work that has been done.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri (Mr. COLEMAN), as modified.

The amendment, as modified, was agreed to.

□ 1145

Mr. HUGHES. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have some great concerns over the language as presently constituted. In my judgment, the language that now exists, which would require a police officer, an inspector general, to make a determination if in fact there is probable cause after a warrant has been executed—I realize that my colleague does not want to do that, I know that is not his intent. But that is precisely what he does. And even though I have some basic problems with giving the Inspector General this authority, I think it is the wrong direction.

I had hoped that we could clean up the language. It would have been far preferable if in fact we had kept it general instead of trying to be specific about where arrest and search warrants might be executed, in trying to delineate those instances, if we had just left it to a provision that the Inspector General would have the authority that any other law enforcement office would have, to seek an arrest warrant, a search warrant, in accordance with the laws of the United States. That would have done it, instead of trying to specify those areas, such as we have, in the presence, for instance, of a police officer. That is not required under the common law, under the case law. The only thing that is required in a felony investigation is that there be probable cause to believe that an offense has been committed, a felony has been committed, and that the defendant has committed the offense. We are limiting that. We are creating a bastard type of provision now in statute law which I think is unfortunate. And it perhaps can be cleaned up in conference. I know my colleague, the gentleman from Ohio, shares that concern, because my colleague had some language he was going to offer and, apparently, he had decided not to, that would clean up that provision. If in fact my colleague would be willing to work along that line, at least it would be far preferable to what we have.

Let me move on to my broader concern. In my capacity as chairman of the Subcommittee on Crime, we have had witness after witness from the administration come in an indicate to us that we do not have the resources to fund our law enforcement community in the fashion that we need to. The FBI took a $4.5 million cut in the last round. They are now targeted for a $44 million cut under the new round of cuts. They have taken at the present time such cuts that we are now unable to even accommodate State agencies in running fingerprint checks essential in trying to check whether individuals have criminal records when they are applying for sensitive positions.

So we do not have the resources to enable our law enforcement community, the community that really should be investigating fraud, abuse and corruption in food stamps and health care and all of the other myriad services that we provide; but we are going to commit resources now to provide another area of law enforcement, in the area of inspectors general, whose job primarily was one of internal audit and administrative responsibility. It does not make sense. We are now creating another posse, really, much like posse comitatus. We do not have money to enable the Bureau of Alcohol, Tobacco and Firearms, the Drug Enforcement Administration, the FBI, the U.S. Marshals to carry out their functions, but we are going to provide moneys at this point for the Inspector General to take on new law enforcement responsibilities. It is the wrong direction. The Drug Enforcement Administration now has to cutback in many of their functions, including the functions overseas, because they do not have enough moneys to do their job. The Department of the Treasury is looking at annihilating the Bureau of Alcohol, Tobacco and Firearms because of budget cuts. They are now looking at the possibility of cutting back in our capability to trace handguns in the area of recordkeeping. We are going to annihilate the arson squads, that have been so effective in the BATF, because we do not have enough moneys. We are eliminating training programs for local police officials because we do not have enough resources. But we have enough moneys, apparently, to create another area of responsibility, another law enforcement agency, if you will, in the Inspector General. It is insane. It is the wrong way to go.

I understand that there were some compromises struck in committee to try to salvage the food stamp program, and I respect that.

(By unanimous consent, Mr. HUGHES was allowed to proceed for 2 additional minutes.)

Mr. HUGHES. I am a strong supporter of the food stamp program, and I want to see a food stamp program survive. But not at the expense of first of all jeopardizing constitutional rights—and that is what we are doing under the fourth amendment. We are creating another statutory mandate which is going to be a bastard provision in the statute law creating limita-

tions on law enforcement officials when they can seek arrest warrants and search warrants.

I just hope my colleagues will reject the amendment and, hopefully, if we do need additional authority, we can go back in the proper committees and develop the authority in the way that we should be developing authority for law enforcement or for any other aspect of the bill.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I am sure my colleague knows full well—because I am sure he has heard from his constituents and others—the fraud and abuse in this program is just outrageous. The people who are really in need under this program for genuinely needed food stamps are also outraged that there has been so much fraud and abuse. I am sure that the gentleman does not object to the attempt to try to put better discipline in the system to prevent this kind of fraud and abuse which the General Accounting Office has shown us in report after report runs as high as 20 percent or 30 percent in some areas.

I am sure the gentleman is not trying to prevent in any way the attempt by this committee and now the full House to give some discipline capability to the Department of Agriculture.

Mr. HUGHES. If I could recapture my time, the gentleman from California knows better than that. That is not the issue.

Mr. ROUSSELOT. I just did not want to let the time go by without mentioning that these measures were made necessary because of such widespread abuse.

Mr. HUGHES. I do not condone fraud, abuse or corruption in any area, whether you are talking about food stamps or health care. How about in health care?

Mr. ROUSSELOT. There certainly is a problem of abuses in say various State health plans.

Mr. HUGHES. Is my colleague concerned about that?

Mr. ROUSSELOT. You bet.

Mr. HUGHES. Do we want to create in the Health and Human Services Department and in the Inspector General this same law enforcement authority?

Mr. ROUSSELOT. If it will help to put a handle on the abuse in medicare that has occurred in my State, the answer is "Yes."

Mr. HUGHES. I say to my colleague, who happens to be one of the most fiscally responsible individuals in this House, and who well knows that law enforcement functions belong in the law enforcement community, that the answer is to provide the police officers, the law enforcement people, with the resources so that they can do a better job.

The 12- or 14-month lag that we have in cases in investigations are directly the result of inadequate facilities, inadequate manpower commitments on the part of the Federal Government in these agencies that should be taking the lead. It is a matter of prioritizing these areas. In fact, what we should be doing is strengthening the internal review processes for the Inspector General, identifying those areas where felonies or misdemeanors are being committed, and referring those to the proper law enforcement agencies and funding them so that they can do a decent job. That is the issue. It is not a question of whether you are for fraud and abuse. I do not know anybody in the Congress who is for fraud and abuse, and I am sure my colleague does not.

The CHAIRMAN. Are there further amendments to title XIII?

AMENDMENT OFFERED BY MRS. ROUKEMA

Mrs. ROUKEMA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. ROUKEMA: Page 91, after line, 2 insert the following new section (and redesignate succeeding sections accordingly):

ENERGY ASSISTANCE PAYMENTS; EXCLUDED PAYMENTS OF OTHER PROGRAMS

SEC. 1308. Section 5(d) of the Food Stamp Act of 1977 is amended by striking out "and (11)" the first place it appears and all that follows through the period, and by inserting in lieu thereof the following:

"(11) any income that any other Federal law specifically excludes from consideration as income for purposes of determining eligibility for the food stamp program, and (12) any payments or allowances made under (A) any Federal laws for the purpose of providing energy assistance or (B) any State or local laws for the purpose of providing energy assistance, designated by the State or local legislative body authorizing such payments or allowances as energy assistance, and determined by the Secretary to be provided by the State or local government involved on a seasonal basis for an aggregate period not to exceed 6 months in any year.".

Mrs. ROUKEMA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from New Jersey?

There was no objection.

Mrs. ROUKEMA. Mr. Chairman, I am offering a simple amendment to spell out clear requirements with regard to the relationship between State low-income energy assistance and food stamp eligibility.

My amendment would not add any new food stamp recipients to the rolls. It would not increase Federal expenditures, and it definitely would not affect Federal energy assistance programs.

It would, however, close a loophole that currently permits States to shift more of the cost of their State welfare programs to the Federal Government via the food stamp program. At the same time, my amendment would protect the legitimate recipients of food stamps and low-income energy assistance.

The loophole needs closing because of allegations that three States have allegedly manipulated the law by raising welfare payments and calling them energy assistance. By doing so, a higher portion of the welfare burden is shifted to the Federal Government because energy assistance is not counted as income for food stamp applicants. I do not know whether these allegations are correct, but it is clear that the potential for misapplication of the existing law is there.

The other body, however, went far beyond just closing the loophole, and in the process adopted a formula that would drastically affect the very neediest citizens in many States. There are at least 11 States that have low-income energy assistance programs similar to the one in my own State of New Jersey. The formula adopted by the other body would count State low-income energy assistance as income in determining food stamp eligibility. In amending the current law arbitrarily, we would inadvertently have a disastrous effect on our very neediest citizens in many States. For example, New Jersey's low-income energy assistance program, called Lifeline, serves 377,000 people—all senior citizens and disabled. Of those 377,000, approximately 177,000 received direct cash grants because they are tenants, and thus do not make direct utility payments. These tenants are the people who would find their food stamp benefits reduced or, in about half the cases, completely eliminated. Remember, we are talking about seniors or the disabled. And note that there are programs similar to New Jersey's in at least 10 other States where people would be similarly affected. Thus, the attempt by some to make sure that the State energy assistance programs are really energy assistance programs—and not welfare increases—could have unintended effects.

All my amendment does is finally define, within the law, "energy assistance." It could not be more basic. It would have to be seasonal; it would have to be designated by the authorizing legislative body specifically as energy assistance. Clearly, the distinguishing feature would be its seasonal nature. This would assure us of the fact that the payments would indeed be for higher energy costs that occur during a particular time of the year.

The National Governors Association is on record in supporting this concept. We could still save as much as

$133 million, according to the U.S. Department of Agriculture, if the allegations about these three States are true and we close the loophole. We do so without spending one additional dollar, and we can do so without adding one person to the food stamp roles, and we can do so while protecting those people who receive legitimate energy assistance and would otherwise face loss or reduction of their food stamp benefits.

I say we can eliminate the potential for abuse while protecting the truly needy. No American citizen would be forced to choose between food or heat. I ask the support of the Committee and the support of my colleagues for this amendment.

□ 1200

Mr. RICHMOND. Mr. Chairman, will the gentlewoman yield?

Mrs. ROUKEMA. I yield to the gentleman from New York.

The CHAIRMAN. The time of the gentlewoman from New Jersey (Mrs. ROUKEMA) has expired.

(At the request of Mr. RICHMOND and by unanimous consent, Mrs. ROUKEMA was allowed to proceed for 2 additional minutes.)

Mr. RICHMOND. Mr. Chairman, I would like to commend the gentlewoman on a very, very sensitive amendment and her diligent work on this amendment. I have no problem with the gentlewoman's amendment so long as it is understood it would not take effect and that existing law would continue to operate until a reasonable time had elapsed in which the State legislatures would have an opportunity to meet in order to comply with the specifics of this amendment relating to designation and the seasonal limitation of payment.

Does the gentlewoman agree that is her intent also?

Mrs. ROUKEMA. Yes; it is not only the intention, but it would be essential for the actual operation.

Mr. RICHMOND. I thank the gentlewoman and I am perfectly happy to accept the amendment.

Mr. COLEMAN. Mr. Chairman, will the gentlewoman yield?

Mrs. ROUKEMA. I yield to the gentleman from Missouri.

Mr. COLEMAN. I thank the gentlewoman for yielding.

What a reasonable period of time might be to the Missouri Legislature may be something different from what the New York General Assembly might consider a reasonable time.

Would the gentleman agree and would the author of the amendment agree that the States would have 90 days or 120 days after the enactment of this law to make their changes?

Mr. RICHMOND. One hundred and twenty days? How about during the next session of the State legislature? Would that suit the gentleman from Missouri?

Mr. COLEMAN. Yes.

Mrs. ROUKEMA. Yes.

Mr. COLEMAN. I think that would be a reasonable period of time, or in a special session, if they were to meet prior to that time, because I know the States vary.

I would compliment the gentlewoman from New Jersey who has presented an amendment that is well balanced trying to reduce the subterfuge by certain States but at the same time recognizing when there is a need for energy assistance the States can provide that and they are not going to be penalized. I congratulate the gentlewoman for her amendment.

Mrs. ROUKEMA. I thank the gentleman.

Mr. AuCOIN. Mr. Chairman, as a Member of Congress from one of the three States affected by this amendment, I object to the gentlelady's statement that these States have tried to push off costs of the food stamp program onto the Federal Government.

Oregon has excluded energy assistance in determining income eligibility for food stamps and thus was able to increase the amount of food given to hungry people. But it did not put a financial burden on the Federal Government. My State has a good record of taking innovative steps in other human services programs which resulted in reduced costs.

Actions taken by Oregon in reducing Federal matched AFDC payments saved the Federal Government more money in the AFDC program than it cost the Federal Government in the food stamp program. For example, it terminated its participation in the AFDC unemployed program and substituted a 100-percent State-funded program. This saved the Federal Government over $18 million a year. Also, the State enacted a law in 1979 which allows the State to count the income of stepparents in determining AFDC eligibility and grant levels. This action saved the Federal Government over $6.8 million and came before one of the administration's AFDC proposals. Finally, Oregon put together a job development program with the goal of finding employment for AFDC applicants before they become recipients. This saved the Federal Government over $12.3 million on a yearly basis.

These imaginative programs—including the energy assistance exclusion—are part of a comprehensive package. They show that the State is fiscally responsible and is sensitive to the problems of the Federal Treasury. They show compassion by increasing food to the needy.

I oppose the amendment offered by the gentlelady from New Jersey. Although I know it will be accepted as a compromise, I want the RECORD to show my opposition. Hungry people who are struggling with high utility bills will be the losers.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from New Jersey (Mrs. ROUKEMA).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. EVANS OF IOWA

Mr. EVANS of Iowa. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. EVANS of Iowa: Page 120, line 1, add the following new section 1341 and redesignate the remaining sections:

RETAIL REDEMPTION

SEC. 1341. Section 10 of the Food Stamp Act of 1977 is amended by striking out the term "bank(s)" whenever it appears throughout this section and substituting in lieu thereof the following:

"Financial institutions which are insured by the Federal Deposit Insurance Corporation (FDIC) or the Federal Savings and Loan Insurance Corporation (FSLIC).".

Mr. EVANS of Iowa (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. EVANS of Iowa. Mr. Chairman, this is really a technical amendment, a corrective amendment, if you will, which I believe updates an anachronism in the Food Stamp Act of 1977.

When that act was enacted, it provided that food retailers would redeem stamps taken in trade by depositing them in their checking accounts in commercial banks. The banks would then redeem the stamps through their regional Federal Reserve banks.

At the time, this was a very satisfactory procedure for handling redemptions since all food retailers conducted their business through checking accounts in commercial banks. But in the interim, NOW accounts or checking accounts here evolved in savings and loan institutions and these NOW accounts can be used as business checking accounts by businesses which are sole proprietorships.

There are now at present 40,000 sole proprietorships using NOW accounts and many of these are mom and pop grocery stores that accept food stamps, but the problem is that under present law those grocery stores cannot redeem their stamps by depositing them in checking accounts in savings and loans, and those thrift institutions cannot clear the stamps through the Federal Reserve.

This amendment solves that problem by amending the redemption section of the Food Stamp Act to recognize the existence of checking accounts in savings and loans and to permit savings and loans to redeem food stamps for grocers and then clear those stamps through the Federal Reserve.

Mr. RICHMOND. Mr. Chairman, will the gentleman yield?

Mr. EVANS of Iowa. I yield to the gentleman from New York.

Mr. RICHMOND. I thank the gentleman for yielding.

I have no trouble with the amendment of the gentleman from Iowa (Mr. EVANS) to permit savings and loan associations and other financial institutions insured by FDIC or FSLIC to redeem food stamp coupons for retailers in the same fashion as banks now do, since we are currently in the process of removing all major substantive distinctions between banks and other financial institutions that are not banks.

To the extent that the participation of the savings and loans expands the potential numbers of those who could perpetrate fraud, it will be necessary to apply greater vigilance, but the Department should be doing that anyway.

I find the gentleman's amendment most acceptable and commend the gentleman for his amendment.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. EVANS of Iowa. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank the gentleman for yielding.

Does this prohibit just anybody from depositing food stamps in a savings account or does it state only those in a retail level in business who are able to do this?

Mr. EVANS of Iowa. It would continue the same restrictions that are imposed upon commercial banks at the present time. These same restrictions would apply to the checking accounts in savings and loans.

In short, I think that the same safeguards would prevail in the future as have prevailed in the past.

Mr. ROUSSELOT. Could the gentleman tell us, has it been difficult for mom and pop grocery stores, as he says, to convert these food stamps to cash? I know the people who use the food stamps have no problem converting them to cash and then buying other things like liquor. Is it really a problem?

Mr. EVANS of Iowa. Yes, it is a problem because when they go to the savings and loans, the savings and loans are not allowed to accept those stamps. Some of them do. If they do, in order to clear them, they then have to take the stamps to a commercial bank. This imposes an additional burden on the commercial banking system to clear stamps that should be cleared through the savings and loans.

I would add that I have discussed this at some length with senior officers of a regional Federal Reserve bank responsible for this function. They see no reason why it should not work. They think it will add to the efficiency of the system and do not believe it will add to their regulatory load.

Mr. ROUSSELOT. If the gentleman will yield further, we certainly are acknowledging now that food stamps are another form of currency, are we not?

Mr. EVANS of Iowa. I do not know that this adds to that perception.

Mr. ROUSSELOT. The gentleman is suggesting that food stamps be deposited in the savings account or a NOW account of a person in a small retail business. As the gentleman indicated, we are acknowledging that food stamps are a form of currency.

Mr. EVANS of Iowa. I think that has been done in other ways than through this particular amendment.

Mr. ROUSSELOT. Well, I have grave reservations about this action, but there is not much I can do because I am sure if I ask for a vote most people coming in the door would not understand what we are doing.

All the savings and loans security and bank officers are demanding that we do this?

Mr. EVANS of Iowa. It is greatly desired by the savings and loan industry and it has not been objected to by the American Bankers Association, and it was brought to their attention and discussed in some detail with them and they raised no objection to this.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. EVANS).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. ENGLISH

Mr. ENGLISH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ENGLISH: Page 88, after line 6, insert the following new section (and redesignate succeeding sections accordingly):

INDIAN RESERVATIONS

SEC. 1304. Section 3(j) of the Food Stamp Act of 1977 is amended by inserting", and includes any lands over which a tribal organization (as that term is defined in section 3(p) of this Act) has authority to exercise any governmental jurisdiction" before the period.

Mr. ENGLISH. Mr. Chairman, I have an amendment to title 13 of the farm bill which will eliminate an inequity in the current law with regard to the participation of Indian tribes in the food distribution program.

In the 1977 food stamp amendments, the commodities program for individuals was terminated and everyone switched to food stamps, except Indians. At that time it was decided that because of the dire nutritional need and the difficulty of obtaining food stamps that the commodities program should be continued for Indians who live in or near a reservation which was defined as a "geographically defined area or areas over which a tribal organization exercises governmental jurisdiction." After the 1977 act, the Department of Agriculture decided by regulation that federally recognized tribes in Oklahoma were not eligible because there are no reservations.

After some questioning by members of the Oklahoma delegation, the Department has decided that they would allow Oklahoma tribes to apply for participation. Unfortunately, the Department would place requirements on Oklahoma tribes that are not placed on other tribes; namely, that the tribes have a power of enforcement either through a separate court system, or a separate law enforcement system.

I and other Members from Oklahoma feel that this is a very undesirable situation and believe that this amendment will clarify and eliminate the inequity that currently exists.

Mr. RICHMOND. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I yield to the gentleman from New York.

Mr. RICHMOND. I thank the gentleman for yielding.

I would like to thank the gentleman from Oklahoma (Mr. ENGLISH) for his deep interest in the welfare of Indians and State that our committee accepts the amendment.

Mr. ENGLISH. I thank the gentleman.

The CHAIRMAN. The question is one the amendment offered by the gentleman from Oklahoma. (Mr. ENGLISH).

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. JEFFORDS

Mr. JEFFORDS. Mr. Chairman, I offer two amendments, and ask unanimous consent that they be considered en bloc.

The Clerk read as follows:

Amendments offered by Mr. JEFFORDS: On page 120, after line 22, insert a new section as follows:

HOUSEHOLD DEFINITION

SEC. 1343. Section 3(i) of the Food Stamp Act of 1977 is amended by inserting before the period at the end of the first sentence the following: ", or receives supplemental security income benefits under title XVI of the Social Security Act or disability or blindness payments under title I, II, X, XIV, or XVI of the Social Security Act".

Page 120, insert a new section as follows:

REIMBURSEMENT EXCLUSION

SEC. 1344. Section 5(d)(5) of the Food Stamp Act is amended by adding before the comma the following: ": *Provided*, That no portion of benefits provided under title IV-A of the Social Security Act, to the extent it is attributable to an adjustment for work-related or child care expenses, shall be considered such reimbursement.".

Mr. JEFFORDS (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Vermont?

There was no objection.

The CHAIRMAN. Is there objection to the initial request of the gentleman from Vermont?

There was no objection.

Mr. JEFFORDS. Mr. Chairman, this amendment would make a minor modification in one of the food stamp provisions included in the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35). In that act, the definition of "household" was modified to provide that all children and parents who live together will be treated as one food stamp household whether or not they customarily purchase and prepare meals together for home consumption, unless one of the parents is 60 years of age or older.

This amendment would add another exception to the general rule. It would allow parents and children who live together to qualify as separate households if one of the parents is disabled and receives assistance from another program—such as SSI, social security disability, or aid to the blind or disabled.

This amendment does not change the current requirement that all parents and children who ordinarily purchase and prepare food together shall be treated as one household for food stamp purposes. It simply would allow disabled parents to qualify independently of their children if, in fact, they do not purchase and prepare food together.

This amendment would affect very few families and have minimal cost. CBO estimates the cost at less than $1 million. However, for the very few families who are affected, it has a most important impact.

Senator HUDDLESTON, whose interest in this amendment spurred my own, provided me with the following example. A constituent of his from Brownsville, Ky., has received notice that he and his wife will be ineligible for food stamps effective November 1, 1981. The gentleman is a quadriplegic whose only source of income is $285 a month in social security disability payments. His housing and medical costs alone exceed $400 a month.

Yet, because his daughter lives with him and helps care for him, the recently enacted law would deprive him of all of his food stamp benefits. Her modest salary puts the household's income just above the cutoff level for eligibility.

I really do not believe that this is the type of person we intended to remove from the food stamp rolls when we passed Public Law 97-35. In that law, we did put in a special exemption to protect elderly parents from an unfair loss of benefits.

I believe the same protection should be afforded to permanently and totally disabled parents. I do not believe that the law should provide a financial disincentive against children living with parents who need their care. I urge my colleagues to approve this humane and sensible amendment.

I offer my thanks to Senator HUDDLESTON for bringing this issue to my attention.

Mr. RICHMOND. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from New York.

Mr. RICHMOND. I thank the gentleman for yielding.

I thank the gentleman for his sensitivity to the needs of the disabled and elderly people and we are delighted to accept the gentleman's amendment.

Mr. JEFFORDS. Mr. Chairman, this amendment would exclude as a reimbursement in the food stamp program the benefits received for work-related and child-care expenses under the AFDC program.

There is a case pending in the district court of Vermont in which the plaintiffs are asking for a double counting of AFDC benefits. The plaintiffs are interpreting, in a new way, the food stamp law. They claim that not only should their work and child-care expenses be disregarded when computing food stamp benefits, but that also the income they received under the AFDC program, that can be attributed to meeting these expenses, should be disregarded.

If the decision in Vermont favors the plaintiffs, the costs of the Federal food stamp program will increase. In the State of Vermont alone, which receives a mere two-hundredths percent of the food stamp program, the estimated increase in Federal payments will be $0.6 million. There will also be a greater burden on the State in terms of administrative costs. But this decision does not affect only Vermont. Unless overruled it will change administration of the whole program. The case will place increasing demands on an already overburdened food stamp program.

This amendment does not change how the food stamp program currently operates. I offer it merely to clarify the language of the law so that it truly reflects the spirit in which it was written. It was not the intent of this program to allow such a double deduction of benefits. Participants would continue to get disregards for work and child-care expenses under both AFDC law and food stamp law.

Therefore, I urge my fellow Members to support this amendment. If the language is not corrected, the potential cost to the Federal food stamp program could be significant. Let us prevent this costly misinterpretation of food stamp law.

Thank you, Mr. Chairman.

Mr. RICHMOND. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from New York.

Mr. RICHMOND. I thank the gentleman for yielding.

I am happy to say our committee will accept the gentleman's second amendment also.

Mr. JEFFORDS. I appreciate that.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Vermont (Mr. JEFFORDS).

The amendments were agreed to.

AMENDMENT OFFERED BY MR. ENGLISH

Mr. ENGLISH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ENGLISH: Page 114, after line 7, insert the following new section (and redesignate succeeding sections accordingly):

PILOT PROJECTS TO SIMPLIFY THE PROCESSING OF APPLICATIONS FOR CERTAIN AFDC, SSI, AND MEDICAID RECIPIENTS

SEC. 1336. Section 17 of the Food Stamp Act of 1977 is amended by adding at the end thereof the following new subsection:

"(d) The Secretary may conduct pilot projects in which households that include one or more recipients of aid to families with dependent children under part A of title IV of the Social Security Act, of supplemental security income under title XVI of the Social Security Act, or of medical assistance under title XIX of the Social Security Act, and whose income does not exceed the applicable income standard of eligibility described in section 5(c) of this Act shall be deemed to satisfy the application requirements prescribed under section 5(a) of this Act and the income and resource requirements prescribed under subsections (d) through (g) of section 5 of this Act. For any pilot project carried out under this subsection, allotments provided pursuant to section 8(a) of this Act shall be based upon household size and (1) benefits paid to such household under Part A of Title IV or Title XVI of the Social Security Act, or (2) income as determined for eligibility under Title XIX of the Social Security Act, or at the option of the political subdivision or the State, the standard of need for such size household under such programs, except that the Secretary shall adjust the value of such allotments as may be necessary to ensure that the average allotment by household size for households participating in such pilot project and receiving such aid to families with dependent children, such supplemental security income, or such medical assistance, as the case may be, is not less than the average allotment which would have been provided under this Act but for the operation of this subsection, for each category of households, respectively, in such pilot project area, for any period during which such pilot project is in operation. The Secretary may conduct such pilot projects in any political subdivision of a State, upon the request of such political subdivision, or throughout a State, upon the request of such State. The Secretary shall evaluate the impact of such pilot projects on recipient households, administrative costs, and error rates. The administrative costs of such projects shall be shared in accordance with the provisions of section 16. In implementing this section, the Secretary shall consult with the Secretary of Health and Human Services to ensure that to the extent practicable, in the case of households participating in such pilot projects, the processing of applications for, and determinations of eligibility to receive, food stamp benefits are simplified and are unified with the process-

ing of applications for, and determinations of eligibility to receive, benefits under such titles of the Social Security Act.".

Mr. ENGLISH (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. ENGLISH. Mr. Chairman, together with the gentleman from Illinois (Mr. FINDLEY) I am offering an amendment to title 13 of the farm bill providing authorization for a pilot project which would considerably reduce paperwork and create a savings in operational costs for the food stamp program.

Approximately 40 percent of the food stamp recipients in Oklahoma are also recipients of supplemental security income (SSI) and aid to families with dependent children (AFDC). Currently people receiving SSI and AFDC must fill out duplicate forms for food stamp application. My amendment would allow participants in SSI, medicaid, and AFDC who are involved with the pilot project and meet the income requirement for food stamps become automatically qualified for food stamp benefits without making duplicate applications. This procedure would simplify the application process by alleviating the unnecessary burden of filling out additional forms, thereby reducing the amount of paperwork which must be reviewed and processed by staff.

In my State of Oklahoma, officials estimate that this amendment would result in a $2 million savings, nearly 20 percent of the total administrative budget in the Department of Human Services.

Our country is now working toward a balanced budget and a decrease in Federal spending without reducing benefits to those who are truly in need. My amendment is a step in that direction.

Mr. RICHMOND. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I yield to the gentleman from New York.

Mr. RICHMOND. I thank the gentleman for yielding.

I want to thank the gentleman for his amendment which I fully support and I am happy to say our committee accepts the gentleman's amendment.

□ 1215

Mr. SAM B. HALL, JR. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I would be happy to yield to the gentleman from Texas.

Mr. SAM B. HALL, JR. As I understand the amendment, anyone who has already qualified for AFDC and SSI benefits, those people are automatically qualified for food stamps without having to go file an application and go through the paperwork.

Mr. ENGLISH. The duplication of paperwork, of course, that is correct. In order to qualify, obviously, they are going to have to go through the process for SSI or AFDC and establish what their income requirements are.

What this would do is remove the duplication that States have to go through.

Let me say, first of all, this is only a pilot project. It allows the Secretary to establish such a pilot project to look into the feasibility of cutting back on such duplication.

Mr. SAM. B. HALL, JR. I thank the gentleman.

Ms. FIEDLER. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I would be happy to yield to the gentlewoman from California.

Ms. FIEDLER. I wonder if the gentleman could tell me whether those people who all apply for SSI today also qualify for food stamps or if there is a difference between the numbers of those who both qualify and those who apply?

Mr. ENGLISH. To my knowledge, there would definitely be a difference between those who apply and those who are finally approved. Obviously, some are not approved.

Certainly there would be a difference between those who would receive food stamps and those who may qualify for FDC or SSI.

The point is the income limitations on the requirements that are necessary under the food stamp program would be established under that application. In other words, their application would be determined there.

Ms. FIEDLER. What I am concerned about is the possibility that by passing this amendment which makes good sense from a paperwork standpoint that it would permit expanded eligibility for food stamps. I would want to know what would be the outcome of that.

Mr. ENGLISH. No; that is not the intention of the amendment at all.

Let me again state that what we are doing here is establishing a pilot project to look into this possibility and to review the possibility; but certainly we are not trying to say automatically regardless of your income that you are going to qualify; but under most conditions, you will.

Ms. FIEDLER. Would the gentleman expect this to be implemented in the broader sense or only in a very narrow sense or merely a study to be done?

Mr. ENGLISH. Well, this is a study. This is only a pilot project.

Ms. FIEDLER. I thank the gentleman.

Mr. FINDLEY. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I would be happy to yield to the gentleman who is a cosponsor of the amendment, the gentleman from Illinois (Mr. FINDLEY).

Mr. FINDLEY. I really appreciate the leadership that the gentleman from Oklahoma has provided here.

Mr. Chairman, I rise in support of the amendment offered by the gentleman from Oklahoma. As I understand it, this amendment will provide for demonstration projects aimed at the simplification of the process whereby people are evaluated for eligibility for assistance. This amendment provides that the Secretary of Agriculture may conduct pilot projects, in any State, county, or city, upon the request of that State, county, or city. The political entity applying for the opportunity to conduct a pilot project may include those households in which one or more members or all members, if they so choose, receive aid to families with dependent children, supplemental security income, or medicaid, and whose income does not exceed the maximum allowable standards of the food stamp program.

The gentleman's amendment provides that the Secretary will evaluate these pilot projects to determine the impact on error rates, recipient households, and administrative costs. The Secretary is authorized to pay the regular reimbursement rate for the administrative costs of these pilot projects. Additionally, the Secretary of Agriculture will consult with the Secretary of Health and Human Services to insure, to the extent practicable, that the processing of applications and the determinations of eligibility under this pilot project are simplified and unified.

The current system for determining eligibility for families applying for more than one type of assistance is cumbersome, error-prone and costly. The regulations for the food stamp program, the AFDC program, the SSI program and the medicaid program differ considerably and are confusing for both administrators and recipients alike.

These programs, in most areas, are administered side by side—by the same State or local officials. The gentleman's amendment will allow for demonstration projects to test how common eligibility criteria and common application forms could be utilized to simplify the process.

The common administration of these programs will provide cost savings to the Federal Government as well as to State and local governments. These savings can be realized by the reduction of program specialization of staff, duplication of forms and personnel, and the time necessary to evaluate the eligibility of the same family for different types of assistance.

Allow me to stress one very important point—I do not foresee nor should there be any increase in the number of people receiving benefits from any of these programs as a result of the pilot proj- ects. These demonstration projects are aimed at taking a specific group of people—who are now applying for assistance in more than one of the categories I mentioned earlier—and merging that process so that their eligibility may be ascertained through one, simplified process.

I would like to ask a question of the gentleman from Oklahoma. Is it your understanding that States, counties, or cities, upon enactment of this legislation, could submit plans for the pilot projects to the Secretary of Agriculture immediately?

If a State, a county or a city is prepared to implement such a pilot project, could they do so by January 1, 1982?

I would strongly urge the Secretary of Agriculture to act without delay in implementing this provision so that anyone submitting a plan for such a pilot project could begin as early as January 1982. I believe that the States, counties, and cities are the best judges of when they could begin such projects.

I urge you to support this amendment—to allow demonstration projects which are monitored by the Secretary of Agriculture—to see if there is a way to simplify the process of evaluating eligibility for people applying for assistance.

Mr. ROEMER. Mr. Chairman, would the gentleman yield?

Mr. ENGLISH. I would be happy to yield to the gentleman from Louisiana.

Mr. ROEMER. Mr. Chairman, I thank the gentleman for yielding. I appreciate the gentleman's amendment.

I just want to say for the record and to the gentleman, too, that the gentleman is not trying to either expand or contract eligibility in terms of food stamps; the gentleman is trying to eliminate a duplicating paperwork step, and that is it?

Mr. ENGLISH. Absolutely, positively, no question about it. The gentleman is totally correct.

Mr. ROEMER. Mr. Chairman, I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma (Mr. ENGLISH).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. WAMPLER

Mr. WAMPLER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WAMPLER: Page 106, after line 24, insert the following new section (and redesignate succeeding sections accordingly):

ACCESS OF COMPTROLLER GENERAL TO INFORMATION

SEC. 1323. (a) Section 9(c) of the Food Stamp Act of 1977 is amended by adding at the end thereof the following: "Such purposes shall not exclude the audit and examination of such information by the Comptroller General of the United States, authorized by any other provision of law.".

(b) Section 11(d)(8) of the Food Stamp Act of 1977 is amended by inserting before the semicolon the following: ", except that such safeguards shall not prevent the use or disclosure of such information to the Comptroller General of the United States for audit and examination authorized by any other provision of law".

Mr. WAMPLER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

There was no objection.

Mr. WAMPLER. Mr. Chairman, I am offering an amendment to title XIII of H.R. 3603, which concerns the food stamp program. I am offering this amendment because a question has arisen between the General Accounting Office and the Department of Agriculture concerning access by the GAO to food stamp program records containing data on individual program recipients. This amendment makes it clear that it was never the intent of Congress to deny access by GAO to these records.

GAO's authority to audit and access to records as applied to the food stamp program is firmly established by a number of statutes. Thus, GAO's audits of the food stamp program are contemplated, have been conducted, and should be regarded as a direct part of the administration and enforcement of the act.

Section 9 of the Food Stamp Act, which contains the same language as section 11, regarding disclosure of information on retail food stores applying to participate in the food stamp program, is also amended. The amendment is intended to insure that the language in section 9 is given the same interpretation regarding GAO access as the corresponding language in section 11.

I would like to emphasize that the GAO access to food stamp records, to my knowledge, has never been questioned before. The general authority granted to the GAO under the Intergovernmental Cooperation Act provides them access to all records and files of programs such as the food stamp program. This amendment places the description of access in the Food Stamp Act as well. This is not a new authority for the GAO, but, simply, a clarification of their existing access to records and files for the food stamp program.

Let me remind you of the GAO reports issued since 1976 on the food stamp program. In order to complete their review, the GAO had to have access to food stamp case files and records for recipients and retail food stores.

February 1976: "Processing Applications for Food Stamps—How Long Does It Take?"

April 1976: "Student Participation in the Food Stamp Program at Six Selected Universities."

July 1977: "The Food Stamp Program—Overissued Benefits Not Recovered and Fraud Not Punished."

April 1978: "Food Stamp Work Requirements—Ineffective Paperwork or Effective Tool?"

June 1978: "Federal Domestic Food Assistance Programs—A Time for Assessment and Change.

December 1978: "Regulations of Retailers Authorized To Accept Food Stamps Should Be Strengthened."

July 1981: "Insights Gained in Workfare Demonstration Projects."

I am not sure why this controversy came about. I am sure that it is in the best interest of the Congress that the GAO continue to have access to food stamp files and records so that they may provide the necessary response and oversight on this very visible program.

I urge you to support this amendment.

Mr. RICHMOND. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I yield to my colleague, the gentleman from New York.

Mr. RICHMOND. Mr. Chairman, I thank the gentleman for the amendment. Our committee finds this acceptable.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Virginia (Mr. WAMPLER).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: Page 87, after line 4, insert the following new section and redesignate succeeding sections accordingly:

SEC. 1302. (a) Section 3(b) of the Food Stamp Act of 1977, is amended by inserting "and any amount to be paid by such household for such allotment" before the period.

(b) Section 7(d) of the Food Stamp Act of 1977 is amended by striking out the third and fourth sentences.

(c) Section 8(a) of the Food Stamp Act of 1977 is amended by striking out "reduced by" and all that follows through "this elimination".

(d) Section 8(b) of the Food Stamp Act of 1977 by inserting "which is in excess of the amount charged such household for such allotment" after "eligible household".

(e) Section 8 of the Food Stamp Act of 1977 is amended by adding at the end thereof the following new subsections:

"(c) Nothwithstanding any other provision of law, households, other than households containing a member who is sixty years of age or over or who receives supple-

mental security income benefits under title XVI of the Social Security Act or disability payments under title II of the Social Security Act, shall be charged for the allotments issued to them, and the amount of such charge shall represent a reasonable investment on the part of the household, but in no event more than 30 per centum of the household's income, except that—

"(1) allotments may be issued without charge to households with an income of less than $30 per month for a family of four under standards of eligibility prescribed by the Secretary; and

"(2) the Secretary shall provide a reasonable opportunity for any eligible household to elect to be issued an allotment less than the allotment authorized to be issued to such household under subsection (a) of this section. The charge to be paid by any eligible household electing to exercise the option described in the preceding sentence shall be an amount which bears the same ratio to the amount which would have been payable under this subsection for an allotment issued to such household under subsection (a) as the allotment actually issued to such household bears to the allotment that would have been issued to such household under subsection (a).

"(d)(1) Funds derived from the charges made for allotments shall be promptly deposited, in a manner prescribed in the regulations issued pursuant to this Act, in a separate account maintained in the Treasury of the United States for such purpose. Such deposits shall be available, without limitation to fiscal years, for the redemption of coupons.

"(2)(A) The Secretary shall by regulation prescribe the manner in which funds derived from the distribution of coupons (charges made for allotments) shall be deposited by coupon issuers. Such regulations shall contain provisions requiring that coupon issuers promptly deposit such funds in the manner prescribed by the Secretary, except that such regulations shall, at a minimum, require that (i) such deposits be made at least weekly, and (ii) upon the accumulation of a balance on hand of $1,000 or more, such deposits be made within two banking days following the accumulation of such amount.

"(B) Any coupon issuer, or any officer, employee, or agent thereof, convicted of violating the regulations issued under subparagraph (A) of this paragraph shall be fined not more than $3,000, or imprisoned not more than one year, or both.

"(3)(A) Coupon issuers receiving funds derived from the distribution of coupons (charges made for allotments) shall be deemed to be receiving such funds as fiduciaries of the Federal Government, and such coupon issuers shall immediately set aside all such funds as funds of the Federal Government. Funds derived from the distribution of coupons (charges made for allotments) shall not be used, before the deposit of such funds in the manner prescribed by the Secretary, for the benefit of any person, partnership, corporation, association, organization, or entity other than the Federal Government.

"(B) Any coupon issuer, or any officer, employee, or agent thereof, convicted of violating subparagraph (A) of this paragraph shall be fined not more than $10,000 or a sum equal to the amount of funds involved in the violation, whichever is the greater, or imprisoned not more than ten years, or both, except if the amount of such funds is less than $1,000, then such issuer shall be fined not more than $3,000, or imprisoned not more than one year, or both.

"(4)(A) The Secretary shall by regulation require that upon the deposit, in the manner prescribed by the Secretary, of funds derived from the distribution of coupons (charges made for allotments), coupon issuers shall immediately send a written notice to the State agency, accompanied by an appropriate voucher, confirming such deposit. In addition to such other information deemed by the Secretary to be appropriate, such regulations shall require that such notice contain—

"(i) the name and address of the coupon issuer;

"(ii) the total receipts of such coupon issuer derived from the distribution of coupons (charges made for allotments) during the deposit period;

"(iii) the amount of the deposit;

"(iv) the name and address of the depository; and

"(v) an oath or affirmation signed by the coupon issuer or, in the case of a corporation or other entity not a natural person, by an appropriate official of the coupon issuer, certifying that the information contained in such notice is true and correct to the best of such person's knowledge and belief.

"(B) Any coupon issuer, or any officer, employee, or agent thereof, convicted of failing to provide the notice required under subparagraph (A) of this paragraph shall be fined not more than $3,000, or imprisoned not more than one year, or both.

"(C) Any coupon issuer, or any officer, employee, or agent thereof, who knowingly provides false information in any notice required under subparagraph (A) of this paragraph shall be fined not more than $10,000, or imprisoned not more than ten years, or both.

"(5)(A) The Secretary shall by regulation require each coupon issuer at intervals prescribed by the Secretary, but not less often than monthly, to send to the Secretary, or his designee, a written report of the issuer's operations during such period under the food stamp program. In addition to such other information deemed by the Secretary to be appropriate, the regulations shall require that the report contain—

"(i) the name and address of the coupon issuer;

"(ii) the total receipts of the coupon issuer derived from the distribution of coupons (charges made for allotments) during the report period;

"(iii) the total amount of deposits made by the issuer of funds derived from the distribution of coupons (charges made for allotments) during such period;

"(iv) the name and address of each depository receiving such funds from such issuer; and

"(v) an oath or affirmation, signed by the coupon issuer, or in the case of a corporation or other entity not a natural person, by an appropriate official of the coupon issuer, certifying that the information contained in the report is true and correct to the best of such person's knowledge and belief.

"(B) Any coupon issuer, or any officer, employee, or agent thereof, convicted of failing to provide any notice required under subparagraph (A) of this paragraph shall be fined not more than $3,000, or imprisoned not more than one year, or both.

"(C) Any coupon issuer, or any officer, employee, or agent thereof, who knowingly provides false information in any notice required under subparagraph (A) of this paragraph shall be fined not more than $10,000, or imprisoned not more than ten years, or both.

"(6) The Secretary may by regulation require State agencies to provide periodic reports to the Secretary, or his designee, containing a consolidation of the respective coupon issuer's notices to such State agencies at such intervals as the Secretary in his discretion deems appropriate.

"(7) The Secretary and the United States Postal Service shall jointly arrange for the prompt deposit of funds collected by the United States Postal Service on behalf of a State from charges made for coupon allotments.".

(f) The heading for section 8 of the Food Stamp Act of 1977 is amended to read as follows:

"Value of Coupon Allotment and Charges to be Made".

(g) Section 15(a) of the Food Stamp Act of 1977 is amended by inserting "purchase by and" before "issuance".

(h) Section 18(a)(1) of the Food Stamp Act of 1977 is amended by inserting after the second sentence the following: "Such portion of any such appropriation as may be required to pay for the value of the coupon allotments issued to eligible households which is in excess of the charges paid by such households for such allotments shall be transferred to and made a part of the separate account created under section 8(a) of this Act.".

(i) Section 18(b) of the Food Stamp Act of 1977 is amended—

(1) by inserting "(1)" after "(b)",

(2) by striking out the first sentence and inserting in lieu thereof the following: "In any fiscal year, the Secretary shall limit the value of coupons issued which is in excess of the value of coupons for which households are charged, to an amount which is not in excess of the portion of the appropriation for such fiscal year which is transferred in accordance with subsection (a) of this section to the separate account referred to in such subsection."; and

(3) by adding at the end thereof the following: "If the Secretary determines that any of the funds in such separate account are no longer required to carry out the provisions of this Act, such portion of such funds shall be paid into the miscellaneous receipts of the Treasury.".

Mr. WALKER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

Mr. CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALKER. Mr. Chairman, what this amendment does——

Mr. GLICKMAN. Mr. Chairman, if the gentleman would excuse me, would the gentleman yield?

Mr. WALKER. I yield to the gentleman.

Mr. GLICKMAN. Was this amendment noticed in the RECORD?

Mr. WALKER. I would say to the gentleman, and I am glad to yield to him, no, it was not printed in the RECORD. At the present time we are in the process of attempting to get copies to provide to all concerned parties. I think I can explain very quickly what

the amendment is, however. It could be a rather major amendment, but I will make certain that copies get to you as soon as we have them.

Mr. Chairman, this amendment in effect restores partially the purchase requirement to the food stamp program. This is a requirement that was in the food stamp program for the first years that it was in effect. It was in force, in fact, up until January 1, 1979. It is a requirement that was an attempt to do several things. Above all, it required people to evaluate their own diet based upon their own purchases. So therefore it added an extremely important nutritional component to the program.

It seems to me what we have done in recent years is that we have taken a lot of the nutritional components out of the program without, in my opinion, good cause. So what I am attempting to do here is put a nutritional component back into the food stamp effort by assuring that people do have to participate in some way on their own by putting their own money toward the food that they purchase.

I think it is important also to realize that since we eliminated the purchase requirement, the rolls in food stamps have increased dramatically. They have gone from 15.9 million on January 1, 1979, to 22.5 million people now participating in the program. That is an increase of almost 42 percent in that short period of time since we eliminated the purchase requirement.

I think that that is something that has to be evaluated at a time during which we are attempting to find places to reduce Government spending.

The original purpose of the act was always to permit low-income persons to purchase a nutritionally adequate diet. What this amendment will do is get us back to that idea, that people are purchasing a nutritionally adequate diet.

I might point out that the savings to the budget would be considerable under this amendment. The CBO, the Congressional Budget Office, estimates that if you restore partially the purchase requirement, put that together with the administration's other changes in the program, that you could save $1.4 billion annually. If this proposal that I am offering here today is implemented, and is implemented in March 1982, you could get a savings of over $800 million for fiscal year 1982. I think that that is something that we in this House have to consider favorably.

I might also point out that the amendment I am offering here is only a partial restoration of the purchase requirement in that it would exempt the elderly and the disabled from its provisions; so all other people participating in the food stamp program would have to pay, but by exempting the elderly and the disabled we assure that those unable to find money for purchasing stamps would not be harmed.

Mr. RICHMOND. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I want to thank the gentleman from Pennsylvania for his interest in reducing fraud, error, and abuse in our program and in improving the administration of the program.

I would like the gentleman from Pennsylvania to know that we have worked on this for 7 straight years and this bill has been before the House for 7 years.

Fortunately, 4 years ago we were able to finally convince this House and the Senate that the only way to run a clean relatively low-cost administrative food stamp program was to eliminate the purchase requirement, in addition to which we were able to identify millions of people in the United States who are so poor that they never had the purchase requirement with which to go ahead and buy their stamps at the time that the cash had to be paid. Therefore, they were unable to obtain their food stamps. We were able to identify millions of people who never had the $20 or $30 in their hands at one specific time so they could go ahead and buy their stamps; therefore, they were effectively out of the program. That was certainly not the intent of the Congress. We want to get down to the poorest people in the United States and give them the food stamps. I am sure the gentleman from Pennsylvania would agree, right? That is first.

Second, the gentleman from Pennsylvania should realize that money now costs considerably more than it did in 1977. Many check-cashing institutions are involved in delivering food stamps. I can assure the gentleman if we ever reinstituted the purchase requirement, this would be the greatest bonanza to the little check-cashing institutions throughout the United States than anything could possibly be, because they would then take the Government's money and use every possible means of holding up repayment to the Government, rather than repaying within 24 hours as the law says.

They would say their bank account was in Honolulu. They would say their bank account was in San Francisco or somewhere. That is the second reason. When money costs 20 percent, the gentleman can well realize how much money we are talking about if we were to reinstitute the purchase requirement. Federal money would be floating all over the United States and unfortunately we would never get a lot of it back as quickly as we ought to. That is the second reason.

The third reason is that in order to reduce fraud, waste and abuse, and administrative costs, you must eliminate the purchase requirement, because it adds massively to the problems of administering this program.

I would hope that when we finally finish this bill today and ultimately have the President sign it that we can then get down to improving the administration of the bill.

I believe that once this bill is set in cement, there is a good billion dollars we can take out of this bill by improving the administration, by reducing waste, fraud and abuse, particularly now that we have the machinery to do so, now that we have the photo I.D. cards, now that we have first endorser liability, now that we are not allowing wholesalers to accept food stamps. We have succeeded in plugging almost every loophole we have been able to identify to date.

The next thing is to move the food stamp program into the 20th century and computerize the entire program.

I would hope the gentleman would understand that reinstituting the purchase requirement will make the modern administration of this program totally impossible. It will waste enormous amounts of money in float for the U.S. Government. It will hurt all the truly needy people we are really trying to help and it will accomplish nothing.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. RICHMOND. Yes.

Mr. WALKER. I thank the gentleman for yielding, because I think the gentleman makes some excellent points, and I think it speaks to some of the concerns that have been addressed in my amendment.

The gentleman points out, I think rightfully so, that there were a lot of people in our society that could not come up with the purchase requirement.

Mr. RICHMOND. Two million.

Mr. WALKER. Two million, as the gentleman mentioned; however, I think we also found that the vast majority of those, I think it was over 75 percent of those, were elderly.

The amendment that I am offering here specifically exempts the elderly; so therefore of those 2 million people, I think the amendment speaks to that.

Mr. RICHMOND. No; even according to the gentleman's figures, that would still leave 500,000 very poor people who would not be able to buy food stamps.

Mr. WALKER. Mr. Chairman, if the gentleman would yield further, the other group of people that are exempt under my amendment are the disabled, which also fell into the category of which the gentleman speaks; so I think we have addressed some of the concerns there. Of course, the rolls have increased far more than the 2 million of which the gentleman speaks. Actually, they have gone up by

almost 7 million. That is one of the problems.

The other problem that I think we did not realize when Congress became convinced of the merits of doing away with the purchase requirement, as the gentleman has suggested, was that we were creating this new system of currency. One of the problems that we have seen now develop is the fact that we have created a second currency in this country. It has created more fraud, waste and abuse, then we ever believed was imaginable.

What I am attempting to do is reduce that character of the food stamp program by reducing its worth as an alternative dollar bill.

Mr. RICHMOND. I could tell the gentleman that as soon as this legislation is completed, our plan is to try to remove the actual food stamps from circulation. We believe that modern technology has developed programs by which we can deliver not food stamps, but simply credit slips at grocery stores in an absolutely safe fashion. Without food stamps, that would save us $60 million right there in printing food stamps, without authorization of purchase cards, without any mail fraud. I think we have developed a good program with the help of the gentleman from Kansas (Mr. COLEMAN), the ranking minority member.

The CHAIRMAN. The time of the gentleman from New York has expired.

(At the request of Mr. GLICKMAN, and by unanimous consent, Mr. RICHMOND was allowed to proceed for 3 additional minutes.)

Mr. RICHMOND. So it would eliminate all the paperwork, all the food stamps, all the ATP cards, all the mail out of the entire program.

Now, if the gentleman would just allow us to finish this piece of legislation and allow us to get back to work, I think we could show the gentleman that in a year's time a much improved food stamp program.

Mr. GLICKMAN. Mr. Chairman, would my colleague yield to me?

Mr. RICHMOND. I would be happy to yield.

Mr. GLICKMAN. Mr. Chairman, I would just like to tell my colleague that in the Senate report on this bill in the additional views of my senior Senator from Kansas, with whom I do not always agree, but in this case I do, he talked about this thing. He said:

Among the proposals defeated by the committee was an attempt to partially restore the purchase requirement—

The exact same amendment as the Walker amendment.

The Committee recognized that the effects of such a proposal would have been a significant increase in administrative costs, as well as reopening a previously closed door to fraud and abuse on the part of vendors and participants. Restoring the purchase requirement would reintroduce the handling of cash on a day-to-day basis at thousands of issuance points throughout the country. Serious problems with vendor abuse led to enactment of the Food Stamp Vendor Accountability Act in 1976. Restoration of the purchase requirement would most likely lead to greater black market activity. Instead of receiving just the "bonus" value of their stamps, participants would again receive the entire allotment of food stamps equal to the cost of the thrifty food plan.

The report goes on to state that it would be a serious obstacle to participation by many of the neediest people, particularly in rural areas of America, and is opposed by every State and local food stamp administrator in the country.

I would urge rejection of the amendment.

□ 1230

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. RICHMOND. I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding.

Mr. Chairman, I would like to share, if I could, in the comments of my colleague from Kansas.

The gentleman from Pennsylvania (Mr. WALKER) would agree, I hope, that I share with him his desire to see that those who need food stamps get them; that those who do not need them be removed from the rolls. But I am yet to be convinced of how the gentleman's amendment would help either of those conditions. I know it would add to the administrative cost. I know it would unfairly and unduly penalize those who could not put up their part of the payment.

I just wonder if the gentleman who controls the time would yield to the gentleman from Pennsylvania to respond to my concerns.

Mr. RICHMOND. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman very much for yielding.

Yes; I am one who shares your concerns. I would only say that I disagree with the Senator from Kansas who was quoted earlier, and I do not often do that. However, I have to go by what the Congressional Budget Office tells us. The Congressional Budget Office tells us that the restoration of a partial purchase requirement would save $1.4 billion. Now, I think that is what we have to evaluate: Whatever changes are an administrative cost, the bottom line is that we are going to save $1.4 billion, and even in fiscal year 1982, half over, we are going to save over $800 million. That is what the CBO says. That is the approach of this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania.

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. WALKER. Mr. Chairman, I demand a recorded vote, and pending that I make a point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from Pennsylvania for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 147, noes 251, not voting 35, as follows:

[Roll No. 274]

□ 1300

The Clerk announced the following pairs:

On this vote:

Mr. Bafalis for, with Mr. Hertel against.

Mr. Corcoran for, with Mr. Ford of Tennessee against.

Mr. Johnston for, with Mr. Dellums against.

Mr. Kindness for, with Mr. Jones of North Carolina against.

Mr. Lungren for, with Mr. Parris against.

Mr. O'Brien for, with Mr. Williams of Ohio against.

Mr. Siljander for, with Mr. Dougherty against.

Mr. HOLLAND and Mr. COUGHLIN changed their votes from "aye" to "no."

Mr. ERDAHL changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. MICHEL. Mr. Chairman, I move to strike the last word.

(By unanimous consent, Mr. MICHEL was allowed to speak out of order.)

LEGISLATIVE PROGRAM

Mr. MICHEL. Mr. Chairman, I take this time for the purpose of inquiring of the distinguished majority leader as to the program for the balance of this week and possibly next week's program. I am sure the Members will be interested in what the majority leader has in store for us, and if they will listen, they will all know at one time.

Mr. WRIGHT. Mr. Chairman, will the gentleman yield?

Mr. MICHEL. I am happy to yield to the majority leader.

Mr. WRIGHT. Mr. Chairman, I am delighted to respond to my distinguished friend, the minority leader, the gentleman from Illinois (Mr. MICHEL), by stating that when we conclude action on the agriculture bill today, and we anticipate being able to do that at a reasonable hour, the business for this week will have been concluded, and there will be no session tomorrow.

Mr. MICHEL. That is, if we finish this bill today?

Mr. WRIGHT. Assuming that we do finish this bill today, and that is our firm intention. If we for some reason fail to finish this bill today, which I do not anticipate, then, of course, we would have to be in session tomorrow. But it is fully expected that we will finish this bill at a reasonable hour today and will not have a session tomorrow.

On Monday, October 26, five bills are scheduled for suspension, and those bills are as follows:

H.R. 4734, Italian American War Veterans of the United States;

H.R. 4755, former Members of Congress;

H.R. 4766, submarine veterans of World War II;

H.R. 4769, American Council of Learned Societies; and

H.R. 3963, Drug Dependent Federal Offenders Act amendments.

There will be no votes on those bills on Monday. Any votes required on those bills scheduled for suspension will be postponed until Tuesday. Therefore, Members may be sure that there will be no votes on legislative matters on Monday, October 26.

On Tuesday, October 27, we will have such recorded votes as may have been demanded, and then we will take up H.R. 4503, the Federal Water Pollution Control Act Amendments of 1981, under an open rule, with 1 hour of general debate; and if there is still time, H.R. 2330, Nuclear Regulatory Commission authorizations, to complete consideration.

On Wednesday, October 28, we will meet at 10 o'clock and will take up H.R. 4437, the Energy Conservation Daylight Saving Act, under an open rule, with 1 hour of general debate.

On Thursday and the balance of the week—and we hope that Thursday will be the balance of the week—we will meet at 10 o'clock, taking up the State Department authorizations, a bill that has been before us once, subject to the granting of a rule; and H.R. 3275, the Civil Rights Commission authorization, under an open rule, with 1 hour of general debate.

It seems quite plausible to me that we might reasonably look forward to concluding those votes on Thursday, barring any unforeseen problems or deliberative dilatory tactics and thereby be able not to meet on Friday.

Now, let me project our expectations 1 week beyond to the week after next. Since Tuesday, November 3, is an election day in many States, we would plan not to have a session on that day, and we would plan to have only a proforma session on the Monday preceding, so that Monday and Tuesday, November 2 and 3, would be respectively a pro-forma day and a day out of session. If we are able to conclude the business at hand by Thursday of next week, that would permit the Members to have an extended home district work period.

I would like to say to my distinguished friend, the minority leader, that with his splendid cooperation and that of both the majority and minority, the House is well ahead of schedule. There remains very little on our schedule to be completed prior to adjournment. I should like to suggest a few things that must be done; things that remain to be completed.

One of them is the Defense Department appropriation bill. My friend, the chairman of the Subcommittee of

the Appropriations Committee, the distinguished gentleman from New York (Mr. ADDABBO), has indicated that markup will begin on that bill next week in the subcommittee. The chairman of that subcommittee and the chairman of the full committee, the gentleman from Mississippi (Mr. WHITTEN), have indicated that on the succeeding Monday, assuming completion, the full committee will take it up so that we will have that bill ready for us probably sometime in the week of November 10.

There are two or three other things that are quite likely to come before the House, and that is all. One of them would be the probability of a continuing resolution. A meeting today with the majority leader of the Senate, Mr. BAKER, and the minority leader of the House, the gentleman from Illinois (Mr. MICHEL), reveals that the other body intends to take up and act upon at least some of the appropriation bills we have passed. We have passed all of them but one now, or, rather, all of them but two that have passed the House are in the Senate. They will take up those bills that they can act on individually, and such as they cannot they would hope to put into a continuing resolution, which would hold until sometime in March.

Now, it would be necessary for us, if we follow that course—and we probably will—to act upon that continuing resolution prior to November 20, and that date concludes the extent of the present extant continuing resolution. So we may expect that we will be acting on a continuing resolution sometime prior to November 20.

That leaves one other thing, and that is the budget resolution. The Budget Committee has not been dilatory. The Members have been very diligent. They have been holding hearings. They have been asking the administration for information. They have several times scheduled witnesses from the administration. Often those schedules have been postponed at the request of the administration. They are seeking additional information, and they will be prepared to act whenever all that information is collated and available.

So we may expect those three things: Action on the Defense Department appropriation, probably action on a continuing resolution prior to November 20, and the budget resolution, the second budget resolution for fiscal year 1982. And of course we shall have to come to some sort of resolution on the social security question.

Mr. MICHEL. The gentleman, of course, has alluded to the other body moving on appropriation bills, which would suggest, then, that there would be opportunities for conferences on some of those appropriation bills. That opens up the question of that week of November 9 and 10, with Veterans Day following on November 11.

There was some suggestion that there might be either days before or days after Armistice Day on which we would not meet, in view of the fact that we would probably have to meet on some conference measures.

Would the distinguished majority leader be able to respond to that kind of question? What would happen during the course of that week of November 9, particularly with reference to Armistice Day?

Mr. WRIGHT. Well, I think it might make a difference as to when the Appropriations Committee was able to conclude its deliberations and report the Defense Department appropriation bill. It seems plausible that sometime during that week we might want to take action on that bill.

If the bill were ready for us and ready for our consideration on the first 2 days of the week, it is conceivable that we might be able to take the last 2 days of the week following Veterans Day. On the other hand, if the bill is not ready by then, we may have to use the last 2 days of the week for the appropriation bill, and in that case we might be able to let the first 2 days of the week be days without legislative business.

But I am not able to give an answer to that question at this time. I think the best we can do at this time is project our schedule through next week and into the succeeding week. The Members will be pleased to know that if we finish our business next week on Thursday, there may be Friday, Saturday, Sunday, Monday, and Tuesday, Tuesday being election day, available for a home district work period.

Mr. MICHEL. The gentleman may recall the conversation with the distinguished majority leader of the other body relative to the continuing resolution, pointing out the fact that it will expire on November 20 and they would like to have that resolution sufficiently in advance of that date that we would not all be caught in some kind of scissors on the evening of November 20 with no prospect of knowing whether we have finally gotten an agreement or not.

I would hope that we would be able to complete that action here in this body and send it over to the other body sufficiently in time to give them the opportunity to do whatever they want to do with it.

Mr. WRIGHT. I think the gentleman makes a good point. Obviously it does not do anybody in the Government any good for us to wait and play brinksmanship on that kind of a bill. It makes people nervous and causes all kinds of unnecessary consternation on the part of people who work for the Government.

However, we do have this kind of a sequence that has to be followed. Obviously, it is necessary for the Appropriations Committee to take its action on the Defense Department appropriation bill before we can know the appropriate figures in that Department to crank into a continuing resolution. Therefore, our action on the continuing resolution most appropriately ought to await completion of that action on the part of the Appropriations Committee, and its members are moving diligently.

I would suppose that might be one additional reason why we need to stay a little flexible about which of the other days, if any, we can allow Members to have off during the week of Veterans Day. We know that we are going to have Wednesday off. Wednesday, November 11, is Veterans Day, and the Members may confidently know that day will be a day of no business. If it is possible, we will try to work in another day or two. I cannot promise that now because of the things we have just discussed. Obviously it would be good if we can send the continuing resolution to the Senate at a time when it does not get caught in an act of brinksmanship on the last day.

Mr. MICHEL. Mr. Chairman, I thank the distinguished gentleman, the majority leader.

AMENDMENT OFFERED BY MR. DANNEMEYER

Mr. DANNEMEYER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DANNEMEYER: On page 117, after line 23, insert the following new section (and redesignate succeeding sections accordingly):

REPORTING OF ABUSES BY THE PUBLIC; NOTICE OF VERIFICATION; DISCLOSURE OF INFORMATION TO LAW ENFORCEMENT OFFICIALS; MINIMUM MANDATORY COURT SENTENCE FOR CRIMINAL OFFENSES; WORK RESTITUTION PROGRAM

SEC. 1339. (1) Section 9 of the Food Stamp Act of 1977 is amended by adding at the end thereof a new subsection (e) to read:

"(e) Approved retail food stores shall display a sign providing information on how persons may report abuses they have observed in the operation of the food stamp program.".

(2) Section 11(e)(2) of the Food Stamp Act of 1977 is amended by inserting after the second period the following new sentence: "Each application shall also contain in understandable terms and in prominent and boldface lettering a statement that the information provided by the applicant in connection with the application for a coupon allotment will be subject to verification by Federal, State, and local officials to determine if such information is factual and that if any material part of such information is incorrect, food stamps may be denied to the applicant, and that the applicant may be subjected to criminal prosecution for knowingly providing incorrect information.".

(3) Section 11(e)(8) of the Food Stamp Act of 1977 is amended by striking the semicolon at the end and inserting in lieu thereof a comma and the following: "except that,

notwithstanding any other provision of law, all information obtained under this Act from an applicant household shall be made available, upon request, to local, State, or Federal law enforcement officials for the purpose of investigating an alleged violation of this Act or any regulation issued under this Act;".

(4) Subsections (b) and (c) of section 15 of the Food Stamp Act of 1977 are amended to read:

"(b)(1) Subject to the provisions of paragraph (2) of this subsection, whoever knowingly uses, transfers, acquires, alters, or possesses coupons or authorization cards in any manner not authorized by this Act or the regulations issued pursuant to this Act shall, if such coupons or authorization cards are of a value of $100 or more, be guilty of a felony and shall, upon the first conviction thereof, be fined not more than $10,000 or imprisoned for not more than five years, or both, and upon the second and any subsequent conviction thereof, shall be imprisoned for not less than six months nor more than five years and may also be fined not more than $10,000 or, if such coupons or authorization cards are of a value of less than $100, shall be guilty of a misdemeanor, and, upon the first conviction thereof, shall be fined not more than $1,000 or imprisoned for not more than one year, or both, and upon the second and any subsequent conviction thereof, shall be imprisoned for not more than one year and may also be fined not more than $1,000. In addition to such penalties, any person convicted of a felony or misdemeanor violation under this subsection may be suspended by the court from participation in the food stamp program for an additional period of up to eighteen months consecutive to that period of suspension mandated by section 6(b)(1) of this Act.

"(2) In the cae of any individual convicted of an offense under paragraph (1) of this subsection, the court may permit such individual to perform work approved by the court for the purpose of providing restitution for losses incurred by the United States and the agency as a result of the offense for which such individual was convicted. If the court permits such individual to perform such work and such individual agrees thereto, the court shall withhold the imposition of the sentence on the condition that such individual perform the assigned work. Upon the successful completion of the assigned work the court may suspend such sentence.

"(c) Whoever presents, or causes to be presented, coupons for payment or redemption of the value of $100 or more, knowing the same to have been received, transferred, or used in any manner in violation of the provisions of this Act or the regulations issued pursuant to this Act, shall be guilty of a felony and, upon the first conviction thereof, shall be fined not more than $10,000 or imprisoned for not more than five years, or both, and, upon the second and any subsequent conviction thereof, shall be imprisoned for not less than one year nor more than five years and may also be fined not more than $10,000, or, if such coupons are of a value of less than $100, shall be guilty of a misdemeanor and, upon the first conviction thereof, shall be fined not more than $1,000 or imprisoned for not more than one year, or both, and, upon the second and any subsequent conviction thereof, shall be imprisoned for not more than one year and may also be fined not more than $1,000. In addition to such penalties, any person convicted of a felony or misdemeanor violation under this subsection may be suspended by the court from participation in the food stamp program for an additional period of up to eighteen months consecutive to that period of suspension mandated by section 6(b)(1) of this Act.".

Mr. DANNEMEYER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

□ 1315

Mr. DANNEMEYER. Mr. Chairman, I know that many of my colleagues are concerned about the increasing reports of fraud within the food stamp program, as am I. It is widely acknowledged that the program is, by its very nature, highly vulnerable to fraudulent activity.

The amendment which I offer today is intended to address some of these concerns. It incorporates four key provisions which will allow for tightening the enforcement of the food stamp program.

I would note that these provisions were included in the Senate-passed food stamp bill, S. 1007. I believe that they are worthy of inclusion in the House bill as well.

These provisions would:

First, require all authorized retail food stores to display a sign providing information on how individuals may report food stamp abuses they have observed.

Second, require that the application form state that information provided by the applicant will be subject to verification and if incorrect may be the basis for denial and criminal prosecution.

Third, clarify existing law specifically to permit local, State, and Federal law enforcement officials to have access to information obtained from food stamp applicants. These officials would be able to obtain requested case file information for the purpose of conducting investigations of alleged Food Stamp Act violations.

Fourth, require stronger penalties for persons who are found guilty of felonies and misdemeanors. Penalties for the first conviction under these sections would not be changed. However, the second and subsequent offenses would require a prison sentence of not less than 6 months for a felony conviction and not more than 1 year for a misdemeanor. In addition, the court could suspend the convicted person from participating in the food stamp program for up to 18 months above those levels already required by law. The court may permit the convicted person to perform work approved by the court for the purpose of restoring losses. If the person agrees, the court would withhold the sentence conditional upon the satisfactory performance of the work and then could suspend the sentence.

RETAIL STORE NOTICES

One of the most frustrating comments which I have heard from constituents is that they often do not know how to go about reporting abuses of the food stamp program which they observe firsthand. A sign in the grocery store will serve the twofold purpose of notifying citizens how to report abuses, and reminding recipients of the need for obeying the law lest they be reported and prosecuted for violations.

APPLICATION NOTICE

By the same token, the information on the application itself will remind food stamp applicants of the need to accurately complete the application. Repeated investigations have found that the two most common errors on applications are understatement of household income and overstatement of household size—both of which increase the food stamp allotment received by the household.

DISCLOSURE OF INFORMATION ON RECIPIENTS

A third provision is needed to clarify that Congress most certainly does intend that local, State and Federal law enforcement officials have access to food stamp case files. This authority is needed to overturn a court decision in Florida and thereby clarify congressional intent.

The State attorney of Florida initiated an investigation of food stamp recipients in Nassau County, Fla., in February 1979. The State attorney's office requested the food stamp case files of all persons in the county who were receiving a monthly food stamp coupon allotment of $125 per month or more, and began a criminal investigation. In the summer of 1979, the State attorney initiated an investigation using similar procedures in Clay County, Fla.

I believe that Congress clearly did not want to restrict such aggressive law enforcement efforts as demonstrated in Florida.

Yet in the case of *Roberts* V. *Austin*, 632 F. 2d 1201 (5th Cir., 1980), the U.S. Fifth Circuit Court of Appeals overturned the decision of the U.S. District Court for the Middle District of Florida which had denied an injunction to prevent welfare officials from turning over food stamp applicant information to the State attorney of Florida.

This provision will make it clear that Congress believes that local, State, and Federal law enforcement officials are "directly connected with the enforcement of the food stamp program" as defined in current law and that so long as they are conducting investigations to determine possible violations related to the Food Stamp Act or regulations, they should have access to

information provided by applicant households.

MINIMUM COURT SENTENCE

The fourth provision included within the amendment is designed to address the "revolving door" of fraudulent food stamp recipients. It is not unusual, according to Florida officials, to find that those individuals investigated, prosecuted, and convicted for food stamp fraud have previously been found guilty of the same or similar food stamp offenses. Yet these individuals are usually allowed "a slap on the wrist" and are back on the streets—and frequently back on the food stamp rolls—soon afterward.

This provision will put some teeth in the penalties contained in the Food Stamp Act by providing that second offenders will receive a minimum 6 months' prison sentence for a felony conviction and not more than 1 year for a misdemeanor.

Additionally, a person could be disqualified from participation in the food stamp program for up to 18 months beyond existing periods at the discretion of the court.

The court could suspend the jail sentence only in return for work approved by the court for the purpose of restoring losses. In this manner, the taxpayers will be reimbursed by those who defraud the food stamp program.

Mr. Chairman, I believe that these are reasonable provisions which will improve the integrity of the food stamp program. I commend the Senate for including these in its legislation, and urge my colleagues to support their inclusion in H.R. 3603.

Mr. RICHMOND. Mr. Chairman, will the gentleman yield?

Mr. DANNEMEYER. I will be happy to yield to the gentleman from New York.

Mr. RICHMOND. Mr. Chairman, I agree to the gentleman's amendment on behalf of the committee in light of the two changes he has made to these provisions as they appeared in the Senate version of the food stamp bill.

Currently the Food Stamp Act operates to restrict referral of food stamp case files to State or local prosecuting authorities in those cases where individuals are suspected by food stamp officials of committing fraud. This is a careful, qualified approach that seeks to maintain a balance between a food stamp household's privacy rights and the need to investigate statements by the household to insure accuracy and prevent fraud. Criminal investigation proceeds only after a household has provided questionable information.

This amendment would not drastically alter that balance. It would not make legal the horrendous situation that occurred in two counties in Florida in early 1979 and would subject millions of food stamp families across the country to totally unnecessary and likely unconstitutional humiliation and harassment.

In 1979 the State attorney's office in two counties in Florida demanded that food stamp offices surrender to them the full files of all persons in those counties who were receiving food stamps worth $125 per month or more. There was no evidence whatever that the State's attorney had any reason to suspect that any of these persons had engaged in fraud. The only excuse for the blanket release of files was that the persons were receiving a certain level of food stamps.

When the files were transferred, all of the information from them was placed on sheets which were distributed to local police personnel. The local police were asked to use standard criminal investigation techniques to verify this information and to contact neighbors, employers, and all others who might be familiar with the households' circumstances. This was a massive invasion of the right of privacy. What might have been legitimate had there been any reasonable grounds for suspecting particular households of fraud became a general dragnet holding thousands of innocent households up to the public exposure and ridicule of police inquiry for no reason other than that they were food stamp recipients. How would you like to have someone question your constituents' neighbors about their lifestyle simply because your constituents receive social security benefits? Big brother has to be cabined.

Controlling fraud on a case-by-case basis is one thing; harassing households wholesale is quite another. This amendment would permit State prosecutors to secure food stamp files but only where there was some basis, some valid reason to suspect the affected households of fraud. The State attorney would be prohibited from conducting a fishing expedition in the food stamp files and therefore harming without just cause thousands of people.

I am glad that the gentleman would limit the threat of prosecution and/or denial of food stamps to the insertion of incorrect factual information in a food stamp application form that is material. No household should be threatened either with criminal prosecution or the loss of food stamps simply because a member of that household misspells the name of child or misstates the child's age or gets an address wrong. What matters is that information relating to material factors, such as income, deductions, and household size be stated accurately.

In addition, I would like to state that with respect to that portion of the gentleman's amendment which relates to the displaying of signs in retail food stores, I welcome the provision only if it is read in the following manner.

Just because members of the public have questioned the use of food stamps does not mean that these reports constitute violations of the program. Where a member of the public raises concerns about the observed use of food stamps, we, of course, want the food stamp office to apply its expertise in food stamp law to the threshold question of whether in fact the allegations, even if true, would constitute a violation. If the answer is affirmative, then the recipient must be provided with an opportunity to explain the discrepancy. In no event should these matters be referred or released to already overburdened law enforcement officials before the agency has first determined whether the allegations would even constitute a violation, or before the recipient has had an opportunity to clear up the matter.

Mr. DANNEMEYER. I thank the distinguished chairman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. DANNEMEYER).

The amendment was agreed to.

Mr. ROUSSELOT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to discuss with my colleague from Missouri (Mr. COLEMAN), a member of the committee, or any other individual on the committee who is aware of what is now being done on photo identification. It is my understanding that the current law states that it is discretionary as to whether photo identification is required by those utilizing food stamps so that it is possible to reduce those who should not be receiving these food stamps. Can my colleague comment as to what the disposition is of the Department of Agriculture relating to the use of this authority?

Mr. COLEMAN. Will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Missouri.

Mr. COLEMAN. I thank the gentleman for his inquiry and respond that we have given the Department discretionary authority to require photo identification.

Recently the Department has come forward with regulations to do that very thing in certain areas, basically urban areas with 100,000 recipients or more where they now will be required to have photo I.D. which we feel, and I know the Chairman joins with me in this feeling, will cut down on the fraud and abuse that we have seen in the system. So going back even further and building upon that, as I say, not all participants in the food stamp program will be required to show a photo I.D. But they are getting to about 30 percent of the program where the problem is and that is in the urbanized areas of the country.

My amendment, which was passed earlier today went even further. It said in those areas where it has been mandated for a photo I.D. that the bank or whatever distribution center has to look at the photo I.D. and the authorization to participate card and put those together so that we are already building upon this requirement by the administration to have the photo I.D. because it is an integral part of cutting down on the fraud and abuse in the system.

Mr. ROUSSELOT. I appreciate my colleague's comments. Is there any reason why the photo identification should not be utilized by all distribution centers? I realize there is the potential cost of $1 or $2 for providing such a card, but I would believe that as we have done with automobile licenses, that it is helpful to have a photo identification. I cannot understand why we are not doing this with this program, which according to some of our General Accounting Office reports, there has been so much fraud. This might be an additional way to prevent that.

Mr. COLEMAN. If the gentleman will continue to yield, it certainly might be in the future. I would suggest, and I know the gentleman is sincere in his questions and concerns that we obtain the experience of requiring the photo I.D. in the 30 percent of the program where we have a significant problem, in the urban areas, and see if we can build upon that. The committee is quite concerned about this, and if we see that the photo I.D.'s are necessary we will certainly pursue this.

But even further, the administration I think is committed to tightening up this program, and they have already done this by requiring it in these instances. If they feel, and I think they are doing it in a good-faith effort, if they feel it is necessary for other portions of the program, or to make it universal, they will come forward with that experience. I would want to work with the gentleman in doing that. My suggestion today is to go forward and allow the department to continue what they are doing, which is to begin the photo I.D. as an instrument for cutting down on waste, fraud, and abuse in the system, but not necessarily mandated today in legislation, but continue to have the discretion which the basic law already has in it and let the people downtown determine whether or not it is economic and cost effective.

Mr. ROUSSELOT. The gentleman does feel the administration is disposed to make greater use of this photo identification as a way to eliminate or potentially eliminate or minimize abuses in the program?

Mr. COLEMAN. Absolutely. The Chairman and I have had informal discussion with the department in going even further on photo identification, if we could come up with a system which would almost be failsafe, that could cut down immensely on fraud, waste, and abuse. So we are all working in the right direction. I appreciate the gentleman's contribution.

Mr. ROUSSELOT. As the gentleman knows, I was prone to offer an amendment to require a photo I.D. card as a mandated item. But if the ranking Republican member of the subcommittee and the chairman of the subcommittee have both assured me they intend to pursue the use of photo identification to begin to more clearly specify who should or should not be receiving food stamps, I appreciate the pursuit of that effort and I hope that we will have early next year maybe a report back to the House as to the progress of that effort.

The CHAIRMAN. The time of the gentleman from California has expired.

(At the request of Mr. PEYSER and by unanimous consent, Mr. ROUSSELOT was allowed to proceed for 2 additional minutes.)

Mr. RICHMOND. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to my colleague from New York.

Mr. RICHMOND. I just want to tell my colleague from California that he is 100 percent right. I assure him that within the next year he is going to see remarkable progress in reducing waste, fraud, and abuse from this food stamp program, now that we have photo I.D. in place, first enforcibility in place, and we are eliminating wholesalers from receiving stamps, and I think those are three big moves. Now we are all set to move in and improve the administration of the program.

Mr. ROUSSELOT. I appreciate the gentleman's comments and the committee's consideration of this method of identification.

Mr. PEYSER. Mr. Chairman, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from New York.

Mr. PEYSER. I guess the one thing that hurt me in listening to this discussion, if I heard it correctly, is that the present idea, and the photo program is aimed at urban areas where numbers are in excess of 100,000 or whatever the number may be, they would then have the photo identification; is that correct, at that point?

Mr. ROUSSELOT. I think my colleague from Missouri (Mr. COLEMAN), the ranking member of the subcommittee, was saying that that was just a current criteria they were utilizing for lack of a better one.

Mr. PEYSER. I agree with my friend from California because the inference of that is that somehow the urban poor are the ones that are ripping off the food stamp program, and that the rural or non-heavily-populated areas are all observing the law. I think the gentleman is correct, there is a need for this, and there is a need for it for everybody.

Mr. ROUSSELOT. It should be applied universally.

Mr. PEYSER. Of course, this really makes it seem like we are saying watch out for the urban poor, but let the rest of them alone.

Mr. ROUSSELOT. I agree with my colleague. It may be that as a result of all these other things that have now been put in the law to require greater compliance, that we may be able to eliminate much of this fraud and abuse. But I think myself that it should be applied universally.

But our chairman of the subcommittee and the ranking member have agreed to report back to the House at an early date next year to tell us the progress of the photo identification program and I appreciate the gentlemen bringing it up.

Mr. TRAXLER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I wish to commend the chairman of the full committee, the gentleman from Texas (Mr. DE LA GARZA), and the chairman of the subcommittee, the gentleman from New York (Mr. RICHMOND), for presenting us with such a fine piece of legislation. My very best wishes and thank you to the minority members for this fine work.

Mr. Chairman, I rise in particular support of section 1340 of the Food and Agriculture Act of 1981. This section reauthorizes the commodity supplemental feeding program, and provides authority for two pilot projects in which a CSF-type program will be operated for the benefit of senior citizens.

I want to compliment the gentleman from New York (Mr. RICHMOND) the chairman of the Subcommittee on Domestic Marketing, Consumer Relations and Nutrition, for his foresight in continuing this most vital special feeding program, and for his cooperation in allowing for the establishment of the two pilot projects.

The commodity supplemental feeding program is a relatively small one. It operates in 21 cities, and provides commodities such as canned meats, vegetables, juices, cereals, flour, nonfat dry milk, and infant formula to about 115,000 pregnant or lactating women, infants, and children each month.

The program is one of the cheapest in the arsenal of feeding assistance, with a cost of only about $22.50 per person per month, including administrative costs. This amount compares to about $34 per month in the women, infants, and children feeding program, which provides food vouchers rather than food items directly.

This program has been slated for a cut of 40 percent in the Reagan budget, including the latest revisions. As a member of the Subcommittee on Agriculture of the House Appropriations Committee, I was very pleased to work against this most insensitive budget reduction, as I did against a similar reduction in the WIC program. The House approved a more realistic budget figure for both CSFP and WIC when we adopted the fiscal 1982 agricultural appropriations bill, H.R. 4119, in July of this year.

Mr. Chairman, I think that special attention needs to be paid to the authorization provided in this section for the two pilot elderly commodity feeding programs. Many poor senior citizens have significant nutritional problems which are associated with both worsening economic conditions and the underutilization of local feeding programs. Testimony before Mr. Richmond's subcommittee revealed that while food stamps is a good program, it is not very well utilized by senior citizens who either dislike the welfare stigma associated with the program, or have been so frustrated in their efforts to qualify for the program that they have simply given up. On the other hand, many seniors have expressed a strong interest in the possibility of getting commodity food packages, such as those provided by CSFP.

The two pilot projects authorized by the bill will be operated by existing CSFP operators in Detroit and New Orleans. These cities were selected because these project operators have already done some work on the project, and because they are the largest existing CSFP operators in the Nation. It needs to be emphasized that existing CSFP operators were selected so as to minimize any administrative or start-up costs that might otherwise be associated with this type of project.

Additionally, the Department of Agriculture is on notice that the food package is to be modified to meet the nutritional needs of senior citizens. Concerns about salt and sugar levels which may be of particular concern to seniors will be resolved by the Department in its development of a food package which will be basically the same as the existing CSFP package.

These pilot projects will serve about 1,500 seniors in each city, and will be evaluated by the Department and the program operators during the period of the project. The total cost is estimated to be a maximum of $900,000 in fiscal 1982, assuming full participation for a full year.

Mr. Chairman, funds for these pilot projects under the conditions specified in the report accompanying H.R. 3603, have already been provided on a contingency basis in the fiscal 1982 Agricultural Appropriations bill. This project, therefore, has the support of two different congressional committees, and the implied support of the House by virtue of the appropriation for the project.

Additionally, I am aware of some strong sentiment in support of these pilot projects in the Senate, and anticipate Senate support in conference.

Mr. Chairman, it is obvious that we need to find the least costly alternatives of providing assistance to the many in this Nation who cannot survive without the reasonable compassion and aid of the Federal Government. These pilot projects are a step toward finding another way to provide nutritional foods to needy senior citizens, and are worthy of the support of this body.

Mr. PEYSER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am just going to take a minute; I hope we are rapidly approaching the end of this bill and that we will vote on it. My one concern, and I just say this to alert Members who may be having other engagements and having to leave, I do not think that is the problem, but there is a possibility always that separate votes will be requested when we go back into the House. It is my hope that that is not going to happen, because of the time that will be consumed, and hopefully we can pass the bill and finish it and go on to other business.

AMENDMENT OFFERED BY MR. RICHMOND

Mr. RICHMOND. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RICHMOND: On page 120, after line 22 insert the following:

FOOD STAMPS IN PUERTO RICO

SEC. 1344. Section 116 of the Omnibus Reconciliation Act of 1981 (Public Law 97-35) is repealed.

Mr. RICHMOND (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. RICHMOND. Mr. Chairman, in the course of passing the Omnibus Budget Reconciliation Act last August, this Congress perpetrated a discriminatory act against the people of Puerto Rico who are citizens of the United States, an act that is harmful to the stature of Puerto Rico in the Western Hemisphere, that is harmful to our relations with the Spanish-speaking nations of Central and South America, and that may prove devastating to millions of truly needy people in Puerto Rico. Effective July 1 of next year, we terminated Puerto Rico's access to the food stamp program and ordered Puerto Rico to distribute nutritional assistance to its poor on its own, with $204 million less in funds than it currently has available under the food stamp program.

For every other State, every other territory, and every other local jurisdiction we made across-the-board program cuts, amounting, when this bill now before us is taken into account, to over $2.4 billion in fiscal year 1982 alone. Puerto Rico was willing to absorb its fair share of these cuts, which, since it had 1.795 million citizens receiving food stamps in July 1981, would have been as much as 8 or 9 percent of the total.

What was unjust, what was unfair was singling Puerto Rico out for special reductions targeted at a specific geographical area instead of persons who, because of their economic circumstances, deserved less or no assistance. When we acted to deprive Puerto Rico of the food stamp program, we dealt unjustly with persons who fight beside us in our Armed Forces, but who already do not receive full benefits in other Federal assistance programs. When we turned our back on the hungry and malnourished Puerto Ricans, we sent a signal to the rest of the world and, especially, to the citizens of other countries in the Caribbean, Central America, and South America, that we viewed our Spanish-speaking U.S. citizens who happened to reside on the island of Puerto Rico as second-class citizens, not entitled to the same nutritional treatment as mainland Americans.

This signal is not a fortunate one. It undermines any semblance of a good neighbor type policy in this region. It has distinct racial overtones even if we did not intend them. It diminishes respect for us in an area in which we desperately need respect and support.

We once intended to make Puerto Rico the showcase of the hemisphere. We seem to have abandoned that intent by this action.

The only explanation for our ungenerous behavior was that we thought—however mistakenly—that Puerto Rico did not need as many food program benefits as other parts of our country because food is cheaper there or people not so poor in a relative sense because of the lower per capita income. Both of those impressions are wrong. The food portion of the cost of living in Puerto Rico tends to be higher, not lower, than on the mainland because Puerto Rico has to import 85 percent of its foods and, under another law passed by the Congress—the Jones Act—do so on more costly American ships. Similarly, while the per capita income in Puerto Rico may be lower than on the mainland, more than 85 percent of the 492,000 households receiving food stamps in July had income of less than $500 per month and 16 percent of them had no reportable income whatever. These persons would satisfy whatever defini-

tion of "truly needy" we might reasonably seek to apply.

We were wrong in August to cut them off the program as of next July and force them to devise a significantly diminished nutritional assistance program of their own. The only way to right that wrong is to join with me today to reverse our action, reinstate Puerto Rico on the program, but subject to the nationwide cuts in benefits, eligibility, and so forth, that will, on an across-the-board basis, applicable in every State of the country, including Puerto Rico, probably reduce food stamp benefits nearly 20 percent from what they otherwise might have been.

I ask your support for this effort to treat Puerto Ricans equitably and fairly, in the same fashion we treat other Americans.

□ 1330

Mr. ANTHONY. Mr. Chairman, will the gentleman yield?

Mr. RICHMOND. I yield to the gentleman from Arkansas.

Mr. ANTHONY. I thank the gentleman for yielding.

Mr. Chairman, on the point where the gentleman said he has talked with the present Governor of Puerto Rico, I would like to join in on the comments there.

I have attended some meetings where the gentleman was present with the Governor of Puerto Rico, and I have discussed this problem with him also; I also had the opportunity to go to Puerto Rico for a 4-day weekend to study the economic situation down there.

Based on that study, based on my conversation with the Governor, and also the former Governor of Puerto Rico, I think it is incumbent upon this Congress to treat Puerto Rico fairly and equitably, but to send a message to them to give them the opportunity to economically develop their own plan and their own program within Puerto Rico so that we could show that we have been a proper and good neighbor. I think the comments of the gentleman are very well taken.

The CHAIRMAN. The time of the gentleman from New York (Mr. RICHMOND) has expired.

(On request of Mr. ANTHONY and by unanimous consent, Mr. RICHMOND was allowed to proceed for 1 additional minute.)

Mr. ANTHONY. If the gentleman will yield further, I think that this is an issue that, especially even in my State of Arkansas and in my own district, the Fourth District, is one that can be very easily misunderstood, because when you talk about Puerto Rico and the number of poor people there and the large percentage of the population that is on food stamps, without going into the reason behind it and all of the other justifications and our historical presence with Puerto Rico, it is very easy for one to come in and say, "Well, we are just going to cast a political vote and really not look at the economics of it."

I think it is incumbent upon this Congress to act responsibly, and I think the responsible action would be to restore Puerto Rico to the program, but with that proviso that they come forward with this 5-year economic plan and one that I think we could all help in developing.

Mr. RICHMOND. I thank the gentleman from Arkansas for his remarks.

Mr. CORRADA. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I am not going to elaborate on the points already made excellently and eloquently by the chairman of the subcommittee. I would only hope that the Members understand that we are particularly concerned by the provisions that the Richmond amendment would intend to eliminate, because it singles out Puerto Rico for a block grant on food stamps which is not being proposed for any other State, territory, or jurisdiction under the American flag.

We Puerto Ricans are American citizens. We are proud to be American citizens. When our Nation goes to war, our children, our youth, fight under the American flag in defense of the Nation. We have never come to this Congress to ask that we be treated on a set-aside basis so that our youngsters be drafted on a lower proportion than the rest of the Nation, because we felt that as American citizens it is a duty and a responsibility to defend democracy at home and abroad.

That is why we particularly resent the provision that the Richmond amendment would strike, which singles out Puerto Rico for discriminatory treatment on the food stamp program. We are willing to take whatever cutbacks are provided; we are willing to tighten the program because of the provisions already contained in this bill; and, of course, as it has been suggested, our Governor has already a 12-year economic recovery plan for the reconstruction of agriculture there, tourism, manufacturing, and he will comply with the 5-year plan that has been suggested by the chairman.

So I do hope that my dear colleagues will provide equity for American citizens there and that they will support the Richmond amendment.

Mr. Chairman, many Members were not aware of the devastating impact that one section of the Omnibus Reconciliation Act would have in Puerto Rico. This provision singled out the U.S. citizens of Puerto Rico for exclusive and discriminatory treatment in the food stamp program.

Unless this inequity is changed, Puerto Rico will—by July 1, 1982—suffer a $204 million reduction in the food stamp program.

No other State, no other territory, no other local jurisdiction was granted a "nutritional assistance block grant" which Puerto Rico will have to convert to next year, with an attendant reduction in funds.

A vote for the amendment to restore equal treatment for Puerto Rico in the food stamp program will continue the national program at the same reduced level as other citizens will have to cope with.

More than 56 percent of Puerto Ricans—many of them the "truly needy"—will be forced to have their benefits reduced at a sharper level since the "nutritional assistance block grant" offers a special and exclusive reduction and a program which will not take place in any other State or territory.

The most recent statistics for the food stamp program reflect this fact.

As of July 1981, 492,228 families in Puerto Rico received food stamp benefits. This represents 1,795,914 U.S. citizens—more than 56 percent of the island population. Of this figure, 77,077 families have no income to report—15.96 percent of the participants—and 336,700 families—an additional 69.18 percent—have an income of less than $500.

In other words, more than 85 percent of the total recipients of food stamps in Puerto Rico had income of less than $500 per month, a sad and tragic fact but one which reflects accurately the economic and poverty levels of Puerto Rico.

The majority of the remaining food stamp participants are "truly needy" by any category, any standard, and rule of measure and to single out these individuals is clearly unfair, having no real political clout in Congress which "States" of the Union have.

Puerto Ricans do not receive full benefits in many Federal assistance programs. There is a higher level of participation in the food stamp program in Puerto Rico since SSI and other Federal assistance programs have not been extended to Puerto Rico.

Puerto Ricans fight in the Armed Forces of the United States and have indicated that they are sharing the same burden of cutbacks which every other State is now confronted with. However, the exclusive and negative treatment of Puerto Rico as embodied in the Omnibus Budget Act is viewed as an affront.

There have been attempts made by the Reagan administration to reduce national participation in the program. Puerto Ricans are willing to share the burden of those cuts which have been adopted. But we consider grossly unfair and unjust the separate standards being applied to Puerto Rico. Both the Governor of Puerto Rico, Carlos Romero-Barceló, and I testified

in the Senate and House Agriculture Committees in strong and sharp opposition to this "targeted" treatment.

The House rejected an amendment offered in the Agriculture Committee during markup on the food stamp program which would have restricted our participation in the program by essentially reducing benefits to 55 percent of national income eligibility.

This proposal, was not as restrictive as the provisions contained in the omnibus budget reconciliation, however.

A "Yes" vote on the amendment to restore equal treatment to Puerto Rico will be viewed in Puerto Rico as a support of the rights of a group of citizens to the same treatment as other U.S. citizens no matter where they reside. A "No" vote would be a blow in the face of fairness for the more than 3.1 million U.S. citizens residing in Puerto Rico, citizens who are proud of the fact that they are Americans and have a higher standard of living—as citizens—than any other country in Central America, South America, or the Caribbean.

I urge you to support this amendment to restore equal treatment for Puerto Ricans as American citizens in the food stamp program.

Mr. COLEMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment to strike the provision allowing for a block grant for food assistance for Puerto Rico.

As you may remember, the Omnibus Reconciliation Act of 1981 provided for a block grant for Puerto Rico beginning July 1982. Allow me to reiterate the reasons for this block grant proposal.

In Puerto Rico, about 58 percent of the population receives food stamps, well over one-half the island's population. This is compared with the total number in the contiguous States receiving food stamps, which is about 10 percent of the population. Also, 10 percent of the entire food stamp budget goes to Puerto Rico, and 10 percent of the personal income of the people in Puerto Rico is derived from food stamps.

The people of Puerto Rico do not pay Federal income tax. They make no financial contribution to the funds that provide the food stamp assistance. The new block grant legislation offers Puerto Rico the opportunity, one, to address the unique characteristics of its population; two, evaluate the appropriateness and effectiveness of operating a food stamp program as it has been in operation in the past; three, have maximum flexibility in designing nutrition assistance which meets the special needs of its population; four, achieve significant savings for the Nation; five, more effectively direct program dollars to the truly needy, thereby eliminating excess; and, six, insure that food programs more realistically relate to its existing economy and particularly the agricultural sector.

Mr. Chairman, even in the present food stamp program, Puerto Rico has different rules applying to the island. The standard deduction, the shelter/dependent care deduction, and the thrifty food plan are lower in Puerto Rico than they are in the 48 contiguous States and the District of Columbia. Congress has already recognized that Puerto Rico differs with respect to the deductions and benefits of the food stamp program.

Congress was concerned about the size and the growth of the food stamp program in Puerto Rico and was determined that the Puerto Rican government should have the opportunity to design their own assistance program.

As I stated earlier, the block grant will begin on July 1, 1982, and $206 million was authorized for this year. In fiscal year 1983 and subsequent years, $825 million is earmarked and authorized each year for Puerto Rico. With this block grant, the government of Puerto Rico will have the opportunity to tailor a food assistance program to the specific needs of the people of Puerto Rico.

The savings over the 3-year period that we are talking about, with the provision of the block grant in effect, is $700 million. We cannot begin to undo the saving measures that were accomplished during the reconciliation process here on the floor of the House just a few months ago. We must continue the provision of a block grant to Puerto Rico.

Remember that 58 percent of the population receives food stamps, that no State approaches this level. Mississippi has 21 percent of their population receiving food stamps, and that is the next highest participation rate in the entire program.

I believe that the block grant, with the funding level set at $820 million a year, is the best method to address the Puerto Rican situation.

Before I yield to my friend, the gentleman from Puerto Rico, I do want to point out that within the reconciliation package is authority for the people of Puerto Rico, the Governor of Puerto Rico and those people who are coming up with their program, to utilize some of the moneys from that in order to accomplish more, produce more, provide incentives for them to produce more, and have economic growth in their own agricultural sector. And that is a very important thing that we must recognize, that Puerto Rico is presently dependent on food imports and that they are going to have to construct on the island their own agricultural capability of producing for themselves to a much greater extent than they have now.

I would also like to point out to the Members that we have an implementation date which is coming upon us. The Governor and the island have to come up with a plan submitted to the Congress by April of next year so that they can go forward with the plan to commence this block grant proposal. So it is important that we keep this in the law as it presently is, or we are going to have to be faced with the situation of finding some $700 million more in cuts in other parts of this program. Or, do you want to take it out of the agricultural commodity program, if we do not continue with the block grant proposal that we voted through in the Reconciliation Act earlier this year?

Mr. CORRADA. Mr. Chairman, will the gentleman yield?

Mr. COLEMAN. I yield to my friend, the gentleman from Puerto Rico.

Mr. CORRADA. I thank the gentleman for yielding.

Mr. Chairman, I would like to mention to the gentleman that, first of all, the implication of the Richmond amendment is not $700 million, or anywhere near that amount. For the purpose of this fiscal year, it will be $45 million, $200 million for fiscal year 1983, which is the year when the block grant will be fully implemented.

The CHAIRMAN. The time of the gentleman from Missouri (Mr. COLEMAN) has expired.

(On request of Mr. CORRADA and by unanimous consent, Mr. COLEMAN was allowed to proceed for 2 additional minutes.)

Mr. CORRADA. If the gentleman will yield further, I would like to let the gentleman know that if he thinks that this kind of provision is going to effectuate any savings in the food stamp program, he is totally wrong. I will tell the gentleman what it is going to do. It will restart a massive migration of Puerto Ricans, who are American citizens and can fly to New York, Illinois, to Massachusetts, New Jersey, Connecticut, every State here in the U.S. mainland. If you provide this kind of cut in the food stamp program there, all you are doing is providing an incentive for them to fly to the U.S. mainland and not only get food stamps here, but require services such as education, health, and so on. So I think that this will not effect the savings that the gentleman would like to have.

Mr. COLEMAN. I appreciate the gentleman's comments, but this is the challenge that the Governor of Puerto Rico has: He has the challenge from the Congress to construct a program on the island that is going to serve the needs of his people, with $825 million a year. I think he is up to that challenge. I think the gentleman is up to this challenge. We will not see the outmigration that the gentleman is antici-

pating. I think they will come up with a workable program, by the people of Puerto Rico, for the people of Puerto Rico. I might point out that the administration, of course, is opposed to the Richmond amendment because we are anticipating savings next year of $70 million and in 1983, $325 million.

Mr. SKEEN. Mr. Chairman, will the gentleman yield?

Mr. COLEMAN. I yield to the gentleman from New Mexico.

The CHAIRMAN. The time of the gentleman from Missouri (Mr. COLEMAN) has again expired.

(On request of Mr. SKEEN and by unanimous consent, Mr. COLEMAN was allowed to proceed for 2 additional minutes.)

□ 1345

Mr. SKEEN. I thank the gentleman for yielding and I want to associate my remarks strongly opposing this amendment.

We fall victim to what is known around this place as congressional timidity. We spend a lot of time passing bills, then we go back by amendment nibbling away at them.

I think it is extremely important we keep this strong provision in, the block grants to Puerto Rico.

This amendment seeks to reverse the decision of the Congress made several months ago to allow the Commonwealth of Puerto Rico to assume control over its citizens' own nutritional needs. It would destroy the opportunity to provide a real demonstration of local authorities administration of a significant human assistance program on a block grant basis and I, for one, am anxious to allow this program to go forward. I have been convinced that we need help from local authorities in designing programs that will eliminate the fraud and abuse that has so characterized this national program. Let us give the Puerto Rican government a chance to show us what can be done. I am confident that they will be innovative and prudent.

We in this Congress will always have the authority to review what is being done there as anywhere else. If we find that the government of Puerto Rico is simply making cash distributions to their food stamp recipients or some other imprudent scheme, we can review the program and institute guidelines to eliminate such abuses.

Mr. ROUSSELOT. Mr. Chairman, will the gentleman yield?

Mr. COLEMAN. I yield to the gentleman from California.

Mr. ROUSSELOT. I thank the gentleman for yielding.

Did the gentleman say that 58 percent of the people were on food stamps?

Mr. COLEMAN. That is right.

Mr. ROUSSELOT. That is a little high. I think the gentleman is to be complimented for trying to retain the block grant concept, especially evidently since the Governor of Puerto Rico has agreed to try to come up with a plan to put controls on this effort.

If all food stamp programs in various States got as far out of hand as this, I think we would be in deep trouble all over the country. I think the gentleman is to be complimented for opposing this amendment because I think this amendment would eliminate a control where the local government was involved in trying to help put a handle on it. Nobody is really going to be denied food stamps if this amendment does pass, will they really?

Mr. COLEMAN. No. The food stamp program in operation in Puerto Rico will be under the present law. They are going to get $825 million per year. They are going to get millions of dollars a year to run their program.

Also, there is authorization for seed money to develop their own agricultural base which has not been developed to the extent it could be. They could bring down their own domestic prices, the cost of food and they could also produce much of it on their own, which they have not done in the recent past.

I think that is something we all should recognize. They can help themselves, too, in this process.

Mr. ROUSSELOT. I appreciate the gentleman's comments.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. COLEMAN. I yield to the gentleman from Iowa.

The CHAIRMAN. The time of the gentleman from Missouri (Mr. COLEMAN) has expired.

(At the request of Mr. BEDELL and by unanimous consent, Mr. COLEMAN was allowed to proceed for 3 additional minutes.)

Mr. BEDELL. First of all, I want to commend the gentleman. It is not easy for us to stand up and oppose things that might be beneficial to some of our colleagues or that they might support, but I think the gentleman has pointed out something that needs to be pointed out.

We have a budget that we are trying to meet. The gentleman from Iowa offered an amendment to cut a billion dollars out of this farm program in order to meet that budget. I think it is important that we recognize that and we do not go willy-nilly adding costs to programs unless we can clearly justify those costs.

In my opinion, this increase is not justified. I have nothing against the Puerto Rican people. I know they are beautiful people. I certainly support them. But there are differences.

As the gentleman has pointed out, there are already differences in how you qualify. The fact is the Puerto Rican people do not pay income taxes, as do the rest of the citizens of the continental United States. There are differences. I think we should recognize those differences very clearly.

I have a letter from a sister who has served in Puerto Rico from my district. I would like to read two or three sentences:

> Having worked on the island for 5 years, I know that 60 percent of the people there do not need food stamps. This handout has been a curse to the people and a ripoff of the United States.

Further, she says:

> Puerto Ricans are beautiful people, but their overdependence on us has hurt their dignity as a people.

I would hope we would have concern for the people of Puerto Rico. I would hope we would have concern for what type of bill we are passing. I hope we would above all have concern as we act as a legislative body and I would hope we would have the courage to try to vote a bill which will meet the budget as the gentleman from Missouri is proposing.

I certainly support the gentleman's effort.

Mr. COLEMAN. I thank the gentleman.

I think the gentleman's comments are very appropriate. If we do pass the Richmond amendment, we are going to have to right now find tens of millions and hundreds of millions of dollars somewhere in the farm programs to balance this off. I do not think we want to make that decision right here and I would like to congratulate my friend from Puerto Rico, who has worked very closely and very hard for his people on this program and I think we have tried to accommodate many of their concerns.

As I said earlier, I think he, the Congress, and the Governor of Puerto Rico can construct a very good plan that can become effective and work to the betterment of the people of Puerto Rico, as well as all the taxpayers of the United States.

Mr. PEYSER. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the amendment.

Mr. Chairman, I have been listening to the debate on this particular issue and had read some previous material concerning it, and I must say I find this very hard to understand today.

What everyone is saying reminds me of a group that I talked to a month ago, a group that I was explaining the impact of budget cuts to, and a member of this group—this was a group in the business community—said to me, "Well, we all have to tighten our belts, we just understand the President has told us we must all tighten our belts and must sacrifice."

So I said to the group, I said, "Will one member of this audience please stand and tell me what they are going to sacrifice because of these budget cuts?"

And there was not anybody who could tell me anything that they were going to sacrifice in that particular group.

I would not expect it. These were upper middle income business people. I do not think the budget cuts are going to hurt them.

Here we are, the United States of America, still the wealthiest Nation in the world saying to a group of Puerto Ricans who are citizens, "You are just going to have to tighten your belts like the rest of us only you are going to have to do it more so."

I do not understand that. I do not even think in the sense of fair play of Americans that the public would accept that. Unless someone is prepared to say that the people in Puerto Rico are not at poverty levels, and that they do not need, if someone wants to say they do not really need food stamps and that this whole thing is just a giant ripoff, and these people are living great, if anybody can produce evidence on that, I would certainly feel differently on the matter. But I do not think that is what anybody is saying.

So I just feel that we ought to really be able to say these are people who need the help and people who are entitled to the help.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. PEYSER. I yield to the gentleman from Iowa.

Mr. BEDELL. I just read a letter from a sister who has been there, who says exactly what the gentleman is saying, that 60 percent of the people there do not need food stamps. This handout has been a curse on the people and a ripoff of the U.S. Government.

Mr. PEYSER. I heard the gentleman reading a letter saying that, but that letter does not impress me nearly as much as my friend from Puerto Rico.

Mr. CORRADA. Mr. Chairman, will the gentleman yield?

Mr. PEYSER. I yield to the gentleman from Puerto Rico.

Mr. CORRADA. I am glad that my distinguished colleague from Iowa (Mr. BEDELL) has mentioned that letter from a nun. Let me say that I happen to come from a very nice family; I have three sisters who are nuns, and I know they know Puerto Rico much better than this American Iowan sister who come down there and met with the people.

I do not understand how she can say 60 percent of the people who receive food stamps in Puerto Rico are not entitled to them when 70 percent of the entire population of Puerto Rico is under the Federal standard of poverty. The reason why 56 percent of the people are on food stamps rather than the 70 percent is that people still try to avoid getting food stamps.

Let me also say that does not mean that food stamps are the sole source of their income for nutrition purposes. Because of the proportion, 36 percent are solely dependent on food stamps. The rest are hard working people who would rather have work, but we have a 20-percent level of unemployment, which apparently was of no concern to this dear nun who was there.

So the reason that we have that high a percentage of participation is, first of all, that 70 percent of the people are poor. AFDC is restricted to a very narrow group and this would be a step backward because all we are doing under the Richmond amendment is keeping Puerto Ricans as they are currently, subject, of course, to all the restrictions that are being placed as a result of this bill.

Mr. PEYSER. I thank the gentleman.

I think, as Members of this House, we can place a great deal more credence in what the gentleman from Puerto Rico says on this situation and in the sense of fair play that Americans have always demonstrated that we would not take this kind of action of striking down the Richmond amendment, which obviously should be passed.

Mr. DUNN. Mr. Chairman, will the gentleman yield?

Mr. PEYSER. I yield to the gentleman from Michigan.

Mr. DUNN. I thank the gentleman for yielding.

Putting aside the budget considerations and a sense of fair play, does the gentleman not think there is a possibility that there is something wrong with the system where 58 percent of the people are on it, and does the gentleman not think in a sense of fair play to those people that they, not the gentleman or I, deserve an opportunity to try something different?

Mr. PEYSER. Let me answer my friend and tell him I think there is something wrong with a system that has 58 percent of the people on it, but not for the reason that the gentleman is talking about.

What is wrong is that these people are in poverty and they do not have jobs and they have been restricted in their opportunities. I think for us to cut back on these people is really unfair. I cannot understand that we would do that.

The CHAIRMAN. The time of the gentleman from New York (Mr. PEYSER) has expired.

(By unanimous consent, Mr. PEYSER was allowed to proceed for 1 additional minute.)

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. PEYSER. I yield to the gentleman from Illinois.

Mr. SIMON. I thank the gentleman for yielding.

I am going to support the Richmond amendment. I think what this discussion has pointed out is that we have not faced up to the realities in Puerto Rico as we should and as we must. In fact, Commonwealth status is second-class citizenship status, unfortunately.

Now, I think one of these days I hope that the people of Puerto Rico will make a decision that will go in the direction of statehood. In the meantime, I think we should be approaching as close to that as we could, but at the very least we should not be cutting back on people who already face real misery in Puerto Rico.

Mr. PEYSER. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. RICHMOND).

The amendment was rejected.

Mr. WAMPLER. Mr. Chairman, I would like to discuss an issue concerning the food stamp workfare projects. Currently there are 14 pilot projects in operation and as I understand, H.R. 3603 will allow any State, county, or city to operate a workfare project. Some of you may be aware of the various groups, allegedly representing the interests of food stamp recipients and who are themselves recipients of Federal funds, attempting to interfere with and impede the implementation of the workfare pilot projects. In fact, a situation of this type has recently occurred in the county in my district that operates a workfare pilot project.

Allow me to recite a brief history of these types of activities in my district:

First, in December 1980, Tazewell County began implementation of their workfare pilot project.

Second, in February 1981, two organizations who are recipients of Federal funds through the Legal Services Corporation organized a meeting concerning the workfare project. In a letter written shortly after that meeting they stated that the purpose of the meeting was:

> The purpose of our meeting in Tazewell County was to begin finding out what problems workfare participants were having, not only so that we could work on those problems here, but also, so that information on this program will be available to advocates who are trying to influence the future form of the program.

Third, in March 1981, another organization, also a recipient of Federal funds through the Legal Services Corporation, decided that their study of the workfare pilot projects should take place in Tazewell County.

Fourth, in June 1981, personnel of this organization went, unannounced, to Tazewell County and interviewed workfare participants and job sponsors about the pilot project. They did not advise the county administrators of their intent to come to Tazewell County. The GAO is in the process of conducting an investigation into this

matter; therefore, what actually occurred during that visit has yet to be fully evaluated.

Fifth, in August 1981, three organizations, who again I might mention are recipient of Federal funds, organized a meeting in Tazewell County. A few State and county officials were invited to speak at this meeting. As it turned out they were confronted by a group of hostile people which included about 50 people brought in from other Virginia localities, some as far away as the Tidewater area. Allow me to read an excerpt from a newspaper article which recounted this event from the Richmond News Leader, August 14, 1981:

Welfare recipients from more than 30 Virginia counties and cities have denounced a "workfare" requirement for getting food stamps.

They met yesterday in Tazewell County, the only locality in Virginia with a workfare program requiring some food stamp recipients to work.

Some 50 people from as far away as Norfolk and Virginia Beach gathered at the Tazewell rescue squad building for a meeting sponsored by the Tazewell Client Council, Virginia Poverty Law Center and Virginia Antihunger Coalition.

Attorneys and other speakers urged participants to take information gathered at the meeting and use it to persuade their local governing bodies not to approve workfare.

My point in raising this issue is to clarify that organizations of this nature are prohibited from using Federal funds to impede or harrass State or local administrators in implementing the provisions of the Food Stamp Act—or in fact any program authorized by the Congress.

I wish to make it clear that the activities of the nature I described must not be repeated by organizations who receive Federal funds.

VA. WELFARE RECIPIENTS SCORE "WORKFARE" PLAN

TAZEWELL.—Welfare recipients from more than 30 Virginia counties and cities have denounced a "workfare" requirement for getting food stamps.

They met yesterday in Tazewell County, the only locality in Virginia with a workfare program requiring some food stamp recipients to work.

Some 50 people from as far away as Norfolk and Virginia Beach gathered at the Tazewell Rescue Squad building for a meeting sponsored by the Tazewell Client Council, Virginia Poverty Law Center and Virginia Anti-Hunger Coalition.

Attorneys and other speakers urged participants to take information gathered at the meeting and use it to persuade their local governing bodies not to approve workfare.

Tazewell County is one of 14 localities in the nation with pilot workfare programs. This one got under way last December, after the U.S. Department of Agriculture agreed to pay 50 percent of the administrative costs.

Local officials have termed the program successful.

But Martin Wegbreit, staff attorney for Client Centered Legal Services of Southwest Virginia Inc. in Castlewood, said the county's workfare positions—except for a few showcase jobs such as clerk-typist or mechanic's aide—are custodial or menial.

He said many jobs planned for the program could not be filled because workfare participants lacked the skills, education and training to fill them.

He said the county has 1,700 households on food stamps, and only 380 people from those households were found qualified for the workfare program. Of these, he said, only 80 are working and they each work an average of 46 hours a month.

About a quarter of the 380 people were able to raise their incomes. Another quarter never responded to the letter informing them they should report for a workfare interview, and 62 have forfeited their food stamp allotment.

Wegbreit also argued that the administrative costs of the workfare program are more than the value of the work done.

The CHAIRMAN. Are there further amendments to title XIII?

If not the Clerk will designate title XIV.

Title XIV reads as follows:

TITLE XIV—NATIONAL AGRICULTURAL RESEARCH, EXTENSION, AND TEACHING POLICY ACT AMENDMENTS OF 1981

SHORT TITLE

SEC. 1401. This title may be cited as the "National Agricultural Research, Extension, and Teaching Policy Act Amendments of 1981".

FINDINGS

SEC. 1402. Section 1402 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3101) is amended by—

(1) beginning the first word of each numbered paragraph with a capital letter;

(2) striking out the semicolon at the end of each numbered paragraph and inserting in lieu thereof a period;

(3) striking out the word "and" at the end of paragraph numbered (8); and

(4) adding new paragraphs (10) and (11) at the end thereof to read as follows:

"(10) It is and has been the policy of the United States to support food and agricultural research, extension, and teaching in the broadest sense of these terms. The partnership between the Federal Government and the States, as consummated in legislation and cooperative agreements, and the cooperative nature of efforts to implement this policy in cooperation with the food and agricultural industry has been eminently successful. Cooperative research, extension, and teaching programs have provided the United States with the most productive and efficient food and agricultural system in the world. This system is the basis of our national affluence and it provides vast amounts of food and fiber to other people around the world. However, the food and agricultural system is dynamic and constantly changing. The research, extension, and teaching programs that support the food and agricultural system must be maintained and constantly adjusted to meet ever changing challenges. National support of cooperative research, extension, and teaching efforts must be reaffirmed and expanded at this time to meet major needs and challenges in the following areas:

"(A) FOOD AND AGRICULTURAL SYSTEM PRODUCTIVITY.—Increases in agricultural productivity have been outstanding, however, productivity growth in the past decade has slowed. It is imperative that improved technologies and management systems be developed to maintain and enhance agricultural productivity in order for agricultural production in the United States to meet the demand of a rising world population, rising costs of production, and limitations on energy consumption. Improved productivity in food and agricultural processing and marketing sectors is a critical need in the national effort to achieve a strong economy.

"(B) DEVELOPMENT OF NEW FOOD, FIBER, AND ENERGY SOURCES.—Programs to identify and develop new crop and animal sources of food, fiber, and energy must be undertaken to meet future needs.

"(C) AGRICULTURAL ENERGY USE AND PRODUCTION.—Much of the current agricultural technology is relatively energy intensive. It is critical that alternative technologies be developed to increase agricultural energy efficiency and to reduce dependence on petroleum based products. Furthermore, agriculture provides the United States with alternative potential sources of energy that must be assessed and developed.

"(D) NATURAL RESOURCES.—Improved management and conservation of soil, water, forest, and range resources is vital to maintain the resource base for food and fiber production. An expanded program in the area of soil and water conservation research is needed to develop more economical and effective conservation systems. Five key objectives of this research are:

"(i) sustaining soil productivity;

"(ii) developing more cost-effective and practical conservation technologies;

"(iii) managing water in stressed environments;

"(iv) protecting the quality of the nation's surface water and groundwater resources; and

"(v) establishing integrated multidisciplinary organic farming research projects designed to foster the implementation of the major recommendations of the United States Department of Agriculture Report and Recommendations on Organic Farming, July 1980.

"(E) PROMOTION OF THE HEALTH AND WELFARE OF PEOPLE.—The basic objectives of food and agricultural research, extension, and teaching programs are to make the maximum contribution to the health and welfare of people and to the economy of the United States through the enhancement of owner-operated family farms, to improve community services and institutions, to increase the quality of life in rural America, and to improve the well-being of consumers. The rapid rate of social change, economic instability, and current energy problems increase the need for expanded programs of research and extension in family financial management, housing and home energy consumption, food preparation and consumption, human development (including youth programs), and development of community services and institutions.

"(F) HUMAN NUTRITION.—The challenge to meet the food needs of the world continues, but there is an increasing need to address nutrition research and educational issues associated with diet resulting from changing life styles and with respect to special groups such as the elderly, teenagers, infants, and pregnant women.

"(G) INTERNATIONAL FOOD AND AGRICULTURE.—The greatest challenge facing mankind through the next two decades will be to produce adequate food for an expanding world population. This challenge demands a dedicated effort by the Federal Government

and the State cooperative institutions, and other colleges and universities to expand international food and agricultural research, extension, and teaching programs. Improved cooperation and communications by the Department of Agriculture and the cooperators with international agricultural research centers, counterpart agencies and universities in other countries, is necessary to improve food and agricultural progress throughout the world.

"(11) Long-range planning for research, extension, and teaching is a key element in meeting the objectives of this title, and all of the elements in the food and agricultural science and education system are encouraged to expand their planning and coordination efforts.".

PURPOSES

SEC. 1403. Section 1403 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3102) is amended by—

(1) in paragraph (4), striking out the comma after the word "programs" the first time it appears and striking out the words "including the initiatives specified in section 1402(8) of this title";

(2) in paragraph (6), striking out "and" immediately after the semicolon;

(3) in paragraph (7), striking out the words "training and research" and inserting in lieu thereof the words "research, extension, and teaching"; and striking out the period at the end thereof and inserting "; and" in lieu thereof; and

(4) adding a new paragraph (8) to read as follows:

"(8) ensure that the food and agricultural system of the United States can meet the challenges described in section 1402(10) of this title and future challenges by providing adequate support for research, extension, and teaching, by—

"(A) improving and strengthening the Federal-State partnership;

"(B) reducing unnecessary and pernicious regulations; and

"(C) improving the cooperation among all who are involved in the food and agricultural sciences.".

REVISED DEFINITIONS

SEC. 1404. Section 1404 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3103) is amended by—

(1) revising paragraph (8) to read as follows:

"(8) the term 'food and agricultural sciences' means basic, applied, and developmental research, and extension and teaching activities, in the food, agricultural, renewable natural resources, forestry, and physical and social sciences, in the broadest sense of these terms, including but not limited to, activities relating to:

"(A) agriculture, including soil and water conservation and use, the use of organic waste materials to improve soil tilth and fertility, plant and animal production and protection, and plant and animal health;

"(B) the processing, distributing, marketing, and utilization of food and agricultural products;

"(C) forestry, including range management, production of forest and range products, multiple use of forest and rangelands, and urban forestry;

"(D) aquaculture;

"(E) home economics, including consumer affairs, food and nutrition, clothing and textiles, housing, and family well-being and financial management;

"(F) rural community welfare and development;

"(G) youth development, including 4-H clubs;

"(H) domestic and export market expansion for United States agricultural products; and

"(I) production inputs, such as energy, to improve productivity.";

(2) revising paragraph (12) to read as follows:

"(12) the term 'State' means any one of the fifty States, the Commonwealth of Puerto Rico, Guam, American Samoa, the Commonwealth of the Northern Marianas, the Trust Territory of the Pacific Islands, the Virgin Islands of the United States, and the District of Columbia,"; and

(3) in paragraph (13), striking out "and" immediately after the semicolon;

(4) at the end of paragraph (14), striking out the period and inserting a semicolon in lieu thereof; and

(5) adding at the end thereof new paragraphs (15) and (16) as follows:

"(15) the term 'cooperating forestry schools' means those institutions eligible to receive funds under the Act of October 10, 1962 (16 U.S.C. 582a et seq.), commonly known as the McIntire-Stennis Act of 1962; and

"(16) the term 'State cooperative institutions' or 'State cooperative agents' means institutions or agents designated by—

"(A) the Act of July 2, 1862 (7 U.S.C. 301 et seq.), commonly known as the First Morrill Act;

"(B) the Act of August 30, 1890 (7 U.S.C. 321 et seq.), commonly known as the Second Morrill Act, including the Tuskegee Institute;

"(C) the Act of March 2, 1887 (7 U.S.C. 361a et seq.), commonly known as the Hatch Act of 1887;

"(D) the Act of May 8, 1914 (7 U.S.C. 341 et seq.), commonly known as the Smith-Lever Act;

"(E) the Act of October 10, 1962 (16 U.S.C. 582a et seq.), commonly known as the McIntire-Stennis Act of 1962; and

"(F) subtitles E, L, and M of this title;".

RESPONSIBILITIES OF THE SECRETARY AND COORDINATING ROLE OF THE DEPARTMENT OF AGRICULTURE

SEC. 1405. Section 1405 of the National Agricultural Research Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3121) is amended by—

(1) In subsection (1), striking out "Secretary of Health, Education, and Welfare" and inserting in lieu thereof "Secretary of Health and Human Services";

(2) In subsection (5), striking out the word "other";

(3) In subsection (6), inserting the words "or proposed" after the words "actions taken";

(4) In subsection (8), striking out the word "and" at the end thereof;

(5) In subsection (9), striking out the period and inserting in lieu thereof a semicolon; and

(6) Adding at the end thereof the following new paragraphs:

"(10) coordinate all agricultural research, extension, and teaching activities conducted or financed by the Department of Agriculture with the periodic Renewable Resource Assessment and Program provided for in sections 3 and 4 of the Forest and Rangeland Resources Planning Act of 1974 and the appraisal and program provided for in sections 5 and 6 of the Soil and Water Resources Conservation Act of 1977; and

"(11) take the initiative in overcoming barriers to long-range planning by developing, in conjunction with the States, State cooperative institutions, the Joint Council, the Advisory Board, and other appropriate institutions, a long term needs assessment for food, fiber and forest products, and by determining the research required to meet the identified needs.".

SUBCOMMITTEE ON FOOD, AGRICULTURAL, AND FORESTRY RESEARCH

SEC. 1406. (a) Section 1406 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 is amended by striking out the title and inserting in lieu thereof "Subcommittee on Food, Agricultural, and Forestry Research".

(b) Section 401(h) of the National Science and Technology Policy, Organization, and Priorities Act of 1976 (42 U.S.C. 6551(h)) is amended by—

(1) striking out "Subcommittee on Food and Renewable Resources" and inserting in lieu thereof "Subcommittee on Food, Agricultural, and Forestry Research";

(2) striking out "Department of Health, Education, and Welfare" and inserting in lieu thereof "Department of Health and Human Services"; and

(3) striking out "Energy Research and Development Administration" and inserting in lieu thereof "Department of Energy".

JOINT COUNCIL ON FOOD AND AGRICULTURAL SCIENCES

SEC. 1407. (a) Section 1407(a) of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122(a)) is amended by striking out "five" and inserting in lieu thereof "eight".

(b) Section 1407(b) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C 3122(b)) is amended to read as follows:

"(b) The Joint Council shall be composed of not fewer than twenty-five representatives of organizations or agencies which conduct or assist in conducting programs of research, extension, or teaching in the food and agricultural and forestry sciences, including State cooperative institutions; other colleges and universities having a demonstrable capacity to carry out food and agricultural research, extension, or teaching; agencies within the Department of Agriculture which have significant research, extension, or teaching responsibilities; the Office of Science and Technology Policy; other Federal agencies determined by the Secretary to be appropriate, and other public and private institutions, producers, and representatives of the public who are interested in and have a potential to contribute, as determined by the Secretary, to the foundation of national policy in the food and agricultural sciences. Members shall be appointed for a term of up to three years by the Secretary from nominations made by the organizations and agencies described in the preceding sentence. The terms of members shall be staggered. To ensure that regional differences are properly considered, at least one-half of the members of the Joint Council shall be appointed by the Secretary from among distinguished persons engaged in agricultural research, extension, and teaching programs at land-grant colleges and universities and State agricultural experiment stations. To ensure that other agricultural institutional views are considered by the Joint Council, two of the members of the Joint Council shall be appointed by the Secretary from among persons who are distinguished representatives of other colleges and univer-

sities having a demonstrable capacity to carry out food and agricultural research, extension, or teaching. The Joint Council shall be jointly chaired by the Assistant Secretary of Agriculture responsible for research, extension, and teaching, and a person to be elected from among the non-Federal membership of the Joint Council.".

(c) Section 1407(d)(1) of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122(d)(1)) is amended to read as follows:

"(1) The primary purpose of the Joint Council is to bring about more effective research, extension, and teaching in the food and agricultural sciences in the United States by improving planning and coordination of publicly and privately supported food and agricultural science activities and by relating Federal budget development and program management to these processes.".

(d) Section 1407(d)(2)(E) of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122(d)(2)(E)) is amended by striking out "efforts" and all that follows through "planning," and inserting in lieu thereof "in the food and agricultural sciences, by using, wherever possible, the existing regional research, extension, and teaching organizations of State cooperative institutions to provide regional planning and coordination,".

(e) Section 1407(d)(2)(G) of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122(d)(2)(G)) is amended to read as follows:

"(G) submit a report—

"(i) not later than June 30 of each year, specifying the Joint Council's recommendations on priorities for food and agricultural research, extension, and teaching programs; delineating suggested areas of responsibility among Federal, State, and private organizations in carrying out such programs; and specifying the levels of financial and other support needed to carry out such programs;

"(ii) not later than November 30 of each year, specifying ongoing research, extension, and teaching programs; accomplishments of such programs; and future expectations of these programs; and

"(iii) not later than June 30, 1983, outlining a five-year plan for food and agricultural sciences that reflects the coordinated views of the research, extension, and teaching community; and updating this plan every two years thereafter.

Each such report shall be submitted to the Congress, the President, the Secretary of Agriculture, and the constituent organizations of the Joint Council. Minority views, if timely submitted, shall be included in such report.".

(f) Section 1407 of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122) is amended by adding at the end thereof the following new subsection:

"(e)(1) The Federal Advisory Committee Act (5 U.S.C. app.), and title XVIII of the Food and Agriculture Act of 1977, shall not apply to the Joint Council.

"(2) The meetings of the Joint Council shall be publicly announced in advance and shall be open to the public. Appropriate records of the activities of the Joint Council shall be kept and made available to the public on request.".

NATIONAL AGRICULTURAL RESEARCH AND EXTENSION USERS ADVISORY BOARD

SEC. 1408. (a) Section 1408(a) of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3123(a)) is amended by striking out "five" and inserting in lieu thereof "eight".

(b) Section 1408(b) of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3123(b)) is amended by—

(1) striking out "twenty-one" and inserting in lieu thereof "twenty-five", and

(2) amending paragraph (1) to read as follows:

"(1) eight members representing producers of agricultural, forestry and aquacultural products, from the various geographical regions,"

(3) adding at the end thereof the following: "Such members shall be appointed to serve staggered terms.".

(c) Section 1408(f)(2) of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3123(f)(2)) is amended by—

(1) in subparagraph (E), striking out "October 31" and inserting in lieu thereof "July 1", and

(2) in subparagraph (F), striking out "March 1 of" and inserting in lieu thereof "February 20 of".

EXISTING RESEARCH PROGRAMS

SEC. 1409. Section 1409 of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3124) is amended by striking out "Health, Education, and welfare" each time it appears and inserting in lieu thereof "Health and Human Services".

FEDERAL-STATE PARTNERSHIP

SEC. 1410. The Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3124) is amended to add a new section 1409A to read as follows:

FEDERAL-STATE PARTNERSHIP AND COORDINATION

SEC. 1409A. (a) A unique partnership arrangement exists in food and agricultural research, extension, and teaching between the Federal Government and the governments of the several States whereby the States have accepted and have supported, through legislation and appropriations—

"(1) research programs under—

"(A) the Act of March 2, 1887 (7 U.S.C. 361a et seq.), commonly known as the Hatch Act of 1887;

"(B) the Act of October 10, 1962 (16 U.S.C. 582a et seq.), commonly known as the McIntire-Stennis Act of 1962;

"(C) subtitle E of this title; and

"(D) subtitle G of this title;

"(2) extension programs under subtitle G of this title and the Act of May 8, 1914 (7 U.S.C. 341 et seq.), commonly known as the Smith-Lever Act; and

"(3) teaching programs under—

"(A) the Act of July 2, 1862 (7 U.S.C. 301 et seq.), commonly known as the First Morrill Act;

"(B) the Act of August 30, 1890 (7 U.S.C. 321 et seq.), commonly known as the Second Morrill Act;

"(C) the Act of June 29, 1935 (7 U.S.C. 427 et seq.), commonly known as the Bankhead-Jones Act.

This partnership in publicly supported agricultural research, extension, and teaching involving the programs of Federal agencies and the programs of the States has played a major role in the outstanding successes achieved in meeting the varied, dispersed, and in many cases, site-specific needs of American agriculture. This partnership must be preserved and enhanced.

'(b)(1) The purpose of this subsection is to confer upon the Secretary of Agriculture general authority to award contracts, grants, or cooperative agreements to further the research, extension, or teaching programs in the food and agricultural sciences of the Department of Agriculture. This authority supplements all other laws relating to the Department of Agriculture and is not to be construed as limiting or repealing any existing authorities.

"(2) The Secretary of Agriculture may make contracts, grants, or cooperative agreements for periods not to exceed five years, to State agricultural experiment stations, State cooperative extension services, all colleges and universities, other research or education institutions and organizations, Federal and private agencies and organizations and individuals, and any other contractor or recipient either foreign or domestic, to further research, extension, or teaching programs in the food and agricultural sciences of the Department of Agriculture.

"(3) The Secretary of Agriculture may vest title to expendable and nonexpendable equipment and supplies and other tangible personal property in the contractor or recipient when the contractor or recipient purchases such equipment, supplies, and property with contract, grant, or cooperative agreement funds and the Secretary deems such vesting of title a furtherance of the agricultural research, extension, or teaching objectives of the Department of Agriculture.

"(4) Unless otherwise provided in this title, the Secretary of Agriculture may enter into contracts, grants, or cooperative agreements, as authorized by this subsection, without regard to any requirements for competition, the provisions of section 5 of title 41 of the United States Code, and the provisions of section 529 of title 31 of the United States Code.

"(c) In order to promote research and education in food and human nutrition, the Secretary may establish cooperative human nutrition centers to focus resources, facilities, and scientific expertise on particular high priority nutrition problems identified by the Department. Such centers shall be established at State cooperative institutions, and at other colleges and universities, having a demonstrable capacity to carry out human nutrition research and education.

"(d) In order to meet the increasing needs of consumers and families and to promote the health and welfare of people, the Secretary shall ensure that the cooperative research, extension, and teaching programs of the various States adequately address the challenges described in paragraph (10) of section 1402 of this title. The Secretary may implement new cooperative initiatives in home economics and related disciplines to address such challenges.".

SECRETARY'S REPORT

SEC. 1411. Section 1410 of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3125) is amended by—

(1) striking out "February 1" and inserting in lieu thereof "January 1"; and

(2) striking out "and" at the end of paragraph (2);

(3) striking out the period at the end of paragraph (3) and inserting in lieu thereof a semicolon and the word "and"; and

(4) adding at the end of section 1410 the following new paragraph:

"(4) in the report of January 1, 1983, the Secretary's needs assessment developed pursuant to the provisions of section 1405(11) of this title.".

LIBRARIES AND INFORMATION NETWORK

SEC. 1412. Section 1411 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3126) is amended by—

(1) in subsection (a)(5), striking out the period and inserting in lieu thereof a semicolon and the word "and";

(2) adding a new subsection (a)(6) to read as follows:

"(6) the Department of Agriculture establish mutually valuable working relationships with international and foreign information and data programs.".

(3) amending subsection (b)(3) to read as follows:

"(3) providing notification about these collections on a regular basis to the State cooperative extension services, State educational agencies and other interested persons.".

STAFF SUPPORT FOR THE JOINT COUNCIL AND THE ADVISORY BOARD

SEC. 1413. Section 1412(a) of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3127(a)) is amended to read as follows:

"(a) To assist the Joint Council and the Advisory Board in the performance of their duties, the Secretary may appoint, after consultation with the cochairperson of the Joint Council and the chairperson of the Advisory Board—

"(1) a full-time executive director who shall perform such duties as the cochairperson of the Joint Council and the chairperson of the Advisory Board may direct and who shall receive compensation at a rate not to exceed the rate payable for GS-18 of the General Schedule established in section 5332 of title 5, United States Code; and

"(2) a professional staff of not more than five full-time employees qualified in the food and agricultural sciences, of which one shall serve as the executive secretary to the Joint Council and one shall serve as the executive secretary to the Advisory Board.".

ADDITIONAL ASSISTANT SECRETARY OF AGRICULTURE

SEC. 1414. (a) Section 1413 of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3128) is amended by adding at the end thereof the following new subsections:

"(c) The President shall appoint, by and with the advice and consent of the Senate, an Assistant Secretary of Agriculture who shall perform such duties as are necessary to carry out this title and who shall receive compensation at the rate now or hereafter prescribed by law for Assistant Secretaries of Agriculture.

"(d) The Subcommittee on Food, Agricultural and Forestry Research, the Joint Council, the Advisory Board, and others in the agricultural science and education system shall improve communication and interaction among themselves through such mechanisms as the exchange of reports, joint meetings, and the use of liaison representatives.".

(b) Section 5315 of title 5, United States Code, is amended in the item relating to Assistant Secretaries of Agriculture by striking out "(5)" and inserting in lieu thereof "(6)".

GRANTS FOR AGRICULTURAL RESEARCH

SEC. 1415. (a) Section 2(b) of the Act of August 4, 1965 (7 U.S.C. 450i), is amended by—

(1) inserting after the second sentence the following:

"For purposes of the preceding sentence, high priority research shall include—

"(1) basic research aimed at the discovery of new scientific principles and techniques that may be applicable in agriculture and forestry;

"(2) research aimed at the development of new and innovative products, methods, and technologies relating to biological nitrogen fixation, photosynthesis, and other processes which will improve and increase the production of agricultural and forestry resources;

"(3) basic and applied research in the fields of animal productivity and health;

"(4) basic and applied research in the fields of soil and water;

"(5) basic and applied research in the field of human nutrition; and

"(6) research to develop new strains of crops, new promising crops, including guayule, jojoba, and others.", and

(2) by striking out "and $50,000,000 for the fiscal year ending September 30, 1982," and by inserting in lieu thereof "$50,000,000 for the fiscal year ending September 30, 1982, $35,000,000 for the fiscal year ending September 30, 1983, $40,000,000 for the fiscal year ending September 30, 1984, $45,000,000 for the fiscal year ending September 30, 1985,".

(b) Section 2(c) of the Act of August 4, 1965 (7 U.S.C. 450i(c) is amended by—

(1) in paragraph (1), inserting "research foundations established by land-grant colleges and universities," after "land-grant colleges and universities,", and

(2) amending paragraph (2) to read as follows:

"(2) to State agricultural experiment stations, land-grant colleges and universities, research foundations established by land-grant colleges and universities, colleges and universities, receiving funds under the Act of October 10, 1962 (16 U.S.C. 582a, 582a-1 through 582a-7), and accredited colleges of veterinary medicine, to facilitate or expand ongoing State-Federal food and agricultural research programs that (A) promote excellence in research, (B) promote the development of regional research centers, (C) promote the research partnership between the Department of Agriculture and such colleges and universities, such research foundations or State agricultural experiment stations, or (D) facilitate coordination and cooperation of research across State lines.".

(c) Section 2(d) of the Act of August 4, 1965 (7 U.S.C. 450i(d) is amended by—

(1) striking out "the purchase of equipment" and all that follows through the dash and inserting in lieu thereof "the renovation and refurbishment (including energy retrofitting) of research spaces in buildings or spaces to be used for research, and the purchase and installation of fixed equipment in such spaces. Such grants may be used for new construction only for auxiliary facilities and fixed equipment used for research in such facilities, such as greenhouses, insectaries, and research farm structures and installations. Such grants shall be made to—",

(2) in paragraph (1), striking out "available; and" and inserting in lieu thereof "available;",

(3) in paragraph (2), striking out the period and inserting in lieu thereof a semicolon, and

(4) inserting after paragraph (2) the following new paragraphs:

"(3) each cooperating forestry school not described in paragraph (1), in an amount which is equal to 10 per centum of the funds received by such school under the Act of October 10, 1962 (16 U.S.C. 582a et seq.), commonly known as the McIntire-Stennis Act of 1962; and

"(4) each college eligible to receive funds under the Act of August 30, 1890 (7 U.S.C. 321 et seq.), including Tuskegee Institute, in an amount which is equal to 10 per centum of the funds received by such college under section 1445 of this title.".

AUTHORIZATION OF APPROPRIATIONS FOR RESEARCH FACILITIES ACT OF 1963

SEC. 1416. Section 4(a) of the Act of July 22, 1963 (7 U.S.C. 390c(a)), is amended by striking out "and $31,000,000 for the fiscal year ending September 30, 1982," and inserting in lieu thereof "$15,000,000 for the fiscal year ending September 30, 1982, $19,000,000 for the fiscal year ending September 30, 1983, $23,000,000 for the fiscal year ending September 30, 1984, $27,000,000 for the fiscal year ending September 30, 1985,".

FEDERAL SUPPORT OF HIGHER EDUCATION IN THE FOOD AND AGRICULTURAL SCIENCES

SEC. 1417. (a) Section 1417(a) of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3152(a)) is amended to read as follows:

"(a)(1) The Secretary of Agriculture shall promote and develop higher education in the food and agricultural sciences by formulating and administering higher education programs.

"(2) The Secretary may make grants to land-grant colleges and unversities, and to other colleges and universities having a demonstrable capacity to carry out food and agricultural teaching, for a period not to exceed five years—

"(A) to strengthen institutional capacities to respond to State, national, or international educational needs in the food and agriculture sciences;

"(B) to attract students and to educate them as needed in the food and agricultural sciences, and to attract needed professionals to provide for their professional improvement in the food and agricultural sciences;

"(C) to design and implement innovative food and agricultural educational programs; and

"(D) to facilitate cooperative agreements between two or more eligible institutions to maximize the use of faculty and facilities to improve their food and agricultural teaching programs.

Such grants shall be made without regard to matching funds, but each recipient institution shall have a significant ongoing commitment to the food and agricultural sciences generally and to the specific subject area for which such grant is to be used.

"(3) The Secretary may make competitive grants to colleges and universities for a period not to exceed five years—

"(A) to develop or administer programs to meet unique food and agricultural educational problems; and

"(B) to administer and conduct specialized programs to attract individuals for undergraduate and graduate programs and to administer and conduct graduate fellowship programs to meet regional and national objectives in the food and agricultural sciences.

Such grants shall be made without regard to matching funds provided by recipients.".

(b) Section 1417(c) of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 315(c)) is amended to add at the end thereof the following: "There are hereby transferred to the Secretary of Agriculture all the functions and duties of the Secretary of Education under the Act of June 29, 1935 (7 U.S.C. 329 et seq.) applicable to the activities and programs for which funds are made available under section 22 of such Act.".

(c) Section 1417(d) of the Agricultural Research, Extension, and Teaching Act of 1977 (7 U.S.C. 3152(d)) is amended by striking out "and $50,000,000 for the fiscal year ending September 30, 1982," and inserting in lieu thereof "$25,000,000 for the fiscal year ending September 30, 1982, $30,000,000 for the fiscal year ending September 30, 1983, $35,000,000 for the fiscal year ending September 30, 1984, $40,000,000 for the fiscal year ending September 30, 1985,".

TRANSFER OF FUNCTIONS UNDER THE MORRILL ACT

SEC. 1418. There are hereby transferred to the Secretary of Agriculture all the functions and duties of the Secretary of Education under the Act of August 30, 1890 (7 U.S.C. 321 et seq.).

REDESIGNATION OF INSTRUCTION FUNDING

SEC. 1419. (a) The first section of the Act of August 30, 1890 (7 U.S.C. 322) is amended by striking out "agriculture, the mechanic arts," and all that follows through "industries of life" and inserting in lieu thereof "food and agricultural sciences".

(b) The tenth undesignated paragraph under the heading "DEPARTMENT OF AGRICULTURE" of the Act of March 4, 1907 (34 Stat. 1282) is amended by striking out "agriculture and the mechanic arts" the second place it appears and inserting in lieu thereof "food and agricultural sciences".

RESEARCH GRANTS ON PRODUCTION AND MARKETING OF ALCOHOL FUELS AND INDUSTRIAL HYDROCARBONS FROM AGRICULTURAL PRODUCTS

SEC. 1420. Section 1419 (a) of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3154(a) is amended by—

(1) striking out "four", and

(2) striking out "and September 30, 1982" and all that follows through the period at the end of that sentence and inserting in lieu thereof the following: ", September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985: *Provided*, That the total amount of such appropriations shall not exceed $40,000,000 during the eight-year period beginning October 1, 1977, and shall not exceed such sums as may be authorized by law for any fiscal year subsequent to such period: *Provided further*, That not more than a total of $5,000,000 may be awarded to the colleges and universities of any one State.".

SEC. 1421. Section 1424 of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3174) is amended to read as follows:

"ASSESSMENT OF FOOD AND HUMAN NUTRITION RESEARCH CENTERS

"SEC. 1424. The Secretary shall make a study assessing the accomplishments, costs, and benefits of existing regional food and human nutrition research centers as established by the United States Department of Agriculture, recommendations relating to funding levels, the status of grants to build or supply the regional research centers, and progress toward achieving cooperation with States and others in the use of Federal facilities in research carried out to achieve the policy set forth in section 1421 of this title. The Secretary shall complete this study and submit a report setting forth the findings of the study and recommendations for the implementation of these findings, as a part of the report the Secretary is required to submit to Congress pursuant to section 1405(6) of this title, not later than the second annual budget submission following the effective date of this title.".

SEC. 1422. Section 1427 of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3177) is amended to read as follows:

"HUMAN NUTRITION RESEARCH AND INFORMATION MANAGEMENT SYSTEM

"SEC. 1427. The Secretary and the Secretary of Health and Human Services shall formulate and submit to Congress, within one hundred and twenty days after the date of enactment of this title, a plan for a human nutrition research management system. This system shall be based on online data support capability allowing for fiscal accounting, management, and control of cross-agency human nutrition research activities. The plan shall provide for management activities of all agencies managing funds for human nutrition research activities under existing authorities and contain recommendations for any additional authorities necessary to achieve a human nutrition research management system.".

CONFORMING AMENDMENT

SEC. 1423. Section 1429 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3191) is amended by revising the last sentence thereof to read as follows: "It is recognized that the total animal health and disease research and extension efforts of the several State colleges and universities and of the Federal Government would be more effective if there were close coordination between such programs, and it is further recognized that colleges and universities having accredited colleges of veterinary medicine and State agricultural experiment stations which conduct animal health and disease research are especially vital in training research workers in animal health.".

ELIGIBLE INSTITUTIONS FOR ANIMAL HEALTH AND DISEASE RESEARCH FUNDS

SEC. 1424. Section 1430 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3192) is amended by amending paragraph (1) to read as follows:

"(1) the term 'eligible institution' means an accredited school or college of veterinary medicine or a State agricultural experiment station which conducts animal health and disease research.".

APPROPRIATIONS FOR ANIMAL HEALTH AND DISEASE RESEARCH PROGRAMS AT ELIGIBLE INSTITUTIONS

SEC. 1425. Section 1433(a) of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3195) is hereby amended by striking out the first sentence and inserting in lieu thereof: "There are hereby authorized to be appropriated such funds as Congress may determine necessary to support continuing animal health and disease research programs at eligible institutions, but not to exceed $25,000,000 annually for the period beginning October 1, 1981, and ending September 30, 1985, and not in excess of such sums as may after the date of enactment of this title be authorized by law for any subsequent fiscal year.

APPROPRIATIONS FOR RESEARCH ON SPECIFIC NATIONAL OR REGIONAL ANIMAL HEALTH OR DISEASE PROBLEMS

SEC. 1426. (a) Section 1434(a) of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3196) is hereby amended by striking out the first sentence and inserting in lieu thereof; "There are hereby authorized to be appropriated such funds as Congress may determine necessary to support research on specific national or regional animal health or disease problems, but not to exceed $35,000,000 annually for the period beginning October 1, 1981, and ending September 30, 1985, and not in excess of such sums as may after the date of enactment of this title be authorized by law for any subsequent fiscal year."

(b) Section 1434(b) of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3196(b)) is amended to read as follows:

"(b) Funds appropriated under this section shall be awarded in the form of grants, for periods not to exceed five years, to eligible institutions.".

(c) Section 1434 of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3196) is amended by adding at the end thereof the following new subsections:

"(c) In order to establish a rational allocation of funds appropriated under this section, the Secretary shall establish annually priority lists of animal health and disease problems of national or regional significance. Such lists shall be prepared after consultation with the Joint Council, the Advisory Board, and the Board. Any recommendations made in connection with such consultation shall not be controlling on the Secretary's determination of priorities. In establishing such priorities, the Secretary, the Joint Council, the Advisory Board, and the Board shall consider the following factors:

"(1) any health or disease problem which causes or may cause significant economic losses to any part of the livestock production industry;

"(2) whether current scientific knowledge necessary to prevent, cure, or abate such a health or disease problem is adequate; and

"(3) whether the status of scientific research is such that accomplishments may be anticipated through the application of scientific effort to such health or disease problem.

"(d) Without regard to any consultation under subsection (c), the Secretary shall, to the extent feasible, award grants to eligible institutions on the basis of the priorities assigned through a peer review system. Grantees shall be selected on a competitive basis in accordance with such procedures as the Secretary may establish.

"(e) In the case of multiyear grants, the Secretary shall distribute funds to grant recipients on a schedule which is reasonably related to the timetable required for the orderly conduct of the research project involved.".

EXTENSION AT 1890 LAND-GRANT COLLEGES, INCLUDING TUSKEGEE INSTITUTE

SEC. 1427. Section 1444 of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3211(a)) is amended by—

(1) in subsection (a),

(a) inserting "and ending with the fiscal year ending September 30, 1982," after "Beginning with the fiscal year ending September 30, 1979,", and

(b) inserting after the second sentence thereof the following: "Beginning with the fiscal year ending September 30, 1983, there shall be appropriated under this section for each fiscal year an amount not less than 7 per centum of the total appropriations for such year under the Act of May 8, 1914 (7 U.S.C. 341-349.";

(2) in subsection (b)(2)(B), inserting "current at the time each such additional sum is

first appropriated" after "the last preceding decennial census" both times it appears;

(3) in subsection (c), striking out "administrative head for extension" and inserting in lieu thereof "extension administrator"; and

(4) in subsection (d), striking out "submitted by the proper officials of each institution" and inserting in lieu of "submitted, as part of the State plan of work, by the State director of the cooperative extension service".

AGRICULTURE RESEARCH IN 1890 LAND-GRANT COLLEGES, INCLUDING TUSKEGEE INSTITUTE

SEC. 1428. (a) Section 1445 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3222) is amended by—

(1) in subsection (b)(1), adding at the end thereof a new sentence to read as follows: "These administrative funds may be used for transportation of scientists who are not officers or employees of the United States to research meetings convened for the purpose of assessing research opportunities or research planning.";

(2) in subsection (b)(2)(B), inserting "current at the time each such additional sum is first appropriated" after "the last preceding decennial census" both times it appears; and

(3) in subsection (c) and (d), striking out "chief administrative offer" each time it appears and inserting in lieu thereof "research director".

(b)(1) The Secretary of Agriculture shall make a grant of funds appropriated under paragraph (5) to the one college of all the colleges eligible to receive funds under the Act of August 30, 1980 (7 U.S.C. 321), including Tuskegee Institute which, on the date of the enactment of this title—

(A) has initiated a dairy goat research program, and

(B) has the best demonstrable capacity to carry out dairy goat research.

(2) Any grant received under paragraph (1) by such college may be expended to—

(A) pay expenses incurred in conducting dairy goat research,

(B) print and disseminate the results of such research,

(C) contribute to the retirement of employees engaged in such research,

(D) plan, administer, and direct such research, and

(E) construct, acquire, alter, and repair buildings necessary to conduct such research.

(3)(A) Under the terms of such grant, funds appropriated under paragraph (5) of this subsection for a fiscal year shall be paid to such college in equal quarterly installments beginning on or about the first day of October of such year upon vouchers approved by the Secretary of Agriculture.

(B) Not later than sixty days after the end of each fiscal year for which funds are paid under subsection (a) to such college, the chief administrative officer of such college shall submit to the Secretary of Agriculture a detailed statement of the disbursements in such fiscal year of funds received by such college under such subsection.

(C) If any of the funds so received by such college are by any action or contingency misapplied, lost, or diminished, then—

(i) such college shall replace such funds, and

(ii) the Secretary shall not distribute to such college any other funds under subsection (a) until such replacement is made.

(4) for purposes of section 1445(e) of the Food and Agriculture Act of 1977 (7 U.S.C. 3222(e)), research and experiments funded under this subsection shall be deemed to be research and experiments funded under section 1445 of such Act.

(5) There is authorized to be appropriated for each of the fiscal years 1982, 1983, 1984, and 1985 an amount equal to one percent of the aggregate amount of funds appropriated to carry out section 1445 of the Food and Agriculture Act of 1977 (7 U.S.C. 3222) in the fiscal year preceding the fiscal year for which funds are authorized to be appropriated under this paragraph.

SOLAR ENERGY DEFINITION

SEC. 1429. Section 1457 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3282) is amended to read as follows:

"SEC. 1457. For purposes of this subtitle, the term 'solar energy' means energy derived from sources (other than fossil fuels) and technologies included in the Federal Non-Nuclear Energy Research and Development Act of 1974, as amended.".

INTERNATIONAL AGRICULTURAL RESEARCH AND EXTENSION

SEC. 1430. Section 1458 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3291) is amended by—

(1) in subsection (3), striking out "work with developed countries on agricultural" and inserting in lieu thereof "work with developed and transitional countries on food, agricultural and related";

(2) in subsection (5), striking out the period and inserting in lieu thereof a semicolon and the word "and"; and

(3) adding a new paragraph to read as follows:

"(6) provide specialized or technical services on an advance of funds or a reimbursable basis to United States colleges and universities carrying out international food, agricultural, and related research and development projects and activities. All funds received in payment for furnishing specialized or technical services authorized under this subsection shall be deposited to the credit of the appropriation from which the cost of providing such services has been paid or is to be charged.".

AUTHORIZATION FOR APPROPRIATIONS FOR EXISTING AND CERTAIN NEW AGRICULTURAL PROGRAMS

SEC. 1431. (a) Section 1463(a) of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3311(a)) is amended by striking out "and $780,000,000 for the fiscal year ending September 30, 1982," and inserting in lieu thereof "$780,000,000 for the fiscal year ending September 30, 1982, $800,000,000 for the fiscal year ending September 30, 1983, $820,000,000 for the fiscal year ending September 30, 1984, $840,000,000 for the fiscal year ending September 30, 1985,".

(b) Section 1463(b) of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3311(b)) is amended by striking out "and $220,000,000 for the fiscal year ending September 30, 1982," and inserting in lieu thereof "$220,000,000 for the fiscal year ending September 30, 1982, $245,000,000 for the fiscal year ending September 30, 1983, $270,000,000 for the fiscal year ending September 30, 1984, $295,000,000 for the fiscal year ending September 30, 1985,".

(c) Section 1463 of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3311) is amended by adding at the end thereof a new subsection to read as follow:

"(c) Notwithstanding any other provision of law, effective beginning October 1, 1983, not less than 25 per centum of the total funds appropriated to the Secretary in any fiscal year for the conduct of the cooperative research program provided for under the Act of March 2, 1887, commonly known as the Hatch Act (7 U.S.C. 361a, et seq.); the cooperative forestry research program provided for under the Act of October 10, 1962, commonly known as the McIntire-Stennis Act (16 U.S.C. 582a, et seq.); the special and competitive grants programs provided for in sections 2(b) and 2(c) of the Act of August 4, 1965 (7 U.S.C. 405l); the animal health research program provided for under sections 1433 and 1434 of this title; the native latex research program provided for in the Native Latex Commercialization and Economic Development Act of 1978 (7 U.S.C. 178, et seq.); and the research provided for under various statutes for which funds are appropriated under the Agricultural Research heading or a successor heading, shall be appropriated for research at State agricultural experiment stations pursuant to the provision of the Act of March 2, 1887, commonly known as the Hatch Act (7 U.S.C. 361a, et seq.)."

AUTHORIZATION FOR APPROPRIATIONS FOR EXTENSION EDUCATION

SEC. 1432. Section 1464 of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3312) is amended by striking out "and $350,000,000 for the fiscal year ending September 30, 1982," and inserting in lieu thereof "$350,000,000 for the fiscal year ending September 30, 1982, $370,000,000 for the fiscal year ending September 30, 1983, $390,000,000 for the fiscal year ending September 30, 1984, $410,000,000 for the fiscal year ending September 30, 1985,".

INDIRECT COSTS AND TUITION REMISSION

SEC. 1433. Subtitle K of the Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3311-3316) is amended by adding at the end thereof the following new section:

"RESTRICTION ON TREATMENT OF INDIRECT COSTS AND TUITION REMISSION

"SEC. 1471. Funds made available by the Secretary of Agriculture under established Federal-State partnership arrangements to State cooperative institutions under the Acts referred to in section 1404(16) of this Act and funds made available under subsection (c)(2) and subsection (d) of section 2 of the Act of August 4, 1965 (7 U.S.C. 450i); shall not be subject to reduction for indirect costs or for tuition remission. No indirect costs or tuition remission shall be charged against funds in connection with cooperative agreements between the Department of Agriculture and State cooperative institutions if the cooperative program or project involved is of mutual interest to all the parties and if all the parties contribute to the cooperative agreement involved.".

AQUACULTURE AND RANGELAND RESEARCH

SEC. 1434. The Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3301-3304) is amended by adding at the end thereof the following new subtitles L and M:

"Subtitle L—Aquaculture

"PURPOSE

"SEC. 1475. It is the purpose of this title to promote research and extension activities of the institutions hereinafter cited in section 1476(b) of this Act, and to coordinate their efforts as an integral part and in implementation of the 'National Aquaculture Act of 1980' (Public Law 96-362; 16 U.S.C. 2801) by

encouraging landowners, individuals, and commercial institutions to develop aquaculture production and facilities and sound aquaculture practices that will, through research and technology transfer programs, provide for the increased production and marketing of aquacultural food products.

"AQUACULTURE ASSISTANCE PROGRAMS

"SEC. 1476. (a) The Secretary may develop and implement a cooperative research and extension program to encourage the development, management, and production of important aquatic food species within the several States and territories of the United States, in accordance with the National Aquacultural Plan and revisions thereto developed under the National Aquacultural Act of 1980.

"(b) The Secretary may make grants to—

"(1) land-grant colleges and universities;

"(2) State agricultural experiment stations; and

"(3) colleges, universities, and Federal laboratories having a demonstrable capacity to conduct aquacultural research, as determined by the Secretary;

for research and extension to facilitate or expand promising advances in the production and marketing of aquacultural food species and products. No grant may be made under this subsection unless the State in which the grant recipient is located makes a matching grant to such recipient equal to the amount of the grant to be made under this subsection, and unless the grant is in implementation of the National Aquacultural Plan and revision thereto developed under the National Aquacultural Act of 1980.

"(c) The Secretary may assist States to formulate aquaculture development plans for the enhancement of the production and marketing of aquacultural species and products from such States and may make grants to States on a matching basis, as determined by the Secretary. The aggregate amount of the grants made to any one State under this subsection may not exceed $50,000. The plans shall be consistent with the National Aquaculture Plan, and revisions thereto, developed under the National Aquaculture Act of 1980.

"(d) To provide for aquacultural research, development, and demonstration projects having a national or regional application, the Secretary may establish in existing Federal facilities or in cooperation with State agencies (including State departments of agriculture), and land-grant colleges and universities, up to four aquacultural research, development, and demonstration centers in the United States for the performance of aquacultural research, extension work, and demonstration projects. Funds made available for the operation of such regional centers may be used for the rehabilitation of existing buildings or facilities to house such centers, but may not be used for the construction or acquisition of new buildings or facilities.

"(e) Not later than one year after the effective date of this subtitle and not later than March 1 of each year, the Secretary shall submit a report to the President, the Committee on Agriculture of the House of Representatives, the Committee on Appropriations of the House of Representatives, the Committee on Agriculture, Nutrition, and Forestry of the Senate, and the Committee on Appropriations of the Senate, a summary outlining progress of the Department of Agriculture in meeting the purposes of the programs established under this subtitle.

"AQUACULTURE ADVISORY BOARD

"SEC. 1477. (a) The Secretary shall establish within the Department of Agriculture a board to be known as the Aquaculture Advisory Board (hereinafter in this subtitle referred to as the "Board") which shall have a term of five years and which shall be composed of the following twelve members appointed by the Secretary—

"(1) four representatives of the Science and Education Administration, Department of Agriculture; and

"(2) eight members appointed by the Secretary comprised of—

"(A) two members representing cooperative extension services;

"(B) two members representing State agricultural experiment stations; and

"(C) four members representing national aquaculture organizations.

Members of the Board shall serve without compensation for such service. While away from their homes or regular places of business in the performance of services for the Board, members of the Board shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5 of the United States Code.

"(b) The Board shall meet at the call of the Secretary, but at least annually, to consult with and advise the Secretary with respect to the implementation of this subtitle and to recommend priorities for the conduct of research and extension programs authorized in this subtitle, under such rules and procedures for conducting business as the Secretary may, in the Secretary's discretion, prescribe.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 1478. (a) There is authorized to be appropriated $7,500,000 for each fiscal year beginning after the effective date of this subtitle, and ending with the fiscal year ending September 30, 1985, and not in excess of such sums as may after the date of enactment of this title be authorized by law for any subsequent fiscal year.

"(b) Funds appropriated under subsection (a) shall be allocated by the Secretary for work to be done as mutually agreed upon between the Secretary and the institutions described in section 1476(b). The Secretary shall, whenever possible, consult with the Board in developing plans for the use of these funds.".

"Subtitle M—Rangeland Research

"PURPOSE

"SEC. 1479. It is the purpose of this subtitle to promote the general welfare through improved productivity of the Nation's rangelands, which comprise 60 per centum of United States land area. Most of these rangelands are unsuited for cultivation, but produce a great volume of forage inedible by humans, but readily converted to high quality food protein by grazing animals in the most energy efficient form of agriculture. These native grazing lands occur throughout the United States and provide the source for major segments of the Nation's livestock industry. In addition to the many directly dependent on range, other segments of agriculture are indirectly dependent on range-fed livestock the harvest crop aftermath and to stabilize grain prices by substituting forage for grain in times of grain scarcity or being fed more grain in times of surplus. Recent resource assessments indicate that forage production of rangeland can be increased at least 100 per centum through development and application of improved range management practices while simultaneously enhancing wildlife, watershed, recreational, and aesthetic values and reducing hazards of erosion and flooding.

"RANGELAND RESEARCH PROGRAM

"SEC. 1480. The Secretary may develop and implement a cooperative rangeland research program in coordination with the program carried out under the Renewable Resources Extension Act of 1978 to improve the production and quality of desirable native forages or introduced forages which are managed in a similar manner to native forages for livestock and wildlife. The program shall include studies of: (1) management of rangelands and agricultural land as integrated systems for more efficient utilization of crops and waste products in the production of food and fiber; (2) management of rangeland watersheds to improve the condition of water utilization, water yield, water quality, and water conservation, and to protect against onsite and offsite damage of resources from floods, erosion, and other detrimental influences and to remedy unsatisfactory and unstable rangeland conditions; (3) revegetation and rehabilitation of rangelands including the control of undesirable species of plants; and (4) such other matters as the Secretary considers appropriate.

"RANGELAND RESEARCH GRANTS

"SEC. 1481. The Secretary may make grants to landgrant colleges and universities, State agricultural experiment stations, and to colleges and universities and Federal laboratories having a demonstrable capacity in rangeland research, as determined by the Secretary, to carry out rangeland research. This grant program shall be based on a matching formula of 50 per centum Federal and 50 per centum non-Federal funding.

"REPORTS

"SEC. 1482. Not later than one year after the date of the enactment of this subtitle, and not later than March 1 of each successive year the Secretary shall submit a report to the President, the House Committee on Agriculture, the House Committee on Appropriations, the Senate Committee on Agriculture, Nutrition, and Forestry, and the Senate Committee on Appropriations, outlining progress of the Department in meeting the program requirements set forth in section 1480 of this subtitle.

"RANGELAND RESEARCH ADVISORY BOARD

"SEC. 1483. (a) The Secretary shall establish a board to be known as the Rangeland Research Advisory Board which shall have a term of four years, and which shall be composed of the following twelve members appointed by the Secretary:

"(1) Four representatives of the Department of Agriculture's Science and Education Administration,

"(2) Four representatives of the State Agricultural experiment stations, and

"(3) Four representatives of national rangeland and range livestock organizations.

The members shall serve without compensation, if not otherwise officers or employees of the United States, except that they shall, while away from their homes or regular places of business in the performance of services for the Board, be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section

5701 through 5707 of title 5 of the United States Code.

"(b) The Board shall meet at the call of the Secretary, but at least once annually, to consult with and advise the Secretary with respect to the implementation of this subtitle and to recommend priorities for the conduct of programs authorized under this subtitle, under such rules and procedures for conducting business as the Secretary shall prescribe.

"APPROPRIATIONS

"SEC. 1484. (a) There are hereby authorized to be appropriated, to implement the provisions of this subtitle, such sums not to exceed $10,000,000 annually for the period beginning October 1, 1981, and ending September 30, 1985, and thereafter such sums as may after the date of enactment of this subtitle be authorized by law for any subsequent fiscal year.

"(b) Funds appropriated under this section shall be allocated by the Secretary to eligible institutions for work to be done as mutually agreed upon between the Secretary and the eligible institution or institutions. The Secretary shall, whenever possible, consult the Board in developing plans for the use of these funds.".

TABLE OF CONTENTS

SEC. 1435. The table of contents of the Food and Agriculture Act of 1977 is amended by—

(1) inserting immediately after the item referring to section 1409 the following new item:

"Sec. 1409A. Federal-State partnership and coordination."; and

(2) adding at the end of title XIV the following new items:

"SUBTITLE L—AQUACULTURE

"Sec. 1475. Purpose.
"Sec. 1476. Agriculture assistance programs.
"Sec. 1477. Aquaculture Advisory Board.
"Sec. 1478. Authorization of appropriations.".

"SUBTITLE M—RANGELAND RESEARCH

"Sec. 1479. Purpose.
"Sec. 1480. Rangeland research program.
"Sec. 1481. Rangeland research grants.
"Sec. 1482. Reports.
"Sec. 1483. Rangeland Research Advisory Board.
"Sec. 1484. Appropriations.".

M'INTYRE-STENNIS ACT AMENDMENTS

SEC. 1436. (a) Section 1 of the Act of October 10, 1962 (16 U.S.C. 582a), commonly known as the McIntyre-Stennis Act of 1962, is amended by adding at the end thereof the following: "It is also recognized that the provisions of this Act are essential to assist in providing the research background which undergirds the Forest and Rangeland Renewable Resources Planning Act of 1974, the Renewable Resources Extension Act of 1978, and the Soil and Water Conservation Act of 1978.".

(b) Section 2 of the Act of October 10, 1962 (16 U.S.C. 582a–1), commonly known as the McIntyre-Stennis Act of 1962, is amended by adding at the end thereof the following: "If more than one institution within a State is certified as qualifying for assistance, then it shall be the responsibility of such institutions in agreement with the Secretary of Agriculture, to develop complementary programs of forestry research for the State.".

(c) Section 5 and section 6 of the Act of August 10, 1962 (16 U.S.C. 582a–4, 582a–5), commonly known as the McIntyre-Stennis Act of 1962, are amended to read as follows:

"SEC. 5. (a) The Secretary shall prescribe such rules as may be necessary to carry out this Act and to furnish such advice and assistance through a cooperative State forestry research unit in the Department of Agriculture as will best promote the purpose of this Act.

"(b) The Secretary shall appoint a council of not fewer than 16 members which shall be constituted to give representation to Federal and State agencies concerned with developing and utilizing the Nation's forest resources, the forest industries, the forestry schools of the State-certified eligible institutions, and volunteer public groups concerned with forests and related natural resources. The council shall meet at least annually and shall submit a report to the Secretary on regional and national planning and coordination of forestry research within the Federal and State agencies, forestry schools, and the forest industries, and shall advise the Secretary on the apportionment of funds. The Secretary shall seek, at least once each year, the advice of the council to accomplish efficiently the purposes of this Act.

"SEC. 6. Apportionments among participating States shall be determined by the Secretary after consultation with the council appointed under section 5. In making such apportionments, consideration shall be given to pertinent factors including non-Federal expenditures for forestry research by State-certified eligible institutions, areas of non-Federal commercial forest land, and the volume of timber cut annually. Three per centum of such funds as may be appropriated shall be made available to the Secretary for administration of this Act.".

PROHIBITION AGAINST REDUCTION OF STATE FUNDS UPON INCREASE IN FEDERAL ALLOTMENT

SEC. 1437. (a) Section 3 of the Act of March 2, 1887 (7 U.S.C. 361c), commonly known as the Hatch Act of 1887, is amended by adding at the end thereof a new subsection (g) as follows:

"(g) If in any year the amount made available by a State from its own funds (including any revenue-sharing funds) to a State agricultural experiment station is reduced because of an increase in the allotment made available under this Act, the allotment to the State agricultural experiment station from the appropriation in the next succeeding fiscal year shall be reduced in an equivalent amount. The Secretary shall reapportion the amount of such reduction to other States for use by their agricultural experiment stations.".

(b) Section 4 of the Act of October 10, 1962 (16 U.S.C 582a–3), commonly known as the McIntire-Stennis Act of 1962, is amended by adding at the end thereof the following: "If in any year the amount made available by a State from its own funds (including any revenue-sharing funds) to a State-certified institution eligible for assistance under this Act is reduced because of an increase in the allotment made available under this Act, the allotment of such State-certified institution from the next succeeding appropriation shall be reduced in an equivalent amount. The Secretary shall reapportion the amount of such reduction to other eligible colleges and universities of the same State if there be any that qualify therefor and, if there be none, the Secretary shall reapportion such amount to the qualifying colleges and universities of other States participating in the forestry research program.".

EXCESS FEDERAL PROPERTY

SEC. 1438. Section 202(d)(2) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 483) is amended by—

(1) striking out the word "or" at the end of subparagraph (C);

(2) striking out the period at the end of subparagraph (D) and inserting in lieu thereof a semicolon and the word "or"; and

(3) adding the following new subparagraph immediately after subparagraph (D):

"(E) property furnished by the Secretary of Agriculture to any State or county extension service engaged in cooperative agricultural extension work pursuant to the Act of May 8, 1914, commonly known as the Smith-Lever Act (7 U.S.C. 341 et seq.); any State experiment station engaged in cooperative agricultural research work pursuant to the Act of March 2, 1887, commonly known as the Hatch Act (7 U.S.C. 361a et seq.); and any institution engaged in cooperative agricultural research and extension work pursuant to sections 1444 and 1445 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3221–22), where title is retained in the United States. For the purpose of this provision, the term 'State' means any one of the fifty States, the Commonwealth of Puerto Rico, Guam, American Samoa, the Commonwealth of the Northern Marianas, the Trust Territory of the Pacific Islands, the Virgin Islands of the United States, and the District of Columbia.".

EFFECTIVE DATE

SEC. 1439. This title and the amendments made by this title shall take effect on October 1, 1981.

Mr. BROWN of California. Title XIV of the Food and Agriculture Act of 1981 contains provisions of importance to all parts of our society. Producers and consumers alike benefit from the food, nutrition, and agriculture research, extension, and teaching programs authorized here. The application of past research results has provided us with a bounty of agricultural production. But we must protect our research, extension, and education system if we are to continue to produce at current levels.

I have been concerned for some time we have been "mining" our research and knowledge base in agriculture. By this I mean that we are taking more out of the research, extension, and teaching system than we are putting back in. Outlays for this system have remained constant for many years, yet the importance of the agriculture sector in our economy has grown dramatically. Our current bounty of production results from applications of research done over the last 40 years. While we can expect these good times to continue into the near future, there are new factors entering the picture which our past research has not had to deal with.

We are currently facing a number of limitations to resources which are vital to agricultural production. Energy cost increases are driving up the cost of agricultural production and forcing changes in farming practices. Water of

a quality and quantity to sustain our agricultural production will become increasingly limited. Our soil resources are eroding at a rate that threatens our productivity in the near term. We need to develop new strategies for dealing with these limitations. But this research requires a strong commitment by the Federal and State partners in our system. It also requires a better job of coordination between the Department of Agriculture and other Government agencies and between our public sector efforts and private sector research.

This planning and coordination function is accomplished, in part, by two advisory bodies established in the 1977 farm bill: the Joint Council on Food and Agricultural Sciences and the National Agricultural Research and Extension Users Advisory Board. In this year's legislation, minor changes are made to these two bodies to enhance their operation. As was pointed out in the report accompanying H.R. 3603, the diversity of viewpoints represented on these bodies is of great assistance to the Congress. We obtain a much more thorough examination of issues than could be provided from a narrower perspective and expect that the present diversity will be continued.

Recognizing the delay between the initiation of research and its application, an increased emphasis on longer range planning is included in the provisions of title XIV. The Joint Council is to prepare, by June 30, 1983, a 5-year plan for food and agricultural sciences and update this plan every 2 years. A separate mandate is given to the Secretary to develop a long-range research needs assessment. This needs assessment should involve the best minds inside and outside of the Department of Agriculture and produce a document of use to all parts of the food and agriculture sector.

This title also reinforces the importance of the Federal-State partnership in our research, extension, and teaching system. Numerous changes are made to emphasize the role of the land-grant institutions and to facilitate their valuable contribution to our food and agriculture sector.

In an attempt to take advantage of research taking place in other disciplines, the competitive grants program is reauthorized.

AMENDMENT OFFERED BY MR. DE LA GARZA

Mr. DE LA GARZA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DE LA GARZA: On page 179 immediately after line 22 insert the following new section:

AUTHORITY TO AWARD GRANTS TO UPGRADE 1890 LAND-GRANT COLLEGE RESEARCH FACILITIES

SEC. 1441. (a) It is hereby declared to be the intent of the Congress to assist the institutions eligible to receive funds under the Act of August 30, 1890 (7 U.S.C. 321-326 and 328), including Tuskegee Institute (hereinafter referred to in this section as "eligible institutions"), in the acquisition and improvement of research facilities and equipment so that eligible institutions may participate fully with the State agricultural experiment stations in a balanced attack on the research needs of the people of their States.

(b) There are hereby authorized to be appropriated to the Secretary of Agriculture for the purpose of carrying out the provisions of this section $10,000,000 for each of the fiscal years 1982 through 1986, such sums to remain available until expended.

(c) 4 per centum of the sums appropriated pursuant to this section shall be available to the Secretary for administration of this grants program. The remaining funds shall be available for grants to the eligible institutions for the purpose of assisting them in the purchase of equipment and land, and the planning, construction, alteration, or renovation of buildings to strengthen their capacity to conduct research in the food and agricultural sciences.

(d) Grants awarded pursuant to this section shall be made in such amounts and under such terms and conditions as the Secretary shall determine necessary for carrying out the purposes of this section.

(e) Federal funds provided under this section may not be utilized for the payment of any overhead costs of the eligible institutions.

(f) The Secretary may promulgate such rules and regulations as the Secretary may deem necessary to carry out the provisions of this section.

Mr. DE LA GARZA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. DE LA GARZA. Mr. Chairman, this amendment is the identical wording of the bill, H.R. 1309, which has already passed the House by voice vote and it is an attempt since it has not been picked up in the Senate, to incorporate it into this bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. DE LA GARZA).

The amendment was agreed to.

AMENDMENT OFFERED BY MRS. SMITH OF NEBRASKA

Mrs. SMITH of Nebraska. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mrs. SMITH of Nebraska: Page 179, after line 19, insert the following new section:

APPORTIONMENT OF FUNDS APPROPRIATED FOR SCHOOLS OF VETERINARY MEDICINE

SEC. 1439. Section 1415(c)(2) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3151(c)(2)) is amended by striking out the colon and the proviso.

Page 179, line 21, strike out "SEC. 1439." and insert in lieu thereof "SEC. 1440.".

Mrs. SMITH of Nebraska (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Nebraska?

There was no objection.

Mrs. SMITH of Nebraska. Mr. Chairman, this amendment will eliminate a roadblock to future construction of Colleges of Veterinary Medicine.

Section 1415 of title XIV of the 1977 Farm bill authorizes appropriations for matching grants to regional schools of veterinary medicine. To qualify, such a school, which emphasizes treatment of food animals, must have 50 percent State and local matching funds and must have the cooperation of at least one other State than that in which it is located.

The authority has never been used, for two reasons. First, schools have been able to acquire funds through the Department of Health and Human Services. However, as a result of budget cuts, such funds for construction are no longer available. Second, there is a provision in section 1415 that requires 50 percent of any funds appropriated for new schools to be available for existing accredited schools.

This provision, more than any other, has effectively eliminated use of the authority for construction of colleges of veterinary medicine. Incredibly, it requires that if any prospective school asks for funding, any resulting appropriation must be double the amount requested. The use of funds made available under such an appropriation to existing schools is undefined.

We all know that appropriating new construction money is nearly impossible, but appropriating "double the money" is totally impossible.

This amendment does not involve any money, is acceptable to the American Veterinary Medicine Association, and is not opposed by the majority or minority of the agriculture committee. It will simply remove a roadblock to future use of the authority for construction of regional food animal colleges of veterinary medicine.

Mr. DE LA GARZA. Mr. Chairman, will the gentlewoman yield?

Mrs. SMITH of Nebraska. I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, we have examined the gentlewoman's amendment and consider it to be a valuable addition to the present law and would be very happy to accept it on our side.

Mrs. SMITH of Nebraska. I thank the gentleman.

Mr. WAMPLER. Mr. Chairman, will the gentlewoman yield?

Mrs. SMITH of Nebraska. I yield to the gentleman from Virginia.

Mr. WAMPLER. I want to commend the gentlewoman from Nebraska for her interest in title XIV of this bill.

She has made many valuable contributions and certainly this amendment is one of them. We are certainly willing to accept it on this side.

Mrs. SMITH of Nebraska. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentlewoman from Nebraska (Mrs. SMITH).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. BROWN OF CALIFORNIA

Mr. BROWN of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROWN of California: On page 158, line 13, "strike 'by the State director of the cooperative extension service.'"

Mr. BROWN of California (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BROWN of California. Mr. Chairman, this amendment is offered to satisfy the concerns of a number of 1890 extension administrators who feel that the current language in the bill does not allow the 1890 institutions sufficient flexibility to develop their own independent extension work plans. The amendment merely eliminates the provision that each State's work plan be submitted by the State director of the cooperative extension service.

This amendment is in keeping with a resolution recently passed at the southern regional meeting of extension directors and administrators and is acceptable to the Department of Agriculture.

The amended language is a result of the coordinated efforts of a special task force consisting of a representative of the National Association of State Universities and Land-Grant Colleges (NASULGC), the chairman of the Extension Committee on Policy (ECOP), and the chairman of the 1890 Extension Committee.

While my amendment insures that the 1890 extension administrators can continue to maintain a strong voice in the planning and execution of programs geared to their special needs, it is expected that the State's extension programs will continue to be coordinated in order to eliminate any duplication and fragmentation of effort and to best fit the requirements of the people of the State as a whole.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. BROWN OF California. I yield to the gentleman from Texas.

Mr. DE LA GARZA. As chairman of the subcommittee that has jurisdiction over this matter, we appreciate the gentleman's interest and we would gladly accept the gentleman's amendment.

Mr. WAMPLER. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I yield to the gentleman from Virginia.

Mr. WAMPLER. I thank the gentleman for yielding.

I wish to associate myself with the remarks of the distinguished gentleman from Texas (Mr. DE LA GARZA) and we are perfectly willing to accept the gentleman's amendment on this side.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. BROWN).

The amendment was agreed to.

Mr. WAMPLER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, title XIV of H.R. 3603 amends the 1977 farm bill in several critical areas and extends other provisions of this title for an additional 4 years. In particular, it more clearly defines the partnership arrangements that have existed between the Federal Government and the States in the food and agricultural research, extension, and teaching systems for well over 100 years.

For example, the principal advisory body to the Secretary of Agriculture in the food and agricultural sciences is strengthened to achieve a more representative balance between scientific experts from the State land-grant colleges and other educational institutions and the Federal representation on the Joint Council than now exists in the current act. This change should greatly improve the quality of the advice given the Secretary on agricultural research, extension, and teaching matters by the Joint Council and at the same time improve the participation of the State research, extension, and teaching institutions in the overall system. Additionally, the Users Advisory Board, made up from all sectors of society which benefit from agricultural research, extension, and teaching, has also been strengthened to increase producer representation on this body.

One of the main deficiencies of the 1977 act was the failure of the Congress to establish a policy head for the food and agricultural sciences in the Department of Agriculture. These amendments provide for an Assistant Secretary of Agriculture with the prime mission of administering this title. The mission of American agriculture is to provide food, fiber, and forest products to our economy at reasonable prices and also to play a major role in supplying these products to a world whose appetite seems to be limitless, especially as time goes forward into the coming century. It goes without saying that agricultural science, extension, and teaching will play a major role in accomplishing the task of increasing agricultural production beyond our present capacity in the face of limited water, soil, energy, and financial supplies. Leadership to head up this task is demanded. An assistant secretary for agricultural research, extension, and teaching will assist greatly in meeting this need.

Several new features are also included. One would provide authorization for a new subtitle on rangeland research, which provides authorization for a new and expanded rangeland research program, proposed by our chairman, Mr. DE LA GARZA. There is also a new subtitle on aquaculture, which provides direction and authorization for a specific aquaculture research and extension program in the Department of Agriculture, thus carrying out the provisions of the National Aquacultural Act of 1980.

At this point I want to commend the contributions of Chairman DE LA GARZA and Subcommittee Chairman BROWN of California and many other members of our committee for their bipartisan efforts on behalf of this bill. Far too often we tend to overlook the hard work of our researchers and extension scientists who day-by-day work to put food on our tables, clothes on our backs, furniture in our homes and shelter for our young ones. We as Americans have been living in an era of plenty, a period of oversupply. Tomorrow we face a period of ever-increasing shortages. Science and technology, alone, can provide us with the key to the future. I urge your support for this title.

□ 1400

AMENDMENT OFFERED BY MR. BETHUNE

Mr. BETHUNE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BETHUNE: Page 179, insert the following new section after line 19, and redesignate the following section accordingly:

TRANSFER OF FISH RESEARCH AND EXPERIMENTATION PROGRAM

SEC. 1439. (a) The Act entitled "An Act to authorize the Secretary of the Interior to establish a program for the purpose of carrying on certain research and experimentation to develop methods for commerical production of fish on flooded rice acreage in rotation with rice field crops, and for other purposes", approved March 15, 1958 (16 U.S.C. 778-778c), is amended—

(1) by striking out "Secretary of the Interior" in the first section, section 2, and section 3, and inserting in lieu thereof "Secretary of Agriculture"; and

(2) by striking out "Department of Agriculture" in the first section and section 3, and inserting in lieu thereof "Department of the Interior".

(b) Within ninety days after the effective date of this title, the personnel employed in connection with, and the assets, liabilities, contracts, real and personal property, records, and unexpended balance of appropriations, authorizations, allocations, and other funds employed, held, arising from, available to, or to be made available in connec-

tion with the functions transferred by this Act, subject to section 202 of the Budget and Accounting Procedures Act of 1950, shall be transferred to the Secretary of Agriculture.

Mr. BETHUNE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. SNYDER. Mr. Chairman, I reserve a point of order against the amendment.

The CHAIRMAN. The gentleman from Kentucky reserves a point of order.

Mr. BETHUNE. Mr. Chairman, I thank the gentleman for reserving the point of order in order to give me a chance to be heard on this amendment.

This amendment that I propose would simply transfer the Fish Farming Experimental Station at Stuttgart, Ark., from the Department of the Interior to the Department of Agriculture.

I offer this amendment because as a Member of Congress every year since I have been here I have had the problem of having to go all about this House and over on the Senate side to get the funding for this particular fish farming experimental station put back into the legislation.

I have discovered in the course of these travels, not being a member of either the Agriculture Committee or the Interior Committee that the agriculture people have a very keen interest in catfish farming. They seem very interested in getting into agriculture. They are doing research at universities and they could really use this facility.

The work that is being done here is more nearly related to the production of food and the kinds of functions that we have in the Agriculture Department than we find in the fish and wildlife services; so it occurred to me that in order to save this process each year that we simply ought to move this from one department to another and be done with all the difficulty and get it into those departments of Government that really care about the mission that we are trying to accomplish down there.

As a matter of fact, the record bears out that not only is it difficult to get the funding back in for this very productive facility, but when the funding is approved it is approved at the constant level and therefore due to inflation we wind up with less money and less personnel and we are unable to do the work that we should be doing at the station. So that is why I offer the amendment.

I would very much like to hear the comments of the distinguished gentleman from Kentucky and others who are on the committees that I have had difficulty with in the last couple years.

The CHAIRMAN. Does the gentleman from Kentucky wish to be heard on his point of order?

Mr. SNYDER. Yes, Mr. Chairman.

POINT OF ORDER

Mr. Chairman, I make a point of order that the gentleman's amendment is in violation of House rule XXI, clause 5, which prohibits the consideration of an amendment which proposes an appropriation to a bill reported by a committee not having that jurisdiction.

The amendment before us violates this rule at the bottom of the first page by transferring an unexpended balance of an Interior appropriation to the Secretary of Agriculture.

Rule XXI, clause 5, says:

No bill or joint resolution carrying appropriations shall be reported by any committee not having jurisdiction to report appropriations, nor shall an amendment proposing an appropriation be in order during the consideration of a bill or joint resolution reported by a committee not having that jurisdiction.

The CHAIRMAN. Does the gentleman from Arkansas wish to be heard on the point of order?

Mr. BETHUNE. Yes; Mr. Chairman, I recognize the jurisdiction difficulties and the parliamentary difficulties.

Mr. WHITTEN. Mr. Chairman, will the gentleman yield?

Mr. BETHUNE. I yield to the distinguished gentleman from Mississippi.

Mr. WHITTEN. Mr. Chairman, I just would like to join in the presentation made by the gentleman in the well. We have that same situation occurring all over the country.

I recognize the jurisdictional question which the Chair has to rule on; but the Department of the Interior is constantly threatening and attempting to cut out these fish hatcheries. The Interior Department does not seem to have any realization that it has become a big commercial enterprise and of very great importance not only to the consumer, but to the producer.

It might surprise many folks to know that this program was started by Senator Fulbright of Arkansas, whose interests were in many directions.

I would just like to say here that I hope this committee will give some thought to taking such authorizing steps as may be helpful in putting this, as a commercial enterprise, into the Department of Agriculture so that we may bring together those that have a knowledge of the program with those who have the money.

As Members know, I have been chairman of the Appropriations Subcommittee on Agriculture for a long time; and Interior just simply does not seem to have an understanding beyond sport fishing. This has become a big problem and I think more properly it should be in the Department of Agriculture.

Mr. WAMPLER. Mr. Chairman, will the gentleman yield?

Mr. BETHUNE. I yield to the distinguished gentleman from Virginia.

Mr. WAMPLER. Mr. Chairman, I thank the gentleman for yielding.

Let me associate myself with the remarks of the distinguished gentleman from Mississippi (Mr. WHITTEN). Title XIV of the bill that is currently before us authorizes research in aquaculture. This is a recognition of a great potential that we should give more attention to.

As a member of the Committee on Agriculture, I would like to see the Department of Agriculture more actively involved in this area of research and production.

(Mr. WAMPLER asked and was given permission to revise and extend his remarks.)

Mr. BETHUNE. Mr. Chairman, I thank the gentleman for his contribution.

I think it is plain from the colloquy here that there is an interest in agriculture for this particular station.

The CHAIRMAN. While the Chair permits this colloquy pending the request to withdraw the amendment, does the gentleman from Kentucky (Mr. SNYDER) continue to reserve his point of order which he has made?

Mr. SNYDER. I do, Mr. Chairman.

The CHAIRMAN. The gentleman from Arkansas still has the time.

Mr. BETHUNE. Mr. Chairman, I know the gentleman from New Jersey was not present, but we had a discussion about this earlier.

Of course, the crux of this matter is that my concern is for the continued development of this very worthy project in fish farming at the experimental station at Stuttgart, Ark.

Mr. FORSYTHE. Mr. Chairman, will the gentleman yield?

Mr. BETHUNE. I yield to the gentleman from New Jersey.

(Mr. FORSYTHE asked and was given permission to revise and extend his remarks.)

Mr. FORSYTHE. Mr. Chairman, I would like to point out that even though I do object to the transfer to the Department of Agriculture that I do believe this is a very good facility and that we should try to work together in seeing that it does get sufficient funding to keep it in business, because it is doing very good work and we should try to do that.

Mr. Chairman, I rise in opposition to the amendment which has been offered by my distinguished colleague from Arkansas.

The Stuttgart Fish Farming Experimental Station was established to provide much-needed research, extension, and diagnostic services to the commer-

cial fish farming industry. It is the only Federal facility with the specific role of providing such services.

The National Aquaculture Act of 1980 provides for the establishment of a National Aquaculture Plan by March, 1982. This plan will identify the obstacles to the development of the U.S. aquaculture industry and will determine which Federal department is best equipped to assist in overcoming these obstacles.

Preceding passage of this historic act, it was clear that the Department of the Interior had the best capability to carry out certain disease and nutritional research work relating to the aquaculture of various species. Congressional testimony is replete with examples of the outstanding work done in this field by the Department of the Interior. All parties involved in the development of the aquaculture bill agreed that such research would be a major contribution to aquaculture development—and the major component of the Department of the Interior's research capability is the Stuttgart Fish Farming Experimental Station.

Mr. Chairman, it is both premature and illogical to transfer this facility from the Department of the Interior to the Department of Agriculture. Such a transfer prior to the completion of the aquaculture plan prejudges how the plan should be implemented. Further, such a transfer would seriously undermine the Department of the Interior's capability to continue this important research for all recreational and commercial fisheries species.

I recognize that the Stuttgart facility would continue to operate within the Department of Agriculture but I also know that their interest in aquaculture disease and nutritional research is substantially more limited than that carried out by the Department of the Interior. Further, the Stuttgart Experimental Station is only one component of the Department of the Interior's extensive fish research program, and its transfer would probably mean a lesser capability to continue in their overall fish research program.

In the absence of any hearings on this proposal, and in the absence of a completed aquaculture plan, and given the serious adverse impacts such a transfer could have on the success of the Interior Department's fish research program, I urge that this amendment be defeated.

Mr. BETHUNE. Well, that is good news to the gentleman in the well.

Mr. Chairman, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mrs. BOGGS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I represent a district that has only a small handful of farmers in it. However, as a representative of an urban area, I fully recognize the importance of agriculture to the economic and nutritional well-being of the consumers that reside in the city of New Orleans and suburban Jefferson Parish. We must have the bountiful harvests of our farmers in order to survive.

We in America are fortunate: Our farmers are the most productive in the history of the world. Not only do they provide sufficient food for our tables and fiber for our clothes, but they produce additional crops and foods so that we may export them and thus help develop a more positive balance in our international trades. We in New Orleans are especially aware of the commerce that the lively trading brings through our port facilities.

Because I represent a nonagricultural district, I frequently have to rely on people from around the State of Louisiana for advice in farm matters. One trusted adviser is Fred Huenefeld, a farmer and active citizen who lives near Monroe.

Recently, Mr. Huenefeld took the time to put his thoughts on paper so that I might better appreciate the plight of the American farmer. He makes the point that our "prosperity depends on farm income as farm income makes up one-seventh of the income of the Nation" and that "the income of the farm family is the key to our economic well-being."

Mr. Chairman, I think we all can agree with Mr. Huenefeld's reasoning. Our economy is heavily dependent on the strength of our agricultural sector and I would hope that this House will pass a farm bill that will strengthen our agricultural sector because it will, in the end, strengthen our national economy.

At this point, I would like to include in the RECORD the essay I received from Mr. Fred Huenefeld, Jr., of Monroe, La.:

High interest rates and low crop prices are squeezing the American farmer. They are caught in a worsening credit bind. Crop prices on a national average have dropped 40 percent to the American farmer in the past 6 months. It is projected by the USDA that on a 515 lb. yield, it cost 89.8 cents to raise a pound of cotton. Todays price of cotton is running around 62 cents to 65 cents depending on grade. USDA said cost of production per acre rose 20 percent for corn, 16 percent for wheat, and 14 percent for soybeans in 1980.

The raw materials grown or extracted each year from the soil represent what we call New Wealth. Keep this firmly in mind, New Wealth. New Wealth is the key to the working of our economy. The exchanges of money that make up the economy actually begin with the production of New Wealth.

In many ways, our economy is like a tree. The roots take the minerals and water from the soil and make a life giving sap that flows to all parts of the tree and supports it. The minerals and water are raw materials. The roots are the producers—the farmers, ranchers, miners, lumbermen, oilmen, and fishermen—who make them available to the tree, and who provide the economy with the lifeblood. No tree can live if it is separated from its roots. It withers and it dies. The same thing holds true with the economy. Cut off the root—the raw material producers—and the tree (the rest of the economy) dies. Unfortunately, we are at that threshold now in the United States. Most of all, we have lost sight of this basic fact of economy life. So have the policy makers, the people who are supposed to come up with solutions to our many economy problems. They ignore the importance of New Wealth and focus mistakenly on other areas. This is why their solutions do not work, none of their ideas really cut into the heart of the problem. They just keep missing the point. One man who did not miss the point was Carl Wilken, an economist and mathematician by profession who set about to discover the whys and wherefores of the Great Depression of 1930. In the course of his work, Wilken undercovered a relationship between New Wealth and the prosperity of the overall economy. Our sources of new wealth—farming, mining, timber and fishing—(farming being the biggest) provide about 70 percent of the New Wealth created in this nation. So, Wilken focused his study on the role of agriculture in the economy. Wilken discovered a simple and precise relationship between farm income and national income. Whenever farm income equals one-seventh of national income, times are good, and whenever farm income is below one-seventh, times are bad. Wilkens pointed out that the heartbeat of American economy is American agriculture. Prosperity depends on farm income as farm income makes up one-seventh of the income of the whole nation, the economy produces prosperity for all. The income of the family farm is the key to our economic well being. At first glance, this connection between farm income and national income may seem strange, but with a bit of thought it shows why it makes sense. The money our farmer was paid for his wheat does not remain in his pocket or checking account. Instead, he spends it giving his worker wages, paying off loans, buying new equipment, and sending his children to college and so forth. The income that goes to the farmer from the sale of New Wealth turns into income for the people of the other sectors of the economy. The same exchange of income flows from businesses that handle the agricultural products and people who receive the money from the farmer for goods and services. These people, too, pay workers, pay off loans, buy new equipment, etc. The people who receive the money again spend it. On and on, the process goes, with each dollar changing hands seven times. Thus, each dollar of income to the farmer becomes $7 to the income to others. There is no way to make too much of the importance of this relationship between the creation of New Wealth and the rest of us. Our income ultimately comes from their income, so the more or less the farmers earn, the more of less we earn. Suppose a farmer grows 1 million bushels of corn that sells for $1 per bushel. The income to the farmers from the corn is $1 million which they have spent and which eventually becomes $7 million to the national income. Now, suppose the price of corn drops to 50 cents per bushel. Farm-

ers get only $500,000 which becomes $3.5 million to the national income. Thus, the drop in the price of corn costs the whole economy $3.5 in lost income. This is the exact situation we are in today with a drop in the price of agricultural products. The entire economy of our nation is going to suffer if we do not stabilize and strengthen the price of American agricultural products. Monday's Wall Street Journal article by Chase Manhattan Bank economist predicted $100 billion deficit for 1981. Farmers cannot afford to sell their products at below the cost of production. Today, USDA figures estimate that it cost 89.8 cents to produce a pound of cotton with a 515 lb. average. Yet, cotton is selling below the cost of production today. The same is true with rice, sugar, and soybeans. It is time America woke up and helped solve this problem.

Our choice, while one is still available to us, is to restore parity to agriculture and thereby restore sanity to our dollar and solvency to our economy. Parity does not cost anything. It creates wealth from nature. When our largest industry (agriculture) makes a profit, the whole economy is underpinned. As fresh New Wealth is pumped into our anemic bloodstream, the dollar is stabilized, employment is supportive, interest rates are digestible, and the cancerous growth of debt is arrested.

Knowing that most of the nation's wealth poured through the farm gate, and knowing that as our biggest industries faired, so faired our nation, Wilkens projected the national income with 98 percent accuracy 6 months prior to his publication. He did this for fifteen consecutive years. Such cannot be guess work. He foretold what would happen and why. He also patiently explained why the soothsayings of political economists were a false economy. His observations were fortified by the teachings of such historians as Arnold Toynbee, Henri Piernne, and Will Durant, that nation after nation has fallen when it emptied its countryside and denied agriculture a rightful place in the scheme of things.

It is time for our policy makers to realize their responsibility in writing a 1981 Agriculture Act that will strengthen American agriculture and the economy of this nation. Today is not too late. Political problems are the preserves of the state. It is the job of the farmers to produce food which he has done superbly, work in his factory 24 hours a day, 7 days a week. It is the job of the government to see that our food producers are treated with parity and not discrimination. Government has ignored this responsibility.

Germany, France, Holland, Switzerland, and other European common market countries are now in better shape than we are, buying our gold and discounting our dollars. The common market pushes exports of steel, electronics, and food to the United States. We are reacting by protecting steel and electronics, but not food. Strange, isn't it, that we are enjoying the finest economy of any nation in history while simultaneously presiding over its liquidation. As Pogo says, "We have met the enemy, and they is us".

Agricultural leaders, farmers, bankers, businessmen and farm organizations and the general public need to shoulder the harness and face reality with the American agriculture.

FRED HUENEFELD, Jr.

The CHAIRMAN. The Clerk will designate title XV.

Title XV reads as follows:

TITLE XV—CREDIT, RURAL DEVELOPOMENT, AND FAMILY FARMS

FARMERS HOME ADMINISTRATION REAL ESTATE AND OPERATING LOANS TO COOPERATIVES

SEC. 1501. (a) The last sentence of section 302 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1922) is amended by striking out "cooperatives, corporations, and partnerships", and inserting in lieu thereof "corporations and partnerships", and by inserting immediately before the period at the end thereof the following: "in the case of cooperatives, corporations, and partnerships".

(b) The last sentence of section 311(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1941(a)) is amended by striking out "cooperatives, corporations and partnerships", and inserting in lieu thereof "corporations, and partnerships", and by inserting immediately before the period at the end thereof the following: "in the case of cooperatives, corporations, and partnerships".

INTEREST RATES ON FARMERS HOME ADMINISTRATION WATER AND WASTE DISPOSAL AND COMMUNITY FACILITY LOANS, LOANS TO LOW-INCOME LIMITED RESOURCE BORROWERS, AND LOANS FOR NONFARM FACILITIES ON PRIME FARMLANDS

SEC. 1502. (a) Section 307(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1927(a)) is amended by—

(1) in paragraph (2), striking out "and (5)" and inserting in lieu thereof "(5), and (6)";

(2) in paragraph (4), striking out "The" and inserting in lieu thereof "Except as otherwise provided in paragraph (6), the";

(3) amending paragraph (3) as follows:

"(3)(A) Except as provided in paragraph (6), the interest rates on loans (other than guaranteed loans), to public bodies or nonprofit associations (including Indian tribes on Federal and State reservations and other federally recognized Indian tribal groups) for water and waste disposal facilities and essential community facilities shall be set by the Secretary at rates not to exceed the current market yield for outstanding municipal obligations with remaining periods to maturity comparable to the average maturity for such loans, and adjusted to the nearest one-eight of 1 per centum; and not in excess of 5 per centum per annum for any such loans which are for the upgrading of existing facilities or construction of new facilities as required to meet applicable health or sanitary standards in areas where the median family income of the persons to be served by such facility is below the poverty line prescribed by the Office of Management and Budget as adjusted under section 625 of the Economic Opportunity Act of 1964 (42 U.S.C. 2971d) and in other areas as the Secretary may provide where a significant portion of the persons to be served by such facilities are of low income, as determined by the Secretary.

"(B) Except as provided in paragraph (6), the interest rates on loans (other than guaranteed loans) under section 310D of this title shall be as determined by the Secretary, but not in excess of one-half of the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturities of such loans, nor less than 5 per centum per annum."; and

(4) adding at the end thereof a new paragraph (6) as follows:

"(6)(A) Notwithstanding any other provision of this section, in the case of loans (other than guaranteed loans) made or insured under the authorities specified in subparagraph (B) for activities that involve the use of prime farmland as defined in subparagraph (C), the interest rates shall be the interest rates otherwise applicable under this section increased by 2 per centum per annum. Wherever practicable, construction by a State, municipality, or other political subdivision of local government that is supported by loans described in the preceding sentence shall be placed on land that is not prime farmland, in order to reserve the maximum practicable amount of those prime and unique lands for production of food and fiber. Where other options exist for the siting of such construction and where the governmental authority still desires to carry out such construction on prime farmland, the 2 per centum interest rate increase provided by this clause shall apply, but such increased interest rate shall not apply where such other options do not exist.

"(B) The authorities referred to in subparagraph (A) are—

"(i) clauses (2) and (3) of section 303(a),

"(ii) the provisions of section 304(a) relating to the financing of outdoor recreational enterprises or the conversion of farming or ranching operations to recreational uses,

"(iii) section 304(b),

"(iv) the provisions of section 306(a)(1) relating to loans for recreational developments and essential community facilities,

"(v) section 306(a)(15),

"(vi) clause (1) of section 310B(a),

"(vii) subsections (d) and (e) of section 310B, and

"(viii) section 310D(a) as it relates to the making or insuring of loans under clauses (2) and (3) of section 303(a).

"(C) For purposes of this paragraph the term 'prime farmland' means prime farmlands and unique farmland as those terms are defined in sections 657.5 (a) and (b) of title 7, Code of Federal Regulations (1980).".

(b) Section 316(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1946(a) is amended—

(1) inserting "(1)" after "(a)";

(2) inserting "and as provided in paragraphs (2) and (3)" after "except for guaranteed loans"; and

(3) adding at the end thereof new paragraphs (2) and (3) as follows:

"(2) The interest rate on any loan (other than a guaranteed loan) to a low-income, limited resource borrower under this subtitle shall be as determined by the Secretary, but not in excess of one-half of the current average market yield on outstanding marketable obligations of the United States with remaining periods to maturity comparable to the average maturities of such loans, nor less than 5 per centum per annum.

"(3) In the case of any loan, other than a guaranteed loan, made or insured under clause (5) of section 312(a) for activities that involve the use of prime farmland as defined in section 307(a)(6)(C), the interest rate shall be the interest rate otherwise applicable under this section increased by 2 per centum per annum.".

(c) The amendments made by this section shall apply to loans made after September 30, 1981.

EXTENSION OF THE EMERGENCY AGRICULTURAL CREDIT ADJUSTMENT ACT OF 1978

SEC. 1503. Section 211 of the Emergency Agricultural Credit Adjustment Act of 1978 is amended by striking out "September 30,

1981" and inserting in lieu thereof "September 30, 1982".

FARM STORAGE FACILITY LOAN PROGRAM

SEC. 1504. Section 4 (h) of the Commodity Credit Corporation Charter Act, as amended by section 151 of the Omnibus Budget Reconciliation Act of 1981, is amended by inserting after the word "growers" at the end of the fourth proviso of the second sentence the following: ", except that the Secretary shall make such loans in areas in which the Secretary determines that there is a deficiency of such storage".

EXTENSION OF FEDERAL CONTRIBUTIONS TO THE RURAL TELEPHONE BANK

SEC. 1505. The Rural Electrification Act of 1936 is amended as follows:

(a) the second sentence of section 406(a) is amended by inserting after "thereafter" the words "but not later than fiscal year 1991", and by striking out "$300,000,000" and inserting in lieu thereof "$600,000,000".

(b) The first sentence of section 406(c) is amended by striking out "September 30, 1985" and inserting in lieu thereof "September 30, 1995" and by striking out "and after the amount of class A and class B stock issued totals $400,000,000,".

RURAL ELECTRIFICATION ACT AMENDMENTS

SEC. 1506. The Rural Electrification Act of 1936 is amended as follows:

(a) Section 305(b) is amended as follows:

"(b) Insured loans made under this title shall bear interest at 5 per centum per annum: *Provided*, That the Administrator may make insured loans to an electric or telephone borrower at an interest rate of less than 5 per centum per annum but not less than 2 per centum per annum if, in the Administrator's sole discretion, the Administrator finds that the borrower:

"(1) has experienced extreme financial hardship, or

"(2) cannot in accordance with generally accepted management and accounting principles and without an excessive increase in the rates charged by such borrower to its consumers or subscribers provide service consistent with the objectives of the Act.".

(b) Section 306 is amended by inserting immediately after the second sentence the following: "Upon request by the borrower with respect to any guarantee issued by the Administrator under this section, the loan guaranteed thereby shall be made by the Federal Financing Bank at a rate of interest that is not more than the rate of interest applicable to other similar loans then being made or purchased by the Bank.".

(c) The fourth sentence of section 306, and section 307 are amended by striking out "a loan insured at the standard rate" and inserting in lieu thereof "an insured loan".

FAMILY FARMS

SEC. 1507. Section 102 of the Food and Agriculture Act of 1977 is amended as follows:

"SEC. 102. (a) Congress hereby specifically reaffirms the historical policy of the United States to foster and encourage the family farm system of agriculture in this country. Congress firmly believes that the maintenance of the family farm system of agriculture is essential to the social well-being of the Nation and the competitive production of adequate supplies of food and fiber. Congress further believes that any significant expansion of nonfamily owned large-scale corporate farming enterprises will be detrimental to the national welfare. It is neither the policy nor the intent of Congress that agricultural and agriculture-related programs be administered exclusively for family farm operations, but is is the policy and the express intent of Congress that no such program be administered in a manner that will place the family farm operation at an unfair economic disadvantage.

"(b) In order that Congress may be better informed regarding the status of the family farm system of agriculture in the United States, the Secretary of Agriculture shall submit to Congress, not later than July 1 of each year, a written report containing current information on trends in family farm operations and comprehensive national and State-by-State data on nonfamily farm operations in the United States. The Secretary shall also include in each such report (1) information on how existing agricultural and agriculture-related programs are being administered to enhance and strengthen the family farm system of agriculture in the United States, (2) an assessment of how tax, credit, and other Federal laws may encourage the growth of nonfamily farm operations and investment in agriculture by nonfamily farm interests, both foreign and domestic, and (3) such other information as the Secretary deems appropriate or determines would aid Congress in protecting, preserving, and strengthening the family farm system of agriculture in the United States.".

WAYS AND MEANS COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the Ways and Means Committee amendment.

The Clerk read as follows:

Amendment offered by the Committee on Ways and Means: Page 187, strike out lines 3 through 10 and insert the following:

(b) Section 306 is amended by inserting after the second sentence the following new sentence: "Upon request by the borrower with respect to any loan guaranteed (or to be guaranteed) under this section, the Administrator shall request the Federal Financing Bank to purchase such loan, and no officer or agency of the Federal Government shall place such loan in a position which, with respect to access to the Federal Financing Bank and terms and conditions for purchase by such Bank, is less advantageous than the position of other similar loans then being made or purchased by such Bank."

Mr. ROSTENKOWSKI. Mr. Chairman, on behalf of the Committee on Ways and Means, I ask unaimous consent to withdraw the technical amendment relating to the Federal financing bank listed on page 188.

I am informed that the changes included in the Budget Reconciliation Act make this technical amendment moot and that it should be withdrawn.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. JONES of Tennessee. Mr. Chairman, I want to point out to my colleagues that major portions of title 15 were inserted into the Budget Reconciliation Act earlier this year.

However, a few of the provisions remain in H.R. 3603 and I will finally explain those items.

First, it would facilitate making FmHA operating and ownership loans to small farm production cooperatives by removing the family farm size limitations for the cooperative entity but not for the individual members.

Under the interpretation used by USDA of the current law, small cooperatives have been having difficulty obtaining loans because while each member of the cooperative meets the family farm size requirement, the cooperative entity itself exceeds the family farm size limitation.

This bill removes the family farm limitation with regard to the cooperative entity, but not with regard to individual members of the cooperative. The loan size limitations which apply to individual farmer loans would apply as well to cooperatives.

Second, this title would extend the authority to make economic emergency loans through September 30, 1982. This program was established in 1978 to assist farmers who are unable to obtain sufficient credit from normal credit sources. This bill does not provide additional funding but simply extends for 1 year the authority for the Farmers Home Administration to make economic emergency loans. I have been informed that about $500 million remains unused in the fund. This amount plus incoming repayments would be available for loans in the next year.

Third, the farm storage facility loan program would be amended to require loans in storage-deficit States only. This program was made discretionary in the Budget Reconciliation Act thereby saving over $230 million in fiscal year 1982. This farm bill amendment will simply require a program in storage-deficit States which the administration plans to do anyway.

Fourth, this bill extends for 10 years the annual appropriation authority of $30 million for purchase by the United States of capital stock of the Rural Telephone Bank.

The Rural Telephone Bank was established in 1971 to provide a source of financing to supplement the REA loan program. The Bank charges a single interest rate to all borrowers based on the average cost of money to the Bank. The current rate of interest charged is 11¼ percent.

This infusion of capital will permit the Bank to net its interest rate, which is based on the cost of money, at a level which will enable a larger number of borrowers to meet the Banks' lending criteria. Borrowers which cannot meet these criteria are eligible to obtain loans from REA's revolving fund at a lower interest rate involving greater cost to the Government.

Mr. Chairman, these credit provisions are minor elements in this farm bill but are important in their own way. I hope my colleagues will support these provisions.

AMENDMENT OFFERED BY MR. DE LA GARZA

Mr. DE LA GARZA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DE LA GARZA: Page 187, strike out lines 10 through 12.

Page 188, strike out lines 3 through 10.

Mr. DE LA GARZA. Mr. Chairman, this amendment is to comply with the amendment just withdrawn by the gentleman from Illinois, so that we have in the bill completely taken out any reference to what is already in the reconciliation bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. DE LA GARZA).

The amendment was agreed to.

Mr. ROBERTS of South Dakota. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I have the great opportunity of serving on the Agriculture Committee under the able and dedicated leadership of Chairman DE LA GARZA, and before I continue, I would like to thank him for his efforts on behalf of agriculture.

In all the debate we have had on this farm bill, the most telling comment that I have heard is one made by our distinguished ranking minority member, the gentleman from Virginia.

Mr. WAMPLER has said several times during this debate that when agriculture is healthy, the Nation is healthy, and nothing could be more apparent or true.

As a member of the committee, as a former Secretary of Agriculture in my own State of South Dakota, and as a farmer and rancher myself, I would like to share my deep concerns and fears for the future of what I believe is the greatest industry in this Nation—agriculture.

Agriculture is the single industry that holds the well-being of this Nation and the world in its hands every minute of the day.

Agriculture also happens to be the largest single consumer in this Nation with purchases of goods and services of nearly $100 billion annually.

It is agriculture's productivity which has singlehandedly rescued the Nation this past decade from terrible imbalances in our world trade.

Mr. Chairman, although I suspect I would have some difficulty convincing my more urban colleagues of this fact, it is indeed true that the American consumer enjoys one of the lowest food bills in the world, and no other nation enjoys better quality food than we do here in America.

But how have we thanked this vital industry for all it contributes to our Nation? I can tell you, as a farmer, that we have thanked agriculture by pushing our farmers ever closer to bankruptcy.

Those of you who represent rural districts, and those of you who have traveled recently through America's breadbasket, know that America's Main Streets seem to be getting shorter and shorter.

Why? It is no mystery. America's Main Streets are disappearing because there are fewer and fewer people with even fewer dollars to spend in their counties and towns.

The reason we are in this situation in rural America is that American agriculture has been providing its products for too long at below what it costs to produce them.

But that is in the past. You have heard the facts and figures on the current plight of the American farmer many times during this debate. Let us turn to the future, and the next few months and years for rural America.

Mr. Chairman, if we maintain the current cheap food policy, I can guarantee you, as a farmer, that we will see the destruction of the family farm. We are not subsidizing agriculture in this farm bill. It is the farmers who subsidize us—by providing their farm products at less than the cost of production.

If we destroy the family farm, the abundance of reasonably priced food products that consumers now enjoy will soon go the way of abundant, reasonably priced energy.

Let me say to my urban colleagues that, although they may not realize it, the best friend they have is the family farmer; the mother and father and their children who tend the land because they love it.

The only request of these family farmers is a fair return. When that fair return is gone, as it very nearly is, then those family farmers—my neighbors, and yours—will lose the incentive and opportunity to produce.

There has been a great deal of talk on this floor about special interests. I just want to say that I have a special interest, and it is the family farmer. It is my son and my neighbors, and all the family farmers in this country. They want to provide a land of plenty, for the rest of the Nation to enjoy, and they want to deliver a degree of productivity that can feed much of the rest of the world.

□ 1415

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. WAMPLER and by unanimous consent, Mr. ROBERTS of South Dakota was allowed to proceed for 2 additional minutes.)

Mr. ROBERTS of South Dakota. Mr. Chairman, the family farmer, cannot do it if he has to go on borrowing up to his eyebrows on his land just to stay solvent.

He cannot continue to work for far less than the minimum wage just because of the pleasure he gets from watching the fruits of his labor germinate and grow.

Mr. Chairman, I am terribly concerned about this bill and the attacks that have been made on it. I am even more concerned that when we are all said and done here, we may not have a bill at all. In that case, of course, agriculture would once again be asked to bear the burden.

I would respectfully ask my colleagues to consider that if we continue to slice up this bill and then move to recommit it to the committee, we could well have no bill at all.

If we have no bill at all, farmers will once again be asked to exist on less, and it will be even less than they are existing on now.

As a farmer, Mr. Chairman, I can tell you that my neighbors and my family and I can go pretty far—but we just cannot go below zero.

I urge my colleagues when considering this bill to remember who America's best friend is—the family farmer. Thank you.

Mr. WAMPLER. Mr. Chairman, will the gentleman from South Dakota yield to me?

Mr. ROBERTS of South Dakota. I yield to the gentleman from Virginia.

Mr. WAMPLER. I appreciate the gentleman yielding.

Mr. Chairman, I want to commend the gentleman on his fine statement. I also want to commend him on his very valuable service as a new member of the House Committee on Agriculture. The gentleman possesses a wide personal experience in agriculture, not only as a rancher and a farmer, but as a former Secretary of Agriculture in his great State of South Dakota.

Mr. Chairman, I personally want to thank the gentleman for his commitment to the activities of the committee, his diligent attendance at the sessions of the committee, the markup sessions, his cooperation in trying to fashion a bill which would help rural America and those who produce the food and fiber of this country. I want to say to the gentleman how much I personally appreciate him, and I know I speak on behalf of the entire membership of the Committee on Agriculture. I especially wanted the good people in his district of South Dakota to know the commitment he has to agriculture and how he has manifested it in such an effective way here in the Congress. We are grateful for that service.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS of South Dakota. I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, I would like to thank the gentleman for his kind and gracious words. I sympathize and agree with what the gentleman has expressed concerning agriculture and American family farms.

I very much appreciate the gentleman's valuable contribution to our committee and the work that he does

in trying to help the family farms and agriculture within our committee.

Mr. ROBERTS of South Dakota. I thank the gentleman.

Mr. ROBERTS of Kansas. Mr. Chairman, will the gentleman yield?

Mr. ROBERTS of South Dakota. I yield to the gentleman from Kansas.

Mr. ROBERTS of Kansas. Mr. Chairman, I would like to echo the sentiments of my colleagues and thank my "cousin" one of the Roberts boys in this body. We worked together on the wheat section of the bill, and I thank him for his contributions.

Mr. Chairman, I represent the district that grows more wheat than any State, and this year it seems as if South Dakota edged us out because of a freeze. But doubtlessly we both will compete for that record down in the future.

The CHAIRMAN. The time of the gentleman has again expired.

(On request of Mr. ROBERTS of Kansas and by unanimous consent, Mr. ROBERTS of South Dakota was allowed to proceed for 1 additional minute.)

Mr. ROBERTS of Kansas. Mr. Chairman, the gentleman mentioned the most important thing in this entire debate—the future of agriculture. The fact is that the most important policy question we will consider in this body with this farm bill is not so much the loan rate, the target price, or a set-aside, but where will the next generation of farmers come from?

The gentleman from South Dakota is committed to that goal. I enjoy very much working with him and I commend him for his work.

Mr. ROBERTS of South Dakota. I thank the gentleman.

Mr. Chairman, I yield back the balance of my time.

AMENDMENT OFFERED BY MR. PANETTA

Mr. PANETTA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PANETTA: On page 190, after line 14, insert the following:

ADMINISTRATIVE PROVISION

SEC. 1508. Section 331 (i) of the Consolidated Farm and Rural Development Act is amended by inserting after "(i)" the following sentence: "consent to long term leases of facilities financed under this title notwithstanding the failure of lessee to meet any of the requirements of this title, provided that such long term leases are necessary to insure the continuation of services for which financing was extended to the lessor;".

Mr. PANETTA (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. PANETTA. Mr. Chairman, I rise to offer an amendment with the support of my colleague, Mr. DE LA GARZA, chairman of the committee. It will correct a shortcoming in the Secretary's authority pertaining to long-term leases of community facilities financed under the loan programs of the Farmers Home Administration. No express authority exists in present law to allow the Secretary to approve long-term lease agreements between recipients of Farmers Home Administration loans and third parties.

My amendment simply extends this authority to the Secretary with the restriction that it can only be exercised when necessary to assure the continuation of services for which the financing was originally extended to the qualifying lessor. To illustrate the anomaly that results from the lack of this authority, I bring to the attention of my colleagues a situation that has arisen in my district.

The Boronda Water District is the recipient of a Farmers Home Administration loan which was made for the purpose of digging wells and constructing facilities to extend potable water services to some 260 accounts in the rural Boronda area located near the incorporated town of Salinas, Calif. Since the completion of this project, a combination of factors including seepage, inadequate construction, and inexperienced management, have led to well water contamination periodically necessitating reductions and temporary termination of water services.

The Boronda Water District, recognizing its inability to carry out its maintenance and management duties and unable to generate additional funds necessary for capital improvements, negotiated a long-term lease agreement with the California Water Co., a privately owned utility which services the neighboring city of Salinas and is regulated by the California State Public Utilities Commission. The lease agreement would extend over the lifetime of the Farmers Home Administration loan and provides that lessee water company will make periodic payments sufficient to meet the lessor Boronda Water District's loan repayment schedule. In addition, the lessee water company in a public minded gesture has offered to perform the necessary capital construction to repair existing wells and facilities to dig a new well to insure a reliable supply of potable water to the residents of the Boronda area.

Under present law, however, the Farmers Home Administration does not have the authority to approve such a long-term lease agreement. The Farmers Home Administration has indicated that the law does permit it to approve a short-term lease agreement and to consider periodic renewal of such a lease. It has also indicated that it would consider such an arrangement in this particular situation.

The catch 22, however, arises from the fact that the California Water Co., is a private utility regulated by the California State Public Utilities Commission. The commission's rules provide that no utility can impose an unfair burden upon one segment of its customers. The capital construction costs arising from the necessary repairs to the Boronda system must be born by all the users of the system over the useful life of the facility. A short-term lease subject to termination by the Federal Farmers Home Administration would place the California Water Co. in violation of the State public utilities laws in that if termination of the lease were to occur, the rest of California Water Co.'s customers would unfairly shoulder the burden of paying for the cost of the repair of Boronda's facilities.

The solution to this terrible dilemma is the adoption of my amendment. It would permit the Secretary to approve such long-term lease agreements despite other restrictions on the program, provided that such an agreement is necessary to insure the continuation of the services for which the loan was extended.

My staff has discussed this matter extensively with committee counsel and the Department. I am assured that adoption of this measure will remove the legal obstacle to the Secretary's approval of the long-term lease agreement between Boronda Water District and the California Water Co.

I would like to submit for the RECORD copies of correspondence from the Monterey County Department of Health Services certifying the contamination of Boronda's present water supply as well as my correspondence with the Farmers Home Administration regarding this matter.

In conclusion, I would point out that I have discussed this matter with my colleague Mr. ED JONES, chairman of the Conservation and Credit Subcommittee with jurisdiction over the programs of the Farmers Home Administration. He has indicated to me his support for this measure. I would have offered this amendment during committee consideration of the farm bill had it been clear at that time that the problem could not be solved administratively. It is now apparent that this amendment is necessasry to correct this situation and similar situations that may arise in the future.

MONTEREY COUNTY,
September 12, 1980.

Attn: Mr. Jim Hatter, Chief of Community Programs.

FARMERS HOME ADMINISTRATION,
Woodland, Calif.

DEAR MR. HATTER: We were pleased to learn of your approval for the Boronda County Water District to lease their water system to California Water Service of Salinas. However, we understand that prior to Cal-Water connecting to the system approv-

al must be obtained from your Washington Office and may result in a substantial delay.

As you may know, the Boronda County Water District has a severe problem with nitrate contamination in its main well. It is only serviced by an auxiliary well at this time. The district experiences numerous water outages ranging to 12 hours in length. These outages are becoming increasingly frequent and during the last episode the contaminated well was placed in service resulting in the residents of Boronda being exposed to contaminated water for a period exceeding 12 hours.

Needless to say, we are most anxious to have these occurrences end. We believe that there must be some way of expediting the lengthy approval process so that the residents of Boroanda are supplied with wholesome water without delay.

Very truly yours,
Walter Wong, M.P.H., R.S.,
Director of Environmental Health.

DEPARTMENT OF HEALTH SERVICES,
Berkeley, Calif., September 11, 1980.

MR. RAMIRO CORTEZ,
President, Board of Directors, Boronda County Water District, Salinas, Calif.

DEAR MR. CORTEZ: Records available at this office show your system failed to meet the bacteriological regulations for domestic water during the month of August, 1980. Specifically, Section 64423 (a) (1) and (c) of the California Administrative Code which states:

64423. Maximum contaminant levels—multiple tube technique. (a) When 10 ml portions are examined, coliform bacteria shall not be present in any of the following: (1) More than 10 percent of the portions of the samples collected in any month.

(b) Calculation of the percentage of positive portions and percentage of positive samples from water systems that have less than 601 service connections shall be based upon sampling during the last three-month period. The Department may base compliance upon sampling during a one-month period.

Therefore, in accordance with Section 4028 of the Health and Safety Code and Section 64463 of the California Domestic Water Quality and Monitoring Regulations you are required to notify your water consumers as follows:

1. Each water consumer is to be notified by letter (wording must be approved by this Department). The notice must be sent as soon as possible, in both Spanish and English, no later than September 30, 1980.

2. The notification letter is to be published in three consecutive issues in a newspaper or newspapers of general circulation in the area served by your system. The notice shall be completed within fourteen (14) days after receipt of this letter.

(3) Furnish a copy of the notification letter to the local radio and television stations covering the area served by your system within seven (7) days after receipt of this letter.

4. Send us a copy of the notification letter and newspaper clipping of the published notice.

For your assistance we are enclosing a copy of a draft letter which you may use as a guide for consumer notification.

Please let us know if you have any questions regarding these notification procedures.

Sincerely,
W. B. SCHREEDER,
District Engineer, Monterey District, Sanitary Engineering Section.

BORONDA COUNTY WATER DISTRICT,
Salinas, Calif.

DEAR CUSTOMER: The drinking water monitoring program operated by the Boronda County Water District's water system during August did not meet the drinking water standards as specified in Section 64423 of the California Domestic Water Quality and Monitoring Regulations.

The bacteriological quality of domestic water is routinely determined by testing for coliform bacteria. Coliform organisms are indicators of potential contamination and may originate from human, animal or soil sources. If the coliform standards are met, the water served can be considered as being bacteriologically safe. If the standards are not met, drinking the water may not necessarily result in illness but that possibility exists. At times, a positive coliform bacteria test may result from situations which are not a hazard to health. However, the findings of coliform bacteria cannot be ignored and each water utility must take appropriate follow-up action. If routine testing for coliform bacteria is not performed, drinking water standards are not being met.

The Findings to Date Indicate That No Special Precautions are Necessary On Your Part.

This notification of the public is being done in compliance with the California Domestic Water Quality and Monitoring Regulations as a means of keeping the public informed.

Consumers wishing more information should contact the Boronda County Water District at (408) 758-0565.

RAMIRO CORTEZ,
President.

CONGRESS OF THE UNITED STATES,
WASHINGTON, D.C.,
April 2, 1981.

MR. DWIGHT CALHOUN,
Acting Administrator, Farmers Home Administration, USDA, Washington, D.C.

DEAR MR. CALHOUN: This is to followup on conversations Mr. Kim Bowersox of my staff has had with Mrs. Louis G. Bennett regarding the critical problem of the Boronda County Water District. I urge you to give your prompt attention to resolving this matter.

As you know, the Boronda District, near Salinas, California, provides service to some 260 metered accounts. One of the District's two wells has been shut down by order of health authorities, and the second well, now the only source of supply, shows fecal contamination and must be carefully monitored and chlorinated. Also, during power outages Boronda residents are entirely without water service, or water for fire protection, as no back-up facilities are available. The California Water Service Company which is regulated by the California Public Utilities Commission, has agreed to take over the management of Boronda facilities on a lease basis and to perform the necessary capital improvements to insure the residents of that area of a safe and reliable supply of water.

As a public utility corporation, California Water Company cannot agree to any terms that might place a burden on other customers as could result if it were to make a substantial investment in order to serve the Boronda area, and then for some unforeseen reason, find that a year lease could not be renewed. Consequently, the Boronda Water District and California Water Company have negotiated a 27 year lease agreement. Boronda's existing water facilities were constructed with a loan from the Farmers Home Administration. The unpaid balance on that loan is now approximately $200,000.

At the request of the Board of Boronda Water District, California Water Company has agreed to operate and maintain the Boronda system until Boronda's loan from the Farmers Home Administration is repaid. At that time all rights to the water system would be surrendered to California Water Service Company. Annual rental payments by California Water to Boronda of $7,556.00 will insure that the Farmers Home Administration loan is repaid in full over the lifetime of the lease agreement. This lease agreement cannot be implemented without approval from the national office of the Farmers Home Administration.

The situation in the Boronda has reached a critical stage. The fact is that the Boronda County Water District has attempted to address the many problems with its water system including lack of proper management. The poor economic position of the District has restricted satisfactory long-range solutions to these problems. It is apparent that the problems affecting the Boronda County Water will not change and that approval of the long-term lease agreement with California Water is the only alternative to insuring that the people of the Boronda area receive a safe and reliable supply of water.

I urge your immediate attention to this matter. Mr. Bennet has indicated to my staff that the Office of the General Counsel is presently reviewing the matter to determine whether approval of the long-term lease can be given in keeping with the legal requirements of the program. As far as Congressional intent is concerned, as a member of the House Agriculture Committee with jurisdiction over rural development programs of the Department of Agriculture, it is my intent that the Farmers Home Administration water loan program work to meet the water supply needs of rural communities. At present, the people of the Boronda area are in jeopardy of losing all such services.

Thank you in advance for your immediate attention to this matter. My staff shall remain in contact with your offices until this matter is resolved.

Sincerely,
LEON E. PANETTA,
Member of Congress.

FARMERS HOME ADMINISTRATION,
WASHINGTON, D.C.,
May 4, 1981.

HON. LEON E. PANETTA,
House of Representatives, Washington, D.C.

DEAR CONGRESSMAN PANETTA: This is in response to your letter concerning Boronda Water District leasing its facilities to California Water Company for 27 years.

The authorizing legislation does not specifically address leasing, or the terms of any such leasing of security property. However, legislation authorizes the making or insuring of loans to associations, including corporations not operated for profit, public and quasi-public bodies. Legislation further re-

quires the applicant to certify in writing that it is unable to obtain sufficient credit elsewhere to finance the actual needs at reasonable rates and terms. Also, it requires an agreement by the borrower that if at any time it shall appear the borrower may be able to obtain a loan from a private source at reasonable rates and terms for loans of similar purposes and periods of time, the borrower will, upon request, apply for and accept such loan in sufficient amount to repay the FmHA loan.

It is necessary that representatives of Boronda Water District, to which FmHA funds have been provided, retain management and operational control of the facility. Also, they must use all available resources including facility income in an effort to gain a financial position that would enable the district to refinance its FmHA indebtness. Leasing of the facility as proposed, would only allow the District to obtain sufficient income to meet their annual installment to FmHA and would allow all other income from the facility to go to the lessee. Such an arrangement would be in conflict with the intent and refinancing requirement of enabling legislation. Also, it is not the intent of enabling legislation for funds to be made available to or benefits be derived by other than eligible applicants.

In certain cases, as a means of servicing to protect the interest of the Government, FmHA regulations provide that facilities may be leased for a one year period not to exceed two consecutive years without authorization from the National Office. If such authorization is granted by the National Office, it would not exceed a one year period. It is emphasized that the leasing of a facility is for servicing action and is not intended to be a part of the normal program for providing needed water and sewer facilities to rural communities.

Because of the above reasons, Boronda Water District should be encouraged to sell, transfer, or otherwise convey the security to another entity if it is unable to continue to operate the system. If, however, the District can remain active, maintain control of facility management and it is determined that it would be beneficial to the District and is concurred in by FmHA, the district may consider entering into a management agreement whereby a third party would operate and maintain the system.

Sincerely,

KENNETH E. LATCHOLIA,
Deputy Administrator,
Rural Development.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I would be pleased to yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, we have examined the gentleman's amendment and know that he makes a valued contribution to the extension of the Consolidated Farm and Rural Development Act, and we have no objection to the amendment on this side.

Mr. PANETTA. I thank the gentleman.

Mr. WAMPLER. Mr. Chairman, will the gentleman yield?

Mr. PANETTA. I yield to the gentleman from Virginia.

Mr. WAMPLER. I thank the gentleman for yielding.

Mr. Chairman, we have examined the gentleman's amendment. As usual, it makes a great deal of sense. We are happy to accept it.

Mr. PANETTA. I thank the gentleman.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. PANETTA).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. GUNDERSON

Mr. GUNDERSON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GUNDERSON: Page 190, line 11, after the comma insert the following new subsection (and redesignate succeeding subsections accordingly):

(3) an assessment of how reductions in commodity price support programs have affected family farmers and the family farm structure,

Mr. GUNDERSON. Mr. Chairman, section 1507 of H.R. 3603 is one of the most worthwhile sections of the farm bill in that it mandates the Secretary of Agriculture to submit an annual report to the House Agriculture Committee, the Agriculture Committee in the other body, and the Congress on the status of the American family farm system and trends in family farm operations.

The amendment that I am now offering would simply have the Secretary include in that annual report an assessment of how reductions in commodity price support programs have affected family farmers and the family farm structure.

The language of the amendment may be very simple; however, it accomplishes a very important result.

An unfortunate phenomenon of the consideration of the 1981 farm bill is the fact that many decisions are being made on the basis of budget policy rather than on the basis of sound farm policy. This is particularly true of decisions this body has recently made on most of the commodity programs.

These decisions cannot help but have an impact on the family farm structure—the backbone of the American agricultural economy as we know it.

As my colleagues know, I represent the largest dairy district in the United States. The House has taken action on three different occasions this year that have led to unprecedented reductions in the dairy price support program that may, in fact, lead to the bankruptcy or retirement of thousands of dairy farmers in Wisconsin.

I have mentioned these statistics on the floor several times in the past 2 weeks; however, they bear repeating at this point. In March the Congress eliminated the April 1981 adjustment in dairy price supports. That saved $190 million in outlays.

The level of support was decreased by the Congress in July from 80 percent of parity to 75 percent of parity. That saved $381 million in outlays.

The Bedell amendment that the House adopted 2 weeks ago maintains the current support price of $13.10 per hundredweight for 3.67 milk during fiscal year 1982. That is estimated to save $301 million in outlays. And finally, the bill, itself, eliminates the April 1982 adjustment in price supports. That is estimated to save $100 million.

Mr. Chairman, that is a total of $972 million that has been cut from the dairy program since the beginning of this year—48 percent of the entire dairy price support program.

In effect, these cuts will mean that the American dairy farmer will receive the same price for his product in the upcoming marketing year that he received last year. This is particularly devastating in light of the fact the costs of production for the average Wisconsin farm in 1980 were 28 percent higher than in 1979.

Mr. Chairman, in the past 20 years farms in the United States have declined by a third—from 3.7 million in 1961 to 2.4 million today. Now some economists are predicting that we will lose another third in the next 20 years. I fear that the reductions that this Congress seems intent on making in the various commodity price support programs will only speed the extinction of the family farm as we now know it.

That is why it is absolutely imperative that the Congress know the exact outcome of their present actions so that they have historical guidance for future decisions involving commodity price support programs and the family farm. Before this body considers similar drastic overreactions in the future, they should seriously consider the effect of reductions in the commodity price support programs on family farmers and the family farm structure.

My amendment would have the USDA provide this information to the Congress on an annual basis. I urge my colleagues to support the amendment.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. GUNDERSON. I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, is it my understanding that the gentleman just adds another item to the report already required of the Secretary?

Mr. GUNDERSON. That is exactly correct. What we are asking for is simply that the Secretary also tell us what the effect of the reductions in certain price support commodity programs is on the family farm structure. As you know, we are putting together a farm bill under budget duress. We are doing it for budget policy.

Mr. DE LA GARZA. Mr. Chairman, we would have no objection to the amendment on this side.

Mr. GUNDERSON. I appreciate the comment of the distinguished chairman.

Mr. WAMPLER. Mr. Chairman, will the gentleman yield?

Mr. GUNDERSON. I yield to the distinguished ranking member of the committee, the gentleman from Virginia.

Mr. WAMPLER. We are willing to accept the gentleman's amendment.

Mr. GUNDERSON. I appreciate the gentleman's comment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Wisconsin (Mr. GUNDERSON).

The amendment was agreed to.

Mrs. SMITH of Nebraska. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like the privilege of engaging the distinguished chairman of the committee and the distinguished ranking minority member in a colloquy.

Mr. Chairman, it has come to my attention that new FmHA rules regarding the emergency disaster loan program have unfairly affected certain counties in Nebraska and Kansas.

We experienced a damaging freeze in May of this year substantially and adversely affecting many of our wheat farmers.

According to final rules published in the Federal Register on May 26, 1981, procedures for counties to be eligible for disaster loan assistance have been changed, leaving some farmers without any assistance.

New rules state that counties in which 25 or fewer farmers have individual losses of 30 percent or more can be eligible for emergency loans by the authorization of State ASCS directors. These rules also state that counties in which 25 or more farmers have experienced 30 percent losses must be designated disaster counties by the Secretary of Agriculture if the Secretary determines that the natural disaster has substantially and adversely affected farmers.

A problem emerges in counties with more than 25 farmers with 30 percent individual losses that do not constitute 30 percent of the aggregate county production. In other words, a county with 40 farmers who have production losses of 30 percent each but whose combined losses do not equal 30 percent of the county's production is not provided for under new rules and is left to the Secretary's interpretation of "substantially and adversely affected."

I had originally intended to offer an amendment correcting this unfair and inequitable situation. After conferring with the distinguished chairman and ranking minority member of the subcommittee I have decided not to offer this amendment. With the committee's assistance I hope that we will make it clear to the Secretary that these counties who fall through the cracks will not be unfairly treated and that farmers who experience 30-percent losses should be eligible for disaster loans and that the Secretary shall treat these producers in the same manner regardless of whether he designates the county as a disaster area or the State director does.

Mr. JONES of Tennessee. Mr. Chairman, will the gentlewoman from Nebraska yield?

Mrs. SMITH of Nebraska. I am honored to yield to the gentleman from Tennessee.

Mr. JONES of Tennessee. Mr. Chairman, I am very glad, indeed, to reply to the gentlewoman from Nebraska, VIRGINIA SMITH, because I realize the problem that she has in Nebraska. I can assure the gentlewoman that she will have the full cooperation of this subcommittee, and I am sure of the full committee. I do understand very much the serious problem that the gentlewoman is faced with there.

Mr. JEFFORDS. Mr. Chairman, will the gentlewoman yield?

Mrs. SMITH of Nebraska. I am honored to yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Chairman, after such an eloquent and compassionate plea, how could I refuse? I certainly want to assure the gentlewoman that I also understand the problems created by these regulations in Nebraska and will do everything I possibly can to assist the gentlewoman in her pursuit of fairness toward her farmers.

Mrs. SMITH of Nebraska. I thank the gentleman.

Mr. ROBERTS of Kansas. Mr. Chairman, will the gentlewoman yield?

Mrs. SMITH of Nebraska. I yield to my good friend, the gentleman from Kansas.

Mr. ROBERTS of Kansas. Once again the gentlewoman has been a leader in focusing upon a real problem that involves all of us in the High Plains wheat country. I do not care what kind of a farm program you have, if it is not really administered fairly by the USDA, you really do not have a good farm program.

In May we had a freeze in the High Plains. We lost a third of our crop in my district. Twenty-seven counties were granted assistance. Twenty-eight counties were not granted assistance, and we just learned this as of October 6. It has been a piecemeal approach. It has not been timely. And our producers have not been well served by the USDA.

We have a situation where some producers in one county who have suffered a total loss have no assistance. Other producers in other counties have a partial loss and yet they have assistance. And one neighbor right across the county line from another does not understand it. I do not understand it.

I am pleased to announce to the gentlewoman that my colleagues in the other body and I have sent a letter to Secretary Block urging a review of this program policy, some changes in this program. We are very consistent in terms of your goals.

Again, I congratulate my friend and colleague, the gentlewoman from Nebraska, for her efforts in this regard.

Mrs. SMITH of Nebraska. I thank the gentleman.

Mr. Chairman, I yield back the balance of my time.

Mr. VOLKMER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, today we hopefully complete consideration of House Resolution 3603, the Food and Agriculture Act of 1981. It is my intention, of course, to support this legislation, although I have some serious doubts about certain provisions of it.

Mr. Chairman, I think it is important to remember that agriculture is the economic backbone of this Nation. Washington and Jefferson were farmers and held a great deal of respect for the land. In fact, when the colonies first united, well over 90 percent of the population were farmers. Today, due to modernization and technical advancement, the percentage of our population living and working on the farm has fallen to less than 4 percent, but they remain a very important part of our economy. Each farmer produces enough food to feed 55 other people. Beyond feeding our own people, American agriculture provides food and fiber for a large part of the rest of the world. The domestic agriculture economy generated over $200 billion in products, with enough surplus to export more than $40 billion throughout the world, a significant asset in our balance of trade.

Now, Mr. Chairman, let us consider some of the changes that have occurred in agriculture over the last 10 years. The American farmer has to contend with energy costs which have risen 250 percent since 1970, land prices which have tripled in my State, equipment prices have risen 230 percent, and production costs that have risen 200 percent in a decade. Is it any wonder that farm income has remained unchanged, while farm debt has tripled in the same period.

Mr. Chairman, our American farmers are in serious trouble. Not only do farmers face the rising costs but because of their unique business, farmers are dependent on readily available credit at reasonable interest rates in order to effectively operate their farms. High interest rates have forced thousands of young people to leave the farm and seek employment in the

city. Farm bankruptcies have increased dramatically in the last few years and the trend will continue unless interest rates are brought down. Not only is the economic climate forcing foreclosures, it is severely limiting anyone from expanding or improving their farm operation. And perhaps the most serious effect of the interest rates is that no young person can begin farming with any hope of making a reasonable profit. This is a very serious problem since the average age of farm owners is moving over 50 years old. If young people cannot move onto the farm, who will supply our food in the next decade? We can no longer ignore these problems and must do something to relieve this terrible burden from the shoulders of our farmers. We must do something to insure the continuation of this great American tradition.

Mr. Chairman, I contend that the first action to take to help our farmers is to balance the Federal budget. I think that more than any other sector of our society, the farm community understands the importance and the need for a balanced budget. Farmers are more than willing to accept their share of the budget cuts, and in fact, have already done so. But we must not be overzealous in our efforts and destroy the most productive sector of our economy. Every dollar of farm income, generates seven additional dollars throughout the economic cycle. I find it very strange that the price the farmer receives for the wheat in a loaf of bread is less than the cost of the wrapper around the bread and that the cost of the packaging for breakfast cereal far exceeds the price the farmer receives for the grain in the box. The farmer price for grain has increased over the last 10 years, from a seasonal average for wheat of $1.35 in 1970 to about $3.85 last year and corn rose from $1.33 to about $2.52. But we must remember that the farmer faced much greater increases in transportation, processing, and harvesting costs to get his grain to market. In the same period of time transportation costs have more than tripled, and production costs have skyrocketed to where a farmer pays $50 to $60 to plant an acre of land as opposed to $15 10 years ago. We must remember that many of these expenses must be paid by the farmer through borrowed money.

Mr. Chairman, I realize most Members of this body represent a consumer constituency and often charge that increased farm prices will cost too much. I want to remind everyone here that the American public remains the best fed, at the lowest cost of any people in the world. The annual per capita consumption of meat, fish, and poultry in this country is in excess of 200 pounds. No country in the world approaches that level. Let us also consider that the disposable income spent on food by Americans has declined from 20 percent in 1960 to about 15 percent in 1980. As a comparison, the French and British spent 20 percent on food, the Soviets, 34 percent, and in China, 60 percent of their disposable income is needed to buy food. These figures show just how efficient and productive the American farmer really is.

We have all heard the complaints about the consumer price index doubling for food in the last 10 years. But remember, much of this increase can be attributed to inflation, and increased costs for manufacturing, wholesaling, and marketing of the food. We still produce the cheapest food in the world. In fact, because of our ability to produce staggering quantities of wheat and grain, we export huge amounts of our grain. It is interesting to note that we now produce more rice for Japan in this country than is produced in Japan. Few countries can match our yield per acre in any crop. Through research and development of hybrid seeds, disease resistant crops, and strong conservation practices, our farmers have more than tripled yields over the last 20 years.

Mr. Chairman, we all realize that some reductions in program cost have been achieved in this legislation. We can ill afford to lose even one more farmer because of misguided economics. Those of us who represent farm districts understand the long, hard hours, 12 to 14 hours a day, 7 days a week, 365 days a year, that our farmers devote to their business. I hope we give these loyal dedicated citizens their just reward for their labor.

CHANGES IN CROP YIELD PER ACRE FROM 1970 TO 1979

	1970	1979	Percent increase
Wheat	33.4	36.9	9
Corn	72.4	109.4	20
Milo	50.4	62.9	11
Peanuts	2,030	2,611	12.5
Milk	[1] 9,751	[1] 11,471	8
CPI/food	114.9	234.5	33

[1] Production for 1 cow per year.

MEAT MARKET LEVELS

[Dollars in millions]

	1970	1979
Hogs (yield per acre)	21.75	41.56
EXPENSES		
Feed	$8,028	$17,004
Seed	927	3,400
Fertilizer	2,390	6,692
Labor	4,346	9,239
Total farm expenses	44,424	118,618
Number of farms (in thousands)	2,949	2,333

The CHAIRMAN. Are there additional amendments to title XIV?

□ 1420

AMENDMENT OFFERED BY MR. ENGLISH

Mr. ENGLISH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ENGLISH: On page 190, insert after line 14 the following:

SAFETY NET FOR FARMERS

SEC. 1508. Effective only for the period beginning on the date of enactment of this Act and ending on September 30, 1982, section 331A of the Consolidated Farm and Rural Development Act, as amended (7 U.S.C. 1981a). is amended by (1) inserting, before the text thereof, the designation "(a)", and (2) adding at the end thereof a new subsection (b) to read as follows:

"(b) With respect to farm real estate, farm operating, and emergency loans, and loans made under the Emergency Agricultural Credit Adjustment Act of 1978, the Secretary shall, during any period in which the agricultural sector is suffering economic distress, take the action with respect to deferring of principal and interest and foregoing of foreclosure which he is authorized to take under subsection (a). For purposes of this subsection, a 'period in which the agricultural sector is suffering economic distress' is a period beginning with the date on which the total of forced liquidations and/or foreclosures of outstanding loans made, insured, or held by the Secretary exceeds 2 per centum of all outstanding loans made, insured, or held by the Secretary at the date of enactment of this subsection, and ending on September 30, 1982.

Mr. ENGLISH (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. ENGLISH. Mr. Chairman, this particular amendment is aimed at dealing with a problem that is evolving in the Great Plains area. I know in my own particular area, the Southwestern part of the United States, we are finding rumors are circulating that large numbers of foreclosures are imminent; rumors to the effect that the Federal Government is planning somewhere in the neighborhood of 10,000 foreclosures and forced liquidations in the State of Texas over the next few months, between 2,500 and 3,000 foreclosures or forced liquidations in the State of Oklahoma, something in the neighborhood of 2,000 to 2,500 in the State of Kansas.

I have been assured by the Department of Agriculture that these rumors are incorrect, but I think when one looks at the difficult times that lie ahead, huge carryovers of grain, falling farm prices, and the fact that farmers are having an increasingly difficult time in trying to meet their costs of production, one can quickly understand how dangerous such rumors could be. We know that the rumors themselves sometimes create

panic. The worst possible thing that could happen now would be this: If there were an increase in foreclosures, panic would rise within the country which would lead to selling, which could possibly lead to falling land prices, which would prove detrimental not only to our farmers but also to the Federal Government since its security for all the loans is based primarily upon land.

So with that in mind, Mr. Chairman, the amendment I offer states very simply that anytime the number of forced liquidations or foreclosures reaches the level of 2 percent of the total number of loans, that for the remainder of the next fiscal year, through September 30, 1982, there would be a simple moratorium on further foreclosures and forced liquidations.

I recognize that the 2-percent level is well above anything that we have experienced in recent history. In fact, the closest we have come, to my knowledge, was 0.09 of 1 percent, but I think that the fact that this provision is in the law would go far in quieting these rumors, go far in stabilizing the situation in rural America and prevent the panic not only for rural America but for our entire economy. So, with that in mind, I urge the committee to adopt this amendment.

Mr. DASCHLE. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I yield to the gentleman from South Dakota.

Mr. DASCHLE. Mr. Chairman, I want to commend the gentleman for his amendment. I would like to ask one question. This may have been mentioned, but what is the rate of foreclosure now? My understanding is, it is something like 0.4 of 1 percent. I would be interested in knowing what it is compared to a year ago.

Mr. ENGLISH. The gentleman is correct. For the month of August it was exceptionally high, and foreclosures reached 0.4 of 1 percent, which would be about one-fourth of the trigger level. But, I again point out the concern, and obviously a level such as 0.4 of 1 percent could begin to give credibility to the rumors which we have experienced in the Great Plains area. The highest in recent history was last year, which was 0.06 of 1 percent, and 0.09 of 1 percent in 1977.

Mr. DASCHLE. I again want to reiterate my support for the amendment. I think this puts some stability back into the system at a time when a stability is a rare entity. I think what we have to do is tell these people that as difficult as things are going to be, we are not going to pull out that kind of limited Federal support that does exist for them as they go through these very turbulent economic times, so I commend the gentleman for his statement and for the amendment, and I certainly join him in urging its passage.

Mr. ENGLISH. I thank the gentleman.

Mr. JONES of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I yield to the chairman of the subcommittee.

Mr. JONES of Tennessee. Mr. Chairman, I rise in support of the English amendment. I appreciate that the gentleman from Oklahoma is not offering his original version of his amendment which was strongly opposed by the administration and could have been very expensive.

In response to the original version, I have received a letter from Under Secretary of Agriculture, Frank Naylor, expressing opposition to it and shedding some light on the administration's views on foreclosures.

The letter states that it is not the policy of FmHA to engage in large-scale foreclosure efforts and that to do so would be irresponsible and would have far-reaching unfavorable consequences throughout the entire financial community.

I will make the text of the letter a part of the RECORD with my remarks.

To close, I believe this new version of the English amendment has adequately addressed the concerns expressed by USDA and the amendment will give Farmers Home Administration incentive to go the extra mile with hard-pressed borrowers.

Mr. Chairman, the letter follows:

WASHINGTON, D.C.,
October 14, 1981.

Hon. ED JONES,
Chairman, Subcommittee on Conservation, Credit and Rural Development, House of Representatives, Washington, D.C.

DEAR CONGRESSMAN JONES: An amendment to Section 331A of the Consolidated Farm and Rural Development Act, introduced by Representative Glenn English of Oklahoma, mandates a one-year moratorium on the payment of principal and interest on any outstanding FmHA loan made under that Act. It would also require the Agency to forego foreclosure on any loan when a borrower is unable to make payments due to circumstances beyond the borrower's control when to continue making payments would unduly impair the borrower's standard of living.

Under existing authority FmHA has a number of alternatives available which will achieve the purpose of this amendment, including authority to consolidate, reschedule, or defer loans. FmHA will use the full range of these options to assist its borrowers and to avoid termination of a loan account.

The Department of Agriculture strongly opposes this amendment. We believe it would be counterproductive to the responsible administration of FmHA programs. Potential deferred collections during fiscal year 1982 are estimated to be $3.9 billion. In addition, increased interest costs to finance the additional outlays during this period would be approximately $400 million.

The FmHA now sets a high priority on carefully counseling its borrowers on a case-by-case basis. This case-by-case basis is the only equitable way to deal with borrowers. To lump individual problems together and treat them en bloc would invite program abuses on the part of borrowers who might be able to repay their loans but would choose not to do so.

Under the present program policy, FmHA will work one-on-one with delinquent borrowers, or borrowers who may have other payback problems when there is a reasonable chance for the borrower to ultimately overcome his problems. The full range of existing authorities will be used to help such farmers get back on an orderly repayment schedule.

It has never been, and certainly is not now, a policy of FmHA to engage in large-scale foreclosure efforts. To do so would be irresponsible and would have far reaching unfavorable consequences throughout the entire financial community. At the same time FmHA believes it is necessary to maintain flexibility in the servicing of its accounts. An across the board moratorium would adversely affect program administrators and seriously hamper the Agency's efforts to collect on loans in an orderly and responsible manner.

Sincerely,

FRANK W. NAYLOR, Jr.,
Under Secretary for Small Community and Rural Development.

Mr. ENGLISH. I would like to say in response to the subcommittee chairman that he is absolutely correct. We have included the trigger. The trigger provides more than enough flexibility for the department to make sure that the Federal Government is protected.

Mr. JONES of Tennessee. Exactly right.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

(At the request of Mr. DE LA GARZA and by unanimous consent, Mr. ENGLISH was allowed to proceed for 2 additional minutes.)

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I am happy to yield to the chairman of the full committee.

Mr. DE LA GARZA. Mr. Chairman, I notice in the gentleman's amendment that he limits its application to September 30, 1982. Is this correct?

Mr. ENGLISH. That is correct.

Mr. DE LA GARZA. Which is more or less of an emergency nature?

Mr. ENGLISH. Exactly.

Mr. DE LA GARZA. For the following several months.

Mr. ENGLISH. My main concern is the low crop prices that we have been experiencing, the huge carryover that has developed, and this is obviously a time of serious concern to our farmers. I felt that I did not want to simply blindly insert an amendment such as this and make it a part of the long-term policy, but it will hopefully be short-term emergency.

Mr. DE LA GARZA. Under the present law and authority, the Secretary is able to deal on a one-on-one basis, or one loan at a time, in case they get into trobule, and this would have no effect on that?

Mr. ENGLISH. Absolutely not.

Mr. DE LA GARZA. He still would continue to do that?

Mr. ENGLISH. Correct.

Mr. DE LA GARZA. And then the stipulation, if it gets to the 2-percent level, that would be the trigger point for this emergency action?

Mr. ENGLISH. Exactly right.

Mr. DE LA GARZA. That being the case we would have no objection to the amendment.

Mr. ENGLISH. I thank the chairman for his support.

Mr. THOMAS. Mr. Chairman, will the gentleman yield for a series of questions?

Mr. ENGLISH. I yield.

Mr. THOMAS. My understanding is, the Secretary already has this power on a discretionary basis.

Mr. ENGLISH. True.

Mr. THOMAS. Is it the gentleman's feeling that the administration of this department has not been proper in terms of counseling farmers in terms of their needs to take care of their budgetary concerns?

Mr. ENGLISH. That is not the objective. The objective is to try to still rumors, particularly in the Great Plains area, that large numbers of foreclosures are coming. As the gentleman well knows, even unfounded rumors can be just as devastating as fact. What we are attempting to do is quiet those rumors.

Mr. THOMAS. I understand the gentleman's concern to send a mesage. My worry is that another message will be sent; that is, if there is some kind of cooperation and communication on any group out there that since it is a blanket provision those who are truly in need will be covered, but it is also entirely possible that those not truly in need will be covered.

As the gentleman may well know, in California on the disaster aid program on the national news, there was concern about the possibility that some people took advantage of the programs, and I think we have to be very, very cautious about people taking advantage of the programs.

The CHAIRMAN. The time of the gentleman from Oklahoma has again expired.

(At the request of Mr. THOMAS and by unanimous consent, Mr. ENGLISH was allowed to proceed for 2 additional minutes.)

Mr. THOMAS. I understand the gentleman's motives in dispelling rumors, but one of the things I do not want to do is paint the picture that we still do not understand that when we apply blanket arrangements, there is a possibility for particular individuals to take advantage of it. It has happened in the past; it is entirely possible that it could happen under this circumstance.

Since the Department is doing a good job, and since a case-by-case analysis and discussion with the Members who are having trouble is taking place, I think a case-by-case discretionary procedure is far superior over a blanket for the sole purpose of dispelling rumors. I think we are going to create more problems for ourselves by a blanket approach. Even though the end may seem justified, I think the means are entirely inappropriate.

Mr. ENGLISH. Let me state in response to the gentleman that this is the reason we placed the trigger at 2 percent. As the gentleman knows, looking at the last 7 or 8 years, this is far in excess of anything we have approached. The thought behind that trigger is that this gives the Secretary a great amount of flexibility. He has the ability to deal with any problems that occur.

The other part, and I know the gentleman being on the Agriculture Committee is well aware, it is very rarely that farmers agree on agriculture legislation, much less agreeing to such an extreme thing as mass foreclosures. So, I think the gentleman's concerns are unfounded. Let me say that if we ever reach a point of 2 percent, we would hope the Secretary of Agriculture on his own long before that time would have taken action, but unfortunately, my hopes are not going to still those rumors.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I yield to the gentleman from Missouri.

Mr. VOLKMER. Mr. Chairman, I agree with the purpose of the amendment. I have some reservations, as the gentleman from California has, as to the blanket approach. I, too, think we need to do something about the information that is supposedly going out as to the number of foreclosures so that we do not have a stampede.

The CHAIRMAN. The time of the gentleman from Oklahoma has again expired.

(At the request of Mr. VOLKMER and by unanimous consent, Mr. ENGLISH was allowed to proceed for 2 additional minutes.)

Mr. VOLKMER. I met with the Secretary and with the Farmers Home on this just this morning, and I have their assurance that they will continue to work on a one-to-one basis, as we planned to do with my farmers in my district, who are very desperately hurt because of wet weather this year and drought the past 2 years. So, I agree that we need to do something to dispel this idea so that we do not see land values deteriorate to nothing and we see something like what happened in the depression. None of us want that to happen.

I think that if we can somehow work it out, use the gentleman's language to stop it, and one-on-one work with our individual farmers to make sure that they do not go under, it would be the best of all worlds.

Mr. ENGLISH. I certainly say in response to the gentleman that I certainly agree with him. However, I have found that the farmers in my part of the country, when they get concerned about foreclosures, the assurances of the Secretary do not mean much to them. They want to see something in law. I think the objections to my position of this amendment by the administration probably are going to generate more fears in the country rather than lessen them, so I am hopeful that the House will adopt the measure and put these fears to rest so that we do not have this concern.

Mr. GUNDERSON. Will the gentleman yield?

Mr. ENGLISH. I yield to the gentleman from Wisconsin.

Mr. GUNDERSON. Mr. Chairman, I have a couple of questions on this question of the mandatory nature of it. We have discussed in committee many times my concern about economic emergency loans, for example, that somehow or another we destroy the credibility for the Farmers Home Administration at a time that we allow the farmer down the road because he is going under, to get an economic emergency loan, and we have this young guy out here with high interest rates trying to get started, and he has a good farm background. He cannot get any money. When I look at this amendment, it seems that it is so rigid that if we allow that to happen, that if we get this 2 percent, certainly there are going to be some people that through foreclosure due to unfortunate circumstances, need this kind of assistance, but should not it be discretionary, because otherwise we are not going to be able to help these young people? We are going to keep people in existence that ought not be in existence. I agree with the intent, but is there not another way we can accomplish this without the rigidity of this amendment?

Mr. ENGLISH. Let me say in response to the gentleman's question, I wish that there were, but quite frankly, when we get down to it, the foreclosure rate we are talking about roughly 20 times the rate we have had in recent history. Obviously, before we reach this trigger, the slide is going to be so pervasive, the turndown in farm prices is going to be so extreme, it is going to be too late.

The point I am trying to make is this: We are giving a tremendous amount of flexibility to the Secretary to deal with any of these problems, but I think the farmer deserves some assurance that we are not going to have wholesale forced liquidations, wholesale foreclosures taking place in the country. I think anything we can do to still this type of rumor, we should do. After all, this amendment applies only until September of next

year. Surely, that is not too much, given the dire circumstances in agriculture for us to respond to.

Mr. GUNDERSON. Does the gentleman really believe the Department of Agriculture will get the rules and regulations all in effect by September 30 next year, that we will have some kind of standards to operate this on? Supposing we reach that 2 percent?

Mr. ENGLISH. It is very simple. The previous Secretary of Agriculture declared a moratorium 2 year ago under these circumstances. It did not take him more than 24 hours to do it. No problem.

Mr. GUNDERSON. I thank the gentleman.

□ 1445

Mr. JEFFORDS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I do so reluctantly. Nobody likes to try to defeat an amendment which looks so nice and so generous and so helpful to those people we all have affection for. On the other hand, let us examine the kind of principles we are setting here and what we are doing.

First of all, as I understand it, this amendment is being offered because there are some rumors flying around. That alone raises a question in my mind as to whether or not we ought to propose legislation here which is a very substantial departure from a program policy in not only this area but the small business area and wherever else we have Federal loans.

We are saying here that we ought to do something because we have some rumors. First of all, let me read from a letter of the Secretary of Agriculture:

> It has never been and certainly is not now the policy of FmHA to engage in large-scale foreclosure efforts. To do so would be irresponsible and would have far-reaching unfavorable consequences throughout the entire financial community * * *.

So I think that there we have the word of the Secretary of Agriculture that these rumors are unfounded.

Second, let us look at the trigger. The trigger may appear big when you say it is this big and it is 2 percent, but we have got to remember that FmHA loans, although I do not know the figures of the actual loans, in dollar volume, are only 11 percent of our farms which have FmHA loans, and at least in my area less than 20 percent of the farms have FmHA loans. The others refer to dollars. And we must remember that the FmHA loans are to the risk farm population.

So in order to get to the 2 percent, it may not be as big a problem as it might appear to be. The reason it has not been is that we have had a good policy within FmHA to deal with the risk population and to help them along and only bring foreclosure when there is no alternative. And in many cases it is better for the people involved to foreclose when they do face that reality.

So to establish a policy that says the Secretary of Agriculture is going to embark upon some horrendous great process of trying to bring foreclosures for whatever purpose is, I think, wrong.

Second, I think, as has already been pointed out, that, for instance, in some area, if an organized group wants to raise havoc with a situation, they can go in and refuse to pay and bring 2 percent to the brink of foreclosure. The rest would plead poverty, and then no one in the area pays any principal or interest on a protest basis, and this would sanction such a protest. It would invite the kind of chaos the gentleman is saying this is supposed to prevent, because if we have an organized farm movement to protest, they can raise havoc with this thing. The estimate of the Department of Agriculture of what would happen in this situation is a cost of up to $400 million and some $3.9 billion in deferred collections if there were a widespread protest movement.

I think we have to be responsible here. Sure, we would all like to do these kinds of things, but there is adequate discretion, there has been discretion, and they have acted responsibly. There is no indication of truth to the rumors, and there is no indication it has not been used responsibly.

I am sorry, Mr. Chairman, but I cannot lend myself to the support of an amendment which I think really may raise false expectations or may create chaos by bringing these things on through protest movements which may be genuine but which may create chaos and create financial problems in the FmHA community.

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I am pleased to yield to the gentleman from Oklahoma.

Mr. ENGLISH. Mr. Chairman, I think that the gentleman from Vermont (Mr. JEFFORDS) has made some good points, and normally I would agree with him. But, quite frankly, when we look back at this particular Secretary, we have to remember that last spring, when this committee in meeting with that Secretary urged, pleaded, and did everything possible to try to talk him into moving to limit production through a set-aside program that would be effective, we found that we had no cooperation. And now we look back and find that we have the highest foreclosure and forced liquidation rate than any time in recent history, I believe in the last 7 years. Whenever we find a situation when farmers are looking at a carryover that is mammoth, when we hear more and more concerns expressed about being forced out of the business of farming, and when we take a look at this very farm bill and what it is going to do for farmers, then I think there is perfectly good justification among many farmers to be concerned, and that concern can quickly turn to panic.

That is what we are trying to prevent here. That 2 percent is 20 times larger than any other foreclosure rate in any given year in the last decade.

If this administration is prepared to state that it is willing to move ahead and stand in the way of that kind of trigger, maybe that is going to signal something to the American farmer. it is certainly going to signal something to the American public. I think that is something to be concerned about and, quite frankly, maybe 2 percent is too high; maybe we ought to bring it down to 1 percent. I say that because the more opposition I see to this amendment—and, quite frankly, I am surprised by it—the more convinced I am that there is perhaps something in the wind. Maybe there is some reason why the administration is fighting so hard to defeat this amendment.

The CHAIRMAN. The time of the gentleman from Vermont (Mr. JEFFORDS) has expired.

(By unanimous consent, Mr. JEFFORDS was allowed to proceed for 3 additional minutes.)

Mr. MADIGAN. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I yield to the gentleman from Illinois.

Mr. MADIGAN. Mr. Chairman, I want to thank the gentleman for yielding, and I wish to say to my former colleagues on the Agriculture Committee that I have, because of my leave of absence, stayed out and tried very diligently to stay out of its business.

I would say to my distinguished colleague, the gentleman from Oklahoma (Mr. ENGLISH), that I am particularly always ambitious to stay out of his business because of the many difficulties he and I had over a 6-year period of time. As I am sure the gentleman will recall, most of those difficulties occurred when he tried to do things like what he is trying to do today. The gentleman may recall those fights that went on between the two of us, not only in the subcommittee but also in the full committee and even sometimes on the floor of the House, as this one today.

I would say to the gentleman that, notwithstanding all the reasonable ambitions I am sure he has for the people in Oklahoma, the fact of the matter is that what he would be doing here is excusing from the responsibilities of repaying a legitimate debt people who are quite able to repay that legitimate debt. The gentleman is making no distinction here in his amendment between those people who

cannot pay and those people who are quite able to pay.

As a matter of fact, under the provisions of the gentleman's amendment, a millionaire with a million dollars in cash in the bank would be able to avoid repaying both principal and interest and would be able to take the moneys that otherwise would have been repaid on this loan to the Government and invest them in some other kind of investment like a certificate of deposit and make money with the very money that is due and owing to the taxpayers of the United States.

Now, that is the kind of an amendment the gentleman is sponsoring here. That is the kind of thing we have been through before, to the extent that some of these programs became a national disgrace that they became the subject of television programs like "60 Minutes." I am sure the gentleman will recall that, and the gentleman from California (Mr. THOMAS) has alluded to that.

I do not think that the House of Representatives wants to go on record this afternoon as supporting an amendment that would allow a millionaire farmer or rancher to get away from paying a just debt which he or she is able to pay, just on the premise that the Department of Agriculture may not do exactly what it has assured the gentleman from Virginia (Mr. WAMPLER), the gentleman from Vermont (Mr. JEFFORDS), and me as recently as an hour ago it is not only willing to do but in fact is already doing.

So, Mr. Chairman, I would urge all my colleagues in the House to not take this step backward, to not slip backward into this potential for disgrace and embarrassment that we have so diligently moved away from as members of the Agriculture Committee, and to defeat this amendment.

Mr. JEFFORDS. Mr. Chairman, I would like to point out that I think the description of the amendment by the gentleman from Illinois (Mr. MADIGAN) is correct, but I wonder if that was really the intention of the offerer of the amendment.

The CHAIRMAN. The time of the gentleman from Vermont (Mr. JEFFORDS)) has expired.

(By unanimous consent, Mr. JEFFORDS was allowed to proceed for 2 additional minutes.)

Mr. JEFFORDS. Mr. Chairman, under existing law the statute reads that the Secretary may have this moratorium for a certain period of time with certain criteria. Now, as I read the amendment the same way the gentleman from Illinois does, what it does is to supersede all the criteria established in the basic law for the discretionary period.

If that is the case, then the moratorium affects everybody that is on FmHA loans. Now, if that is not the gentleman's intent, maybe we ought to correct the amendment. If the gentleman still intends the criteria, which I will read, to be in effect, that would make a significant difference in the amendment. The criterion is that upon showing by the borrower that due to circumstances beyond the borrower's control the borrower is temporarily unable to continue to make payments on principle and interest—and this refers to the credit of the borrower.

Now, that is all in the period section of the basic law. If the gentleman is superseding all that, he is saying that nobody is going to make any payments on any FmHA loans regardless of whether they are millionaires.

Mr. Chairman, I will ask the gentleman, what is the intention of his amendment?

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. Mr. Chairman, the intention of the amendment was that whenever we get into a situation where we have large wholesale foreclosures and forced liquidations which reach the level of 2 percent, 20 times larger than anything we have had in recent history today, at that particular point the Secretary would then declare a moratorium through the rest of the fiscal year, which would be through September 30, 1982.

Let me state further, since the gentleman asked the question, that, of course, under those circumstances the Secretary has a tremendous amount of flexibility. Obviously, or hopefully, we will not find ourselves in a situation where the Secretary is going to move in and suddenly raise the level of foreclosures and forced liquidations throughout this country by 20 times. I would not think he would do so. If we have laws such as this in place, obviously the Secretary would be mindful of that.

I would hope and would expect that the Secretary would have the discretion and the responsibility to understand his limitations under that ceiling and, therefore, would work toward dealing with that problem.

Let me say one thing further as far as millionaire farmers are concerned. As it stands right now, anybody who is a millionaire receiving loans from the Farmers Home Administration is not eligible, so they would not apply under the terms of the program. Otherwise it would mean that the Administration had given loans to people who should not have received them.

The CHAIRMAN. The time of the gentleman from Vermont (Mr. JEFFORDS) has again expired.

(By unanimous consent, Mr. JEFFORDS was allowed to proceed for 1 additional minute.)

Mr. JEFFORDS. Mr. Chairman, I just want to point out, in response to what the gentleman said, so everybody understands it, that the interpretation the gentleman from Illinois (Mr. MADIGAN) and I have is that that moratorium does not refer to people who are in financial distress; it refers to everyone who has an FmHA loan at that time, and it means that nobody has to make a payment.

That, I think, is ludicrous. I cannot understand anyone proposing that kind of an amendment, where everybody in that area, regardless of their financial circumstances, has no need to make a payment. That is a nice gift, and maybe it is very politically expedient. It surely makes horrible policy.

Mr. Chairman, I yield back the balance of my time.

Mr. WAMPLER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in reluctant opposition to the amendment offered by the gentleman from Oklahoma. I wish to commend the gentleman for his interest and hard work on this extremely crucial issue, and say to the gentleman that we are all well aware of and concerned about the critical problems our farmers are facing in meeting their credit needs. Nevertheless, I do not believe that it would be prudent policy to adopt the amendment now before us.

As I understand the amendment, it would require the Secretary of Agriculture to establish a moratorium on the repayment and foreclosure of any FmHA farm loan under certain conditions. FmHA already has, under existing authority, a number of alternatives available which will achieve the purpose of this amendment, including authority to consolidate, reschedule, or defer loans. Furthermore, we have received a letter from USDA stating that it is their full intention to use the full range of these options to assist their borrowers and avoid termination of a loan account.

It has never been a Farmers Home Administration policy to engage in large-scale foreclosure efforts. For fiscal year 1980 and the first 8 months of 1981, FmHA has foreclosed on only 0.06 of 1 of all FmHA farm loans.

It should also be pointed out that the majority of these foreclosures have been voluntary conveyances by the borrowers. FmHA policy is very lenient in allowing repayment extensions, and the agency generally forecloses only when there is no reasonable chance for the borrower to continue a viable operation.

Mr. Chairman, I believe it is important for the Secretary of Agriculture to have the proper flexibility to administer the loan programs of the Farmers Home Administration in a responsible manner under all types of

circumstances. Adoption of the English amendment could destroy this flexibility and disrupt the orderly financial management of the $4 billion FmHA farm loan program.

I urge my colleagues to oppose this amendment.

□ 1500

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I am happy to yield to my colleague from Vermont.

Mr. JEFFORDS. I again would like to emphasize here if the gentleman is talking about organized effort to get a total moratorium for everyone in the area, all we have to do is consider this sort of average that only 20 percent of the farms in the area have any FmHA loans, then all we have to get is about 0.4 percent of the farms to agree to somehow get in a position where foreclosure comes about. At that point they can get a moratorium on all loans owed to any farmers in that area. I think to put the law in the position to give that kind of a break to a particular area on a protest movement is a very, very dangerous precedent to set.

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. WAMPLER. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. I think the main point though that has to be made, and with the gentleman's long experience on the Agriculture Committee he would agree, anytime this Nation finds itself in a situation in which we have 20 percent the normal rate of foreclosures and forced liquidations take place, what we would have happening would be a sliding of land values. We have seen that happen in the past, although thankfully it has been many, many years since we have seen it happen.

If that should happen, there would be no such thing as a well-to-do farmer, because as the gentleman well knows, most farmers are living off of the equity, and whenever that equity starts going through a loss of value of the land, certainly neither the farmer nor the Federal Government would be protected. So the Federal Government would lose, the farmer would lose and all other lenders would lose. Certainly the country and the economy of the Nation would lose because that is how depressions begin. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma (Mr. ENGLISH).

The question was taken; and on a division (demanded by Mr. ENGLISH) there were—ayes 10, noes 18.

So the amendment was rejected.

AMENDMENT OFFERED BY MR. JONES OF TENNESSEE

Mr. JONES of Tennessee. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JONES of Tennessee: Page 180, insert after line 18 the following new section and renumber the succeeding sections of title XV accordingly:

BORROWER'S NET WORTH ANNUAL REPORT

SEC. 1502. The Consolidated Farm and Rural Development Act is amended by—

(1) in section 333(a), inserting the designation "(1)" immediately after "the applicant" and inserting before the semicolon at the end thereof the following: ", and (2) to furnish a written statement showing the applicant's net worth"; and

(2) adding at the end thereof a new section 349 as follows:

"SEC. 349. Not later than December 31 of each calendar year, beginning with calendar year 1981, the Secretary shall submit to the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition and Forestry a report describing the characteristics of borrowers initially receiving, during the fiscal year ending in that calendar year, loans made or insured under sections 303 and 312(a) and separately for loans guaranteed under such sections. The report shall be made on a State by State basis, and shall include, but need not be limited to, each borrower's age, education, farming experience, net worth, amount of farm ownership and operating loans outstanding, amount of other loans outstanding, gross farm income, and other income. This information shall be provided separately for borrowers receiving low-income loans and those receiving regular loans.".

Mr. JONES of Tennessee (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. JONES of Tennessee. Mr. Chairman, this amendment I am offering to title XV of the farm bill would amend the Consolidated Farm and Rural Development Act in two instances, but the purpose of the changes is the same: To strengthen the integrity and accountability of the farm operating and real estate loan programs of the Farmers Home Administration.

First, my amendment would require applicants for Farmers Home Administration operating and real estate loans to furnish the agency with a written statement indicating their net worth. I do not see this as either a burdensome or needless requirement. To the contrary, I believe it is essential that FmHA have as much information of this type as possible in evaluating the true need of an individual who applies for a Government loan, especially since many FmHA loans are made at a subsidized interest rate.

As we all know, the funding level for FmHA has been placed under the same budget constraints as most other Government lending agencies. In some cases, the FmHA budget has been trimmed to an even greater extent than other similar lending agencies. It is for this reason that we must do all we can to assure that the Secretary of Agriculture and the Administrator of FmHA have the necessary information to make the best judgment in seeing that the limited funds available to them go to those farmers most deserving of assistance.

The second provision of my amendment would require the Secretary of Agriculture to submit annual reports to Congress on factors relating to the nature of borrowers participating in the so-called limited resource loan programs of the Farmers Home Administration.

In 1978 Congress created this loan program tailored for a group of borrowers with special credit needs. Among those targeted for assistance are limited resource farmers, beginning farmers and owners or operators of small or family farms with a low income, such as young farm families which have had an opportunity to buy their first piece of land, and small minority farmers.

Twenty percent of farm operating and real estate loans are earmarked for limited resource borrowers. In the case of farm real estate loans, the interest rate is pegged at not more than one-half the cost of money to the Government; and in the case of farm operating loans, the interest rate charged to the borrower carries a 3-percent subsidy.

Earlier this year, the administration proposed to Congress that the limited resource loan program be abolished. We were told by representatives from the Department that plans were underway to formulate a new program to replace the limited resource loan program. However, nothing ever developed from these assurances, and the proposal to abolish the current program did not gain tangible support in the Congress and was summarily dismissed. Nevertheless, several changes were made to the program in the Budget Reconciliation Act.

I believe the recent focus given to the limited resource loan program and the proposal to abolish it, give rise to some serious questions about the program and its future. I believe it is important that we have the information and data necessary to thoroughly evaluate the effectiveness and value of the program. My amendment would simply provide the tools essential to a complete and useful review of the program.

Mr. Chairman, I urge my colleagues to join me in support of this amendment. As I mentioned earlier, it will serve to strengthen and improve the vital farm lending programs of the Farmers Home Administration.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. JONES of Tennessee. I am happy to yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Chairman, I rise in support of the Jones amendment to title XV. I want to commend the gentleman from Tennessee, the chairman of the Subcommittee on Conservation, Credit, and Rural Development, for his work on this amendment, which I believe will help improve the effectiveness and accountability of the important lending programs of the Farmers Home Administration.

The first part of this amendment would require applicants for Farmers Home Administration farm loans to furnish the agency with a written statement indicating their net worth. Last spring, during oversight hearings on FmHA loan programs, numerous witnesses criticized the agency's operations and priorities. It was stated repeatedly that, in many cases, the Farmers Home Administration did not have the ability to judiciously review and evaluate all loan requests due to manpower shortages, lack of information, and other factors.

This problem is made even more critical by the fact that Farmers Home Administration is now under the same budget constraints that most other Government agencies also are facing. For this reason, we must see that the Farmers Home Administration has the necessary information to effectively evaluate the true need of an individual who applies for an FmHA loan. I believe that this provision of the Jones amendment is essential in insuring that the limited funding that is available will be directed to those farmers most in need of assistance.

The second provision of the Jones amendment requires the Secretary of Agriculture to submit annual reports to Congress on factors relating to the nature of borrowers participating in the "limited resource" loan programs of the Farmers Home Administration.

This loan program was created by Congress in 1978 for a group of borrowers with special credit needs. Among those targeted for assistance are limited resource farmers, beginning farmers and owners or operators of small or family farms with a low income, and small minority farmers.

Mr. Chairman, I have been particularly concerned with the needs of the young, beginning, limited resource farmers who, in today's economic environment, may never get a chance to get started. A good example is my own State of Vermont, where the average age of our farmers is 55. If we are going to maintain a healthy food supply and a productive agricultural sector, then we must provide the opportunity for future generations to farm. The FmHA limited resource program has been a major factor in trying to achieve this goal.

The administration earlier this year suggested that Congress abolish the FmHA limited resource program. While such drastic action was rejected by the House Agriculture Committee, several changes which severely limited the scope of the program were made in the Omnibus Budget Reconciliation Act.

Because of these changes, the current credit crunch facing our farm sector, and the obvious need to provide some assistance to help young and beginning farmers get started, it is essential that we have the information and data to adequately review Federal programs affecting the needs of our young and beginning farmers. I believe that adoption of the Jones amendment will enable the Congress to evaluate the effectiveness and value of the FmHA limited resource program, and to assess the effect of recent changes in this program made in reconciliation.

I urge my colleagues to support the amendment.

Mr. JONES of Tennessee. I thank my friend very much for his support.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. JONES of Tennessee. I am glad to yield to my chairman.

Mr. DE LA GARZA. Mr. Chairman, I would say so far as the gentleman's amendment is concerned, this is something the Department should already be doing. If they are not doing it, then maybe we need it in the law. We would accept the amendment on this side.

Mr. JONES of Tennessee. I thank the gentleman very much.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee (Mr. JONES).

The amendment was agreed to.

The CHAIRMAN. Are there additional amendments to title XV?

If not, the Clerk will designate title XVI.

Title XVI reads as follows:

TITLE XVI—CONSERVATION

Subtitle A—Special Areas Conservation Program

TECHNICAL AND FINANCIAL ASSISTANCE; CONTRACTS

SEC. 1601. (a) The Secretary of Agriculture (referred to in this subtitle as the "Secretary") shall establish a program for the conservation of soil, water, and related resources in special areas designated under section 1602 and approved under section 1604 (referred to in this subtitle as "designated special areas") by providing technical and financial assistance to owners and operators or groups of owners and operators of farm, ranch, and certain other lands at their request. Such assistance with respect to State, county, and other public land shall be limited to those lands that are an integral part of a private farm operating unit and under the control of the private landowner or operator.

(b) To carry out the program established under this subtitle, the Secretary may enter into contracts with owners and operators of farm, ranch, or other land in a designated special area who have such control over the land as the Secretary deems necessary. Any such contract may be entered into with respect to land in a designated special area which is not farm or ranch land only if the erosion-related problems of such land are so severe as to make such contracts with respect to such land necessary for the effective protection of farm or ranch land in that designated special area. Contracts under this subtitle shall be designed to provide assistance to the owners or operators of such farm, ranch, or other land to make voluntary changes in their cropping systems or uses of land or water which are needed to conserve or protect the soil, water, and related resources of such lands, and to carry out the soil and water conservation measures needed under such changed systems and uses.

(c) The landowner or operator shall furnish to the Secretary a plan—

(1) which incorporates such soil and other conservation practices and measures as may be determined to be practicable to protect such land from erosion-related damage;

(2) which outlines a schedule for the implementation of changes in cropping systems or use of land or of water and of conservation measures proposed to be carried out on the farm, ranch, or other land during the contract period;

(3) which is designed to take into account the local social, economic, and environmental conditions which will help solve the particular erosion- or water-related problems of the designated special area;

(4) which may allow for such varying levels of conservation application as are appropriate to address the problems and may be developed to cover all or part of a farm, ranch, or other land as determined to be necessary to solve the conservation problems;

(5) which may include practices and measures for enhancing fish and wildlife and recreation resources and for reducing or controlling agricultural-related pollution; and

(6) which identifies those measures, including planned grazing systems, needed to improve vegetative conditions, reduce erosion, and conserve water on rangeland. Conservation plans of landowners and operators developed in cooperation with, and approved by, the soil and water conservation district board for the district in which the lands are situated shall form the basis for contracts under this subtitle.

(d) Under any contract entered into under this subtitle, the landowner or operator shall agree—

(1) to effectuate the plan for the farm, ranch, or other land of the owner or operator substantially in accordance with the schedule outlined therein unless any requirement thereof is waived or modified by the Secretary pursuant to subsection (f);

(2) to forfeit further payments under the contract and refund to the United States all payments received thereunder, plus interest, upon violation by the owner or operator of the contract at any stage during the time the owner or operator has control of the land if the Secretary, after considering the recommendations of the soil and water conservation district board for the district in which the lands are located, determines that such violation is of such a nature as to warrant termination of the contract, or to make refunds, plus interest, or accept such payment adjustments as the Secretary may deem appropriate if the Secretary determines that the violation by the owner or operator does not warrant termination of the contract; and

(3) not to adopt any practice specified by the Secretary in the contract as a practice which would tend to defeat the purposes of the contract.

(e) In return for such agreement by the landowner or operator, the Secretary shall agree to share the cost of carrying out those conservation practices and measures set forth in the contract for which the Secretary determines that cost sharing is appropriate and in the public interest. The portion of the costs to be shared shall be that part which the Secretary determines is necessary and appropriate to effectuate the implementation, and, if applicable, the maintenance of the conservation practices and measures under the contract, including the cost of labor. In determining the share of costs to be borne by the Federal Government, the Secretary shall take into consideration the particular social, economic, and environmental conditions of the geographic area involved and the degree of conservation to be achieved. The Secretary shall determine the maximum amount of financial assistance that may be provided to any single recipient. If adjustments from cultivated crops to permanent vegetative cover or changes in crop varieties are undertaken as a conservation practice or measure under the contract, financial assistance may be provided under such contract with regard to the income lost as a result of such adjustments.

(f) The Secretary may terminate any contract with a landowner or operator by mutual agreement with the owner or operator if the Secretary determines that such termination would be in the public interest, and may agree to such modification of contracts previously entered into as the Secretary may determine to—

(1) carry out the purposes of the program or facilitate the practical administration thereof;

(2) accommodate adjustments in crop production; or

(3) accomplish equitable treatment with respect to other similar conservation or commodity programs administered by the Secretary.

(g) In addition, the Secretary may enter into contracts with landowners or operators for the purpose of maintaining a conservation practice or measure which was established under the program authorized by this subtitle or otherwise established, and to provide necessary assistance. Subsections (b) through (f) shall apply to contracts made under this subsection.

DESIGNATION OF SPECIAL AREAS

SEC. 1602. (a) The program established under this subtitle shall be directed toward identifying and correcting such erosion-related or irrigation water management problems as may exist within each designated special area. Assistance under this subtitle may be provided to any geographic area of the United States if such an area is first designated by the Secretary as having severe and chronic erosion-related or irrigation water management problems and such designation is approved under section 1604.

(b) In identifying a geographic area as one appropriate for designation as a designated special area under this subtitle, the Secretary shall prepare a report setting forth an assessment of the problems, objectives, priorities, and a schedule for the implementation of the program under this subtitle in such area. As part of such report, the Secretary shall indicate how the program, as developed with respect to the area discussed in such report, takes into consideration programs of Federal, State, and local agencies—including soil and water conservation district boards and State Agricultural Stabilization and Conservation Committees—relating to soil and water conservation, pollution abatement, or the improvement or protection of forest land. In designating special areas, the Secretary shall review national resources inventory data, river basin plans, special studies, and other resource information. The Secretary shall consider tons of soil loss prevented, acres protected, and volume of water conserved. The Secretary shall evaluate the degree and type of interagency cooperation, the degree of local acceptance of the planned target activity, and the significant favorable and adverse impacts of the targeted activity.

PERIOD OF PROGRAM

SEC. 1603. Special geographic areas may be designated pursuant to section 1602 during the period of ten years following the effective date of this subtitle. Contracts authorized by subsections (b) and (g) of section 1601 may be entered into during a period of ten years following the designation of the special area to which they relate. Such contracts may not exceed ten years in duration, and may not exceed the amounts of such appropriations as may be provided therefor.

APPROVAL OF DESIGNATIONS

SEC. 1604. The Secretary shall submit each report prepared pursuant to section 1602(b) to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives. The Secretary may not enter into contracts under section 1601 with respect to land in a particular area unless the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives pass resolutions approving the report prepared under section 1602(b) with respect to such area.

SERVICES OF AGENCIES

SEC. 1605. In carrying out the provisions of this subtitle, the Secretary may utilize the services of local, county, and State committees established under section 8 of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h) and the technical services of the Department of Agriculture, soil and water conservation district boards, and other State or local agencies. The Secretary may utilize the services and facilities of the Commodity Credit Corporation in discharging the functions and responsibilities of the Secretary under this subtitle.

RESEARCH

SEC. 1606. The Secretary may expend funds directly or through grants for such research as is needed to assist in developing new technologies for controlling erosion-related or irrigation water management problems in a designated special area.

GRANTS

SEC. 1607. The Secretary may provide grants to any State containing lands within a designated special area to conduct evaluation and analysis of the local and State tax structures, rules, and regulations and their impact on the acceptance, implementation, and maintenance of conservation practices or measures, or other pertinent items that may be needed for an effective program.

AUTHORIZATION OF APPROPRIATIONS

SEC. 1608. There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle, such sums to remain available until expended.

REPORTS

SEC. 1609. The Secretary shall submit an evaluation report to the Congress by January 1, 1986, and at each five-year interval thereafter, concerning activities and results under the program authorized by this subtitle. Recommendations for additional legislative action necessary to apply related research findings or more effectively solve erosion-related or irrigation water management problems of the designated special areas shall be included along with any other pertinent matters.

PROTECTION OF PARTICIPANTS

SEC. 1610. The Secretary shall, to the extent feasible, provide for protection of program participants from indirect or direct disqualifications, discrimination, forfeiture, or reduction of eligibility, or penalty under other agricultural programs for participating in the program authorized by this subtitle.

Subtitle B—Matching Grants for Conservation Activities

GRANTS PROGRAM

SEC. 1611. (a) The Secretary of Agriculture (referred to in this subtitle as the "Secretary") shall formulate and implement a program for furthering the conservation of soil, water, and related resources through annual grants to local units of government through State soil conservation agencies. Such grants shall be for noncapital expenditures in furtherance of local and State conservation objectives specified in section 1613.

(b) Such grants shall be made to augment rather than to replace other technical and financial assistance programs of the United States Department of Agriculture.

(c) A local unit of government may be eligible for a grant under subsection (a) if it—

(1) has in effect a current long-range program which the State soil conservation agency determines is adequate to meet local and State laws and objectives;

(2) has in effect a current annual work plan which is consistent with the long-range program in paragraph (1); and

(3) certifies to the Secretary or his designee at the State level that it has arranged for equal matching funds or in-kind services to the local unit from regional, State, local, or private sources.

(d) Whenever the Secretary determines that a component of the long-range program or annual work plan involves primarily a national rather than a local or State objective, the State or local matching funds required for the national component of the long-range program or annual plan need not exceed 25 per centum of the total funds required to accomplish the national objective. The Secretary, by regulation, shall define those objectives which are national in scope.

PROGRAM IMPLEMENTATION AND REVIEW

SEC. 1612. (a) For purposes of implementing the program and plan under section 1611(c), the local unit of government is encouraged to seek the input and cooperation of—

(1) local agencies, organizations, and citizens; and

(2) agencies of the United States Department of Agriculture or other Federal agencies, cooperative Extension services, and others that may be designated by the Secretary or the Governor to serve as advisers.

(b) In reviewing programs and work plans, the State soil conservation agency, the State Agricultural Stabilization and Conservation Committee, and the Secretary or his

designee at the State level may recommend additions or changes in order to meet urgent State, multistate, and national conservation needs or priorities as developed through the Soil and Water Resources Conservation Act of 1977 or similar process.

PLANS

SEC. 1613. (a) Long-range programs and annual work plans may include any of the following soil, water, and related resource conservation objectives: (1) soil erosion prevention and control; (2) cropland, forest, woodland, pasture or rangeland improvement; (3) water conservation, development, and management, and water quality improvement; (4) agricultural land retention or preservation; (5) demonstration projects to test and publicize the effectiveness of natural resource management systems adapted to local conditions; (6) fish and wildlife habitat improvement; (7) animal waste management; (8) watershed protection and flood prevention; (9) sediment control and stormwater management in urbanizing areas; (10) environmentally sound energy conservation and production; (11) leadership in natural resources aspects of rural community planning and development; or (12) any other purpose authorized or required by local or State conservation laws.

(b) Where an objective has been identified which will require more than one year to complete or reach, the Secretary or his designee may enter into a long-term agreement of not more than ten years with the local unit of government or State agency to provide funding assistance for the term of the agreement. Such assistance shall be contingent upon the amount of funds appropriated under section 1616 of this subtitle.

MATCHING FUNDS

SEC. 1614. (a) Federal matching grant funds, as mutually agreed upon by the State soil conservation agency and the Secretary, may be used to provide technical assistance to land owners and operators for planning and application of soil and water conservation practices and resource management systems.

(b) Such technical assistance shall be administered by the State soil conservation agency through local soil and water conservation districts.

(c) Such technical assistance shall be fully coordinated with technical assistance provided through ongoing Federal, State, and local resource conservation programs, and shall be in accord with established technical standards or guidelines.

(d) The basis for the transfer of grant funds shall be a grant agreement entered into by the parties referred to in section 1612(b).

RECORDS

SEC. 1615. (a) Each local unit of government or State agency receiving assistance under this subtitle shall keep such records as the Secretary requires, including records which fully disclose the amount and disposition by such unit or agency of the proceeds of such grants, the total cost of the projects or undertakings in connection with which such funds are given or used, and the amount of that portion of the costs of the projects or undertakings supplied by other sources, and such other records as will facilitate an effective audit.

(b) The Secretary and the Comptroller General of the United States or any of their duly authorized representatives shall have access for the purpose of audit and examination to any books, documents, papers, and records of the local units that are pertinent to the grants received under this subtitle.

AUTHORIZATION OF APPROPRIATIONS

SEC. 1616. (a) There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle, such sums to remain available until expended.

(b) No funds shall be appropriated to carry out this subtitle for the fiscal year beginning October 1, 1992, and subsequent fiscal years, except as authorized by law enacted after the effective date of this subtitle.

(c) The Secretary shall report to the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition, and Forestry on the progress of the program authorized by this subtitle. The first such report shall be submitted by January 1, 1986, and the succeeding report by January 1, 1991. Each such report shall include an evaluation of the program and the Secretary's recommendations for strengthening it.

Subtitle C—Conservation Loan Program

SEC. 1617. (a) Section 4(h) of the Commodity Credit Corporation Charter Act is amended by inserting immediately after the second sentence the following: "To encourage the alleviation of natural resource conservation problems that reduce the productive capacity of the Nation's land and water resources or that cause degradation of environmental quality, the Corporation may, beginning October 1, 1981, make loans to agricultural producers for those natural resource conservation and environmental enhancement measures that are recommended by the applicable county and State Agricultural Stabilization and Conservation Committees and are included in the producer's conservation plan approved by the local soil and water conservation district; such loans shall be for a period not to exceed ten years at a rate of interest based upon the rate of interest charged the Corporation by the United States Treasury; the Corporation may make loans to any one producer in any fiscal year in an amount not to exceed $25,000; loans up to $10,000 in amount may be unsecured and loans in excess of $10,000 shall be secured; and the total of such unsecured and secured loans made in each fiscal year shall not exceed $200,000,000: *Provided*, That the authority provided by this sentence to make loans shall be effective only to the extent and in such amounts as may be provided for in prior appropriation Acts.".

Subtitle D—Volunteers for Conservation

ESTABLISHMENT OF PROGRAM

SEC. 1618. (a) The Secretary of Agriculture (referred to in this subtitle as the "Secretary") shall establish a program to use volunteers in carrying out the natural resources assistance programs of the Department of Agriculture.

(b) The Secretary is authorized to accept, subject to regulations issued by the Office of Personnel Management, voluntary service for the Department of Agriculture for such purpose if the service:

(1) is to be without compensation; and

(2) will not be used to displace any employee of the Department of Agriculture.

(c) Any individual who provides voluntary service under this subtitle shall not be considered a Federal employee except for purposes of chapter 81 of title 5 of the United States Code (relating to compensation for injury) and sections 2671 through 2680 of title 28 of the United States Code (relating to tort claims).

AUTHORIZATION OF APPROPRIATIONS

SEC. 1619. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle, such sums to remain available until expended.

Subtitle E—Reservoir Sedimentation Reduction Program

FORMULATION OF PROGRAM

SEC. 1620. The Secretary of Agriculture (referred to in this subtitle as the "Secretary") is authorized to formulate and implement a program for testing the feasibility of reducing excessive sedimentation in existing reservoirs. Such an assistance program shall be implemented on the watershed drainage areas of no more than five publicly owned reservoirs. The Secretary shall select for the program those reservoirs in which excessive amounts of sediment are being deposited because of critical soil erosion problems in the watershed drainage area.

PLANS

SEC. 1621. For each reservoir and drainage area selected under section 1620, a plan shall be prepared that includes an assessment of the problems, a listing of objectives and priorities, and an implementation plan for achieving the objectives. The Secretary shall enter into an agreement with the soil and water conservation district(s) containing land within the reservoir or drainage area, an agency of State government designated by the Governor, and any unit(s) of local government which has a recognized interest in the reservoir, for the purpose of preparing the plan. The plan shall be signed by the Secretary, or the Secretary's designee, and the other parties to the agreement.

APPROVAL OF PLANS

SEC. 1622. The Secretary shall submit each plan developed under section 1621 to the Committee on Agriculture, Nutrition, and Forestry of the Senate and to the Committee on Agriculture of the House of Representatives. The Secretary may implement the plan only after each committee passes a resolution approving the plan.

AUTHORIZATION OF APPROPRIATIONS

SEC. 1623. There are hereby authorized to be appropriated, for each of the fiscal years 1983 through 1987, such sums as may be necessary for carrying out the provisions of this subtitle, such sums to remain available until expended.

REPORT

SEC. 1624. The Secretary shall submit a report evaluating the program authorized by this subtitle to the Congress by January 1, 1978. The report shall include a recommendation as to whether the program should be extended and, if so, how it could be strengthened.

Subtitle F—Designation of Lands Set Aside or Diverted

SEC. 1625. Notwithstanding any other provision of law, if the Secretary of Agriculture (referred to in this subtitle as the "Secretary") is authorized or directed by any Act of the Congress to establish a set-aside or diversion program for any agricultural commodity, and if the Secretary establishes such a program, the designation by a producer of lands to be set aside or diverted in an application to participate in such program shall be subject to disapproval under subsection (b).

(b) If there is a soil and water conservation district board for the district in which the designated lands are situated, the Secretary is authorized to empower such board—

(1) to disapprove the producer's designation of lands if the board finds that lands designated will make a less than average contribution to soil conservation compared to the contribution of other lands which the producer could have designated to set-aside or divert under such program, and

(2) if a designation is so disapproved, to specify which lands of the producer would be acceptable to such board for set-aside or diversion under such program.

(c) If a producer's designation is disapproved under subsection (b)(1), then such producer shall be permitted to submit an amended application to participate in the program, designating for set-aside or diversion lands specified by the board under subsection (b)(2).

Subtitle G—Land Removed From Production for Conservation Purposes

PAYMENTS

SEC. 1626. The Secretary of Agriculture (referred to in this subtitle as the "Secretary") is authorized to enter into contracts to provide financial assistance in the form of payments to owners and operators of cropland located in counties where the soil normally freezes to a depth of at least four inches annually who remove such land from agricultural production for a period not to exceed one year for the purpose of installing enduring conservation measures which involve excavation of the soil. The payments under such contracts shall be in such amounts as determined by the Secretary to be necessary to effectuate the purposes of this subtitle but shall not exceed an amount equal to the number of acres of cropland removed from agricultural production for such purpose multiplied by 50 per centum of the typical annual rent paid for similar land in the county. Financial assistance may not be provided under this subtitle with respect to any conservation measure without the approval of the soil and water conservation district board for the district in which the land is located, and may not, in the aggregate, be provided in any year with respect to more than one-half of 1 per centum of the cropland in any county.

AUTHORIZATION OF APPROPRIATIONS

SEC. 1627. There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle, such sums to remain available until expended.

Subtitle H—Agricultural Land Resources

STATEMENT OF POLICY

SEC. 1628. (a) Congress hereby reaffirms that agricultural land is an important natural resource because it provides—

(1) a livelihood for farm families and for people in agriculture-related industries;

(2) a strategically important assurance of enduring national self-sufficiency in food and fiber at a reasonable cost to American consumers and producers; and

(3) agricultural products for export and foreign exchange to improve the international balance of payments and assist in the effort toward world peace.

(b) It shall be the policy of the United States and the intent of Congress that Federal programs be administered, except where precluded by law, in a manner that will not cause the unnecessary, irreversible conversion of agricultural land to nonagricultural uses, and that will not conflict with local or State programs to protect agriculture.

INTERGOVERNMENTAL COOPERATION

SEC. 1629. The Secretary of Agriculture (referred to in this subtitle as the "Secretary") is encouraged to cooperate with other Federal agencies whose programs may influence the conversion of land from agricultural uses, and to encourage those agencies to undertake positive steps leading to development of policies that recognize the importance of limiting the conversion of productive agricultural land to nonagricultural uses.

RECOMMENDATIONS

SEC. 1630. In order that Congress may be better informed of any needed future actions, the Secretary and the Director of the Office of Management and Budget shall submit to Congress, not later than one year following the effective date of this subtitle, recommendations regarding the design and administration of Federal programs in order to assure the retention of productive agricultural land.

TECHNICAL ASSISTANCE TO STATES AND LOCALITIES

SEC. 1631. The Secretary is encouraged to provide technical assistance to any State or locality or qualifying nonprofit organization which desires to develop programs or policies to limit the conversion of productive agricultural land to nonagricultural uses.

AGRICULTURAL LAND RESOURCE INFORMATION

SEC. 1632. (a) The Secretary, through existing agencies or interagency groups, and in cooperation with the cooperative extension services of the States, shall design and implement educational programs and materials emphasizing the importance of productive agricultural land to the Nation's well-being and distribute educational materials through communications media, schools, groups, and other Federal agencies.

(b) The Secretary shall designate one or more agricultural land information centers to serve as central depositories and distribution points for information on agricultural land issues, policies, programs, technical principles, and innovative actions or proposals by local and State governments.

GRANTS; CONTRACTS

SEC. 1633. The Secretary may carry out the purposes of this subtitle, with existing facilities and funds otherwise available, through the use of grants, contracts, or such other means as the Secretary deems appropriate.

Subtitle I—Resource Conservation and Development

CONGRESSIONAL FINDINGS AND PURPOSE

SEC. 1634. (a) The Congress finds and declares—

(1) that the rural areas of the Nation are confronted by critical resource utilization, economic, and environmental problems;

(2) that such problems are the result of—

(A) continually increasing pressures on such rural areas to meet domestic and foreign demand for food, fiber, and wood;

(B) inadequate public and private investment to help formulate and carry out acceptable courses of action necessary to meet the accelerating demands being made on the land and natural resources of the Nation; and

(c) social, economic, and environmental conditions of such complexity that they cannot be effectively dealt with by individual communities in rural areas acting independently of each other; and

(3) that such problems have resulted in and unless changed, will continue to result in the decline of the family farm system, small business enterprise, and job opportunities, as well as a decrease in the amenities and environmental qualities of rural areas throughout the United States.

(b) It is, therefore, the purpose of this subtitle to encourage and assist State and local units of government and local nonprofit organizations in rural areas to plan, develop, and carry out a program for resource conservation and development.

DEFINITIONS

SEC. 1635. As used in this subtitle—

(1) The term "Secretary" means the Secretary of Agriculture.

(2) The term "planning process" means the continuing effort by any State, local unit of government, or local nonprofit organization to develop and carry out effective resource conservation and utilization plans for a designated rural area, including development of an area plan (as defined in paragraph (3)), goals, objectives, policies, implementation activities, and evaluations and reviews, and the opportunity for public participation in such effort.

(3) The term "area plan" means a resource conservation and utilization plan for a designated rural area of a State or States which has been developed through a planning process and which includes one or more of the following basic elements:

(A) a land conservation and utilization element the purpose of which will be to correct maladjustments in land use, to protect agricultural land from imprudent conversion to other uses, to control erosion and sedimentation, and to protect fish and wildlife habitats;

(B) a water management element the purpose of which will be to provide for the conservation and utilization of water, including irrigation and rural water supplies; the mitigation of floods and high water tables; construction, repair, and improvement of dams and reservoirs; improvement of agricultural water management; and improvement of water quality through control of nonpoint sources of pollution;

(C) a community development element the purpose of which will be the development of natural resource based industry, the protection of rural area industries from natural resource hazards, the development of aquaculture and adequate rural area water and waste disposal systems, improvements in recreation facilities, rural housing, adequate health and education facilities, and essential transportation and communication needs; and

(D) other elements such as energy conservation, environmental protection, preservation of unique natural and cultural resources that are appropriate to achieving the goals of the citizens in the designated rural areas.

(4) The term "State" means the several States, the Commonwealth of Puerto Rico, and the Virgin Islands.

(5) The term "local unit of government" means any city, town, township, parish, village, or other general-purpose subdivision of a State, any local or regional special district or other limited political subdivision of a State, including any soil and water conservation district, irrigation, watershed, or drainage district, school district, park authority, and water or sanitary district.

(6) The term "nonprofit organization" means any community association, wildlife group, or resource conservation organiza-

tion that is incorporated and approved by the Secretary for the purpose of providing to any rural area those public facilities or services included in the area plan for such rural area.

(7) The term "technical assistance" means any service provided by the staff members of any agency of the Department of Agriculture, including advising, inventory evaluating, planning, designing, supervising, laying out, and inspecting, and the providing of maps, reports, and other documents associated with the services provided.

(8) The term "financial assistance" means the assistance made available under this subtitle by means of Federal grants and loans.

(9) The term "works of improvement" means the facilities installed or being installed in compliance with the area plan.

RESOURCE CONSERVATION AND DEVELOPMENT PROGRAM

SEC. 1636. The Secretary shall establish a resource conservation and development program under which the Secretary shall make available to States, local units of government, and local nonprofit organizations the technical and financial assistance necessary to permit such States, local units of government, and organizations to operate and maintain a planning process for the development of plans and actions needed to conserve and better utilize land, develop natural resources, and improve and enhance the economic and environmental conditions of rural areas of the United States.

AUTHORITY OF THE SECRETARY OF AGRICULTURE

SEC. 1637. In carrying out the provisions of this subtitle the Secretary may—

(1) provide technical assistance and advice, upon request, to any State, local unit of government, or local nonprofit organization within a designated rural area to assist in developing an area plan for such area;

(2) cooperate with other departments and agencies of the Federal Government, with State and local governments, and with local nonprofit organizations in conducting surveys and inventories, disseminating information, and developing area plans;

(3) assist in carrying out an area plan approved by the Secretary for any rural area by providing technical and financial assistance, including grants and loans, to local public agencies and nonprofit organizations designated to receive such assistance by the Governor or legislature of the State concerned; and

(4) enter into agreements with State agencies, local units of government, and local nonprofit organizations, as provided in section 1638.

AGREEMENTS; TERMS AND CONDITIONS

SEC. 1638. (a) Technical and financial assistance may be provided by the Secretary to any State agency, local unit of government, or local nonprofit organization to assist such agency, unit of government, or organization in carrying out works of improvement specified in an area plan approved by the Secretary only if—

(1) such State agency, unit of government, or organization agrees in writing to carry out such works of improvement and to finance or arrange for financing of any portion of the cost of carrying out such works of improvement not paid by the Secretary under this subtitle;

(2) the works of improvement for which assistance is to be provided under this subtitle are included in an area plan and have been approved by the local units of government to be assisted;

(3) the Secretary determines that assistance to finance the type of works of improvement concerned is not reasonably available to such agency, unit of government, or organization under some other Federal program;

(4) the works of improvement provided for in the area plan for any area are consistent with any existing comprehensive plan for such area;

(5) the cost of land or interest in land acquired or to be acquired under such plan by any State, local unit of government, or local nonprofit organization is borne by such State, unit of government, or organization, except in the case of land or interest in land acquired or to be acquired for the purpose of conserving or protecting fish or wildlife, acquired or to be acquired for public recreational purposes, or acquired or to be acquired to protect the public from a threat to its health and welfare; and

(6) the State, local unit of government, or local nonprofit organization participating in an area plan agrees to maintain and operate any work of improvement carried out under such plan.

(b) Loans made under this subtitle shall be made on such terms and conditions as the Secretary may prescribe, except that such loans shall have a repayment period of not more than thirty years from the date of completion of the works of improvement for which the loan is made and shall bear interest at the average rate of interest paid by the United States on its obligations of a comparable term, as determined by the Secretary of the Treasury.

(c) Assistance may not be made available to any State, local unit of government, or local nonprofit organization to carry out any area plan unless such plan has been submitted to and approved by the Secretary.

IDENTIFICATION OF GROUPS OR PROBLEMS FOR SPECIAL CONSIDERATION IN AREA PLANS

SEC. 1639. Any area plan may identify for special emphasis or assistance under such plan any particular group (including small farm operators, rural poor, or minority groups living in the area covered by such plan), or any particular natural resource or water utilization problem.

SUPPLEMENTAL AUTHORITY OF THE SECRETARY

SEC. 1640. The authority of the Secretary under this subtitle to assist States, local units of government, and local nonprofit organizations in the development and implementation of area plans shall be supplemental to and not in lieu of any authority of the Secretary under any provision of law.

RESOURCE CONSERVATION AND DEVELOPMENT POLICY BOARD

SEC. 1641. (a) The Secretary shall establish within the Department of Agriculture a Resource Conservation and Development Policy Board (hereinafter in this section referred to as the "Board").

(b) The Board shall be composed of seven members appointed by the Secretary. One member of the Board shall be designated by the Secretary to serve as chairperson.

(c) It shall be the function of the Board to advise the Secretary regarding the administration of this subtitle, including the formulation of policies for carrying out the program provided for by this subtitle.

EVALUATION OF PROGRAM

SEC. 1642. The Secretary shall evaluate the program provided for in this subtitle with a view to determining whether such program is effectively meeting the needs of, and the objectives identified by, the States, local units of government, and local nonprofit organizations participating in such program. The Secretary shall submit a report to the Congress containing the results of the evaluation not later than December 31, 1986, together with the Secretary's recommendations for continuing, terminating, redirecting, or modifying such program.

AUTHORIZATION OF APPROPRIATIONS

SEC. 1643. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle, except that not more than $60,000,000 may be appropriated for technical and financial assistance for any fiscal year and not more than $15,000,000 may be appropriated for loans for any fiscal year.

SEPARABILITY PROVISION

SEC. 1644. If a part of this subtitle is invalid, all valid parts that are severable from the invalid part remain in effect. If a part of this subtitle is invalid in one or more of its applications, the part remains in effect in all valid applications that are severable from the invalid part.

Subtitle J—Effective Date; Regulations

SEC. 1645. Except as otherwise provided herein, the provisions of this title shall become effective October 1, 1981.

SEC. 1646. The Secretary of Agriculture shall prescribe such regulations as may be necessary to carry out the provisions of this title.

Mr. JONES of Tennessee. Mr. Chairman, Over the past hours since we began consideration of the farm bill, I have listened to statements by my colleagues describing in vivid terms how seriously depressed economic conditions are in our Nation's farm community. I concur with their remarks, but let us not forget that these conditions are further aggravated by the rapid depletion of our soil resource by soil erosion rates which far exceed rates defined as acceptable by professional soil conservationists.

According to studies made by the Soil Conservation Service, about 4 billion tons of soil is lost annually from the non-Federal lands in the United States with one-half of it coming from cropland. Forty-four percent of the 413 million acres used for cropland in 1977 were on soils with a moderate to very high risk damage by sheet and rill erosion. Some soils lose as much as 100 tons or more per acre per year. Erosion is especially serious on sloping, unprotected cropland. In some areas, a combination of conditions results in deep cavernous gullies that void the land for any productive use.

The Soil Conservation Service studies show an alarming national average of 4.8 tons of soil eroded from each acre of cropland each year. However, even this figure does not portray the seriousness of the problem because it is merely a national average. In many parts of the country the erosion is much higher.

The soil resource of this country is not without limits. This resource is the lifeblood of our Nation and it is vul-

nerable as we have seen in areas where productivity has been reduced to zero by gullies, duststorms, and drought. Despite the fact that we have seen this happen, we are continuing to waste, diminish, and abuse our soil resource. To further aggravate the problem, our prime farmland is being irreversibly converted to highways, shopping centers, airports, housing tracts, and other municipal uses. We are currently losing 3 million acres of agricultural land each year, and about 1 million acres of this total is classified as prime farmland.

No doubt many of my colleagues could cite facts from their own districts that would show that this is a nationwide problem, and we must do something to stop this deplorable waste.

The House Agriculture Committee has included a conservation title in the farm bill which, though it does not solve the total problem, will help to reduce our losses in agricultural land. Title XVI contains several new conservation approaches, including:

A special areas conservation program to identify and correct erosion-related or irrigation water management problems;

A matching grants program with local units of government through State soil conservation agencies;

Loans to farmers and landowners from the Commodity Credit Corporation for natural resource conservation and enhancement;

The use of volunteers in carrying out the natural resources assistance programs of USDA;

A program for testing the feasibility of reducing excessive sedimentation in existing reservoirs;

Financial assistance to eligible parties who remove land from agricultural production for at least 1 year to excavate soil for the purpose of installing enduring conservation measures; and

A resource conservation and development program to aid States, localities, and nonprofit institutions in developing plans to conserve and better utilize land.

These actions will assist in alleviating some of the agricultural problems facing the farm community today.

As we discuss and consider the 1981 farm bill, let us not forget that legislation must consider the protection of our soil resources, or we may be facing a day in the foreseeable future when our farm community will not be able to produce the necessary food and fiber which will keep our Nation in a leadership position.

AMENDMENT OFFERED BY MR. BROWN OF CALIFORNIA

Mr. BROWN of California. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROWN of California: Page 210, strike out line 15 and everything that follows through line 2, page 213 and insert in lieu thereof the following:

SHORT TITLE

SEC. 1628. This subtitle may be cited as the Agricultural Land Resources Policy Act".

FINDINGS, PURPOSE, AND DEFINITIONS

SEC. 1629. (a) Congress finds that—

(1) the Nation's farmland is a unique natural resource and provides food and fiber necessary for the continued welfare of the people of the United States;

(2) each year, a large amount of the Nation's farmland is irrevocably converted from actual or potential agricultural use to nonagricultural use;

(3) continued decrease in the Nation's farmland base may threaten the ability of the United States to produce food and fiber in sufficient quantities to meet domestic needs and the demands of our export markets;

(4) the extensive use of farmland for nonagricultural purposes undermines the economic base of many rural areas;

(5) Federal actions, in many cases, result in the conversion of farmland to nonagricultural uses where alternative actions would be preferred;

(6) the Department of Agriculture is the agency primarily responsible for the implementation of Federal policy with respect to United States farmland, assuring the maintenance of the agricultural production capacity of the United States, and has the personnel and other resources needed to implement national farmland protection policy; and

(7) the Department of Agriculture and other Federal agencies should take steps to assure that the actions of the Federal Government do not cause United States farmland to be irreversibly converted to nonagricultural uses in cases in which other national interests do not override the importance of the protection of farmland nor otherwise outweigh the benefits of maintaining farmland resources.

(b) The purpose of this subtitle is to minimize the extent to which Federal programs contribute to the unnecessary and irreversible conversion of farmland to nonagricultural uses, and to assure that Federal programs are administered in a manner that, to the extent practicable, will be compatible with State, unit of local government, and private programs and policies to protect farmland.

(c) As used in this subtitle—

(1) the term "farmland" includes all land defined as follows:

(i) prime farmland is land that has the best combination of physical and chemical characteristics for producing food, feed, fiber, forage, oilseed, and other agricultural crops with minimum input of fuel, fertilizer, pesticides, and labor, and without intolerable soil erosion, as determined by the Secretary of Agriculture. Prime farmland includes land that possesses the above characteristics but is being used currently to produce livestock and timber. It does not include land already in or committed to urban development or water storage;

(ii) unique farmland is land other than prime farmland that is used for production of specific high-value food and fiber crops, as determined by the Secretary of Agriculture. It has the special combination of soil quality, location, growing season, and moisture supply needed to economically produce sustained high quality or high yields of specific crops when treated and managed according to acceptable farming methods. Examples of such crops include citrus, tree nuts, olives, cranberries, fruits, and vegetables; and

(iii) farmland, other than prime or unique farmland, that is of statewide or local importance for the production of food, feed, fiber, forage, or oilseed crops, as determined by the appropriate State or unit of local government agency or agencies, and that the Secretary of Agriculture determines should be considered as farmland for the purposes of this subtitle;

(2) the term "State" means any of the fifty States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the Trust Territory of the Pacific Islands, or any territory or possession of the United States;

(3) the term "unit of local government" means the government of a county, municipality, town, township, village, or other unit of general government below the State level, or a combination of units of local government acting through an areawide agency under State law or an agreement for the formulation of regional development policies and plans; and

(4) the term "Federal program" means those activities or responsibilities of a department, agency, independent commission, or other unit of the Federal Government that involve (i) undertaking, financing, or assisting construction or improvement projects; or (ii) acquiring, managing, or disposing of Federal lands and facilities. The term "Federal program" does not include construction or improvement projects that on the effective date of this subtitle are beyond the planning stage and are in either the active design or construction stage.

FARMLAND PROTECTION POLICY

SEC. 1630. (a) The Department of Agriculture, in cooperation with other departments, agencies, independent commissions, and other units of the Federal Government, shall develop criteria for identifying the effects of Federal programs on the conversion of farmland to nonagricultural uses.

(b) Departments, agencies, independent commissions, and other units of the Federal Government shall use the criteria established under subsection (a) of this section, to identify and take into account the adverse effects of Federal programs on the preservation of farmland; consider alternative actions, as appropriate, that could lessen such adverse effects; and assure that such Federal programs, to the extent practicable, are compatible with State, unit of local government, and private programs and policies to protect farmland.

(c) The Department of Agriculture may make available to States, units of local government, individuals, organizations, and other units of the Federal Government information useful in restoring, maintaining, and improving the quantity and quality of farmland.

CONFORMATION OF EXISTING POLICIES AND PROCEDURES

SEC. 1631. (a) Each department, agency, independent commission, or other unit of the Federal Government, with the assistance of the Department of Agriculture, shall review current provisions of law, administrative rules and regulations, and policies and procedures applicable to it to determine whether any provision thereof will prevent such unit of the Federal Government from taking appropriate action to

comply fully with the provisions of this subtitle.

(b) Each department, agency, independent commission, or other unit of the Federal Government, with the assistance of the Department of Agriculture, shall, as appropriate, develop proposals for action to bring its programs, authorities, and administrative activities into conformity with the purpose and policy of this subtitle.

Renumber section 1631 as section 1632; section 1632 as 1963; section 1633 as 1634, and add the following four new sections:

REPORT

SEC. 1635. Within one year after the effective date of this subtitle, the Secretary of Agriculture shall report to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives on the progress made in implementing the provisions of this subtitle. Such report shall include information on—

(1) the effects, if any, of Federal programs, authorities, and administrative activities with respect to the protection of United States farmland; and

(2) results of the reviews of existing policies and procedures required under section 1631(a) of this subtitle.

STATEMENT OF LIMITATION

SEC. 1633. (a) This subtitle does not authorize the Federal Government in any way to regulate the use of private or non-Federal land or to affect the property rights of owners of such land.

(b) None of the provisions or other requirements of this subtitle shall apply to the acquisition or use of farmland for national defense purposes.

PROHIBITION

SEC. 1634. This subtitle shall not be deemed to provide a basis for any action, either legal or equitable, by any State, local unit of government, or any person or class of persons challenging a Federal project, program, or other activity that may affect farmland.

EFFECTIVE DATE

SEC. 1635. The provisions of this subtitle shall become effective six months after the date of enactment of this Act.

Mr. BROWN of California (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. BROWN of California. Mr. Chairman, I rise to offer an amendment to title XVI. This amendment augments the agricultural land resources subtitle in H.R. 3603 with the substantive provisions addressing the same matter as already passed by the other body. As amended, the agricultural land resources subtitle would constitute a valuable step toward mitigating the avoidable negative effects of Federal programs and projects on farmland.

I offer this amendment also on behalf of my colleague, Congressman JAMES JEFFORDS, who has worked diligently and persistently in the House to direct our attention to the matter of agricultural land conversion. Coming from California's most rapidly urbanizing district, I share with Mr. JEFFORDS, and many other Members of the House, a deep concern for the viability of agriculture in and around urban or rapidly growing areas. I strongly believe that Federal programs should be administered with a greater degree of sensitivity to the local importance of agricultural land resources both to the farm families who have worked the fields and orchards for generations and for people who sincerely appreciate for a host of reasons the opportunity of living near or around farmland where food and fiber are actually produced. I believe this farm bill should do as much as possible to assure farmers continued access to a productive land base so that agricultural operations can proceed as viable businesses in as many regions of the United States as possible.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I am happy to yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Chairman, I rise as a cosponsor to this amendment.

Many of my colleagues are aware that I have, for several years, supported the establishment of a Federal policy on agricultural land resources—a policy which would minimize the impact that Federal actions and programs have on agricultural land loss.

In January of this year, a study entitled, "The National Agricultural Lands Study," was completed. This report shows that we have many reasons to be concerned about the loss of some of our most productive agricultural lands. These reasons include:

That 1 million acres of prime agricultural land are being lost to nonagricultural uses each year.

The loss of agricultural land could threaten our position as the breadbasket of the world, for by the turn of the century 20 million acres could be lost.

That there are uncertainties whether technological change can lead to the level of increased production that has been experienced in the past.

That if we continue to lose vast acreages of agricultural land and if production does not increase dramatically, domestic food prices will increase significantly by the turn of the century.

"The National Agricultural Lands Study" found that over 90 Federal programs are directly influencing the loss of agricultural land. Our amendment is a relatively simple amendment that will guarantee that Federal agencies review their programs and actions to insure that they are not contributing to the loss of productive agricultural land.

I am pleased that the Secretary of Agriculture supports the establishment of formal national policies for protecting agricultural lands on the part of Federal agencies. I want to quote from a letter from Secretary Block, dated March 25, 1981:

I am currently considering suggestions from within USDA on ways to incorporate particular recommendations of the National Agricultural Lands Study in the 1981 Farm Bill. Generally, these suggestions address the need for formal national policies for protecting agricultural lands on the part of Federal agencies and the need for the monitoring of these policies and their implementation.

I ask that my colleagues join me in passing this amendment that will assure that the Federal Government gets its house in order.

Mr. BROWN of California. I appreciate the remarks of the gentleman. As a matter of fact, in my remarks I had wanted to designate this amendment as the Brown-Jeffords amendment, if the gentleman does not object.

Mr. JEFFORDS. I most certainly do not object.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. BROWN of California. I certainly yield to my distinguished chairman.

Mr. DE LA GARZA. I would like to verify with the gentleman the intent of the limitation which provides that this amendment would not in any way regulate the use of private or non-Federal land or to affect the property rights of owners of such land.

Mr. BROWN of California. I might say to the gentleman that that is exactly correct. That language is specifically set forth in the version offered by the other body which I am offering and does not occur in the House language, and is an improvement in that respect.

Mr. DE LA GARZA. It provides that there would be none of what we would call Federal land use or Federal land use planning affecting private property or ownership?

Mr. BROWN of California. The gentleman is absolutely correct. I am sure that he is well aware that while there is some interest in trying to improve the planning of agricultural or nonagricultural land in this country, that efforts to achieve that have certainly not gone anywhere in the past.

The focus of this amendment, and it is mainly exhortation, is to have the Federal Government not engage in any practices which would go contrary to the agricultural land preservation programs that are being administered by State or local government, to slow down as much as possible the rapid removal of prime farmland from agricultural use.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. BROWN).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. JONES OF TENNESSEE

Mr. JONES of Tennessee. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. JONES of Tennessee: On page 205, line 16, strike out "Volunteers for Conservation" and insert in lieu thereof "Volunteers for Department of Agriculture Programs".

On page 205, lines 20 and 21, strike out "natural resources assistance".

On page 206, line 3, insert immediately after "employee of the Department of Agriculture" the phrase "including the local, county, and State committees established under section 8 of the Soil Conservation and Domestic Allotment Act".

□ 1515

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. JONES of Tennessee. I yield to my distinguished friend, the ranking minority member of the subcommittee.

Mr. JEFFORDS. I just want to say that we have reviewed the amendment and believe it is an appropriate change, and we would enthusiastically endorse the amendment.

Mr. JONES of Tennessee. I thank the gentleman.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. JONES of Tennessee. I yield to my chairman.

Mr. DE LA GARZA. Mr. Chairman, in behalf of the committee, we have no objection to the amendment.

Mr. JONES of Tennessee. I thank the gentleman.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. JONES of Tennessee. I yield to the gentleman from Kansas.

Mr. GLICKMAN. Just for the edification of the Members here, would the gentleman tell us what the amendment does?

Mr. JONES of Tennessee. I would be glad to, and I will take just as little time as I possibly can.

Mr. Chairman, this amendment would expand the agencies in the Department of Agriculture that would be authorized to accept volunteers to assist in operating their programs. As presently worded, section 1618 is restricted to volunteers for the natural resources assistance programs.

For several years some of the USDA agencies have sought legislation which would allow them to accept the services of volunteers in providing visitor and other services for programs and at facilities they administer. For example, the Agricultural Research Service would find this authority particularly useful at the U.S. National Arboretum where the visitor level exceeds 500,000 annually and at the Beltsville Agricultural Research Center where 20,000 or more individuals visit the Center annually. In the case of the U.S. National Arboretum, one traditional characteristic of all arboretums and botanic gardens is the utilization of volunteers and docents to provide for scholarly assistance to visitors. Not only does this provide a corps of capable people to augment the professional staff of the arboretum but it offers to talented people an opportunity to put their skills to use.

The bill makes it clear that the volunteers would serve without compensation and would not be used to displace any employee.

I have been informed that the Department supports this amendment, and I urge its adoption.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Tennessee (Mr. JONES).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. VOLKMER

Mr. VOLKMER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. VOLKMER: At the end of the bill, add the following new title XVII:

SEC. 1. Section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended by striking all that precedes the semicolon in the first sentence of subsection (b) and inserting in lieu thereof the following:

"The price of honey shall be supported for the 1982 through 1985 crop years through loans, purchases, or other operations at a level not in excess of 90 per centum nor less than 50 per centum of the parity price thereof.".

Mr. VOLKMER. Mr. Chairman, the amendment I offer relates to the honey price support activities of the U.S. Department of Agriculture. It will lower the minimum support level to 50 percent of parity. The ASCS has projected that we will experience a problem with the honey program over the next 5 years—namely that the price support level is likely to exceed the world price. This, plus the displacement of some domestic production by honey imports will result in CCC acquisitions and increasing program costs.

Mr. Chairman, under present law, the price support for honey is mandatory at not less than 60 percent, nor more than 90 percent of parity. Support has been maintained at the minimum level of 60 percent since 1973. However, the honey support price for 1981 is above the present market price and this situation should persist for the foreseeable future, according to the Department of Agriculture.

Mr. Chairman, as that is occurring, the loan activity will increase and over the next 5 years it is expected to double from the present level. CCC will probably begin to acquire honey during fiscal year 1981. And, then CCC acquisitions can be expected to increase from 2 million pounds this year to 15 million pounds in fiscal year 1985 and that will affect expenditures.

Mr. Chairman, net expenditures for the support program were −$1.7 million in fiscal year 1979 and $8.7 in fiscal year 1980. In fiscal year 1981, net expenditures are projected at $5.9 million. Assuming that CCC owned honey can be sold to the school lunch program, net expenditures are expected to rise to $15.2 million in fiscal year 1985.

Mr. Chairman, I urge the adoption of my amendment. It continues the program, in fact it mandates a honey program. What it allows is the Secretary of Agriculture to operate the honey support program at not less than 50 percent of parity but not more than 90 percent of parity. It will reduce Government expenditures in the next 4 years.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. VOLKMER. I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, I appreciate the gentleman yielding, but I must object to the amendment, in spite of the deep admiration and respect I have for the gentleman from Missouri.

The problem is that the honey support program is operating well. We are having some problems with imports. The reason behind this amendment is to lower the support price by 10 parity points, which in the long term would save us some $17 million. In the context of this multibillion dollar budget that we are working with, to disrupt a program which has worked so well and to disrupt the economic factor which the beekeepers or bee raisers are working under, without having had any hearings to assess the full impact that it could have on this small but important segment of agriculture, might not be the wise thing to do at this time.

For that reason, I would hope that my distinguished colleague would withdraw his amendment and allow us to take a further look at this situation.

Mr. VOLKMER. Mr. Chairman, I would like to inquire of the gentleman from Texas if it would be possible that perhaps we could conduct hearings as to the implications of reducing the support level, not only on the beekeepers, but also on the impact that we are now having of imports on honey producers or the beekeepers of this country. Perhaps we could have the hearings yet this year, with planned activities the first part of the year.

Mr. DE LA GARZA. I appreciate the gentleman's interest in that respect, and I concur with him. I certainly would urge the appropriate subcommittee to take a very close and detailed look at this matter because it is an important matter and it should be addressed. I am hopeful, and I can almost assure the gentleman, that this would be done.

Mr. VOLKMER. I thank the gentleman.

Mr. Chairman, I ask unanimous consent to withdraw the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

The CHAIRMAN. Are there additional amendments to title XVI?

AMENDMENT OFFERED BY MR. EVANS OF IOWA

Mr. EVANS of Iowa. Mr. Chairman, I offer an amendment that would add an additional title.

The Clerk read as follows:

Amendment offered by Mr. EVANS of Iowa: Page 222, after line 25, add the following new title:

TITLE XVII—CONTINUATION OF FEDERAL CROP INSURANCE PILOT PROGRAMS

Section 107(b) of the Federal Crop Insurance Act of 1980 is amended by adding at the end thereof the following: "Notwithstanding any other provision of this section; for the purpose of providing data on the comparative costs of selling and servicing crop insurance by various delivery systems, the Corporation shall for the crop years 1982, 1983, 1984, and 1985 continue its pilot program of making crop insurance available at selected county offices of the Agricultural Stabilization and Conservation Service. The Secretary of Agriculture shall be February 1, 1985, report to Congress on the comparative costs of all delivery systems used in crop years 1981 through 1984.".

Mr. EVANS of Iowa. Mr. Chairman, I submit this amendment on behalf of the gentleman from Kansas (Mr. ROBERTS) and myself. This amendment would direct the Department of Agriculture to continue for 4 years its present pilot program of making Federal crop insurance available through selected county offices of the Agriculture Stabilization and Conservation Service.

The 1980 Federal Crop Insurance Act provided for not less than 25 such pilot programs across the country, to be continued through the 1985 crop year. Some of these pilot programs were initiated in selected county ASCS offices for the 1981 crop.

Now the Federal Crop Insurance Corp. states that it intends to terminate those pilot programs in county offices at the end of this crop year. While termination of these pilot programs is probably technically legal, given the peculiar wording of the 1980 act, termination at this time does not seem to be in the public interest or in keeping with congressional intent of the 1980 act.

Mr. JEFFORDS. Mr. Chairman, will the gentleman yield?

Mr. EVANS of Iowa. I yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Chairman, I would just like to say that I have reviewed the amendment. Certainly from the perspective of my position on the subcommittee dealing with this problem, I have no objection to the amendment.

Mr. EVANS of Iowa. I appreciate the support of the gentleman.

Mr. JONES of Tennessee. Mr. Chairman, will my colleague, the gentleman from Iowa, yield to me?

Mr. EVANS of Iowa. I would be pleased to yield to my chairman.

Mr. JONES of Tennessee. I thank the gentleman for yielding, and I want to say that I have no objection to the amendment being offered by the gentleman.

Mr. Chairman, this is an amendment to the Federal Crop Insurance Act which was amended and updated in 1980. That bill was sponsored by my friend, Representative ED MADIGAN, and myself.

This amendment would continue a pilot program which was begun by the previous administrations to test the idea of delivering crop insurance through the ASCS offices.

The data received from that pilot program so far has been interesting but inconclusive. The issue of which delivery system is most desirable and efficient remains very controversial as the subcommittee learned in hearings a few weeks back.

Since many questions on this issue remain, I have no objections to continuing the pilot program. Therefore, I have no objections to the amendment.

Mr. EVANS of Iowa. I appreciate the support of the chairman of the subcommittee.

Mr. ROBERTS of Kansas. Mr. Chairman, will the gentleman yield?

Mr. EVANS of Iowa. I yield to the gentleman from Kansas.

Mr. ROBERTS of Kansas. I thank my colleague and friend, the gentleman from Iowa, for yielding. I wish to also thank him for allowing me to be a coauthor of this amendment. As my friend and colleague knows, we have a new concept of Federal crop insurance now going into place, but we also have some problems with this program. As my chairman and colleague, the gentleman from Tennessee (Mr. JONES), has indicated, he has been holding oversight hearings. This is no time to terminate the pilot program without our ASCS offices. As a matter of fact, it is an excellent opportunity to keep this pilot program intact, and I wish to echo the sentiments of my colleague from Iowa and again thank him for providing us this leadership in this direction.

Mr. EVANS of Iowa. I appreciate the support of the gentleman from Kansas.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa (Mr. EVANS).

The amendment was agreed to.

AMENDMENT OFFERED BY MR. HANCE

Mr. HANCE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HANCE: Page 222, after line 25, insert the following new title:

TITLE XVII—CONFERENCE

WHITE HOUSE CONFERENCE ON AGRICULTURE

SEC. 1701. (a) The President is requested to call a White House Conference on Agriculture to be held not later than one year after the date of the enactment of this Act.

(b) The purpose of the White House Conference on Agriculture shall be to study current problems in the agricultural sector of the economy and to develop recommendations regarding short-term and long-term solutions to such problems.

(c) Members of the White House Conference on Agriculture shall be appointed by the President from among—

(1) heads of organizations comprised of producers of agricultural commodities,

(2) representatives of the banking industry,

(3) representatives of businesses which provide services, or produce goods, used by producers of agricultural commodities,

(4) heads of organizations representing the interests of consumers, and

(5) producers of agricultural commodities.

(d) A report of the White House Conference on Agriculture shall be submitted to the President and to the Congress not later than one year after the members of such Conference are first appointed.

Page 3, insert the following immediately before line 1:

TITLE XVII—CONFERENCE

Mr. HANCE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. HANCE. Mr. Chairman, this amendment requests the White House to call a White House Conference on Agriculture.

I think the problems that we see in agriculture are very severe. At the present time, there are probably millions of Americans who really do not recognize these problems. This conference would propose recommendations for short-term and long-term solutions to the problems we face in agriculture.

Mr. DASCHLE. Mr. Chairman, will the gentleman yield?

Mr. HANCE. I yield to the gentleman from South Dakota.

Mr. DASCHLE. Mr. Chairman, I think this is an excellent idea. Just in the last couple of weeks, as we have debated this bill, if we use the Department of Agriculture statistics, we find that more than 1,000 farm families are leaving the farm each week. I think we need to be able to talk about those trends in a far more effective way than we have done in recent years, and I think this amendment certainly deserves the support of the House.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. HANCE. I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, I would like to thank the gentleman from Texas for his splendid idea. I

think it is something that ought to be done, and I would hope and respectfully request that the President would do so. I certainly would approve and, in our behalf, I accept the gentleman's amendment.

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. HANCE. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Mr. Chairman, I think it is a good idea. But I just want to sound a word of warning, because I have just been through one of these in the last 3 or 4 years with small business. What happened there will probably happen here, if the committee does not stay on top of it.

What happened was that they tried to structure the local conferences that they were having in which they selected delegates by reducing the number that could attend. In Los Angeles, they held it in a room that only held 400 people, and the only 400, then, who were permitted to attend were the people that they wanted to have there.

So it is terribly important that you compel them, if they have a conference, to open up these local meetings, let anybody come who wants to, and let them have a free election to elect their own delegates. Otherwise all you will get is a White House conference of selected people. I just hope that you will stay on top of this, if this becomes a reality.

Mr. HANCE. Mr. Chairman, I appreciate the gentleman's recommendation. I visited with the gentleman earlier about this, and I think it is a very important point. We will keep that in mind, and we will stay on top of it.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. HANCE. I yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Chairman, I would just like to echo that. We have had four White House conferences in the last few years. We had one on small business, families, children, youth, and now aging. For the most part, they have not been terribly productive on producing legislative solutions, but have been useful in providing revenues for Xerox and for duplicating companies. The recommendations have not been taken very seriously.

All the gentleman is doing in his amendment is requesting one. I hope that the President honors the gentleman's request. I hope it has a little more meat—excuse the pun—than some of the other ones that we have had.

Mr. HANCE. I appreciate the gentleman's support.

□ 1530

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. HANCE).

The amendment was agreed to.

The CHAIRMAN. Are there additional amendments to the bill?

AMENDMENT OFFERED BY MR. DASCHLE

Mr. DASCHLE. Mr. Chairman, I offer an amendment which would be incorporated in a new section of the bill.

The Clerk read as follows:

Amendment Offered by Mr. DASCHLE: Page 3; immediately before line 1, insert the following new item:

"TITLE XVII—EXAMINATION, INSPECTION, AND LABELING REQUIREMENTS FOR IMPORTED MEAT".

Page 222, after line 25, add the following new title:

TITLE XVII—EXAMINATION, INSPECTION, AND LABELING REQUIREMENTS FOR IMPORTED MEAT.

SEC. 1701. Section 20(a) of the Federal Meat Inspection Act (21 U.S.C. 620(a)) is amended by inserting "(1)" after "(a)", and by adding at the end thereof the following:

"(2) Any carcass, part of a carcass, meat, or meat food product described in paragraph (1) (or container or package thereof) which is imported into the United States, and any meat food product (or container or package thereof) made in whole or in part of any such imported meat, shall be labeled 'Imported From ————', 'Contains Meat Imported From ————', or 'May Contain Meat Imported From ————', as the case may be, with the blank space to be filled in with the name of the country of origin. The first sentence of this paragraph shall not apply if the carcass, part of a carcass, meat, or meat food product (or the container or package thereof) is required to be marked or labeled to show the country of origin in accordance with regulations prescribed under paragraph (1).

"(3) If a person cuts any carcass, part of a carcass, meat, or meat food product into pieces (or breaks a container or package containing any of such articles) other than to prepare it for ultimate consumption, and such carcass, part of a carcass, meat, or meat food product (or such container or package) is marked or labeled under paragraph (1), (2), or (4)(C)(ii), such person shall mark or affix a label to each of such pieces (or the container or package containing any of such pieces) to supply the information which was so provided before it was cut (or broken).

"(4)(A)(i) No carcass or part of a carcass described in paragraph (1) may be imported into the United States unless such carcass or part of a carcass, including the internal organs (or samples from such internal organs) of the animal from which such carcass or part came, is examined and inspected at the port of entry to determine that such carcass or part is not adulterated.

"(ii) No meat or meat food product described in paragraph (1) (or container or package thereof) may be imported into the United States unless such meat or meat food product is examined and inspected at the port of entry to determine that such meat or meat food product is not adulterated.

"(B) Any examination or inspection conducted under this paragraph with respect to any carcass, part of a carcass, meat, or meat food product, shall include the equivalent of at least one core test for every fifty pounds thereof (irrespective of whether the article is fresh, chilled, frozen, or cured), except that, in the case of cans or other sealed containers thereof, such examination or inspection shall be conducted using such methods as the Secretary shall by regulation prescribe.

"(C)(i) Notwithstanding subsection (b), the Secretary shall, in accordance with such regulations as the Secretary shall prescribe, dispose of any article determined under this paragraph to be adulterated by selling such article as tankage or fertilizer.

"(ii) Any article determined under this paragraph not to be adulterated shall be labeled "Prime", "Choice", "Standard", or "Utility", as the case may be, in accordance with such regulations as the Secretary shall prescribe, to indicate the grade of such article.

"(D) Any examination, inspection, or labeling required under this paragraph shall be performed by inspectors appointed for that purpose by the Secretary.

"(E) For purposes of subparagraph (A)(i), the term 'internal organs', as used with respect to an animal, means the liver, heart, kidneys, lungs, and spleen of such animal.

"(5)(A) The Secretary shall prescribe such assessments and fees on imported carcasses, parts of carcasses, meats, and meat food products as the Secretary determines necessary to cover the costs of inspection, examination, marking, and labeling, under this section.

"(B) In establishing the level or rate of assessments and fees to be imposed under this paragraph, the Secretary shall take into consideration the volume of imports into the United States of the articles to which this section applies, the value of such imports, and such other factors as the Secretary determines appropriate.

"(C) No carcass, part of a carcass, meat, or meat food product (or container or package containing any of such articles) as to which an assessment or fee is levied under subparagraph (A) shall be released from customs custody unless the foreign plant exporting such carcass, part of a carcass, meat, or meat food product (or container or package containing any of such articles) to the United States pays, in accordance with such regulations as the Secretary shall prescribe, such assessment or fee.".

SEC. 1702. The amendments made by section 1701 shall become effective one hundred and eighty days after the date of the enactment of this Act.

Mr. DASCHLE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from South Dakota?

Mr. FRENZEL. Mr. Chairman, reserving the right to object, has the gentleman had his amendment in the RECORD and is it available for the membership or should we have it read?

Mr. DASCHLE. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from South Dakota.

Mr. DASCHLE. The first version of the amendment was introduced last week. The version to be considered right now was introduced yesterday and is in yesterday's CONGRESSIONAL RECORD.

Mr. FRENZEL. The gentleman had one in the RECORD before and the gentleman entered one yesterday, and the gentleman from Oklahoma has had three or four versions floating by. We are shooting at a moving target, so the gentleman is making it a little difficult for the House to follow.

Mr. DASCHLE. I appreciate the gentleman's concern. I do not have the exact reference, but I know that the gentleman can find it under the "Amendments Introduced" section of the CONGRESSIONAL RECORD.

Mr. FRENZEL. Based on my confidence in the gentleman to explain his amendment with perfect precision, Mr. Chairman, I will withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

Mr. DASCHLE. Mr. Chairman, one of the remaining concerns that many of us have in agriculture is the current quality and quantity of imported meat coming into this country.

In 1980, the United States imported $2.3 billion of imported meat and meat products. Beef imports accounted for about $1.8 billion. Pork, $1.46 million and other meats, $75 million.

Of the imports that we do bring into the country, 81 percent come from two countries, Australia and New Zealand. The United States currently buys about 60 percent of Australia's total meat exports, about $700 million worth.

At the same time, we only exported about 890 million dollars' worth of meat last year.

A serious problem exists, however, Mr. Chairman, in that all of this imported meat is not subjected to adequate inspection standards or labeling. And that fact has caused serious problems for both American producers and American consumers.

Currently there are approximately 1,150 foreign establishments that are certified to export meat into this country. However, even though countries in which these establishments are located must have inspection standards that must be equivalent to those of the United States, the United States has only 17 USDA inspection analysts in foreign plants. Their requirement in many cases is only to inspect those plants twice a year, although those of the moderate export levels have a requirement of four times a year. The problems that we have seen as a result of those very limited inspection requirements are overwhelming.

The USDA right now has no authority to require that imported meat products be labeled with its country of origin if it is processed here. There is no way we have of knowing which country is the source of the meat we eat under current law. Given the grossly inadequate inspection and enforcement standards, the American people have no way of knowing what level of quality meat they are consuming. There are no grading requirements, there are grossly inadequate enforcement procedures.

So what happens?

Recently we saw in an article in the Washington Post what happens. When meat in containers marked for export to the United States from Australia was analyzed, we found in one set of samples that 24 of those products were horsemeat, 16 were kangeroo, and 5 were beef.

Mr. Chairman, what my amendment does is very simple. It requires a much improved standard for testing of imported meat. Through the use of multiple core tests and inspection at the port of entry, consumers and producers would at last be confident of getting quality meat.

It requires labeling as to the origin of the production of that meat. Perhaps more than anything else, the American people have a right to know where the meat they buy is coming from. Finally it requires grading. It requires the same grading standards as those in the United States.

I think it is an excellent improvement in the way in which imported meat is currently handled and I certainly urge passage of the amendment. The time has come when this Congress must recognize the dire need there is for vast improvements in meat import policy.

The CHAIRMAN. The time of the gentleman from South Dakota (Mr. DASCHLE) has expired.

(At the request of Mr. KAZEN and by unanimous consent, Mr. DASCHLE was allowed to proceed for 3 additional minutes.)

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. DASCHLE. I yield to the gentleman from Texas.

Mr. KAZEN. I thank the gentleman for yielding.

Mr. Chairman, year after year unsuspecting Amercan consumers open up their daily newspapers to learn that this Nation has once again been victimized by unscrupulous meat exporters in other countries. We are to the point where it is hardly even surprising to hear about the discovery of another shipment of contaminated beef or even horse meat.

It now appears that we have been the target of Australian exporters seeking to dump kangaroo meat on the United States in the guise of boneless beef. This is clearly unacceptable treatment of our consumers and also to our food and livestock industries, whose reputations can be damaged by these occurrences which are beyond their control.

It is time to act and approve the Daschle amendment to require labeling of imported meat. We are told there is opposition to the amendment because such a recordkeeping system would be expensive and, in any case, the Department of Agriculture is taking steps to see that it will not happen again. Mr. Chairman, I appreciate what the Department of Agriculture is doing, but I am concerned that this is a case of too little and too late.

I applaud the USDA inspector who last July pulled three suspicious frozen blocks of so-called boneless beef off the line because of their dark color and stringy appearance, which proved to be horsemeat. But I also note that since January 1, about 815,000 pounds of so-called boneless beef have been imported into the United States from the same Australian facility. According to USDA, about 7,000 pounds of one shipment from the same facility was consumed by customers of a fast-food restaurant chain.

I am not sure what these people ate in their tacos and burgers, but I believe as paying customers they deserved to know they were eating something other than American beef, whatever it was.

Now let us see what this amendment says. First, it simply orders that imported meat shall be labeled "imported from (blank), contains meat imported from (blank) or may contain meat imported from (blank)." What in the world is unfair about that? Is this not truth in labeling? It simply gives away the secret of the origin of food bought and paid for by the consumer.

If that carcass is cut up, the pieces are labeled. what is so confusing or complicated about that?

It says that no meat may be imported into the United States unless it is examined and inspected and graded.

The operator at the site of consumption would simply post a sign or show on the menu that imported meat is being served. There should be no objection to this—some operators may be proud of it. It does not mean that the food is good or bad, but it does give the customer an even break.

The same thing applies to stores where American homemakers pay their hard earned money for meat. Foreign meat should undergo the same detailed inspections as domestic beef, but the sad fact is that it does not, and some of these exporters seem to know when the inspectors are coming in for spot checks. That does not make all imported meat bad, of course, but neither does it make it domestic beef. It may be just as good as our own beef, but American homemakers deserve to know difference.

This labeling would lead to some of these exporting countries being a little more careful about what they allow to be shipped to the United States. In the end, I think we would all win. I support the amendment and encourage all Members to support it.

Mr. DASCHLE. I thank the gentleman for his comments.

The basic proposals we are making here are: No. 1, foreign meat producers ought to be meeting the same inspection standards that are applied to domestic producers, and, No. 2, that the consumers as well as everyone else ought to have the right to know the origin of the meat that is being produced.

That is the essence of this amendment and certainly I think that the gentleman makes some very excellent points.

I yield back the balance of my time.

AMENDMENT OFFERED BY MR. ENGLISH AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. DASCHLE

Mr. ENGLISH. Mr. Chairman, I offer an amendment as a substitute for the amendment offered by the gentleman from South Daktoa (Mr. DASCHLE).

The Clerk read as follows:

Amendment offered by Mr. ENGLISH as a substitute for the amendment offered by Mr. DASCHLE: Page 222, after line 25, add the following new title:

TITLE XVII—IMPORTED MEAT

SEC. 1701. Section 20 of the Federal Meat Inspection Act (21 U.S.C. 620) is amended by adding at the end thereof a new subsection (f) as follows:

"(f) Notwithstanding any other provision of law, all carcasses, parts of carcasses, meat and meat food products of cattle, sheep, swine, goats, horses, mules, or other equines which are capable of use as human food offered for importation into the United States shall be subject to the inspection, sanitary, species verification and residue standards applied to such articles produced in the United States. Neither shall any meat or meat food products be imported which have been produced using agricultural chemicals or animal drugs, the use of which, in the direct production of such meat products, (1) has been prohibited in the United States for reasons of health or safety by final judicial action or by administrative action that is final, subject to judicial review, and that has become effective, or (2) has been determined by the Secretary to render such articles adulterated within the meaning of this Act: *Provided*, That the President may set aside the application of clause (1) of this provision to the importation of any meat or meat food products if the President finds that it will have the specific effect of causing serious damage to the exportation of agricultural products from the United States, and reports such factors, facts, concerns and findings that led him to such a determination to the Congress at least 10 days before such action becomes effective.

The Secretary shall inspect such articles through the use of random sampling for such residues and species verification. The provisions of this subsection shall not be deemed to permit the imposition of standards with respect to such imported articles that are less stringent than standards imposed under the other subsections of this section. The Secretary shall issue such regulations as are necessary to carry out the provisions of this subsection. The provisions of this subsection shall become effective 30 days after the date of enactment of this subsection, except that the provisions of clause (1) of the third sentence shall become effective one year after such date of enactment and, thereafter, on the same date that a prohibition becomes effective with respect to the use of an agricultural chemical or animal drug in the domestic production of such meat products: *Provided*, That if the prohibition becomes effective with respect to such domestic production less than six months after the issuance of the administrative or court order, as applicable, the provisions of clause (1) of the third sentence shall become effective with respect to imported meat products six months after such order."

Mr. ENGLISH. Mr. Chairman, I think that all the Members are fully aware of the fact that this is an amendment that is strongly supported by the American Cattlemen's Association, mainly because of the fact that they seek equity and fairness. Not because of any expectation that this amendment is going to eliminate imports or even reduce imports, but simply equity and fairness.

What is fair for the American cattlemen certainly should be fair for the foreign producer who ships his meat into this country.

I wanted to include as my statement on behalf of this measure not a message from the American Cattlemen's Association, but rather a message from the Community Nutrition Institute, the Congressional Watch, the Consumer Federation of America, all consumer groups.

This is a copy of the letter that they sent to me, which I think does a good job of describing this bill and outlining its provisions, not only from the standpoint of the cattlemen, but also from the standpoint of the consumer.

□ 1545

COMMUNITY NUTRITION INSTITUTE,
Washington, D.C., October 19, 1981.

Hon. GLENN ENGLISH,
House of Representatives,
Washington, D.C.

DEAR REPRESENTATIVE ENGLISH: The consumer organizations signed below, representing a broad spectrum of consumers across the country, are writing to express our strong support for your amendment to H.R. 3603, the Food and Agriculture Act of 1981, which would ensure that American consumers would no longer be exposed to imported meat that was produced using agricultural chemicals or animal drugs that have been prohibited in the United States.

Under existing law, meat which has been produced in a foreign country using chemicals or drugs which are banned in the U.S. can be exported to this country, and will be consumed by the American public, unless residues are detected at the port of entry by U.S. meat inspectors. Yet since residue analysis is conducted on only a tiny fraction of the total volume of imported meat, most meat containing such potentially harmful residues will enter the U.S. food supply totally unobstructed. In addition, the residue analysis procedures themselves are often not designed to detect residues of hazardous chemicals used abroad but not in the U.S. Finally, since residue analysis customarily takes as much as several weeks to complete, the original violative meat that is detected will unavoidably enter the U.S. food supply (while future shipments from the meat exporter in question will be monitored more closely). Without any doubt, the existing consumer safeguards against hazardous chemicals in imported meat are inadequate; the English Amendment would greatly strengthen these consumer safeguards and significantly increase the integrity of the meat supply.

A case in point is the chemical hexachloroethane which, for some years, was applied to meat animals in the U.S. to kill certain parasites. After a National Cancer Institute Study determined that hexachloroethane was a carcinogen, the Food and Drug Administration withdrew the regulatory approval for its use, effectively banning the chemical. Yet hexachloroethane is reported to be used in certain foreign countries, including some who export significant amounts of meat to the U.S. Thus it is likely that American consumers are routinely being exposed to this carcinogenic chemical.

The Administration and others have alleged that the English Amendment would constitute a barrier to international trade, but, as the above example makes clear, the only trade which conceivably could be affected would be that of meat which was produced using drugs or chemicals positively determined by our health authorities to be hazardous. Clearly, this is trade that the American public can do without. In addition, the English Amendment includes a provision which permits the foreign users of such hazardous chemicals up to one year to either find an alternative or to stop using the chemicals altogether, thus blunting any trade disruption the amendment could possibly cause.

As representatives of the consumer interest, we are clearly mindful of the economic as well as the health and safety aspects of any legislative proposal concerning the trade of food commodities. In this particular case, however, we feel very strongly that any negative economic repercussions from the English Amendment would, because of the one-year time lag provision, be either very small or non-existent and, more importantly, come only from calling an appropriate halt to the importation of meat which has been produced through the deliberate use of chemicals that the U.S. considers to be hazardous.

Once again, we wish to express our strong support for the English Amendment to H.R. 3603. Please contact us if we can provide you with any additional information on the subject.

Sincerely,

ELLEN HAAS,
Director, Consumer Division,
Community Nutrition Institute.
CAROLYN BRICKEY,
Congress Watch.
STEVEN BROBECK,
Executive Director,
Consumer Federation of America.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

(At the request of Mr. GLICKMAN, and by unanimous consent, Mr. ENGLISH was allowed to proceed for 3 additional minutes.)

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I would be glad to yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Chairman, I would like to ask just a couple questions, because I want to make sure that we do not have any problems vis-a-vis trade, that this is not an attempt to just increase the difficulty of imports which could cause problems on our ability to sell overseas.

As I understand what the gentleman is trying to do, which is much different than the Daschle amendment, what the gentleman is trying to do is to ban the import of meat which contains chemicals or drugs banned in the United States. Thus, if a cattleman in Newkirk, Okla., could not use a drug to feed, or a chemical to feed livestock in this country, what the gentleman is saying is that we should not import livestock that contains a banned drug or chemical.

Mr. ENGLISH. The gentleman is absolutely correct. As I have stated, what we are looking for is equity across the board. If a chemical is allowed to be used in the United States, certainly it can be used abroad. If there is a certain limitation on the amount of chemical used in the United States, it can be used abroad.

Mr. GLICKMAN. Now, the second thing is that if the FDA or if another Government agency has not ruled on a chemical or a drug, then that would not be grounds for barring the livestock from coming in or the meat products from coming in.

Mr. ENGLISH. The gentleman is absolutely correct. It has to be prohibited and banned in this country in order to apply.

Mr. GLICKMAN. My third thing is this. What if we have a trade problem where let us say we have relationships with another country, like Mexico or Japan, and let us say we are worried about a bilateral reciprocal trade arrangement and let us say that the President or the Secretary might say, "Well, this sounds reasonable on its face, but we could have a problem with Japan or with Mexico or whatever."

Would the Secretary or the President under the gentleman's amendment have any discretion to in fact permit the entry of those products?

Mr. ENGLISH. The President would indeed have the authority to set aside the provisions of this amendment if he is certain that there would be an effect detrimental to the export of American agricultural products.

Mr. GLICKMAN. I kind of have mixed feelings about this. I think I am going to support the amendment. The way I feel about it is that if in fact the chemicals cannot be used in this country or are banned for health reasons and if we import meat that contains the same chemicals, that it is probably not fair; but at the same time I do not want to give the President discretion to waive that if it is going to cause a trade war, because we in agricultural countries spend nothing more than months and years in efforts to try to increase our exports. We do not want to do anything that will harm that particular phase of the situation.

I look at this amendment a little bit like when we import cars from Japan or from wherever. We make sure they meet our pollution control and emissions requirements as well as our fuel economy requirements.

I guess the biggest concern I have is would this in any way jeopardize our trade relationships, and the gentleman has given the President an out in this regard.

Mr. ENGLISH. If it is good for imported cars, it ought to be good for imported food.

The CHAIRMAN. The time of the gentleman from Oklahoma has again expired.

(At the request of Mr. KAZEN, and by unanimous consent, Mr. ENGLISH was allowed to proceed for 2 additional minutes.)

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I would be happy to yield to the gentleman from Texas.

Mr. KAZEN. Mr. Chairman, first let me ask the gentleman this question. Does the gentleman's amendment have anything to do with the labeling of meat imported into this country?

Mr. ENGLISH. It does not.

Mr. KAZEN. Well, I cannot understand why the gentleman offers it as a substitute for the amendment sent up by the gentleman from South Dakota, since his deals with labeling and that of the gentleman in the well does not. I want to support both the gentleman's idea and the labeling idea, but I cannot do it because the gentleman's amendment does not cover labeling.

Mr. ENGLISH. I certainly understand the gentleman's dilemma.

Let me say that my heart is certainly with the gentleman's cause as far as labeling. I, too, would like to see such a provision; but I think the gentleman recognizes and knows full well that such a labeling provision through this Congress is probably virtually impossible. At this point, I think we are going to have a fight on our hands.

Mr. KAZEN. Impossible?

Mr. ENGLISH. That is correct, given the present attitude.

Mr. KAZEN. Impossible to let the people of this country know that they are consuming imported goods?

Toyota is imported from Japan. Volkswagen is imported from Germany. Everything that is imported that we use has a mark, "Made in." What is so different about the food that we consume being labeled as imported from some country?

Mr. ENGLISH. I would say to the gentleman that it is not the food. It is the Congress of the United States.

Mr. GLICKMAN. Mr. Chairman, would the gentleman yield on that point?

Mr. ENGLISH. I would be happy to yield.

Mr. GLICKMAN. I mean, in all candor, I think that by passing strict labeling requirements we do jeopardize trade relationships. I have not seen our wheat that we send to Japan or China labeled, "Produced in Kansas," or, "Produced in the United States."

It looks to me like the gentleman's amendment has a public health and safety policy behind it, whereas the amendment of the gentleman from South Dakota has the intent to restrict the import of foreign meat. In my judgment, I do not think that is good public policy.

The CHAIRMAN. The time of the gentleman from Oklahoma has again expired.

(At the request of Mr. BEDELL, and by unanimous consent, Mr. ENGLISH was allowed to proceed for 3 additional minutes.)

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I would be happy to yield.

Mr. BEDELL. The gentleman from Iowa has had a bill in for some time that would require labeling of imported meat. The concern I have with the proposed amendment by the gentleman from South Dakota is that I do not really believe it accomplishes what we need to accomplish.

Most imported meat is served in fast food chain restaurants. The amendment by the gentleman from South Dakota makes no such provision for that meat.

I think it is much more important that that meat be identified than it is the meat that may be placed in cans here in the United States.

It would seem to me that the proper thing to do is to hold hearings in the Agriculture Committee; at least I have the indication that we will be able to do that, on a meat labeling bill. I think we should have a strong meat labeling bill that does as the gentleman indicates and really gives some protection to the consumer so that he knows whether or not he is buying imported meat, particularly since it is a lower quality generally than domestic meat.

It seems to me that the gentleman's amendment is the amendment we should support and certainly I would work with the gentleman from South Dakota and I think many other members of the committee would. I do not happen to agree with the gentleman that it is an impossibility to get such legislation passed in the House. At least I think we should make such an effort.

Mr. DASCHLE. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I am happy to yield to the gentleman from South Dakota.

Mr. DASCHLE. Mr. Chairman, the gentleman from Kansas indicated that he thought the intent of my amendment might at least in part be to restrict trade, restrict imports. That is not at all the intent of the amendment. The intent of the amendment deals directly with the problem just raised again by the gentleman from Iowa, and that is that we do not have adequate consumer information, nor do we have adequate inspection of imported meat. For that reason we are bringing in very substandard and unacceptable meat without any knowledge or information on the part of the consumer. That is what I think the amendment directs itself toward.

I certainly commend the gentleman. I just feel that my amendment goes a little farther and recognizes that need a little bit better.

Mr. ENGLISH. The gentleman is also very familiar with what has been happening around here with regard to this modest approach. Would the gentleman agree that this measure by itself is going to have a difficult enough time passing as opposed to going to something more ambitious, that we may have to wait another day to fight the good fight that the gentleman is leading.

Mr. DASCHLE. Well, the gentleman has always been a practical legislator and certainly this amendment addresses his practicality.

Mr. DE LA GARZA. Mr. Chairman, would the gentleman yield?

Mr. ENGLISH. I would be happy to yield to the distinguished chairman.

Mr. DE LA GARZA. Mr. Chairman, I take this time not to take a position on the gentleman's amendment, but rather to clarify the issue at hand, and to understand it so that we do not get carried away by emotional arguments based on a misunderstanding of this topic.

Most of the beef imported by the United States comes from Australia, while lamb and mutton comes from New Zealand. We have other imports from Central America and from Mexico.

The CHAIRMAN. The time of the gentleman from Oklahoma has again expired.

(At the request of Mr. DE LA GARZA, and by unanimous consent, Mr. ENGLISH was allowed to proceed for 3 additional minutes.)

Mr. DE LA GARZA. Specifically, the one beef import that we are addressing today is what is called a lower class range-fed or non-grain-fed beef, which is used as a beef product mixture.

I think it should be made perfectly clear here that the homemaker or the housewife does not buy this type of beef at the grocery store. We are not talking about chops or steaks or the hamburger meat that she buys there. Most of it, the supermarket beef, comes in a carcass, and that is not the type that mix with horse or kangaroo meat. The carcass type does not lend itself to that.

We are addressing then the meat type that comes in the frozen cubes or box. That is not sold at the grocery store; so the person who buys that beef knows where it is coming from.

On such beef, the original pruchaser knows he bought it from a broker or a trader or from a company in Australia, so he knows where it came from.

Then from that step it goes to either the one that processes it, mixes the lean beef with U.S. tallow or fat for the hamburger establishments, the beef establishments; but the one that you see at the grocery store, like from New Zealand, that is already marked by New Zealand as a product of New Zealand, where you buy a leg of lamb. We should not confuse roasts, or chops, or steaks bought by American homemakers or housewives at the grocery stores with the other type of beef. If this distinction is not so, then it is beyond the information that I have. It is only for composition of other meats, bologna, salami, et cetera, to whoever the processor desires.

I would like, if it helps for the further debate of this issue, to make this clear at this point and allow each Member to take the position which he desires to take, but knowing full well that we are not speaking of beef that we see or find at the counter at the grocery store for homemakers to buy.

□ 1600

Mr. LEATH of Texas. Mr. Chairman, I would like to ask the distinguished chairman, as was pointed out, there have been several bills introduced that addressed the problem of labeling. Is there an intention at any time in the near future to hold some hearings to determine if we can develop a labeling policy in this country that can speak to all of these problems we are concerned about?

Mr. DE LA GARZA. If the gentleman would yield further, to me, I cannot speak as the chairman of the subcommittee. I am sure the issue will be addressed. It has been addressed. The issue was addressed during the meeting of the full committee in the markup of this bill and such an amendment was not agreed to.

Mr. MARLENEE. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I rise in support of the gentleman's amendment. This amendment would assure both our consumers and producers that foreign meat comply with the same chemical use standards applied to meat produced in the United States. I have long been a supporter of such legislation and have, in fact, introduced legislation similar to that offered by the gentleman.

In carrying out the existing Federal Meat Inspection Act, the Food Safety and Quality Service "relies heavily upon a foreign government's regulation of its meat and poultry system." The 1979 "USDA Task Force on the Inspection of Imported Meat and Poultry," from which I just quoted, went on to say "we (the USDA) do not require that either the producer or government furnish information regarding the specific outcome of such quality control and inspection." Without such reporting by foreign governments we would hope that U.S. inspectors would visit foreign plants often. Yet the USDA will inspect foreign plants at a maximum rate of four times per year and often visits the foreign plant once every 2 years. Compare this with inspectors in the U.S. plants. They visit the plant on a daily basis. How can we assure that foreign meat attains the same standards as domestic meat? The only way to do this is to adopt the English amendment. The English amendment is not a barrier to trade as some have claimed. How can an amendment which assures foreign meat attain consumer standards set for domestic meat be a barrier to trade?

Imported meat accounts for between 6 and 7 percent of America's total meat supply—approximately 1.5 billion pounds a year.

As some of you are aware, chemical residues tend to concentrate in the liver and kidneys of animals. Therefore, these organs provide the best source from which to test the presence of substances which may be hazardous to the consumer. However, when meat is imported, only the red muscle tissue is available for testing. In previous years, the National Cattlemen's Association has testified that no meaningful results can be obtained by our inspectors for antibiotics, hormones, and heavy metals if only red meat is provided for testing. I am somewhat skeptical as to the degree to which laboratory analyses are conducted on the internal organs of animals slaughtered in foreign plants. Thus I am led to the conclusion that foreign meat is not inspected properly at the port of entry.

This conclusion is further substantiated when we examine the size of test samples.

In 1977, according to Carol Foreman, then Assistant Secretary of Food and Consumer Services, the USDA collected 2,424 random samples from the 1.7 billion pounds of imported meat. A simple division will show that this is approximately one sample per every 700,000 pounds of meat.

It is no wonder they can race horse meat over our borders and jump on our consumers with kangaroo meat.

While the USDA sample size varies with the amount of meat imported in a single shipment, this figure still concerns me as to the reliability of USDA practices. In fact, FSQS statisticians have pointed out that "our residue inspection program is not as statistically sound as it should be." With such a sampling system, can the USDA assure us that imported meat has not been adulterated?

It appears to me that we have set standards for American meat plants, presented these standards to foreign countries who wish to import to us, and then we permit the exporting country to assure us that they have indeed achieved our standards.

It also appears from the USDA report I have quoted that there is little oversight by USDA and little effort on their part to obtain information on the data foreign countries gather to determine if their meat complies with our health standards.

Would the USDA be willing to take the word of a non-USDA inspector that a domestic plant is operating on a sound basis and agree that test results from the plant need not be reviewed by the Department? I doubt they would and I think such law would be greeted with deep cynicism by both the Department of Agriculture and the consumer. Yet it appears that this is just what is happening in foreign plants.

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. MARLENEE. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. Mr. Chairman, I commend the gentleman for his statement. Certainly he has been a leader in this area, in an attempt to bring about equity at least between our American producers and foreign producers.

I think certainly a year's lead time is more than enough for any foreign producers who wish to sell to the American market to clean up their act, so to speak.

The CHAIRMAN. The time of the gentleman has expired.

(By unanimous consent, Mr. MARLENEE was allowed to proceed for 1 additional minute.)

Mr. MARLENEE. Mr. Chairman, I, too, would rather have a bill that encompassed labeling. However, let us look at the practicalities of this.

I cosponsored, with my good friend, the gentleman from Iowa, BERKLEY BEDELL, a similar bill to this in the last Congress and we had some hearings on it. But let us go with the English amendment to this bill, and then we will have some hearings in the Agriculture Committee and proceed forward. I support the English amendment.

Mr. BEDELL. Mr. Chairman, will the gentleman yield?

Mr. MARLENEE. I yield to the gentleman from Iowa.

Mr. BEDELL. Mr. Chairman, the chairman of the subcommittee is here at this time. I would ask the chairman of the subcommittee whether he would be willing to hold hearings on meat labeling and meat inspection in the event that the Daschle amendment does not carry.

Mr. HARKIN. Mr. Chairman, if the gentleman will yield, I would just say our subcommittee has had before it for some time various proposals on meat inspection and meat labeling in regard to imported meat.

It had been my intention to have the subcommittee hold some hearings regarding this yet this year. However, due to the lateness of the session, and the fact that we just now have the farm bill up, we were not able to do that. It is my intention that after the first of the year we will have some hearings regarding the whole area of meat imports and meat labeling and meat inspections.

Mr. SKELTON. Mr. Chairman, I rise in strong support of the English amendment. It is reasonable and it is necessary—both to protect U.S. producers from unfair competition and to protect U.S. consumers from potential health hazards.

Hearings held during the last Congress before the House Agriculture Committee clearly indicated the need for this amendment. Despite current inspection procedures, meat that has been treated with substances that have been banned for health reasons in the United States is imported and does get into commerce in our country. This amendment makes the same rules which apply to U.S. meat production apply to imported meat. U.S. meat producers should not be denied the use of chemicals and animal drugs which would make their production more efficient and then have to compete with foreign produced meat that has not been required to meet the same standards. U.S. consumers should not be led to believe that their health is being protected when in fact much of the meat they eat is imported and, thus, not produced according to U.S. standards.

I urge the adoption of the English amendment.

Mrs. SMITH of Nebraska. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Oklahoma (Mr. ENGLISH).

I have sponsored and promoted legislation to improve the inspection of imported meat and meat products as long as I have been in Congress. I feel that it is absolutely essential that we upgrade the inspection of these imports so that they meet the same standards we require for our domestic products. We have inspection, yes, but it is far from adequate. We just do not have enough inspectors overseas to do the job. They accept a great deal on faith. If a foreign plant has a reasonably good record as far as inspections are concerned, those shipments usually enter this country without adequate checking by our inspectors, unless they are spot checked at the port of entry in this country. Based on the amount of meat we reject when these port-of-entry spot checks are made, it is easy to see that a great deal of subpar shipments get through under the present system. It must be upgraded.

I have reintroduced legislation this year. It is substantially the same bill I have sponsored since 1975, but I have eliminated the labeling requirement. However, I believe there would be value in letting the consumer know whether or not he or she is buying or eating imported meat.

In the legislation I introduced this year, I included rabbits in the list of meat-animals subject to the tests required by the bill. Shipments of large quantities of rabbit meat are coming into the country, especially from mainland China. The Department of Agriculture does not presently have any requirement to inspect these shipments. They are spot checked by the Food and Drug Administration. That means that some shipments reach our retail markets here that are not fit for human consumption. We need adequate inspection of these imports, too.

At present rabbit meat imports are entering the United States at prices far below what it costs to produce rabbits for food here. Therefore, they create unfair competition for our domestic producers. There is a question how long many of them can continue to produce in the face of this competition. Higher inspection standards abroad could help equalize this price differential.

But when all is said and done, we need better inspection of imported meat, and I support language in this farm bill to bring that about.

AMENDMENT OFFERED BY MR. FINDLEY TO THE AMENDMENT OFFERED BY MR. ENGLISH AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. DASCHLE

Mr. FINDLEY. Mr. Chairman, I offer an amendment to the amendment offered as a substitute for the amendment.

The Clerk read as follows:

Amendment offered by Mr. FINDLEY to the amendment offered by Mr. ENGLISH as a substitute for the amendment offerd by Mr. DASCHLE: On line 8 strike the words "which have been produced using" and insert in lieu thereof the words "which contains".

Mr. FINDLEY. Mr. Chairman, I hesitate to take the time of the committee for a further amendment, but the gentleman from Oklahoma has presented us with an amendment that has very far-reaching importance, as I am sure he recognizes. The gentleman has been very thoughtful in presenting the language of this amendment to a number of us as it has been devel-

oped. I appreciate that. In fact, I am gratified that he did include the recommendation that I made which permits the President, under certain circumstances, to set aside the effect of the language.

The amendment to the substitute that I have offered would, I think, clear away a lot of possible litigation and narrow down the effect of the language to the protection of the health of the U.S. consumer, which I think is the gentleman's purpose. It is not intended to be a protective device in terms of trade protection but, rather, protection of the health of the users of products.

Therefore, I have offered an amendment to the substitute which would make the sentence in the middle of the amendment read as follows: "Neither shall any meat or meat food products be imported which contain agricultural chemicals or animal drugs," and so forth. That would limit the responsibility of the U.S. Government to examine the meat or meat products at point of entry. It would not impose upon the U.S. Government any responsibility to look beyond that point to determine what procedures may have been made during the production of cattle, which may have been 4 or 5 years prior to the date of import into the United States.

I am sure the gentleman did not intend to impose upon our Government the responsibility to police production of imported food products right back to the place of origin but, rather, to examine the product once it reaches our borders to make sure that the health of the American consumer is fully protected. It is for that reason that I offer this amendment, in the spirit of trying to improve the language, to narrow it down to what I believe the gentleman from Oklahoma really intended the language to say.

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. FINDLEY. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. Mr. Chairman, can the gentleman tell me again, looking at the issue of equity, and looking at the issue of wholesomeness, would your amendment be precisely what American cattlemen can do?

□ 1610

Mr. FINDLEY. I am sorry, I could not catch the language.

Mr. ENGLISH. The gentleman is changing the words "which have been produced using," to "which contain."

Mr. FINDLEY. Yes.

Mr. ENGLISH. Can American cattlemen use these chemicals now in producing this meat, and if it it used, then is there anyway that it would not contain it?

Mr. FINDLEY. I think the only concern we can legitimately have about imported meat or meat products is what the meat or meat products contain. Do they contain items harmful to the health of the consumer in this country? That is why I have offered this amendment. It may be the gentleman is not satisfied with this amendment to his substitute, and I would understand if he is not.

Mr. ENGLISH. Will the gentleman yield further?

Mr. FINDLEY. Yes.

Mr. ENGLISH. I suppose the concern is that it appears to me that there is no way we could use that chemical without the animal in some degree containing it, we can use it and not be detected, possibly. If it is the gentleman's objective to overcome the detection devices while the animal still contains the chemical that is offensive, then I would say that the gentleman's amendment makes sense, but I do not see how we can use a chemical and not have the animal contain it to some degree.

Mr. FINDLEY. Surely our scientists at the point of import can determine whether there is harmful residue of this sort. I think the gentleman will really improve our public law if he will give to our inspectors the right to reject meat or meat products which do have the residues of chemicals which in our own society we do not permit in the production of such products.

Mr. HARKIN. Mr. Chairman, will the gentleman yield?

Mr. FINDLEY. I yield to the gentleman from Iowa.

Mr. HARKIN. Mr. Chairman, I thank the gentleman for yielding. There may be some mistaken ideas of how meat coming into this country is inspected. I hope Members do not believe that every parcel of meat that comes into this country is inspected. In fact, we have inspection procedures—I took the time to go down to one of the plants where meat comes into this country to see how they do it. Quite frankly, they have all kinds of procedures of the huge amounts coming into this country without ever having been sampled or tested. It is not like the assembly line production of meats in this country where every carcass is inspected.

Mr. FINDLEY. Mr. Chairman, I want to commend the gentleman from Oklahoma for his diligence in approaching this problem.

But, I am confused. Why does the American Soybean Association oppose this amendment? Why does the National Broiler Council oppose it? Why does the National Turkey Federation oppose it? Why does the United Fresh Fruit and Vegetable Association oppose it? These are producer groups.

Why does the U.S. Special Representative for Trade Negotiations oppose it? Why does the U.S. Department of Agriculture oppose it? And, why does an administration that needs cattlemen's support oppose it?

It is simple. Because none of these groups know how it will be perceived by our trading partners. And, with billions of dollars of agricultural exports at stake, these groups want us to take the time to carefully examine the potential effects of this amendment.

I cannot help wondering whether we would be voting on this amendment today if Bill McMillan were still with the National Cattlemen's Association. He certainly would want us to hold hearings on this language to give other producer groups an opportunity to present their views on how this amendment could affect their commodities.

I support strongly the intent of this amendment. Competition should be fair. Our cattlemen should not be asked to compete at a disadvantage. I think this amendment, or an amendment similar to it, should become law.

But, we do not live in an economic vacuum. There are many countries in the world that would enjoy seeing the United States moving toward trade protectionism. Any move toward protectionism could be used as an excuse to restrict imports of our products.

The European Economic Community would like to undermine our zero duty binding on soybeans. They recently considered taxing our soybean oil imports. The Europeans would like to impose new standards for poultry. And, the Europeans have indicated an interest in banning imports of meat products that come from animals which have been raised using hormones.

The problem we have today is that world trade is not bound by U.S. law. That is why we have so many double standards. These double standards should be eliminated and I strongly support efforts to eliminate them. The issue today is not whether to eliminate this double standard in imported beef, but how to eliminate. Given my years of experience in the area of foreign relations and international trade, I respectfully suggest that the proper way to address this problem is through an open forum in which all interested parties will be allowed to present their views. Perhaps, we need to negotiate with our trading partners. In any event, as long as there are questions in my mind about how this amendment will affect soybeans, poultry, grains, and other agricultural products, I must most reluctantly vote against this amendment.

Mr. GIBBONS. Mr. Chairman, I move to strike the requisite number of words, and I rise to oppose the amendment.

Mr. Chairman, I am aware of the late hour, I am aware of the fact that I am not a member of this very fine Committee on Agriculture, and I respect the expertise that is arrayed here on this serious subject. But, I do

have a deep interest in this. I have helped the beef producer in the Ways and Means Committee on tax laws. I have gone out of my way to help them in all of that, so I am not hostile to any of this.

I know that there are problems, but I think we need to review where we are in this picture. Ten years ago, the export and import trade of the United States was about $40 billion. Now, the export trade in agriculture alone is $45 billion. One out of every three acres in agriculture is dedicated to export.

It is no mere accident that this has occurred. It is because those of us who are interested in opening markets have been going around the world, and representatives of this Government have been going around the world, and we have been beating down the doors that have been closed to our products, our industrial products and our agricultural products. Now, the debate we have just heard here could just as well have been carried on in the Japanese Diet or in the European Parliament. They all have the same concerns we do, and if we lead the way and impose this kind of legislation, our beef products and beef exports will suffer some, but all of our other agricultural exports will suffer and some will suffer very greatly. That is the problem that we face.

Now there has never been, so far as I have ever been able to determine, any history of anybody ever having been adversely affected physically by any of the things that are complained about here. There are no recorded cases. There is nothing on this at all. When we strip this argument of all of its beautiful language and its fervance, it is nothing more than pure protectionism.

For 10 years we have been going around this world beating down its doors so that the American farmer and so that the American exporter will have great opportunities to export their products. That is what this issue is all about. Now, if there are any problems—if there are any problems about health and safety and all of those things, we in the Committee on Ways and Means will be most happy to take them up. We have jurisdiction in this matter along with the Agriculture Committee, but we never hear any complaints about it except from those who are representing—as they should represent—their own constituency, that are engaged in cattle production. We have worked for years to try to open up world markets. We still have problems opening up world markets, but if we start moving in this direction not only will American beef products suffer in Japan, in Europe, but all our other agricultural products, our citrus, everything else will suffer; our poultry. All of these things will suffer because they all can be subjected to this kind of inspection and this kind of delay and this kind of restraint.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. GIBBONS. I will be glad to yield.

Mr. KAZEN. Mr. Chairman, I can understand the gentleman's statement and I agree with him, but only partially. I think that after knocking down doors and after beating on everybody to take our products we come with one conclusion, that those people buy our products because of the high quality and because of the standards that we maintain in this country. Everybody wants the high quality.

Mr. GIBBONS. That is a great, naive belief. The reason why they buy them is because we can get them past the borders. If they never get past the borders, if they have to meet the kind of restraints we wish to have imposed here, they will never get past the borders. But once we get our products on their shelf they can compare the quality and price. Then they will buy our product.

That is the argument I make. We have got to open up these markets. We cannot open world markets with this kind of restrictive legislation. If we set this kind of standard, everybody else is going to close us out. We are going around now day after day negotiating and trying to open world trade doors. Please do not make it more difficult. Please do not slaughter your own livestock before it can be sold. Do not cut off another farmer's right to export. Do not cut off his market. That is what I am talking about.

The CHAIRMAN. The time of the gentleman from Florida has expired.

(At the request of Mr. FRENZEL and by unanimous consent, Mr. GIBBONS was allowed to proceed for 3 additional minutes.)

Mr. LAGOMARSINO. Mr. Chairman, will the gentleman yield,

Mr. GIBBONS. I will be glad to yield.

Mr. LAGOMARSINO. I thank the gentleman for yielding.

Mr. Chairman, I want to commend the gentleman in the well. I know because I have been with him, of his strenuous efforts on behalf on not only agricultural product exportation from this country, but all kinds of products, and the only way we can continue to do that is to continue to remove trade barriers, not enact new ones.

Mr. Chairman, I rise in strong opposition to this amendment, which I believe represents a significant attempt to establish a nontariff protectionist barrier that could seriously injure our international trade position.

The amendment, on the face of it, appears to be aimed at protecting the American consumer. The result of the amendment, however, would be to harm the American consumer—in the pocketbook, by increasing the cost of meat products in this country.

It is argued that the health of the consumer would be protected under this proposal. I would remind my colleagues that the consumer is already adequately protected by the EPA, the FDA and the Department of Agriculture. All of these Government organizations maintain the programs and facilities needed to inspect all imported meat into this country.

Most countries exporting meat to the United States use some chemicals that are not approved for the same use in the United States. The use of these compounds does not pose a health hazard, however, as long as the imported meat and meat products conform to the standards set by the U.S. inspection agencies.

To establish such criteria for imported meat as proposed by this amendment would virtually prohibit imports of meat into the United States and invite probable retaliation from U.S. trading partners. It is an action I believe we must avoid.

The United States has just recently resolved a longstanding trade dispute with Australia on imports of lamb into this country. An action which could adversely affect beef imports into the United States from Australia could have serious repercussions on our relations. That could be duplicated with other countries around the world.

I will remind my colleagues that we are now engaged in rather strenuous efforts with the Government of Australia trying to encourage them to support our policy and to join with us in the multinational force in the Sinai, a very essential part of the peace process in the Middle East.

That is a very essential part of the peace process in the Middle East.

I will include in the RECORD a letter from the Australian Ambassador concerning this matter, and I would also like to remind my colleagues that many of the California agricultural product producers, especially of crops that grow in California, are very concerned about this amendment.

Mr. Chairman, the very least we can do is to adopt the amendment to the amendment offered by the gentleman from Illinois (Mr. FINDLEY), and I congratulate the gentleman for offering it.

The letter to which I referred is as follows:

EMBASSY OF AUSTRALIA,
Washington, D.C., September 23, 1981.

I refer to the Agriculture and Food Act of 1981 (S. 884) and Amendment Number 356 proposed by Senator Melcher (for himself and Mr. Bentsen). This Amendment was accepted by the Senate and attached to S. 884. The Amendment would require that imported meat products meet the inspection, sanitary quality, species verification and residues standards which apply to products produced in the United States.

Australia supports the objective of ensuring food safety and believes that it is possible to achieve this objective in ways which do not impose unnecessary and harmful impediments on the free flow of trade. My authorities are greatly concerned about that part of the Amendment which refers to the use of chemical compounds and which reads:

"Neither shall such products be imported which have been produced using agricultural chemicals, animal drugs or medicated feeds which are not currently approved for the same use in the United States."

It is Australia's opinion that the legislation would effectively stop the importation into this country of meat and meat products. To take Australia as an example, any chemical compounds which are allowed to be used have been rigorously assessed and approved to ensure the safety of the food supply. However not all of these chemicals have been submitted for approval for United States use.

Many countries have markedly different agricultural systems to those in the United States, and this is the case in Australia. For example, beef production in Australia is largely a grazing concern whereas in the United States extensive feed-lotting is carried out. Similarly wool and lamb production is a major industry in Australia as compared to the U.S.A.

As a consequence of these different systems, agricultural chemical and animal drug usage is, by necessity, in many instances different from that in the U.S.A. in order to maximise efficiency of agricultural production. Chemical manufacturers are often not prepared to seek United States approval for chemical compounds used in other countries because of the high cost, delays in obtaining approval and limited marketing potential in this country. It would therefore be unrealistic either to discontinue the use of essential non-U.S.A. approved chemicals in Australia, or to expect manufacturers to obtain costly approvals in this country for product which might not be used here.

It should be emphasised that Australia has well developed and effective systems for approval of chemical compounds to ensure the safety of food product. These approval systems operate through the National Health and Medical Research Council, a body comprising both Federal and State representatives, and are well known to the United States Department of Agriculture and the Department of Health and Human Services.

The introduction of a requirement which would impose trade sanctions on Australia because chemical compounds tested and accepted as safe in Australia although not approved in the United States are used in agricultural production would constitute a non-tariff technical trade barrier. Both Australia and the United States are parties to the General Agreement on Tariffs and Trade and it is Australia's view that such trade sanctions would be contrary to United States obligations under that Agreement.

Approximately 30 percent of Australian beef production is exported to the United States, and even though it is only 4 percent of your consumption this represents around 37 percent of total Australian exports to the U.S. market over the past 5 years. Prohibition of imports of Australian meat would, therefore, have a devastating effect, not only on the meat industry in Australia but also on our balance of trade which has consistently been heavily in favour of the United States.

Passage of the Amendment could damage the United States. Cessation of meat imports would have a drastic effect on your meat processing industry, since that industry relies heavily on imports. There would inevitably be a sudden rise in cost of foodstuffs generally relied upon by the poorer members of the community. If the practice of requiring an exporter to conform to chemical and drug use limitations of the importing country were to be adopted by other importing countries, the efforts which United States producers are making to increase their own exports would be severely hindered. No exporter could comply with limitations of all importing countries; there are bound to be inconsistencies between such limitations.

Australia therefore views the trade implications of that portion of the Melcher Amendment which deals with agricultural chemicals, drugs or medicated feeds with the gravest concern and seeks your full support in opposing this either in the House Agriculture Committee, or on the floor of the House when the Farm Bill is debated, and in Conference.

I am writing similarly to the Chairman of the Sub-Committee on Trade of the Ways and Means Committee and sending copies of my letter to all members of your Committee, and of the Sub-Committee on Trade.

Sir NICHOLAS PARKINSON,
Ambassador.

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. GIBBONS. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. Mr. Chairman, I would again want to remind the gentleman from Florida (Mr. GIBBONS), as well as the gentleman from California (Mr. LAGOMARSINO), that this amendment contains the following provision: "provided that the President may set aside the application of clause 1" which is the part regarding chemicals.

Mr. GIBBONS. Mr. Chairman, I realize that the gentleman has been improving his amendment all along, but it is still a poor amendment, if he will pardon the expression.

All that means is that every time we have got to run to the Chief Executive and we have got to go through all these things. Other countries can do the same thing. We have got to go to the elected heads of their governments, and we have to go all through this and all this restrains trade.

We have been trying to teach other people in the world, but this really does not help them, and it does not help us.

I respectfully say that while the gentleman's amendment is not as bad as it was day before yesterday or last week when I saw it, it is still not any good. It is one of those kinds of amendments that when we enact it, it gives a license to everyone else to enact it also, and when everyone enacts it, the barriers slowly go up.

These kinds of amendments were rejected in the Agriculture Committee. As I say, if any Member seriously wants this kind of amendment and wants to come to the Ways and Means Committee, we will be glad to entertain them and bring in all the witnesses they have, and we can see if there is any kind of public health problem.

This proposal has little if anything to do with public health; it has nothing to do with the environment.

This type amendment was rejected in the Agriculture Committee, and I just do not see any need for it.

Mr. FRENZEL. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to two out of the three amendments.

Mr. Chairman, I think everyone is agreed that the Daschle amendment is unsuitable and that the English amendment is the one that we are now discussing.

If the amendment offered by the gentleman from Illinois (Mr. FINDLEY) is adopted as a part of the English amendment, in my judgment, it would be barely tolerable. It would still be an offensive, obviously protectionist amendment which would be badly interpreted by our trading partners and probably cause retaliatory market barriers on their part. But, nevertheless, it would be tolerable.

If the Findley amendment is not accepted, the English amendment, in my judgment represents a substantial indefensible barrier to trade that would cause the particular people that it is intended to help great distress in marketing their own products offshore.

The amendment prohibits the importation of certain meats that have been produced with chemicals, drugs, and so forth, banned in the United States whether or not the meats contains residues or is adulterated.

A longer recitation of the provisions is unnecessary. It would require extensive additional testing procedures that would do nothing to improve the quality and safety of meat products sold in this country.

The inspecting and testing of imported meats is already quite extensive in order to insure that imported meat products comply with all domestic standards. Only establishments specifically certified as meeting such requirements can prepare meat and meat products for export to the United States. The USDA conducts onsite reviews of foreign producers, as well as additional random inspections, including sampling for chemical residues, at major ports of entry.

Mr. Chairman, this kind of amendment is exactly what happened to us when Canada barred DES and American producers could still use it in America. The folks who are presenting this amendment came to the Congress and said, "This is an unfair trade barrier because here we are using an additive in the United States that Canada has unfairly prohibited." We worked out an arrangement with Canada, thank heavens, so we could ship the

meat until everybody reached an agreement on DES.

But we are doing with this amendment exactly what Canada did in that case, and we called it unfair at that time.

As the gentleman from Florida (Mr. GIBBONS) pointed out, we do three-quarters of a billion dollars of meat business overseas. Much of that meat business would be jeopardized and lost if our trading partners used the language of the English amendment in determining whether they would accept our food or not.

Worse than that, Mr. Chairman, we would also tend to lose other kinds of business such as the beans we ship to Mexico which are grown in areas that are treated with paraquat. In addition, we use fungistats on apples and pears that are banned in some European Community countries, and there are chemicals parathion, malathion, that we put on our soybeans which are prohibited in Japan, the Netherlands, West Germany, Poland, and other countries. Europe bans the arsenicals used in our poultry.

So what we are doing, if we accept the English amendment, is to provide standards which, if they were used by our trading partners, would cost us many of our export markets abroad. We will be thumbing our nose at the rest of the world, and many nations will thumb right back.

Of course, this comes at a time when all Members of Congress are telling us on the Trade Subcommittee to "get out there and expand your exports, fellows." And we are out every day trying to break down trade barriers all around the world. We just returned from the Far East where we demanded of a number of nations, primarily Japan, that they repeal barriers like this so we could sell in those markets.

But I ask, "How can we break down barriers abroad if you keep erecting barriers behind us?" If you accept the English amendment, it means that we cannot go in with clean hands when we negotiate with our trading partners. That makes our work much harder. We cannot build new markets for ourselves, and we cannot get concessions abroad, because we are raising barriers here.

I just cannot describe the difficulty that this amendment will cause us as we do our best to establish these new markets.

The worst of it is, of course, that no industry is more reliant on markets abroad than agriculture. When agriculture goes protectionist, as it apparently will today, free trade is badly wounded. The best industry in the country most dedicated to trade expansion is now leading us down the lonely, one-way street of protectionism.

Mr. Chairman, this amendment is opposed by the administration, the Council of Economic Advisers, the U.S. Trade Representative, the U.S. Department of Agriculture, and the U.S. State Department, all of which have directed specific letters to various Members of Congress, including the chairman of the Committee on Agriculture, saying that they oppose the adoption of this amendment.

Mr. Chairman, if we accept this amendment, we are going to cause ourselves enormous trouble in world trade.

The agencies of this administration, including the U.S. Department of Agriculture, have stated that the amendment prohibits imports of meat that has been produced with chemicals, animal drugs or medicated feeds banned in the United States, whether or not such products have been adulterated or contain residues of harmful substances. The restriction on imports also would apply to meat produced using chemicals and other substances not approved for use in the United States, if such use has adulterated the imported product.

Both these provisions are unnecessary and would require extensive additional testing procedures that would do nothing to improve the quality and safety of meat products sold in this country. It also would make meat products, both domestic and foreign, more costly for American consumers.

Only 60 of the 150 chemicals commonly used in agriculture can be detected by known analytical methods. Our present testing results in stopping imports of about one-half of 1 percent of imported beef. I do not know what the rejection rate for domestic beef is, but I read that we do find bad products from time to time.

Inspection and testing of imported meat already is quite extensive, in order to assure that imported meat products comply with all domestic standards. Only establishments specifically certified as meeting such requirements can prepare meat and meat products for export to the United States. USDA conducts onsite reviews of foreign producers as well as additional random inspections, including sampling for chemical residues, at major ports of entry.

The fact that chemicals and other substances have not been approved for use in the United States does not mean they are harmful or unsafe. Different production techniques, traditional usages, and problems occurring in some countries and not in others is often more a consideration than health and safety in determining which substances are approved by which countries.

Further, the provisions of this amendment could have an adverse effect on our own agriculture exports because it would signal other countries to take similar actions or to continue inspection practices that amount to trade barriers.

For example, the United States has been trying to persuade the European Community not to ban the importation of meat products which have been produced using naturally occurring growth stimulants and antibiotics. These substances are used extensively in livestock rearing in the United States. If this amendment is enacted, we could lose much of our leverage with the European Community and further endanger a trade valued at about $300 million per year.

Another example can be seen in the use of DDT, DES, aldrin, and dieldrin which are prohibited for use in meat production or on crops in the United States for environmental reasons. It is possible, however, to export products exposed to these chemicals if residue standards are met in the receiving country. If other countries move to totally block these exports, as we are considering doing today, the losses to our own agriexports could be substantial.

That would be a high price to pay, especially since our beef imports, less than 10 percent of U.S. production, are down this year. However, that 10 percent represents one-quarter of manufacturing beef supplies because of our 30-percent maximum fat specification for hamburger. Not only is the imported meat wholesome, but we need it because U.S. producers do not provide enough meat of this kind.

Finally, the amendment would be a nontariff trade barrier in violation of our GATT obligations. It could not be justified in the GATT as being necessary to protect either human or animal health. Countries whose exports are restricted, even though they meet residue requirements, would have legitimate cause for claiming compensation for impairment of trade benefits.

Mr. Chairman, I believe we currently have adequate health and safety standards for meat products both produced and imported. The important factor is that the public be protected from unsafe or contaminated meat. I urge my colleagues to reject the amendment.

Mr. MARLENEE. Will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Montana.

Mr. MARLENEE. Mr. Chairman, I do not want the State Department in charge of my agricultural business. However, I would like to ask the gentleman from Minnesota (Mr. FRENZEL) two questions.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. FRENZEL) has expired.

(On request of Mr. MARLENEE, and by unanimous consent, Mr. FRENZEL

was allowed to proceed for 3 additional minutes.)

Mr. MARLENEE. Mr. Chairman, if the gentleman will yield further, the gentleman seems to contend that there are sufficient safeguards within what the USDA does to insure that the American consumers are allowed a quality product. Is that correct?

Mr. FRENZEL. That is the USDA's opinion, and I think that is more in the gentleman's department than in mine.

Mr. MARLENEE. Well, I think that is the contention here with this amendment and that the safeguards are just not there.

We have one sampling per 700,000 pounds of beef. We have had horse meat shipped into this country, and we have had kangaroo meat masquerading as beef.

Mr. FRENZEL. Mr. Chairman, I thank the gentleman for that contribution.

The gentleman's amendment, however, does not ask that we sample more product. It does not call for an appropriation or an authorization to the Agriculture Department to do more controlling and more testing. The Department now does do spot testing, and I believe in the last 2 years they have rejected about one-half of 1 percent of imported beef. But, as I read in my papers, I find that we rejected a little domestic meat, too, and I suspect the proportions are not very much different.

I say to the gentleman that if the USDA had been on its toes, the law was sufficient to detect all the problems of kangaroo meat and those things we have read in the paper about adulterated products.

Mr. MARLENEE. Mr. Chairman, if the gentleman will yield further, I think the bone of contention here is safeguarding the consumer in the Findley amendment as opposed to the English amendment.

If we look at the language, offered by our colleague from Illinois, it says, "Contains agricultural chemicals or animal drugs." That simply goes back to the same old story, this: How have they done their job? How do they insure that it does not contain these dangerous chemicals or dangerous drugs? They cannot do it under the present system of checking one sample of 700,000. They must check the internal organs of these animals if they are going to see whether there are dangerous chemicals or dangerous drugs contained in the meat coming into this country.

There is a difference between the two amendments. One says, "Contained," and the other puts the onus of responsibility on the USDA to get the job done.

Defeat the Findley amendment.

Mr. FRENZEL. Mr. Chairman, I thank the gentleman for that contribution, but he has pointed out one of the real problems with the English amendment.

Under the language of the English amendment, if a cow grazes in a yard that has been spread with any item that has been banned in the United States, that cow would not be able to be imported. We have a lot of imports from Central America where cattle do graze in areas that have been sprayed with products that are banned in this country.

□ 1630

The cows do not necessarily eat the stuff. They are not intended to, but they wander in it.

As anybody who read the amendment would know, those cows could not be imported. The meat is perfectly good, contains no trace of those particular elements, and would, I think, in any rational person's mind be judged wholly pure for American consumption.

The English amendment is clearly intended to frustrate importation of meat and to provide special kinds of barriers for our trading partners.

The CHAIRMAN. The time of the gentleman from Minnesota (Mr. FRENZEL) has expired.

(By unanimous consent, Mr. FRENZEL was allowed to proceed for 1 additional minute.)

Mr. KAZEN. Mr. Chairman, would the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Texas.

Mr. KAZEN. I will tell the gentleman that I followed his argument and the arguments of the gentleman from Florida in the well about this amendment or talking about both amendments and every amendment that is pending now being a barrier to trade. I would ask the gentleman to explain to me how we are creating a barrier to trade when we require that foreign producers toe the line and adhere to the same standards that we set for our own producers. How does that impair trade?

Mr. FRENZEL. The problem is, I will tell the gentleman, and I thank him for his question because it is a good one, that foreign producers do not require us to toe that line and meet their same standards. All they ask is that the meat, when we ship it to them, be pure and free of substances which they prohibit in their country and that, as I understand it, is what we require of products coming into this country. I cannot see anything fairer, I have to tell the gentleman.

Mr. KAZEN. I will tell the gentleman that when we passed the meat inspection bill and all these other bills putting our own producers, our own retailers, our own processors under those rigid health standards that we at that time expected all of these processors outside of this country to meet the same standards. Something has happened along the line, and I do not think it is fair to ask of our people more than what we are asking of their competition overseas.

Mr. SMITH of Iowa. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I did not intend to get into this debate, but I think there have been some things here said that ought to be straightened out.

To start with, we have two issues. One is what volume of meat should be imported into the United States, and the other is the wholesomeness of the product. They are two separate issues. Volume of imports is handled primarily by the Ways and Means Committee. It is the volume of meat coming into the country. The wholesomeness issue is handled through the House Agriculture Committee.

As far as the volume of meat coming into the country, let me go back to 1964. We passed here in the Congress in that year, not with my help but over my opposition, an upside-down formula saying that the bigger the volume of meat that is slaughtered in this country, the more meat could be imported into the country. Do my colleagues know who supported that? The National Cattlemen's Association joined with the packers to pass that law. I know because they attacked me in the net election because I had opposed the bill that they supported. Fifteen years later and two cattle cycles later, after a lot of their people had gone broke because of the bad law, we were able to change the law. That is the volume. We just changed that upside-down formula here about 2 years ago. Bills governing the volume should be changed in that manner.

The other issue is the wholesomeness of the product. Nobody is more for wholesome products than I am. I was the author of the 1967 meat inspection bill. In 1967 we finally got a bill on the floor of the House, over the opposition of the National Cattlemen's Association and the packers, over the opposition of both of them.

The National Cattlemen's Association opposed the bill because some of their producers would not be able to continue selling some of their sick animals and they went right along with the packers who were not processing meat as most people would want them to do. But after it was exposed that meat was being sold coming out of rendering plants and other places—finally with that exposure the majority supported the 1967 Meat Inspection Act.

So we passed the 1967 law.

This 1967 law requires, as a matter of law, that there be equal inspection in foreign countries compared to what we have in this country. After that law

passed in Mexico, for example, some 32 plants that had been exporting had to close down while 5 plants were upgraded to meet the standards required in this country.

The problem is not with the law, it is the enforcement of the law. I say it is inadequate. But we cannot get at that problem by passing this amendment. Passing an amendment would mislead some people into believing we had taken care of any problems when in fact it had not.

What we ought to do is actually have equal inspection over there. My colleagues say they do not inspect their animals. That is not so at all. Australia and New Zealand, for example, are required to have inspectors just like we have. Every animal is inspected. They are not inspected by our employees; it is their employees. They are required to meet the same standards as ours, for example, that inspectors cannot be the employees of the packing company. They must be hired by and paid for by the government so they do not have a conflict of interest, the same requirement as for our inspectors in this country.

As a matter of law, they have the same inspection system that we do. But we do not have enough supervisory personnel over there, and that is what we are talking about, is supervisory personnel comparable to our supervisory personnel to make sure that they are doing the same inspections we have in this country.

We even know that in some instances over there in those other countries where they have been warned ahead of time when they come in for a spot check. The problem is in getting adequate inspection as required by law. If a plant is in violation, they can even black list the plant completely and should where necessary. I do not recall any of those who support this amendment or any of these organizations coming to the Appropriations Committee and complaining this year when the administration submitted the budget to reduce, not to increase, but to reduce the number of inspectors, and actually to go to a spot inspection system in this country with regard to some of our red meat. That is what my colleagues ought to do if they really believe in the wholesomeness of the product, is to get over there to the Appropriations Committee and try to get these appropriations increased so that we have the number of supervisory personnel in foreign countries that are needed, and to make sure they follow the present law.

The problem is not with the law. It is the way it is being administered, and there is no substitute for beefing up the administration of the present law.

Mr. ENGLISH. Mr. Chairman, I move to strike the requisite number of words and rise in opposition to the Findley amendment.

On the surface it would appear that the Findley amendment is a very reasonable approach. However, one must wonder if the intent of the Findley amendment is to prohibit the containment of prohibited and banned drugs in the meat that is imported into the United States.

Why would we change the language from "having been produced using that chemical" to "containing that chemical"? I think if one is familiar with the inspection facilities and procedures for meat coming into the United States, it becomes very evident.

It takes roughly 10 days for a laboratory inspection to be completed. Therefore, meat which is contaminated, or from which the sample of meat has been taken is already being distributed to and eaten by consumers.

We have heard a great deal from the Ways and Means Committee about their concern on what the effect is that this might have on agricultural exports. Of course, they ignore the provision that any time the President finds that there is a danger and a threat to American exports because of these standards, he can suspend them so long as he specifically identifies the reason.

□ 1640

But that is not good enough. Somehow, people have gotten the idea that foreign countries buy American agricultural products because they think we are nice guys, they want to make us happy. I have never heard of an agricultural sale being made on that basis. I have heard it being done because of a better price in the United States. I have heard it because they want to sell products in the United States and they think this may curry favor with us. I have heard it because we have had the most consistent production of agricultural products throughout the world. I have heard it because no other country has agricultural products to sell. I have also heard of countries that import American agricultural products for the purpose of raising revenue. They simply slap a tax on those American agricultural products that may even in fact be in excess of what the American farmer received. But never have I heard of a country buying from the United States just because they think we are good old boys.

Let me also raise another question. The Ways and Means Committee members tell us that this might chill trade. Why then do we require on automobiles imported into this country that they comply with our auto emission standards? What is more important about those automobile emission standards that gives them priority over the food that people stick in their mouths? Their view is very strange.

This amendment was drawn for the purpose of creating equity, and it does. We are not asking one thing more of those producers who want to sell meat products in this country, than we ask of our own producers. If our requirements are too stringent, then those who object to those stringent requirements, should try to change them. Then the import requirements for foreign producers will be reduced as well. But somehow I do not think that we are going to see those who are so concerned about this issue of imports offering those kinds of amendments.

Let me state very briefly a press release that came out on August 25 of this year.

I noticed that Agriculture Secretary John Block announced a series of tough new steps to prevent mislabeling, uninspected or otherwise adulterated meat from coming into the United States.

The CHAIRMAN. The time of the gentleman from Oklahoma (Mr. ENGLISH) has expired.

(By unanimous consent, Mr. ENGLISH was allowed to proceed for 1 additional minute.)

Mr. ENGLISH. This same press release contains the following statement, and I am quoting from Mr. Block:

These steps are necessary because mislabeled and adulterated imports apparently have been coming into the United States for several months.

Well, can you imagine what the Findley amendment would do in the area of catching meat products that contain those chemicals?

I would simply say that the amendment as it was drawn prohibits that use, and I think, Mr. Chairman, that should be sufficient.

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. Would the gentleman's amendment prohibit the import of meat if they had used certain chemicals that are not authorized in this country in the production? Is that correct?

Mr. ENGLISH. The gentleman is not correct. They have to be banned.

Mr. SMITH of Iowa. Will the gentleman clear that up?

Mr. ENGLISH. They would have to be banned. If they are not authorized, they would be all right. But if they are banned and prohibited from use in this country, then they would be prohibited from abroad.

Mr. SMITH of Iowa. I see. The gentleman has changed that.

Mr. COELHO. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, on October 13, 1981, the Wall Street Journal ran an editorial on the meat import issue that we are now debating. The editorial makes some very valid points that I would

hope my fellow colleagues will consider before making up their minds on this matter.

The title of the editorial is "Hot Dog Hustle." It discusses the recent USDA impoundment of Australian kangaroo and horsemeat that was shipped into the United States, and how this episode is being used by the U.S. cattle-producing industry to severely tighten restrictions on imported beef.

My distinguished colleague from Oklahoma is offering an amendment to restrict meat imports. However, what one must remember is that imported beef differs in quality from our domestic product, which tends to be high quality grain-fed beef. The imported product is a lean, manufacturing quality beef that is used to help meet the U.S. consumers demand for hamburgers, hot dogs, bologna, and other processed meat products. Imported beef fills the gap between what U.S. consumers demand and the domestic industry's ability to fulfill that demand at a realistic price.

A simple interpretation of the English amendment is that it takes U.S. meat production rules and applies them to meat imports. However, the English amendment goes beyond that. It forces foreign meat suppliers to comply with the same species, residue, and chemical use standards that apply to U.S. meat. The U.S. Department of Agriculture already has the authority to deny entry into the United States of any imported meat or meat product that does not meet FDA and EPA tolerance levels. Yet, the English amendment prohibits the importation of any meat that has been produced with chemicals or drugs that have been banned for use in the United States. What this limits, Mr. Chairman, is imports of meat and meat food products that may not even pose a health risk to the consumer. The amendment, also, precludes from import any meat or meat food product that has been produced using a prohibited agricultural chemical or animal drug—even if there is no residue of the chemical or drug in the meat or meat food product at the time of importation.

The English amendment is a nontariff trade barrier and it will be perceived as a nontariff trade barrier by U.S. trading partners throughout the world. When action by our Government is taken to restrict imports one must stand back and ask how this import restriction will affect U.S. exports. It will have a negative impact. There are many examples of chemicals, drugs, and feed additives that are safe and are used in the United States, but that are not approved for use in foreign countries. If the English amendment is accepted, foreign countries can restrict U.S. imports for the same reasons.

Any action to restrict imports that only supplements U.S. meat and meat products will be harmful to U.S. trade. Domestic beef already has import protection. If the supply of domestic beef is heavy, then imports are cut back. If the domestic supply is scarce, more imports are allowed. This type of a trade restriction is understood by our trading partners. We all have to protect our domestic industry, but not to the point that our own exports are harmed. Both the Department of Agriculture and the Office of the U.S. Trade Representative say that the English amendment is inconsistent with our country's international trade obligations under the General Agreement on Tariffs and Trade (GATT).

It is for these reasons, Mr. Chairman, that I urge my colleagues to oppose any effort to restrict meat imports into the United States. I include in my remarks the Wall Street Journal article that I made reference to:

[From the Wall Street Journal, Oct. 13, 1981]

HOT DOG HUSTLE

Last August our chief source of imported beef, Australia, sent us some kangaroo and horse meat—this was presumably, an accident since the Aussies are supposed to send us cow meat. The USDA discovered the accident, impounded the meat and that should have been that.

It wasn't. Some cattle-state members of Congress are using the Whinneygate scandal to trot out legislation they try to pass every time domestic beef prices take a dive. The purpose of the legislation, now attached as an amendment to the farm bill, is to severely tighten restrictions on imported beef.

Current regulations require that all imported beef be subject to the same standards as domestic beef. Although this sounds straightforward, it's a complicated enforcement problem in practice because some exporting countries use chemicals or drugs in beef production that are not covered by U.S. regulations. Essentially, then imports are tested only for residues of stuff prohibited by U.S. regulations and by "species verification"—is this a cow or is it kangaroo?

But the Congress and cattle people argue that current regulations are not enough to insure consumer safety. Instead, they are pushing for a chemical and drug standard which—in its strictest version—would half beef imports altogether. These proponents claim that such restrictions would have little or no effect on prices; however, the Australian experience suggests otherwise. The impact of removing 60 million pounds of Australian meat was an immediate run-up in beef prices of 15%.

And there is no reason to believe that increase was a fluke. Unlike high-grade domestic beef, imported beef is manufacturing grade—very lean—used for hot dogs and bologna and other processed meat. Sure, it represents a small share of total beef supplies, perhaps 6 percent, but because domestic supplies of manufacturing-grade beef are limited, any cutoff in supplies—will send prices skyward.

These new import restrictions are even more unseemingly given that the domestic beef industry already enjoys import protection. The amount of beef allowed into the U.S. varies with supplies of domestic beef. When beef is plentiful, imports are cut back, easing any downward pressure on prices.

Certainly, no consumer should be defrauded by hot dogs made from kangaroo. But the argument that consumers are well-served by keeping prices high by keeping foreign beef out is bologna.

DEPARTMENT OF AGRICULTURE,
Washington, D.C., October 13, 1981.

Hon. E (KIKA) DE LA GARZA,
Chairman, Committee on Agriculture,
Washington, D.C. 20515

DEAR MR. CHAIRMAN: On September 30, Representative Gunderson (R-Wisconsin) filed in the House an amendment to the Farm Bill (H.R. 3603) identical to the Melcher Amendment to the Senate version of the Farm Bill. These amendments would require that all meat products imported into the United States be subject to the same inspection, sanitary, quality, species verification and residue standards that apply to domestic products and would prohibit importing of any meat or meat product produced using agricultural chemicals, animal drugs or medicated feeds not approved for the same use in this country.

The Administration and the Department of Agriculture oppose the Melcher and Gunderson amendments and any other similar proposals which may be forthcoming.

The provisions of these amendments would virtually eliminate all meat imports. Current law allows meat and meat products containing residues of chemicals and drugs not approved for the same use in the United States to enter the country so long as they do not exceed USDA, FDA and EPA approved action and tolerance levels. Most countries exporting meat and meat products to the United States use some agricultural chemicals, animal drugs or medicated feeds not approved for the same use in this country, as well as those not used in this country because of differing agricultural practices and needs. For example, Australia and New Zealand supplied 81 percent of America's beef imports in 1980. These countries use 37 chemical compounds in their animal agriculture which are not apporved for the same use in the United States.

The Melcher and Gunderson amendments assume that all agricultural chemicals, pesticides and animal drugs not approved for use in the United States are public health hazards. In fact, because of different climatic and agricultural conditions in other countries, certain chemicals used abroad are not commonly, or of necessity, used in the United States. This practice is not unusual; the United States currently uses chemicals in agricultural products exported to other countries which have not registered the use of such chemicals for their own commodities.

Moreover, the Department agrees with the Office of the United States Trade Representative and the President's Council of Economic Advisors that the requirements of the Melcher and Gunderson amendments constitute a non-tariff trade barrier. These amendments are inconsistent with America's international trade obligations under the General Agreement on Tariffs and Trade (GATT). If we violate our trade obligations, other countries could be authorized to withdraw trade concessions of equivalent value to United States exports. Such restrictive legislation would also disrupt America's efforts in the Codex Alimentarius Commission, an organization of the United Nations, to reach international agreement on the use

of agricultural chemicals, pesticides and food additives.

The Federal Meat Inspection Act (FMIA) requires that every foreign country with plants preparing meat and meat products for export to the United States maintain an inspection program at least equal to that established under our laws and regulations. Further, only establishments specifically certified by a foreign government as meeting such requirements can prepare meat and meat products for export to the United States. USDA conducts on-site reviews of these certified foreign establishments to verify whether meat and meat products intended for export to the United States are produced in compliance with requirements at least equal to those in the United States. An additional check is made at the time certified meat and meat products are presented for entry into the United States. USDA inspectors at the major ports-of-entry and at inland inspection facilities re-examine and test meat and meat products on the basis of random sampling plans devised by department computers. This includes sampling for chemical residues.

The testing program USDA administers is identical for domestic and imported meat and meat products. As a result of the recent problem involving imported meat from Australia, the Department has strengthened existing inspection and testing requirements for imported meat and meat products. These procedures include requiring that countries exporting boneless beef to the United States establish a species monitoring program. Also, an accredited species identification program has been initiated in this country.

Having implemented these changes in the inspection procedures for imported meat and meat products, USDA believes that the current law and regulations assure that American consumers receive safe and wholesome imported meat and meat products.

In 1980, the United States imported $2.3 billion worth of meat and meat products. Of that total amount, beef imports accounted for $1.8 billion, pork imports for $486 million and other meats for $75 million. The United States exported $890 million worth of meat and meat products in 1980.

It is imperative that Congress not enact legislation that would be perceived, in this country or abroad, as an impediment to free trade or that might induce our trading partners to consider reciprocal trade sanctions.

Sincerely,

RICHARD E. LYNG,
Deputy Secretary.

U.S. DEPARTMENT OF AGRICULTURE,
FOREIGN AGRICULTURAL SERVICE,
Washington, D.C., Oct. 20, 1981.

To: Richard E. Lyng, Deputy Secretary.
From: Richard A. Smith, Administrator.
Subject: English amendment to ban meat imports produced with agricultural chemicals prohibited in the United States.

The Department has registered opposition to this amendment based on our interpretation that it would constitute a non-tariff trade barrier. If our trading partners chose to respond with similar measures, we could expect adverse impact on our export in other commodities. A survey of FAS commodity experts has elicited the following examples:

TOBACCO

Tobacco producers apply maleic hydrazide (MH-30) to plants during the growing stage. West German health authorities have questioned whether residues of MH-30 in tobacco products may be injurious and German cigarette manufacturers have agreed to limit residues of MH-30 in the smokestream of their cigarettes to not more than 80 ppm. So far, this is a voluntarily agreed tolerance. If the West German Government were to make it mandatory, it would probably be adopted EC-wide and could be used to restrict imports of U.S. leaf.

U.S. leaf tobacco exports to the EC in 1980 were $458 million.

DRY BEANS

In the production of dry beans in portions of the U.S., the defoliant "paraquat" is regularly used. Mexico, which is a major market for U.S. dry beans, considers any food product unsafe if its production has involved the application of this chemical. Mexico does not allow the use of paraquat in producing beans in that country. This trade could be lost if Mexico chose to impose it's domestic requirements on import production.

POULTRY

Arsenicals are banned in poultry production in France and Germany. France already prohibits the import of U.S. poultry meat (not offals) because of this and Germany could do the same. The U.S. shipped $18.6 million worth of poultry meat products (including offals) to the FRG.

SOYBEANS

Japan has discontinued the sale and manufacture of parathion and methylparathion, both of which are used on soybeans in the United States. Japan imported 4 million tons of U.S. soybeans in 1980.

Netherlands, West Germany, and Poland, while not growing soybeans, have overall restrictions against carbophenothion (Netherlands), EPN (Netherlands) and toxaphene (Netherlands). All of these chemicals are registered for soybeans in the United States. The sale of soybeans and products from the United States to those countries was 7.1 million tons in 1980.

APPLES, PEARS AND LEMONS

U.S. fruit producers use fungistats: TBZ, OPP/SOPP, Diphenyl, and Benlate; and antioxidants: Diphenyl Amine (DPA) and Ethoxyquin in post-harvest treatments. For these chemicals, EC countries have differing standards which permit their use by U.S. exporters.

In Finland, post-harvest treatment is permitted on apples and pears with specified tolerance levels on TBZ, OPP/SOPP, Ethoxyquin. Benomyl is approved only for use on citrus fruits.

In Belgium, fungistats TBZ, OPP/SOPP, Diphenyl and Benlate (Benomyl), and antioxidants such as Diphenyl Amine (DPA) and Ethoxyquin are not authorized for use on apples or pears in Belgium. However, Ethoxyquin and Diphenyl Amine are currently under review and might be authorized in the future.

In Denmark, fugicide and antioxidant tolerance levels for imported apples and pears are applied in accordance with FAO/WHO CODEX or EC guidelines in random sampling/test procedures. Except for citrus and bananas, no regulations have yet been issued regarding pesticide residues in or on fruits but decree is expected before end of year.

In France, only three chemical treatments are authorized for post-harvest treatments on apples and pears, as fungicide and antioxidants: 1) Benomyl; 2) Thiabendazole; and 3) Ethoxyquine. All other post-harvest treatments are prohibited, including Diphenyl Amine.

In Germany, the following post-harvest treatments are approved for fresh apples and pears as imported: DPA, tolerance 3ppm; Benomyl, tolerance 2ppm. The following post-harvest treatments are prohibited: OPP/SOPP, Ethoxyquin, TBZ, and Diphenyl.

In Ireland, some fungistats (TBZ, SOPP, and Diphenyl) are permitted for citrus and TBZ is permitted on bananas. No tolerances are listed for apples and pears. Ireland's Department of Agriculture is in the course of framing legislation which will introduce chemical tolerances for a large number of commodities in line with EC implementation of CODEX recommendations.

In the Netherlands, fungicide/antioxidants tolerances for apples and pears are specified for TBZ, OPP/SOPP, Diphenyl, Benlate, Diphenyl Amine, and Ethoxyquin.

In Sweden, post-harvest treatments are permitted on imported apples and pears with tolerance levels as specified: TBZ(6ppm), Opp/SOPP(10ppm), Diphenyl Amine (3ppm), and Ethoxyquin (3ppm).

In Switzerland, no post-harvest treatments are permitted.

In the United Kingdom, DPA may be used on apples and pears if it meets a 10ppm. Use of thiophanate-methyl is governed by recommended safeguards of the Ministry of Agriculture but no tolerance levels are specified.

Major markets for U.S. apple and pear exports found in the EC. Sweden imported $6.5 million of pears in 1980 with only Canada taking a larger portion of U.S. exports. The UK imported $9.5 million and Norway, Finland, and Sweden each imported over $4.0 million. The UK is one of the ten top markets for U.S. apples. The Scandinavian countries also rank high in the top twenty markets.

GENERAL

Certain member states of the EC approve agricultural chemicals on a product-by-product basis and for specific purposes. This is different from the U.S. system which approves the use of substances if they are "generally regarded as safe," i.e., the GRAS list. These substances are then generally used freely.

Our market in the EC and Japan could be seriously affected if these countries prohibited imports from countries that use agricultural chemicals, additives, or hormones not approved for use in the importing country. Our citrus in Japan might be affected. Another example would be the use of Methyl Bromide, Captan, and Aluminum Phosphides on our grains for export to certain countries which do not register these chemicals for their own commodities. Presently, they do accept our grains.

Total U.S. grain exports for 1980 were valued over $27.7 billion.

DEPARTMENT OF AGRICULTURE,
OFFICE OF THE SECRETARY,
Washington, D.C., October 15, 1981.

Hon. E (KIKA) DE LA GARZA,
Chairman, Committee on Agriculture,
Washington, D.C.

DEAR MR. CHAIRMAN: Congressman English has proposed an amendment to the Farm Bill which would amend Section 20 of the Federal Meat Inspection Act (21 U.S.C. 620).

The Department opposes adoption of this amendment.

The English proposal would prohibit importing into the United States meat and meat food products produced using agricultural chemicals or animal drugs which (1) are prohibited from use in this country "by final action as a result of or subject to judicial review" or which (2) the Secretary of Agriculture has determined render such products adulterated under the provisions of the Federal Meat Inspection Act. In addition, it would require the Secretary to inspect such articles through the use of random sampling for residues and species verification.

The Department is concerned that this proposal which would significantly modify the substance of the Federal Meat Inspection Act regarding meat and meat food product imports, should be fully and carefully considered outside the context of the Farm Bill. If after such an assessment, a modification of Section 20 is deemed necessary, appropriate provisions amending the Federal Meat Inspection Act alone would be a more appropriate vehicle than the Farm Bill for enacting such legislation.

The Department is also concerned that the proposed language could limit imports of meat and meat food products which do not pose health risks to the consuming public. An order refusing to approve a new animal drug, for example, may be predicated on factors other than safety, such as the methods used in, and facilities and controls used for the manufacture, processing and packing the product, a product's efficacy, or a product's labeling.

In addition, the amendment would preclude from import a meat or meat food product produced using a prohibited agricultural chemical or animal drug. Thus, even if there were no residue of the chemical or drug in the meat or meat food product at the time of importation, the importation would not be allowed.

The Department is also concerned that importation would be precluded based upon a prohibition of an agricultural chemical or animal drug "by final action . . . subject to judicial review." This language could be construed to mean that during the pendency of judicial review of an administrative agency's decision to prohibit the use of a chemical or drug, importation of meat and meat food products containing such a substance would be precluded, even if the reviewing court had stayed the agency's decision pending review.

Finally, the Department wishes to emphasize that it currently administers a testing program for domestic and imported meat and meat food products which includes sampling for chemical residues. As a result of the recent problem involving imported meat from Australia, the Department has strengthened existing inspection and testing requirements for imported meat and meat food products. These procedures include requiring that countries exporting boneless beef to the United States establish a species monitoring program. Also, an accredited species identification program has been initiated in this country. Having implemented these changes in the inspection procedures for imported meat and meat products, the Department believes that the current law and regulations assure that American consumers receive safe and wholesome inspected meat and meat food products.

The Office of Management and Budget advises that there is no objection to the presentation of this report from the standpoint of the Administration's program.

Sincerely,

C. W. McMILLAN,
Assistant Secretary,
Marketing and Inspection Services.

Mr. GUNDERSON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in strong support of the amendment of the gentleman from Oklahoma (Mr. ENGLISH). There simply is no question that the United States is presently facing a very serious problem relating to the importing of adulterated meat.

The depth of this problem was best illustrated in a front page article of the October 4, 1981, Washington Post that indicated in a recent set of samples of meat scheduled to be imported from Australia and designated as "beef," 24 of the samples were actually horsemeat, 16 were kangaroo meat, and only five samples were beef.

The article further explained that the Australian Government has known about this problem for a number of years and virtually nothing has been done about it.

PROBLEMS WITH THE CURRENT INSPECTION SYSTEM

The cause of this problem can be found in our method of inspecting meat imports. Simply stated, we rely on the countries who export meat to the United States to conduct the requisite inspections at the processing stage as well as when the meat is loaded on the transporting vehicles.

Similarly, I am informed that we have a very minimal number of individuals who monitor these foreign inspections and that their spot checks of the foreign procedures are announced in advance of their arrival.

Additionally, we are all aware of the fact that such inspections are hampered by the usual jurisdictional disputes between the National Government and States rights in Australia.

Finally, during the recent Australian episode, we did not even have the ability to make a test for the kangaroo meat that was allegedly imported into the country as beef. Rather, we had to wait for this to be sent from Australia.

RESULT: NO CONSUMER CONFIDENCE

The failure of foreign inspections to weed out adulterated meat could result in a failure of consumer confidence in meat products. If a consumer is no longer able to know with certainty that he is eating hamburger rather than something else, what else can we expect?

According to USDA figures, half of all meat imports are used in ground beef production. The USDA further estimates that between 30 and 45 percent of all ground beef in the United States contains some imported meat. It is, therefore, very important that all meat—foreign or domestic—be unadulterated. Even slight slip-ups could cause large drops in consumer confidence in meat products.

Clearly, the whole question of consumer safety must be addressed by the Congress here and now. If foreign inspections either accidentally or purposely missed an obvious species problem, how can we expect them to discover subtle residues of harmful chemicals?

RESULT: DAMAGE TO DOMESTIC MEAT PRODUCERS

When consumer confidence in a product diminishes, it is a logical corollary that less product will be purchased and prices will fall as production exceeds consumption. Since there is presently no requirement that foreign meat be labeled differently than domestic meat, problems with meat imports cannot help but impact on the domestic meat industries.

Clearly, we are talking about the possibility of producers going out of business as a result of an inadequate return on their production. Similarly, if less product is consumed, we are also talking about the possibility of processing plants closing or laying off portions of their work force.

Thus, it is important to domestic producers and meat processors to insure that the foreign meat that enters this country be of sufficient quality, as determined by domestic standards, to maintain consumer confidence in meat products.

IMPACT ON OTHER AGRICULTURAL INDUSTRIES

The meat industry has a direct impact on other agricultural industries as well. In my own State of Wisconsin, the dairy industry is directly impacted by the price of beef.

Cull dairy cows provide lean beef when slaughtered. Currently, beef prices are very depressed and dairy farmers are discouraged from reducing the size of their dairy herds. Such discouragement only complicates the present problem of overproduction in the dairy industry as farmers continue to milk their cows rather than reducing their herds.

The correlation between beef prices and the production of milk has been demonstrated mathematically by Robert Cropp of the University of Wisconsin-Platteville for my office. First of all, Mr. Cropp noted that the correlation between an increase in the price of milk and greater production of milk was +0.73. Since a perfect correlation would be +1.00, Mr. Cropp describes the correlation between an increase in the price of milk and greater production of milk as very strong.

In the case of beef prices, Mr. Cropp found a correlation of +0.67 between decreased beef prices and a greater production of milk. This correlation must also be described as very strong. These figures were based on a 10-year comparison of prices and production.

Similarly, a healthy domestic beef industry is important for conservation

purposes as well. Recently, the chairman of the Wisconsin ASCS committee, Wilfred Turba, noted that half of the farmland in Wisconsin should be kept in grass for conservation purposes.

The only real use for this land is to feed dairy or beef cattle. Thus, the long-range productivity of a considerable portion of our range and farmland will be determined by the profitability of our domestic dairy and beef industries.

REMEDY: EQUITABLE STANDARDS

The quality of meat imports into our country, therefore, has a significant impact on consumer demand for meat products as well as on the domestic meat industry, meat processing industry, and other related agricultural industries. Accordingly, there is no reason that I can conceive of as to why we do not require the same inspections of imports that we do for domestic meat products.

There are those who have asserted that any amendment relating to imported meat will adversely affect trade. That argument is simply inaccurate. This amendment will affect the way foreign meat is produced if foreign producers expect to market in the United States. It will not affect foreign trade unless a foreign country or a foreign producer refuses to comply with our domestic production and inspection standards (which, incidentally, is tantamount to an admission that their product is tainted with improper meat or prohibited chemicals).

The bottom line is that current inspections of meat imports do not meet the same standards that inspections of domestic meat products do. All the English amendment does is to require that the standards be the same. Arguably, this could be done by lowering domestic inspections to the same levels as foreign inspections. Such a move, however, flies in the face of consumer safety.

Mr. Chairman, in the interests of equity, consumer safety, and the reputation of the meat industry worldwide, we must upgrade the current inspection standards for foreign meat to insure that the same standards that are applied to domestic meat are actually applied to foreign meat. I, therefore, strongly urge my colleagues to support the English amendment.

Mr. HARKIN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in support of the English amendment and opposed to the gutting amendment offered by the gentleman from Illinois.

I was listening to the debate a little earlier. The gentleman from Minnesota made the comment that this meat contains no traces, and he mentioned Latin America from where a lot of meat comes and where they are using chemicals that are banned here but the meat does not contain any traces of it. The cows do not necessarily eat it, but they may wander in it.

Let me tell the House about something that I discovered a couple of years ago, and if this is not enough to make you decide to vote for the English amendment, nothing will.

I decided as a member of the Agriculture Committee to take a trip to Miami, Fla., and to visit the largest cold storage warehouse in Miami where the imported meat comes in. I wanted to examine this imported meat to trace it all the way from its point of origin, all the way to its final consumption in the United States.

□ 1650

Well, we went to the cold storage warehouse. They receive beef from all over Latin America. There happened to be one large shipment that came in from Nicaragua. We watched to see how they take the samples of this meat. They do not sample every box. They come in 60-pound boxes, I believe it is. As I said, they do not sample every box. They randomly pick one or two or three out of each stack and then run it through and they thaw it out because it is nearly all frozen. Then they take little strips of fat off and they put it into plastic bags and sent it off to be analyzed. Some of it is analyzed by the Government. Some of it is analyzed by private chemical firms that are contracted with by the USDA.

While those samples are sent off for analysis, the meat does not just sit there in the warehouse. No. The samples are sent off for analysis, but the meat from which they were taken leaves the warehouse and is shipped to a meat purveyor. For example, one batch of meat that I know of was sent from Miami to Pittsburgh, Pa. before the analysis, which had been sent to Atlanta, was completed.

So I got my staff to trace this shipment to Pittsburgh, Pa. We found out where it was kept in Pittsburgh. We then found that the meat was then broken up into small blocks, relatively small blocks, and shipped to various packinghouses throughout the United States.

Later, the reports came back from that sample of meat and guess what? Not a one of them passed the analysis because they were all too high in residues of, guess what? DDT. As you know, DDT is banned in this country, but every one of those samples was too high in DDT.

Well, what they do then is put out a call to have all of this meat that has gone out from that batch returned back to that cold storage warehouse in Miami.

OK. Several weeks had gone by. I then traced some of this meat from Pittsburgh to a packinghouse in Mason City, Iowa. It was in late June, just prior to the Fourth of July. I called up the warehouse, the packing plant in Mason City, Iowa, and determined that, yes, they had received a shipment of Nicaraguan meat from Pittsburgh, and I asked them if they were aware that this meat may have been contaminated, that it may have been too high in residues of DDT. Of course they were not aware of it. I then asked them were they aware that a call had gone out to return meat from that particular packing plant. Well, no, they had not been aware of that, but they informed me, "Congressman, it is much too late, that meat has come in. We have already ground it up and already put it into hot dogs." I said, "Hot dogs?"

"Yes, it has already been put in and already shipped out. We only keep shipments of imported meat like that in the plant for a day or two before it is shipped out as hot dogs."

I said, "Under what label?" They said it had gone out under various labels for the Fourth of July trade.

No way is that meat ever recalled back and shipped back out of this country. Typically, it is all eaten before the lab tests are back.

I use that example to show my colleagues that those hot dogs were eaten by Members' children, by Members' families, and they contained high residues of DDT, a well-known carcinogen.

The gentleman from Iowa, my distinguished dean of our delegation, said that these plants in these foreign countries have to have the same kind of inspections that we do. That is required. But the fact is they do not do it. Now the Department of Agriculture has supervisors who travel to foreign countries, so I checked into the supervisors in Latin America. There is one supervisor inspecting beef coming from four countries in Latin America.

The CHAIRMAN. The time of the gentleman from Iowa (Mr. HARKIN) has expired.

(At the request of Mr. SMITH of Iowa and by unanimous consent, Mr. HARKIN was allowed to proceed for 3 additional minutes.)

Mr. HARKIN. He rides the circuit and every time he goes to one of these countries he lets them know that he is coming. They know that he is coming. They clean up their act and get all ready for him when he shows up on the scene.

While they are required to have the same inspections, actually they do not have the same inspection because many of these plants, not only in Latin America, but also in Australia exist for only one purpose, and that is to export meat.

They do not even sell it on their local economy. They get the meat from the ranchers out there where they grow this lean meat. They bring

it into the packing plant. They freeze it and they ship it all out of the country. They do not even put it on their local markets and yet, we are importing it into this country.

Mr. SMITH of Iowa. Mr Chairman, will the gentleman yield?

Mr. HARKIN. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. I thank the gentleman for yielding.

I do not disagree with anything the gentleman says. The point is this: We do have a law like the gentleman says. It is not being adequately enforced because they do not have enough supervisors and they are not doing it right.

The example the gentleman brings up is prohibited now under law and passage of the English amendment is not going to do anything more.

Mr. HARKIN. There was not one law broken or violated.

Mr. SMITH of Iowa. You cannot have residues of DDT in meat under the present law.

Mr. HARKIN. Because when it comes into the country the law allows the meat to go into the channel.

Mr. SMITH of Iowa. That is the matter of how they are administering the law. They should have the samples tested there.

Mr. HARKIN. At that time, the law allowed that, the law has been changed.

Mr. SMITH of Iowa. That was a regulation or a rule.

Mr. HARKIN. The gentleman is right, it was a regulation. However, they still cannot sample every piece of packet of meat that comes into this country.

Mr. SMITH of Iowa. It is supposed to be sampled and examined at the packaging plant and if we had the right supervisors over there they would do it there.

Mr. HARKIN. We do not have that many supervisors. I do not know what it would take, hundreds of supervisors.

Mr. SMITH of Iowa. That is the reason why we need to have adequate supervisors.

Mr. HARKIN. They do not perform adequate chemical sampling of their meat for residues. They do not adequately check to see if it is too high in DDT or whatever.

Mr. DASCHLE. Mr. Chairman, will the gentleman yield?

Mr. HARKIN. I yield to the gentleman from South Dakota.

Mr. DASCHLE. I thank the gentleman for yielding.

I think the story the gentleman tells is an excellent one, but it does not address the whole problem. Much of the imported meat is contaminated. Much of the imported meat goes beyond the chemical residues we find in the meat. This makes it unacceptable. The English amendment only deals with chemical residues. It does not deal with the fact that we are importing kangaroo and other kinds of elements within that meat.

That is why I think a much stronger inspection and a labeling provision is really what we need.

Mr. HARKIN. The gentleman from Iowa (Mr. SMITH) is right, we do need stronger inspections, we do need more supervisors in those countries.

Second, I support the gentleman from South Dakota in saying we ought to have meat labeling. I do not see that it is a trade barrier. I think it is a right of the people in this country to know what they are eating.

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. HARKIN. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. It does contain species verification.

Mr. CRAIG. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the English amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois (Mr. FINDLEY) to the amendment offered by the gentleman from Oklahoma (Mr. ENGLISH) as a substitute for the amendment offered by the gentleman from South Dakota (Mr. DASCHLE).

The question was taken; and on a division (demanded by Mr. FRENZEL) there were—ayes 17, noes 29.

Mr. FRENZEL. Mr. Chairman, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1700

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to rule XXIII, clause 2, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business is the demand of the gentleman from Minnesota (Mr. FRENZEL) for a recorded vote.

A recorded vote was refused.

So the amendment to the amendment offered as a substitute for the amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma (Mr. ENGLISH) as a substitute for the amendment offered by the gentleman from South Dakota (Mr. DASCHLE).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. ENGLISH. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 223, noes, 162, answered "present" 1, not voting 47, as follows:

[Roll No. 275]

□ 1720

The Clerk announced the following pairs:

On this vote:

Mr. Biaggi for, with Mr. Dellums against.

Mr. Hertel for, with Mr. Garcia against.

Mr. Bafalis for, with Mr. O'Brien against.

Mr. Corcoran for, with Mr. Campbell against.

Messrs. PANETTA, SCHUMER, PARRIS, Mrs. BOUQUARD, Messrs. LIVINGSTON, RUSSO, FOUNTAIN, and MILLER of California changed their votes from "aye" to "no."

Mr. FIELDS, Ms. MIKULSKI, Messrs. EDWARDS of California, DONNELLY, WALGREN, QUILLEN, DICKINSON, PETRI, ROTH, and Ms. FERRARO changed their votes from "no" to "aye."

So the amendment offered as a substitute for the amendment was agreed to.

The result of the vote was announced as above recorded.

PARLIAMENTARY INQUIRY

Mr. FINDLEY. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. FINDLEY. On the proposition just voted, am I correct that the Members of this body voted for the English amendment on import restrictions as substitute for the Daschle amendment on requiring labeling of imported items?

□ 1730

Mr. ENGLISH, Regular order, Mr. Chairman. That is not a parliamentary inquiry.

Mr. FINDLEY. Am I correct, Mr. Chairman?

The CHAIRMAN. The gentleman is correct.

Mr. FINDLEY. Mr. Chairman, do I understand that the pending business before the Committee is whether to accept or reject the English amendment, which establishes new restrictions on the import of meat?

Mr. ENGLISH. Regular order, Mr. Chairman.

The CHAIRMAN. The gentleman has characterized the amendment.

The question is on the amendment offered by the gentleman from South Dakota (Mr. DASCHLE), as amended.

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. ENGLISH. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. The gentleman from Oklahoma (Mr. ENGLISH) demands a recorded votre.

PARLIAMENTARY INQUIRY

Mr. ENGLISH. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN, The gentleman will state it.

Mr. ENGLISH. May I ask, Mr. Chairman, is the vote that we are about to take identical to the vote we just completed?

The CHAIRMAN. The vote is on the Daschle amendment, as amended by the English substitute which the House has just adopted.

Mr. ENGLISH. Which is exactly the amendment we just voted on, Mr. Chairman?

The CHAIRMAN. All those in favor of taking this by recorded vote, stand and remain standing until counted.

Evidently a sufficient number. A recorded vote is ordered.

Those in favor of the amendment will vote "aye," and those opposed will vote "no."

Members will record their votes by electronic device.

The vote was taken by electronic device, and there were—ayes 211, noes 168, answered "present" 1, not voting 53, as follows:

□ 1740

The Clerk announced the following pairs:

On this vote:

Mr. Biaggi for, with Mr. Dellums against.

Mr. Hertel for, with Mr. Garcia against.

Mr. Bafalis for, with Mr. O'Brien against.

Mr. Corcoran for, with Mr. Campbell against.

So, the amendment, as amended, was agreed to.

The result of the vote was announced as above recorded.

Mr. ASPIN. Mr. Chairman, I rise to provide a budgetary perspective on the Food and Agriculture Act of 1981. I want to first address the budget impact of the price support provisions in this bill and second to address the budget impact of the food stamp provisions in this bill.

The estimated budgetary impact of the price support provisions in this amended bill are well under the first concurrent budget resolution for fiscal year 1982. The resolution provides for $2,182 million total outlays in fiscal year 1982. The Bedell amended bill would have resulted in estimated total outlays of $2,165 million, $17 million below the resolution. The Bedell amended bill was further amended resulting in estimated outlays being reduced to $2,069 million. This means the present amended bill is an estimated $113 million under the resolution for total fiscal year 1982 net outlays.

The amended bill is also under the resolution in terms of new entitlement authority. The resolution provides for $1,309 million in new entitlement authority. The Bedell amended bill would have resulted in estimated new entitlement authority of $1,228 million, $81 million below the resolution. The bill was further amended resulting in the present amended bill having estimated new entitlement authority of $1,101 million. This means the present amended bill is an estimated $208 million below the resolution for new entitlement authority.

I now want to briefly address the budgetary impact of the food stamp provisions in this bill.

The bipartisan amendment offered by my colleagues, Messers, COLEMAN and RICHMOND, would increase the ceiling on appropriations in fiscal year 1982 to $11.3 billion.

This level is consistent with the estimates which OMB supplied to the Budget Committee just last month. On the other hand, this level exceeds the amount is the Gramm-Latta budget by $650 million.

This increase of $650 million is caused by three factors. First, the administration and the Gramm-Latta budgets did not assume that the cutbacks in social programs which the administration insisted on in the reconciliation process this year would cause any increase in participation or benefit levels in the food stamp program. This assumption was most unrealistic. This lack of realism accounts for $400 million of the $650 million increase. Second, $100 million of the increase reflects delays in the implementation of benefit reductions which the Congress approved this summer in the reconciliation bill. Third, the remaining $150 million is primarily attributable to higher participation in the program because of optimistic economic and participation assumptions made by the administration last spring when it drew up its budget and the Gramm-Latta budget.

What we are being asked to approve in this amendment is a more realistic funding level for the food stamp program. If we were totally realistic, we would be increasing the funding to $12.1 billion. This amendment limits costs to $11.3 billion, however, primarily by delaying the cost-of-living increase for 6 months.

I must warn you that if the administration's economic program does not work, the ceiling of $11.3 billion which this amendment would authorize may not be enough. The program costs for the remainder of this fiscal year will be very sensitive to economic conditions, particularly the unemployment rate.

□ 1750

Mr. STENHOLM. Mr. Chairman, I have a unanimous-consent request which I have cleared on both sides of the aisle, which deals with my amendment which was approved on October 15 to the feed grain section, title IV, where it says, "When such set-aside has been announced, loan rates should be increased * * *".

I ask unanimous consent to change the word "should" to "shall." It was a typographical error.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

AMENDMENT OFFERED BY MR. THOMAS

Mr. THOMAS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. THOMAS: Page 222, after line 25, insert the following new title:

TITLE XVIII——USER FEES FOR REPORTS AND PUBLICATIONS

SEC. 1701. The Secretary of Agriculture is authorized to furnish upon request copies of pamphlets, reports or other publications prepared in the Department in carrying out agricultural economic research and statistical reporting functions authorized by law; and to charge such fees therefor as he may determine to be reasonable: Provided, That the imposition of such charges shall be consistent with the provision of title V of the Act of August 31, 1951, as amended, (31 U.S.C. 483(a)), except that all monies received in payment for work or services performed or for documents, reports, or other publications provided shall be deposited in a separate account or accounts to be available until expended and may be used to pay directly the costs of such work, services, documents, reports or publications, and to repay or make advances to appropriations or funds which do or will initially bear all or part of such costs.

Mr. THOMAS (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. THOMAS. Mr. Chairman, the proposed amendment would allow the Department to establish fees to recover the cost of printing and distributing reports, publications, and documents. Only those members of the public desiring a hard copy of the information would be required to pay, and only for the cost of providing the hard copy.

Mr. DE LA GARZA. Mr. Chairman, will the gentleman yield?

Mr. THOMAS. I yield to the gentleman from Texas.

Mr. DE LA GARZA. Mr. Chairman, we have no objection to the amendment on this side.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. THOMAS).

The amendment was agreed to.

Mr. DE LA GARZA. Mr. Chairman, I ask unanimous consent that debate on all pending amendments and amendments thereto end in one-half hour, the time to be equally divided by the gentleman from Missouri (Mr. COLEMAN) and the gentleman from Texas.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. Are there any further amendments?

AMENDMENT OFFERED BY MR. COLEMAN

Mr. COLEMAN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COLEMAN: Page 222, after line 25, insert the following new title:

TITLE XVII—REFERENCES TO YEARS

TWO-YEAR PROGRAM

SEC. 1701. (a) For purposes of this Act and the amendments made by this Act, references specified in this subsection and appearing in any other section of this Act or in such amendments shall be construed as follows:

(1) Each reference to "terminate December 31, 1985" shall be deemed to be a reference to "terminate December 31, 1983".

(2) Each reference to "'September 30, 1985'" (other than the reference in section 1505(b)) shall be deemed to be a reference to "'September 30, 1983'".

(3) Each reference to "the 1982 through 1985 crops" shall be deemed to be a reference to "the 1982 and 1983 crops".

(4) Each reference to "'1985'" shall be deemed to be a reference to "'1983'".

(5) Each reference to "May 31, 1986" shall be deemed to be a reference to "May 31, 1984".

(6) Each reference to "years 1982 through 1985" shall be deemed to be a reference to "years 1982 and 1983".

(7) Each reference to "'1982 through 1985'" shall be deemed to be a reference to "'1982 and 1983'".

(8) Each reference to "July 31, 1986" shall be deemed to be a reference to "July 31, 1984".

(9) Each reference to "the 1986 crop" shall be deemed to be a reference to "the 1984 crop".

(10) Each reference to "the 1982 through the 1985 crops" shall be deemed to be a reference to "the 1982 and 1983 crops".

(11) Each reference to "the 1985 crop" shall be deemed to be a reference to "the 1983 crop".

(12) Each reference to "each of the 1983, 1984, and 1985 crops" shall be deemed to be a reference to "the 1983 crop"

(b) Notwithstanding any other provision of this Act and the amendments made by this Act, section 201(c) of the Agricultural Act of 1949, as amended by section 101 of this Act, is amended—

(1) by inserting "and" before "(B)"; and

(2) by striking out "; and (C)" and all that follows through "the relevant year".

(c) Notwithstanding any other provision of this Act—

(1) section 18 of the Food Stamp Act of 1977, as amended by section 1336(3) of this Act, is amended by—

(A) inserting "and" after "1982;"; and

(B) by striking out "1983;" and all that follows through "1985" and inserting in lieu thereof "1983";

(2) section 2(b) of the Act of August 4, 1965, as amended by section 1415(a)(2) of this Act, is amended—

(A) by inserting "and" after "1982,"; and

(B) by striking out "$40,000,000" and all that follows through "1985,";

(3) section 4(a) of the Act of July 22, 1963, as amended by section 1416 of this Act, is amended by—

(A) inserting "and" after "1982,", and

(B) striking out "$23,000,000" and all that follows through "1985,";

(4) section 1417(d) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended by section 1417(c) of this Act, is amended—

(A) by inserting "and" after "1982,", and

(B) by striking out "$35,000,000" and all that follows through "1985,";

(5) section 1419(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended by section 1420(2) of this Act, is amended—

(A) by inserting "and" after "1982,";

(B) by striking out ", September 30, 1984, September 30, 1985"; and

(C) by striking out "eight-year" and inserting in lieu thereof "six-year";

(6) section 1433(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended by section 1425 of this Act, is amended by striking out "September 30, 1985" and inserting in lieu thereof "September 30, 1983";

(7) section 1434(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended by section 1426(a) of this Act, is amended by striking out "September 30, 1985" and inserting in lieu thereof "September 30, 1983";

(8) in lieu of any funds authorized by section 1428(b)(5) of this Act to be appropriated to carry out section 1445 of the Food and Agriculture Act of 1977, there is authorized to be appropriated for each of the fiscal years 1982 and 1983 an amount equal to one percent of the aggregate amount of funds appropriated to carry out section 1445 of the Food and Agriculture Act of 1977 in the fiscal year preceding the fiscal year for which funds are authorized to be appropriated under this paragraph;

(9) section 1463(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended by section 1431(a) of this Act, is amended—

(A) by inserting "and" after "1982,"; and

(B) by striking out "$820,000,000" and all that follows through "1985,";

(10) section 1463(b) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended by section 1431(b) of this Act, is amended—

(A) by inserting "and" after "1982,"; and

(B) by striking out "$270,000,000" and all that follows through "1985,";

(11) section 1464 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended by section 1432 of this Act, is amended—

(A) by inserting "and" after "1982,"; and

(B) by striking out "$390,000,000" and all that follows through "1985,";

(12) sections 1484 and 1978(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as added by section 1434 of this Act, is amended by striking out "September 30, 1985" and inserting in lieu thereof "September 30, 1983,"; and

(13) section in lieu of any funds authorized by section 1623 of this Act to be appropriated to carry out in subtitle E of title 16 of this Act, there are hereby authorized to be appropriated, for each of the fiscal years 1983 through 1985, such sums as may be necessary to carry out the provisions of such subtitle, such sums to remain available until expended.

Page 3, insert "TITLE XVII—REFERENCES TO YEARS" immediately before line 1.

Mr. COLEMAN (during the reading). Mr. Chairman, I ask unamimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. COLEMAN. Mr. Chairman, briefly, my substitute incorporates all the changes made in H.R. 3603 by the House, but instead of a 4-year bill it limits it to a 2-year bill for 1982 and 1983 in both commodities and food stamps.

The first 2 years of this bill provides a responsible farm program—a safety net for producers and consumers. It is the last 2 years, in 1984 and 1985, for wheat, feed grains, and dairy, that are too costly and $2 billion over the figures contained in the first budget resolution, contributing $2 billion more to already large 1984 and 1985 deficits.

My substitute protects the farmer. The target prices and loan rates contained in the bill remain unchanged; the English amendment to wheat and the Stenholm amendment to feed grains are retained; the dairy provisions stay the same as in the Bedell amendment.

The only difference is that my substitute provides a 2-year bill, for 1982 and 1983.

It does little good to write a 4-year bill, knowing full well that changing conditions will not allow it to survive its life expectancy.

It is impossible to forecast the needs of farmers 3 and 4 years down the line. We cannot predict the weather, what farm production will be, or intervening international events. It makes a great deal more sense to make these analy-

ses and judgments 2 years from now than today.

In reality, in recent years, we have not had 4-year farm bills. The ink was barely dry on the 4-year 1977 farm bill before the Congress made significant changes in it just 8 months later to provide emergency assistance to grain producers. That same 4-year bill—the one that was designed to last through the 1981 crop year—was amended again last year to adjust target prices for wheat and feed grains and extend the disaster payment program. And one program under the 1977 Farm Act—the dairy price support program—was intentionally and expressly enacted for only a 2-year period.

Some have suggested going with a 1-year extension or a 1-year bill. I do not think that is a very good idea because it allows for too little planning. A 2-year bill provides sufficient continuity for these farm programs so farmers can plan ahead. A 1-year bill would not.

I believe my substitute is economically responsible. It reduces the deficit by $2 billion. It shows that all segments of American society are sacrificing so that all Americans may benefit from lasting economic recovery.

This substitute is realistic. It stands a lot better chance of being signed into law than H.R. 3603 as a 4-year bill. Some will say let us clean it up in conference. I say let us clean it up on the floor and not pass the buck to the conferees or to Members of the other body.

Finally, we are not doing any favors for the American farmer by passing a budget-busting, deficit-ridden farm bill. Farmers are a lot more concerned about the high interest rates they are paying than they are about what is in this bill. The most important thing we can do for all farmers—indeed, for all Americans—is to bring down these drastically high interest rates.

If we pass H.R. 3603 as a 4-year bill with its $2 billion deficit, we are inviting the people at the Federal Reserve and on Wall Street to question whether we are serious about controlling the deficit. The result will be continuing high interest rates that are damaging the farmer even more than any good that might be contained in this bill for 1984 and 1985.

Let us not carry around $2 billion in extra baggage for the next 2 years and get nothing in return but more high interest rates. Let us get rid of it now. That would be the most helpful thing we could do for our farmers.

Mr. WAMPLER. Mr. Chairman, will the gentleman yield?

Mr. COLEMAN. I yield to the gentleman from Virginia.

□ 1800

Mr. WAMPLER. I thank the gentleman for yielding.

Mr. Chairman, I rise in support of the gentleman's amendment.

Inflationary pressures on farmers and changing domestic and world supply and demand situations, during the life of the 1977 Farm Act, have caused major changes in what otherwise would have been a 4-year program.

We have not, in fact, been operating under a 4-year farm program since 1977 but a much modified version of the original legislation.

Given the continuing changing situation in agriculture and the national and world economy today, farmers themselves find it virtually impossible to plan for 4 years ahead with any degree of confidence that their plans will not have to be changed, with or without Federal farm program considerations.

Under the present circumstances, it does seem to me that there is much merit in considering farm legislation that will extend only 2 years into the future, within what I might call a range of predictability. Beyond that 2-year period, the predictability factor becomes fuzzy and subject to many changes not now possible to foresee with accuracy.

Thus, a 2-year farm bill would insure that the Congress would take account of the changing conditions by allowing for changes 2 years hence, or simply extending those programs proved to be working well.

Recent history bears out the fact that the 4-year bill enacted in 1977 has not turned out to be a 4-year program but has had five major amendments, all done to reflect changing conditions since enactment.

The Food and Agriculture Act of 1977, Public Law 95-113, signed into law September 29, 1977, was generally a 4-year farm program hammered out in 1977 with the approval of the Carter administration.

As stated before, the ink was hardly dry on the 1977 Farm Act when it was amended in 1978 by the Emergency Assistance Act of 1978, which provided emergency assistance to producers of wheat, feed grains, and upland cotton.

To refresh my colleagues' memory, here are the other four major amendments enacted:

The milk price support extension amendment of 1979, which extended until September 30, 1981, the requirement that the price of milk be supported at not less than 80 percent of parity;

The Agricultural Adjustment Act of 1980, which adjusted target prices for 1980-81 crops of wheat, feed grains, upland cotton, and rice; extended disaster payment programs for the 1980 crops of wheat, feed grains, upland cotton, and rice; and authorized the Secretary of Agriculture to require that producers of those crops not exceed the normal acreage for the 1980-81 crops;

The corn and wheat farmer-held reserve program of 1980, to encourage greater participation in the reserve programs;

The Agricultural Act of 1980, to increase the minimum price support for wheat, feed grains, and soybeans; to improve the farmer-held reserve program for wheat and feed grains; and to establish a 5-year food security wheat reserve.

In addition, Congress passed the Emergency Agricultural Credit Adjustment Act of 1978 to extend the economic emergency loan program and add $2 billion to the authorized level of total obligations. The 1977 Food Stamp Act has had three major amendments in the last 4 years.

All of these actions were responses to changing conditions which were not foreseen by the Congress when it approved 4-year legislation.

Turning from the commodity programs, we have seen a similar changing situation with the food stamp program.

In late 1970, Congress enacted the first major amendments to the Food Stamp Act. The amendments accepted the administrative changes made in late 1969—uniform and higher allotment schedules and lower purchase requirements, thus larger benefits—and made other substantial changes to liberalize the program, such as annual indexing of food stamp allotments to the rate of food-price inflation.

In 1973, as part of the farm bill, Congress passed the second major set of amendments. And then again in 1977, as part of the farm bill, Congress adopted a completely rewritten Food Stamp Act and repealed the 1964 act. While the Food Stamp Act of 1977 kept some of the basic features of the old food stamp program it also made substantial changes which considerably liberalized the program as to eligibility and benefits and it eliminated the purchase requirement as an incentive for more participation.

The Food Stamp Act of 1977 has been amended three times since the date of enactment, September 29, 1977. But for the fact that most of the changes in the 1977 act did not take effect until fiscal year 1979, there may have been further amendments to the 1977 act.

In 1979, on August 14, Public Law 96-58 increased the authorization for fiscal year 1979 by $620 million. It also provided special medical deductions for the elderly and the disabled; food stamp benefits for the elderly and disabled living in group arrangements; repayment of food stamps fraudulently received; and for States to retain 50 percent of all recoveries through prosecutions or other such activities of stamps fraudulently received.

In 1980, Public Law 96-249 again increased the authorization for the food

stamp program for fiscal years 1980 and 1981 by $3.3 billion and $3.5 billion respectively. Other portions of Public Law 96-249 provided for food stamp benefits for residents of shelters for battered women and children; expanded the dependent care deduction for working adults; expanded the medical deduction for the elderly and the disabled; and provided for the annual adjustment of the thrifty food plan and that the deductions would be based on projected data.

Additionally, Public Law 96-249 provided for the exclusion of energy assistance payments as income for food stamp purposes; States' option to use retrospective accounting and periodic reporting; photo ID cards; and increased funding for States' computerization of the food stamp program. Other provisions of this law include increased funding for States if their rates of error are reduced; sanctions if States' error rates are above the national average; a restriction on student participation in the program; and a reduction in the asset limitation.

In 1981, Public Law 97-18 provided for an increase in the authorization level for fiscal year 1981 of $1.7 billion and continued the SSI cash-out provisions through August 1, 1981.

A 4-year Food Stamp Act did not prevent the Congress from taking action in 3 of the 4 years covered by the act. The only reason that action was not taken in all of the 4 years was that the first provisions of the Food Stamp Act of 1977 were not implemented until 1979.

In 2 of the 3 years, the rules of the program were expanded in some cases and in others there was a tightening of the rules due to program abuses. In all of the 3 years, the authorization levels were increased. The ability for the Congress to act was not hampered or enhanced because the act covered a 4-year period.

Congress will be looking at the food stamp program in the near future no matter whether there is a 4-year bill or not. A 2-year food stamp bill provides no disservice to the participants of this program and may in fact provide a funding level more consistent with the actual cost of the program.

In each instance noted above, when the Food Stamp Act of 1977 was amended, it was not joined with a farm bill amendment but rather was considered alone. A 2-year farm bill with a food stamp title might permit consideration of both.

Mr. Chairman, I offer this historical summary to refresh our minds as to what the Congress has done to reshape a 4-year farm program established in the 1977 act. All of these actions, including the emergency credit program, were responses to changing conditions in agriculture which were not foreseen by the Congress when it approved 4-year legislation.

I offer that as evidence that there is no magic in a 4-year program; in fact, we probably would be called upon to pull more rabbits out of the hat during the course of a 4-year program, just as we have had to make adjustments in the 1977 act.

In the last 4 years, target prices and loan levels and dairy price supports were not permitted to operate as provided for in the 1977 Farm Act. One could argue that target prices and loan levels were set in the Congress as politically arrived at figures. Perhaps it is what must occur when farmers and producers are operating in the atmosphere of an unstable economy with high rates of inflation, high interest rates, and escalating costs of production.

However, one can argue that 2 years, until 1983, will give the Congress and administration time to come up with changes and improvements on existing programs that could be inserted in a 1983 farm bill that will be considered in a better economic climate and that may permit greater market orientation in a farm bill.

I urge support of the amendment.

Mr. DE LA GARZA. Mr. Chairman, I yield 1 minute to the gentleman from Missouri (Mr. VOLKMER).

Mr. VOLKMER. Mr. Chairman, I rise in strong opposition to the amendment of my colleague from Missouri, simply because we have worked so diligently in the committee and now on the floor and spent these many days. We have a good 4-year bill; it is not as good as some of us would like to have it, but we are supporting it. We do not need to cut it back to 2 years and go into the conference with the other body. The chairman of the Agriculture Committee over there has said there will be a 4-year bill.

What it amounts to is we have the first 2 years of the House bill and the last 2 years of the Senate bill, which many of us cannot live with and which is very detrimental to the farmers. It is purely a strategy in order to get the Senate bill actually enacted and not the House bill. The House bill is a lot better for the farmers.

I ask all of my colleagues rather than go back and take this all over again for the next 2 years that we stay with the committee and vote for a 4-year bill and oppose the amendment.

Mr. COLEMAN. Mr. Chairman, I yield 4 minutes to the gentleman from California (Mr. THOMAS).

Mr. THOMAS. Mr. Chairman, I am amazed to find that the gentleman from Missouri is following the lead of the chairman of the Senate Agriculture Committee, and, as a matter of fact, the statement that we would be required to accept the last 2 years of a Senate bill is simply factually incorrect.

Even though this House may vote on a 2-year bill on this side, I think it must be understood—and there is a lot of misconception going on on this floor—even if the House votes 2-year bill, and we go into conference with their 4-year bill, that we do not deal with the Senate figures in the 2 outyears of 1983 and 1984 and 1985, as the ceiling between zero in the House bill and the Senate figures.

As a matter of fact, the Senate figures would be the floor and not the ceiling because, according to the Parliamentarian in terms of his ruling, we would be operating on the House side under the 1949 act, and on both desks we have the parity figures from the 1949 act and, the Members will find that for wheat, rice, cotton, corn, milk, and other nonquota commodities, we have a parity figure between 50 and 65 percent, and in every instance in terms of key commodities that go on to bust the budget at better than $2 billion, we have been trying to knock down to a reasonable figure, since committee, that everyone of those figures under the 1949 act is higher than the Senate figure.

So, it is simply a falacious argument to assume that the figure we will be operating on are the Senate figures. It is just not so.

In terms of loans and in terms of targets, the percentage figures that we have coming out of the House bill can be projected for the final 2 years. So although the House version would be 2 years, and it is 2 years to try to protect a veto, because the 2 outyears are so high in the wheat feed grains and dairy area that we are on a collision course with the administration.

I do not want a vetoed bill. I want a farm bill. I want a farm bill that is reasonable.

If we pass a 4-year bill, the dynamics in the committee—I know many Members on this side are interested in these dynamics—will be a clear collision course with the administration, because the compromise figures between the House side and the Senate side, as we now have the bill structured, are clearly on a veto course.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. THOMAS. I yield to the gentleman from Missouri.

Mr. COLEMAN. I thank the gentleman for yielding.

What the gentleman is saying is that he is surprised that some of our colleagues are taking the lead from the chairman of the other body's Agriculture Committee; is that what the gentleman is saying? And that the figures that we would go into conference with in the outyears are not zero figures, but in fact, would be figures based upon the 1949 act which we use as a floor?

Mr. THOMAS. The 1949 act in every instance on those key commodities is higher than the Senate figures. The

Senate figures will be a floor and not a ceiling. If anyone is assuming that they are voting "no" on a 2-year bill because we have to accept the Senate figures in the 2 outyears, simply does not understand what will be going on in conference.

It is a prudent measure. It is an attempt to come up with a farm bill that can pass, rather than one that is on a veto course for political purposes.

Mr. DE LA GARZA. Mr. Chairman, I yield 2 minutes to the gentleman from Texas (Mr. HIGHTOWER).

Mr. HIGHTOWER. Mr. Chairman, Abraham Lincoln once said, "The Lord must have loved poor people, he made so many of them." Lincoln must have known a lot of farmers.

Not long ago a lady in my district said: "I'm tired of hearing about poor farmers. I know a lot of farmers who are not poor."

That is our problem. Many people do not understand the reason, the philosophy, behind farm programs.

Farm bills should be designed to assure an economic climate for agriculture that will make it possible for the farmer to continue to farm. We are not trying to make farmers rich at the expense of the people who eat. What we are trying to do is make it possible, in a free enterprise system, for a farmer to plant and harvest his crops and support his family from year to year thereby assuring a steady flow of those commodities to the grocery shelves and dinner tables of America.

The consumer, the urban citizen, the white collar and blue collar industrial workers, have the greatest interest in securing a stable agriculture economy.

Now we in Washington are hearing talk about a recession. I do not have to tell the farmers in my area, who are having farm sales to sell their land and equipment before joining the ranks of the unemployed in town, that we are in a recession.

We could not solve all the problems of agriculture in this bill, but we could do better than we have done. My regret is that we could get very little support to raise loan rates on commodities. I understand the fear that high loan rates discourage exports, but we could have raised the rates to a higher level without destroying our world markets.

My fear is that we may be approaching a time in my area when only people who own oil wells will be financially able to own farm land. I view with alarm what I understand to be happening with the purchase of agriculture land by foreign investors—Canadians, West Germans, French, Saudis, and others buying our land.

We must not become tenant farmers to overseas ownership. Neither should we permit a situation to develop when conglomerates and other corporate groups take over more of our agriculture production. Vertical integration of corporate activities would see corporate enterprise producing, processing, packaging, distributing, and selling at the retail level the food that we eat. These things are happening today and will continue.

The increased productivity, the probability of increased exports, the community strength provided by family farm operations contribute a value to this country that must not be endangered or destroyed. We stand to lose much more than numbers if production of food and fiber moves into the hands of the large corporations that are far removed from the land. The family farm that involves the husband, wife, and children as farmers in the 7-day-a-week operation means a commitment to the land that will not be matched in any corporate headquarters. The farm depression is real and will spread if we continue to look the other way. This farm bill is looking the other way. We cannot turn the clock back, nor would we if we could. We must not, however, stand by and see undesirable consequences without trying to do something about it.

This bill is inadequate and I plan to vote against it. I urge the adoption of the 2-year amendment. Even 2 years is too long for an inadequate bill but better than 4 years.

Mr. DE LA GARZA. Mr. Chairman, I yield 1 minute to the gentleman from Iowa (Mr. BEDELL).

Mr. BEDELL. Mr. Chairman, I think it is important that we do understand exactly what we would be doing if we go to a 2-year bill. The gentleman from California is correct in that we would then be able to consider the House bill in those 2 outyears.

There were some people in the House who felt that we should change some of the programs, including peanuts and sugar, for example. I hope everyone would realize since those programs are in the 1949 act that we would be eliminating the conferees from the House side from any opportunity to represent the House position as we go to that bill.

I do not believe it is right to remove the conferees from the opportunity to represent what has been voted here in the House for those last 2 years and I hope we will support the 4-year bill we have already voted for.

Mr. COLEMAN. Mr. Chairman, I yield 5 minutes to the distinguished minority leader, the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Chairman, in my 25 years in this body I have seen many farm bills come and go.

I do not remember a really good farm bill coming out of the Congress. Most of them have been monuments to mediocrity. This bill is no exception.

It is the byproduct of geographical interests, parochial interests, and demographic interests. All of these divergent influences play a legitimate role in the fashioning of any legislation.

Our colleagues on both sides of the aisle have fought hard for the constituencies they represent. That is as it should be. Dairy farmers, peanut growers, or urban dwellers should expect nothing less from their Representatives in this body. I do not fault anyone for that.

Nor can I deny all of the arguments that have been made on this floor on behalf of price supports, loan programs, or acreage allotments.

But there has to be balance. There must be equilibrium between the regional interest and the national interest. I will listen sympathetically to my friend and colleague from Wisconsin when he tells me of the plight of the small dairy farmer in his district. But then, too, I wince when I pick up the Wall Street Journal and see an ad, a serious ad, for a tax-sheltered dairy cow leasing program, or I look at the outyear cost of the dairy price supports.

There has been no real balance struck in this legislation.

There is no sense arguing the specifics anymore. The hour is too late.

Let us just look at what we have.

This bill is over budget. It will cost about $10 billion more than we would like. In just the Reagan budget years it will cost $6.6 billion more than we would like.

And let us face it. These cost estimates are utopian in their optimism. Our economic assumptions have deteriorated rapidly over the course of the last 6 months. We are only beginning to see how bad the economy really is. We are only just beginning to feel the economic pain from past years of neglect and irresponsibility. We are looking down the road to disaster.

While the costs of this bill are rising over the next 4 years, the Federal deficit will be rising too.

I think we ought to stop kidding ourselves. Because of our own neglect, the Federal deficit next year, the year after that, and the year after that could be higher than it is this year, if we do not quit blaming the other guy or looking somewhere else to be fiscally responsible. Can anyone in this body justify an $80 billion deficit? Can anyone in this body explain that to the American people? I do not think so.

Making matters worse is the fact that this bill is a collection of entitlements, which are, in my opinion, more responsible for the failure of our budgetary process than any other element in it.

This bill is a model of Government meddling in the marketplace. It regulates and it controls. It does so over a period of 4 years, locking in economic assumptions, cost projections, and support levels which may be entirely irrel-

evant and irresponsible 4 years from now.

That has been the history of entitlements, and from them has flowed a raging river of red ink that threatens to engulf us.

We can no longer lock in billion-dollar Federal programs for years into the future and then sit back and say there is nothing we can do about them. The time for entitlement reform is now. We can take a small step in that direction here today.

We can adopt the Coleman amendment, reducing the lifespan of this legislation to 2 years, instead of 4. This amendment does not tamper with what the House has done. It embraces all of your decisions, bad as they are and good as they are.

The Coleman amendment will help us bridge the gap between the past and the future. It gives us an opportunity 2 years hence to make adjustments, to keep up with changing times, to balance parochial interests with national interests.

We all know the political realities of this bill. We know who has won. We know who has lost.

We have an opportunity here to help insure that the American people, whether they be farmers or urban dwellers, do not end up the big losers 4 years from now. There is not a family farmer in this Nation or an inner-city consumer in this Nation who will benefit one iota from the provisions of this bill, if we do not turn our economy around in a hurry.

The national interest must be our first priority. That is the big issue today—right here and now.

I hope you will support the Coleman amendment.

□ 1810

Mr. de la GARZA. Mr. Chairman, first let me clarify that the distinguished minority leader, my friend for whom I have great appreciation and respect, was using old figures from the USDA about the bill before our amendments—about the $10 billion and so on.

Second, as much as I have enjoyed being in the limelight here for the past 7 days and some 30 hours, how would you like to do this again next year?

There were some 45 amendments. I think that 4 years is well enough time to do this again.

Let me say also that we are within the budget in 1982. We are below the budget some $170 million.

We are below the Senate bill by some $70 million. That is where we are.

It is true that in the final 2 years there is what the economists say could be an overage, but we do not know. We do not know where we are going to be.

I think that my distinguished friend is not being optimistic enough about the administration, about where this President wants to take us. If unemployment is down, if the intervention of the Government is lifted from producers, if we deregulate, maybe things will be better.

We do not know what the budget resolution is going to be in 1985 or 1984 or 1983.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield.

Mr. COLEMAN. Mr. Chairman, the gentleman just made the greatest speech for this amendment, because we do not know what they are going to be. We do not know what is going to happen out on the farm in 2 years, either.

Mr. DE LA GARZA. That is where the gentleman is mistaken, because the budget can be changed if necessary. We are not doing anything to the $80 billion deficit with our bill as far as 1982 is concerned. That has been done by something else.

Let me just tell the gentleman that we are talking about something very, very important, which is the American agricultural sector. It is the only sector bringing dollars back from abroad, the only one that is helping in the balance of payments.

Also, we discussed during consideration of an amendment how many farmers are going bankrupt. Now, you can have your guns and ships and tanks and missiles and submarines, you can be the strongest nation in the world economically, but if you have no food, forget it. As a friend from Brooklyn said, "Without no food, there ain't no ballgame." That is what we are dealing with tonight.

The farm bill has always been a 4-year bill. The Secretary of Agriculture the last time I discussed it with him was for a 4-year bill.

I think it would be prudent and wise to go to conference, see what we can work out over there as far as the budget is concerned, but the most prudent, the most wise decision would be to give some stability to the farmers, to allow them to plan. They need more time than a 2-year bill to do their planning.

I am an optimist. I believe in the President. He is the only President we have got. He is your President. He is my President. I do not believe in that great American who said, "voodoo economics." I think he has regretted it ever since.

I believe with the leadership we have just some semblance of a safety net; this is no bill that is going to bail anyone out. It is a safety net for the farmers of America.

Mr. PEYSER. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from New York.

Mr. PEYSER. I thank the chairman for yielding.

There is something I would like to be clear on.

Mr. Chairman, if we had a dramatic change in the economic situation, is it not possible that the Congress and the gentleman's committee could act on this bill 1 year from now or 2 years from now if there was a dramatic change?

Mr. DE LA GARZA. Oh, most certainly we could. The fact is that if we had a dramatic change in prices to the farmers, under the target price concept there would be no cost. The cost would be nil. We are dealing here with assumptions.

Mr. PEYSER. In other words, there is nothing that is locking us into anything here by going with a 4-year bill, except giving the committee the opportunity of working: First, in the conference; and second, laying out a program for that period of time, and then if changes have to take place and when our friend, the minority leader spoke of an $80 billion deficit, the gentleman was not talking about the agriculture community, he was talking about what we did on tax legislation. We are getting the two confused.

Mr. DE LA GARZA. He was talking about another area. We are not causing the deficit. The farmers of America are not the drain on the economy. They are not the drain on the budget.

Yes, they impact on the budget some; but look at what they bring back from abroad in dollars. We spoke about trade. We spoke about everything that is needed.

Again, let me tell you, my dear friends, a 4-year bill is what we need for the planning of the farmers. I am optimistic about what is going to happen to our country.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield.

Mr. COLEMAN. The gentleman has told us all the virtues of 1982 and 1983. The gentleman so convinced me that my substitute incorporates everything that the gentleman wants and has what this House has done for 1982 and 1983. There is absolutely no difference. Every line is the same.

The gentleman understands that this is all for farmers and if there is anything that we can do for farmers it is to bring down these interest rates that are eating them up alive, so let us do that.

Mr. DE LA GARZA. Mr. Chairman, I reserve the balance of my time.

Mr. COLEMAN. Mr. Chairman, in my one remaining minute, I would like to point out that there is not one of us that is ready to catch a plane to leave this Chamber that is not going back to his or her district and will talk about these high interest rates, and oh, my gosh, they are terrible.

I wish we could build more homes. I wish we could give you more loans on

the farm. I wish we could do that for you; but all these high interest rates are killing us and the reason they are killing us is because right now is the time for decision. You talk about a deficit, deficits just do not grow on trees. They are an accumulation of bills that we have passed on the floor and for 2 years we are going to carry excess baggage of $2 billion in this deficit that everyone of us is going to go back and talk about how we ought to listen and how we ought to bring down interest rates; so all right, let us end the debate. Let us go to the airport. Let us go home and tell it like it is, and we will all be very untruthful unless we support a 2-year bill.

□ 1820

Mr. DE LA GARZA. Mr. Chairman, to conclude, I agree with the gentleman. But it is not the American farmer that is causing high interest. It is not the American farmer who has put us in the budget deficit that we are in. We cannot balance the budget on the back of the American farmer. We have hurt him enough. The American farmer is the only ray of light. Foreign countries are not buying our cars. They are not buying our television sets. They are not buying our radios. They are not buying anything we produce. They are buying our agricultural commodities. That is what they are buying abroad. And if you limit that, then you are limiting the receipt of income from abroad to the United States.

So do not blame the American farmer for your deficit. Do not blame him for the high interest rates. I am not pointing the finger at anyone. But it has not been the American farmer that has put us in the situation we are in.

Mr. COLEMAN. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield to the gentleman from Missouri.

Mr. COLEMAN. Mr. Chairman, it is not the American farmer. It is you and me. That is who I am blaming.

Mr. DE LA GARZA. Well, the gentleman can take his share of the blame and I will take my share of the blame. But let us not put it on the back of the American farmer. We need a 4-year bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri.

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. COLEMAN. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 180, noes 193, not voting 60, as follows:

[Roll No. 277]

□ 1830

The Clerk announced the following pairs:

On this vote:

Mr. White for, with Mr. Pepper against.

Mr. Bafalis for, with Mr. Biaggi against.

Mr. Campbell for, with Mr. Dellums against.

Mr. Corcoran for, with Mr. Garcia against.

Mr. Forsythe for, with Mr. Guarini against.

Mr. Gingrich for, with Mr. Hertel against.

Mr. McCollum for, with Mr. Jones of North Carolina against.

Mr. O'Brien for, with Mr. Waxman against.

Mr. HOPKINS changed his vote from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

● Mr. HAGEDORN. Mr. Chairman, I would like to express my support for the legislation introduced today requiring foreign countries supplying meat to this country to comply with the same species, residue, and chemical use standards that are applied to U.S. meat.

The amendments are less restrictive than the Melcher amendment passed in the Senate. According to USDA, its provisions would virtually eliminate all meat imports because current law allows meat and meat products containing residues of chemicals and drugs not approved for the same use in the United States to enter the country so long as they do not exceed USDA, FDA, and EPA approved action of tolerance levels. As I understand it, most countries exporting meat to this country use chemicals and drugs not approved for the same use in the United States as well as those not used here because of differing agricultural practices and needs.

In addition, USDA believes that all amendments that have been introduced constitute a nontariff trade barrier. The Melcher amendment assumes that all agricultural chemicals, pesticides, and drugs not approved for use in the United States are not used because they are hazardous. However, because of differing agricultural and climatic conditions in other countries, they use drugs which are not necessary in this country. And, we in fact use chemicals in the production of grain for export which are not registered for use in some foreign countries for their own commodities.

The English amendment would particularly alleviate those concerns. The first clause in the amendment would apply to chemicals and drugs prohibited from use in the United States that have been banned by either agency or court action. It would not cover chemicals and drugs whose use has not been approved in the United States unless a final disapproval of that use has been mandated. If a chemical or drug has never been submitted for approval or is pending approval, it would not be prohibited.

The second clause would apply to agricultural chemicals and drugs that have neither been approved for use in the United States nor been banned from use in the United States. The Secretary would be able to determine whether their use in meat food products would cause it to become adulterated. If a chemical or drug has been approved for use in a foreign country, USDA could determine whether the residues could be injurious to health.

In addition, the President can set aside the application of the first clause if he finds that it would have a damaging effect to the export of U.S. agricultural products.

I feel this amendment will not cause trade barrier problems nor totally cut off meat imports. It is imperative that domestic producers are not required to operate under more restrictive standards than foreign producers. On the other hand, it is not in our interests to completely cut off meat imports. Much of the meat imported is manufacturing grade, which is not in large supply except when large numbers of cows are culled, and is used in processed products—sausages, frankfurters, stews, soups—or ground beef and hamburger, and accounts for only about 6 or 7 percent of total U.S. meat supply. I believe that this amendment would treat all involved parties fairly and support its adoption.

I think that in the event this legislation is not adopted that hearings be held by the Livestock, Dairy, and Poultry Subcommittee of which I am ranking minority member, to receive input from all concerns and then proceed on a markup of a bill that will insure adequate safeguards and procedures on imported meat entering the United States.

Thank you, Mr. Chairman.●

● Mr. ALBOSTA. Mr. Chairman, the farm bill that we are considering today is nowhere near as strong as it should be. Loan rates are too low, dairy price supports are too low, and there is not even a sugar loan program in the bill. For the past 3 weeks, those of us from agriculture districts and agriculture backgrounds have tried to explain to other Members the importance of having a strong farm bill that will help farmers receive a fair return for their commodities.

American agriculture is one of the most productive industries in the world. We are able to feed this entire country and export grain to many parts of the world. American agriculture is so efficient because of the family farm. The 1981 farm bill will not help the family farmer unless loan rates are increased, dairy price supports are adjusted upward, and a sugar program is included.

I believe these types of programs must be in any final 1981 farm bill the Congress approves. If they are not, American agriculture will not be as strong and as productive as it can be in a world of hungry people who desperately need our food. Fifty years ago, this country and particularly the farm economy was in the middle of the worst economic crisis ever known, the Great Depression of the 1930's. Farms were foreclosed on, people went hungry, and the country suffered.

I hope we have learned enough over the years to avoid making the same mistakes that caused the Great Depression and particularly I hope that we will pass a new farm bill that will not further hurt American agriculture. We have the opportunity to enact good agriculture policy for farmers, consumers, and the country. I urge my colleagues to consider this as we move toward passage of the 1981 farm bill.

At the same time, I would also hope that my collegues would realize that farmers must pay whatever the going price is for equipment, seed, herbicides, and feed, while they have absolutely nothing to say about the market price. For these reasons it is necessary for Congress to have some say in how low farm prices are allowed by having a decent loan rate.

Mr. Chairman, I would like unanimous consent to enter into the RECORD a statement by Dale Fast in the Sturgis Journal on Saturday, July 11, 1981, that best sums up the farm situation.

The statement follows:

FARMER NOW HAS A PRAYER

Communications between the farmer and his city friends is a constant challenge.

The grass on the other side of the fence always looks greener. But when we get over there we find it's just as hard to mow. Our city friends don't understand the farmers plight and the farmer sometimes doesn't understand that his city cousin has problems, too.

The farmer is a patient man—patient, determined, and proud. He has to be patient. He'll lose a crop and come right back next spring with a grin and an 80-hour week. He battles the weather and machinery breakdown to get the crop planted. He spends hundreds of dollars per acre for seed, fertilizer, and pesticides, knowing full well that frost or drought may get it, and if not, the bugs will—and if there is any left, a hail storm will probably finish it off. So he has to be a patient and determined person to be a farmer.

But there are some things he just doesn't understand.

I've seen wall plaques for the housewife, golfer and even one for a sunday afternoon driver. Perhaps we need a prayer for the farmer to help him understand. It might go something like this:

"Help me to understand, Lord, why a person will pay $1.50 for a four ounce drink in a bar and say "Gimme another one", but you charge him $1.85 for a whole gallon of milk and he'll say "boy, that's expensive".

"Help me to understand why a Japanese autoworker will pay $17.00 for a lb. of steak in a grocery store and a U.S. auto worker, who draws wages of $8.00 per hour more than the Japanese worker, will look at steak in the meat counter at $3.25 per pounds and he'll shake his head and say, "Food costs are just too high."

And help me to understand, Lord, why when I borrow $5,000 to paint my barn and put a new roof on my house, the tax assessor raises my taxes even though I don't have any more equity in the place.

And maybe, Lord, you can help me to understand why some people shake their heads when a farmer pays for power steering and air conditioning on his tractor, which he uses 12 to 14 hours a day in a hot dusty field, when they buy the same thing on an automobile to drive down a smooth blacktop road for less than an hour a day.

And, Lord, help me to understand why the weeds always grow the fastest in my corn field at a time when my city cousin says the fish are biting the best, and invites me to go along fishing on his weekends off, or after he gets out of work at 3:30 p.m.

And could you help me understand how the raccoons know exactly when to raid my sweet corn patch the night before I think it's ready for the freezer?

And please help me to understand why the output per worker in our factories has gone down to a point that unit labor costs have doubled in the last five years, while efficiency of the American farmer has in-

creased to a point where each farmer feeds himself and 67 other people.

And, oh yes Lord, with half of the world's population going to bed hungry every night I just can't understand why people aren't more thankful that our main problem in the USA is, "why can't I stay on my diet with so much food on the table."

Now, I'm not complaining, Lord, I'm used to hard work and disappointment. But I've read in my favorite book that you also had trouble with human nature at times, when you were here, and I will be so grateful if you can help my understanding in these matters about which I am so confused.●

● Mr. FRENZEL. Mr. Chairman, I usually vote for any major farm bill on the theory that we need one. In the case of H.R. 3603, we need it like we need a bad accident.

We rejected peanuts, but defended tobacco, a very similar program. We left milk subsidies high, but we dumped sugar. There is no rational thread of consistency in this bill at all.

The bill is a budget buster. We have cut social programs. We will cut military programs. It is hardly reasonable that farm entitlement programs should escape.

The protectionist sections are the worst. The industry most reliant on markets abroad has suckered for protectionism. The industry which most needs free trade has shot itself in the foot.

I would prefer not to have a part in passing this bill. I must vote against it.●

● Mr. ALBOSTA. Mr. Chairman, I had planned to offer an amendment to H.R. 3603, the 1981 farm bill that would establish a Grain Elevator Insurance Corporation. In my own State of Michigan and in other parts of the country we have seen grain elevators run into economic trouble and go bankrupt. Farmers as a result have been unable to get their grain out of the bankrupt elevator, or the grain just was not there.

My amendment, which is really H.R. 2523, would establish a Grain Elevator Insurance Corporation to be run in a similar manner to the Federal Deposit Insurance Corporation that insures our savings accounts in banks. The insurance fund would be financed by a 0.5 cent checkoff on each bushel of grain stored in a commercial elevator. The insurance would be limited to $100,000 per farmer in a particular elevator. This program would be run through existing ASCS Offices and in cooperation with State department of agriculture.

In addition, and this is most important, the grain elevator insurance fund will be limited to a total of $25 million at any one time. Therefore, the 0.5 cent checkoff will only be required until the insurance fund reaches $25 million or in the event that it goes below $25 million should there be any claims paid out under the program.

I am not offering my amendment today because I have been assured by the chairman of the Agriculture Subcommittee that will handle this legislation. The distinguished gentleman from Washington, that hearings will be held by the subcommittee this session on H.R. 2523. I would hope that after these hearings this bill could be moved through Congress before it adjourns. Just recently the General Accounting Office issued a report that shows that 5 percent of federally and State licensed elevators are in financial trouble. Abut 300 of the Nation's elevators fall into this troubled category. I believe Congress must act before we see more grain elevator bankruptcies and more farmers hurt in the process.●

● Mr. HAGEDORN. Mr. Chairman, I rise in support of the 2-year amendment to H.R. 3603. As we are all aware, the estimated commodity outlays under the bill for wheat, feed grains, and dairy will exceed the first concurrent budget resolution restraints for the outyears fiscal 1983, 1984, and 1985.

In the amendment introduced, the dairy provisions would be the same as those in the Bedell amendment that was passed by this body earlier this month. For fiscal year 1982, the price support for milk would be set at a minimum level of $13.10 per hundredweight, which brings outlays into line with the budget resolution. That level is currently at 72.5 percent of parity. According to Congressional Budget Office estimates, net outlays would exceed the budget resolution by $241 million. While that is unacceptable, further adjustments would likely be forthcoming in conference.

Government stocks of cheese, butter and nonfat dry milk increased from 1 billion pounds in fiscal year 1980 to 1.8 billion pounds in fiscal year 1981, an 80-percent increase. Total net removals, on a milk equivalent basis, increased from 8.2 billion pounds to 12.6 billion pounds over the same time period. It is obvious that this trend must be reversed. USDA estimates that net removals will be in the 6 billion pound range in fiscal year 1983 if a support level of 72.5 percent is established. This would be a 2.5 billion pound reduction from fiscal year 1982. Thus, I believe the dairy provisions in this amendment will bring purchases down and adjust milk supply in relation to domestic and foreign demand.

Concerning wheat and feed grains, the amendment provides target prices and loan levels that are projected to result in outlays that are in excess of the budget resolution. Loan rates should be set so that they can provide income protection during periods of oversupply and weak prices and yet not provide too wide a spread from the loan level, which could result in unnecessary and excessive deficiency payments. I would hope that a fair compromise can be obtained when this legislation is debated in conference.

In the past, a 4-year farm bill has not proved to be totally effective. Since 1977, inflationary pressures have prompted Congress to amend various provisions. The dairy provisions in the Food and Agriculture Act of 1977 were amended in 1979 to extend the minimum support level of 80 percent of parity from March 30, 1979, to September 30, 1981. The semiannual adjustment was also extended from March 31, 1979, to September 30, 1981. Both of these changes drastically altered the dairy support program causing overproduction and excessive government inventories of milk products. Adjustments in the loan and target prices for wheat and feed grains also occurred after passage of the 1977 farm bill.

Today, we are faced with record wheat and corn production, prohibitive interest rates, and grain exports which are currently only approaching levels of a year ago. Weather, variable domestic and world crop production, uncertain political climate and an economy faced with high inflation and interest rates make it also impossible to mandate farm programs 4 years in the future. A 2-year farm bill would allow Congress the flexibility to adapt to these changing conditions and provide producers farm programs that provide stability to the agricultural sector. For these reasons, I support the 2-year amendment.

Thank you, Mr. Chairman.●

The CHAIRMAN. Are there additional amendments to the bill? If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the Chair, Mr. MCHUGH, Chairman of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 3603) to provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes, pursuant to House Resolution 235, had directed him to report the bill back to the House with sundry amendments adopted by the Committee of the Whole.

□ 1840

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT

Mr. RINALDO. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. RINALDO. Yes, I am, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. RINALDO moves to recommit the bill, H.R. 3603, to the Committee on Agriculture.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

Mr. DE LA GARZA. Mr. Speaker, pursuant to House Resolution 235, I call up from the Speaker's table a similar Senate bill (S. 884) to revise and extend programs to provide price support and production incentives for farmers to assure an abundance of food and fiber, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

MOTION OFFERED BY MR. DE LA GARZA

Mr. DE LA GARZA. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. DE LA GARZA moves to strike out all after the enacting clause of the Senate bill, S. 884, and to insert in lieu thereof the provisions of the bill, H.R. 3603, as passed, as follows:

That this Act with the following table of contents may be cited as the "Food and Agriculture Act of 1981".

TABLE OF CONTENTS

TITLE I—DAIRY PRODUCTION ACT OF 1981
TITLE II—WOOL AND MOHAIR
TITLE III—WHEAT
TITLE IV—FEED GRAINS
TITLE V—COTTON
TITLE VI—RICE
TITLE VII—PEANUTS
TITLE VIII—SOYBEANS
TITLE IX—GENERAL AND MISCELLANEOUS COMMODITY PROVISIONS
TITLE X—NATIONAL AGRICULTURAL COST OF PRODUCTION STANDARDS REVIEW BOARD
TITLE XI—EXPORT PROVISIONS
TITLE XII—FOOD STAMP AND COMMODITY DISTRIBUTION AMENDMENTS OF 1981
TITLE XIII—NATIONAL AGRICULTURAL RESEARCH, EXTENSION, AND TEACHING POLICY ACT AMENDMENTS OF 1981
TITLE XIV—CREDIT, RURAL DEVELOPMENT, AND FAMILY FARMS
TITLE XV—CONSERVATION
TITLE XVI—CONTINUATION OF FEDERAL CROP INSURANCE PILOT PROGRAMS
TITLE XVII—CONFERENCE
TITLE XVIII—IMPORTED MEAT
TITLE XIX—USER FEES FOR REPORTS AND PUBLICATIONS

TITLE I—DAIRY PRODUCTION ACT OF 1981

MILK PRICE SUPPORT

SEC. 101. Section 201 of the Agricultural Act of 1949, as amended by section 150 of the Omnibus Budget Reconciliation Act of 1981, is amended by—

(1) striking out everything after the first sentence of subsection (c) and inserting in lieu thereof the following: "Notwithstanding the foregoing, (A) effective for the period beginning with the date of enactment of this provision and ending September 30, 1982, the price of milk shall be supported at such level as determined by the Secretary, but not less than $13.10 per hundredweight for milk containing 3.67 per centum milk fat; (B) effective for the period beginning October 1, 1982, and ending September 30, 1983, the price of milk shall be supported at such level as determined by the Secretary, but not less than 72.5 per centum of the parity price therefor; and (C) effective thereafter for each subsequent fiscal year through the year ending September 30, 1985, the price of milk shall be supported at a level of not less than 70 per centum of parity, except that whenever the Secretary estimates that net Government price support purchases of milk or the products of milk will be less than 3.5 billion pounds (milk equivalent) during any of said latter two fiscal years, the price of milk shall be supported at such level as determined by the Secretary, but not less than 75 per centum of the parity price therefor as of the beginning of the relevant fiscal year. Such price support shall be provided through the purchase of milk and the products of milk."; and

(2) striking out subsection (d) in its entirety.

PRODUCER HANDLERS

SEC. 102. The legal status of producer handlers of milk under the provisions of the Agricultural Adjustment Act, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended, shall be the same subsequent to the adoption of the amendment made by this Act as it was prior thereto.

FEDERAL MILK MARKETING ORDERS

SEC. 103. (a) The Agricultural Adjustment Act, as reenacted and amended by the Agricultural Marketing Agreement Act of 1937 is further amended by—

(1) striking in subparagraph (B) of subsection 8(c)(5) all that part of said subparagraph (B) which follows the semicolon at the end of clause (c) and inserting in lieu thereof the following: "(d) a further adjustment to encourage seasonal adjustments in the production of milk through equitable apportionment of the total value of the milk purchased by any handler, or by all handlers, among producers on the basis of their marketings of milk during a representative period of time, which need not be limited to one year; and (e) a provision providing for the accumulation and disbursement of a fund to encourage seasonal adjustments in the production of milk may be included in an order.".

(2) striking the period at the end of subsection 8c(17) and adding in lieu thereof the following: ": *Provided further*, That if one-third or more of the producers as defined in a milk order apply in writing for a hearing on a proposed amendment of such order, the Secretary shall call such a hearing if the proposed amendment is one that may legally be made to such order. Subsection (12) of this section shall not be construed to permit any cooperative to act for its members in an application for a hearing under the foregoing proviso and nothing in such proviso shall be construed to preclude the Secretary from calling an amendment hearing as provided in subsection (3) of this section. The Secretary shall not be required to call a hearing on any proposed amendment to an order in response to an application for a hearing on such proposed amendment if the application requesting the hearing is received by the Secretary within ninety days after the date on which the Secretary has announced his decision on a previously proposed amendment to such order and the two proposed amendments are essentially the same."; and

(3) inserting after the phrase "pure and wholesome milk" in section 8c(18) the phrase "to meet current needs and further to assure a level of farm income adequate to maintain productive capacity sufficient to meet anticipated future needs".

(b) The provisions of subsection (a) shall become effective January 1, 1982 and shall terminate December 31, 1985.

TRANSFER OF DAIRY PRODUCTS TO THE MILITARY AND VETERANS HOSPITALS

SEC. 104. Section 202 of the Agricultural Act of 1949, as amended, is amended by striking out "1981" in subsections (a) and (b) and inserting in lieu thereof "1985."

DAIRY INDEMNITY PROGRAM

SEC. 105. The Act of August 13, 1968 (82 Stat. 750, as amended; 7 U.S.C. 450 j, k, and l), is amended by striking out "September 30, 1981" in section 3 and inserting in lieu thereof "September 30, 1985".

ENCOURAGEMENT OF EXPORTATION AND DOMESTIC CONSUMPTION OF DAIRY PRODUCTS

SEC. 106. (a) The Secretary of Agriculture is encouraged to utilize, to the fullest extent practicable, the provisions of section 32 of Public Law 320, Seventy-fourth Congress (7 U.S.C. 612c), title II of the Agricultural Trade Development and Assistance Act of 1954, and other commodity distribution programs of the Department of Agriculture, for the purpose of disposing of excess inventories of dairy products held by the Commodity Credit Corporation.

(b) The Secretary shall examine the feasibility of using inventories of nonfat dry milk held by the Commodity Credit Corporation, and other excess supplies of dairy products, to assist in the production of casein and caseinates in order to reduce the impact that the importation of foreign sub-

sidized casein and other milk protein products is having on the dairy price support program. The Secretary shall notify within ninety days after this legislation becomes effective, in writing, the chairman of the Senate Committee on Agriculture, Nutrition, and Forestry and the chairman of the House Committee on Agriculture of the results of such an examination.

REGIONAL FOOD SECURITY

SEC. 107. In order to better balance the supply of and demand for fluid milk and milk products within specific regions within the continental United States and in order to guarantee regional food security, the Secretary of Agriculture shall submit to Congress, not later than one year following the effective date of this subtitle, recommendations regarding the design and administration of the Federal dairy support program and milk marketing orders in order to guarantee regional production self-sufficiency and food security.

SEC. 108. The Secretary is authorized and encouraged to enter into an agreement with representatives of the Union of Soviet Socialist Republics to effect the sale of up to 220 million pounds of butter at $1.05 per pound (acquired by the government at a cost of approximately $1.50 per pound) and the sale of such amounts of non-fat dry milk at 50 cents per pound and cheese at 68 cents per pound (acquired at a cost to the government of approximately 94 cents per pound and $1.40 per pound, respectively) as can be agreed to by the respective parties to such agreement.

TITLE II—WOOL AND MOHAIR

EXTENSION OF ACT; SUPPORT PRICE

SEC. 201. Section 703 of the National Wool Act of 1954 is amended by—

(1) striking out "1981" in subsection (a) and inserting in lieu thereof "1985"; and

(2) striking out "1981" in subsection (b) and inserting in lieu thereof "1985".

TITLE III—WHEAT

WHEAT LOAN RATES, TARGET PRICES, AND PAYMENTS

SEC. 301. Effective only for the 1982 through 1985 crops of wheat, subsections (a) through (c) of section 107A of the Agricultural Act of 1949 are amended to read as follows:

"SEC. 107A. Notwithstanding any other provision of law—

"(a) The Secretary shall make available to producers loans and purchases for the 1982 crop of wheat at not less than $3.55 per bushel and for each of the 1983 through 1985 crops of wheat at not less than such level as bears the same ratio to the loan level for the preceding year's crop as the established price for each such crop bears to the established price for the preceding year's crop: *Provided*, That if the Secretary determines that the average price of wheat received by producers in any marketing year is not more than 105 per centum of the level of loans and purchases for wheat for such marketing year, the Secretary may reduce the level of loans and purchases for wheat for the next marketing year by the amount the Secretary determines necessary to maintain domestic and export markets for grain, except that the level of loans and purchases shall not be reduced by more than 10 per centum in any year nor below $3 per bushel.

"(b)(1)(A) In addition, the Secretary may make available to producers payments for each of the 1982 through 1985 crops of wheat in an amount computed as provided in this subsection: *Provided*, That the Secretary shall make such payments available to producers of any such crop if the domestic carryover from the previous year's crop of wheat exceeds one billion bushels. Payments for each of the 1982 through 1985 crops shall be computed by multiplying (i) the payment rate, by (ii) the farm program acreage for the crop, by (iii) the farm program payment yield for the crop. In no event shall payments be made under this paragraph for any of the 1982 through 1985 crops on a greater acreage than the acreage actually planted to wheat.

"(B) The payment rate for wheat shall be the amount by which the higher of—

"(i) the national weighted average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(ii) the loan level determined under subsection (a) of this section for such crop

is less than the established price per bushel. For the 1982 crop of wheat the established price shall be $4.20 per bushel, and for each of the 1983 through 1985 crops of wheat, the established price shall be the established price for the previous year's crop adjusted to reflect any change in (a) the average adjusted cost of production per acre estimated for the two-year period which includes the crop year for which the established price will be applicable and the immediately preceding crop year, from (b) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the established price will be applicable. The adjusted cost of production for each of such years shall be determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate for the purpose and shall be limited to (i) variable costs, (ii) machinery ownership costs, and (iii) general farm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop. In determining the established price under this subsection and the loan rate under subsection (a) for the 1984 and 1985 crops, the Secretary shall use as a base in making adjustments the established price and loan rate for the previous years that would have resulted had the actual cost of production figures, as determined by the Secretary for those years, been used.

"(C) Notwithstanding the foregoing provisions of this section, if the Secretary adjusts the level of loans and purchases for wheat in accordance with the proviso in subsection (a) of this section, the Secretary shall provide emergency compensation by increasing the established price payments for wheat by such amount (or if there are no such payments in effect for such crop by providing for payments in such amount) as the Secretary determines necessary to provide the same total return to producers as if the adjustment in the level of loans and purchases had not been made: *Provided*, That any payments under this subparagraph shall not be included in the payments subject to limitations under the provisions of section 101 of the Food and Agriculture Act of 1977.

"(D) The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2) of this subsection.

"(2)(A) Except as otherwise provided in subparagraph (C) of this paragraph, effective with respect to the 1982 through 1985 crops of wheat, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for wheat to wheat or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to wheat for harvest (including any acreage which the producers were prevented from planting to wheat or other nonconserving crop in lieu of wheat because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 33⅓ per centum of the established price per bushel for wheat.

"(B) Except as otherwise provided in subparagraph (C) of this paragraph, effective with respect to the 1982 through 1985 crops of wheat, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of wheat which the producers are able to harvest on any farm is less than the result of multiplying 60 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a farm disaster payment to the producers at a rate equal to 50 per centum of the established price for the crop for the deficiency in production below 60 per centum for the crop.

"(C) No person shall be eligible to receive disaster payments for any crop of wheat under this paragraph in any county in which crop insurance, part of the premium for which is paid by the Federal Crop Insurance Corporation under the provisions of section 508(b)(3) or 508(e) of the Federal Crop Insurance Act, is generally offered for that crop prior to planting.

"(c) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.".

PROGRAM ACREAGES, PAYMENT YIELDS, AND SET-ASIDE PROGRAM

SEC. 302. Subsections (d) through (i) of section 107A of the Agricultural Act of 1949 effective for the 1978 through 1981 crops of wheat shall be effective for the 1982 through 1985 crops amended by—

(1) amending the first two sentences of subsection (d)(1) to read as follows: "The Secretary shall proclaim a national program acreage for each of the 1982 through 1985 crops of wheat. The proclamation shall be made not later than August 1 of each calendar year for the crop harvested in the next succeeding calendar year.";

(2) in the first sentence of subsection (d)(3) striking out all after "the proclamation of the national program acreage" and inserting a period in lieu thereof;

Strike lines 21 through 24, page 16, and substitute the following:

(3) amending the first three sentences of subsection (f)(1) to read as follows: "The Secretary shall provide for a set-aside of cropland for any marketing year if the Secretary estimates that the domestic carry over of wheat at the end of the marketing year preceding the year for which the set-aside determination is made will exceed 6 per centum of total world usage for that year. If a set-aside of cropland is in effect

under this subsection, then as a condition of eligibility for loans, purchases, and payments authorized by this section, the producers on a farm must set-aside and devote to conservation uses an acreage of cropland equal to a specified percentage, as determined by the Secretary, but in any case not less than 15 per centum of that farm's previous year's plantings. When such set-aside has been announced, loan rates shall be increased by 5 per centum above the level established in Section 107A. The producer may, at his option, elect to set-aside 30 per centum of the farm's previous year's plantings, in such case the producer shall be eligible for a loan rate 15 per centum higher than the level established in section 107A. The Secretary shall announce any such set-aside not later than August 1, prior to the calendar year in which the crop is harvested, except that in the case of the 1982 crop, the Secretary shall announce such set-aside as soon as practicable after enactment of the Food and Agriculture Act of 1981. For the 1982 through 1985 crops, the Secretary shall permit the set-aside acreage to be devoted to haying and grazing."; and

(4) amending the third sentence of subsection (f)(1) by deleting the period and adding ": *Provided*, That in applying the provisions of this Section to land that has been farmed under summer fallow practices on three of the five years prior to the requirement of a set-aside, the Secretary shall consider the effects of soil erosion and such other factors as he considers appropriate in determining the amount of land to be idled: *Provided further*, That in no case shall the Secretary require farmers to idle more than 60 per centum of their cropland when included with land already idled by summer fallow practices where summer fallow practices are in effect: *Provided further*, That the Secretary shall issue rules and regulations defining 'summer fallow'.".

NONAPPLICABILITY OF CERTIFICATE REQUIREMENTS

SEC. 303. Sections 379d, 379e, 379f, 379g, 379h, 379i, and 379j of the Agricultural Adjustment Act of 1938 (which deal with marketing certificate requirements for processors and exporters) shall not be applicable to wheat processors or exporters during the period June 1, 1982, through May 31, 1986.

SUSPENSION OF MARKETING QUOTAS AND PRODUCER CERTIFICATE PROVISIONS

SEC. 304. Sections 331, 332, 333, 334, 335, 336, 338, 339, 379b, and 379c of the Agricultural Adjustment Act of 1938, shall not be applicable to the 1982 through 1985 crops of wheat.

SUSPENSION OF QUOTA PROVISIONS

SEC. 305. Public Law 74, Seventy-seventh Congress (55 Stat. 203, as amended) shall not be applicable to the crops of wheat planted for harvest in the calendar years 1982 through 1985.

NONAPPLICABILITY OF SECTION 107 OF THE AGRICULTURAL ACT OF 1949

SEC. 306. Section 107 of the Agricultural Act of 1949, as amended, shall not be applicable to the 1982 through 1985 crops of wheat.

TITLE IV—FEED GRAINS

FEED GRAINS LOAN RATES, TARGET PRICES AND PAYMENTS

SEC. 401. Effective only for the 1982 through 1985 crops of feed grains, subsections (a) through (c) of section 105A of the Agricultural Act of 1949 are amended to read as follows:

"SEC. 105A. Notwithstanding any other provision of law—

"(a)(1) The Secretary shall make available to producers loans and purchases for the 1982 crop of corn at not less than $2.65 per bushel and for each of the 1983 through 1985 crops of corn at not less than such level as bears the same ratio to the loan level for the preceding year's crop as the established price for each such crop bears to the established price for the preceding year's corp: *Provided*, That if the Secretary determines that the average price of corn received by producers in any marketing year is not more than 105 per centum of the level of loans and purchases for corn for such marketing year, the Secretary may reduce the level of loans and purchases for corn for the next marketing year by the amount the Secretary determines necessary to maintain domestic and export markets for grain, except that the level of loans and purchases shall not be reduced by more than 10 per centum in any year nor below $2 per bushel.

"(2) The Secretary shall make available to producers loans and purchases on each of the 1982 through 1985 crops of barley and rye, respectively, at such level as the Secretary determines is fair and reasonable in relation to the level that loans and purchases are made available for corn, taking into consideration the feeding value of such commodity in relation to corn and other factors specified in section 401(b) of this Act, and on each crop of grain sorghums at such level as the Secretary determines is fair and reasonable in relation to the level that loans and purchases are made available for corn, taking into consideration the feeding value and average transportation costs to market of grain sorghums in relation to corn.

"(3) The Secretary shall make available to producers loans and purchases on each of the 1982 through 1985 crops of oats, at such level as the Secretary determines is fair and reasonable in relation to the level that loans and purchases are made available for corn, wheat, and barley, taking into consideration the weight of a bushel of oats as compared to these comparison grains, the value of oats as a specialty animal feed, the value of oats as a human food, the value of oats as a soil conservation crop, and other factors specified in section 401(b) of this Act: *Provided*, That the level of loans and purchases on each such crop of oats shall not be less than a rate computed by multiplying the loan rate for each comparison crop by a fraction, the denominator of which is the weight of a bushel of the comparison crop and the numerator of which is the weight of a bushel of oats, adding the resulting numbers and dividing by three.

"(b)(1)(A) In addition, the Secretary may make available to producers payments for each of the 1982 through 1985 crops of corn, grain sorghums, and, if designated by the Secretary, oats and barley, in an amount computed as provided in this subsection: *Provided*, That the Secretary shall make such payments available to producers of any such crop of corn and grain sorghums if the domestic carryover from the previous year's crop of corn exceeds 1.3 billion bushels. Payments for each of the 1982 through 1985 crops shall be computed by multiplying (i) the payment rate, by (ii) the farm program acreage for the crop, by (iii) the farm program payment yield for the crop. In no event shall payments be made under this paragraph for any of the 1982 through 1985 crops on a greater acreage than the acreage actually planted to such feed grains.

"(B) The payment rate for corn shall be the amount by which the higher of—

"(i) the national weighted average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(ii) the loan level determined under subsection (a) of this section for such crop

is less than the established price per bushel. For the 1982 crop of corn, the established price shall be $2.90 per bushel and for each of the 1983 through 1985 crops of corn, the established price shall be the established price for the previous year's crop adjusted to reflect any change in (a) the average adjusted cost of production per acre estimated for the two-year period which includes the crop year for which the established price will be applicable and the immediately preceding crop year, from (b) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the established price will be applicable. The adjusted cost of production for each of such years shall be determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate for the purpose and shall be limited to (i) variable costs, (ii) machinery ownership costs, and (iii) general farm overhead costs, allocated to the crops involved on the basis of the proportion of the value of the total production derived from each crop. In determining the established price under this subsection and loan rate under subsection (a) for the 1984 and 1985 crops, the Secretary shall use as a base in making adjustments the established price and loan rate for the previous years that would have resulted had the actual costs of production, as determined by the Secretary for those years, been used.

"(C) Notwithstanding the foregoing provisions of this section, if the Secretary adjusts the level of loans and purchases for corn in accordance with the proviso in subsection (a)(1) of this section, the Secretary shall provide emergency compensation by increasing the established price payments for corn by such amount (or if there are no such payments in effect for such crop by providing for payments in such amount) as the Secretary determines necessary to provide the same total return to producers as if the adjustment in the level of loans and purchases had not been made: *Provided*, That any such payments under this subparagraph shall not be included in the payments subject to limitations under the provisions of section 101 of the Food and Agriculture Act of 1977.

"(D) The payment rate for grain sorghums, and if designated by the Secretary, oats and barley, shall be such rate as the Secretary determines fair and reasonable in relation to the rate at which payments are made available for corn.

"(E) The total quantity on which payments would otherwise be payable to a producer on a farm for any crop under this paragraph shall be reduced by the quantity on which any disaster payment is made to the producer for the crop under paragraph (2) of this subsection.

"(2)(A) Except as otherwise provided in subparagraph (C) of this paragraph, effective with respect to the 1982 crop of feed grains, if the Secretary determines that the producers on a farm are prevented from planting any portion of the acreage intended for feed grains to feed grains or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented

planting disaster payment to the producers on the number of acres so affected but not to exceed the acreage planted to feed grains for harvest (including any acreage which the producers were prevented from planting to feed grains or other nonconserving crop in lieu of feed grains because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by 75 per centum of the farm program payment yield established by the Secretary times a payment rate equal to 33⅓ per centum of the established price per bushel for feed grains.

"(B) Except as otherwise provided in subparagraph (C) of this paragraph, effective with respect to the 1982 crop of feed grains, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of feed grains which the producers are able to harvest on any farm in less than the result of multiplying 60 per centum of the farm program payment yield established by the Secretary for such crop by the acreage planted for harvest for such crop, the Secretary shall make a farm disaster payment to the producers at a rate equal to 50 per centum of the established price for the crop for the deficiency in production below 60 per centum for the crop.

"(C) No person shall be eligible for disaster payments for any crop of feed grains under this paragraph in any county in which crop insurance, part of the premium for which is paid by the Federal Crop Insurance Corporation under the provisions of section 508(b)(3) or 508(e) of the Federal Crop Insurance Act, is generally offered for that crop prior to planting.

"(c) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.".

PROGRAM ACREAGES, PAYMENT YIELDS, AND SET-ASIDE PROGRAM

SEC. 402. Subsections (d) through (i) of section 105A of the Agricultural Act of 1949 effective for the 1978 through 1981 crops of feed grains shall be effective for the 1982 through 1985 crops amended by—

(1) amending the first two sentences of subsection (d)(1) to read as follows: "The Secretary shall proclaim a national program acreage for each of the 1982 through 1985 crops of feed grains. The proclamation shall be made not later than November 1 of each calendar year for the crop harvested in the next succeeding calendar year.";

(2) amending the first sentence of subsection (d)(3) by striking out all after "the proclamation of the national program acreage" and inserting a period in lieu thereof; and

TITLE IV—FEED GRAINS

Strike lines 9 through 12, page 25, and substitute the following:

(3) amending the first three sentences of subsection (f)(1) to read as follows: "The Secretary shall provide for a set-aside of cropland if the Secretary determines that domestic carryover supplies of corn will in the absence of a set-aside exceed 18 per centum of the previous year's total use. If a set-aside of cropland is in effect under this subsection, then as a contition of eligibility for loans, purchases, and payments authorized by this section, the producers on a farm must set aside and devote to conservation uses an acreage of cropland equal to a specified percentage, as determined by the Secretary, but in any case not less than 15 per centum of the farm's previous year's planting. When such set-aside has been announced, loan rates shall be increased by 5 per centum from the level established in section 105A. The producer may, at his option, elect to set aside 25 per centum of the farm's previous year's plantings, in such case the producer shall be eligible for a loan 10 per centum higher than the level established in section 105A. The Secretary shall announce any such set-aside not later than November 1, prior to the calendar year in which the crop is harvested."

NONAPPLICABILITY OF SECTION 105 OF THE AGRICULTURAL ACT OF 1949

SEC. 403. Section 105 of the Agricultural Act of 1949, as amended, shall not be applicable to the 1982 through 1985 crops of feed grains.

TITLE V—COTTON

SUSPENSION OF BASE ACREAGE ALLOTMENTS, MARKETING QUOTAS AND RELATED PROVISIONS

SEC. 501. Sections 342, 343, 344, 345, 346, and 377 of the Agricultural Adjustment Act of 1938 shall not be applicable to upland cotton of the 1982 through 1985 crops.

LOAN RATES, TARGET PRICES, AND ACREAGE LIMITATIONS FOR THE 1982 THROUGH 1985 CROPS

SEC. 502. Section 103(f) of the Agricultural Act of 1949, effective for the 1978 through 1981 crops of upland cotton, shall be effective for the 1982 through 1985 crops amended as follows:

(1) In the first sentence of paragraph (1)—

(A) strike out "1978 through 1981" and insert in lieu thereof "1982 through 1985";

(B) strike out "quoted for Strict Middling one-and-one-sixteenth-inch cotton C.I.F. Northern Europe" and insert in lieu thereof "quoted for Middling one-and-three-thirty-seconds-inch cotton C.I.F. Northern Europe"; and

(C) change the proviso clause at the end of the sentence to read as follows: *"Provided,* That in no event shall such loan level be less than fifty-five cents per pound.".

(2)(A) Amend the second sentence of paragraph (4) to read as follows: "For the 1982 through 1985 crops, the established price shall be 120 per centum of the loan level determined under paragraph (1) of the subsection for such crop."; and

(B) Strike out the third sentence of paragraph (4).

(3) In paragraph (5)—

(A) strike out "1978 through 1981" wherever it appears in subparagraphs (A) and (B) and insert in lieu thereof "1982 through 1985"; and

(B) amend subparagraph (C) to read as follows:

"(C) No person shall be eligible to receive disaster payments for any crop of upland cotton under this paragraph in any county in which crop insurance, part of the premium for which is paid by the Federal Crop Insurance Corporation under the provisions of section 508(b)(3) or 508(e) of the Federal Crop Insurance Act, is generally offered for that crop prior to planting.".

(4) In the first sentence of paragraph (7), strike out "1978 through 1981" and insert in lieu thereof "1982 through 1985" and strike out "December 15" and insert in lieu thereof "November 1".

(5) In the first sentence of paragraph (9), strike out "December 15" and insert in lieu thereof "November 1".

(6) In paragraph (11)—

(A) amend subparagraph (A) to read as follows:

"(A) The Secretary may limit the acreage planted to upland cotton if the Secretary determines that the total supply of upland cotton will otherwise likely be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. Such limitation shall be applied on a uniform basis to all cotton-producing farms. The base for such uniform reduction shall be the acreage planted on the farm in the preceding year: *Provided,* That in case no cotton was planted on the farm in such year, the farm base shall be (i) the larger of the acreages planted to cotton on the farm in the two years prior to such year or (ii) the average acreage planted to cotton on the farm in such two years, as determined in accordance with regulations issued by the Secretary. Producers on a farm who knowingly plant cotton in excess of the permitted cotton acreage for the farm shall be ineligible for cotton loans or payments with respect to that farm. If mandatory acreage reduction limitations are in effect under this paragraph, then as a further condition of eligibility for loans and payments on upland cotton, the Secretary may provide that producers on a farm must devote to such conservation uses as the state committee establishes as appropriate for the protection and maintenance of lands in the state, an acreage of cropland equal to the mandatory acreage reduction percentage multiplied by the acreage planted to cotton on the farm (the result of such calculation is referred to herein as the 'cotton conservation acreage'): *Provided,* That the Secretary may permit all or any part of the cotton conservation acreage for the farm to be planted to one or more crops designated by him if he determines that such production is needed to provide an adequate supply, is not likely to increase the cost of the price support program, and will not adversely affect farm income.";

(B) in subparagraph (B), strike out ", whether or not a set-aside for upland cotton is in effect,"; and

(C) in the first sentence of subparagraph (C), strike out the language "set-aside acreage and the additional".

(7) Strike out the second sentence in paragraph (12).

(8) Amend paragraph (14) to read as follows:

"(14) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this subsection, including compliance with any prescribed time deadline, precludes the making of loans, purchases and payments, the Secretary shall, nevertheless authorize the State and county committees, to make such loans, purchases and payments in such amounts as they determine to be equitable in relation to the seriousness of the default.".

(9) Immediately before the period at the end of paragraph (15) add the following: ": *Provided,* That such regulations shall not include provisions that condition loans and payments on cross-compliance and offsetting-compliance procedures".

(10) Add a new paragraph (18) as follows:

"(18) In order to encourage and assist producers in orderly ginning and marketing of their cotton production, the Secretary shall make available recourse loans on seed cotton in accordance with authority vested in him by the Commodity Credit Corporation Charter Act.".

COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS

SEC. 503. Effective only with respect to the period beginning August 1, 1978, and ending July 31, 1986, the tenth sentence of section 407 of the Agricultural Act of 1949 is amended by striking out all of that sentence through the words "110 per centum of the loan rate, and (2)" and inserting in lieu thereof the following: "Notwithstanding any other provision of law, (1) the Commodity Credit Corporation shall sell upland cotton for unrestricted use at the same prices as it sells cotton for export, in no event, however, at less than 115 per centum of the loan rate for Strict Low Middling one and one-sixteenth inch upland cotton (micronaire 3.5 through 4.9) adjusted for such current market differentials reflecting grade, quality, location, and other value factors as the Secretary determines appropriate plus reasonable carrying charges, and (2)".

MISCELLANEOUS COTTON PROVISIONS

SEC. 504. (a) Section 408(b) of the Agricultural Act of 1949 is amended by inserting immediately before the period at the end of the first sentence the following: ": *Provided further,* That for the 1982 through 1985 crops of upland cotton, a cooperator shall be a producer on a farm who has limited the acreage planted in accordance with section 103(f)(11)(A).".

(b) Sections 103(a) and 203 of the Agricultural Act of 1949 shall be applicable to the 1982 through 1985 crops.

SKIPROW PRACTICES

SEC. 505. Section 374(a) of the Agricultural Adjustment Act of 1938 is amended by striking out "1981" in the last sentence and inserting in lieu thereof "1985".

PRELIMINARY ALLOTMENTS FOR 1986 CROP OF UPLAND COTTON

SEC. 506. Notwithstanding any other provision of law, the permanent State, county, and farm base acreage allotments for the 1977 crop of upland coton, adjusted for any underplantings in 1977 and reconstituted as provided in section 379 of the Agricultural Adjustment Act of 1938, as amended, shall again become effective as preliminary allotments for the 1986 crop.

SEC. 507. Effective beginning with the 1982 crop of extra long staple cotton, Section 101(f) of the Agricultural Act of 1949 (7 U.S.C. 1441(f)), is amended to read as follows:

"(f) The provisions of this Act relating to price support for cotton shall apply severally to (1) American upland cotton and (2) extra long staple cotton described in subsection (a) and ginned as required by subsection (e) of section 347 of the Agricultural Adjustment Act of 1938, as amended, except that, notwithstanding any other provision of this Act, price support shall be made available for the 1982 and each subsequent crop of extra long staple cotton through nonrecourse loans as provided in this subsection. If producers have not disapproved marketing quotas for any crop of extra long staple cotton, price support loans shall be made available to cooperators for such crop at a level which is not less than 75 per centum or more than 125 per centum in excess of the loan level established for Strict Low Middling one and one-sixteenth inch upland cotton (micronaire 3.5 through 4.9) of such crop at average location in the United States. If producers have disapproved marketing quotas for any crop of extra long staple cotton, price support loans shall be made available to cooperators for such crop at a level which shall be 50 per centum in excess of the loan level established for Strict Low Middling one and one-sixteenth inch upland cotton (micronaire 3.5 through 4.9) of such crop at average location in the United States. Nothing contained herein shall affect the authority of the Secretary to make price support available for extra long staple cotton in accordance with section 402 of this Act.".

TITLE VI—RICE

REPEAL OF ACREAGE ALLOTMENT AND MARKETING QUOTA PROVISIONS

SEC. 601. Effective with the 1982 rice crop sections 352, 353, 354, 355, and 356 of the Agricultural Adjustment Act of 1938 are repealed.

LOAN RATES, TARGET PRICES, AND SET-ASIDE FOR THE 1982 THROUGH 1985 CROPS

SEC. 602. Effective only for the 1982 through 1985 crops of rice, section 101(h) of the Agricultural Act of 1949 is amended to read as follows:

"(h) Notwithstanding any other provision of law—

"(1) The Secretary shall make available, to cooperators in the several States of the United States, loans and purchases for each of the 1982 through 1985 crops of rice at such level as bears the same ratio to the loan level for the preceding year's crop as the established price for each such crop bears to the established price for the preceding year's crop. If the Secretary determines that loans and purchases at the foregoing level for any of the 1982 through 1985 crops would substantially discourage the exportation of rice and result in excessive stocks of rice in the United States, the Secretary may, notwithstanding the foregoing provisions of this paragraph, establish loans and purchases for such crop or crops at such level, not less than $8 per hundredweight, as the Secretary determines necessary to avoid such consequences: *Provided,* That the loan and purchase level for the succeeding crop shall be established from a loan and purchase level as provided in the immediately preceding sentence. The loan and purchase level and the established price for each of the 1982 through 1985 crops of rice shall be announced not later than March 1 of each calendar year for the crop harvested in that calendar year.

"(2)(A) In addition, the Secretary shall make available to cooperators payments for each of the 1982 through the 1985 crops of rice grown in the several States of the United States in an amount computed as provided in this paragraph. Payments for each such crop of rice shall be computed by multiplying (i) the payment rate, by (ii) the farm program acreage for the crop, by (iii) the yield established for the farm. In no event shall payments be made under this paragraph for any of the 1982 through 1985 crops on a greater acreage than the acreage actually planted to rice. The total quantity on which payments would otherwise be payable to a cooperator for any crop under this subparagraph shall be reduced by the quantity on which any disaster payment is made to the cooperator on a farm for the crop under this paragraph.

"(B) The payment rate for rice shall be the amount by which the established price for the crop of rice exceeds the higher of—

"(i) the national average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(ii) the loan level determined under paragraph (1) for such crop.

The established price for the purpose of making payments under this subsection shall be the established price for the previous year's crop adjusted to reflect any change in (A) the average adjusted cost of production per acre for the two crop years immediately preceding the year for which the determination is made from (B) the average adjusted cost of production per acre for the two crop years immediately preceding the year previous to the one for which the established price is being determined divided by (c) the normal yield. The adjusted cost of production for each of such years shall be determined by the Secretary on the basis of such information as the Secretary finds necessary and appropriate for the purpose and shall be limited, on a per-acre basis, to (i) variable costs, (ii) machinery ownership costs, and (iii) general farm overhead costs, allocated to the crops involved on a basis of the proportion of the value of the total production derived from each crop.

"(C) the yield established for the farm for any year shall be determined on the basis of the actual yields per harvested acre for the three preceding years: *Provided,* That the actual yields shall be adjusted by the Secretary for abnormal yields in any year caused by drought, flood, other natural disaster, or other condition beyond the control of the cooperators. If no rice was produced on the farm during such period, the yield shall be determined taking into consideration the yield of comparable farms in the surrounding area and such other factors as the Secretary determines will produce a fair and equitable yield.

"(D) Except as otherwise provided in subparagraph (F) of this paragraph, effective with respect to the 1982 through 1985 crops of rice, if the Secretary determines that the persons involved in producing rice on a farm are prevented from planting all or any portion of the acreage intended for rice on the farm to rice or other nonconserving crops because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the Secretary shall make a prevented planting disaster payment to cooperators on a farm on the number of such acres so affected but not to exceed the acreage planted to rice for harvest (including any acreage which the producers were prevented from planting to rice or other nonconserving crop in lieu of rice because of drought, flood, or other natural disaster, or other condition beyond the control of the producers) in the immediately preceding year, multiplied by the yield established for the farm times a payment rate equal to 33⅓ per centum of the established price for rice.

"(E) Except as otherwise provided in subparagraph (F) of this paragraph, effective with respect to the 1982 through 1985 crops of rice, if the Secretary determines that because of drought, flood, or other natural disaster, or other condition beyond the control of the producers, the total quantity of rice which the persons involved in producing rice on a farm are able to harvest on the farm is less than the result of multiplying 75 per centum of the yield established for the farm by the acreage planted for harvest for such crop, the Secretary shall make a farm disaster payment to the cooperators on the farm for the deficiency in production below 75 per centum of the crop at a rate equal to 33⅓ per centum of the established price for the crop.

"(F) No person shall be eligible to receive disaster payments for any crop of rice under this paragraph in any county in which crop insurance, part of the premium for which is

paid by the Federal Crop Insurance Corporation under the provisions of section 508(b)(3) or 508(e) of the Federal Crop Insurance Act, is generally offered for that crop prior to planting.

"(3) The Secretary shall provide for the sharing of payments made under this section for any farm among the producers on the farm on a fair and equitable basis.

"(4)(A) The Secretary shall proclaim a national program acreage for each of the 1982 through 1985 crops of rice. The proclamation shall be made not later than January 31 of each calendar year for the crop harvested in that calendar year. The Secretary may revise the national program acreage first proclaimed for any crop year for the purpose of determining the allocation factor under paragraph (B) of this subsection if the Secretary determines it necessary based upon the latest information, and the Secretary shall proclaim such revised national program acreage as soon as it is made. The national program acreage for rice shall be the number of harvested acres the Secretary determines (on the basis of the weighted national average of the farm established yields for the crop for which the determination is made) will produce the quantity (less imports) that the Secretary estimates will be utilized domestically and for export during the marketing year for such crop. If the Secretary determines that carryover stocks of rice are excessive or an increase in stocks is needed to assure desirable carryover, the Secretary may adjust the national program acreage by the amount the Secretary determines will accomplish the desired increase or decrease in carryover stocks.

"(B) The Secretary shall determine a program allocation factor for each crop of rice. The allocation factor for rice shall be determined by dividing the national program acreage for the crop by the number of acres which the Secretary estimates will be harvested for such crop: *Provided,* That in no event shall the allocation factor for any crop of rice be more than 100 per centum nor less than 80 per centum.

"(C) The individual farm program acreage for each crop of rice shall be determined by multiplying the allocation factor by the acreage of rice planted for harvest on the farms for which individual farm program acreages are required to be determined: *Provided,* That the rice acreage eligible for payments shall not be further reduced by application of the allocation factor if the producers reduce the acreage of rice planted for harvest on the farm from the previous year by at least the percentage recommended by the Secretary in the annual proclamation of the national program acreage. The Secretary shall provide fair and equitable treatment for producers on farms on which the acreage of rice planted for harvest is less than for the preceding year, but the reduction is insufficient to exempt the farm from the application of the allocation factor. In establishing the allocation factor for rice, the Secretary is authorized to make such adjustments as the Secretary deems necessary to take into account the extent of exemption of farms under the foregoing provisions of this paragraph.

"(5)(A) The Secretary shall provide for a set-aside of cropland if the Secretary determines that the total supply of rice will, in the absence of such a set-aside, likely be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency. Any such set-aside shall be announced by the Secretary not later than January 31 of the calendar year in which the crop for which the announcement is made is harvested. If a set-aside of cropland is in effect under this subsection, then as a condition of eligibility for loans, purchases, and payments authorized by this section on rice, the producers on a farm must (i) set-aside and devote to conservation uses an acreage of cropland equal to a specified percentage, as determined by the Secretary, of the rice acreage planted for harvest for the crop year for which the set-aside is in effect and (ii) limit the acreage of rice planted for harvest for the crop year to an acreage that when added to the acreage required to be set-aside, in accordance with clause (i) above, will not exceed the sum of the acreage of rice planted for harvest plus the rice program set-aside acreage, if any, from the previous crop year. If the acreage of rice planted for harvest in the previous crop year was abnormal because of drought, flood, or other natural disaster, or other condition beyond the control of the producer, the Secretary shall adjust such acreage based upon such factors as the Secretary determines fair and equitable. The set-aside acreage shall be devoted to conservation uses, in accordance with regulations issued by the Secretary, which will assure protection of such acreage from weeds and wind and water erosion; however, the Secretary may permit, subject to such terms and conditions as the Secretary may prescribe, all or any part of the set-aside acreage to be devoted to sweet sorghum, hay, and grazing or the production of guar, sesame, safflower, sunflower, castor beans, mustard seed, crambe, plantago ovato, flaxseed, triticale, oats, rye, or other commodity, if the Secretary determines that such production is needed to provide and adequate supply, is not likely to increase the cost of the price support program, and will not adversely affect farm income.

"(B) The Secretary may make land diversion payments to producers of rice, whether or not a set-aside for rice is in effect, if the Secretary determines that such land diversion payments are necessary to assist in adjusting the total national acreage of rice to desirable goals. Such land diversion payments shall be made to producers on a farm who, to the extent prescribed by the Secretary, limit the acreage of rice planted for harvest and devote to approved conservation uses an acreage of cropland on the farm in accordance with land diversion contracts entered into by the Secretary with such producers. The amounts payable to producers under land diversion contracts may be determined through the submission of bids for such contracts by producers in such manner as the Secretary may prescribe or through such other means as the Secretary determines appropriate. In determining the acceptability of contract offers, the Secretary shall take into consideration the extent of the diversion to be undertaken by the producers and the productivity of the acreage diverted. The Secretary shall limit the total acreage to be diverted under agreements in any county or local community so as not to affect adversely the economy of the county or local community.

"(C) The set-aside acreage and the additional diverted acreage may be devoted to wildlife food plots or wildlife habitat in conformity with standards established by the Secretary in consultation with wildlife agencies. The Secretary may pay an appropriate share of the cost of practices designed to carry out the purposes of the foregoing sentence. The Secretary may provide for an additional payment on such acreage in an amount determined by the Secretary to be appropriate in relation to the benefit to the general public if the producer agrees to permit, without other compensation, access to all or such portion of the farm, as the Secretary may prescribe, by the general public, for hunting, trapping, fishing, and hiking, subject to applicable State and Federal regulations.

"(D) The Secretary may make such adjustments in determining the rice acreage planted for harvest in the previous year and in individual set-aside acreage under this section as the Secretary determines necessary to correct for abnormal factors affecting production, and to give due consideration to tillable acreage, crop-rotation practices, types of soil, soil and water conservation measures, and topography, and such other factors as the Secretary deems necessary.

"(E) If the operator of the farm desires to participate in the program formulated under this subsection, the operator shall file an agreement to do so no later than such date as the Secretary may prescribe. Loans, purchases, and payments under this section shall be made available to producers on such farm only if the producers set aside and devote to approved soil conserving uses an acreage on the farm equal to the number of acres which the operator agrees to set aside and devote to approved soil conserving uses, and the agreement shall so provide. The Secretary may, by mutual agreement with the producers, terminate or modify any such agreement entered into pursuant to this subsection of the Secretary determines such action necessary because of an emergency created by drought or other disaster, or in order to prevent or alleviate a shortage in the supply of agricultural commodities.

"(6) In any case in which the failure of a producer to comply fully with the terms and conditions of the program formulated under this section precludes the making of loans, purchases, and payments, the Secretary may, nevertheless, make such loans, purchases, and payments in such amounts as the Secretary determines to be equitable in relation to the seriousness of the default.

"(7) The Secretary is authorized to issue such regulations as the Secretary determines necessary to carry out the provisions of this section.

"(8) The Secretary shall carry out the program authorized by this section through the Commodity Credit Corporation.".

DEFINITION OF COOPERATOR

SEC. 603. Section 408(b) of the Agricultural Act of 1949 is amended by inserting immediately before the period at the end of the first sentence the following: ": *Provided further,* That for the 1982 through 1985 crops of rice, a cooperator shall be a producer on a farm who has set aside any acreage as required under section 101(i)".

REPORT ON TRADING OF RICE FUTURES

SEC. 604. The Secretary of Agriculture shall on or before July 31, 1983, submit a report to the Congress evaluating the trading of rice futures on the commodity exchanges. The report shall contain an assessment as to whether the rice futures prices effectively reflect the market prices for rice except for certain factors such as carrying charges and storage costs. In addition, the Secretary shall include in such report an assessment of the feasibility of using the seasonal average price received by farmers for rough rice or the futures price for rice as a

basis for calculating the support and loan rate for rice as provided for in the Agricultural Act of 1949, as amended. Such report shall contain any other recommendations of the Secretary as may relate to these matters.

TITLE VII—PEANUTS

REPEAL OF EXISTING PROGRAM

SEC. 701. (a) Effective beginning with the 1982 crop of peanuts, part VI of subtitle B of title III of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1357-1359), relating to peanuts, is repealed.

(b) Effective beginning with the 1982 crop of peanuts, the Agricultural Act of 1949 is amended—

(1) by striking out "and peanuts" in section 101(b); and

(2) by striking out "peanuts," in section 408(c).

PRICE SUPPORT FOR PEANUTS

SEC. 702. Effective beginning with the 1982 crop of peanuts, section 201 of the Agricultural Act of 1949 (7 U.S.C. 1446) is amended—

(1) by inserting "peanuts," after "honey," in the language preceding subsection (b); and

(2) by adding at the end thereof a new subsection (g) as follows:

"(g) The prices of the 1982 and subsequent crops of peanuts shall be supported at such level as the Secretary considers appropriate, taking into consideration the eight factors specified in section 401(b) of this Act, the cost of production, any change in the index of prices paid by farmers for production items, interest, taxes and wage rates during the period beginning January 1 and ending December 31 of the calendar year immediately preceding the crop year for which the level of support is being determined, the demand for peanut oil and meal, expected prices of other vegetable oils and protein meals, and the demand for peanuts in foreign markets.".

TITLE VIII—SOYBEANS

SOYBEAN LOANS

SEC. 801. Effective only for the 1982 through 1985 crops of soybeans, section 201 of the Agricultural Act of 1949 is amended by—

(1) inserting in the first sentence after "tung nuts," the following: "soybeans," and

(2) amending subsection (e) to read as follows:

"(e)(1) The Secretary shall make available price support to producers for soybeans through loans and purchases during each of the four marketing years beginning with the 1982 marketing year at a level equal to 75 per centum of the average Chicago quoted cash price for number 1 yellow soybeans for each of the preceding five marketing years, excluding the high and low valued years: *Provided, however,* That in no event shall the Secretary establish a support price of less than $5.02 per bushel: *Provided further,* That if the Secretary determines that the average price of soybeans received by producers in any marketing year is not more than 105 per centum of the level of loans and purchases for soybeans for such marketing year, the Secretary may reduce the level of loans and purchases for soybeans for the next marketing year by the amount the Secretary determines necessary to maintain domestic and export markets for soybeans, except that the level of loans and purchases shall not be reduced by more than 10 per centum in any year nor below $4.50 per bushel. For the purposes of this title the soybean marketing year shall be the twelve-month period beginning on September 1 and ending August 31. The Secretary shall make a preliminary announcement of the level of price support not earlier than thirty days in advance of the beginning of the marketing year based upon the latest information and statistics available when such level of price support is announced, and shall make a final announcement of such level as soon as full information and statistics are available on prices for the five years preceding the beginning of the marketing year. In no event shall such final level of support be announced later than October 1 of the marketing year for which the announcement applies, nor shall the final level of support be less than the level of support set forth in the preliminary announcement.

"(2) Notwithstanding any other provision of law—

"(A) the Secretary shall not require participation in any production adjustment control program for soybeans or any commodity as a condition of eligibility for price support for soybeans; and

"(B) soybeans shall not be considered an eligible commodity for any reserve program, and the Secretary shall not authorize payments to producers to cover the cost of storing soybeans.".

TITLE IX—GENERAL AND MISCELLANEOUS COMMODITY PROVISIONS

PAYMENT LIMITATIONS

SEC. 901. Subsection (1) and (2) of section 101 of the Food and Agriculture Act of 1977 are amended to read as follows:

"(1) The total amount of payments (excluding disaster payments) which a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949 for wheat, feed grains, upland cotton, and rice shall not exceed $50,000 for each of the 1980 through 1985 crops.

"(2) Beginning with the 1980 crop year, the total amount of disaster payments that a person shall be entitled to receive under one or more of the annual programs established under the Agricultural Act of 1949 for wheat, feed grains, upland cotton, and rice for any crop year shall not exceed $100,000.".

PRODUCER STORAGE PROGRAM FOR WHEAT AND FEED GRAINS

SEC. 9022. Section 110 of the Agricultural Act of 1949 is amended to read as follows:

"SEC. 110. (a) The Secretary shall formulate and administer a program under which producers of wheat and feed grains will be able to store wheat and feed grains when such commodities are in abundant supply and extend the time period for their orderly marketing. The Secretary shall establish safeguards to assure that wheat and feed grains held under the program shall not be utilized in any manner to unduly depress, manipulate, or curtail the free market. The authority provided by this section shall be in addition to other authorities available to the Secretary for carrying out producer loan and storage operations.

"(b) In carrying out the producer storage program, the Secretary shall provide extended price support loans for wheat and feed grains under terms and conditions designed to encourage producers to store wheat and feed grains for extended periods of time in order to promote orderly marketing when wheat or feed grains are in abundant supply. Loans made under this section shall be made at such level of support as the Secretary determines appropriate: *Provided,* That the loan rate shall be not less than 110 per centum of the then current level of support under section 105A(a) of this Act in the case of feed grains, or under section 107A(a) of this Act in the case of wheat. In no event shall such loan level be less than $3.85 per bushel in the case of wheat or $2.80 per bushel in the case of corn. Among such other terms and conditions as the Secretary may prescribe by regulation, the program shall provide as follows: (1) Repayment of such loans shall be required in not less than three years nor more than five years. (2) Payment shall be made to producers of storage payments in such amounts and under such conditions as the Secretary determines appropriate to encourage producers to participate in the program, except as provided in clause (5) of this subsection. (3) A rate of interest shall be computed as determined under subsection (c) of this section. (4) Recovery of amounts paid for storage, and payment of additional interest or other charges shall be required if such loans are repaid by producers before the market price for wheat or feed grains has reached the price levels specified in clause (5) of this subsection. (5) Conditions shall be designed to induce producers to redeem and market the wheat or feed grains securing such loans without regard to the maturity dates thereof, subject to clause (6) of this subsection. To this end, whenever the Secretary determines that the market price of the commodity has, on each fifteen consecutive market days, attained a level which exceeds 125 per centum of the then current level of support under section 105A(a) of this Act in the case of feed grains, or 107A(a) of this Act in the case of wheat, the Secretary may remove the penalties for early repayment provided for in clause (4) of this subsection; whenever the market price during such fifteen-day period exceeds 135 per centum of such level of support, the Secretary may terminate payments for storage; and whenever the market price during such fifteen-day period exceeds 145 per centum in the case of feed grains and 160 per centum in the case of wheat of such level of support, the Secretary may impose market rates of interest as provided in subsection (c) of this section. (6) Conditions shall be prescribed by the Secretary under which the Secretary may extend, for all producers within a State, for a period of thirty days and for such additional thirty-day periods as may be necessary the date for termination of storage payments or imposition of market rates of interest in the settlement of loans redeemed as a result of the imposition of such conditions under clause (5) of this subsection if (A) the Agricultural Stabilization and Conservation State Committee for such State submits a request for such delay, and (B) the Secretary does not deny such request in writing within ten days after such request is submitted.

"(c) The rate of interest charged participants in the program authorized by this section shall be based upon the rate of interest charged the Commodity Credit Corporation by the United States Treasury, except that the Secretary may waive or adjust such interest as he deems appropriate to effectuate the purposes of this section. Notwithstanding the foregoing, and subject to the provisions of clause (6) of subsection (b), the rate of interest with respect to any wheat or feed grain which was stored under the program authorized by this section during the fifteen-day period referred to in clause (5) of subsection (b) shall, beginning immediately

after the end of such period, be the market rate of interest, as determined by the Secretary.

"(d) Notwithstanding any other provision of law, the Secretary may require producers to repay loans made under this section plus accrued interest and such other charges as may be required by regulation prior to the maturity date thereof if the Secretary determines that emergency conditions exist which require that such commodity be made available in the market to meet urgent domestic or international needs.

"(e) The Secretary shall announce the terms and conditions of the producer storage program as far in advance of making loans as practicable, except that the Secretary shall place no limit under such terms and conditions on the quantity of wheat or feed grains which may be stored under the program.

"(f) Notwithstanding any other provision of law, except as otherwise provided under section 302 of the Food Security Wheat Reserve Act of 1980 and section 208 of the Agricultural Trade Suspension Adjustment Act of 1980, whenever the extended loan program authorized by this section is in effect, the Commodity Credit Corporation may not sell any of its stocks of wheat or feed grains at less than 105 per centum of the price level at which the Secretary may encourage repayment of producer storage loans on the commodity prior to the maturity dates of the loans by the imposition of market rates of interest under clause (5) of subsection (b) of this section: *Provided*, That such restriction shall not apply to—

"(1) sales of such commodities which have substantially deteriorated in quality or as to which there is a danger of loss or waste through deterioration or spoilage;

"(2) sales or other disposals of such commodities under (A) the fifth and sixth sentences of section 407 of this Act; (B) the Act of September 21, 1959 (73 Stat. 574, as amended; 7 U.S.C. 1427 note), and (C) section 813 of the Agricultural Act of 1970; and

"(3) sales of corn for use in the production of alcohol for motor fuel at facilities that—

"(A) began operation after January 4, 1980, and

"(B) whenever supplies of corn are not readily available, can produce alcohol from agricultural or forestry biomass feedstocks other than corn,

when sold at not less than the price at which producers may repay producer storage loans and redeem corn prior to the maturity dates of loans, as determined under clause (5) of subsection (b) of this section, or, whenever the fuel conversion price (as defined in section 212 of the Agricultural Trade Suspension Adjustment Act of 1980) for corn exceeds such price, at not less than the fuel conversion price.

"(g) The Secretary may, with the concurrence of the owner of grain stored under the program authorized by this section, reconcentrate all such grain stored in commercial warehouses at such points as the Secretary deems to be in the public interest, taking into account such factors as transportation and normal marketing patterns. The Secretary shall permit rotation of stocks and facilitate maintenance of quality under regulations which assure that the holding producer or warehouseman shall, at all times, have available for delivery at the designated place of storage both the quantity and quality of grain covered by his commitment.

"(h) Whenever grain is stored under the provisions of this section, the Secretary may buy and sell at an equivalent price, allowing for the customary location and grade differentials, substantially equivalent quantities of grain in different locations or warehouses to the extent needed to properly handle, rotate, distribute, and locate such commodities which the Commodity Credit Corporation owns or controls. Such purchases to offset sales shall be made within two market days following the sales. The Secretary shall make a daily list available showing the price, location, and quantity of the transactions.

"(i) When a producer samples, turns, moves or replaces grain or any other commodity which is security for a Commodity Credit Corporation producer loan or is held under a reserve program, and does so in violation of law or regulation, the county ASCS committee may forgive some or all of the penalties and requirements that would normally be imposed on the producer by reason of the violation, when in the judgment of the county ASCS committee the violation occurred inadvertently, by accident, because of lack of knowledge or understanding of the law or regulation, or because the producer or his agent acted to prevent spoilage of the commodity: *Provided*, That in the judgment of the county ASCS committee the violation did not result in harm or damage to the rights or interests of any party, and that this fact is certified to by a majority of the members of the county ASCA committee and a copy of the certificate is filed with the state ASCS committee.

"(j) The Secretary may use the Commodity Credit Corporation, to the extent feasible, to fulfill the purposes of this section. To the maximum extent practicable consistent with the fulfillment of the purposes of this section and the effective and efficient administration of this section, the Secretary shall utilize the usual and customary channels, facilities, and arrangements of trade and commerce.".

FINALITY OF DETERMINATIONS

SEC. 903. Effective only for the 1982 through 1985 crops, section 385 of the Agricultural Adjustment Act of 1938, is amended by amending the first sentence to read as follows: "The facts constituting the basis for any Soil Conservation Act payment, any payment under the wheat, feed grain, upland cotton, and rice programs authorized by the Agricultural Act of 1949 and this Act, any loan, or price support operation, or the amount thereof, when officially determined in conformity with the applicable regulations prescribed by the Secretary or by the Commodity Credit Corporation, shall be final and conclusive and shall not be reviewable by any other officer or agency of the Government.".

SPECIAL GRAZING AND HAY PROGRAM

SEC. 904. Section 109(a) of the Agricultural Act of 1949 is amended by striking out "1978 through 1981" and inserting in lieu thereof "1982 through 1985".

SUPPLEMENTAL SET-ASIDE AUTHORITY

SEC. 905. Section 113 of the Agricultural Act of 1949 is amended to read as follows:

"SEC. 113. Notwithstanding any other provision of law or prior announcement made by the Secretary to the contrary, effective for one or more of the 1982 through 1985 crops of wheat and feed grains, the Secretary may announce and provide for a set-aside of cropland under section 105A(f) or 107A(f) of this title if the Secretary determines that such action is in the public interest as a result of the imposition of restrictions on the export of any such commodity by the President or other member of the executive branch of Government. In order to carry out effectively a set-aside program authorized under this section, the Secretary may make such modifications and adjustments in such program as the Secretary determines necessary because of any delay in instituting such program.".

APPLICATION OF TERMS IN THE AGRICULTURAL ACT OF 1949

SEC. 906. Section 408(k) of the Agricultural Act of 1949, as amended, to be effective for the 1971 through 1981 crops, shall be effective for the 1982 through 1985 crops, and shall read as follows:

"REFERENCES TO TERMS MADE APPLICABLE TO WHEAT, FEED GRAINS, UPLAND COTTON, AND RICE

"(k) References made in sections 402, 403, 406, and 416 to the terms 'support price', 'level of support', and 'level of price support' shall be considered to apply as well to the level of loans and purchases for wheat, feed grains, upland cotton, and rice under this Act; and references made to the terms 'price support', price support operations', and 'price support program' in such sections and in section 401(a) shall be considered as applying as well to the loan and purchase operations for wheat, feed grains, upland cotton, and rice under this Act.".

COMMODITY CREDIT CORPORATION SALES PRICE RESTRICTIONS FOR WHEAT AND FEED GRAINS

SEC. 907. Effective only with respect to the marketing years for the 1982 through 1985 crops, section 407 of the Agricultural Act of 1949, as amended, is amended by—

(1) striking out in the third sentence the language following the third colon and inserting in lieu thereof the following: *Provided*, That the Corporation shall not sell any of its stocks of wheat, corn, grain sorghum, barley, oats, and rye respectively at less than 115 per centum of the current national average loan rate for the commodity, adjusted for such current market differentials reflecting grade, quality location, and other value factors as the Secretary determines appropriate, plus reasonable carrying charges.";

(2) striking out in the fifth sentence "current basic county support rate including the value of any applicable price-support payment in kind (or a comparable price if there is no current basic county support rate)" and inserting in lieu thereof the following: "current basic county loan rate (or a comparable price if there is no current basic county loan rate)"; and

(3) striking out in the seventh sentence ", but in no event shall the purchase price exceed the then current support price for such commodities" and inserting in lieu thereof the following: "or unduly affecting market prices, but in no event shall the purchase price exceed the Corporation's minimum sales price for such commodities for unrestricted use".

NORMALLY PLANTED ACREAGE AND TARGET PRICES

SEC. 908. Section 1001 of the Food and Agriculture Act of 1977 is amended to read as follows:

"SEC. 1001. (a) Notwithstanding any other provision of law, effective for one or more of the 1982 through 1985 crops of wheat and feed grains, the Secretary of Agriculture may require, as a condition of eligibility for loans, purchases, and payments under the Agricultural Act of 1949, that producers not exceed the acreage on the farm normally planted to crops designated by the Secretary, adjusted as deemed necessary by the Secretary to be fair and equitable among

producers. The acreage for any farm normally planted to crops designated by the Secretary shall be reduced by any set-aside or diverted acreage. Such normal crop acreage for any crop year shall be determined based on the acreage planted to such crops during the preceding two years. The Secretary may require producers participating in the program to keep such records as the Secretary determines necessary to assist in making such determination.

"(b) Notwithstanding any other provision of law—

"(1) Whenever the Secretary, for one or more of the 1982 through 1985 crops of wheat and feed grains requires that producers not exceed the acreage on the farm normally planted to crops designated by the Secretary in accordance with subsection (a) of this section, the Secretary may increase the established price payments for any such commodity by such amount (or if there are no such payments in effect for such crop by providing for payments in such amount) as the Secretary determines appropriate to compensate producers for not exceeding the acreage on the farm normally planted to crops designated by the Secretary and participation in any required set-aside with respect to such commodity.

"(2) In determining the amount of any payments for any commodity under this subsection, the Secretary shall take into account changes in the cost of production resulting from not exceeding the acreage on the farm normally planted to crops designated by the Secretary and participation in any required set-aside with respect to such commodity.

"(3) If payments are provided for any commodity under this subsection, the Secretary may provide for payments for any other commodity in such amount as the Secretary determines necessary for effective operation of the program.

"(4) The Secretary shall adjust any payments under this subsection to reflect, in whole or in part, any land diversion payments for the commodity for which an increase is determined.".

REDUCTION IN INTEREST TO DISCOURAGE PRICE SUPPORT LOAN DEFAULTS

SEC. 909. Section 405 of the Agricultural Act of 1949 is amended by designating the existing provisions as subsection (a) and adding the following new subsection:

"(b) Notwithstanding any other provision of the law, when in a period of declining prices the requirement of paying accumulated interest charges on Commodity Credit Corporation loans becomes and incentive for farmers with outstanding loans on commodities to default in order to avoid the interest, the Secretary is authorized to progressively reduce such interest charges up to the amount of the cost of one year of storage charges in order to neutralize the incentive to default. It is further provided that any such reduction authorized by this section shall not exceed the total amount of interest due.".

NORMAL SUPPLY

SEC. 910. Notwithstanding any other provision of law, if the Secretary determines that the supply of wheat, corn, upland cotton, or rice for the marketing year for any of the 1982 through 1985 crops of such commodity is not likely to be excessive and that program measures to reduce or control the planted acreage of the crop are not necessary, such a decision shall constitute a determination that the total supply of the commodity does not exceed the normal supply and no determination to the contrary shall be made by him with respect to such commodity for such marketing year.

EMERGENCY FEED PROGRAM

SEC. 911. The fifth sentence of section 407 of the Agricultural Act of 1949 is amended by striking out the word "shall" wherever it appears and inserting in lieu thereof the word "may".

PERISHABLE AGRICULTURAL COMMODITIES

SEC. 912. (a) Paragraphs (6) and (7) of section 1 of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499c (6) and (7), are amended by striking out "$200,000" and inserting in lieu thereof "$230,000".

(b) Section 3(b) of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 490 (b)), is amended by striking out "$150", "$50", and "$1,000", and inserting in lieu thereof "$300," "$150", and "$3,000," respectively.

(c) Sections 6(c) and 6(d) of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499f (c) and (d), are amended by striking out "$3,000", wherever it appears, and inserting in lieu thereof "$15,000".

AUTHORITY TO RELEASE BEE GERM PLASM

SEC. 913. Section 103 of the Department of Agriculture Organic Act of 1944 (7 U.S.C. 283) is amended by adding immediately before the period "and may release bee germ plasm to the public".

DISTRIBUTION OF SURPLUS COMMODITIES

SEC. 914. (a) Notwithstanding any other provision of law, whenever Government stocks of commodities are acquired under the price support program, such commodities shall be made available without charge or credit to nutrition projects under the authority of the Older Americans Act of 1965 (42 U.S.C. 3001, et seq.), to child nutrition programs providing food service, and to food banks participating in the food bank program established under section 211 of the Agricultural Act of 1980. Such distribution may include bulk distribution to congregate nutrition sites and to providers of home delivered meals under the Older Americans Act. The Commodity Credit Corporation is authorized to use available funds to operate the program under this section and to further process products to facilitate bonus commodity use.

(b) Section 211(a) of the Agricultural Act of 1980 is amended—

(1) in the first sentence by striking out "carry out demonstration projects" and inserting in lieu thereof "establish a program";

(2) in paragraph (2)—

(A) by striking out "demonstration projects" and inserting in lieu thereof "program"; and

(B) by striking out "projects" each place it appears and inserting in lieu thereof "program".

(d) Section 211(c) of the Agricultural Act of 1980 is amended in the second sentence by striking out "projects" and inserting in lieu thereof "program".

(e) Section 211(d) of the Agricultural Act of 1980 is amended—

(1) by striking out ", 1982," and inserting in lieu thereof "of each year"; and

(2) striking out "demonstration projects" and inserting in lieu thereof "program".

(f) Section 211(f) of the Agricultural Act of 1980 is amended by striking out "to carry out this section $356,000" and inserting in lieu thereof "such sums as may be necessary to carry out this section".

(g) Section 211 of the Agricultural Act of 1980 is amended—

(1) by redesignating subsection (f) as subsection (g); and

(2) by inserting after subsection (e) the following new subsection:

"(f) The Secretary shall minimize paperwork requirements placed on food banks which participate in the program established under this section and shall otherwise encourage food banks to participate in such program".

(h) The heading for section 211 of the Agricultural Act of 1980 is amended to read as follows:

"DISTRIBUTION OF EXCESS AGRICULTURAL COMMODITIES THROUGH COMMUNITY FOOD BANKS".

(i) Section 4(b) of the Food Stamp Act of 1977 shall not apply with respect to distribution of surplus commodities under this section.

SEC. 915. Section 4 of the Food for Peace Act of 1966 (7 USC 1707a) is amended by adding at the end thereof the following new subsection (d):

"(d)(1) There is hereby established in the Treasury a revolving fund to be known as the Commodity Credit Corporation Revolving Fund for Export Market Development and Expansion, which shall be available without fiscal year limitation for use by the Commodity Credit Corporation (hereinafter referred to in this subsection as the 'Corporation') for financing in accordance with this section and section 5(f) of the Commodity Credit Corporation Charter Act (15 U.S.C. 714c)—

"(A) commercial export sales of United States agricultural commodities out of private stocks or stocks owned or controlled by the Corporation on credit terms of not to exceed three years;

"(B) export sales of United States breeding animals (including, but not limited to, cattle, swine, sheep, and poultry), including the cost of freight from the United States to designated points of entry in other nations; and

"(C) the establishment of facilities in importing countries to improve the capacity of such countries for handling, marketing, processing, storing, or distributing fungible agricultural commodities produced in and exported from the United States (through the use of local currency generated from the sale of United States agricultural commodities).

"(2) The Corporation shall use the revolving fund only to extend credit for purposes of market development and expansion and only where there is substantial potential for developing or enhancing regular commercial markets for United States agricultural commodities.

"(3) The Secretary of Agriculture shall ensure that the revolving fund is used in such a manner as to involve equitable use of the funds to finance sales to the greatest feasible number of countries consistent with maximizing market opportunities. In carrying out this objective, the Secretary shall establish procedures under which—

"(A) not less than 85 per centum of the estimated amount in the revolving fund for any fiscal year shall be made available for the purposes provided in clause (A) of paragraph (1) of this subsection; and

"(B) not to exceed 25 per centum of the estimated amount in the revolving fund for any fiscal year shall be made available for the financing of credit sales to any one country for the purposes described in paragraph (1) of this subsection.

"(4) There are authorized to be appropriated to the Commodity Credit Corporation Revolving Fund for Export Development and Expansion such sums as Congress shall deem necessary to carry out the provisions of this subsection. All funds received by the Corporation in payment for credit extended by the Corporation using the revolving fund, including interest or other receipts on investments and credit obligations, in financing export sales of the type specified in paragraph (1) of this subsection shall be added to and become a part of such revolving fund.

"(5) The Secretary shall submit an annual report to Congress not later than December 1 of each year with respect to the use of the revolving fund in carrying out export credit sales by the Corporation in the previous fiscal year. Such report shall include the names of the countries extended credit under such programs, the total amount of such credit in the case of each such country in such fiscal year, names of such U.S. organizations whose exports are supported through the use of the fund and the total amount of credits provided to each such organization, and a discussion and evaluation of the market development and expansion activities of the Corporation under this subsection during such fiscal year. The first such report shall be submitted to Congress not later than December 1, 1982.

"(6) The revolving fund created by this subsection is abolished effective October 1, 1985, and all unobligated money in such fund on September 30, 1985, shall be transferred to and become part of the miscellaneous receipts account of the Treasury.

"(7) The authority provided under this subsection shall be in addition to, and not in place of, any authority granted to the Secretary or the Corporation under any other provision of law.

"(8) The authority provided by this subsection to incur obligations to make loans shall be effective only to the extent that such obligations do not exceed annual limitations on new direct loan obligations which shall be provided in annual appropriations Acts.".

NONQUOTA CROP SUBJECT TO QUOTA

SEC. 916. Section 320 of the Agricultural Adjustment Act of 1938 is amended by inserting in the first sentence after the words "nonquota tobacco" the following: "except Maryland Tobacco (Type 32) when it is a nonquota tobacco,".

TOBACCO PROGRAM COST

SEC. 917. It is the intent of Congress that the tobacco price support and production control program shall be carried out in such a manner as to result in no net cost to the taxpayers other than such administrative expense as is incidental to the implementation of any commodity program. To accomplish this objective, the Secretary is directed to publish, issue and promulgate such regulations and policies as are currently within his existing authority not later than January 1, 1982. The Secretary shall recommend to Congress no later than January 1982 any legislative changes he believes to be necessary and proper to achieve such objective.

SEC. 918. The Federal Plant Pest Act (71 Stat. 31; 7 U.S.C. 150aa) is amended by—

(a) in section 105, renumbering subsections (b), (c), and (d) as (c), (d), and (e) and adding a new subsection (b) as follows:

"(b)(1) Whereas, the existence of a plant pest new to or not theretofore known to be widely prevalent or distributed within and throughout the United States on any premises in the United States would constitute a threat to crops, other plant life, and plant products of the nation and thereby seriously burden interstate or foreign commerce, whenever the Secretary determines that an extraordinary emergency exists because of the presence of such plant pest on any premises in the United States, and that the presence of such plant pest anywhere in the United States threatens the crops, other plant life, or plant products of the United States, the Secretary may (A) seize, quarantine, treat, apply other remedial measures to, destroy, or otherwise dispose of, in such manner as the Secretary deems appropriate, any product or article of any character whatsoever, or means of conveyance which the Secretary has reason to believe is infested or infected by or contains any such plant pest; (B) quarantine, treat or apply other remedial measures to, in such manner as the Secretary deems appropriate, any premises, including articles on such premises which the Secretary has reason to believe is infested or infected by any such plant pest: *Provided*, That any action taken under clauses (A) and (B) shall be consistent with the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act; and *Provided further*, That such action may be taken under this section only if the Secretary finds after review of measures taken by the State or other jurisdiction and after consultation with the Governor that the measures being taken are inadequate. Before any action is taken in any State or other jurisdiction under this subsection, the Secretary shall notify the Governor of the State or other jurisdiction, shall issue a public announcement and shall file a statement for publication in the Federal Register of the action the Secretary intends to take together with the findings and reasons therefor: *Provided*, That if it is not possible to make such filing with the Federal Register prior to the taking of action, the filing shall occur on the first business day thereafter. If the Secretary wishes to change any action previously taken under this subsection, the Secretary shall follow the procedure set forth in the preceding sentence of this paragraph. The cost of any action taken by the Secretary under this subsection shall be at the expense of the United States.

"(2) The Secretary may pay compensation to producers and other persons for economic losses incurred by them as a result of the quarantine, destruction, or other action taken under the authority of paragraph (1) of this subsection. The determination by the Secretary of the amount of any compensation to be paid under this subsection shall be final.

"(3) There are hereby authorized to be appropriated such sums as are necessary to carry out the provisions of this subsection.".

(b) in section 107, adding after the second semicolon the following: "to stop and inspect without a warrant any person or means of conveyance moving intrastate upon probable cause to believe that the person or conveyance is carrying any product or article subject to treatment or disposal under the provisions of this Act or the regulations issued thereunder;".

SEC. 919. Effective only with respect to the 1982 through 1985 crops of oil sunflower seeds, section 201 of the Agricultural Act of 1949 is amended by adding at the end thereof a new subsection (g) as follows:

"(g) The price of the 1981 through 1985 crops of oil sunflower seeds shall be supported through loans and purchases at such level, not less than $8 per hundredweight, as the Secretary determines appropriate in relation to competing commodities and taking into consideration domestic and foreign supply and demand factors. Loans during any fiscal year shall be made available not earlier than the beginning of the fiscal year and shall mature before the end of such fiscal year.".

TITLE X—NATIONAL AGRICULTURAL COST OF PRODUCTION STANDARDS REVIEW BOARD

ESTABLISHMENT OF BOARD

SEC. 1001. There is hereby established an advisory board to be known as the National Agricultural Cost of Production Standards Review Board (hereinafter referred to as the "Board").

MEMBERSHIP OF BOARD

SEC. 1002. (a) The Board shall be composed of eight members appointed by the Secretary of Agriculture (hereinafter referred to as the "Secretary").

(b)(1) The terms of the members first taking office shall expire (as designated by the Secretary at the time of appointment) as follows: Two at the end of one year, two at the end of two years, two at the end of three years, and two at the end of four years. Thereafter the terms of all members shall be four years, except that the term of any person appointed to fill a vacancy on the Board shall be appointed only for the unexpired term of such person's predecessor.

(2) The Secretary shall appoint persons to the Board who are producers of one or more of the various major agricultural commodities produced in the United States who represent various geographical areas where such commodities are primarily produced and who rely on that activity for their principal source of income. The Secretary shall also appoint one person to the Board who, by virtue of education, experience, and training, has extensive knowledge of matters relating to the cost of producing agricultural commodities with adequate background in the fields of agricultural economics and accounting.

(3) No person may serve as a member of the Board for more than two terms, including an unexpired term.

(4) The Secretary shall designate one member of the Board to serve as Chairman and one member to serve as Vice Chairman, both of whom shall serve until their terms expire.

FUNCTIONS OF THE BOARD

SEC. 1003. (a) It shall be the function of the Board to—

(1) review the adequacy, accuracy and timeliness of the cost-of-production formulas and the implementation of those formulas in determining specific cost-of-production figures, including the information relied upon in arriving at such formulas, developed and utilized by the Department of Agriculture for the purpose of determining the cost of production of various agricultural commodities;

(2) advise the Secretary whether the cost-of-production formulas used by the Department of Agriculture in connection with the administration of its price support programs are fair and accurate and recommend to the Secretary how such formulas might be improved, including, when necessary, the submission of findings of actual costs of production;

(3) advise the Secretary on such other matters relating to the cost of production of

agricultural commodities and price support operation as the Secretary may request; and

(4) review the adequacy of the parity formulations and make recommendations for improvements in the formula or other areas that may require improvement.

(b) The Secretary shall report promptly to the Board on the disposition of its recommendations including reasons for not accepting the recommendation or recommendations of the Board.

(c) The Board shall submit annually to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives a written report outlining the activities of the Board during the preceding year including any findings or recommendations made to the Secretary with respect to cost-of-production formulas and figures for any commodity. The Board shall include in each such report a list of the recommendations made to the Secretary and the disposition thereof.

(d) The Board shall meet at least annually, or more often if such meetings are necessary to meet the purposes of this title. The Board shall, to the maximum extent feasible, schedule its meetings so as to permit prepublication review of annual Department of Agriculture cost of production reports as prescribed in section 1441a of title 7, United States Code.

SUPPORT SERVICES

SEC. 1004. The Secretary shall provide the Board with such office space, equipment, and staff as may be necessary for the Board to perform its functions under this title.

COMPENSATION

SEC. 1005. No member of the Board shall receive any compensation for such member's services as a Board member but may be paid travel expenses, including per diem in lieu of subsistence, as provided in regulations issued under section 7 of the Federal Advisory Committee Act.

AUTHORIZATION OF APPROPRIATIONS

SEC. 1006. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this title.

TRANSFER OF FUNCTIONS

SEC. 1007. The Secretary shall transfer to the Board any functions duplicating those provided for in this title which are currently being carried out elsewhere in the Department.

APPLICABLE PERIOD

SEC. 1008. The authority provided in this title shall be applicable for the 1982 through 1985 crop years.

TITLE XI—EXPORT PROVISIONS

Subtitle A—Public Law 480

HUNGER AND GLOBAL SECURITY

SELF-HELP MEASURES TO INCREASE AGRICULTURAL PRODUCTION; VERIFICATION OF SELF-HELP PROVISIONS

SEC. 1101. (a) Section 109(a) of the Agricultural Trade Development and Assistance Act of 1954 is amended—

(1) in paragraph (3) by inserting immediately before the semicolon ", and reducing illiteracy among farmers";

(2) by striking out the period at the end of paragraph (10) and inserting in lieu thereof "; and"; and

(3) by inserting the following new paragraph immediately after paragraph (10):

"(11) carrying out programs to improve the health of farmers and their families.".

(b) Section 109 of the Agricultural Trade Development and Assistance Act of 1954 is amended by adding at the end thereof the following new subsection:

"(d)(1) In each agreement entered into under this title and in each amendment to such an agreement, the economic development and self-help measures which the recipient country agrees to undertake shall be described (A) to the maximum feasible extent, in quantitative and measurable terms, and (B) in a manner which ensures that the needy people in the recipient country will be the major beneficiaries of the self-help measures pursuant to each agreement.

"(2) The President shall, to the maximum feasible extent, take appropriate steps to satisfy himself that, in each agreement entered into under this title and in each amendment to such an agreement, the economic development and self-help measures which the recipient country agrees to undertake are additional to the measures which the recipient country otherwise would have undertaken irrespective of that agreement or amendment.

"(3) The President shall take all appropriate steps to determine whether the economic development and self-help provisions of each agreement entered into under this title, and of each amendment to such an agreement, are being fully carried out.".

REQUIREMENT FOR INVITATIONS FOR BIDS ON TITLE I PURCHASES

SEC. 1102. Section 115(a) of the Agricultural Trade Development and Assistance Act of 1954 is amended by inserting in the first sentence after the words "food commodities" the words "from private stocks".

TITLE II AUTHORIZATION CEILING

SEC. 1103. Section 204 of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out "$750,000,000" and inserting in lieu thereof "$100,000,000".

OVERSEAS MARKET DEVELOPMENT ACTIVITIES

SEC. 1104. Section 402 of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out in the second sentence "wine or beer" and inserting in lieu thereof "wine, beer, or other alcoholic beverage".

VALUATION OF COMMODITIES

SEC. 1105. Section 403(b) of the Agricultural Trade Development and Assistance Act of 1954 is amended by inserting "a price not greater than" after "valued at".

ANNUAL REPORT

SEC. 1106. Section 408(a) of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out "April 1" and inserting in lieu thereof "February 15".

EXTENSION OF PROGRAM

SEC. 1107. Section 409 of the Agricultural Trade Development and Assistance Act of 1954 is amended by—

(1) striking out in the first sentence "1981" and inserting in lieu thereof "1985"; and

(2) striking out in the second sentence "Food and Agriculture Act of 1977" and inserting in lieu thereof "Food and Agriculture Act of 1981".

Subtitle B—American Agriculture Protection Program

SEC. 1108. Section 1002 of the Food and Agriculture Act of 1977 is amended by—

(1) amending subsections (a) and (b) to read as follows:

"(a) Notwithstanding any other provision of law, whenever the President of the United States or any other member of the executive branch of the Federal Government, either directly or indirectly, suspends or causes to be suspended, the export sales of any commodity as defined in subsection (c) of this section to any country or area to which (1) commercial export sales of United States agricultural commodities so restricted exceed 50 percent of the average total United States commercial export sales to such country or area for the previous five years, or (2) the United States otherwise continues commercial trade, the Secretary of Agriculture shall, on the date the suspension is initiated, set the loan level for such commodity under the Agricultural Act of 1949 for any new loans made beginning on such date, if a loan program is in effect for the commodity, as provided in this subsection. If such suspension is based upon any reason other than, or in addition to, national security, the loan level for such commodity shall promptly be set at 90 per centum of the parity price for the commodity, as such parity price is determined on the date the suspension is initiated. If such suspension is based solely on reasons of national security, the loan level for such commodity shall promptly be set at a level not less than the average market price for such commodity during the fifteen marketing days immediately preceding such suspension. Producers who receive loans based on the level established under this subsection shall not be charged interest with respect thereto and shall be entitled to storage charges for storing any such commodity at such rate as the Secretary determines to be fair and reasonable.

"(b) Any loan level established pursuant to this section shall remain in effect as long as the suspension of commercial export sales described in subsection (a) remains in effect and shall then be adjusted by the Secretary in four approximately equal steps over a period of nine months to the loan level which would be in effect for such commodity if commercial export sales had not been suspended."; and

(2) adding after subsection (c) a new subsection as follows:

"(d) The provisions of this section shall be implemented only for commodities for which it can be reasonably presumed by the Secretary from export data of preceding years that the suspension will reduce the annual tonnage of exports of the commodities by more than 2 per centum.".

Subtitle C—Other Export Provisions

INCREASED USAGE OF PROTEIN BYPRODUCTS DERIVED FROM ALCOHOL FUEL PRODUCTION

SEC. 1109. (a) The Congress finds that the use of the protein byproduct resulting from the production of fuel alcohol from agricultural commodities may make it possible for the United States to make available significantly increased amounts of protein to meet the food needs of developing countries without any increase in handling, storage, and transportation facilities. The Congress believes that serious consideration should be given to the potential of this protein byproduct and that, if found to be feasible, this protein byproduct should be included in the Department of Agriculture's commodity export and donation programs.

(b) Accordingly, the Secretary of Agriculture shall investigate the potential for using the protein byproduct resulting from the production of fuel alcohol from agricultural commodities in meeting the food needs of developing countries through food for peace programs carried out under the Agricultural

Trade Development and Assistance Act of 1954 and through the export credit sales program carried out under section 4 of the Food for Peace Act of 1966 and section 5(f) of the Commodity Credit Corporation Charter Act.

(c) The Secretary of Agriculture shall also investigate the potential for using the protein byproduct resulting from the production of fuel alcohol from agricultural commodities in the distribution of food products under the commodity donation program carried out under clause (3) of section 416 of the Agricultural Act of 1949 and under section 210 of the Agricultural Act of 1956.

(d)(1) Not later than six months after the date of enactment of this Act, the Secretary of Agriculture shall report to the Congress on the results of the investigations conducted pursuant to subsections (b) and (c) of this section.

(2) The Secretary of Agriculture shall provide to the Congress each year a description of the efforts being made by the Department of Agriculture to make available, as part of the programs referred to in subsections (b) and (c) of this section, the protein byproduct resulting from the production of fuel alcohol from agricultural commodities. The information for all such programs may be included in the report submitted pursuant to section 408(a) of the Agricultural Trade Development and Assistance Act of 1954, or the information for each such program may be included in the annual report for that program.

SEC. 1110. The Act entitled "An Act authorizing Commodity Credit Corporation to purchase flour and cornmeal and donating same for certain domestic and foreign purposes", approved August 19, 1958 (7 U.S.C. 1431 note), is amended in the proviso by inserting "(except that this limitation does not apply in the case of the protein byproduct resulting from the production of fuel alcohol from agricultural commodities)" immediately after "processed".

EXPORT SALES OF WHEAT AND FEED GRAINS

SEC. 1111. It is the sense of the Congress that any agreement into which the United States enters after the date of enactment of this section for any sales of wheat, corn, soybeans, or feed grains by the United States to any country should stipulate that the price of the commodity in any such sale under such agreement shall be not less than the cost of production of such commodity, as detemined by the Secretary of Agriculture.

SEC. 1112. Any company engaged in the export of wheat or feed grains shall pay no less than the fair market value of the commodity at the time of purchase. Such a fair market value shall be determined by the price of that commodity on the appropriate commodity exchange at the time of purchase by the company.

STUDY OF ALTERNATIVE EXPORT MARKETING OF GRAIN

SEC. 1113. (a) The Secretary of Agriculture shall conduct a study to develop proposals for legislation that would provide alternative marketing and pricing programs to assure that the price paid by foreign purchasers for grain produced in the United States results in producers of such grain receiving an average amount for such grain that is not less than the average estimated domestic cost of production of such grain. For purposes of this subsection the term "grain" means wheat, soybeans, and corn and other feed grains.

(b) For purposes of developing proposals under subsection (a), the domestic cost of production shall be determined on the basis of official statistics maintained by the Department of Agriculture, and shall include the average acquisition value of land as the cost of land.

(c) The Secretary shall transmit the proposals developed under subsection (a) to the Congress not later than January 1, 1983.

EXPANSION OF INTERNATIONAL MARKETS FOR UNITED STATES AGRICULTURAL COMMODITIES AND PRODUCTS THEREOF

SEC. 1114. (a) It is the sense of the Congress that, in order to further assist in the development, maintenance, and expansion of international markets for United States agricultural commodities and the products thereof, the Secretary of Agriculture should, and is hereby urged and requested to—

(1) use the intermediate credit program authorized under section 4 of the Food for Peace Act of 1966 (7 U.S.C. 1707a) to improve the capability of importing nations to purchase and use United States agricultural commodities and the products thereof on a long-term basis;

(2) ask the Congress, at the earliest practicable date, for funds for the agricultural export credit revolving fund in an amount sufficient to meet the demand for short-term credit authorized to be made available under section 4 of the Food for Peace Act of 1966;

(3) establish, insofar as practicable, the maximum number of United States Agricultural Trade Offices in other nations authorized by section 605A of the Act of August 28, 1954 (7 U.S.C. 1765a);

(4) use, to the maximum extent practicable, existing authority to ensure full utilization of the levy-free quota, established during the Tokyo round of the multilateral trade negotiations, for the export sale of United States high quality beef to the European Economic Community;

(5) expand, to the fullest extent possible, the market development activities of the Foreign Agricultural Service of the Department of Agriculture in developed, developing, market, and nonmarket foreign countries with particular emphasis on (A) continuation of the cooperator programs at the same funding level (adjusted for inflation) provided to carry out the Agricultural Trade Development and Assistance Act of 1954 (7 U.S.C. 1691 et seq.) during fiscal year 1970; (B) a more active export market development program for value added farm products and processed foods; and (C) the implementation of a full scale program for forestry products, including commodity information, trade policy, and market development for such products;

(6) insure that the European Economic Community observes its commitments under the General Agreement on Tariffs and Trade (GATT) regarding the tariff-free binding on imports of soybeans and corn gluten feed;

(7) consult with the appropriate officials of the Government of Japan with the objective of increasing the export sales of citrus fruits and high quality beef to Japan and to develop mutually acceptable standards for the certification of lettuce and other specialty crops for export to Japan; and

(8) use the authority under section 32 of the Act of August 24, 1935 (49 Stat. 774; 7 U.S.C. 612c) to establish a special standby export subsidy program for United States agricultural commodities and the products thereof, the export of which has been restricted by foreign government subsidies.

(b) It is further declared to be the sense of the Congress that any special standby export subsidy program established by the Secretary of Agriculture pursuant to subsection (a)(8) should (1) be consistent with United States international obligations, and (2) be designed to neutralize the effects of those foreign agricultural commodity subsidy programs which—

(A) the President has determined, pursuant to section 301 of the Trade Act of 1974 (19 U.S.C. 2411), are acts, policies, or practices described in section 801(a) of such Act that should be eliminated by appropriate action of the United States;

(B) have, as the result of the appropriate dispute settlement procedures, been found to be in violation of the General Agreement on Tariffs and Trade (GATT) or the Agreement on Interpretation and Application of Articles VI, XVI and XXIII of the General Agreement on Tariffs and Trade (relating to subsidies and countervailing measures), if applicable.

CONGRESSIONAL REVIEW OF CERTAIN EXPORT SALES OF COMMODITY CREDIT CORPORATION STOCKS

SEC. 1115. (a) Notwithstanding any other provision of law, no agreement providing for the sale, barter, or exchange of a quantity of commodities owned or controlled by the Commodity Credit Corporation which has a value of more than $5,000,000, which is to be exported, and for which the value to be received is less than 85 percent of the value of such quantity shall be valid—

(1) until the Secretary of Agriculture submits a report to the Speaker of the House of Representatives and the President of the Senate specifying in detail the terms of such agreement; and

(2) unless the Congress does not adopt a concurrent resolution disapproving such agreement before the expiration of 30 days of continuous session of the Congress beginning on the day such report is submitted.

(b) For purposes of subsection (a)(2)—

(1) continuity of session is broken only by an adjournment of the Congress sine die; and

(2) days on which either House is not in session because of an adjournment of more than 3 days to a day certain shall be excluded in computing the 30-day period described in such subsection.

(c) For purposes of subsection (a), the term "value" means the fair market value on the world market.

(d) Subsection (a) shall not apply to any agreement entered into before the date of the enactment of this Act.

TITLE XII—FOOD STAMP AND COMMODITY DISTRIBUTION AMENDMENTS OF 1981

Sec. 1201. This title may be cited as the "Food Stamp and Commodity Distribution Amendments of 1981".

INDIAN RESERVATIONS

Sec. 1202. Section 3(j) of the Food Stamp Act of 1977 is amended by inserting ", and includes any lands over which a tribal organization (as that term is defined in section 3(p) of this Act) has authority to exercise any governmental jurisdiction" before the period.

RETAIL FOOD STORES

Sec. 1203. (a) Section 3(k) of the Food Stamp Act of 1977 is amended by—

(1) revising clause (1) to read as follows: "(1) an establishment or house-to-house trade route whose gross sales volume consists of more than 50 per centum eligible

food items and in which over 50 per centum of eligible food sales volume consists of staple food items, such as meat, poultry, fish, bread, cereals, vegetables, fruits, dairy products, and the like, but not including accessory food items, such as coffee, tea, cocoa, carbonated and uncarbonated drinks, candy, condiments, spices, snack foods such as potato chips, pretzels, and popcorn, and dessert items such as cakes, pies, cookies, and pastries";

(2) redesignating clauses (2), (3), and (4) as clauses (4), (5), and (6) respectively; and

(3) inserting after clause (1) new clauses (2) and (3) to read as follows: "(2) and establishment which contains a clearly identifiable grocery department with a full line of grocery items and in which over 50 per centum of eligible food sales volume consists of staple food items, (3) an establishment which sells staple food items and is the only source for households to obtain such staple food items in an immediate area, and which meets such other criteria as the Secretary may prescribe,";

(b) Section 9(a) of the Food Stamp Act of 1977 is amended by—

(1) striking out "(1) the nature and extent of the food business conducted by the applicant;" and inserting in lieu thereof "(1) whether the applicant meets the definition is section 3(k) of this Act of a retail food store; and";

(2) stiking out clause (2); and

(3) redesignating clause (3) as (2).

ALASKA'S THRIFTY FOOD PLAN

SEC. 1204. Section 3(o) of the Food Stamp Act of 1977 is amended by revising clause (2) to read as follows: "(2) make cost adjustments in the thrifty food plan for Hawaii and the urban and rural parts of Alaska to reflect the cost of food in Hawaii and urban and rural Alaska,".

ADJUSTMENT OF THE THRIFTY FOOD PLAN

SEC. 1205. Section 3(o) of the Food Stamp Act of 1977 is amended by striking out clause (6) and all that follows through the end of clause (9), and inserting in lieu thereof the following: "(6) on October 1, 1982, adjust the cost of such diet to the nearest dollar increment to reflect changes in the cost of the thrifty food plan for the twenty-one months ending the preceding June 30, 1982, and (7) on October 1, 1983, and each October 1 thereafter, adjust the cost of such diet to the nearest dollar increment to reflect changes in the cost of the thrifty food plan for the twelve months ending the preceding June 30".

ENERGY ASSISTANCE PAYMENTS; EXCLUDED PAYMENTS OF OTHER PROGRAMS

SEC. 1206. Section 5(d) of the Food Stamp Act of 1977 is amended by striking out "and (11)" the first place it appears and all that follows through the period, and by inserting in lieu thereof the following:

"(11) any income that any other Federal law specifically excludes from consideration as income for purposes of determining eligibility for the food stamp program, and (12) any payments or allowances made under (A) any Federal laws for the purpose of providing energy assistance or (B) any State or local laws for the purpose of providing energy assistance, designated by the State or local legislative body authorizing such payments or allowances as energy assistance, and determined by the Secretary to be provided by the State or local government involved on a seasonal basis for an aggregate period not to exceed 6 months in any year.".

DISALLOWANCE OF DEDUCTIONS FOR EXPENSES PAID BY VENDOR PAYMENTS; ATTRIBUTION OF INCOME AND RESOURCES TO SPONSORED ALIENS

SEC. 1207. (a) Section 5(e) of the Food Stamp Act of 1977 is amended by adding in the fourth and fifth sentences after "entitled" the following: ", with respect to expenses other than expenses paid on behalf of the household by a third party,".

(b) Section 5 of the Food Stamp Act of 1977 is amended by adding a new subsection 5(i) to read:

"(i)(1) For purposes of determining eligibility for and the amount of benefits under this Act for an individual who is an alien as described in subsection 6(f)(2)(B) of this Act, the income and resources of any person who as a sponsor of such individual's entry into the United States executed an affidavit of support or similar agreement with respect to such individual, and the income and resources of the sponsor's spouse if such spouse is living with the sponsor, shall be deemed to be the income and resources of such individual for a period of three years after the individual's entry into the United States. Any such income deemed to be income of such individual shall be treated as unearned income of such individual.

"(2)(A) The amount of income of a sponsor, and the sponsor's spouse if living with the sponsor, which shall be deemed to be the unearned income of an alien for any year shall be determined as follows:

"(i) the total yearly rate of earned and unearned income of such sponsor, and such sponsor's spouse if such spouse is living with the sponsor, shall be determined for such year under rules prescribed by the Secretary;

"(ii) the amount determined under subparagraph (i) shall be reduced by an amount equal to the income eligibility standard as determined under subsection 5(c) of this Act for a household equal in size to the sponsor, the sponsor's spouse if living with the sponsor, and any persons dependent upon or receiving support from the sponsor or the sponsor's spouse if the spouse is living with the sponsor;

"(iii) the monthly income attributed to such alien shall be one-twelfth of the amount calculated under subparagraph (ii).

"(B) The amount of resources of a sponsor, and the sponsor's spouse if living with the sponsor, which shall be deemed to be the resources of an alien for any year shall be determined as follows:

"(i) the total amount of the resources of such sponsor and such sponsor's spouse if such spouse is living with the sponsor shall be determined under rules prescribed by the Secretary;

"(ii) the amount determined under subparagraph (i) shall be reduced by $1,500;

"(iii) the resources determined under subparagraph (ii) shall be deemed to be resources of such alien in addition to any resources of such alien.

"(C)(i) Any individual who is an alien shall, during the period of three years after entry into the United States, in order to be an eligible individual or eligible spouse for purposes of this Act, be required to provide to the State agency such information and documentation with respect to his sponsor and sponsor's spouse as may be necessary in order for the State agency to make any determination required under this section, and to obtain any cooperation from such sponsor necessary for any such determination. Such alien shall also be required to provide such information and documentation which such alien or the sponsor provided in support of such alien's immigration application as the State agency may request.

"(ii) The Secretary shall enter into agreements with the Secretary of State and the Attorney General whereby any information available to such persons and required in order to make any determination under this section will be provided by such persons to the Secretary, and whereby such persons shall inform any sponsor of an alien, at the time such sponsor executes an affidavit of support or similar agreement, of the requirements imposed by this section.

"(D) Any sponsor of an alien, and such alien, shall be jointly and severably liable for an amount equal to any overpayment made to such alien during the period of three years after such alien's entry into the United States, on account of such sponsor's failure to prove correct information under the provisions of this section, except where such sponsor was without fault, or where good cause for such failure existed. Any such overpayment which is not repaid shall be recovered in accordance with the provisions of subsection 13(a)(2) of this Act.

"(E) The provisions of this subsection shall not apply with respect to any alien who is a member of the sponsor's household, as defined in subsection 3(i) of this Act.".

RESOURCES

SEC. 208. Section 5(g) of the Food Stamp Act of 1977 is amended by inserting "(other than those relating to licensed vehicles)" after "June 1, 1977" in the second sentence.

WORK REQUIREMENTS

SEC. 1209. Section 6(d) of the Food Stamp Act of 1977 is amended by—

(1) striking out ", unless the household was certified for benefits under this Act immediately prior to such unemployment" in clause (iii) of paragraph (1); and

(2) inserting "(including the lack of adequate child care for children above the age of six and under the age of twelve)" after "good cause" in clause (iv) of paragraph (1); and

(3) inserting before the semicolon at the end of clause (A) of paragraph (2) ", in which case, failure by such person to comply with any work requirement to which such person is subject that is comparable to a requirement of paragraph (1) shall be the same as failure to comply with that requirement of paragraph (1)"; and

(4) striking out "twelve" and inserting in lieu thereof "six" in paragraph (2)(B).

ANNUALIZATION OF WORK REGISTRATION

SEC. 1210. Section 6(d)(1)(i) of the Food Stamp Act of 1977 is amended by striking out "six" and inserting in lieu thereof "twelve".

STATE ISSUANCE LIABILITY

SEC. 1317. Section 7(f) of the Food Stamp Act of 1977 is amended to read as follows:

"(f) Notwithstanding any other provision of this Act, the State agency shall be strictly liable to the Secretary for any financial losses involved in the acceptance, storage and issuance of coupons, including any losses involving failure of a coupon issuer to comply with the requirements specified in section 11(d)(21), except that in the case of losses resulting from the issuance and replacement of authorizations for coupons and allotments which are sent through the mail, the State agency shall be liable to the Secretary to the extent prescribed in the regulations promulgated by the Secretary.".

SIXTY-DAY TRANSFER OF CERTIFICATION

SEC. 1212. Section 11 of the Food Stamp Act of 1977 is amended by striking out subsection (b) and redesignating subsections (c) through (l) as subsections (b) through (k), respectively.

RECERTIFICATION NOTICE

SEC. 1213. Section 11(d)(4) of the Food Stamp Act of 1977 is amended by—

(1) striking out "immediately prior to or at" and inserting in lieu thereof "prior to";

(2) inserting after "new certification period" the first time that it appears, ": *Provided*, That such notice shall be provided no earlier than thirty days prior to the start of the last month of the certification period if the certification period is six months or longer;"; and

(3) striking out "it" after "advising" and inserting in lieu thereof "the household".

ACCESS OF COMPTROLLER GENERAL TO INFORMATION

SEC. 1214. (a) Section 9(c) of the Food Stamp Act of 1977 is amended by adding at the end thereof the following: "Such purposes shall not exclude the audit and examination of such information by the Comptroller General of the United States, authorized by any other provision of law.".

(b) Section 11(d)(8) of the Food Stamp Act of 1977 is amended by inserting before the semicolon the following: ", except that such safeguards shall not prevent the use or disclosure of such information to the Comptroller General of the United States for audit and examination authorized by any other provision of law".

EXPEDITED SERVICE

SEC. 1215. Section 11(d)(9) of the Food Stamp Act of 1977 is amended by striking "in immediate need because of no income as defined in sections 5 (d) and (e) of this Act" and inserting in lieu thereof "(A) whose income as defined in section 5(d) of this Act does not exceed $150 per month or that are destitute since they have not received income for the month of application in the political subdivision in which such application is filed other than from a new source not in excess of $25 a month until at least 10 days after the date of application as defined in paragraph (2) of this subsection and (B) whose liquid assets as defined pursuant to section 5(g) of the act do not exceed $100".

RESTORATION OF LOST BENEFITS

SEC. 1216. (a). Section 11(d)(11) of the Food Stamp Act of 1977 is amended to read as follows:

"(11) upon receipt of a request from a household, for the prompt restoration in the form of coupons to a household of any allotment or portion thereof which has been wrongfully denied or terminated, except that allotments shall not be restored for any period of time more than one year prior to the date the State agency receives a request for such restoration from a household or the State agency discovers in the normal course of business that a loss to a specific household has occurred and notifies the household of its lost benefits;"

(b) Section 14 of the Food Stamp Act of 1977 is redesignated as section 14(a), and new section 14(b) is added to read as follows:

"(b) In any judicial action arising under this Act any food stamp allotments found to have been wrongfully withheld shall be restored only for periods of not more than one year prior to the date of the commencement of such action, or in the case of an action seeking review of a final State agency determination, not more than one year prior to the date specified under section 11(d)(11) of this Act, or, if that section does not apply, of the filing of a request with the State for the restoration of such allotments.".

INFORMATION

SEC. 1217. (a) Section 11(d) of the Food Stamp Act of 1977 is amended by—

(1) in paragaph (19) striking out the period at the end thereof and inserting in lieu thereof "; and "; and

(2) adding at the end thereof the following new paragraphs:

"(20) that information available from the Social Security Administration under the provisions of section 6103(i)(7) of the Internal Revenue Code of 1954, and information available from agencies administering State unemployment compensation laws under the provisions of section 303(d) of the Social Security Act, shall be requested and utilized by the State agency (described in section 3(n)(1) of this Act) to the extent permitted under the provisions of such sections, except that the State agency shall not be required to request such information from the Social Security Administration if such information is available from the agency administering the State unemployment compensation laws.

"(21) that, project areas or parts thereof where authorization cards are used, and eligible households are required to present photographic identification cards in order to receive their coupons, the state agency shall include, in any agreement or contract with a coupon issuer, a provision that (1) the issuer shall (A) require the presenter to furnish a photographic identification card at the time the authorization card is presented, and (B) record on the authorization card the identification number shown on the photographic identification card; and (2) if the State agency determines that the authorization card has been stolen or otherwise was not received by a household certified as eligible, the issuer shall be liable to the State agency for the face value of any coupons issued in the transaction in which such card is used and the issuer fails to comply with the requirements of clause (1)".

NUTRITION EDUCATION PROGRAM

SEC. 1218. Section 11(e) of the Food Stamp Act of 1977 is amended to read as follows:

"(e) To encourage the purchase of nutritious foods, the Secretary is authorized to extend food and nutrition education to reach food stamp program participants, using the methods and techniques developed in the expanded food and nutrition education and other programs.".

ALASKAN FEE AGENTS

SEC. 1219. Section 11 of the Food Stamp Act of 1977 is amended by adding thereto the following new subsection:

"(o) The Secretary shall provide for the use of fee agents in rural Alaska. As used in this subsection 'fee agent' means a paid agent who, although not a State employee, is authorized by the State to make applications available to low-income households, assist in the completion of applications, conduct required interviews, secure required verification, forward completed applications and supporting documentation to the State agency, and provide outreach and other services as required by the State agency. Such services shall not include making final decisions on household eligibility or benefit levels.".

USE OF CERTIFIED MAIL

SEC. 1220. Section 11 of the Food Stamp Act of 1977 is amended by adding thereto the following new subsection:

"(m) The Secretary shall permit a State agency to issue coupons by means of certified mail with the Secretary paying each State agency that issues coupons by certified mail 75 per centum of the costs of such mail.".

STAFFING

SEC. 1221. Section 16(b)(1) of the Food Stamp Act of 1977 is amended by striking out ", inlcuding, but not limited to, staffing standards such as caseload per certification worker limitations,".

INCENTIVES FOR ERROR REDUCTION EFFORTS AND CORRECTIVE ACTION PLANS

SEC. 1222. Section 16 of the Food Stamp Act of 1977 is amended by—

(1) inserting before the period at the end of the first sentence of subsection (c) the following: ", and, effective October 1, 1981, which also meets the standard contained in paragraph (1)(B) of this subsection"; and

(2) in subsection (d), striking out "October 1, 1978", and inserting in lieu thereof "October 1, 1981", and by inserting "(2)" after "subsection (c)".

SOCIAL SECURITY ACCOUNT NUMBERS

SEC. 1223. The first sentence of section 16(f) of the Food Stamp Act of 1977 is amended by striking out "may" and inserting in lieu thereof "shall".

EXTENDING AND AMENDING CASH-OUT PILOT PROJECTS

SEC. 1224. Section 17(b)(1) of the Food Stamp Act of 1977 is amended by—

(1) inserting "or the average value of allotments by household size" after "allotments" in the first sentence;

(2) striking out "either";

(3) inserting "any of whose members are" after "over or";

(4) inserting "or to aid to families with dependent children under part A of title IV of the Social Security Act" after "Social Security Act";

(5) inserting ", other than any project involving the payment of the average value of allotments by household size in the form of cash to eligible households," after "no project"; and

(6) striking out "1981" and inserting "1985" in lieu thereof.

NUTRITIONAL MONITORING

SEC. 1225. Section 17(c) of the Food Stamp Act of 1977 is amended by adding at the end thereof the following: "The Secretary shall, be way of making contracts with or grants to public or private organizations or agencies, implement pilot programs in locations selected to provide a representative geographic and demographic cross-section of political subdivisions reflecting natural usage patterns of health and nutritional services which contain high proportions of low income people that will test various means of measuring on a continuing basis the nutritional status of low income people in such subdivisions, with special emphasis on people who are eligible for food stamps, in order to develop minimum common criteria and methods for systematic nutrition monitoring that could be applied on a nationwide basis. The Secretary shall report on the progress of these projects on an annual basis commencing on July 1, 1982, to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the

Senate, together with such recommendations as the Secretary deems appropriate.".

STUDY OF RETROSPECTIVE ACCOUNTING AND PERIODIC REPORTING

SEC. 1226. Section 17 of the Food Stamp Act of 1977 is amended by adding at the end thereof the following new subsection:

"(d) The Secretary shall study the effects of retrospective accounting and periodic income reporting in the food stamp program, including the impact on benefit and administrative costs and on error rates, and the degree to which eligible households are denied food stamp benefits for failure to file periodic reports. The Secretary shall also conduct pilot projects in which periodic income reporting is conducted in conjunction with prospective income accounting. The Secretary shall issue an interim report to the Congress on the results of these studies by March 1, 1983, and a final report on March 1, 1985.".

PILOT PROJECTS TO SIMPLIFY THE PROCESSING OF APPLICATIONS FOR CERTAIN AFDC, SSI, AND MEDICAID RECIPIENTS

SEC. 1227. Section 17 of the Food Stamp Act of 1977 is amended by adding at the end thereof the following new subsection:

"(d) The Secretary may conduct pilot projects in which households that include one or more recipients of aid to families with dependent children under part A of title IV of the Social Security Act, of supplemental security income under title XVI of the Social Security Act, or of medical assistance under title XIX of the Social Security Act, and whose income does not exceed the applicable income standard of eligibility described in section 5(c) of this Act shall be deemed to satisfy the application requirements prescribed under section 5(a) of this Act and the income and resource requirements prescribed under subsections (d) through (g) of section 5 of this Act. For any pilot project carried out under this subsection, allotments provided pursuant to section 8(a) of this Act shall be based upon household size and (1) benefits paid to such household under Part A of Title IV or Title XVI of the Social Security Act, or (2) income as determined for eligibility under Title XIX of the Social Security Act, or at the option of the political subdivision or the State, the standard of need for such size household under such programs, except that the Secretary shall adjust the value of such allotments as may be necessary to ensure that the average allotment by household size for households participating in such pilot project and receiving such aid to families with dependent children, such supplemental security income, or such medical assistance, as the case may be, is not less than the average allotment which would have been provided under this Act but for the operation of this subsection, for each category of households, respectively, in such pilot project area, for any period during which such pilot project is in operation. The Secretary may conduct such pilot projects in any political subdivision of a State, upon the request of such political subdivision, or throughout a State, upon the request of such State. The Secretary shall evaluate the impact of such pilot projects on recipient households, administrative costs, and error rates. The administrative costs of such projects shall be shared in accordance with the provisions of section 16. In implementing this section, the Secretary shall consult with the Secretary of Health and Human Services to ensure that to the extent practicable, in the case of households participating in such pilot projects, the processing of applications for, and determinations of eligibility to receive, food stamp benefits are simplified and are unified with the processing of applications for, and determinations of eligibility to receive, benefits under such titles of the Social Security Act.".

FOOD STAMP FUNDING AND PROGRAM EXTENSION

SEC. 1228. Section 18(a) of the Food Stamp Act of 1977 is amended in the first sentence thereof by—

(1) striking out "and" after "September 30, 1980"; and

(2) inserting before the period at the end thereof the following: "; not in excess of $11,300,000,000 for the fiscal year ending September 30, 1982; not in excess of $11,170,000,000 for the fiscal year ending September 30, 1983; not in excess of $11,115,000,000 for the fiscal year ending September 30, 1984; and not in excess of $11,305,000,000 for the fiscal year ending September 30, 1985".

INCENTIVES, SANCTIONS, AND CLAIMS

SEC. 1229. Section 18 of the Food Stamp Act of 1977 is amended by adding a new subsection (e) to read as follows:

"(e) Funds collected from claims against households or State agencies, including claims collected pursuant to sections 7(f), 11(g), and 16(g) of this Act, claims resulting from resolution of audit findings, and claims collected from households receiving overissuances, shall be credited to the food stamp program appropriation account for the fiscal year in which the collection occurs. Funds provided to State agencies under section 16(c) of this Act shall be paid from the appropriation account for the fiscal year in which the funds are provided.".

WORKFARE

SEC. 1230. The Food Stamp Act of 1977 is amended by adding at the end thereof the following new section:

"WORKFARE

"SEC. 19. The Secretary shall permit any political subdivision in any State that applies and submits a plan to the Secretary in compliance with guidelines promulgated by the Secretary to operate and administer a workfare program pursuant to which every person who is a member of a household participating in the food stamp program who is not exempt by virtue of the provisions of this subsection shall accept an offer from such subdivision to perform work on its behalf, or may seek an offer to perform work, in return for compensation consisting of the allotment to which the household is entitled pursuant to section 8(a) of this Act, with each hour of such work entitling the household to which the person belongs to a portion of its allotment equal in value to 100 per centum of the higher of the applicable State minimum wage or the Federal minimum hourly rate under the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 206(a)(1)). Such work shall not be required to the extent that it exceeds in value the allotment to which the household is otherwise entitled or that it either exceeds twenty hours a week or would, together with any other hours worked in any other compensated capacity by such person on a regular or predictable part-time basis, exceed thirty hours a week. A political subdivision operating a workfare program may allow a job search period, prior to making workfare assignments, of up to thirty days following a determination of eligibility. Such work shall not include any that has the effect of replacing or preventing the employment of an individual not participating in the workfare program or that does not provide the same benefits and working conditions that are provided by the political subdivision to employees performing comparable work for comparable hours. In the event that any person fails to comply with the requirements of this section, neither that person nor the household to which that person belongs shall be eligible to participate in the food stamp program for two months, unless that person or another person in the household satisfies all outstanding workfare obligations prior to the end of the two month disqualification period. The Secretary shall pay each political subdivision operating a workfare program 50 per centum of all administrative costs including reimbursements to participants for work-related expenses involved in such operation. The Secretary may suspend or cancel some or all of these payments, or may withdraw approval from a political subdivision to operate a workfare program, upon a finding that the subdivision has failed to comply with the workfare requirements. The persons who shall be exempt from workfare requirements are persons who are either (A) mentally or physically unfit; (B) under eighteen years of age; (C) sixty years of age or over; (D) subject to and currently involved for at least twenty hours a week in a work training program under a work registration requirement pursuant to title IV of the Social Security Act as amended (32 U.S.C. 602); (E) a parent or other member of a household with responsibility for the care of a child under age six or of an incapacitated person; (F) a parent or other caretaker of a child in a household where there is another person who is subject to the requirements of this subsection or is employed full-time; (G) a regular participant in a drug addiction or alcoholic treatment and rehabilitation program, or (H) an individual described in sections 6(d)(2)(D) or (F) of this Act. Political subdivisions operating workfare programs shall reimburse participants for actual costs of transportation, and other actual costs reasonably necessary and directly related to participation in the program not to exceed $25 in the aggregate per month."

REPORTING OF ABUSES BY THE PUBLIC; NOTICE OF VERIFICATION; DISCLOSURE OF INFORMATION TO LAW ENFORCEMENT OFFICIALS; MINIMUM MANDATORY COURT SENTENCE FOR CRIMINAL OFFENSES; WORK RESTITUTION PROGRAM

SEC. 1231. (1) Section 9 of the Food Stamp Act of 1977 is amended by adding at the end thereof a new subsection (e) to read:

"(e) Approved retail food stores shall display a sign providing information on how persons may report abuses they have observed in the operation of the food stamp program.".

(2) Section 11(e)(2) of the Food Stamp Act of 1977 is amended by inserting after the second period the following new sentence: "Each application shall also contain in understandable terms and in prominent and boldface lettering a statement that the information provided by the applicant in connection with the application for a coupon allotment will be subject to verification by Federal, State, and local officials to determine if such information is factual and that if any material part of such information is incorrect, food stamps may be denied to the applicant, and that the applicant may be subjected to criminal prosecution for knowingly providing incorrect information.".

(3) Section 11(e)(8) of the Food Stamp Act of 1977 is amended by striking the semicolon at the end and inserting in lieu thereof a comma and the following: "except that, notwithstanding any other provision of law, all information obtained under this Act from an applicant household shall be made available, upon request, to local, State or Federal law enforcement officials for the purpose of investigating an alleged violation of this Act or any regulation issued under this Act;".

(4) Subsections (b) and (c) of section 15 of the Food Stamp Act of 1977 are amended to read:

"(b)(1) Subject to the provisions of paragraph (2) of this subsection, whoever knowingly uses, transfers, acquires, alters, or possesses coupons or authorization cards in any manner not authorized by this Act or the regulations issued pursuant to this Act shall, if such coupons or authorization cards are of a value of $100 or more, be guilty of a felony and shall, upon the first conviction thereof, be fined not more than $10,000 or imprisoned for not more than five years, or both, and, upon the second and any subsequent conviction thereof, shall be imprisoned for not less than six months nor more than five years and may also be fined not more than $10,000 or, if such coupons or authorization cards are of a value of less than $100, shall be guilty of a misdemeanor, and, upon the first conviction thereof, shall be fined not more than $1,000 or imprisoned for not more than one year, or both, and upon the second and any subsequent conviction thereof, shall be imprisoned for not more than one year and may also be fined not more than $1,000. In addition to such penalties, any person convicted of a felony or misdemeanor violation under this subsection may be suspended by the court from participation in the food stamp program for an additional period of up to eighteen months consecutive to that period of suspension mandated by section 6(b)(1) of this Act.

"(2) In the case of any individual convicted of an offense under paragraph (1) of this subsection, the court may permit such individual to perform work approved by the court for the purpose of providing restitution for losses incurred by the United States and the agency as a result of the offense for which such individual was convicted. If the court permits such individual to perform such work and such individual agrees thereto, the court shall withhold the imposition of the sentence on the condition that such individual perform the assigned work. Upon the successful completion of the assigned work the court may suspend such sentence.

"(c) Whoever presents, or causes to be presented, coupons for payment or redemption of the value of $100 or more, knowing the same to have been received, transferred, or used in any manner in violation of the provisions of this Act or the regulations issued pursuant to this Act, shall be guilty of a felony and, upon the first conviction thereof, shall be fined not more than $10,000 or imprisoned for not more than five years, or both, and, upon the second and any subsequent conviction thereof, shall be imprisoned for not less than one year nor more than five years and may also be fined not more than $10,000, or, if such coupons are of a value of less than $100, shall be guilty of a misdemeanor and, upon the first conviction thereof, shall be fined not more than $1,000 or imprisoned for not more than one year, or both, and, upon the second and any subsequent conviction thereof, shall be imprisoned for not more than one year and may also be fined not more than $1,000. In addition to such penalties, any person convicted of a felony or misdemeanor violation under this subsection may be suspended by the court from participation in the food stamp program for an additional period of up to eighteen months consecutive to that period of suspension mandated by section 6(b)(1) of this Act.".

EXTENSION OF AUTHORITIES, PENALTIES FOR FRAUD, AND MISCELLANEOUS PROVISIONS

SEC. 1232. (a) Effective October 1, 1981, section 4 of the Agriculture Consumer and Protection Act of 1973 is amended by—

(1) striking out "1978, 1979, 1980, and 1981", in the first sentence of subsection (a) and inserting in lieu thereof: "1982, 1983, 1984, and 1985"; and

(2) adding a new subsection (c) to read as follows:

"(c) Whoever embezzles, willfully misapplies, steals or obtains by fraud any agricultural commodity or its products (or any funds, assets, or property deriving from donation of such commodities) provided under this section, or under section 416 of the Agricultural Act of 1949 (7 U.S.C. 1431), section 32 of the Act of August 24, 1935 (7 U.S.C. 612c), or section 709 of the Food and Agriculture Act of 1965 (7 U.S.C. 1446a-1), whether received directly or indirectly from the United States Department of Agriculture, or whoever receives, conceals, or retains such commodities, products, funds, assets, or property for personal use or gain, knowing such commodities, products, funds, assets, or property have been embezzled, willfully misapplied, stolen, or obtained by fraud shall, if such commodities, products, funds, assets, or property are of a value of $100 or more, be fined not more than $10,000 or imprisoned not more than five years, or both, or if such commodities, products, funds, assets, or property are of value of less than $100, shall be fined not more than $1,000 or imprisoned for not more than one year, or both."

COMMODITY SUPPLEMENTAL FOOD PROGRAM—PILOT PROJECTS FOR THE ELDERLY AND ADMINISTRATIVE COSTS

SEC. 1233. Effective October 1, 1981, section 5(a) of the Agriculture and Consumer Protection Act of 1973 is amended to read as follows:

"(a) In carrying out the supplemental feeding program (hereinafter referred to as the 'commodity supplemental food program') under section 4 of this Act, the Secretary shall (1) institute two pilot projects directed at low-income elderly persons, including, where feasible, distribution of commodities to such persons in their homes, and (2) provide to the State agencies administering such program, for each of the fiscal years 1982 through 1985, funds appropriated from the general fund of the Treasury in amounts equal to the administrative costs of State and local agencies in operating the program, except that the funds provided to State agencies each fiscal year may not exceed 15 per centum of the amount appropriated for the provision of commodities to State agencies.".

RETAIL REDEMPTION

SEC. 1234. Section 10 of the Food Stamp Act of 1977 is amended by striking out the term "bank(s)" whenever it appears throughout this section and substituting in lieu thereof the following: "Financial institutions which are insured by the Federal Deposit Insurance Corporation (FDIC) or the Federal Savings and Loan Insurance Corporation (FSLIC).".

EFFECTIVE DATE

SEC. 1235. Except as otherwise specifically provided, these amendments shall be effective upon such dates as the Secretary may prescribe, taking into account the need for orderly implementation of these provisions.

AUTHORITY OF OFFICE OF INSPECTOR GENERAL

SEC. 1236. Any person who is employed in the Office of the Inspector General Department of Agriculture, who conducts investigations of alleged or suspected felony criminal violations of statutes, including but not limited to the food stamp program, administered by the Secretary of Agriculture or any agency of the Department of Agriculture and who is jointly designated by the Attorney General of the United States, and by the Inspector General of the Department of Agriculture may—

(1) make an arrest without a warrant for any such criminal felony violation if such violation is committed, or if such employee has probable cause to believe that such violation is being committed, in the presence of such employee;

(2) execute a warrant for an arrest, for the search of premises, or the seizure of evidence of such warrant is under authority of the United States issued upon probable cause to believe that such violation has been committed; and

(3) carry a firearm. In accordance with rules issued by the Secretary of Agriculture, while such employee is engaged in the performance of official duties under the authority provided in section 6, or described in section 9, of the Inspector General Act of 1978. (5 U.S.C. app. 6, 9).

HOUSEHOLD DEFINITION

SEC. 1237. Section 3(i) of the Food Stamp Act of 1977 is amended by inserting before the period at the end of the first sentence the following: ", or receive supplemental security income benefits under title XVI of the Social Security Act or disability or blindness payments under title I, II, X, XIV, or XVI of the Social Security Act".

REIMBURSEMENT EXCLUSION

SEC. 1238. Section 5(d)(5) of the Food Stamp Act is amended by adding before the comma the following: ": *Provided*, that no portion of benefits provided under Title IV-A of the Social Security Act, to the extent it is attributable to an adjustment for work-related or child care expenses, shall be considered such reimbursement."

TITLE XIII—NATIONAL AGRICULTURAL RESEARCH, EXTENSIONS, AND TEACHING POLICY ACT AMENDMENTS OF 1981

SHORT TITLE

SEC. 1301. This title may be cited as the "National Agricultural Research, Extension, and Teaching Policy Act Amendments of 1981".

FINDINGS

SEC. 1302. Section 1402 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3101) is amended by—

(1) beginning the first word of each numbered paragraph with a capital letter;

(2) striking out the semicolon at the end of each numbered paragraph and inserting in lieu thereof a period;

(3) striking out the word "and" at the end of paragraph numbered (8); and

(4) adding new paragraphs (10) and (11) at the end thereof to read as follows:

"(10) It is and has been the policy of the United States to support food and agricultural research, extension, and teaching in the broadest sense of these terms. The partnership between the Federal Government and the States, as consummated in legislation and cooperative agreements, and the cooperative nature of efforts to implement this policy in cooperation with the food and agricultural industry has been eminently successful. Cooperative research, extension, and teaching programs have provided the United States with the most productive and efficient food and agricultural system in the world. This system is the basis of our national affluence and it provides vast amounts of food and fiber to other people around the world. However, the food and agricultural system is dynamic and constantly changing. The research, extension, and teaching programs that support the food and agricultural system must be maintained and constantly adjusted to meet ever changing challenges. National support of cooperative research, extension, and teaching efforts must be reaffirmed and expanded at this time to meet major needs and challenges in the following areas:

"(A) FOOD AND AGRICULTURAL SYSTEM PRODUCTIVITY.—Increases in agricultural productivity have been outstanding, however, productivity growth in the past decade has slowed. It is imperative that improved technologies and management systems be developed to maintain and enhance agricultural productivity in order for agricultural production in the United States to meet the demand of a rising world population, rising costs of production, and limitations on energy consumption. Improved productivity in food and agricultural processing and marketing sectors is a critical need in the national effort to achieve a strong economy.

"(B) DEVELOPMENT OF NEW FOOD, FIBER, AND ENERGY SOURCES.—Programs to identify and develop new crop and animal sources of food, fiber, and energy must be undertaken to meet future needs.

"(C) AGRICULTURAL ENERGY USE AND PRODUCTION.—Much of the current agricultural technology is relatively energy intensive. It is critical that alternative technologies be developed to increase agricultural energy efficiency and to reduce dependence on petroleum based products. Furthermore, agriculture provides the United States with alternative potential sources of energy that must be assessed and developed.

"(D) NATURAL RESOURCES.—Improved management and conservation of soil, water, forest, and range resources is vital to maintain the resource base for food and fiber production. An expanded program in the area of soil and water conservation research is needed to develop more economical and effective conservation systems. Five key objectives of this research are:

"(i) sustaining soil productivity;

"(ii) developing more cost-effective and practical conservation technologies;

"(iii) managing water in stressed environments;

"(iv) protecting the quality of the nation's surface water and groundwater resources; and

"(v) establishing integrated multidisciplinary organic farming research projects designed to foster the implementation of the major recommendations of the United States Department of Agriculture Report and Recommendations on Organic Farming, July 1980.

"(E) PROMOTION OF THE HEALTH AND WELFARE OF PEOPLE.—The basic objectives of food and agricultural research, extension, and teaching programs are to make the maximum contribution to the health and welfare of people and to the economy of the United States through the enhancement of owner-operated family farms, to improve community services and institutions, to increase the quality of life in rural America, and to improve the well-being of consumers. The rapid rate of social change, economic instability, and current energy problems increase the need for expanded programs of research and extension in family financial management, housing and home energy consumption, food preparation and consumption, human development (including youth programs), and development of community services and institutions.

"(F) HUMAN NUTRITION.—The challenge to meet the food needs of the world continues, but there is an increasing need to address nutrition research and educational issues associated with diet resulting from changing life styles and with respect to special groups such as the elderly, teenagers, infants, and pregnant women.

"(G) INTERNATIONAL FOOD AND AGRICULTURE.—The greatest challenge facing mankind through the next two decades will be to produce adequate food for an expanding world population. This challenge demands a dedicated effort by the Federal Government and the State cooperative institutions, and other colleges and universities to expand international food and agricultural research, extension, and teaching programs. Improved cooperation and communications by the Department of Agriculture and the cooperators with international agricultural research centers, counterpart agencies and universities in other countries, is necessary to improve food and agricultural progress throughout the world.

"(11) Long-range planning for research, extension, and teaching is a key element in meeting the objectives of this title, and all of the elements in the food and agricultural science and education system are encouraged to expand their planning and coordination efforts.".

PURPOSES

SEC. 1303. Section 1403 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3102) is amended by—

(1) in paragraph (4), striking out the comma after the word "programs" the first time it appears and striking out the words "including the initiatives specified in section 1402(8) of this title";

(2) in paragraph (6), striking out "and" immediately after the semicolon;

(3) in paragraph (7), striking out the words "training and research" and inserting in lieu thereof the words "research, extension, and teaching"; and striking out the period at the end thereof and inserting "; and" in lieu thereof; and

(4) adding a new paragraph (8) to read as follows:

"(8) ensure that the food and agricultural system of the United States can meet the challenges described in section 1402(10) of this title and future challenges by providing adequate support for research, extension, and teaching, by—

"(A) improving and strengthening the Federal-State partnership;

"(B) reducing unnecessary and pernicious regulations; and

"(C) improving the cooperation among all who are involved in the food and agricultural sciences.".

REVISED DEFINITIONS

SEC. 1304. Section 1404 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3103) is amended by—

(1) revising paragraph (8) to read as follows:

"(8) the term 'food and agricultural sciences' means basic, applied, and developmental research, and extension and teaching activities, in the food, agricultural, renewable natural resources, forestry, and physical and social sciences, in the broadest sense of these terms, including but not limited to, activities relating to:

"(A) agriculture, including soil and water conservation and use, the use of organic waste materials to improve soil tilth and fertility, plant and animal production and protection, and plant and animal health;

"(B) the processing, distributing, marketing, and utilization of food and agricultural products;

"(C) forestry, including range management, production of forest and range products, multiple use of forest and rangelands, and urban forestry;

"(D) aquaculture;

"(E) home economics, including consumer affairs, food and nutrition, clothing and textiles, housing, and family well-being and financial management;

"(F) rural community welfare and development;

"(G) youth development, including 4-H clubs;

"(H) domestic and export market expansion for United States agricultural products; and

"(I) production inputs, such as energy, to improve productivity.";

(2) revising paragraph (12) to read as follows:

"(12) the term 'State' means any one of the fifty States, the Commonwealth of Puerto Rico, Guam, American Samoa, the Commonwealth of the Northern Marianas, the Trust Territory of the Pacific Islands, the Virgin Islands of the United States, and the District of Columbia;"; and

(3) in paragraph (13), striking out "and" immediately after the semicolon;

(4) at the end of paragraph (14), striking out the period and inserting a semicolon in lieu thereof; and

(5) adding at the end thereof new paragraphs (15) and (16) as follows:

"(15) the term 'cooperating forestry schools' means those institutions eligible to receive funds under the Act of October 10, 1962 (16 U.S.C. 582a et seq.), commonly known as the McIntire-Stennis Act of 1962; and

"(16) the term 'State cooperative institutions' or 'State cooperative agents' means institutions or agents designated by—

"(A) the Act of July 2, 1862 (7 U.S.C. 301 et seq.), commonly known as the First Morrill Act;

"(B) the Act of August 30, 1890 (7 U.S.C. 321 et seq.), commonly known as the Second Morrill Act, including the Tuskegee Institute;

"(C) the Act of March 2, 1887 (7 U.S.C. 361a et seq.), commonly known as the Hatch Act of 1887;

"(D) the Act of May 8, 1914 (7 U.S.C. 341 et seq.), commonly known as the Smith-Lever Act;

"(E) the Act of October 10, 1962 (16 U.S.C. 582 et seq.), commonly known as the McIntire-Stennis Act of 1962; and

"(F) subtitles E, L, and M of this title;".

RESPONSIBILITIES OF THE SECRETARY AND COORDINATING ROLE OF THE DEPARTMENT OF AGRICULTURE

SEC. 1305. Section 1405 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3121) is amended by—

(1) In subsection (1), striking out "Secretary of Health, Education, and Welfare" and inserting in lieu thereof "Secretary of Health and Human Services";

(2) In subsection (5), striking out the word "other";

(3) In subsection (6), inserting the words "or proposed" after the words "actions taken";

(4) In subsection (8), striking out the word "and" at the end thereof;

(5) In subsection (9), striking out the period and inserting in lieu thereof a semicolon; and

(6) Adding at the end thereof the following new paragraphs:

"(10) coordinate all agricultural research, extension, and teaching activities conducted or financed by the Department of Agriculture with the periodic Renewable Resource Assessment and Program provided for in sections 3 and 4 of the Forest and Rangeland Resources Planning Act of 1974 and the appraisal and program provided for in sections 5 and 6 of the Soil and Water Resources Conservation Act of 1977; and

"(11) take the initiative in overcoming barriers to long-range planning by developing, in conjunction with the States, State cooperative institutions, the Joint Council, the Advisory Board, and other appropriate institutions, a long term needs assessment for food, fiber and forest products, and by determining the research required to meet the identified needs.".

SUBCOMMITTEE ON FOOD, AGRICULTURAL, AND FORESTRY RESEARCH

SEC. 1306. (a) Section 1406 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 is amended by striking out the title and inserting in lieu thereof "Subcommittee on Food, Agricultural, and Forestry Research".

(b) Section 401(h) of the National Science and Technology Policy, Organization, and Priorities Act of 1976 (42 U.S.C. 6551(h)) is amended by—

(1) striking out "Subcommittee on Food and Renewable Resources" and inserting in lieu thereof "Subcommittee on Food, Agricultural, and Forestry Research";

(2) striking out "Department of Health, Education, and Welfare" and inserting in lieu thereof "Department of Health and Human Services"; and

(3) striking out "Energy Research and Development Administration" and inserting in lieu thereof "Department of Energy".

JOINT COUNCIL ON FOOD AND AGRICULTURAL SCIENCES

SEC. 1307. (a) Section 1407(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122(a)) is amended by striking out "five" and inserting in lieu thereof "eight".

(b) Section 1407(b) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122(b)) is amended to read as follows:

"(b) The Joint Council shall be composed of not fewer than twenty-five representatives of organizations or agencies which conduct or assist in conducting programs of research, extension, or teaching in the food and agricultural and forestry sciences, including State cooperative institutions; other colleges and universities having a demonstrable capacity to carry out food and agricultural research, extension, or teaching; agencies within the Department of Agriculture which have significant research, extension, or teaching responsibilities; the Office of Science and Technology Policy; other Federal agencies determined by the Secretary to be appropriate, and other public and private institutions, producers, and representatives of the public who are interested in and have a potential to contribute, as determined by the Secretary, to the foundation of national policy in the food and agricultural sciences. Members shall be appointed for a term of up to three years by the Secretary from nominations made by the organizations and agencies described in the preceding sentence. The terms of members shall be staggered. To ensure that regional differences are properly considered, at least one-half of the members of the Joint Council shall be appointed by the Secretary from among distinguished persons engaged in agricultural research, extension, and teaching programs at land-grant colleges and universities and State agricultural experiment stations. To ensure that other agricultural institutional views are considered by the Joint Council, two of the members of the Joint Council shall be appointed by the Secretary from among persons who are distinguished representatives of other colleges and universities having a demonstrable capacity to carry out food and agricultural research, extension, or teaching. The Joint Council shall be jointly chaired by the Assistant Secretary of Agriculture responsible for research, extension, and teaching, and a person to be elected from among the non-Federal membership of the Joint Council.".

(c) Section 1407(d)(1) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122(d)(1)) is amended to read as follows:

"(1) The primary purpose of the Joint Council is to bring about more effective research, extension, and teaching in the food and agricultural sciences in the United States by improving planning and coordination of publicly and privately supported food and agricultural science activities and by relating Federal budget development and program management to these processes.".

(d) Section 1407(d)(2)(E) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122(d)(2)(E)) is amended by striking out "efforts" and all that follows through "planning," and inserting in lieu thereof "in the food and agricultural sciences, by using, wherever possible, the existing regional research, extension, and teaching organizations of State cooperative institutions to provide regional planning and coordination,".

(e) Section 1407(d)(2)(G) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122(d)(2)(G)) is amended to read as follows:

"(G) submit a report—

"(i) not later than June 30 of each year, specifying the Joint Council's recommendations on priorities for food and agricultural research, extension, and teaching programs; delineating suggested areas of responsibility among Federal, State, and private organizations in carrying out such programs; and specifying the levels of financial and other support needed to carry out such programs;

"(ii) not later than November 30 of each year, specifying ongoing research, extension, and teaching programs; accomplishments of such programs; and future expectations of these programs; and

"(iii) not later than June 30, 1983, outlining a five-year plan for food and agricultural sciences that reflects the coordinated views of the research, extension, and teaching community; and updating this plan every two years thereafter.

Each such report shall be submitted to the Congress, the President, the Secretary of Agriculture, and the constituent organizations of the Joint Council. Minority views, if timely submitted, shall be included in such report.".

(f) Section 1407 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3122) is amended by adding at the end thereof the following new subsection:

"(e)(1) The Federal Advisory Committee Act (5 U.S.C. app.), and title XVIII of the Food and Agriculture Act of 1977, shall not apply to the Joint Council.

"(2) The meetings of the Joint Council shall be publicly announced in advance and shall be open to the public. Appropriate records of the activities of the Joint Council shall be kept and made available to the public on request.".

NATIONAL AGRICULTURAL RESEARCH AND EXTENSION USERS ADVISORY BOARD

SEC. 1308. (a) Section 1408(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3123(a)) is amended by striking out "five" and inserting in lieu thereof "eight".

(b) Section 1408(b) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3123(b)) is amended by—

(1) striking out "twenty-one" and inserting in lieu thereof "twenty-five", and

(2) amending paragraph (1) to read as follows:

"(1) eight members representing producers of agricultural, forestry and aquacultural products, from the various geographical regions,"

(3) adding at the end thereof the following: "Such members shall be appointed to serve staggered terms.".

(c) Section 1408(f)(2) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3123(f)(2)) is amended by—

(1) in subparagraph (E), striking out "October 31" and inserting in lieu thereof "July 1", and

(2) in subparagraph (F), striking out "March 1 of" and inserting in lieu thereof "February 20 of".

EXISTING RESEARCH PROGRAMS

SEC. 1309. Section 1409 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3124) is amended by striking out "Health, Education, and Welfare" each time it appears and inserting in lieu thereof "Health and Human Services".

FEDERAL-STATE PARTNERSHIP

SEC. 1310. The National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3124) is amended to add a new section 1409A to read as follows:

"FEDERAL-STATE PARTNERSHIP AND COORDINATION

"SEC. 1409A. (a) A unique partnership arrangement exists in food and agricultural

research, extension, and teaching between the Federal Government and the governments of the several States whereby the States have accepted and have supported, through legislation and appropriations—

"(1) research programs under—

"(A) the Act of March 2, 1887 (7 U.S.C. 361a et seq.), commonly known as the Hatch Act of 1887;

"(B) the Act of October 10, 1962 (16 U.S.C. 582a et seq.), commonly known as the McIntire-Stennis Act of 1962;

"(C) subtitle E of this title; and

"(D) subtitle G of this title;

"(2) extension programs under subtitle G of this title and the Act of May 8, 1914 (7 U.S.C. 341 et seq.), commonly known as the Smith-Lever Act; and

"(3) teaching programs under—

"(A) the Act of July 2, 1862 (7 U.S.C. 301 et seq.), commonly known as the First Morrill Act;

"(B) the Act of August 30, 1890 (7 U.S.C. 321 et seq.), commonly known as the Second Morrill Act;

"(C) the Act of June 29, 1935 (7 U.S.C. 427 et seq.), commonly known as the Bankhead-Jones Act.

This partnership in publicly supported agricultural research, extension, and teaching involving the programs of Federal agencies and the programs of the States has played a major role in the outstanding successes achieved in meeting the varied, dispersed, and in many cases, site-specific needs of American agriculture. This partnership must be preserved and enhanced.

"(b)(1) The purpose of this subsection is to confer upon the Secretary of Agriculture general authority to award contracts, grants, or cooperative agreements to further the research, extension, or teaching programs in the food and agricultural sciences of the Department of Agriculture. This authority supplements all other laws relating to the Department of Agriculture and is not to be construed as limiting or repealing any existing authorities.

"(2) The Secretary of Agriculture may make contracts, grants, or cooperative agreements for periods not to exceed five years, to State agricultural experiment stations, State cooperative extension services, all colleges and universities, other research or education institutions and organizations, Federal and private agencies and organizations and individuals, and any other contractor or recipient either foreign or domestic, to further research, extension, or teaching programs in the food and agricultural sciences of the Department of Agriculture.

"(3) The Secretary of Agriculture may vest title to expendable and nonexpendable equipment and supplies and other tangible personal property in the contractor or recipient when the contractor or recipient purchases such equipment, supplies, and property with contract, grant, or cooperative agreement funds and the Secretary deems such vesting of title a furtherance of the agricultural research, extension, or teaching objectives of the Department of Agriculture.

"(4) Unless otherwise provided in this title, the Secretary of Agriculture may enter into contracts, grants, or cooperative agreements, as authorized by this subsection, without regard to any requirements for competition, the provisions of section 5 of title 41 of the United States Code, and the provisions of section 529 of title 31 of the United States Code.

"(c) In order to promote research and education in food and human nutrition, the Secretary may establish cooperative human nutrition centers to focus resources, facilities, and scientific expertise on particular high priority nutrition problems identified by the Department. Such centers shall be established at State cooperative institutions, and at other colleges and universities, having a demonstrable capacity to carry out human nutrition research and education.

"(d) In order to meet the increasing needs of consumers and families and to promote the health and welfare of people, the Secretary shall ensure that the cooperative research, extension, and teaching programs of the various States adequately address the challenges described in paragraph (10) of section 1402 of this title. The Secretary may implement new cooperative initiatives in home economics and related disciplines to address such challenges.".

SECRETARY'S REPORT

SEC. 1311. Section 1410 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3125) is amended by—

(1) striking out "February 1" and inserting in lieu thereof "January 1"; and

(2) striking out "and" at the end of paragraph (2);

(3) striking out the period at the end of paragraph (3) and inserting in lieu thereof a semicolon and the word "and"; and

(4) adding at the end of section 1410 the following new paragraph:

"(4) in the report of January 1, 1983, the Secretary's needs assessment developed pursuant to the provisions of section 1405(11) of this title.".

LIBRARIES AND INFORMATION NETWORK

SEC. 1312. Section 1411 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3126) is amended by—

(1) in subsection (a)(5), striking out the period and inserting in lieu thereof a semicolon and the word "and";

(2) adding a new subsection (a)(6) to read as follows:

"(6) the Department of Agriculture establish mutually valuable working relationships with international and foreign information and data programs.".

(3) amending subsection (b)(3) to read as follows:

"(3) providing notification about these collections on a regular basis to the State cooperative extension services, State educational agencies and other interested persons.".

STAFF SUPPORT FOR THE JOINT COUNCIL AND THE ADVISORY BOARD

SEC. 1313. Section 1412(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3127(a)) is amended to read as follows:

"(a) To assist the Joint Council and the Advisory Board in the performance of their duties, the Secretary may appoint, after consultation with the cochairperson of the Joint Council and the chairperson of the Advisory Board—

"(1) a full-time executive director who shall perform such duties as the cochairperson of the Joint Council and the chairperson of the Advisory Board may direct and who shall receive compensation at a rate not to exceed the rate payable for GS-18 of the General Schedule established in section 5332 of title 5, United States Code; and

"(2) a professional staff of not more than five full-time employees qualified in the food and agricultural sciences, of which one shall serve as the executive secretary to the Joint Council and one shall serve as the executive secretary to the Advisory Board.".

ADDITIONAL ASSISTANT SECRETARY OF AGRICULTURE

SEC. 1314. (a) Section 1413 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3128) is amended by adding at the end thereof the following new subsections:

"(c) The President shall appoint, by and with the advice and consent of the Senate, an Assistant Secretary of Agriculture who shall perform such duties as are necessary to carry out this title and who shall receive compensation at the rate now or hereafter prescribed by law for Assistant Secretaries of Agriculture.

"(d) The Subcommittee on Food, Agricultural and Forestry Research, the Joint Council, the Advisory Board, and others in the agricultural science and education system shall improve communication and interaction among themselves through such mechanisms as the exchange of reports, joint meetings, and the use of liaison representatives.".

(b) Section 5315 of title 5, United States Code, is amended in the item relating to Assistant Secretaries of Agriculture by striking out "(5)" and inserting in lieu thereof "(6)".

GRANTS FOR AGRICULTURAL RESEARCH

SEC. 1315. (a) Section 2(b) of the Act of August 4, 1965 (7 U.S.C. 450i), is amended by—

(1) inserting after the second sentence the following:

"For purposes of the preceding sentence, high priority research shall include—

"(1) basic research aimed at the discovery of new scientific principles and techniques that may be applicable in agriculture and forestry;

"(2) research aimed at the development of new and innovative products, methods, and technologies relating to biological nitrogen fixation, photosynthesis, and other processes which will improve and increase the production of agricultural and forestry resources;

"(3) basis and applied research in the fields of animal productivity and health;

"(4) basic and applied research in the fields of soil and water;

"(5) basic and applied research in the field of human nutrition; and

"(6) research to develop new strains of crops, new promising crops, including guayule, jojoba, and others.", and

(2) by striking out "and $50,000,000 for the fiscal year ending September 30, 1982," and by inserting in lieu thereof "$50,000,000 for the fiscal year ending September 30, 1982, $35,000,000 for the fiscal year ending September 30, 1983, $40,000,000 for the fiscal year ending September 30, 1984, $45,000,000 for the fiscal year ending September 30, 1985,".

(b) Section 2(c) of the Act of August 4, 1965 (7 U.S.C. 450i(c)) is amended by—

(1) in paragraph (1), inserting "research foundations established by land-grant colleges and universities," after "land-grant colleges and universities,", and

(2) amending paragraph (2) to read as follows:

"(2) to State agricultural experiment stations, land-grant colleges and universities, research foundations established by land-grant colleges and universities, colleges and universities receiving funds under the Act of October 10, 1962 (16 U.S.C. 582a, 582a-1 through 582a-7), and accredited colleges and veterinary medicine, to facilitate or expand ongoing State-Federal food and agricultural research programs that (A) pro-

mote excellence in research, (B) promote the development of regional research centers, (C) promote the research partnership between the Department of Agriculture and such colleges and universities, such research foundations or State agricultural experiment stations, or (D) facilitate coordination and cooperation of research across State lines.".

(c) Section 2(d) of the Act of August 4, 1965 (7 U.S.C. 450i(d)) is amended by—

(1) striking out "the purchase of equipment" and all that follows through the dash and inserting in lieu thereof "the renovation and refurbishment (including energy retrofitting) of research spaces in buildings or spaces to be used for research, and the purchase and installation of fixed equipment in such spaces. Such grants may be used for new construction only for auxiliary facilities and fixed equipment used for research in such facilities, such as greenhouses, insectaries, and research farm structures and installations. Such grants shall be made to—",

(2) in paragraph (1), striking out "available; and" and inserting in lieu thereof "available;",

(3) in paragraph (2), striking out the period and inserting in lieu thereof a semicolon, and

(4) inserting after paragraph (2) the following new paragraphs:

"(3) each cooperating forestry school not described in paragraph (1), in an amount which is equal to 10 per centum of the funds received by such school under the Act of October 10, 1962 (16 U.S.C. 582a et seq.), commonly known as the McIntire-Stennis Act of 1962; and

"(4) each college eligible to receive funds under the Act of August 30, 1890 (7 U.S.C. 321 et seq.), including Tuskegee Institute, in an amount which is equal to 10 per centum of the funds received by such college under section 1445 of this title.".

AUTHORIZATION OF APPROPRIATIONS FOR RESEARCH FACILITIES ACT OF 1963

SEC. 1316. Section 4(a) of the Act of July 22, 1963 (7 U.S.C. 390c(a)), is amended by striking out "and $31,000,000 for the fiscal year ending September 30, 1982," and inserting in lieu thereof "$15,000,000 for the fiscal year ending September 30, 1982, $19,000,000 for the fiscal year ending September 30, 1983, $23,000,000 for the fiscal year ending September 30, 1984, $27,000,000 for the fiscal year ending September 30, 1985,".

FEDERAL SUPPORT OF HIGHER EDUCATION IN THE FOOD AND AGRICULTURAL SCIENCES

SEC. 1317. (a) Section 1417(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3152(aa)) is amended to read as follows:

"(a)(1) The Secretary of Agriculture shall promote and develop higher education in the food and agricultural sciences by formulating and administering higher education programs.

"(2) The Secretary may make grants to land-grant colleges and universities, and to other colleges and universities having a demonstrable capacity to carry out food and agricultural teaching, for a period not to exceed five years—

"(A) to strengthen institutional capacities to respond to State, national, or international educational needs in the food and agricultural sciences;

"(B) to attract students and to educate them as needed in the food and agricultural sciences, and to attract needed professionals to provide for their professional improvement in the food and agricultural sciences;

"(C) to design and implement innovative food and agricultural educational programs; and

"(D) to facilitate cooperative agreements between two or more eligible institutions to maximize the use of faculty and facilities to improve their food and agricultural teaching programs.

Such grants shall be made without regard to matching funds, but each recipient institution shall have a significant ongoing commitment to the food and agricultural sciences generally and to the specific subject area for which such grant is to be used.

"(3) The Secretary may make competitive grants to colleges and universities for a period not to exceed five years—

"(A) to develop or administer programs to meet unique food and agricultural educational problems; and

"(B) to administer and conduct specialized programs to attract individuals for undergraduate and graduate programs and to administer and conduct graduate fellowship programs to meet regional and national objectives in the food and agricultural sciences.

Such grants shall be made without regard to matching funds provided by recipients.".

(b) Section 1417(c) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3152(c)) is amended to add at the end thereof the following: "There are hereby transferred to the Secretary of Agriculture all the functions and duties of the Secretary of Education under the Act of June 29, 1935 (7 U.S.C. 329 et seq.) applicable to activities and programs for which funds are made available under section 22 of such Act.".

(c) Section 1417(d) of the National Agricultural Research, Extension, and Teaching Act of 1977 (7 U.S.C. 3152(d)) is amended by striking out "and $50,000,000 for the fiscal year ending September 30, 1982," and inserting in lieu thereof "$25,000,000 for the fiscal year ending September 30, 1982, $30,000,000 for the fiscal year ending September 30, 1983, $35,000,000 for the fiscal year ending September 30, 1984, $40,000,000 for the fiscal year ending September 30, 1985,".

TRANSFER OF FUNCTIONS UNDER THE MORRILL ACT

SEC. 1318. There are hereby transferred to the Secretary of Agriculture all the functions and duties of the Secretary of Education under the Act of August 30, 1890 (7 U.S.C. 321 et seq.).

REDESIGNATION OF INSTRUCTION FUNDING

SEC. 1319. (a) The first section of the Act of August 30, 1890 (7 U.S.C. 322) is amended by striking out "agriculture, the mechanic arts," and all that follows through "industries of life" and inserting in lieu thereof "food and agricultural sciences".

(b) The tenth undesignated paragraph under the heading "DEPARTMENT OF AGRICULTURE" of the Act of March 4, 1907 (34 Stat. 1282) is amended by striking out "agriculture and the mechanic arts" the second place it appears and inserting in lieu thereof "food and agricultural sciences".

RESEARCH GRANTS ON PRODUCTION AND MARKETING OF ALCOHOL FUELS AND INDUSTRIAL HYDROCARBONS FROM AGRICULTURAL PRODUCTS

SEC. 1320. Section 1419(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3154(a)) is amended by—

(1) striking out "four," and

(2) striking out "and September 30, 1982" and all that follows through the period at the end of that sentence and inserting in lieu thereof the following: ", September 30, 1982, September 30, 1983, September 30, 1984, September 30, 1985: *Provided*, That the total amount of such appropriations shall not exceed $40,000,000 during the eight-year period beginning October 1, 1977, and shall not exceed such sums as may be authorized by law for any fiscal year subsequent to such period: *Provided further*, That not more than a total of $5,000,000 may be awarded to the colleges and universities of any one State.".

SEC. 1321. Section 1424 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3174) is amended to read as follows:

"ASSESSMENT OF FOOD AND HUMAN NUTRITION RESEARCH CENTERS

"SEC. 1424. The Secretary shall make a study assessing the accomplishments, costs, and benefits of existing regional food and human nutrition research centers as established by the United States Department of Agriculture, recommendations relating to funding levels, the status of grants to build or supply the regional research centers, and progress toward achieving cooperation with States and others in the use of Federal facilities in research carried out to achieve the policy set forth in section 1421 of this title. The Secretary shall complete this study and submit a report setting forth the findings of the study and recommendations for the implementation of these findings, as a part of the report the Secretary is required to submit to Congress pursuant to section 1405(6) of this title, not later than the second annual budget submission following the effective date of this title.".

SEC. 1322. Section 1427 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3177) is amended to read as follows:

"HUMAN NUTRITION RESEARCH AND INFORMATION MANAGEMENT SYSTEM

"SEC. 1427. The Secretary and the Secretary of Health and Human Services shall formulate and submit to Congress, within one hundred and twenty days after the date of enactment of this title, a plan for a human nutrition research management system. This system shall be based on online data support capability allowing for fiscal accounting, management, and control of cross-agency human nutrition research activities. The plan shall provide for management activities of all agencies managing funds for human nutrition research activities under existing authorities and contain recommendations for any additional authorities necessary to achieve a human nutrition research management system.".

CONFORMING AMENDMENT

SEC. 1323. Section 1429 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3191) is amended by revising the last sentence thereof to read as follows: "It is recognized that the total animal health and disease research and extension efforts of the several State colleges and universities and of the Federal Government would be more effective if there were close coordination between such programs, and it is further recognized that colleges and universities having accredited colleges of veterinary medicine and State agricultural experiment stations which conduct animal health and disease research are

especially vital in training research workers in animal health.".

ELIGIBLE INSTITUTIONS FOR ANIMAL HEALTH AND DISEASE RESEARCH FUNDS

SEC. 1324. Section 1430 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3192) is amended by amending paragraph (1) to read as follows:

"(1) the term 'eligible institution' means an accredited school or college of veterinary medicine or a State agricultural experiment station which conducts animal health and disease research.".

APPROPRIATIONS FOR ANIMAL HEALTH AND DISEASE RESEARCH PROGRAMS AT ELIGIBLE INSTITUTIONS

SEC. 1325. Section 1433(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3195) is hereby amended by striking out the first sentence and inserting in lieu thereof: "There are hereby authorized to be appropriated such funds as Congress may determine necessary to support continuing animal health and disease research programs at eligible institutions, but not to exceed $25,000,000 annually for the period beginning October 1, 1981, and ending September 30, 1985, and not in excess of such sums as may after the date of enactment of this title be authorized by law for any subsequent fiscal year.

APPROPRIATIONS FOR RESEARCH ON SPECIFIC NATIONAL OR REGIONAL ANIMAL HEALTH OR DISEASE PROBLEMS

SEC. 1326. (a) Section 1434(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3196) is hereby amended by striking out the first sentence and inserting in lieu thereof: "There are hereby authorized to be appropriated such funds as Congress may determine necessary to support research on specific national or regional animal health or disease problems, but not to exceed $35,000,000 annually for the period beginning October 1, 1981, and ending September 30, 1985, and not in excess of such sums as may after the date of enactment of this title be authorized by law for any subsequent fiscal year.

(b) Section 1434(b) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3196(b)) is amended to read as follows:

"(b) Funds appropriated under this section shall be awarded in the form of grants, for periods not to exceed five years, to eligible institutions.".

(c) Section 1434 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3196) is amended by adding at the end thereof the following new subsections:

"(c) In order to establish a rational allocation of funds appropriated under this section, the Secretary shall establish annually priority lists of animal health and disease problems of national or regional significance. Such lists shall be prepared after consultation with the Joint Council, the Advisory Board, and the Board. Any recommendations made in connection with such consultation shall not be controlling on the Secretary's determination of priorities. In establishing such priorities, the Secretary, the Joint Council, the Advisory Board, and the Board shall consider the following factors:

"(1) any health or disease problem which causes or may cause significant economic losses to any part of the livestock production industry;

"(2) whether current scientific knowledge necessary to prevent, cure, or abate such a health or disease problem is adequate; and

"(3) whether the status of scientific research is such that accomplishments may be anticipated through the application of scientific effort to such health or disease problem.

"(d) Without regard to any consultation under subsection (c), the Secretary shall, to the extent feasible, award grants to eligible institutions on the basis of the priorities assigned through a peer review system. Grantees shall be selected on a competitive basis in accordance with such procedures as the Secretary may establish.

"(e) In the case of multiyear grants, the Secretary shall distribute funds to grant recipients on a schedule which is reasonably related to the timetable required for the orderly conduct of the research project involved.".

EXTENSION AT 1890 LAND-GRANT COLLEGES, INCLUDING TUSKEGEE INSTITUTE

SEC. 1327. Section 1444 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3211(a)) is amended by—

(1) in subsection (a),

(a) inserting "and ending with the fiscal year ending September 30, 1982," after "Beginning with the fiscal year ending September 30, 1979,", and

(b) inserting after the second sentence thereof the following: "Beginning with the fiscal year ending September 30, 1983 there shall be appropriated under this section for each fiscal year an amount not less than 7 per centum of the total appropriations for such year under the Act of May 8, 1914 (7 U.S.C. 341-349).";

(2) in subsection (b)(2)(B), inserting "current at the time each such additional sum is first appropriated" after "the last preceding decennial census" both times it appears;

(3) in subsection (c), striking out "administrative head for extension" and inserting in lieu thereof "extension administrator"; and

(4) in subsection (d), striking out "submitted by the proper officials of each institution" and inserting in lieu thereof "submitted, as part of the State plan of work.".

AGRICULTURE RESEARCH IN 1890 LAND-GRANT COLLEGES, INCLUDING TUSKEGEE INSTITUTE

SEC. 1328. (a) Section 1445 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3222) is amended by—

(1) in subsection (b)(1), adding at the end thereof a new sentence to read as follows: "These administrative funds may be used for transportation of scientists who are not officers or employees of the United States to research meetings convened for the purpose of assessing research opportunities or research planning.";

(2) in subsection (b)(2)(B), inserting "current at the time each such additional sum is first appropriated" after "the last preceding decennial census" both times it appears; and

(3) in subsections (c) and (d), striking out "chief administrative officer" each time it appears and inserting in lieu thereof "research director".

(b)(1) The Secretary of Agriculture shall make a grant of funds appropriated under paragraph (5) to the one college of all the colleges eligible to receive funds under the Act of August 30, 1980 (7 U.S.C. 321), including Tuskegee Institute which, on the date of the enactment of this title—

(A) has initiated a dairy goat research program, and

(B) has the best demonstrable capacity to carry out dairy goat research.

(2) Any grant received under paragraph (1) by such college may be expended to—

(A) pay expenses incurred in conducting dairy goat research,

(B) print and disseminate the results of such research,

(C) contribute to the retirement of employees engaged in such research,

(D) plan, administer, and direct such research, and

(E) construct, acquire, alter, and repair buildings necessary to conduct such research.

(3)(A) Under the terms of such grant, funds appropriated under paragraph (5) of this subsection for a fiscal year shall be paid to such college in equal quarterly installments beginning on or about the first day of October of such year upon vouchers approved by the Secretary of Agriculture.

(B) Not later than sixty days after the end of each fiscal year for which funds are paid under subsection (a) to such college, the chief administrative officer of such college shall submit to the Secretary of Agriculture a detailed statement of the disbursements in such fiscal year of funds received by such college under such subsection.

(C) If any of the funds so received by such college are by any action or contingency misapplied, lost, or diminished, then—

(i) such college shall replace such funds, and

(ii) the Secretary shall not distribute to such college any other funds under subsection (a) until such replacement is made.

(4) For purposes of section 1445(e) of the Food and Agriculture Act of 1977 (7 U.S.C. 3222(e)), research and experiments funded under this subsection shall be deemed to be research and experiments funded under section 1445 of such Act.

(5) There is authorized to be appropriated for each of the fiscal years 1982, 1983, 1984, and 1985 an amount equal to one percent of the aggregate amount of funds appropriated to carry out section 1445 of the Food and Agriculture Act of 1977 (7 U.S.C. 3222) in the fiscal year preceding the fiscal year for which funds are authorized to be appropriated under this paragraph.

SOLAR ENERGY DEFINITION

SEC. 1439. Section 1457 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3282) is amended to read as follows:

"SEC. 1457. For purposes of this subtitle, the term 'solar energy' means energy derived from sources (other than fossil fuels) and technologies included in the Federal Non-Nuclear Research and Development Act of 1974, as amended.".

INTERNATIONAL AGRICULTURAL RESEARCH AND EXTENSION

SEC. 1330. Section 1458 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3291) is amended by—

(1) in subsection (3), striking out "work with developed countries on agricultural" and inserting in lieu thereof "work with developed and transitional countries on food, agricultural and related";

(2) in subsection (5), striking out the period and inserting in lieu thereof a semicolon and the word "and"; and

(3) adding a new paragraph to read as follows:

"(6) provide specialized or technical services on an advance of funds or a reimbursable basis to United States colleges and universities carrying out international food, agricultural, and related research and development projects and activities. All funds received in payment for furnishing specialized or technical services authorized under this subsection shall be deposited to the credit of the appropriation from which the cost of providing such services has been paid or is to be charged.".

AUTHORIZATION FOR APPROPRIATIONS FOR EXISTING AND CERTAIN NEW AGRICULTURAL PROGRAMS

SEC. 1431. (a) Section 1463(a) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3311(a)) is amended by striking out "and $780,000,000 for the fiscal year ending September 30, 1982," and inserting in lieu thereof "$780,000,000 for the fiscal year ending September 30, 1982, $800,000,000 for the fiscal year ending September 30, 1983, $820,000,000 for the fiscal year ending September 30, 1984, $840,000,000 for the fiscal year ending September 30, 1985,".

(b) Section 1463(b) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3311(b)) is amended by striking out "and $220,000,000 for the fiscal year ending September 30, 1982," and inserting in lieu thereof "$220,000,000 for the fiscal year ending September 30, 1982, $245,000,000 for the fiscal year ending September 30, 1983, $270,000,000 for the fiscal year ending September 30, 1984, $295,000,000 for the fiscal year ending September 30, 1985,".

(c) Section 1463 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3311) is amended by adding at the end thereof a new subsection to read as follows:

"(c) Notwithstanding any other provision of law, effective beginning October 1, 1983, not less than 25 per centum of the total funds appropriated to the Secretary in any fiscal year for the conduct of the cooperative research program provided for under the Act of March 2, 1887, commonly known as the Hatch Act (7 U.S.C. 361a, et seq.); the cooperative forestry research program provided for under the Act of October 10, 1962, commonly known as the McIntire-Stennis Act (16 U.S.C. 582a, et seq.); the special and competitive grants programs provided for in sections 2(b) and 2(c) of the Act of August 4, 1965 (7 U.S.C. 405i); the animal health research program provided for under sections 1433 and 1434 of this title; the native latex research program provided for in the Native Latex Commercialization and Economic Development Act of 1978 (7 U.S.C. 178, et seq.); and the research provided for under various statutes for which funds are appropriated under the Agricultural Research heading or a successor heading, shall be appropriated for research at State agricultural experiment stations pursuant to the provision of the Act of March 2, 1887, commonly known as the Hatch Act (7 U.S.C. 361a, et seq.).".

AUTHORIZATION FOR APPROPRIATIONS FOR EXTENSION EDUCATION

SEC. 1332. Section 1464 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3312) is amended by striking out "and $350,000,000 for the fiscal year ending September 30, 1982," and inserting in lieu thereof "$350,000,000 for the fiscal year ending September 30, 1982, $370,000,000 for the fiscal year ending September 30, 1983, $390,000,000 for the fiscal year ending September 30, 1984, $410,000,000 for the fiscal year ending September 30, 1985,".

INDIRECT COSTS AND TUITION REMISSION

SEC. 1333. Subtitle K of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3311-3316) is amended by adding at the end thereof the following new section:

"RESTRICTION ON TREATMENT OF INDIRECT COSTS AND TUITION REMISSION

"SEC. 1471. Funds made available by the Secretary of Agriculture under established Federal-State partnership arrangements to State cooperative institutions under the Acts referred to in section 1404(16) of this Act and funds made available under subsection (c)(2) and subsection (d) of section 2 of the Act of August 4, 1965 (7 U.S.C. 450i); shall not be subject to reduction for indirect costs or for tuition remission. No indirect costs or tuition remission shall be charged against funds in connection with cooperative agreements between the Department of Agriculture and State cooperative institutions if the cooperative program or project involved is of mutual interest to all the parties and if all the parties contribute to the cooperative agreement involved.".

AQUACULTURE AND RANGELAND RESEARCH

SEC. 1334. The National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3301-3304) is amended by adding at the end thereof the following new subtitles L and M:

"Subtitle L—Aquaculture

"PURPOSE

"SEC. 1475. It is the purpose of this subtitle to promote research and extension activities of the institutions hereinafter cited in section 1476(b) of this Act, and to coordinate their efforts as an integral part and in implementation of the 'National Aquacultural Act of 1980' (Public Law 96-362; 16 U.S.C. 2801) by encouraging landowners, individuals, and commercial institutions to develop aquaculture production and facilities and sound aquacultural practices that will, through research and technology transfer programs, provide for the increased production and marketing of aquacultural food products.

"AQUACULTURE ASSISTANCE PROGRAMS

"SEC. 1476. (a) The Secretary may develop and implement a cooperative research and extension program to encourage the development, management, and production of important aquatic food species within the several States and territories of the United States; in accordance with the National Aquacultural Plan and revisions thereto developed under the National Aquacultural Act of 1980.

"(b) The Secretary may make grants to—

"(1) land-grant colleges and universities;

"(2) State agricultural experiment stations; and

"(3) colleges, universities, and Federal laboratories having a demonstrable capacity to conduct aquacultural research, as determined by the Secretary;

for research and extension to facilitate or expand promising advances in the production and marketing of aquacultural food species and products. No grant may be made under this subsection unless the State in which the grant recipient is located makes a matching grant to such recipient equal to the amount of the grant to be made under this subsection, and unless the grant is in implementation of the National Aquacultural Plan and revision thereto developed under the National Aquacultural Act of 1980.

"(c) The Secretary may assist States to formulate aquaculture development plans for the enhancement of the production and marketing of aquacultural species and products from such States and may make grants to States on a matching basis, as determined by the Secretary. The aggregate amount of the grants made to any one State under this subsection may not exceed $50,000. The plans shall be consistent with the National Aquaculture Plan, and revisions thereto, developed under the National Aquaculture Act of 1980.

"(d) To provide for aquacultural research, development, and demonstration projects having a national or regional application, the Secretary may establish in existing Federal facilities or in cooperation with State agencies (including State departments of agriculture), and land-grant colleges and universities, up to four aquacultural research, development, and demonstration centers in the United States for the performance of aquacultural research, extension work, and demonstration projects. Funds made available for the operation of such regional centers may be used for the rehabilitation of existing buildings or facilities to house such centers, but may not be used for the construction or acquisition of new buildings or facilities.

"(e) Not later than one year after the effective date of this subtitle and not later than March 1 of each year, the Secretary shall submit a report to the President, the Committee on Agriculture of the House of Representatives, the Committee on Appropriations of the House of Representatives, the Committee on Agriculture, Nutrition, and Forestry of the Senate, and the Committee on Appropriations of the Senate, a summary outlining progress of the Department of Agriculture in meeting the purposes of the programs established under this subtitle.

"AQUACULTURE ADVISORY BOARD

"SEC. 1477. (a) The Secretary shall establish within the Department of Agriculture a board to be known as the Aquaculture Advisory Board (hereinafter in this subtitle referred to as the "Board") which shall have a term of five years and which shall be composed of the following twelve members appointed by the Secretary—

"(1) four representatives of the Science and Education Administration, Department of Agriculture; and

"(2) eight members appointed by the Secretary comprised of—

"(A) two members representing cooperative extension services;

"(B) two members representing State agricultural experiment stations; and

"(C) four members representing national aquaculture organizations.

Members of the Board shall serve without compensation for such service. While away from their homes or regular places of business in the performance of services for the Board, members of the Board shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under section 5703 of title 5 of the United States Code.

"(b) The Board shall meet at the call of the Secretary, but at least annually, to consult with and advise the Secretary with respect to the implementation of this subtitle

and to recommend priorities for the conduct of research and extension programs authorized in this subtitle, under such rules and procedures for conducting business as the Secretary may, in the Secretary's discretion, prescribe.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 1478. (a) There is authorized to be appropriated $7,500,000 for each fiscal year beginning after the effective date of this subtitle, and ending with the fiscal year ending September 30, 1985, and not in excess of such sums as may after the date of enactment of this title be authorized by law for any subsequent fiscal year.

"(b) Funds appropriated under subsection (a) shall be allocated by the Secretary for work to be done as mutually agreed upon between the Secretary and the institutions described in section 1476(b). The Secretary shall, whenever possible, consult with the Board in developing plans for the use of these funds.".

"Subtitle M—Rangeland Research

"PURPOSE

"SEC. 1479. It is the purpose of this subtitle to promote the general welfare through improved productivity of the Nation's rangelands, which comprise 60 per centum of United States land area. Most of these rangelands are unsuited for cultivation, but produce a great volume of forage inedible by humans, but readily converted to high quality food protein by grazing animals in the most energy efficient form of agriculture. These native grazing lands occur throughout the United States and provide the source for major segments of the Nation's livestock industry. In addition to the many directly dependent on range, other segments of agriculture are indirectly dependent on range-fed livestock the harvest crop aftermath and to stabilize grain prices by substituting forage for grain in times of grain scarcity or being fed more grain in times of surplus. Recent resource assessments indicate that forage production of rangeland can be increased at least 100 per centum through development and application of improved range management practices while simultaneously enhancing wildlife, watershed, recreational, and aesthetic values and reducing hazards of erosion and flooding.

"RANGELAND RESEARCH PROGRAM

"SEC. 1480. The Secretary may develop and implement a cooperative rangeland research program in coordination with the program carried out under the Renewable Resources Extension Act of 1978 to improve the production and quality of desirable native forages or introduced forages which are managed in a similar manner to native forages for livestock and wildlife. The program shall include studies of: (1) management of rangelands and agricultural land as integrated systems for more efficient utilization of crops and waste products in the production of food and fiber; (2) management of rangeland watersheds to improve the condition of water utilization, water yield, water quality, and water conservation, and to protect against onsite and offsite damage of resources from floods, erosion, and other detrimental influences and to remedy unsatisfactory and unstable rangeland conditions; (3) revegetation and rehabilitation of rangelands including the control of undesirable species of plants; and (4) such other matters as the Secretary considers appropriate.

"RANGELAND RESEARCH GRANTS

"SEC. 1481. The Secretary may make grants to land-grant colleges and universities, State agricultural experiment stations, and to colleges and universities and Federal laboratories having a demonstrable capacity in rangeland research, as determined by the Secretary, to carry out rangeland research. This grant program shall be based on a matching formula of 50 per centum Federal and 50 per centum non-Federal funding.

"REPORTS

"SEC. 1482. Not later than one year after the date of the enactment of this subtitle, and not later than March 1 of each successive year the Secretary shall submit a report to the President, the House Committee on Agriculture, the House Committee on Appropriations, the Senate Committee on Agriculture, Nutrition, and Forestry, and the Senate Committee on Appropriations, outlining progress of the Department in meeting the program requirements set forth in section 1480 of this subtitle.

"RANGELAND RESEARCH ADVISORY BOARD

"SEC. 1483. (a) The Secretary shall establish a board to be known as the Rangeland Research Advisory Board which shall have a term of four years, and which shall be composed of the following twelve members appointed by the Secretary:

"(1) Four representatives of the Department of Agriculture's Science and Education Administration,

"(2) Four representatives of the State Agricultural experiment stations, and

"(3) Four representatives of national rangeland and range livestock organizations.

The members shall serve without compensation, if not otherwise officers or employees of the United States, except that they shall, while away from their homes or regular places of business in the performance of services for the Board, be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Government service are allowed expenses under sections 5701 through 5707 of title 5 of the United States Code.

"(b) The Board shall meet at the call of the Secretary, but at least once annually, to consult with and advise the Secretary with respect to the implementation of this subtitle and to recommend priorities for the conduct of programs authorized under this subtitle, under such rules and procedures for conducting business as the Secretary shall prescribe.

"APPROPRIATIONS

"SEC. 1484. (a) There are hereby authorized to be appropriated, to implement the provisions of this subtitle, such sums not to exceed $10,000,000 annually for the period beginning October 1, 1981, and ending September 30, 1985, and thereafter such sums as may after the date of enactment of this subtitle be authorized by law for any subsequent fiscal year.

"(b) Funds appropriated under this section shall be allocated by the Secretary to eligible institutions for work to be done as mutually agreed upon between the Secretary and the eligible institution or institutions. The Secretary shall, whenever possible, consult the Board in developing plans for the use of these funds.".

TABLE OF CONTENTS

SEC. 1335. The table of contents of the Food and Agriculture Act of 1977 is amended by—

(1) inserting immediately after the item referring to section 1409 the following new item:

"Sec. 1409A. Federal-State partnership and coordination."; and

(2) adding at the end of title XIV the following new items:

"Subtitle L—Agriculture

"Sec. 1475. Purpose.
"Sec. 1476. Agriculture assistance programs.
"Sec. 1477. Aquaculture Advisory Board.
"Sec. 1478. Authorization of appropriations.".

"Subtitle M—Rangeland Research

"Sec. 1479. Purpose.
"Sec. 1480. Rangeland research program.
"Sec. 1481. Rangeland research grants.
"Sec. 1482. Reports.
"Sec. 1483. Rangeland Research Advisory Board.
"Sec. 1484. Appropriations.".

M'INTIRE-STENNIS ACT AMENDMENTS

SEC. 1336. (a) Section 1 of the Act of October 10, 1962 (16 U.S.C. 582a), commonly known as the McIntire-Stennis Act of 1962, is amended by adding at the end thereof the following: "It is also recognized that the provisions of this Act are essential to assist in providing the research background which undergirds the Forest and Rangeland Renewable Resources Planning Act of 1974, the Renewable Resources Extension Act of 1978, and the Soil and Water Conservation Act of 1978.".

(b) Section 2 of the Act of October 10, 1962 (16 U.S.C. 582a-1), commonly known as the McIntire-Stennis Act of 1962, is amended by adding at the end thereof the following: "If more than one institution within a State is certified as qualifying for assistance, then it shall be the responsibility of such institutions in agreement with the Secretary of Agriculture, to develop complementary programs of forestry research for the State.".

(c) Section 5 and section 6 of the Act of August 10, 1962 (16 U.S.C. 582a-4, 582a-5), commonly known as the McIntire-Stennis Act of 1962, are amended to read as follows:

"SEC. 5. (a) The Secretary shall prescribe such rules as may be necessary to carry out this Act and to furnish such advice and assistance through a cooperative State forestry research unit in the Department of Agriculture as will best promote the purposes of this Act.

"(b) The Secretary shall appoint a council of not fewer than 16 members which shall be constituted to give representation to Federal and State agencies concerned with developing and utilizing the Nation's forest resources, the forest industries, the forestry schools of the State-certified eligible institutions, and volunteer public groups concerned with forests and related natural resources. The council shall meet at least annually and shall submit a report to the Secretary on regional and national planning and coordination of forestry research within the Federal and State agencies, forestry schools, and the forest industries, and shall advise the Secretary on the apportionment of funds. The Secretary shall seek, at least once each year, the advice of the council to accomplish efficiently the purposes of this Act.

"SEC. 6. Apportionments among participating States shall be determined by the Secretary after consultation with the council appointed under section 5. In making such apportionments, consideration shall be given to pertinent factors including non-

Federal expenditures for forestry research by State-certified eligible institutions, areas of non-Federal commercial forest land, and the volume of timber cut annually. Three per centum of such funds as may be appropriated shall be made available to the Secretary for administration of this Act.".

PROHIBITION AGAINST REDUCTION OF STATE FUNDS UPON INCREASE IN FEDERAL ALLOTMENT

SEC. 1337. (a) Section 3 of the Act of March 2, 1887 (7 U.S.C. 361c), commonly known as the Hatch Act of 1887, is amended by adding at the end thereof a new subsection (g) as follows:

"(g) If in any year the amount made available by a State from its own funds (including any revenue-sharing funds) to a State agricultural experiment station is reduced because of an increase in the allotment made available under this Act, the allotment to the State agricultural experiment station from the appropriation in the next succeeding fiscal year shall be reduced in an equivalent amount. The Secretary shall reapportion the amount of such reduction to other States for use by their agricultural experiment stations.".

(b) Section 4 of the Act of October 10, 1962 (16 U.S.C. 582a-3), commonly known as the McIntire-Stennis Act of 1962, is amended by adding at the end thereof the following: "If in any year the amount made available by a State from its own funds (including any revenue-sharing funds) to a State-certified institution eligible for assistance under this Act is reduced because of an increase in the allotment made available under this Act, the allotment of such State-certified institution from the next succeeding appropriation shall be reduced in an equivalent amount. The Secretary shall reapportion the amount of such reduction to other eligible colleges and universities of the same State if there be any that qualify therefor and, if there be none, the Secretary shall reapportion such amount to the qualifying colleges and universities of other States participating in the forestry research program.".

EXCESS FEDERAL PROPERTY

SEC. 1338. Section 202(d)(2) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 483) is amended by—

(1) striking out the word "or" at the end of subparagraph (C);

(2) striking out the period at the end of subparagraph (D) and inserting in lieu thereof a semicolon and the word "or"; and

(3) adding the following new subparagraph immediately after subparagraph (D):

"(E) property furnished by the Secretary of Agriculture to any State or county extension service engaged in cooperative agricultural extension work pursuant to the Act of May 8, 1914, commonly known as the Smith-Lever Act (7 U.S.C. 341 et seq.); any State experiment station engaged in cooperative agricultural research work pursuant to the Act of March 2, 1887, commonly known as the Hatch Act (7 U.S.C. 361a et seq.); and any institution engaged in cooperative agricultural research and extension work pursuant to sections 1444 and 1445 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3221-22), where title is retained in the United States. For the purpose of this provision, the term 'State' means any one of the fifty States, the Commonwealth of Puerto Rico, Guam, American Samoa, the Commonwealth of the Northern Marianas, the Trust Territory of the Pacific Islands, the Virgin Islands of the United States, and the District of Columbia.".

APPORTIONMENT OF FUNDS APPROPRIATED FOR SCHOOLS OF VETERINARY MEDICINE

SEC. 1339. Section 1415(c)(2) of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3151(c)(2)) is amended by striking out the colon and the proviso.

EFFECTIVE DATE

SEC. 1340. This title and the amendments made by this title shall take effect on October 1, 1981.

AUTHORITY TO AWARD GRANTS TO UPGRADE 1890 LAND-GRANT COLLEGE RESEARCH FACILITIES

SEC. 1341. (a) It is hereby declared to be the intent of the Congress to assist the institutions eligible to receive funds under the Act of August 30, 1890 (7 U.S.C. 321-326 and 328), including Tuskegee Institute (hereinafter referred to in this section as "eligible institutions"), in the acquisition and improvement of research facilities and equipment so that eligible institutions may participate fully with the State agricultural experiment stations in a balanced attack on the research needs of the people of their States.

(b) There are hereby authorized to be appropriated to the Secretary of Agriculture for the purpose of carrying out the provisions of this section $100,000,000 for each of the fiscal years 1982 through 1986, such sums to remain available until expended.

(c) Four per centum of the sums appropriated pursuant to this section shall be available to the Secretary for administration of this grants program. The remaining funds shall be available for grants to the eligible institutions for the purpose of assisting them in the purchase of equipment and land, and the planning, construction, alteration, or renovation of buildings to strengthen their capacity to conduct research in the food and agricultural sciences.

(d) Grants awarded pursuant to this section shall be made in such amounts and under such terms and conditions as the Secretary shall determine necessary for carrying out the purposes of this section.

(e) Federal funds provided under this section may not be utilized for the payment of any overhead costs of the eligible institutions.

(f) The Secretary may promulgate such rules and regulations as the Secretary may deem necessary to carry out the provisions of this section.

TITLE XIV—CREDIT, RURAL DEVELOPMENT, AND FAMILY FARMS

FARMERS HOME ADMINISTRATION REAL ESTATE AND OPERATING LOANS TO COOPERATIVES

SEC. 1401. (a) The last sentence of section 302 of the Consolidated Farm and Rural Development Act (7 U.S.C. 1922) is amended by striking out "cooperatives, corporations, and partnerships", and inserting in lieu thereof "corporations and partnerships", and by inserting immediately before the period at the end thereof the following: "in the case of cooperatives, corporations, and partnerships".

(b) The last sentence of section 311(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1941(a)) is amended by striking out "cooperatives, corporations and partnerships", and inserting in lieu thereof "corporations, and partnerships", and by inserting immediately before the period at the end thereof the following: "in the case of cooperatives, corporations, and partnerships".

BORROWER'S NET WORTH; ANNUAL REPORT

SEC. 1402. The Consolidated Farm and Rural Development Act is amended by—

(1) in section 333(a), inserting the designation "(1)" immediately after "the applicant" and inserting before the semicolon at the end thereof the following: ", and (2) to furnish a written statement showing the applicant's net worth"; and

(2) adding at the end thereof a new section 349 as follows:

"SEC. 349. Not later than December 31 of each calendar year, beginning with calendar year 1981, the Secretary shall submit to the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition and Forestry a report describing the characteristics of borrowers initially receiving, during the fiscal year ending in that calendar year, loans made or insured under sections 303 and 312(a) and separately for loans guaranteed under such sections. The report shall be made on a State by State basis, and shall include, but need not be limited to, each borrower's age, education, farming experience, net worth, amount of farm ownership and operating loans outstanding, amount of other loans outstanding, gross farm income, and other income. This information shall be provided separately for borrowers receiving low-income loans and those receiving regular loans.".

EXTENSION OF THE EMERGENCY AGRICULTURAL CREDIT ADJUSTMENT ACT OF 1978

SEC. 1403. Section 211 of the Emergency Agricultural Credit Adjustment Act of 1978 is amended by striking out "September 30, 1981" and inserting in lieu thereof "September 30, 1982".

FARM STORAGE FACILITY LOAN PROGRAM

SEC. 1404. Section 4(h) of the Commodity Credit Corporation Charter Act, as amended by section 151 of the Omnibus Budget Reconciliation Act of 1981, is amended by inserting after the word "growers" at the end of the fourth proviso of the second sentence the following: ", except that the Secretary shall make such loans in areas in which the Secretary determines that there is a deficiency of such storage".

EXTENSION OF FEDERAL CONTRIBUTIONS TO THE RURAL TELEPHONE BANK

SEC. 1405. The Rural Electrification Act of 1936 is amended as follows:

(a) the second sentence of section 406(a) is amended by inserting after "thereafter" the words "but not later than fiscal year 1991", and by striking out "$300,000,000" and inserting in lieu thereof "$600,000,000".

(b) The first sentence of section 406(c) is amended by striking out "September 30, 1985" and inserting in lieu thereof "September 30, 1995" and by striking out "and after the amount of class A and class B stock issued totals $400,000,000,".

FAMILY FARMS

SEC. 1406. Section 102 of the Food and Agriculture Act of 1977 is amended as follows:

"SEC. 102. (a) Congress hereby specifically reaffirms the historical policy of the United States to foster and encourage the family farm system of agriculture in this country. Congress firmly believes that the maintenance of the family farm system of agriculture is essential to the social well-being of the Nation and the competitive production of adequate supplies of food and fiber. Congress further believes that any significant expansion of nonfamily owned large-scale corporate farming enterprises will be detrimental to the national welfare. It is neither

the policy nor the intent of Congress that agricultural and agriculture-related programs be administered exclusively for family farm operations, but it is the policy and the express intent of Congress that no such program be administered in a manner that will place the family farm operation at an unfair economic disadvantage.

"(b) In order that Congress may be better informed regarding the status of the family farm system of agriculture in the United States, the Secretary of Agriculture shall submit to Congress, not later than July 1 of each year, a written report containing current information on trends in family farm operations and comprehensive national and State-by-State data on nonfamily farm operations in the United States. The Secretary shall also include in each such report (1) information on how existing agricultural and agriculture-related programs are being administered to enhance and strengthen the family farm system of agriculture in the United States, (2) an assessment of how tax, credit, and other Federal laws may encourage the growth of nonfamily farm operations and investment in agriculture by nonfamily farm interests, both foreign and domestic, (3) an assessment of how reductions in commodity price support programs have affected family farmers and the family farm structure, and (4) such other information as the Secretary deems appropriate or determines would aid Congress in protecting, preserving, and strengthening the family farm system of agriculture in the United States.".

ADMINISTRATIVE PROVISION

SEC. 1407. Section 331 (i) of the Consolidated Farm and Rural Development Act is amended by inserting after "(i)" the following sentence: "Consent to long term leases of facilities financed under this title notwithstanding the failure of lessee to meet any of the requirements of this title, provided that such long term leases are necessary to insure the continuation of services of which financing was extended to the lessor:".

TITLE XV—CONSERVATION

Subtitle A—Special Areas Conservation Program

TECHNICAL AND FINANCIAL ASSISTANCE; CONTRACTS

SEC. 1501. (a) The Secretary of Agriculture (referred to in this subtitle as the "Secretary") shall establish a program for the conservation of soil, water, and related resources in special areas designated under section 1502 and approved under section 1504 (referred to in this subtitle as "designated special areas") by providing technical and financial assistance to owners and operators or groups of owners and operators of farm, ranch, and certain other lands at their request. Such assistance with respect to State, county, and other public land shall be limited to those lands that are an integral part of a private farm operating unit and under the control of the private landowner or operator.

(b) To carry out the program established under this subtitle, the Secretary may enter into contracts with owners and operators of farm, ranch, or other land in a designated special area who have such control over the land as the Secretary deems necessary. Any such contract may be entered into with respect to land in a designated special area which is not farm or ranch land only if the erosion-related problems of such land are so severe as to make such contracts with respect to such land necessary for the effective protection of farm or ranch land in that designated special area. Contracts under this subtitle shall be designed to provide assistance to the owners or operators of such farm, ranch, or other land to make voluntary changes in their cropping systems or uses of land or water which are needed to conserve or protect the soil, water, and related resources of such lands, and to carry out the soil and water conservation measures needed under such changed systems and uses.

(c) The landowner or operator shall furnish to the Secretary a plan—

(1) which incorporates such soil and other conservation practices and measures as may be determined to be practicable to protect such land from erosion-related damage;

(2) which outlines a schedule for the implementation of changes in cropping systems or use of land or of water and of conservation measures proposed to be carried out on the farm, ranch, or other land during the contract period;

(3) which is designed to take into account the local social, economic, and environmental conditions which will help solve the particular erosion or water-related problems of the designated special area;

(4) which may allow for such varying levels of conservation application as are appropriate to address the problems and may be developed to cover all or part of a farm, ranch, or other land as determined to be necessary to solve the conservation problems;

(5) which may include practices and measures for enhancing fish and wildlife and recreation resources and for reducing or controlling agricultural-related pollution; and

(6) which identifies those measures, including planned grazing systems, needed to improve vegetative conditions, reduce erosion, and conserve water on rangeland. Conservation plans of landowners and operators developed in cooperation with, and approved by, the soil and water conservation district board for the district in which the lands are situated shall form the basis for contracts under this subtitle.

(d) Under any contract entered into under this subtitle, the landowner or operator shall agree—

(1) to effectuate the plan for the farm, ranch, or other land of the owner or operator substantially in accordance with the schedule outlined therein unless any requirement thereof is waived or modified by the Secretary pursuant to subsection (f);

(2) to forfeit further payments under the contract and refund to the United States all payments received thereunder, plus interest, upon violation by the owner or operator of the contract at any stage during the time the owner or operator has control of the land if the Secretary, after considering the recommendations of the soil and water conservation district board for the district in which the lands are located, determines that such violation is of such a nature as to warrant termination of the contract, or to make refunds, plus interest, or accept such payment adjustments as the Secretary may deem appropriate if the Secretary determines that the violation by the owner or operator does not warrant termination of the contract; and

(3) not to adopt any practice specified by the Secretary in the contract as a practice which would tend to defeat the purposes of the contract.

(e) In return for such agreement by the landowner or operator, the Secretary shall agree to share the cost of carrying out those conservation practices and measures set forth in the contract for which the Secretary determines that cost sharing is appropriate and in the public interest. The portion of the costs to be shared shall be that part which the Secretary determines is necessary and appropriate to effectuate the implementation, and, if applicable, the maintenance of the conservation practices and measures under the contract, including the cost of labor. In determining the share of costs to be borne by the Federal Government, the Secretary shall take into consideration the particular social, economic, and environmental conditions of the geographic area involved and the degree of conservation to be achieved. The Secretary shall determine the maximum amount of financial assistance that may be provided to any single recipient. If adjustments from cultivated crops to permanent vegetative cover or changes in crop varieties are undertaken as a conservation practice or measure under the contract, financial assistance may be provided under such contract with regard to the income lost as a result of such adjustments.

(f) The Secretary may terminate any contract with a landowner or operator by mutual agreement with the owner or operator if the Secretary determines that such termination would be in the public interest, and may agree to such modification of contracts previously entered into as the Secretary may determine to—

(1) carry out the purposes of the program or facilitate the practical administration thereof;

(2) accommodate adjustments in crop production; or

(3) accomplish equitable treatment with repect to other similar conservation or commodity programs administered by the Secretary.

(g) In addition, the Secretary may enter into contracts with landowners or operators for the purpose of maintaining a conservation practice or measure which was established under the program authorized by this subtitle or otherwise established, and to provide necessary assistance. Subsections (b) through (f) shall apply to contracts made under this subsection.

DESIGNATION OF SPECIAL AREAS

SEC. 1502. (a) The program established under this subtitle shall be directed toward identifying and correcting such erosion-related or irrigation water managment problems as may exist within each designated special area. Assistance under this subtitle may be provided to any geographic area of the United States if such an area is first designated by the Secretary as having severe and chronic erosion-related or irrigation water management problems and such designation is approved under section 1504.

(b) In identifying a geographic area as one appropriate for designation as a designated special area under this subtitle, the Secretary shall prepare a report setting forth an assessment of the problems, objectives, priorities, and a schedule for the implementation of the program under this subtitle in such area. As part of such report, the Secretary shall indicate how the program, as developed with respect to the area discussed in such report, takes into consideration programs of Federal, State, and local agencies—including soil and water conservation district boards and State Agricultural Stabilization and Conservation Committees—relating to soil and water conservation, pollution abatement, or the improvement or protec-

tion of forest land. In designating special areas, the Secretary shall review national resources inventory data, river basin plans, special studies, and other resource information. The Secretary shall consider tons of soil loss prevented, acres protected, and volume of water conserved. The Secretary shall evaluate the degree and type of interagency cooperation, the degree of local acceptance of the planned target activity, and the significant favorable and adverse impacts of the targeted activity.

PERIOD OF PROGRAM

SEC. 1503. Special geographic areas may be designated pursuant to section 1602 during the period of ten years following the effective date of this subtitle. Contracts authorized by subsections (b) and (g) of section 1501 may be entered into during a period of ten years following the designation of the special area to which they relate. Such contracts may not exceed ten years in duration, and may not exceed the amounts of such appropriations as may be provided therefor.

APPROVAL OF DESIGNATIONS

SEC. 1504. The Secretary shall submit each report prepared pursuant to section 1502(b) to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives. The Secretary may not enter into contracts under section 1501 with respect to land in a particular area unless the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives pass resolutions approving the report prepared under section 1502(b) with respect to such area.

SERVICES OF AGENCIES

SEC. 1505. In carrying out the provisions of this subtitle, the Secretary may utilize the services of local, county, and State committees established under section 8 of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h) and the technical services of the Department of Agriculture, soil and water conservation district boards, and other State or local agencies. The Secretary may utilize the services and facilities of the Commodity Credit Corporation in discharging the functions and responsibilities of the Secretary under this subtitle.

RESEARCH

SEC. 1506. The Secretary may expend funds directly or through grants for such research as is needed to assist in developing new technologies for controlling erosion-related or irrigation water management problems in a designated special area.

GRANTS

SEC. 1507. The Secretary may provide grants to any State containing lands within a designated special area to conduct evaluation and analysis of the local and State tax structures, rules, and regulations and their impact on the acceptance, implementation, and maintenance of conservation practices or measures, or other pertinent items that may be needed for an effective program.

AUTHORIZATION OF APPROPRIATIONS

SEC. 1508. There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle, such sums to remain available until expended.

REPORTS

SEC. 1509. The Secretary shall submit an evaluation report to the Congress by January 1, 1986, and at each five-year interval thereafter, concerning activities and results under the program authorized by this subtitle. Recommendations for additional legislative action necessary to apply related research findings or more effectively solve erosion-related or irrigation water management problems of the designated special areas shall be included along with any other pertinent matters.

PROTECTION OF PARTICIPANTS

SEC. 1510. The Secretary shall, to the extent feasible, provide for protection of program participants from indirect or direct disqualifications, discrimination, forfeiture, or reduction of eligibility, or penalty under other agricultural programs for participating in the program authorized by this subtitle.

Subtitle B—Matching Grants for Conservation Activities

GRANTS PROGRAM

SEC. 1511. (a) The Secretary of Agriculture (referred to in this subtitle as the "Secretary") shall formulate and implement a program for furthering the conservation of soil, water, and related resources through annual grants to local units of government through State soil conservation agencies. Such grants shall be for noncapital expenditures in furtherance of local and State conservation objectives specified in section 1613.

(b) Such grants shall be made to augment rather than to replace other technical and financial assistance programs of the United States Department of Agriculture.

(c) A local unit of government may be eligible for a grant under subsection (a) if it—

(1) has in effect a current long-range program which the State soil conservation agency determines is adequate to meet local and State laws and objectives;

(2) has in effect a current annual work plan which is consistent with the long-range program in paragraph (1); and

(3) certifies to the Secretary or his designee at the State level that it has arranged for equal matching funds or in-kind services to the local unit from regional, State, local, or private sources.

(d) Whenever the Secretary determines that a component of the long-range program or annual work plan involves primarily a national rather than a local or State objective, the State or local matching funds required for the national component of the long-range program or annual plan need not exceeed 25 per centum of the total funds required to accomplish the national objective. The Secretary, by regulation, shall define those objectives which are national in scope.

PROGRAM IMPLEMENTATION AND REVIEW

SEC. 1512. (a) For purposes of implementing the program and plan under section 1511(c), the local unit of government is encouraged to seek the input and cooperation of—

(1) local agencies, organizations, and citizens; and

(2) agencies of the United States Department of Agriculture or other Federal agencies, cooperative Extension services, and others that may be designated by the Secretary or the Governor to serve as advisers.

(b) In reviewing programs and work plans, the State soil conservation agency, the State Agricultural Stabilization and Conservation Committee, and the Secretary or his designee at the State level may recommend additions or changes in order to meet urgent State, multistate, and national conservation needs or priorities as developed through the Soil and Water Resources Conservation Act of 1977 or similar process.

PLANS

SEC. 1513. (a) Long-range programs and annual work plans may include any of the following soil, water, and related resource conservation objectives: (1) soil erosion prevention and control; (2) cropland, forest, woodland, pasture or rangeland improvement; (3) water conservation, development, and management, and water quality improvement; (4) agricultural land retention or preservation; (5) demonstration projects to test and publicize the effectiveness of natural resource management systems adapted to local conditions; (6) fish and wildlife habitat improvement; (7) animal waste management; (8) watershed protection and flood prevention; (9) sediment control and stormwater management in urbanizing areas; (10) environmentally sound energy conservation and production; (11) leadership in natural resources aspects of rural community planning and development; or (12) any other purpose authorized or required by local or State conservation laws.

(b) Where an objective has been identified which will require more than one year to complete or reach, the Secretary or his designee may enter into a long-term agreement of not more than ten years with the local unit of government or State agency to provide funding assistance for the term of the agreement. Such assistance shall be contingent upon the amount of funds appropriated under section 1516 of this subtitle.

MATCHING FUNDS

SEC. 1514. (a) Federal matching grant funds, as mutually agreed upon by the State soil conservation agency and the Secretary, may be used to provide technical assistance to land owners and operators for planning and application of soil and water conservation practices and resource management systems.

(b) Such technical assistance shall be administered by the State soil conservation agency through local soil and water conservation districts.

(c) Such technical assistance shall be fully coordinated with technical assistance provided through ongoing Federal, State and local resource conservation programs, and shall be in accord with established technical standards or guidelines.

(d) The basis for the transfer of grant funds shall be a grant agreement entered into by the parties referred to in section 1512(b).

RECORDS

SEC. 1515. (a) Each local unit of government or State agency receiving assistance under this subtitle shall keep such records as the Secretary requires, including records which fully disclose the amount and disposition by such unit or agency of the proceeds of such grants, the total cost of the projects or undertakings in connection with which such funds are given or used, and the amount of that portion of the costs of the projects or undertakings supplied by other sources, and such other records as will facilitate an effective audit.

(b) The Secretary and the Comptroller General of the United States or any of their duly authorized representatives shall have access for the purpose of audit and examination to any books, documents, papers, and records of the local units that are pertinent to the grants received under this subtitle.

AUTHORIZATION OF APPROPRIATIONS

SEC. 1516. (a) There are authorized to be appropriated such sums as may be necessary

to carry out the provisions of this subtitle, such sums to remain available until expended.

(b) No funds shall be appropriated to carry out this subtitle for the fiscal year beginning October 1, 1992, and subsequent fiscal years, except as authorized by law enacted after the effective date of this subtitle.

(c) The Secretary shall report to the House Committee on Agriculture and the Senate Committee on Agriculture, Nutrition, and Forestry on the progress of the program authorized by this subtitle. The first such report shall be submitted by January 1, 1986, and the succeeding report by January 1, 1991. Each such report shall include an evaluation of the program and the Secretary's recommendations for strengthening it.

Subtitle C—Conservation Loan Program

SEC. 1517. (a) Section 4(h) of the Commodity Credit Corporation Charter Act is amended by inserting immediately after the second sentence the following: "To encourage the alleviation of natural resource conservation problems that reduce the productive capacity of the Nation's land and water resources or that cause degradation of environmental quality, the Corporation may, beginning October 1, 1981, make loans to agricultural producers for those natural resource conservation and environmental enhancement measures that are recommended by the applicable county and State Agricultural Stabilization and Conservation Committees and are included in the producer's conservation plan approved by the local soil and water conservation district; such loans shall be for a period not to exceed ten years at a rate of interest based upon the rate of interest charged the Corporation by the United States Treasury; the Corporation may make loans to any one producer in any fiscal year in an amount not to exceed $25,000; loans up to $10,000 in amount may be unsecured and loans in excess of $10,000 shall be secured; and the total of such unsecured and secured loans made in each fiscal year shall not exceed $200,000,000: *Provided*, That the authority provided by this sentence to make loans shall be effective only to the extent and in such amounts as may be provided for in prior appropriation Acts.".

Subtitle D—Volunteers for Department of Agriculture Programs

ESTABLISHMENT OF PROGRAM

SEC. 1518. (a) The Secretary of Agriculture (referred to in this subtitle as the "Secretary") shall establish a program to use volunteers in carrying out the programs of the Department of Agriculture.

(b) The Secretary is authorized to accept, subject to regulations issued by the Office of Personnel Management, voluntary service for the Department of Agriculture for such purpose if the service:

(1) is to be without compensation; and

(2) will not be used to displace any employee of the Department of Agriculture including the local, county, and State committees established under section 8 of the Soil Conservation and Domestic Allotment Act.

(c) Any individual who provides voluntary service under this subtitle shall not be considered a Federal employee except for purposes of chapter 81 of title 5 of the United States Code (relating to compensation for injury) and sections 2671 through 2680 of title 28 of the United States Code (relating to tort claims).

AUTHORIZATION OF APPROPRIATIONS

SEC. 1519. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle, such sums to remain available until expended.

Subtitle E—Reservoir Sedimentation Reduction Program

FORMULATION OF PROGRAM

SEC. 1520. The Secretary of Agriculture (referred to in this subtitle as the "Secretary") is authorized to formulate and implement a program for testing the feasibility of reducing excessive sedimentation in existing reservoirs. Such an assistance program shall be implemented on the watershed drainage areas of no more than five publicly owned reservoirs. The Secretary shall select for the program those reservoirs in which excessive amounts of sediment are being deposited because of critical soil erosion problems in the watershed drainage area.

PLANS

SEC. 1521. For each reservoir and drainage area selected under section 1520, a plan shall be prepared that includes an assessment of the problems, a listing of objectives and priorities, and an implementation plan for achieving the objectives. The Secretary shall enter into an agreement with the soil and water conservation district(s) containing land within the reservoir or drainage area, an agency of State government designated by the Governor, and any unit(s) of local government which has a recognized interest in the reservoir, for the purpose of preparing the plan. The plan shall be signed by the Secretary, or the Secretary's designee, and the other parties to the agreement.

APPROVAL OF PLANS

SEC. 1522. The Secretary shall submit each plan developed under section 1521 to the Committee on Agriculture, Nutrition, and Forestry of the Senate and to the Committee on Agriculture of the House of Representatives. The Secretary may implement the plan only after each committee passes a resolution approving the plan.

AUTHORIZATION OF APPROPRIATIONS

SEC. 1523. There are hereby authorized to be appropriated, for each of the fiscal years 1983 through 1987, such sums as may be necessary for carrying out the provisions of this subtitle, such sums to remain available until expended.

REPORT

SEC. 1524. The Secretary shall submit a report evaluating the program authorized by this subtitle to the Congress by January 1, 1987. The report shall include a recommendation as to whether the program should be extended and, if so, how it could be strengthened.

Subtitle F—Designation of Lands Set Aside or Diverted

SEC. 1525. Notwithstanding any other provision of law, if the Secretary of Agriculture (referred to in this subtitle as the "Secretary") is authorized or directed by any Act of the Congress to establish a set-aside or diversion program for any agricultural commodity, and if the Secretary establishes such a program, the designation by a producer of lands to be set aside or diverted in an application to participate in such program shall be subject to disapproval under subsection (b).

(b) If there is a soil and water conservation district board for the district in which the designated lands are situated, the Secretary is authorized to empower such board—

(1) to disapprove the producer's designation of lands if the board finds that lands designated will make a less than average contribution to soil conservation compared to the contribution of other lands which the producer could have designated to set-aside or divert under such program, and

(2) if a designation is so disapproved, to specify which lands of the producer would be acceptable to such board for set-aside or diversion under such program.

(c) If a producer's designation is disapproved under subsection (b)(1), then such producer shall be permitted to submit an amended application to participate in the program, designating for set-aside or diversion lands specified by the board under subsection (b)(2).

Subtitle G—Land Removed From Production for Conservation Purposes

PAYMENTS

SEC. 1526. The Secretary of Agriculture (referred to in this subtitle as the "Secretary") is authorized to enter into contracts to provide financial assistance in the form of payments to owners and operators of cropland located in counties where the soil normally freezes to a depth of at least four inches annually who remove such land from agricultural production for a period not to exceed one year for the purpose of installing enduring conservation measures which involve excavation of the soil. The payments under such contracts shall be in such amounts as determined by the Secretary to be necessary to effectuate the purposes of this subtitle but shall not exceed an amount equal to the number of acres of cropland removed from agricultural production for such purpose multiplied by 50 per centum of the typical annual rent paid for similar land in the county. Financial assistance may not be provided under this subtitle with respect to any conservation measure without the approval of the soil and water conservation district board for the district in which the land is located, and may not, in the aggregate, be provided in any year with respect to more than one-half of 1 per centum of the cropland in any county.

AUTHORIZATION OF APPROPRIATIONS

SEC. 1527. There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle, such sums to remain available until expended.

Subtitle H—Agricultural Land Resources

SHORT TITLE

SEC. 1528. This subtitle may be cited as the "Agricultural Land Resources Policy Act".

FINDINGS, PURPOSE, AND DEFINITIONS

SEC. 1529. (a) Congress finds that—

(1) the Nation's farmland is a unique natural resource and provides food and fiber necessary for the continued welfare of the people of the United States;

(2) each year, a large amount of the Nation's farmland is irrevocably converted from actual or potential agricultural use to nonagricultural use;

(3) continued decrease in the Nation's farmland base may threaten the ability of the United States to produce food and fiber in sufficient quantities to meet domestic needs and the demands of our export markets;

(4) the extensive use of farmland for nonagricultural purposes undermines the economic base of many rural areas;

(5) Federal actions, in many cases, result in the conversion of farmland to nonagricultural uses where alternative actions would be preferred;

(6) the Department of Agriculture is the agency primarily responsible for the implementation of Federal policy with respect to United States farmland, assuring the maintenance of the agricultural production capacity of the United States, and has the personnel and other resources needed to implement national farmland protection policy; and

(7) the Department of Agriculture and other Federal agencies should take steps to assure that the actions of the Federal Government do not cause United States farmland to be irreversibly converted to nonagricultural uses in cases in which other national interests do not override the importance of the protection of farmland nor otherwise outweigh the benefits of maintaining farmland resources.

(b) The purpose of this subtitle is to minimize the extent to which Federal programs contribute to the unnecessary and irreversible conversion of farmland to nonagricultural uses, and to assure that Federal programs are administered in a manner that, to the extent practicable, will be compatible with State, unit of local government, and private programs and policies to protect farmland.

(c) As used in this subtitle—

(1) the term "farmland" includes all land defined as follows:

(i) prime farmland is land that has the best combination of physical and chemical characteristics for producing food, feed, fiber, forage, oilseed, and other agricultural crops with minimum inputs of fuel, fertilizer, pesticides, and labor, and with out intolerable soil erosion, as determined by the Secretary of Agriculture. Prime farmland includes land that possesses the above characteristics but is being used currently to produce livestock and timber. It does not include land already in or committed to urban development or water storage;

(ii) unique farmland is land other than prime farmland that is used for production of specific high-value food and fiber crops, as determined by the Secretary of Agriculture. It has the special combination of soil quality, location, growing season, and moisture supply needed to economically produce sustained high quality or high yields of specific crops when treated and managed according to acceptable farming methods. Examples of such crops include citrus, tree nuts, olives, cranberries, fruits, and vegetables; and

(iii) farmland, other than prime or unique farmland, that is of statewide or local importance for the production of food, feed, fiber, forage, or oilseed crops, as determined by the appropriate State or unit of local government agency or agencies, and that the Secretary of Agriculture determines should be considered as farmland for the purposes of this subtitle;

(2) the term "State" means any of the fifty States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the Trust Territory of the Pacific Islands, or any territory or possession of the United States;

(3) the term "unit of local government" means the government of a county, municipality, town, township, village, or other unit of general government below the State level, or a combination of units of local government acting through an areawide agency under State law or an agreement for the formulation of regional development policies and plans; and

(4) the term "Federal program" means those activities or responsibilities of a department, agency, independent commission, or other unit of the Federal Government that involve (i) undertaking, financing, or assisting construction or improvement projects; or (ii) acquiring, managing, or disposing of Federal lands and facilities. The term "Federal program" does not include construction or improvement projects that on the effective date of this subtitle are beyond the planning stage and are in either the active design or construction stage.

FARMLAND PROTECTION POLICY

SEC. 1530. (a) The Department of Agriculture, in cooperation with other departments, agencies, independent commissions, and other units of the Federal Government, shall develop criteria for identifying the effects of Federal programs on the conversion of farmland to nonagricultural uses.

(b) Departments, agencies, independent commissions, and other units of the Federal Government shall use the criteria established under subsection (a) of this section, to identify and take into account the adverse effects of Federal programs on the preservation of farmland; consider alternative actions, as appropriate, that could lessen such adverse effects; and assure that such Federal programs, to the extent practicable, are compatible with State, unit of local government, and private programs and policies to protect farmland.

(c) The Department of Agriculture may make available to States, units of local government, individuals, organizations, and other units of the Federal Government information useful in restoring, maintaining, and improving the quantity and quality of farmland.

CONFORMATION OF EXISTING POLICIES AND PROCEDURES

SEC. 1531. (a) Each department, agency, independent commission, or other unit of the Federal Government, with the assistance of the Department of Agriculture, shall review current provisions of law, administrative rules and regulations, and policies and procedures applicable to it to determine whether any provision thereof will prevent such unit of the Federal Government from taking appropriate action to comply fully with the provisions of this subtitle.

(b) Each department, agency, independent commission, or other unit of the Federal Government, with the assistance of the Department of Agriculture, shall, as appropriate, develop proposals for action to bring its programs, authorities, and administrative activities into conformity with the purpose and policy of this subtitle.

TECHNICAL ASSISTANCE TO STATES AND LOCALITIES

SEC. 1532. The Secretary is encouraged to provide technical assistance to any State or locality or qualifying nonprofit organization which desires to develop programs or policies to limit the conversion of productive agricultural land to nonagricultural uses.

AGRICULTURAL LAND RESOURCE INFORMATION

SEC. 1533. (a) The Secretary, through existing agencies or interagency groups, and in cooperation with the cooperative extension services of the States, shall design and implement educational programs and materials emphasizing the importance of productive agricultural land to the Nation's well-being and distribute educational materials through communications media, schools, groups, and other Federal agencies.

(b) The Secretary shall designate one or more agricultural land information centers to serve as central depositories and distribution points for information on agricultural land issues, policies, programs, technical principles, and innovative actions or proposals by local and State governments.

GRANTS; CONTRACTS

SEC. 1534. The Secretary may carry out the purposes of this subtitle, with existing facilities and funds otherwise available, through the use of grants, contracts, or such other means as the Secretary deems appropriate.

REPORT

SEC. 1535. Within one year after the effective date of this subtitle, the Secretary of Agriculture shall report to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives on the progress made in implementing the provisions of this subtitle. Such report shall include information on—

(1) the effects, if any, of Federal programs, authorities, and administrative activities with respect to the protection of United States farmland; and

(2) results of the reviews of existing policies and procedures required under section 1531(a) of this subtitle.

STATEMENT OF LIMITATION

SEC. 1536. (a) This subtitle does not authorize the Federal Government in any way to regulate the use of private or non-Federal land or to affect the property rights of owners of such land.

(b) None of the provisions or other requirements of this subtitle shall apply to the acquisition or use of farmland for national defense purposes.

PROHIBITION

SEC. 1537. This subtitle shall not be deemed to provide a basis for any action, either legal or equitable, by any State, local unit of government, or any person or class of persons challenging a Federal project, program, or other activity that may affect farmland.

EFFECTIVE DATE

SEC. 1538. The provisions of this subtitle shall become effective six months after the date of enactment of this Act.

Subtitle I—Resource Conservation and Development

CONGRESSIONAL FINDINGS AND PURPOSE

SEC. 1539. (a) The Congress finds and declares—

(1) that the rural areas of the Nation are confronted by crittical resource utilization, economic, and environmental problems;

(2) that such problems are the result of—

(A) continually increasing pressures on such rural areas to meet domestic and foreign demand for food, fiber, and wood;

(B) inadequate public and private investment to help formulate and carry out acceptable courses of action necessary to meet the accelerating demands being made on the land and natural resources of the Nation; and

(C) social, economic, and environmental conditions of such complexity that they cannot be effectively dealt with by individual communities in rural areas acting independently of each other; and

(3) that such problems have resulted in and unless changed, will continue to result in the decline of the family farm system, small business enterprise, and job opportunities, as well as a decrease in the amenities and environmental qualities of rural areas throughout the United States.

(b) It is, therefore, the purpose of this subtitle to encourage and assist State and local units of government and local nonprofit organizations in rural areas to plan, develop, and carry out a program for resource conservation and development.

DEFINITIONS

SEC. 1540. As used in this subtitle—

(1) The term "Secretary" means the Secretary of Agriculture.

(2) The term "planning process" means the continuing effort by any State, local unit of government, or local nonprofit organization to develop and carry out effective resource conservation and utilization plans for a designated rural area, including development of an area plan (as defined in paragraph (3)), goals, objectives, policies, implementation activities, and evaluations and reviews, and the opportunity for public participation in such effort.

(3) The term "area plan" means a resource conservation and utilization plan for a designated rural area of a State or States which has been developed through a planning process and which includes one or more of the following basic elements:

(A) a land conservation and utilization element the purpose of which will be to correct maladjustments in land use, to protect agricultural land from imprudent conversion to other uses, to control erosion and sedimentation, and to protect fish and wildlife habitats;

(B) a water management element the purpose of which will be to provide for the conservation and utilization of water, including irrigation and rural water supplies; the mitigation of floods and high water tables; construction, repair, and improvement of dams and reservoirs; improvement of agricultural water management; and improvement of water quality through control of nonpoint sources of pollution;

(C) a community development element the purpose of which will be the development of natural resource based industry, the protection of rural area industries from natural resource hazards, the development of aquaculture and adequate rural area water and waste disposal systems, improvements in recreation facilities, rural housing, adequate health and education facilities, and essential transportation and communication needs; and

(D) other elements such as energy conservation, environmental protection, preservation of unique natural and cultural resources that are appropriate to achieving the goals of the citizens in the designated rural areas.

(4) The term "State" means the several States, the Commonwealth of Puerto Rico, and the Virgin Islands.

(5) The term "local unit of government" means any city, town, township, parish, village, or other general-purpose subdivision of a State, any local or regional special district or other limited political subdivision of a State, including any soil and water conservation district, irrigation, watershed, or drainage district, school district, park authority, and water or sanitary district.

(6) The term "nonprofit organization" means any community association, wildlife group, or resource conservation organization that is incorporated and approved by the Secretary for the purpose of providing to any rural area those public facilities or services included in the area plan for such rural area.

(7) The term "technical assistance" means any service provided by the staff members of any agency of the Department of Agriculture, including advising, inventory evaluating, planning, designing, supervising, laying out, and inspecting, and the providing of maps, reports, and other documents associated with the services provided.

(8) The term "financial assistance" means the assistance made available under this subtitle by means of Federal grants and loans.

(9) The term "works of improvement" means the facilities installed or being installed in compliance with the area plan.

RESOURCES CONSERVATION AND DEVELOPMENT PROGRAM

SEC. 1541. The Secretary shall establish a resource conservation and development program under which the Secretary shall make available to States, local units of government, and local nonprofit organizations the technical and financial assistance necessary to permit such States, local units of government, and organizations to operate and maintain a planning process for the development of plans and actions needed to conserve and better utilize land, develop natural resources, and improve and enhance the economic and environmental conditions of rural areas of the United States.

AUTHROITY OF THE SECRETARY OF AGRICULTURE

SEC. 1542. In carrying out the provisions of this subtitle the Secretary may—

(1) provide technical assistance and advice, upon request, to any State, local unit of government, or local nonprofit organization within a designated rural area to assist in developing an area plan for such area;

(2) cooperate with other departments and agencies of the Federal Government, with State and local governments, and with local nonprofit organizations in conducting surveys and inventories, disseminating information, and developing area plans;

(3) assist in carrying out an area plan approved by the Secretary for any rural area by providing technical and financial assistance, including grants and loans, to local public agencies and nonprofit organizations designated to receive such assistance by the Governor or legislature of the State concerned; and

(4) enter into agreements with State agencies, local units of government, and local nonprofit organizations, as provided in section 1543.

AGREEMENTS; TERMS AND CONDITIONS

SEC. 1543. (a) Technical and financial assistance may be provided by the Secretary to any State agency, local unit of government, or local nonprofit organization to assist such agency, unit of government, or organization in carrying out works of improvement specified in an area plan approved by the Secretary only if—

(1) such State agency, unit of government, or organization agrees in writing to carry out such works of improvement and to finance or arrange for financing of any portion of the cost of carrying out such works of improvement not paid by the Secretary under this subtitle;

(2) the works of improvement for which assistance is to be provided under this subtitle are included in an area plan and have been approved by the local units of government to be assisted;

(3) the Secretary determines that assistance to finance the type of works of improvement concerned is not reasonably available to such agency, unit of government, or organization under some other Federal program;

(4) the works of improvement provided for in the area plan for any area are consistent with any existing comprehensive plan for such area;

(5) the cost of land or interest in land acquired or to be acquired under such plan by any State, local unit of government, or local nonprofit organization is borne by such State, unit of government, or organization, except in the case of land or interest in land acquired or to be acquired for the purpose of conserving or protecting fish or wildlife, acquired or to be acquired for public recreational purposes, or acquired or to be acquired to protect the public from a threat to its health and welfare; and

(6) the State, local unit of government, or local nonprofit organization participating in an area plan agrees to maintain and operate any work of improvement carried out under such plan.

(b) Loans made under this subtitle shall be made on such terms and conditions as the Secretary may prescribe, except that such loans shall have a repayment period of not more than thirty years from the date of completion of the works of improvement for which the loan is made and shall bear interest at the average rate of interest paid by the United States on its obligations of a comparable term, as determined by the Secretary of the Treasury.

(c) Assistance may not be made available to any State, local unit of government, or local nonprofit organization to carry out any area plan unless such plan has been submitted to and approved by the Secretary.

IDENTIFICATION OF GROUPS OR PROBLEMS FOR SPECIAL CONSIDERATION IN AREA PLANS

SEC. 1544. Any area plan may identify for special emphasis or assistance under such plan any particular group (including small farm operators, rural poor, or minority groups living in the area covered by such plan), or any particular natural resource or water utilization problem.

SUPPLEMENTAL AUTHORITY OF THE SECRETARY

SEC. 1545. The authority of the Secretary under this subtitle to assist States, local units of government, and local nonprofit organizations in the development and implementation of area plans shall be supplemental to and not in lieu of any authority of the Secretary under any provision of law.

RESOURCE CONSERVATION AND DEVELOPMENT POLICY BOARD

SEC. 1546. (a) The Secretary shall establish within the Department of Agriculture a Resource Conservation and Development Policy Board (hereinafter in this section referred to as the "Board").

(b) The Board shall be composed of seven members appointed by the Secretary. One member of the Board shall be designated by the Secretary to serve as chairperson.

(c) It shall be the function of the Board to advise the Secretary regarding the administration of this subtitle, including the formulation of policies for carrying out the program provided for by this subtitle.

EVALUATION OF PROGRAM

SEC. 1547. The Secretary shall evaluate the program provided for in this subtitle with a view to determining whether such program is effectively meeting the needs of, and the objectives identified by, the States, local units of government, and local non-

profit organizations participating in such program. The Secretary shall submit a report to the Congress containing the results of the evaluation not later than December 31, 1986, together with the Secretary's recommendations for continuing, terminating, redirecting, or modifying such program.

AUTHORIZATION OF APPROPRIATIONS

SEC. 1548. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this subtitle, except that not more than $60,000,000 may be appropriated for technical and financial assistance for any fiscal year and not more than $15,000,000 may be appropriated for loans for any fiscal year.

SEPARABILITY PROVISION

SEC. 1549. If a part of this subtitle is invalid, all valid parts that are severable from the invalid part remain in effect. If a part of this subtitle is invalid in one or more of its applications, the part remains in effect in all valid applications that are severable from the invalid part.

Subtitle J—Effective Date; Regulations

SEC. 1550. Except as otherwise provided herein, the provisions of this title shall become effective October 1, 1981.

SEC. 1551. The Secretary of Agriculture shall prescribe such regulations as may be necessary to carry out the provisions of this title.

TITLE XVI—CONTINUATION OF FEDERAL CROP INSURANCE PILOT PROGRAMS

SEC. 1601. Section 107(b) of the Federal Crop Insurance Act of 1980 is amended by adding at the end thereof the following: "Notwithstanding any other provision of this section; for the purpose of providing data on the comparative costs of selling and servicing crop insurance by various delivery systems, the Corporation shall for the crop years 1982, 1983, 1984, and 1985 continue its pilot program of making crop insurance available at selected county offices of the Agricultural Stabilization and Conservation Service. The Secretary of Agriculture shall by February 1, 1985, report to Congress on the comparative costs of all delivery systems used in crop years 1981 through 1984.".

TITLE XVII—CONFERENCE

WHITE HOUSE CONFERENCE ON AGRICULTURE

SEC. 1701. (a) The President is requested to call a White House Conference on Agriculture to be held not later than one year after the date of the enactment of this Act.

(b) The purposes of the White House Conference on Agriculture shall be to study current problems in the agricultural sector of the economy and to develop recommendations regarding short-term and long-term solutions to such problems.

(c) Members of the White House Conference on Agriculture shall be appointed by the President from among—

(1) heads of organizations comprised of producers of agricultural commodities,

(2) representatives of the banking industry,

(3) representatives of businesses which provide services, or produce goods, used by producers of agricultural commodities,

(4) heads of organizations representing the interests of consumers, and

(5) producers of agricultural commodities.

(d) A report of the White House Conference on Agriculture shall be submitted to the President and to the Congress not later than one year after the members of such Conference are first appointed.

TITLE XVIII—IMPORTED MEAT

SEC. 1801. Section 20 of the Federal Meat Inspection Act (21 U.S.C. 620) is amended by adding at the end thereof a new subsection (f) as follows:

"(f) Notwithstanding any other provision of law, all carcasses, parts of carcasses, meat and meat food products of cattle, sheep, swine, goats, horses, mules, or other equines which are capable of use as human food offered for importation into the United States shall be subject to the inspection, sanitary, species verification and residue standards applied to such articles produced in the United States. Neither shall any meat or meat food products be imported which have been produced using agricultural chemicals or animal drugs, the use of which, in the direct production of such meat products, (1) has been prohibited in the United States for reasons of health or safety by final judicial action or by administrative action that is final, subject to judicial review, and that has become effective, or (2) has been determined by the Secretary to render such articles adulterated within the meaning of this Act. Provided, that the President may set aside the application of clause (1) of this provision to the importation of any meat or meat food products if the President finds that it will have the specific effect of causing serious damage to the exportation of agricultural products from the United States, and reports such factors, facts, concerns and findings that led him to such a determination to the Congress at least 10 days before such action becomes effective. The Secretary shall inspect such articles through the use of random sampling for such residues and species verification. The provisions of this subsection shall not be deemed to permit the imposition of standards with respect to such imported articles that are less stringent than standards imposed under the other subsections of this section. The Secretary shall issue such regulations as are necessary to carry out the provisions of this subsection. The provisions of this subsection shall become effective 30 days after the date of enactment of this subsection, except that the provisions of clause (1) of the third sentence shall become effective one year after such date of enactment and, thereafter, on the same date that a prohibition becomes effective with respect to the use of an agricultural chemical or animal drug in the domestic production of such meat products: *Provided*, That if the prohibition becomes effective with respect to such domestic production less than six months after the issuance of the administrative or court order, as applicable, the provisions of clause (1) of the third sentence shall become effective with respect to imported meat products six months after such order."

TITLE XIX—USER FEES FOR REPORTS AND PUBLICATIONS

SEC. 1901. The Secretary of Agriculture is authorized to furnish upon request copies of pamphlets, reports or other publications prepared in the Department in carrying out agricultural economic research and statistical reporting functions authorized by law; and to charge such fees therefor as he may determine to be reasonable: *Provided*, That the imposition of such charges shall be consistent with the provision of title V of the Act of August 31, 1951, as amended, (31 U.S.C. 483(a)), except that all monies received in payment for work or services performed or for documents, reports, or other publications provided shall be deposited in a separate account or accounts to be available until expended and may be used to pay directly the costs of such work, services, documents, reports or publications, and to repay or make advances to appropriations of funds which do or will initially bear all or part of such costs.

The SPEAKER. Without objection, the motion is agreed to.

Mr. FRENZEL. Mr. Speaker, on that I demand a recorded vote.

The SPEAKER. The Chair will inquire, is the gentleman demanding a recorded vote on the motion or on the passage of the Senate bill?

Mr. FRENZEL. On the passage of the Senate bill, Mr. Speaker.

The SPEAKER. Without objection, the motion is agreed to.

There was no objection.

The SPEAKER. The question is on the amendment to the Senate bill.

The amendment to the Senate bill was agreed to.

The SPEAKER. The question is on the third reading of the Senate bill.

The Senate bill was ordered to be read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the Senate bill, as amended.

The question was taken; and the Speaker announced that the ayes appeared to have it.

The SPEAKER. The Chair will inquire, for what purpose does the gentleman from Minnesota (Mr. FRENZEL) rise?

PARLIAMENTARY INQUIRY

Mr. FRENZEL. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. FRENZEL. Mr. Speaker, I understand that the House bill, H.R. 3603, was passed by voice vote. We have now substituted the Senate bill, and that is before the House for passage; is that correct?

The SPEAKER. The gentleman is correct.

Mr. FRENZEL. I thank the Speaker.

RECORDED VOTE

Mr. FRENZEL. Mr. Speaker, I demand a recorded vote on the passage of the Senate bill, as amended.

The SPEAKER. The gentleman's demand is in order.

All Members in favor of taking this by a recorded vote will rise.

Mr. VOLKMER. Mr. Speaker, a parliamentary inquiry. I want to know what we are voting on.

The SPEAKER. More than the required number have risen.

A recorded vote is ordered.

PARLIAMENTARY INQUIRY

Mr. VOLKMER. Mr. Speaker, if the Chair pleases, before the vote is taken I have a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. VOLKMER. Mr. Speaker, I heard the gentleman from Minnesota (Mr. FRENZEL) inquire as to whether

this was a vote on the Senate bill. It is my understanding that it is a vote on the Senate bill, as amended by the House bill?

The SPEAKER. The gentleman is correct.

Mr. VOLKMER. So actually we are voting on the House bill?

The SPEAKER. The gentleman is correct. The vote is on the Senate bill, as amended by the House bill.

Those Members in favor will vote "aye," those opposed will vote "no."

Voting will be by electronic device.

The vote was taken by electronic device, and there were—ayes 192, noes 160, not voting 81, as follows:

□ 1850

The Clerk announced the following pairs:

On this vote:

Mr. White for, with Mr. Hertel against.

Mr. Waxman for, with Mr. Florio against.

Mr. Biaggi for, with Mr. Bafalis against.

Mr. Pepper for, with Mr. Campbell against.

Mr. Garcia for, with Mr. Collins of Texas against.

Mr. Guarini for, with Mr. Corcoran against.

Mr. Dellums for, with Mr. Forsythe against.

Mr. Dymally for, with Mr. Gilman against.

Mr. Green for, with Mr. Young of Alaska against.

Mr. Johnston for, with Mr. Williams of Ohio against.

Mr. Marks for, with Mr. Van der Jagt against.

Mr. Pursell for, with Mr. Rousselot against.

Mr. Quillen for, with Mr. Rhodes against.

Until further notice:

Mr. Udall with Mr. Solomon.

Mrs. Schroeder with Mr. O'Brien.

Mr. Barnard with Mr. Schulze.

Mr. Whitten with Mr. Gingrich.

Mr. Rosenthal with Mr. McCloskey.

Mr. Roe with Mr. Broyhill.

Mr. Wright with Mr. McKinney.

Mr. Alexander with Mr. Ashbrook.

Mr. Brooks with Mr. Beard.

Mr. Early with Mr. McCollum.

Mr. Foglietta with Mr. Martin of North Carolina.

Mr. Mazzoli with Mr. Livingston.

Mr. Shamansky with Mr. Lungren.

Mr. Vento with Mr. Mitchell of New York.

Mr. Solarz with Mr. Moorhead.

Mr. Russo with Mr. Frost.

Mr. Jones of North Carolina with Ms. Ferraro.

Mr. Fowler with Mr. Lundine.

Mr. Jones of Oklahoma with Mr. Flippo.

Mr. Murphy with Mr. Ertel.

Mr. John L. Burton with Mr. Clay.

Mr. Conyers with Mr. Aspin.

Mr. Hamilton with Mr. Ireland.

Mr. Holland with Mr. Hefner.

Mr. Jenkins with Mr. Scheuer.

Mr. Schumer with Mr. Wyden.

Mr. BROWN of Ohio changed his vote from "no" to "aye."

So the Senate bill was passed.

The title of the Senate bill was amended so as to read: "A bill to provide price and income protection for farmers, assure consumers an abundance of food and fiber at reasonable prices, continue food assistance to low-income households, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 3603) was laid on the table.

□ 1900

AUTHORIZING CLERK TO MAKE CHANGES IN SECTION NUMBERS, CROSS REFERENCES, AND PUNCTUATION MARKS IN ENGROSSMENT OF S. 884

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that in the engrossment of the House amendment to the Senate bill S. 884, the Clerk be authorized to correct section numbers, cross references, and punctuation marks.

The SPEAKER pro tempore (Mr. ROSE). Is there objection to the request of the gentleman from Texas?

There was no objection.

GENERAL LEAVE

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous matter on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 3364

Mr. FORD of Tennessee. Mr. Speaker, I ask unanimous consent to have my name removed as a cosponsor of the bill, H.R. 3364.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

ADJOURNMENT TO MONDAY, OCTOBER 26, 1981

Mr. MOAKLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at 12 o'clock noon on Monday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. MOAKLEY. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 4603, DEPOSIT INSURANCE FLEXIBILITY ACT

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 97-292) on the resolution (H. Res. 253) on the bill (H.R. 4603) to provide flexibility to the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, and the Federal supervisory agencies to deal with financially distressed depository institutions, which was referred to the House Calendar and ordered to be printed.

TO CONTROL ACID RAIN

(Mr. MOFFETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOFFETT. Mr. Speaker, today I am introducing the Acid Deposition Control Act of 1981 with a bipartisan coalition of Members including JUDD GREGG, SAM GIBBONS, GEORGE MILLER, DON MITCHELL, and several others. This legislation, to amend the Clean Air Act, is designed to contain sulfur dioxide emissions, pollutants which are linked to the acid rain tragedy which is threatening our environment.

Abundant scientific evidence speaks to the dangers posed to our Nation's environment by the phenomenon called acid rain. In February of this year, researchers reported that acid rain was threatening a disaster in the Sierra Nevadas. Acid levels comparable to vinegar were detected in the precipitation detected this summer in Colorado. Our relations with our Canadian neighbors have slipped considerably because of acid rain damage to their lakes which is linked to our sulfur dioxide emissions. The New England River Basin Commission has reported that we suffer $100 million to $400 million in annual damage to acquatic ecosystems, forests, and materials due to acid rain.

Most recently, the respected National Academy of Sciences has weighed in with its report on acid rain: "Atmosphere-Biosphere Interactions: Toward a Better Understanding of the Ecological Consequences of Fossil Fuel Combustion." The NAS report adds substantial, additional evidence that acid rain is a serious threat to environmental quality. Among their findings:

Acid rain is destroying soft-water ecosystems;

There is clear evidence, which the report calls "overwhelming," that powerplant emissions are linked to the production of acid rain; and

Continued emissions of pollutants like sulfur dioxide at current or accelerated rates will be extremely risky from a long-term economic standpoint.

At this point, it seems clear that acid rain is an issue which has been studied with great care by the scientific community. Now is the time for Congress to act aggressively, particularly when the Clean Air Act authorization must be renewed.

Despite the evidence; despite the overwhelming 86 percent environmental consensus for continuing a strong Clean Air Act, most current legislative proposals appear aimed at hamstringing our enforcement efforts. Proposals that we have seen coming out of the administration—such as the Clean Air Act draft dated August 20 which I released last month—ignore the substantial economic damage, the damage to human health, and the ecological damage which will be incurred if we weaken the Clean Air Act now. So, despite the attractive arguments that further economic progress can only be purchased at the expense of a clean environment, we feel that action is necessary to curb the obvious damage we see from acid rain.

Our bill, similar to that introduced in the Senate by GEORGE MITCHELL, of Maine, is designed to contain those harmful emissions which contribute to the acid rain problem in the Northeast.

Let me summarize the approach taken by our bill:

First, the bill identifies a 31-State area in the Eastern United States as an "acid deposition region."

Second, in this region, States will be directed to develop plans for reducing sulfur dioxide emissions.

Third, over 10 years, these States will reduce sulfur dioxide emissions by 10 million tons below 1980 levels.

Fourth, each State will reduce emissions by its share of excess pollution.

Fifth, the reduction will be accomplished by strategies which include:

Least emissions dispatching, where permitted by law, as practiced by electric utilities;

Investments in energy conservation where emission reductions can be identified;

Coal washing or fuel switching;

Addition of new technology; and

Interstate bubbling.

Sixth, plans will be submitted to EPA for approval. If States fail to submit such plans, EPA will be required to prescribe sulfur dioxide emission reduction strategies.

This legislation represents a new phase in the Clean Air Act battle. Americans across the country are tired of hearing that the trumpet must sound "retreat" when it comes to pollution controls. The petition drive directed against the Secretary of the Interior is only example of the strong conviction held by a majority in this country that our land, water, and material resources are too precious to be threatened by a "supply side" environmental strategy. It's time for environmentalists within Congress to stand up for a strong Clean Air Act and on behalf of a thoughtful approach for the control of acid rain.

Environmentally conscious Americans are waiting and watching what the Congress does. Our Canadian neighbors are waiting for us to make the same kind of commitment which they have made, which the Scandanavians have made. Let us not disappoint them. I urge my colleagues to support our legislation to respond to this preeminent environmental crisis; acid rain.

DANGEROUS EROSION OF TOP-LEVEL MANAGEMENT IN FEDERAL CIVIL SERVICE

(Mr. HOYER asked and was given permission to address the House for 1 minute and to revise and extend his

remarks and include extraneous matter.)

Mr. HOYER. Mr. Speaker, I would like to bring to the attention of my colleagues an article by Karlyn Barker of the Washington Post entitled, "SES Executives Find Many Thorns, Few Roses." The article, similar to ones appearing in the Wall Street Journal, the New York Times, and Newsweek magazine, focuses on the dangerous erosion of top level management in the Federal civil service.

More than 45,000 Federal employees in the GS-14 through 18 levels currently lack any incentive to remain in the Federal Government because of the cap on their pay. In an era when this country's leadership is strongly advocating incentives to increase production and rebuild our economy, the Federal Government—which is the largest employer in the world—is denying its best employees the salary necessary to keep them in the Government.

As the Washington Post article points out, 52 percent of our Federal executives are considering leaving Government this year. Of these, 85 percent cite inadequate pay as the major reason for their departure.

Now that 48,000 Federal employees have hit the $50,000 pay cap, morale in the mid- to high-level grades is suffering, as employees see the avenues to future pay advancement close.

If we fail to deal with the pay cap issue, this country is headed toward management by the mediocre. We will have to be content with a horde of second-besters, uninspired, inactive, and unimaginative bureaucrats. And when our constituents come asking why Government does not respond, why it wastes, and why it is lethargic, we can tell them that the Congress defied all the rules of the American spirit and decided not to offer any incentives to the people who make this Government run.

Mr. Speaker, I contend that if an American corporation would treat its executives the way this Government treats theirs, that same corporation would not be in business very long.

I hope my colleagues will review Ms. Barker's article with an eye to the upcoming discussions on the next continuing resolution. I look forward to discussing this issue in depth with my friends on both sides of the aisle.

SES Executives Find Many Thorns, Few Roses

(By Karlyn Barker)

When Jimmy Carter set up the Senior Executive Service nearly three years ago, it was touted as the ideal place for the government's top managers, an elite niche where Uncle Sam's best and brightest would toil at greater risk but with the promise of greater rewards.

It hasn't worked out that way, according to numerous senior executives. In a recently released survey of 1,000 randomly selected SES members, more than 80 percent said that, although they like their jobs, they believe there are insufficient incentives to retain top quality government executives. Further, 46 percent of the current executives said they are thinking of leaving government service within the next two years.

The written survey, mailed out to senior executives by the Office of Merit Systems and Studies, found a growing dissatisfaction with the SES, which replaced the so-called "supergrade" system and was part of the Civil Service Reform Act passed in late 1978. The 6,700-member SES includes most managerial, supervisory and policy-making positions equivalent to GS 16 through Executive Level V in the Executive branch.

The survey detailed several SES shortcomings:

The current pay cap of $50,112 has resulted in "pay compression," so that all SES members—and many of their subordinates—earn the same salary, preventing distinctions based on differing responsibilities and authority.

The pay ceiling has meant that some executives have accepted "promotions" with no increase in pay; conversely, some have been less willing to accept promotions.

The pay cap has hastened the retirement of senior executives, whose pensions are based on the top salary earned. Though they can't improve their base pensions at this point by staying on longer, they can look forward to having their pensions boosted by regular cost-of-living increases once they do retire.

The SES bonus system, a type of merit pay intended to motivate and reward executives for exceptional performance, has been so severely curtailed by Congress and the OPM that at least half the members of the excutive work force feel they have no real chance of getting a bonus in the coming year.

Despite the theory that the SES would mean greater risks for greater rewards, most top performing executives feel they have not been adequately compensated for their work and, as of July 1981, only one career executive has been removed from SES for poor performance. Part of the idea behind the reorganized system was that it would attract and keep the best government executives by increasing their pay and perquisites while eliminating many of the protections against dismissal for poor performance.

The survey reported that 78 percent of the executives questioned are dissatisfied with their pay compared to that of private sector executives. Ninety-one percent said they enjoy the job itself and the kind of work they do, and 80 percent said they believe they get results and have a positive impact on government performance.

On the negative side, 63 percent said they are disatisfied with the bonuses and rank awards systems.

The vast majority of eligible career executives chose to join the SES when it was set up, particularly since it was understood at the time that failure to do so could scuttle their career advancement.

"People are really down," said E. Jerry Shaw, president of the Senior Executive Association. "There's this tremendous feeling of betrayal, and executives just cannot see a future in government if they are going to keep getting kicked in the head."

Shaw said the treatment of career executives should be all the more troubling to officials because "these are the successes in government, not the failures."

Archie Grimmett, one of those successes, has worked for the federal government for 22 years. He loves his job, regards his career as a higher calling and until recently had never once thought of looking elsewhere for employment.

But now the 46-year-old chief of the Department of Army's staffing and career management division for civilian personnel says he is becoming "very disillusioned about the whole thing." For the first time, he and his wife have begun discussing the possibility that he might want to leave government service unless, as promised, government pay and benefits improve.

The continuing failed promise of the SES has made it "alarmingly unattractive" to mid-level federal employes, the pool from which a large number of future SES members will likely be drawn, according to the survey. And even Donald J. Devine, director of the Office of Personnel Management, has told congressional officials that the government is losing its best, most seasoned executives at a time when it needs them more than ever.

Senior executives, to be sure, are not the only government employes feeling abused these days. Studies of mid- to high-level civil servants indicate that morale in general is suffering, particularly now that more than 48,000 federal employes have hit the $50,000 pay cap.

"The brain-drain problem is a much broader problem than the SES," said Rep. William Ford (D-Mich.), chairman of the House Post Office and Civil Service Committee. He said officials in the Reagan administration have come in "thinking that bureaucrats are to be purged at all costs, and this makes them incapable of making any judgment on the impact of that policy on the government."

Still, the problems of the SES—where the last substantial pay raise was in March 1977, followed by a 5½ percent cost-of-living increase in October 1979—are being felt in every agency.

"We've lost a number of top people," reports Ed Nicholas, director of personnel at the National Institutes of Health and a charter member of the SES. He has been in government service for 35 years.

Nicholas noted that while other government workers just received a 4.8-percent pay increase, SES salaries have been frozen. NIH recently lost one of its top directors, who left to head up a medical school, reportedly at double his salary, and Nicholas said about 30 vacancies have remained unfilled at the agency because it can't find qualified people to take them.

While few are being attracted to government service, others are seizing every chance to leave it. OPM's statistics show that between July 1979 and June 1981 1,100 career executives elected to take optional retirement. Another 363 resigned outright, according to OPM.

NATIONAL HOMEOWNERSHIP BONDS

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. RUDD. Mr. Speaker, I am introducing today a revised bill for my bill H.R. 4704, which will make homeownership once again a real possibility for millions of Americans. At the same time, it will put hundreds of thou-

sands of construction workers back to work without costing the U.S. Treasury a penny in lost revenue. In fact, because of the new economic activity which will be created by this proposal, new tax dollars will flow into the Treasury.

My bill would authorize the issuance of partially tax-exempt national homeownership bonds paying a face yield of 10 percent. The money raised by these bonds would go to finance 12-percent mortgages.

The Reagan administration's plan will work and interest rates will come down. But my bill will provide a way of helping the depressed housing industry.

This bill will do the following:

EXPLANATION OF H.R. 4833

1. Answer the pent up demand for residential housing.
2. Put hundreds of thousands of construction workers now laid off back to work.
3. Provide a new source of mortgage funds to banks, savings and loans, and other traditional residential mortgage lending institutions.
4. Increase income tax yield to the Federal Treasury.
5. Increase the demand for building materials.
6. Create new demand for household appliances and household furnishings.

If implemented promptly this program will:

1. Provide new employment for at least one million people in the first year. These reemployed individuals and their collaterals probably represent at least two million voters.
2. Satisfy the needs and desires of at least 500,000, perhaps 600,000, families with new housing. This constituency with collaterals will exceed one million.
3. Help restore the savings and loan industry and the banks to a more healthy economic condition. This program will generate approximately 200 million in service fees and profits for the lending institutions.
4. Provide an opportunity for perhaps as many as five million small investors to earn a 14-percent net return on their savings guaranteed for five years.
5. Generate new revenue for the Treasury; or, under the best conditions, assuming a dramatic and desired drop in mortgage interest rates, create no net loss for the Treasury.
6. The benefits from the program will be felt in every corner of the Nation, every segment of society.
7. This program will satisfy the aspirations of from four to eight million voters.

STEP 1

Passage of H.R. 4833, as amended to permit banks, savings and loans, and other institutions, which have traditionally provided financing for residential construction or purchase of newly constructed residences, to issue National Home Ownership Bonds in denominations of $1,000 or any multiple of $1,000.

Term of authority—3 years (ending January 1, 1985). Term of bonds—5 years. Rate of interest to be paid investor by issuing authority—10 percent.

All funds from the sale of NHO Bonds must be loaned on mortgages to finance the construction of a new residence or the purchase of a hitherto unoccupied new residence.

Mortgages funded by this program are to carry an interest rate of 12 percent. Monthly mortgage payments are to be based on a 30-year amortization period of 12 percent (or for a shorter period, if preferred by the borrower). Initial term of the mortgage—5 years. At the end of the initial 5 year term, interest rate is to be renegotiated with no penalty to the borrower.

TAX FOREGOENCE

Tax exemption allowable to rate payer on interest received from NHO Bonds:

Percentage tax foregoence [1]

Marginal tax rate:	
29 percent or less	99.4
30 percent	98.0
31 percent	96.6
32 percent	95.2
33 percent	93.8
34 percent	92.4
35 percent	91.0
36 percent	89.6
37 percent	88.2
38 percent	86.8
39 percent	85.4
40 percent	84.0
41 percent	82.6
42 percent	81.2
43 percent	79.8
44 percent	78.4
45 percent	77.0
46 percent	75.6
47 percent	74.2
48 percent	72.8
49 percent	71.4
50 percent	70.0

[1] Average tax foregoence per year will be $2,424.50, or total of $12,122.50 on $100,000 NHO Bonds.

The purpose of the income tax foregoence is to provide the investor in NHO Bonds (no matter what his marginal tax rate) with an after tax return the equivalent of what would have been earned had the funds been placed at an annual return of 14 percent.

RATIONALE

Nationwide residential home construction is off more than 50 percent. Current mortgage interest rates in the neighborhood of 17 percent have effectively prevented hundreds of thousands of would-be home purchasers from qualifying for the requisite mortgage and being able to pay the interest rate demanded.

Hundreds of thousands of skilled construction workers have no jobs. An alarming number of residential construction contractors are being forced out of business; others into bankruptcy.

The suppliers of building materials of every description report sales off 40 to 50 percent.

Plants manufacturing home appliances—ranges, refrigerators, water heaters, dishwashers, etc.—are being closed or operating at greatly reduced capacity. The demand for domestic copper for wiring and plumbing has been dangerously diminished.

It is believed the availability of 12 percent mortgage money will bring about an immediate upturn in residential construction, with all the incalculable benefits such an upturn will produce.

A revival in home construction will mean jobs for construction workers at the job site; employment for labor producing building materials; new cargoes for freight carriers; reemployment for those factory workers in the appliance field who have been laid off. Paint and hardware manufacturers will benefit. The furniture and carpet industry will benefit. State and local taxing authorities will derive new revenue from the new values added to the tax rolls.

NO TAX LOSS TO THE FEDERAL TREASURY

The tax loss resulting from the foregoence of a portion of the tax on the interest returns from the 10 percent bonds is only an apparent loss.

On $100,000 of National Home Ownership Bonds

Average tax foregoence per year	$2,424.50
Total apparent loss over 5 years;	12,122.50

(Twenty-two classes of rate payers from the 29 percent to the 50 percent bracket will receive some measure of tax foregoence. The average tax foregoence, if an equal number of rate payers in every bracket were to participate, would be $2,424.50 per year for each $100,000 worth of bonds. Averages can be misleading. The minimum tax foregoence available to the rate payer in the 29 percent bracket is $2,840.00 per year. The minimum bracket is $2,000.00 per year.)

PREDICTABLE TAX GAINS

At least one-half of the cost of residential construction results in taxable income:

Wages paid to on-site and off-site labor;

Wages paid to workers in the materials field;

Commissions earned by real estate people;

New taxable income for title companies, insurance providers, and transporters of building materials.

All this income becomes taxable in the year of construction. Assuming a tax rate of 20 percent applied to this new revenue, and this figure is probably a minimum, the Treasury will collect immediately in taxes an additional $10,000.

Predictable maximum tax loss	$14,200.00
Predictable minimum tax loss	10,000.00
Average tax loss	12,122.50
Immediate tax gain	10,000.00
Remaining apparent tax loss	2,122.50

ADDITIONAL TAX BENEFITS TO THE TREASURY THE RESULT OF THE LOWER MORTGAGE INTEREST RATE

The borrower of $100,000 on a mortgage at 17.5 percent interest is permitted to deduct the total amount of interest paid from his gross income to arrive at his adjusted gross income or taxable income.

In the first five years of a $100,000 mortgage to be amortized over 30 years, the deductible interest component will be about $17,000 per year.

A similar borrower with a 12 percent interest rate will have a deductible interest component of about $12,000 per year for 5 years.

To qualify for a $100,000 mortgage at a 17.5 percent interest rate, applicants must have a gross disposable income of at least $60,000.

To qualify for the same $100,000 mortgage with a 12 percent interest rate, applicants must have a gross disposable income of approximately $46,000.

Both borrowers would be in a marginal tax rate well above 30 percent. Additional tax revenues resulting from this lower deductible interest taxed at 30 percent will result in an increase of tax collections by the Federal Treasury in the first 5 years of the mortgage of at least $7,500.

While the average cost of new homes in the U.S. might be close to $100,000, a great amount of new housing is available for less than $100,000.

The borrower who qualifies for a $60,000 mortgage at 12 percent interest must have at least $29,000 in disposable gross income.

NOTE.—Loan qualification requirements are included to support the assumption that home buyers under the act would be in at least a 30 percent marginal tax rate bracket.

Assuming that at least a 30 percent tax rate will be applied to the interest saving factor is conservative.

Lowering the interest rate from 17.5 to 12 percent will make qualification for mortgage loans much easier for a substantial segment of the population.

Average tax gain to the Treasury after the deduction of predictable tax losses from the foregoence	$5,377.50
Minimum predictable tax gain if all investors in NHO bonds were to receive the highest amount of tax foregoence	3,300.00
Maximum tax gain by Treasury if all investors in NHO bonds receive the minimum amount of tax foregoence	7,500.00

SIGNIFICANT BENEFITS ON RESALE HOME MARKET

Providing new funds from NHO Bonds for new construction will increase presently available funds for financing of resale homes.

MORE IMPORTANTLY

Present home owners, who must sell their present homes before moving into a new one, will be able to offer a purchaser of the old home a 12 percent interest rate on a portion or all of the financing necessary. If the new home can be financed at 12 percent, the owner of a present home (which he must sell before moving to a new one) will very probably be happy to accept 12 percent on a second mortgage since the interest he will receive will equal the interest he will have to pay.

THE MARKET FOR NEW HOUSING

In 1978, there were 2.1 million new housing starts. In 1981, there will be only 900,000—a deficit of more than 1.2 million units.

Each billion dollars of National Home Ownership Bonds sold will result in the construction of at least 10,000 new residences. (This is on the assumption that each new home mortgage will be issued for the maximum amount of $100,000, resulting in a total investment, including the owner's capital contribution, of $120,000.)

Since many of the purchasers of these new residences will buy units considerably under $120,000 in total value, 50 billion dollars worth of National Home Ownership Bonds could result in the construction of substantially more than 500,000 new homes.

Each 1,000 new residences under construction provided one full year of employment for:

Onsite workers	800
Offsite workers	900
Total new employment	1,700

Fifty billion dollars in NHO Bonds will provide financing for 500,000 new residences. Since many of these will sell for less than $100,000, it can be conservatively estimated the program will provide one million new jobs annually.

THE RIPPLE EFFECT

No attempt is made in this analysis to arrive at the ultimate economic stimulation resulting from the ripple effect: the increased market for home appliances, furnishings, carpets, drapes, landscaping; the benefits to the depressed copper industry.

A major benefit, only briefly mentioned, will be the increase in taxable valuations paying real property taxes to the city, county, state, and special districts.

SOME QUESTIONS

What happens to the lending institution, which has financed a 30-year mortgage at 12 percent from the proceeds of National Home Ownership Bonds, at the end of the five year life of the bond?

There is general agreement among the Nation's economists that interest rates must be brought down if we are to maintain anything comparable to our present life style. The goal of the Reagan Administration is to bring interest rates back down.

What if the interest rates come down dramatically before the end of the five year bond-supported period?

The borrower may be in a position of paying higher than normal interest rates for some portion of the time he has the money. The interest savings on the first 30 months of $12,500 will more than offset the excess interest he will be paying during the final 30 months even if interest rates come down to 8 percent.

The National Home Ownership Bond program will not result in a net loss to the Treasury. The program will produce an immediate (in the construction year) increase in revenue to the Treasury.

NOTE.—The prime interest rate has fallen 2 points since September 1, 1981. As the Administration's economic program commences to take effect, it is anticipated the prime rate will drop even further. Mortgage lenders who were caught with low interest fixed rate mortgages, and faced with a cost of money about double the interest rate, will be slow and cautious about reducing mortgage interest rates. However, even if the cost of mortgage money comes down dramatically and swiftly, an average differential over the five year life of the bond of 1½ percent; i.e., open market money mortgage rates over the five year period only 1½ percent higher than the 12 percent offered under NHO Bonds, the Treasury would still not suffer a tax loss from the tax foregoence.

$100,000 loan times 1.5 percent interest differential equals $1,500 more taxable income per year, or $450.00 in additional tax revenue per each of the five years	$2,250.00
Predictable apparent tax loss to Treasury	2,122.50
Net gain to Treasury over 5 year period if open market mortgage money drops dramatically in rate	127.50

The program will dramatically relieve unemployment in the construction trades and related fields. The program will satisfy the aspirations of more than half a million families needing and desiring new housing. The benefits from the program through the ripple effect will benefit the economy nationwide.

The administration costs will be minimal. Banks, savings and loans, and other lending institutions are regularly examined by Federal and state authorities. These examinations will automatically enforce the requirement that all funds generated from the sale of National Home Ownership Bonds be allocated to mortgage loans on new construction. The purchaser of National Home Ownership Bonds will claim his tax foregoence if filing a short form on a simple additional 1040 form as determined by his highest marginal tax bracket. This is not a problem in filing a long form.

WE NEED A COMPLETE OVERHAUL OF THE HAITI PROGRAM

(Mr. CORRADA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CORRADA. Mr. Speaker, I take this opportunity to urge the Congress and the Reagan administration to take prompt, forceful, adequate measures to relieve the desperate plight of our neighbors in the Republic of Haiti.

It is not enough to call, as the administration has called, for the prevention of illegal immigration into the United States. Haiti is the poorest country in the Western Hemisphere, the only Latin American country that is listed by the United Nations as 1 of the 30 least developed countries in the world. With a population of 5.5 million, it has a per capita GNP of $260. According to a 1978 World Bank report 75 percent of the people in Haiti live under conditions of absolute poverty; this means that the overwhelming majority cannot afford what is considered the minimum standard of consumption of food and nonfood items. People living under those conditions will make any effort, break any rule, overcome any barrier to seek escape on even a faint hope of a better life.

Nor is it enough to threaten no further increases in assistance to Haiti in the absence of satisfactory cooperation by the Haitian Government on human rights and other measures. The Government in Haiti may well be unmoved by such threats. The Haitian Government's cooperation in aid programs has at times resulted in slanting those programs to favor the country's elite or in siphoning AID funds into its own projects. The political obstacles to development in Haiti must be confronted; the economic plight of the refugees "is a political condition," as the U.S. district court in Florida noted last year in the case of *Haitian Refugee Center* v. *Civiletti*, 501 F. Supp. 442 (S.D. Fla. 1980); but it would be shortsighted and cruel to attack those political conditions by denying assistance to the 75 percent of the people whose pitiful poverty is at the root of their massive migration to our shores.

Nor, finally, is it enough merely to call on other countries to do more. Other countries are helping—Germany, Canada, France, Belgium, and the Netherlands. So are the International Development Association, the Inter-American Development Bank, and dozens of nongovernmental private organizations. Unfortunately, these many would-be benefactors not only fail to coordinate with each other but also compete with each other to hire away the few trained government officials available to follow through on projects.

What is required, as Congressman LONG of Maryland has long insisted, is a complete overhaul of the USAID program in Haiti. Although the Reagan administration's reduction of more than 30 percent in the proposed AID budget for Haiti runs counter to its own interests in reducing illegal immigration, it is difficult to argue for more when the funds previously appropriated have been spent—or misspent—with so little effect. We need a comprehensive and detailed development plan for the Haitian economy as a whole, emphasizing the direct delivery of assistance to the people of Haiti, avoiding transfers of funds to the Haitian Government, avoiding the traditional AID bias toward unnecessary capital expenditures when there are countless Haitians desperate to do the work for which AID purchases American machinery, and encouraging the more efficient and farsighted use of Haiti's scarce agricultural resources. The program needs more detail in the planning stages and less delay in execution.

The principal focus of this country's efforts must be the agricultural sector. That is the main weakness of the Haitian economy, and that is where 70 to 80 percent of the population attempts to eke out a living. Using the most rudimentary technology, productivity has steadily declined as the rapidly growing population divides and redivides ever more difficult, less fertile land, destroys the trees in search of the firewood and charcoal on which 97 percent of the people depend for cooking, and accelerates the process of deforestation and soil erosion.

Among the steps to be considered for action by the administration are the following:

First, reduce or remove barriers now restricting the export of Haitian agricultural products to this country, specifically the U.S. duty on imports of Haitian mangoes and the Haitian export duty on coffee.

Among all the less-developed countries entitled to the general system of preferences, only Haiti and Mexico are subject to U.S. duties on mangoes. The cultivation of fruit trees is ideally suited to Haitian ecology, available to the poorest farmer in most parts of the country and a major contribution to reforestation and the conservation of steep slopes. Removal of the duty would be an important step toward a more stable and self-sufficient agricultural sector in Haiti and for all those dependent upon it.

The Haitian Government's export duty on coffee is passed on to the nearly 400,000 farmers, most of them small landowners or sharecroppers, who produce Haiti's principal export. The combined effect of the export duty and high marketing fees leaves these producers with less than one-half the f.o.b. sales price. The export duty's removal as part of a new U.S. trade/aid package would increase their incentive to produce and their willingness to stay on the land.

Second, reduce the demand for firewood and charcoal by providing kerosene and other substitutes or subsidizing its price. This is the only way to reverse the disastrous trend toward deforestation which AID has tried in vain to stem. It has been estimated that, despite AID projects, the rate of deforestation now exceeds reforestation by a factor of 25. In 1976, AID was given $8 million for an integrated agricultural development loan project, designed in part to encourage reforestation; but by the end of 1980, only $1 million had been put to use, the program was scaled back to $3 million and the reforestation effort was cut back accordingly. Increases in the price of kerosene halted a trend toward its use among the poorer of Haiti, as a substitute for charcoal; and extended assistance to stabilize its price will be necessary to save Haiti's forests and soil and to help make its agricultural economy capable of supporting the rural population instead of exporting it.

Third, channel aid directly to the rural poor by employing them in infrastructure projects—roads, irrigation, and storage facilities—needed to improve farm productivity and income.

There is a great need in Haiti for roads, irrigation facilities, and other types of public works. This need presents a good opportunity for the development of a progam that channels aid directly and for the explicit purpose of the construction of these types of public works and for the employment of the rural poor. In this manner, not only would the infrastructure be put in place that would aid in the economic development of the country, but, at the same time, we would be providing desperately needed jobs that would allow Haitians to obtain useful skills and knowledge with which they can continue to improve their lives.

Conditions would need to be imposed to insure that the aid is being administered and channeled properly and that the assistance is being received by the intended beneficiaries.

Fourth, increase the U.S. Government's delivery of Public Law 480 food directly to Haiti's poorest families. In 1974, of 129 developing countries, Haiti was 127th in per capita daily caloric consumption, and 129th in protein consumption. A 1978 nutrition survey of children (age 3-5) revealed that nearly one out of six was acutely malnourished; nearly one out of five showed signs of stunted growth; and an even higher proportion was found to be anemic. A 1978 World Bank report compared findings with a 1958 study and found malnutrition getting worse, leading irreversibly to mental retardation. Yet U.S. Public Law 480 aid to Haiti on a per capita basis lags behind that given to such countries as Bolivia, Guyana, Jamaica, Nicaragua, and the Dominican Republic. Increasing the amount of aid, however, is not enough, in view of substantial evidence that much of it in the past has been channeled into the private market for the benefit of government officials or else pilfered by these officials for their own consumption. Less aid should go in the form of government-to-government loans under title I and more aid should go in the form of title II relief, with stricter controls on distribution as well as a higher protein content. In addition, recipients—particularly mothers of the very young—should be instructed by relief workers and pamphlets on the importance and methods of nutrition, in order to discourage the recipients from selling their food parcels on the open market or bartering them away for other goods they cannot afford. That only discourages the local farm production that must be increased. Food assistance has its drawbacks and cannot be a long-term solution. But in the short run we cannot turn our backs on stunted and wasting children.

Along with these efforts must come technical assistance—advice on land use, marketing and modern production methods. There must be more coordination and more followthrough. But, above all, there must be a determined effort by the Government and people of the United States that we will not turn our backs on the hunger, hopelessness and inhuman economic conditions now driving the people of Haiti toward desperate measures, of which the recent immigration wave may be only the beginning.

U.N. HIGH COMMISSIONER FOR REFUGEES AWARDED NOBEL PRIZE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. OBERSTAR) is recognized for 60 minutes.

Mr. OBERSTAR. Mr. Speaker, refugees by the very fact of being refugees become people without a country: men, women, and children without the protection of citizenship or nationality.

They become citizens of the world, dependent on the protection of the world community. Unfortunately, the world has not always responded to the claims of humanity in offering protection or in dealing with the enormous logistical and political problems of people who have been forced to flee their homelands.

The governments of the world have entrusted a great responsibility to the Office of the United Nations High Commissioner for Refugees—to a certain degree, giving that office a job that the governments themselves did

not want and one which no government alone could handle.

On October 14, the Nobel Peace Prize Committee announced that, for the second time in history, the Office of the Commissioner has been awarded the prize, according to the terms of Alfred Nobel's will, for "the best work for fraternity between nations."

The Nobel Prize is perhaps the only appropriate recognition for a group that bears monumental humanitarian responsibility for feeding, clothing, housing, and resettling the world's refugees who number between 14 million and 18 million men, women, and children.

The High Commissioner has a staff of 1,700 and an annual budget of $500 million. The United States contributes $123.5 million of that amount; ours is the largest single contribution, an indication more of the modesty of worldwide support for refugee needs than of the generosity of our contribution.

The United Nations General Assembly established the Refugee Office 30 years ago to provide assistance to the victims of war. In the subsequent three decades, the office undertook to provide for the basic needs of the million Bengalis who fled what is now Bangladesh during the war between Pakistan and India.

The High Commissioner has assisted refugees who fled from Zimbabwe during the civil war, refugees from Cambodia, Ethiopia, and now the approximately 1.4 million Afghans who fled following the Soviet invasion of Afghanistan.

The UNHCR has two major responsibilities—international protection of the refugees and the promotion of solutions to the plight of the refugees.

UNHCR goal is to empty refugee camps—to enable refugees either to return to their homeland, or to establish themselves in a new land.

The world's refugees live in conditions that make peace for them impossible. Moreover, their status as homeless citizens and their poverty are conditions which have an additional effect of destabilizing the countries and regions to which they have fled. To alleviate their problems, to stabilize their lives is to increase the climate for peace in the world.

As a Member of this House, I join with a grateful world in commending the UNHCR and in congratulating the Nobel Prize Committee on its excellent selection.

I ask unanimous consent that an article from the New York Times of October 15, 1981, reporting on the work of the UNHCR be included at this point in the RECORD:

[From the New York Times, Thursday, Oct. 15, 1981]

WORLDWIDE WORK OF U.N. AGENCY SEEMS ENDLESS

(By Bernard D. Nossiter)

UNITED NATIONS, N.Y., October 14.—Each day dozens of weary women, children and men file across the Ethiopian border, walking 40 miles to a southeast corner of the Sudan in search of food, water, medicine and tents at a camp run by the United Nations High Commissioner for Refugees.

In northwest Tanzania, 25,000 Hutus, who years ago fled from their Tutsi rivals in Burundi, have settled down in sturdy, mud-baked homes. They grow enough tobacco, corn and peas to feed themselves, finance a cooperative bus and discothèque and enjoy transistor radios. They are on their way to citizenship in underpopulated Tanzania, thanks to aid they no longer need from the United Nations agency.

For 30 years the Office of the High Commissioner, which was awarded the 1981 Nobel Peace Prize today, has been providing for the victims of war. The organization operates from Geneva with a staff of 1,000, which is small by United Nations standards. About two thirds of them work in the dismal corners of the globe where refugees huddle.

Unlike most bureaucracies, the High Commissioner, which is both the name of the agency and the title of its chief, tries to shrink its constituency. Success is measured by the number of those returned home or permanently resettled in a new land. Its goal is precisely opposite from that of the United Nations Relief and Works Agency for Palestine Refugees, the body responsible for Palestinian Arabs that is directed to keep its camps filled.

ITS MOST AWESOME TASK

The High Commissioner's most awesome task was providing for the nine million Bengalis who in 1971 fled what is now Bangladesh to escape the clash between Pakistan and India. With India's victory and the independence of Bangladesh, the Bengalis went back home a year later.

Last year the agency celebrated the arrival of a train carrying 1,200 school-girls to Bulwayo, Zimbabwe. They were the last of 250,000 returning Zimbabweans who had fled to Mozambique, Botswana and Zaire until black guerrillas could wrest independence from the white minority rulers of what had been Rhodesia.

But the agency, which first won the Peace Prize in 1954, never runs out of fresh clients. The turmoil in Africa in Africa and Asia in particular has currently created about 10 million refugees.

The Commissioner is not supposed to look after victims of natural disaster, flood, earthquake or famine. In fact, the distinction is often difficult to make and many of the hundreds of thousands of Ethiopian refugees, for example, have left their country because they cannot find a living. Indeed, the chief criticism of the agency is that it has been drawn into providing machines, roads, tools and other items that enable the homeless to settle down into a new life.

A SHREWD, PATERNAL DANE

Since 1978 the agency has been run by a shrewd, paternal Danish politician, Poul Hartling. A former teacher in a Congregatinal seminary, Mr. Hartling for years led Denmark's middle-of-the-road Liberal Party. He was Prime Minister from 1973 to 1975.

His political talents are useful. To care for refugees from Cambodia, he must stay on equable terms with both Thailand and the Communist regime installed in Phnom Penh by Vietnam. Mr. Hartling has been successful enough so that 310,000 Cambodians could return home last year.

The High Commissioner is equally astute at rallying other agencies to share his burden. The World Food Program is enlisted everywhere, and notably in Somalia, to supply cereals, dried milk and other necessities to the 1.2 million refugees, mostly from Ethiopia, who swamp that arid and impoverished nation. The United Nations Children's Fund insures safe water in Cameroon for those fleeing Chad's civil war.

No fewer than 200 private agencies also help out, supplying doctors, blankets, stoves and more. Among the more pervasive are Oxfam, Care, Caritas, Catholic Relief Services and Medicin Sans Frontières of France.

1.4 MILLION AFGHANS EMBROILED

The latest and largest disaster has caught up 1.4 million Afghans escaping Soviet troops attempting to suppress insurgents fighting a Moscow-backed regime. The refugees are camped in Pakistan, another poor nation that cannot afford the burden but nevertheless makes cash grants to each newcomer. The High Commissioner finds tents and tarpaulins, tea and sugar, blankets and clothing to make life bearable for the refugees.

Like so much at the United Nations, the High Commissioner owes its origins to an agency created by the League of Nations after World War I. Fridtjof Nansen, the Norwegian explorer, was in charge, largely caring for 1.5 million Russians fleeing from the revolution and civil war.

After World War II, international efforts concentrated on settling the millions driven across Europe's borders. The millions forced out of newly independent Pakistan and India were largely ignored. But 125,000 European refugees remained to attract attention and they were the reason that the United Nations agency was established.

Europe soon provided a new group of clients, 170,000 Hungarians who fled in 1956 after Soviet tanks crushed an uprising.

ADDITIONS TO THE CASELOAD

Today, nearly every political disturbance adds to the High Commissioner's caseload. Violence between left and right in El Salvador has created another 80,000 refugees in Latin America.

And since the end of the war in Vietnam, hundreds of thousands have been driven from or have fled Indochina, presenting the agency with a new problem. Thai and Malay pirates regularly prey on the boatloads of hapless refugees, raping, robbing and murdering. Last year it was estimated that 2,000 a month were subjected to the ordeal, sometimes twice on the same trip.

The agency regards itself as responsible for refugees' safety, but neither the Thai nor Malaysian Governments responded to its appeals for protection.

With considerable delicacy and a touch of irony, the High Commissioner donated a patrol boat to the Thai Navy, a strong hint that it might do better.

The High Commissioner does not enjoy a large budget. Last year he spent $500 million and expects the total to fall in 1981. The United States made the biggest contribution, $123.5 million, followed by Japan at $64.5 million, West Germany at $19.8 million, Sweden at $19.2 million and Britain at $17.8 million.

The Soviet Union contributes nothing, and neither do its East European allies. Moscow believes that refugees are a "colonialist" legacy and, by definition, the Soviet Union is not colonialist.

● Mr. BONKER. Mr. Speaker, I wish to commend my distinguished colleague, Representative OBERSTAR, for sponsoring a special order to pay tribute to the Office of the United Nations High Commissioner for Refugees on being awarded the 1981 Nobel Peace Prize.

This great honor comes as the UNHCR celebrates its 30th anniversary—three decades of providing humanitarian assistance to refugees and persons displaced by armed conflict around the world. All of us appreciate the important work UNHCR has done and continues to perform on behalf of the Indochinese refugees, refugees throughout Africa, particularly in the Horn, in Central America, and those fleeing Afghanistan. With one of the smallest staffs of any U.N. organization, UNHCR has been extremely effective in responding swiftly to refugee crises wherever they occur.

As a member of the Foreign Affairs Committee and chairman of one of the subcommittees that oversees our participation in UNHCR, I have seen its operations firsthand and continue to be impressed by the competence of the staff and effectiveness of UNHCR's work.

I am pleased to join with my colleagues in adding my tribute to the 1981 recipient of the Nobel Peace Prize.●

● Mr. LEACH of Iowa. Mr. Speaker, I am pleased to join my colleagues in the House in paying a special, well-deserved tribute to the United Nations High Commissioner for Refugees (UNHCR), the recipient of this year's Nobel Peace Prize.

As the ranking minority member of the Subcommittee on Human Rights and International Organizations of the House Foreign Affairs Committee, which shares in the jurisdiction the committee exercises over U.S. participation in the UNHCR programs, I have had the recent privilege to meet with the U.N. High Commissioner for Refugees, the Honorable Poul Hartling, former Prime Minister of Denmark.

The Office which he heads has been charged by the United Nations, over the past three decades, with providing international protection for refugees and for assisting their repatriation or resettlement. While seeking initially to provide immediate, emergency care for refugees, the agency has also sought to find more permanent solutions. Over the past several years, we have seen heavy refugee flows in the Indochina region, into Pakistan from Afghanistan, in Africa, and, within this hemisphere, in Central America. The United States has always shared the humanitarian objectives and concerns of the UNHCR and is pleased to be in partnership with it in seeking to provide emergency relief to the boat people of Indochina, the destitute refugees in the Horn of Africa, the Afghan refugees fleeing from Soviet aggression into Pakistan, and refugees in many other parts of the world.

In March of this year, a committee staff study mission to refugee areas reported back that the increasingly frequent refugee exoduses since 1977, amounting to three or four new exoduses a year in some cases, have transformed the UNHCR from a small-scale to a monumental enterprise. Because of the tremendous volume of refugees, the capacity of the UNHCR to address the humanitarian problems of these vulnerable people has been taxed to its limits. As problems have arisen in connection with these large and unpredictable refugee flows, UNHCR has attempted to find new ways of coordinating prompt and adequate international responses to immediate refugee needs.

The UNHCR has also contributed significantly to the development of international refugee law by assisting governments with the preparation of a variety of international legal instruments dealing with the status and treatment of refugees. It has promoted amnesty policies to assure the safe repatriation of certain refugees to their home countries, particularly in Africa. In Asia the UNHCR has also encouraged governments to grant refugees asylum, prevent piracy, rape and murder on the high seas and promote family reunification.

The United States has generally contributed over one-fourth of UNHCR's annual budget, far more than any other single U.N. donor contributes. This important contribution by the United States to the ongoing, vital humanitarian function which this international agency serves is a sound investment in the welfare of all mankind and in a future of peace and freedom from suffering and persecution.

Mr. Speaker, I want to join the many tributes being raised today to the UNHCR and to urge the Members of this body to add substance to those tributes by continuing to offer strong support to the programs that Office implements in the pursuit of its important mission of compassion.

Thank you.●

● Mr. BINGHAM. Mr. Speaker, I am pleased to take part in this special order recognizing the award of the 1981 Nobel Peace Prize to the Office of the United Nations High Commissioner for Refugees. The work of this United Nations organization in situations fraught with political and diplomatic problems all over the world deserves this tribute.

This is the second time the UNHCR has been so honored. In 1954, following its ground-breaking work in resettling European refugees from the horrors of the Second World War, it received its first Nobel Prize. Since then, it has widened its scope to include the whole world and the growing emergency situations which have regrettably created thousands of new refugees, helpless men, women and children who have been forced to flee their homes through no fault of their own. Their work in Southeast Asia, in Africa, in Bangladesh and in the unfortunately many other areas where political conflict and natural disaster have created new victims, has been quiet but valiant.

They have often worked behind the scenes, without headlines and without fanfare—because this has been the only way they can achieve their goals. They have had to deal with Government officials, with political dissidents, with guerrillas—at great peril sometimes to their personnel in the field. They have operated without regard to the politics, race, religion, or nationality of those they have sought to help.

The UNHCR deserves our appreciation and this award. It is one of too few examples these days of international programs that succeed in alleviating human suffering. With a small professional staff and great devotion, the work of the High Commissioner's Office is carried out month after month. Mr. Poul Hartling, the High Commissioner, and his staff are to be congratulated for their accomplishments.

I would like to place in the RECORD at this point, an article that appeared in the New York Times on the occasion of the award:

[From the New York Times, October 15, 1981]

WORLDWIDE WORK OF U.N. AGENCY SEEMS ENDLESS

(By Bernard D. Nossiter)

UNITED NATIONS, N.Y., October 14.—Each day dozens of weary women, children and men file across the Ethiopian border, walking 40 miles to a southeast corner of the Sudan in search of food, water, medicine and tents at a camp run by the United Nations High Commissioner for Refugees.

The Soviet Union contributes nothing, and neither do its East European allies. Moscow believes that refugees are a "colonialist" legacy and, by definition, the Soviet Union is not colonialist.●

● Mr. DERWINSKI. Mr. Speaker, I join my distinguished colleagues in saluting the United Nations High Commissioner for Refugees (UNHCR) on the occasion of its having been awarded the Nobel Peace Prize. It is an award richly deserved; the Commissioner's work on refugees has established an outstanding record in dealing with the massive problems of huge numbers of refugees in diverse parts of the world.

Somalia, Sudan, Zaire, Indochina, Pakistan, Central America. In all of these areas, the UNHCR provides relief, protection and resettlement for hundreds of thousands. Its objectives are to reduce immediate short-term suffering, to restore self-sufficiency and to provide vital protection, especially to those seeking asylum. It works with governments and private voluntary agencies to accomplish its goals.

It must be noted that in too many instances UNHCR must attempt to cope with populations victimized by atrocities—Communist wars and aggressions—promoted by the Soviets, such as those in Somalia, El Salvador, Afghanistan, and Indochina.

By its commendable results against terrible odds, UNHCR has earned the respect and gratitude of the world. I join in recognizing and aclaiming its accomplishments.●

● Mr. FISH. Mr. Speaker, it is a great privilege for me to pay tribute to the office of the United Nations High Commissioner for Refugees (UNHCR), the recipient of the 1981 Nobel Peace Prize laureate, an honor awarded the office for an unprecedented second time. This deserved recognition is an inspiration to all involved in refugee work.

Founded 30 years ago, the UNHCR is the chief source of reassurance and assistance to over 13 million refugees throughout the world. Its two main functions are international protection of refugees and the promotion of durable solutions to their plight, with material assistance available for such activities.

It has been my privilege as ranking member of the Immigration, Refugee, and International Law Subcommittee to know the High Commissioner and to have met the able and dedicated members of his staff working with refugees throughout the world.

Amid global economic uncertainties, the UNHCR continues to extend unlimited humanitarian assistance to the mounting numbers of homeless men, women, and children. Serving his third year of a 5-year term, High Commissioner Poul Hartling put it quite nicely:

> The hospitality offered by one human being to another, by one family to another, is the vital foundation of the fragile edifice of international solidarity with the uprooted. The ultimate goal of this solidarity is to give refugees a new hope, a new existence, and above all, a new dignity. When human dignity is violated, refugees are created; when refugees are helped, human dignity is restored.

As long as this world continues to produce wars, social strife, or persecution for reasons of race, religion, nationality, membership of a particular social group, or particular social group, or political opinion, it is indeed certain that the UNHCR will be needed in the assistance of uprooted persons for many, many years to come.●

GENERAL LEAVE

Mr. OBERSTAR. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

□ 1910

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. GILMAN) is recognized for 5 minutes.

Mr. GILMAN. Mr. Speaker, yesterday, October 21, 1981, I addressed the Special Political Committee of the United Nations on the so-called New World Information Order on behalf of the U.S. delegation to the U.N. General Assembly and was therefore unable to be present for three rollcalls.

On rollcall No. 270, the question of whether the House would resolve itself into the Committee of the Whole House on the State of the Union for the consideration of H.R. 3602, the 1981 farm bill, I would have voted "yea." That question passed by a vote of 386 to 2.

On rollcall No. 271, the Shamansky amendment to repeal the tobacco price-support program, I would have voted "aye." This amendment was rejected by a vote of 184 to 231.

On rollcall No. 272, the Findley amendment, as amended by the Foley substitute, to express the intent of Congress that the tobacco price-support program should be run without cost to the taxpayer, I would have voted "aye." This amendment passed by a vote of 412 to 0.●

H.R. 4255—NUCLEAR REGULATORY COMMISSION AUTHORIZATIONS FOR FISCAL 1982 AND 1983

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. BROYHILL) is recognized for 15 minutes.

Mr. BROYHILL. Mr. Speaker, I am pleased to join with my chairman, Mr. DINGELL, and my colleagues, Mr. UDALL, Mr. LUJAN, Mr. OTTINGER, and Mr. MOORHEAD, in bringing this important bill to the floor.

NRC BILL IS PROCONSUMER AND ANTI-INFLATION

The nuclear licensing reforms adopted in this bill are decidedly proconsumer and anti-inflation. These regulatory reforms would speed the licensing of nuclear powerplants over the next 2 years, while maintaining full safety and environmental protection.

At a time when consumers face soaring electric bills across the land, these reforms will help avoid over $1 billion in higher electric rates and consumer costs due to Nuclear Regulatory Commission delays in licensing nuclear plants. In addition, the Department of Energy estimates these reforms will help reduce U.S. oil consumption by over 20,000 barrels per day equivalent.

This bill provides the Nuclear Regulatory Commission with temporary authority to reduce its backlog of licensing cases over the next 2 years. This backlog, if not addressed, could delay up to 11 plants scheduled to be completed in 1982 and 1983. However, this bill explicity maintains all existing safety and environmental requirements, and NRC's temporary authority would expire at the end of fiscal 1983.

Although I would have liked to have seen stronger and more comprehensive reforms of the NRC licensing logjam, I believe the bipartisan, moderate compromise adopted by the committees represents a long-overdue, commonsense step toward solving the short-term licensing problems at the NRC. According to the already financially strapped utility industry, if these problems are not solved, 11 powerplants will sit idle a collective total of 63 months over the next 2 years at a cost to consumers of tens of millions of dollars per day in higher costs of replacement power and carrying charges. In addition, 57 other plants scheduled to be completed by 1985 may also be caught in "pancaking" regulatory delays that make the current costs of delay look like spare change.

NRC BILL CONTAINS BIPARTISAN COMPROMISE LICENSING REFORMS

This important bill represents a broad, bipartisan compromise reached by the leadership of both authorizing committees. This compromise embodies much of the substance of the bipartisan amendments sponsored by Mr. DINGELL, Mr. OTTINGER, Mr. MOORHEAD, and myself in the Commerce Committee, and adopted by nearly two-thirds majority in that committee last June.

It is important to note, after our committee completed action on the bill, Mr. UDALL and Mr. LUJAN, representing the Interior Committee, suggested, and we included, further compromise language very similar to amendments which had been defeated in our committee. For example, we include in this bill language on State consultation similar to that offered by Mr. MOFFETT. We also include language on two-step interim licensing similar to that supported by Mr. SYNAR and Mr. MARKEY.

In short, our bill is really a "compromise on top of a compromise." It is a tribute to the leadership of Mr. DINGELL, Mr. UDALL, and Mr. LUJAN as well as Mr. OTTINGER and Mr. MOORHEAD, as chairmen and ranking member, respectively, of the relevant subcommittee, that the moderate reforms in this bill enjoy such broad, bipartisan support.

I also commend Mr. BEVILL and Mr. MYERS of the Energy and Water Development Appropriations Subcommittee for focusing attention on the desperate need for licensing reforms at the NRC.

NEED FOR LICENSING REFORMS

Anyone who examines the current extreme financial distress of our Nation's electric utilities knows the need for both long-term and short-term utility regulatory reforms. In the early 1970's, with construction inflation running at 3 percent annually and electricity demand increasing at over 6 percent a year, a 6- to 8-year leadtime to build a new nuclear or coal-fired powerplant seemed manageable and prudent. Utility planners ordered nuclear plants because their operating costs are low and they do not pollute the air.

But today the climate for electric utilities is radically different. It now takes 12 to 14 years to license a nuclear powerplant, and not much faster to build a coal-fired unit. With construction costs escalating over 20 percent annually and regulatory lag making it impossible to compete for scarce capital, electric utilities are being pushed to the brink of bankruptcy—not only to keep up with projected growth, but also to merely replace old oil- or gas-fired units with new nuclear or coal-fired plants.

When the French and Japanese can license a nuclear powerplant in less than 7 years, and it takes us 12 to 14 years, something is terribly wrong with our regulatory process. The problem is not technological, it is political. This is why we need long-term licensing reforms.

But we also need short-term licensing reforms. For nearly 18 months prior to August 1980, the NRC imposed a "pause" on issuing operating licenses while it upgraded its safety requirements for existing and new reactors. In extensive hearings before both the Commerce Committee and the Energy and Water Development Appropriations Subcommittee, chaired by Mr. BEVILL, the NRC has reported since resuming licensing that it is experiencing a serious backlog in issuing operating licenses to powerplants when construction has been completed and the plants are needed to furnish electricity to consumers.

Although the NRC has reassigned some staff to licensing proceedings and has improved the licensing process somewhat, the magnitude of the backlog cannot be reduced without legislative action. For example, during 1982 alone, 17 powerplants will be ready to begin operation. To date, in 1981, NRC has issued only four operating licenses, and never in its existence has it issued more than six operating licenses a year. Industry currently estimates at least 11 plants will be delayed a collective total of 63 months by the

end of 1983, unless temporary licensing reforms are adopted.

For these reasons, last March, the NRC requested legislative authority to issue temporary operating licenses to powerplants where all environmental and safety reviews have been completed except for the final discretionary public hearing.

The temporary licensing reforms contained in this bill are the response to the NRC's request. I should point out that NRC's temporary authority is strictly limited under this bill, need not be used unless necessary, and expires September 30, 1983.

These reforms are only an interim step and I expect this Congress, the new administration, industry, and the public to address the need for comprehensive nuclear licensing reforms.

There is broad support for the compromise reforms contained in this legislation, ranging from the administration, the Edison Electric Institute and the American Nuclear Energy Council to the U.S. Chamber of Commerce and even several environmental groups, such as the Environmental Policy Center, who prefer this compromise to the amendments first adopted in the Commerce Committee.

If the American economy is going to turn around and expand once again, we are going to have to expand our energy mix with every domestic source available to fuel that economy—production as well as conservation. And if nuclear is to remain an option in that energy mix, as the American people in national opinion polls tell us it should, then we must incorporate balance into the regulatory process.

When the full House votes on this compromise bill, we know of two groups who will be watching us very carefully—the American consumers who pay high electric bills, and the OPEC suppliers who count their profits from those bills in the billions of dollars.

I urge adoption of the bipartisan compromise Nuclear Regulatory Commission bill, and I include a factsheet on the licensing reforms contained in the bill in the RECORD at this point as if read:

FACTSHEET: NUCLEAR REGULATORY COMMISSION AUTHORIZATIONS FOR FISCAL YEAR 1982, 1983—H.R. 4255

SPONSORS

Mr. Udall, Mr. Lujan, Mr. Dingell, Mr. Broyhill.

ENDORSEMENTS

Administration, Edison Electric Institute, American Nuclear Energy Council, and U.S. Chamber of Commerce.

AUTHORIZATION LEVELS (SECTION 1)

Fiscal year 1982: $485.9 million; fiscal year 1983: $513 million (3 percent below Administration request).

TEMPORARY OPERATION AUTHORITY FOR NEW POWERPLANTS (SECTION 12)

The NRC is authorized (but not required) to issue temporary operating licenses to delayed plants only where environmental and safety reviews have been completed, such as the Staff Safety Evaluation Report, Environmental Impact Statement, and Advisory Committee on Reactor Safeguards Report.

The temporary operating license may be issued in advance of the final operating license hearing, but not prior to completion of public participation on the Environmental Impact Statement. Under the Atomic Energy Act, the final operating license hearing is discretionary in uncontested cases and public hearings are held at the construction permit stage.

The temporary operating license must initially limit operation to fuel loading or 5 percent power levels, but may authorize step-by-step progression to higher power levels upon request to the Commission on a case-by-case basis, as under current procedures for final operating licenses.

Temporary operating licenses would be subject to such limits, durations, and conditions as NRC may impose.

NRC's temporary authority to issue such licenses expires September 30, 1983.

Eleven plants may request temporary operating licenses in order to avoid 63 months of delay and over $1 billion in higher replacement power costs to consumers by the end of 1983, according to utility estimates. Another 57 plants scheduled to be completed by the mid-1980's may be caught in NRC's "pancaked" licensing logjam unless the temporary licensing authority is granted.

ROUTINE NON-SAFETY-RELATED LICENSE AMENDMENTS FOR EXISTING POWERPLANTS (SECTION 11)

NRC is authorized to issue routine, non-safety-related license amendments to existing powerplants without public hearings, if States are notified and consulted with prior to the license amendments and if the amendments are periodically published in the Federal Register.

As unanimously recommended by the Commission, this would modify a court-ordered requirement that NRC hold public hearings on every non-safety-related license amendment, even though NRC issues over 500 such routine, technical amendments a year and even though the court requirment could require the costly shutdowns of powerplants every time a routine license amendment were proposed.

Without Section 11 in this bill, 78 existing powerplants in 36 States could be forced to shut down every time a non-safety-related license amendment is requested, and power system reliability nationwide would be seriously jeopardized.

FUTURE LICENSING REFORM STUDY (SECTION 13)

NRC is required to perform a comprehensive study on improvements to the licensing process. In addition, an independent advisory panel, representing the public, industry, and the States, is established to study the licensing process and recommend reforms. Both NRC and the independent advisory panel would be required to report to Congress six months after enactment of the bill.

EMERGENCY PLANNING (SECTION 8)

NRC is authorized to review and approve emergency evaluation plans developed by States, local governments and utilities for powerplants, where the Federal Emergency Management Agency cannot review them in a timely fashion. This section simply confirms and repeats existing law.

THREE MILE ISLAND CLEAN-UP (SECTION 10)

NRC and DOE are required to promptly enter into an interagency agreement on overseeing the TMI clean-up. No funds are authorized to be appropriated to finance the clean-up.

NATIONAL SAFETY GOAL

NRC is required to establish and hold hearings by December 31, 1981, on a national safety goal by which to measure the safety and cost-effectiveness of its regulations.●

ALEXANDER PARITSKY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. CONTE) is recognized for 5 minutes.

● Mr. CONTE. Mr. Speaker, many of my colleagues are aware of my personal involvement with Alexander and Paulina Paritsky and their two daughters, Dorina and Anna, who are one of the two Jewish families in Kharkov, the Soviet Union. Since the Paritsky family applied for exit visas in 1976, Alexander has been fired from his job at the Kharkov Institute of Metrology, and in August of this year was arrested for "anti-Soviet agitation and propaganda." He currently is awaiting trial.

Today, I learned that last week Soviet authorities threatened to take the two daughters from Mrs. Paritsky and approached 14-year-old Dorina at school demanding that she denounce her father.

Mr. Speaker, these are despicable acts. I wish to submit for the record a copy of a letter I sent today to Ambassador Dobrynin expressing my sense of outrage at this new low in Soviet harassment activities and making a personal appeal on behalf of the Paritsky family.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., October 22, 1981.

Ambassador ANATOLY DOBRYNIN,
Embassy of the U.S.S.R.,
Washington, D.C.

DEAR MR. AMBASSADOR: I wrote to you on September 22, 1981 requesting an investigation of the case of Alexander Paritsky of Kharkov, who has long sought an exit visa to emigrate and was arrested on August 28. I look forward to your reply.

However, I now learn that Soviet authorities have threatened to remove the two Paritsky daughters from the family. If true, I view these threats as cruel and unconscionable.

I am becoming increasingly distressed by the continual harassment of Alexander Paritsky and his family. Mr. Paritsky is a friend of mine with whom I have communicated for several years. I am making a personal appeal to you, as the Soviet Union's Ambassador to the United States, to urge your authorities to release Alexander Paritsky from prison, to provide the Paritsky family with exit visas as they have requested and to

cease further harsh punishment of the Paritsky family.

Sincerely,

SILVIO O. CONTE,
Member of Congress.

CHRISTIAN ETHICS AND PUBLIC POLICY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANNEMEYER) is recognized for 20 minutes.

Mr. DANNEMEYER. Mr. Speaker, in the recent months there has been some serious discussion and much shrill and sadly misinformed rhetoric on the question of the application of Christian ethics to public policy. The moral majority has been the most readily available target. For some, it has been shocking to be confronted with large, organized groups of Christians who lobby for or against certain political positions. In a sense, there is good reason for this reaction because for nearly a century, large groups within the Orthodox Christian Church have been virtually trapped in a type of pietism that often excluded public involvement. Our society has traditionally reveled in democratic action. Why are we not rejoicing now that these people have finally come out of their cultural cloister? Frankly, I believe the debate is healthy for our Nation. I must say, I have seen the resurgence of a viewpoint calling for strong foundations in ethics as a sign of hope in a culture that seems to have forgotten its roots.

The framers of the Constitution were very interested in keeping the Federal Government out of the business of the church, but they expected the church and its members to have influence in the development of this Nation's policies. The Founding Fathers did not write into the Constitution the concept of absolute separation of the church from the state. Although not all of the men who participated in the Continental Congress or who wrote the Constitution were practicing Christians, they lived under the framework of Christian principles and revered Christianity as a necessary undergirding for social structure. Benjamin Franklin, a reknowned religious skeptic of his time, could make the following comment during the Constitutional Convention of 1787:

> We have not hitherto once thought of humbly applying to the Father of Lights to illuminate our understanding. In the beginning of the contest with Great Britain, when we were sensible to danger, we had daily prayers in this room for divine protection.
>
> Our prayers, sir, were heard, and they were graciously answered * * * do we imagine that we no longer need his assistance? I have lived, sir, a long time, and the longer I live, the more convincing proofs I see of this truth—that God governs the affairs of men.
>
> And if a sparrow cannot fall to the ground without his notice, is it probable an empire can rise without his aid? We have been assured, sir, in the sacred writings that except the Lord build a house, they labor in vain that build it * * *. I firmly believe this.

And John Adams made the following comment:

> Statesmen may plan and speculate liberty, but it is religion and morality alone upon which freedom can securely stand. A patriot must be a religious man.

The very concept of our representative form of government, the checks and balances system, and the doctrine of enumerated powers, was founded upon the Christian belief that man is fallible and prone to wrong doing. So, in order to insure that no one man or group could attain and misuse excessive power, the Federal Government was limited.

The Constitution is not, nor was it intended to be, a religious creed, but Christian theism so permeated the minds of those who wrote it, that the principles within it are "indubitably Christian," as English historian and renowned skeptic, H. G. Wells put it.

The first amendment states that, "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof." It appears that it was not the intention of the framers to keep Christian influence out of the state, but it was rather their intention to prohibit the Federal Government from setting up a national church.

Thomas Jefferson, no lover of the church, said in his second inaugural address that, "Religion is independent of the powers of the General Government * * * and that religious exercises should be left as the Constitution found them, under the direction and discipline of the church or State authorities." In his book, "American Constitutional History," Edward S. Corwin interpreted Jefferson's statement in the following way; "In short, the principal importance of the amendment lay in the separation which it effected between the respective jurisdictions of state and nation regarding religion, rather than in its bearing on the question of separation of church and state." Thus, the purpose of the first amendment was to keep the Federal Government out of religion. It provides freedom for religion rather than the modern interpretation of absolute freedom from religion, which I believe is logically impossible. The Founding Fathers lived in a time when the intellectuals readily admitted that the Christian religion, with its roots deeply entrenched in Judaism, served as the source for many aspects of 18th century criminal law, tort liability, the role of voluntary agencies and charities, the concepts of just defense of nations, and the definitions of basic human dignity and human rights. At the time of the ratification of the first amendment in 1791, many of the States presumed that members of the churches, with Christianity's wealth of ethics and tradition of involvement in policy formation, would work intimately with governing bodies both local and State.

As Alexis de Tocqueville noted, "America is still the place where the Christian religion has kept the greatest real power over men's souls; and nothing better demonstrates how useful and natural it is to man, since the country where it now has the widest sway is both enlightened and the freest." He further commented on those attacking Christian influence in America—

> Unbelievers in Europe attack Christians more as political than as religious enemies; they hate the faith as the opinion of a party much more than as a mistaken belief, and they reject the clergy less because they are the representatives of God than because they are the friends of authority.

Modern America has, in many ways, taken up that banner that de Tocqueville found not only inappropriate but lacking in credibility. It has concluded that the state must be neutral, and so Christianity has become a political threat to a state that has put itself in the place of God.

The battle cry of those opposed to the moral majority and groups like it is, "How dare they dictate their moral convictions to all Americans!" But, my question is, If we do not base our legal and political decisions upon Christian morals, then upon what morals do we base them?

Man is ultimately religious in nature which simply means that every man, whether he recognizes it or not, lives by a code of ethics in his personal life and that code must necessarily affect society in general. The belief in man's adequacy to rule his own affairs, which is secular humanism in a nutshell, is a pervasive world view today and has vast influence on public policy formation in the United States and abroad. The ultimate question in all codes of ethics, both personal and social, involves the issue of authority. If the codes by which nations live are not drawn from transcendent truths, then they are created arbitrarily, with their basis being pure power. If human power is the foundation for solving all social problems, then consolidation and centralization of power is the presumed means to the solution.

There are elite groups of people in this world who would press the mold of their power philosophies upon the United States and the entire world. Those elitist philosophies have grown so pervasively because much of the opposition to them has lacked a solid core of transcendent truth. Those elitists, those Humanists, have created their own view of the world and reality. I believe they are misguided and therefore dangerous.

A summary of beliefs of the Secular Humanist religion as described in its

published manifestos demonstrates the extensiveness of its religious/ethical beliefs.

Humanism denies and rejects God, theism, deism, faith, prayer, all divine purpose or providence, all religions which place God above human needs, the existence of life after death, traditional religious morality, national sovereignty, and a profit-motivated society.

To replace the tenets of traditional religion, humanism proclaims its own set of self-serving, unproved dogmas. Humanism asserts that the universe is self-existing and not created, that man is the product of evolution, that the joy of living and satisfactions of life are the supreme goal of man, and that ethics come from human experience, not from God.

Humanism recognizes and accepts abortion, euthanasia, suicide, and all varieties of sexual exploration and immoral lifestyles. Humanism works for the establishment of a secular society, a socialized economic order, world government, military disarmament, and population control by government.

Those who support Secular Humanism are attempting, whether consciously or unconsciously, to make it the religion of the Government of America. And the conflict between two philosophical beliefs evidences itself in certain specific issues on which those, like myself, in elective public life are being asked to take a stand.

Creation/evolution, Do we teach one or both theories in public schools?

Homosexuality, Should the laws of the country recognize and encourage a tolerance of it?

Permissiveness, Should we discipline children in public school and as a last resort, use corporal punishment?

Prayer in public schools, Should a school district have the authority to permit an opening prayer?

Pornography, Are there any circumstances where society can deal with the dehumanizing of sex and the downgrading of it to the level of animals?

Capital punishment, Are there any circumstances where society can impose it?

Deficits, Does the continued practice of deficits—money supply expansion—debasement of the currency—reach the point of theft prohibited by the Seventh Commandment?

Abortion, When does life begin, and after it has begun, is there any point at which the taking of it should be prohibited?

The Jewish-Christian Scriptures set forth certain moral principles which are referred to as the Judeo-Christian ethic. I submit that where Scripture speaks on the aforementioned issues, the use of political power and influence to give them life is not the promotion of a religion but rather a recognition of the heritage which has permitted our civilization to reach this point. The political systems of our Nation have legislated laws based on Judeo-Christian ethics since its inception. It has legislated laws for parental control of children, against murder, against adultery, against theft, and perjury. No one can seriously suggest that the existence of these laws in the political system is the establishment of a state religion. These principles are basic to Western civilization. The Scriptures, the source of these moral ethical principles, contain other principles which, in the opinion of some, provide direction for those in civil authority in the resolution of the foregoing issues currently being discussed in the political forum. The first three Commandments deal with the relationship between God and man. For the civil state to attempt in the secular world to legislate compliance with any one of these first three Commandments crosses over the line established and prohibited by our first amendment to the Federal Constitution. But to suggest that those in political authority may not use the other Commandments dealing with man's social relationships in orienting the compass of the secular state is to abandon the direction of our political system to whatever wind may come along, including the major contestant on the current scene, secular humanism, itself a religion.

In the final analysis, whether a private citizen or an elected official, no man or woman can escape the choice God gave every human, do we follow God or man?●

REAGAN ADMINISTRATION IMMIGRATION REFORM LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. RODINO) is recognized for 5 minutes.

● Mr. RODINO. Mr. Speaker, I am today introducing, at the request of the Reagan administration, the immigration reform proposal that has been submitted by the Department of Justice.

This legislative package is the product of a several month interagency task force review of the recommendations made by the Select Commission on Immigration and Refugee Policy. I had the privilege of serving on the Select Commission and I am pleased that many of the positive recommendations, that were contained in the final report of our panel, are included in some form in this legislation.

I am particularly pleased that the administration saw the wisdom of presenting its legislative response to the many difficult and controversal issues relating to our immigration policy in the form of a comprehensive legislative package. Most of the commissioners who served on the Select Commission clearly recognized that these subjects are not easily divisible. They must be considered and debated in concert to produce meaningful and acceptable legislation.

The proposals on employer sanctions are similar to those which have been recommended by both Republican and Democratic administrations over the past decade and which have been approved by this body on two separate occasions.

On the other hand, I have serious reservations with regard to some aspects of the more recent additions to the proposal that I am introducing today. These include:

Title I which establishes a limited legalization program for undocumented aliens;

Title IV which substantially revises the procedures for review of asylum requests and exclusion orders;

Title VI which establishes a special temporary worker program for Mexico;

Title VII which allows the President to declare an immigration emergency in certain circumstances; and

Title X which authorizes the President to intercept vessels and to make arrangements with other countries to prevent illegal immigration to the United States.

I do not question the need for remedial legislation to respond to immigration emergencies such as the Cuban boatlift which took place last year. However, I do believe that any legislation providing the President with unprecedented emergency powers must be carefully studied by the Congress.

In this regard, I can assure my colleagues that this entire legislative package will be closely scrutinized by the Judiciary Committee to insure that it is constitutional and incorporates a proper governmental response to the uncontrolled immigration that we are experiencing along the Southwest border and more recently from countries of the Caribbean.

I am gratified that the Reagan administration has presented its legislative program to deal with these vexing issues which has continously occupied the attention of my colleagues in the House and on the committee for a long period of time.

I am hopeful that the committee will give both cautious and careful consideration to the provisions contained in this bill so that Congress can develop a reasonable, realistic, and humane immigration policy during the 97th Congress.●

"CALL TO CONSCIENCE" ON BEHALF OF YITZCHAK TSITVERBLIT

The SPEAKER pro tempore. Under a previous order of the House, the gen-

tleman from California (Mr. MATSUI) is recognized for 15 minutes.

● Mr. MATSUI. Mr. Speaker, I am honored to participate in this session's "Call to Conscience" Congressional Vigil for Soviet Jewry. As members of this freely elected democratic body, I believe it is our duty to speak out for human rights throughout the world, particularly for those who have been imprisoned or harassed strictly on the basis of their religious beliefs and desire to emigrate.

I would like to call your attention to the plight of Yitzchak Tsitverblit, a 61-year-old electronics engineer in the city of Kiev. Mr Tsitverblit first applied for permission to emigrate with his family to Israel in June 1973. The Soviet Government denied him permission to leave for reasons of "secrecy." This was despite the fact that Mr. Tsitverblit had quit his job as an electronics engineer in 1971, and had been working for 2 years as a manual laborer.

Today, 8 years since his application, Mr. Tsitverblit and his family have still been denied permission to emigrate. Their life gets worse. He and his wife suffer from incurable diseases, and Mr. Tsitverblit goes from one low-paying, unskilled job to another. Their son, Naftali, has been beaten openly by schoolmates and ridiculed and harassed by his schoolteachers. Even so, the family continues in their faith. Mr. Tsitverblit participates in seminars on Judaism and each year attends a memorial service for Ukrainian Jews killed at Babi Yar.

It is my hope that our efforts in Congress to speak out on behalf of religious victims like Yitzchak Tsitverblit will induce the Soviet Government to permit their emigration. We must not allow this inhumane treatment to go unchallenged.●

MR. STOCKMAN'S MATHEMATICAL ABILITY HAS SOME MAJOR WEAKNESSES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. MURPHY) is recognized for 5 minutes.

● Mr. MURPHY. Mr. Speaker, I have just received information that is further indication that we should be extremely cautious in accepting administration rationale for further budget cuts in fiscal year 1982. It appears that Mr. Stockman's much-vaunted mathematical ability has some major weaknesses.

According to information from the Department of Education, the Office of Management and Budget (OMB), has managed to overlook two crucial factors in determining their revised budget. First, OMB neglected to consider the fact that in order to reduce outlays in fiscal year 1983, the authority for most education programs, because they are forward funded, would need to be reduced in fiscal year 1982. In order to stay beneath the OMB ceilings for fiscal year 1983 outlays, the Department of Education would need to reduce spending in fiscal year 1982 by 27 percent below the March budget rather than 12 percent as the President had requested. This reduction would bring the fiscal year 1982 operating level for the Department of Education 33 percent below that of fiscal year 1981.

The second OMB error is in the matter of about $900 million which was removed from Department of Education spending authority and given to the Department of Health and Human Services in the March budget because of the block grant proposal for the rehabilitation services program. The block grant was rejected by Congress and the rehabilitation program is still in the Department of Education. But OMB has never returned the $900 million in spending authority to the Education Department. Having been informed of the error, OMB's response reportedly is that the Education Department will have to eat the difference.

It has long been clear to many of us that the OMB numbers game has no relationship to rational decisionmaking. This latest information confirms that not only are decisions being made without regard to their effect on millions of lives, they are being made without regard for even mathematical accuracy. They are irresponsible as well as illogical, and we ought to reject these latest budget proposals just as rapidly as they were conceived.●

DR. PHILIP SPESER: A FRIEND TO SMALL, INNOVATIVE FIRMS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. BEDELL) is recognized for 5 minutes.

● Mr. BEDELL. Mr. Speaker, I wish to call the attention of the House to the important work Dr. Philip Speser is doing to expand the role of small, innovative firms in federally funded research and development projects. Dr. Speser's work will go a long way toward helping America maintain her technological superiority and regain her stature of preeminence in the world market.

Dr. Speser's "baby" has been the Small Business Innovation Research Act of 1981. The House Small Business Committee earlier today voted 40 to 0 to send the act to the House floor. The Senate Small Business Committee, led by Senator RUDMAN of New Hampshire, unanimously approved its version of the act earlier this month.

The rapid progress of this important legislation is due in large part to the tireless efforts of Dr. Speser. He has made his able assistance available at any time to the staffs of both Houses. His advice, counsel, and tenacity on behalf of the small business research community represents his unbending desire to see this well-reasoned and sorely needed legislation become law.

Dr. Speser has recently left the staff of the Federation of American Scientists to form Speser Associates, a practice of law, consulting, and research in the area of science and technology. I wish him well as he brings his unique talents to the private sector.●

SINGLE AUDIT ACT CUTS PAPERWORK, SAVES MONEY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. WYDEN) is recognized for 5 minutes.

● Mr. WYDEN. Mr. Speaker, I am introducing today the Single Audit Act of 1981, a bill whose time is long overdue.

This is a measure for our times because it reduces paperwork and cuts costs, both at the Federal level and at the State and local level.

My bill reduces the ineffectiveness and inefficiencies of multiple grant audit requirements by standardizing Federal audits and requiring fewer of them. There is no less accountability; in fact there is more. There is more commonsense, and less cost.

Here is how my bill works. The Director of the Office of Management and Budget, in consultation with the Comptroller General, will develop uniform accounting, auditing, and financial management policies, procedures and requirements for recipients of Federal grants. These procedures, incidentally, will incorporate the audit standards of the American Institute of Certified Public Accountants.

Then each major recipient local jurisdiction is assigned a single Federal agency, called a cognizant agency. That Federal agency oversees the completion by an independent auditor at least once every 2 years of a single multipurpose audit. Recipients of grants less than $100,000 would be subject to an audit a minimum of every 3 years.

Independent auditors are defined as a certified public accountant or a properly constituted State or local government agency with audit responsibilities.

The time to act is now. The cost savings can be tremendous. Federal aid to State and local governments has risen from $3 billion just two decades ago to $90 billion today. There are 90,000 Federal grant recipient jurisdictions in the United States. Some 90 percent of all Federal aid flows through 60 agencies. Administrative burdens associated with auditing this Federal assistance soaks up far too much of the grants.

Presently, different agencies ask for different things in audits. Most have separate guidelines for how to conduct an audit. For example, the audit guide, with applicable Federal regulations, for CETA is 3½ inches thick and weighs 9 pounds, 4 ounces.

EDA grants require the use of three separate audit guides.

The city of Portland, Oreg., which I represent, has devoted 361 man days and 2,888 hours since last January 1 working on audits for Federal grants.

For fiscal year 1981-82, the city of Portland is preparing for 25 separate audits, which it estimates will cost it more than $120,000. To put that in perspective, Portland pays an auditor $85,000 to review its entire $400 million audit. Or put another way, 3 percent of every Federal grant dollar goes to pay for an audit to make sure it was spent correctly. Only a bureaucrat could understand the logic of that fact.

Then there are the individual horror stories.

Between August 24 and August 28, an auditor from a private CPA firm in Oakland, Calif., was dispatched to Portland to look over figures relating to a $30,000 minority business grant from the Department of Commerce. The grant, incidentally, went to one consultant to compile a study of economic opportunities for minority-owned businesses in Portland. There was no match requirement, and there were no indirect costs.

This audit cost $2,900 to complete. The city of Portland invested 112 man hours. No problems were discovered.

During April and May of this year, seven EDA nonconstruction grants were audited by a Portland auditor. To perform the audits, two separate audit guides were used. On July 13, the Secretary of Commerce issued a final administrative order, retroactive to January that rendered the two audit guides invalid. Thus the audits went into the trashbin, too. Audit costs so far total $11,260. City staff time consumed so far totals 1,240 hours.

With such duplication and blizzards of paper, is it any wonder that taxpayers are irate over the antics of their Government?

Single audits are a reality today, as a result of attachment P to OMB Circular A-102. But I believe we should go that extra step and make single audits the law of the land.

The Single Audit Act of 1981 will go a long way toward coordinating Federal financial and compliance auditing. It will simplify the way audits are now conducted, shorten the time it takes to get them done and it will fill gaps where grants are awarded and are not audited at all.

This coordination will produce improved relations between the Federal and local governments, at the same time it cuts paperwork and costs. As an added plus, it will give an organizationwide look at just how much Federal assistance is going to a local government, and how well it is being used.

It is a new approach we should pursue, and a bargain we cannot afford to pass up.●

LIBERALIZING BANKERS ACCEPTANCES WILL BENEFIT THE AMERICAN BALANCE OF PAYMENTS AND INCREASE FOREIGN TRADE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. BARNARD) is recognized for 5 minutes.

● Mr. BARNARD. Mr. Speaker, I have been concerned with the problems of increasing American participation in international markets for some time. As part of this effort, I introduced H.R. 2438, which would liberalize current restrictions on bankers acceptances, last March.

During the testimony on S. 1720 this week, the American Bankers Association strongly endorsed this liberalization. Section 209 of S. 1720 is identical of H.R. 2438.

I am pleased that the organization representing the issuers of this form of trade finance have endorsed my approach, which will especially help small- and medium-sized companies interested in selling overseas. Bankers acceptances are an old and safe method of financing trade, and only a 65-year-old restriction has prevented their wider use. Much has changed since the 1915 law on bankers acceptances was approved, and it is high time that this high grade financing source is deregulated. The benefits to both individual employers and our national policy are undeniable, and I hope to see my bill pass in the near future.

PUBLIC BENEFITS OF LIBERALIZATION OF THE ACCEPTANCE LIMITATION

The proposed liberalization of the 1915 acceptance limitations would have five principal benefits. The first benefit would be the enhanced ability of a regulated sector of our economy to compete with unregulated credit sources. Many customers who would like to, but for various reasons do not, obtain bankers acceptances will usually obtain funds through sources of credit that are presently unregulated, such as commercial paper. In addition, acceptances are available from foreign banks which generally do not have any limitations on the acceptances that they generate abroad in their own markets. Relief from the present limitations would permit member banks to compete more effectively with these unregulated credit sources.

Second, acceptance financing for smaller U.S. exporters and agricultural concerns would be increased. Because demand for acceptance financing exceeds the present limitation, banks must allocate acceptance credit among customers. Other customers are either unable to obtain acceptance financing or must pay a premium for such financing. Again, relaxed limitations would increase the number of customers for whom acceptance financing is available.

Third, eligible acceptances are considered to be one of the highest quality forms of obligation, from the perspective of both the bank that provides the financing and the purchaser of the acceptance from the bank. This high quality reflects the very nature of the acceptance. An acceptance created under section 13 of the Federal Reserve Act is short term; in no case may its maturity exceed 180 days from the time of acceptance and is self-liquidating from the proceeds of the underlying transaction. We believe banks should be encouraged to make this type of nonspeculative, productive credit extension. A relaxation of these limitations would provide such encouragement.

Fourth, the availability of additional bankers acceptance financing would make a significant contribution to the U.S. position as a center of international trade and finance. As previously indicated, the current acceptance limitations are no longer reasonable in light of the growth in international trade and finance over the past 65 years and the competition arising from unregulated foreign banks.

Finally, an increase in this low-cost form of financing may help to reduce the trade deficit which the United States has been experiencing. The favorable impact should be felt on both the export and import sides of the equation. Any relaxation in the acceptance limitations would facilitate the ability of U.S. exporters to obtain this low cost form of financing and, accordingly, to enhance their competitive position vis-a-vis foreign exporters which are able to obtain acceptances from banks not subject to limitations. Sec. 209 of S. 1720 and H.R. 2438 would also enable more U.S. importers to avail themselves of low cost acceptance financing and, thus, reduce the total cost of U.S. imports.●

BLOCK ANNOUNCES STEPS TO PREVENT IMPORT OF ADULTERATED MEAT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. ENGLISH) is recognized for 5 minutes.

● Mr. ENGLISH. Mr. Speaker. I include the following:

BLOCK ANNOUNCES STEPS TO PREVENT IMPORT OF ADULTERATED MEAT

WASHINGTON, August 25.—Secretary of Agriculture John R. Block today announced a series of "tough, new" steps designed to prevent mislabeled, uninspected or otherwise

adulterated meat from coming into the United States.

The action follows confirmation by U.S. Department of Agriculture scientists over the weekend that some cartons of beef imported since January from a single Australian plant included horse meat.

Block said USDA will take the following steps to protect American consumers and business interests:

Australian meat labeled as boneless beef presently in the United States is being tested to assure its species. The meat will also be tested to determine whether the adulteration is confined to the Profreeze plant, Richmond, Victoria—Establishment No. 140–C.

Boneless meat leaving Australia must be tested for species identification by the Australian government; and be maintained under government security until it reaches the United States. U.S. authorities will then assume responsibility.

Boneless meat now enroute from Australia to the United States will be held at the point of entry and tested for species determination by USDA's Food Safety and Inspection Service before it is allowed to enter the United States.

Countries shipping boneless meat to the United States will be notified that they must initiate a species determination program. All fresh and frozen boneless meat entering the United States, regardless of country of origin, will be spot-checked for species by U.S. authorities.

USDA will initiate a review of compliance activities within major exporting countries to assure controls are in place during all stages of distribution to maintain the integrity of meat exports destined for the United States.

"These steps are necessary because mislabeled and adulterated imports apparently have been coming into the United States for several months," Block said. USDA and Australian authorities are continuing to investigate the problem.

Since Jan. 1, about 815,000 pounds of boneless beef have been imported into the United States from the Profreeze facility, Block said. Of that, USDA has thus far located and embargoed 270,000 pounds of boxed unprocessed boneless beef and 275,000 pounds of patties and ground meat. All of this meat is unacceptable as human food, Block said.

"The discovery last week by Australian authorities that some product on the docks there destined for the United States was actually kangaroo meat has raised the possibility that kangaroo meat, as well as horse meat, may have been illicitly imported in the past," Block said. "Embargoed meat in the United States will be further tested for kangaroo after we get testing material from the Australian government."

Federal authorities first found in early August that horse meat was being imported in boxes labeled beef when a USDA processing plant inspector in San Diego, Calif., became suspicious of meat that did not appear to be beef.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. IRELAND (at the request of Mr. WRIGHT), after 3 p.m., today, on account of serving as a delegate to the United Nations.

Mr. JONES of North Carolina (at the request of Mr. WRIGHT), for an indefinite period, on account of medical reasons.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. DENARDIS) to revise and extend their remarks and include extraneous material:)

Mr. GILMAN, for 5 minutes, today.
Mr. BROYHILL, for 5 minutes, today.
Mr. CONTE, for 5 minutes, today.
Mrs. HECKLER, for 5 minutes, today.
Mr. DANNEMEYER, for 20 minutes, today.
Mr. BLILEY, for 60 minutes, October 27.
Mr. EDWARDS of Oklahoma, for 1 hour, October 29.

(The following Members (at the request of Mr. MOAKLEY) to revise and extend their remarks and include extraneous material:)

Mr. RODINO, for 5 minutes, today.
Mr. MATSUI, for 15 minutes, today.
Mr. GONZALEZ, for 15 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. MURPHY, for 5 minutes, today.
Mr. BEDELL, for 5 minutes, today.
Mr. WYDEN, for 5 minutes, today.
Mr. BARNARD, for 5 minutes, today.
Mr. MAVROULES, for 30 minutes, October 29.
Mr. DONNELLY, for 60 minutes, November 17.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. AUCOIN, immediately prior to the vote on the Roukema amendment, in the Committee of the Whole today.

Mr. BROWN of California, and to include extraneous matter on title XIV, in the Committee of the Whole today.

(The following Members (at the request of Mr. DENARDIS) and to include extraneous matter:)

Mr. SHUMWAY in two instances.
Mr. MCCOLLUM in two instances.
Mr. FRENZEL in three instances.
Mr. BROYHILL in two instances.
Mr. MARKS.
Mr. MARLENEE in two instances.
Mr. DERWINSKI.
Mr. EVANS of Delaware.
Mr. LEE.
Mr. O'BRIEN.
Mr. CARMAN.
Mr. SHAW.
Mr. BURGENER.
Mr. EVANS of Iowa.
Mr. DORNAN of California.
Mr. CHENEY.
Mr. DENARDIS.

(The following Members (at the request of Mr. MOAKLEY) and to include extraneous matter:)

Mr. MAZZOLI in two instances.
Mr. GAYDOS.
Mr. WEISS.
Mr. FORD of Michigan.
Mr. LAFALCE.
Mr. MAVROULES.
Mr. APPLEGATE.
Mr. SANTINI.
Mrs. BOUQUARD.
Mr. HEFNER.
Mr. LANTOS in three instances.
Mr. IRELAND in two instances.
Mr. LELAND in two instances.
Mr. MCDONALD.
Mr. OBERSTAR.
Mr. CHAPPELL.
Mr. HUTTO.
Mr. BAILEY of Pennsylvania.
Mr. SCHEUER.
Mr. AUCOIN in two instances.
Mr. WALGREN.
Mr. EVANS of Georgia.
Mr. WYDEN.
Mr. MINETA.
Mr. SKELTON.
Mr. MATTOX.
Mr. HUBBARD.
Mr. BONKER.
Ms. FERRARO.
Mr. FAUNTROY.
Mr. GEPHARDT.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 146. An act to authorize the Secretary of the Interior to assist in the preservation of historic Camden in the State of South Carolina, and for other purposes; to the Committee on Interior and Insular Affairs.

S. 188. An act to authorize the Secretary of Agriculture to convey certain lands in the Gallatin National Forest, and for other purposes; to the committee on Interior and Insular Affairs.

S. 1119. An act to correct the boundary of Crater Lake National Park in the State of Oregon, and for other purposes; to the committee on Interior and Insular Affairs.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1000. An act to amend the Independent Safety Board Act of 1974 to authorize appropriations for fiscal years 1981, 1982, and 1983, and for other purposes.

ADJOURNMENT

Mr. OBERSTAR. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 11 minutes p.m.), under its previous order, the House adjourned until Monday, October 26, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2384. A letter from the Assistant Secretary of Defense (Comptroller), transmitting notice of the proposed transfer of various funds appropriated to the Defense Department, pursuant to section 734 of the Department of Defense Appropriation Act, 1981; to the Committee on Appropriations.

2385. A letter from the Secretary of Energy, transmitting the annual report on financing, supply, and installation activities of public utilities in connection with the residential conservation service, pursuant to section 216(g) of the National Energy Conservation Policy Act, as amended; to the Committee on Energy and Commerce.

2386. A letter from the Director, National Oceanic and Atmospheric Administration Corps, Department of Commerce, transmitting the annual report of the NOAA Corps pension plan, covering the year ended September 30, 1980, pursuant to section 121(a)(2) of the Budget and Accounting Procedures Act of 1950, as amended; to the Committee on Government Operations.

2387. A letter from the Deputy Assistant Secretary of the Interior for Indian Affairs, transmitting a draft of proposed legislation to provide for the use and disposition of the Miami Indians judgment funds in Dockets 124-B and 254, before the U.S. Court of Claims, and for other purposes; to the Committee on Interior and Insular Affairs.

2388. A letter from the Chairman, Advisory Council on Historic Preservation, transmitting a report on historic preservation effects of terminating the U.S. trusteeship of Micronesia, pursuant to section 202(a)(1) of the National Historic Preservation Act of 1966; to the Committee on Interior and Insular Affairs.

2389. A letter from the Acting Comptroller General of the United States, transmitting a report on the review of the Disabled American Veterans' financial statements for the year ended December 31, 1980 (AFMD-82-8, October 15, 1981), pursuant to section 9(b)(1) of the act of June 17, 1932; to the Committee on the Judiciary.

2390. A letter from the Attorney General, transmitting a draft of proposed legislation to revise and reform the Immigration and Nationality Act, and for other purposes; jointly, to the Committees on the Judiciary, Armed Services, Education and Labor, Energy and Commerce, Foreign Affairs, Interior and Insular Affairs, Merchant Marine and Fisheries, Public Works and Transportation, and Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DANIELSON: Committee on the Judiciary. H.R. 4766. A bill to recognize the organization known as the U.S. Submarine Veterans of World War II (Rept. No. 97-284). Referred to the Committee of the Whole House on the State of the Union.

Mr. DANIELSON: Committee on the Judiciary. H.R. 4769. A bill to recognize the organization known as the American Council of Learned Societies (Rept. No. 97-285). Referred to the Committee of the Whole House on the State of the Union.

Mr. DANIELSON: Committee on the Judiciary. H.R. 4755. A bill to recognize the organization known as Former Members of Congress. (Rept. No. 97-286). Referred to the Committee of the Whole House on the State of the Union.

Mr. DANIELSON: Committee on the Judiciary. H.R. 4734. A bill to recognize the organization known as the Italian American War Veterans of the United States. (Rept. No. 97-287). Referred to the Committee of the Whole House on the State of the Union.

Mr. MOAKLEY: Committee on Rules. House Resolution 253. Resolution providing for the consideration H.R. 4603, a bill to provide flexibility to the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, and the Federal supervisory agencies to deal with financially distressed depository institutions. (Rept. No. 97-292). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. LUNGREN: Committee on the Judiciary. H.R. 825. A bill for the relief of Yick Bong Au Yeung; with amendments (Rept. No. 97-288). Referred to the Committee of the Whole House.

Mr. MAZZOLI: Committee on the Judiciary. H.R. 1783. A bill for the relief of Felipe B. Manalo and Maria Monita A. Manalo; with an amendment (Rept. No. 97-289). Referred to the Committee of the Whole House.

Mr. FISH: Committee on the Judiciary. H.R. 1841. A bill for the relief of Isabelita Clima Portilla. (Rept. No. 97-290). Referred to the Committee of the Whole House.

Mr. SAM B. HALL, JR.: Committee on the Judiciary. H.R. 2342. A bill for the relief of Maria Cecilia Gabella-Ossa (Rept. No. 97-291). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. FASCELL (for himself, Mr. ZABLOCKI, and Mr. BROOMFIELD):

H.R. 4814. A bill to authorize appropriations for fiscal years 1982 and 1983 for the Department of State, the International Communication Agency, and the Board for International Broadcasting, and for other purposes; to the Committee on Foreign Affairs.

By Mr. BAILEY of Pennsylvania (for himself and Mr. MURPHY):

H.R. 4815. A bill to amend the Internal Revenue Code of 1954 to provide for the establishment of reserves for mining land reclamation and for the deduction of amounts added to such reserves; to the Committee on Ways and Means.

By Mr. D'AMOURS:

H.R. 4816. A bill to amend the Clean Air Act to control acid precipitation, and for other purposes; to the Committee on Energy and Commerce.

By Mr. FAUNTROY:

H.R. 4817. A bill to require the compilation of lists of individuals involuntarily separated from service in the Federal agencies, and to disallow the heads of Federal agencies from appointing certain individuals to positions in Federal agencies if individuals included on the lists are qualified and available for the positions; to the Committee on Post Office and Civil Service.

By Mr. FORD of Michigan (for himself and Mr. DERWINSKI) (by request):

H.R. 4818. A bill to amend chapter 34 of title 39, United States Code, to provide for better management of transportation for certain mail of members of the Armed Forces, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. FRANK:

H.R. 4819. A bill to amend title XIX of the Social Security Act to require that income levels for the SSI-related medically needy are the same as those for the SSI-related categorically needy; to the Committee on Energy and Commerce.

By Mr. FRENZEL (by request):

H.R. 4820. A bill to amend certain provisions applicable to compensation for the overtime inspectional service of employees of the U.S. Customs Service, and for other purposes; jointly, to the Committees on Ways and Means and Post Office and Civil Service.

By Mr. HANSEN of Idaho:

H.R. 4821. A bill to amend the Internal Revenue Code of 1954 to provide taxpayer relief and simplification of the individual income tax, and for other purposes; to the Committee on Ways and Means.

By Mr. IRELAND (for himself, Mr. EVANS of Georgia, Mr. SHAW, and Mr. HUTTO):

H.R. 4822. A bill to amend the Foreign Assistance Act of 1961 to repeal the prohibition against the use of international narcotics control assistance funds for spraying certain herbicides to eradicate marihuana; to the Committee on Foreign Affairs.

By Mr. JENKINS:

H.R. 4823. A bill to permit subchapter S corporations to hold business rental real estate property; to the Committee on Ways and Means.

By Mr. LaFALCE:

H.R. 4824. A bill requiring that trade readjustment allowances for weeks of unemployment after September 30, 1981, be determined on the basis of "old law" in the case of workers entitled to such allowances for weeks of unemployment beginning before October 1, 1981; to the Committee on Ways and Means.

By Mr. LELAND:

H.R. 4825. A bill to designate the main post office in Houston, Tex., as the "Barbara Jordan Post Office"; to the Committee on Public Works and Transportation.

By Mr. McCOLLUM:

H.R. 4826. A bill to reduce interest rates by limiting the rate of interest which the U.S. Government may pay on debt obligations issued by the United States and by establishing a national indexed usury ceiling; jointly, to the Committees on Banking, Finance and Urban Affairs and Ways and Means.

By Mr. MICA:

H.R. 4827. A bill to amend the Social Security Act to facilitate enforcement of provisions requiring suspension of benefits to inmates of prisons and other public institu-

tions by insuring the availability of necessary information from Federal instrumentalities; to the Committee on Ways and Means.

By Mr. MITCHELL of Maryland (for himself and Mr. VANDER JAGT):

H.R. 4828. A bill to set aside certain surplus vessels for use in the provision of health and other humanitarian services to developing countries; to the Committee on Merchant Marine and Fisheries.

By Mr. MOFFETT (for himself, Mr. GREGG, Mr. SMITH of Pennsylvania, Mr. BEILENSON, Mr. MITCHELL of New York, Mr. MILLER of California, Mr. FOGLIETTA, Mr. GIBBONS, Mr. EDWARDS of California, Mr. BROWN of California, Mr. STARK, and Mr. FRANK):

H.R. 4829. A bill to amend the Clean Air Act to better protect against interstate transport of pollutants, to control existing and new sources of acid deposition, and for other purposes; to the Committee on Energy and Commerce.

By Mr. GREGG (for himself, Mr. SCHEUER, Mr. WALGREN, Mrs. SCHNEIDER, and Mr. CARNEY):

H.R. 4830. A bill to strengthen research and development programs aimed at understanding the causes and effects of acid precipitation, and to establish a process for cooperative decisionmaking on strategies to control this environmental problem; jointly, to the Committees on Science and Technology and Energy and Commerce.

By Mr. PRICE (for himself and Mr. DICKINSON) (by request):

H.R. 4831. A bill to repeal section 5(b) of the Subversive Activities Control Act of 1950; to the Committee on Armed Services.

By Mr. RODINO (by request):

H.R. 4832. A bill to revise and reform the Immigration and Nationality Act, and for other purposes; to the Committee on the Judiciary.

By Mr. RUDD:

H.R. 4833. A bill to amend the Internal Revenue Code of 1954 to permit banks, savings and loan institutions, and similar financial institutions to issue tax-exempt certificates for housing purposes; to the Committee on Ways and Means.

By Mr. SHUMWAY:

H.R. 4834. A bill to authorize any bank holding company to acquire control of banks and any national bank to establish branches throughout the Federal judicial circuit in which such bank holding company or national bank is located; to the Committee on Banking, Finance and Urban Affairs.

By Mr. WYDEN:

H.R. 4835. A bill to provide for uniform financial management and audit standards, and for other purposes; to the Committee on Government Operations.

By Mr. LELAND:

H.J. Res. 346. Joint resolution to provide for the designation of the week beginning March 15, 1982, as "National Student Safety Week"; to the Committee on Post Office and Civil Service.

By Mr. YATES:

H.J. Res. 347. Joint resolution providing for the commemoration of the 100th anniversary of the birth of Franklin Delano Roosevelt; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII,

215. The SPEAKER presented a memorial of the Legislature of the Territory of the Virgin Islands, relative to honoring the courageous Americans who served their country in Vietnam; to the Committee on Armed Services.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII.

Mr. McDADE introduced a bill (H.R. 4836) for the relief of William Kubrick, and for other purposes; which was referred to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 316: Mr. RALPH M. HALL, Mr. MCDONALD, Mr. STANTON of Ohio, Mr. MCCURDY, Mr. HANSEN of Utah, Mr. DANIEL B. CRANE, Mr. LEACH of Iowa, Mr. MORRISON, Mr. HUTTO, Mr. FOGLIETTA, Mr. WOLF, and Mr. NAPIER.

H.R. 1506: Mr. DIXON, Mr. OTTINGER, and Mr. FITHIAN.

H.R. 1509: Mr. JACOBS.

H.R. 2205: Mr. BINGHAM.

H.R. 2251: Mr. LELAND.

H.R. 2333: Mr. DYSON.

H.R. 2389: Mr. EVANS of Iowa, Mr. SILJANDER, Mr. CHAPPIE, and Mr. SPENCE.

H.R. 2832: Mr. HAGEDORN.

H.R. 2981: Mr. WYDEN, Mr. PEPPER, Mr. BENEDICT, Mrs. HOLT, Mr. ZEFERETTI, and Mr. HORTON.

H.R. 3274: Mr. HAGEDORN.

H.R. 3824: Mr. ROUSSELOT.

H.R. 4057: Mr. BROWN of California and Mr. MINETA.

H.R. 4247: Mr. LEBOUTILLIER, Mr. CAMPBELL, Mr. FORSYTHE, Mr. BEILENSON, Mr. GEJDENSON, Mr. NEAL, Mr. BURGENER, Mr. RAHALL, and Mr. MURPHY.

H.R. 4248: Mr. HOWARD, Mr. FORSYTHE, Mr. MURPHY, Mr. HUTTO, Mr. ROE, Mr. NEAL, Mr. BURGENER, Mr. RAHALL, Mr. LEBOUTILLIER, and Mr. CAMPBELL.

H.R. 4358: Mr. MOTTL.

H.R. 4410: Mr. BEDELL.

H.R. 4449: Mr. BEDELL, Mrs. BOGGS, Mr. CHAPPELL, Mr. DREIER, Mr. ERDAHL, and Mr. SIMON.

H.R. 4467: Mr. HORTON.

H.R. 4518: Mr. BURGENER, Mr. CHAPPELL, Mr. CORCORAN, Mr. CRAIG, Mr. ROBERT W. DANIEL, JR., Mr. DANNEMEYER, Mr. FORSYTHE, Mrs. HOLT, Mr. KEMP, Mr. KRAMER, Mr. LAGOMARSINO, Mr. LEBOUTILLIER, Mr. LIVINGSTON, Mr. LUNGREN, Mr. MCCLORY, Mr. MCCOLLUM, Mr. ROBINSON, Mr. SENSENBRENNER, Mr. SOLOMON, and Mr. WOLF.

H.R. 4519: Mr. DOUGHERTY, Mr. LENT, Mr. YOUNG of Alaska, and Mr. FORSYTHE.

H.R. 4544: Mr. LEWIS.

H.R. 4562: Mr. SMITH of Iowa, Mr. BONKER, Mr. KOGOVSEK, Mr. SMITH of Pennsylvania, Mr. MURPHY, and Mr. HARKIN.

H.R. 4576: Mr. NEAL, Mr. RICHMOND, Mr. MITCHELL of Maryland, Mr. DUNCAN, Mr. DYSON, Mr. JENKINS, Mr. YOUNG of Alaska, Mr. DOWDY, Mr. FLIPPO, Mr. ROEMER, Mr. HUTTO, Mr. HATCHER, Mr. TRAXLER, Mr. WON PAT, Mr. FAZIO, and Mr. DASCHLE.

H.R. 4587: Mr. MCHUGH and Mr. MOTTL.

H.R. 4673: Mr. MCCLORY, Mr. GINGRICH, and Mr. RINALDO.

H.R. 4775: Mr. SAM B. HALL, JR., Mr. FUQUA, Mr. SCHUMER, Mr. HYDE, Mr. RAHALL, Mr. FORSYTHE, Mr. SMITH of Pennsylvania, Mr. LONG of Maryland, Mr. FORD of Michigan, Mr. ROE, Mr. MAVROULES, and Mr. RICHMOND.

H.J. Res. 151: Mrs. BOUQUARD, Mr. MCCLOSKEY, Mr. HUTTO, Mr. GORE, Mr. SMITH of New Jersey, Mr. GUARINI, Mr. MINISH, Mr. KEMP, Mr. LAFALCE, Mr. MARKS, Mr. COELHO, and Mr. JONES of Tennessee.

H.J. Res. 332: Mr. PEPPER, Mr. BREAUX, Mr. BOWEN, Mr. WIRTH, Mr. BONER of Tennessee, Mr. HIGHTOWER, Mr. SIMON, Mr. WASHINGTON, Mrs. CHISHOLM, Mr. SAVAGE, Mr. WHITEHURST, and Ms. FERRARO.

H.J. Res. 335: Mr. FAUNTROY, Mr. CLAY, Mr. TAUKE, Mr. CORRADA, and Mrs. SCHNEIDER.

H. Con. Res. 68: Mr. EDGAR, Mr. LEHMAN, Mr. KILDEE, Mr. EDWARDS of California, Mr. GUARINI, Mr. MITCHELL of Maryland, Mr. PANETTA, Mr. DERWINSKI, Mr. JEFFORDS, Mr. HARKIN, Mr. ROE, Mr. WHITEHURST, Mr. OBERSTAR, Mr. SEIBERLING, Mr. WEBER of Minnesota, Mr. STRATTON, Mr. HUGHES, Mr. WEISS, Mr. WON PAT, Mr. VENTO, Mr. LAFALCE, Mr. LANTOS, Mr. BEDELL, Mr. DE LUGO, Mr. PHILLIP BURTON, Mr. FITHIAN, Ms. MIKULSKI, Mr. STUDDS, Mr. WASHINGTON, Mr. WILSON, Mr. GRAY, Mr. CONYERS, Mr. OTTINGER, Mr. DORNAN of California, Mr. FISH, Ms. FERRARO, and Mr. GREEN.

H. Con. Res. 151: Mr. LOWRY of Washington.

H. Res. 218: Mr. BEARD, Mr. BEDELL, Mr. SILJANDER, Mr. GEPHARDT, and Mr. KOGOVSEK.

H. Res. 239: Mr. YATRON.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 3364: Mr. FORD of Tennessee.

PETITIONS, ETC.

Under clause 1, of rule XXII,

247. The SPEAKER presented a petition of the City Council of the City of Santee, Calif., relative to the Voting Rights Act; which was referred to the Committee on the Judiciary.

SENATE—*Thursday, October 22, 1981*

(Legislative day of Wednesday, October 14, 1981)

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Reverend Donald R. Turkelson, Chaplain (Major), USA, 97th General Hospital, Frankfurt, Germany, offered the following prayer:

Let us pray.

Our Father and our God, we praise Thee this day for the opportunity to be a part of the democratic process, which

May we realize the necessity of being we believe came about by Thy divine providence. We are thankful for the way in which our country was established by the sacrifices of people who wanted to be free. We praise Thee for allowing this great country to be an example to the nations of the world, how diverse people and beliefs can be united in a common pursuit of freedom.

Grant each one Thy wisdom to discern issues which will shape the course of our lives and the future generations according to our Constitution.

Open our minds and hearts to the realistic concerns. May we have compassion on the oppressed, give a hand to the unemployed, provide medical care to the aged and infirmed, and assistance to the handicapped. Help us to be faithful to the needs of our people.

honest with ourselves, in being ethically responsible to our leadership vocations, in order that we do not betray the trust given us. Forgive us where we have erred and lacked a sense of vision.

Help us to differentiate between responsibility and privilege, between people's rights and people's exploitation of others' rights. Help us to recognize the power of the American spirit. A strength of people willing to negotiate a peaceful solution to all our differences foreign and domestic, and a spirit which will rise to the defense of our principles even to one's being willing to sacrifice his life for the preservation of liberty and justice for all our people now and forever. In His holy name we pray. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. Mr. President, I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

THE APPROPRIATIONS PROCESS

Mr. BAKER. Mr. President, it is no surprise, I am sure, when I inform the Senate that I have received many statements of concern regarding my prediction that the Senate will be in session until Thanksgiving or perhaps beyond. But, Mr. President, I am sure the prospect of being in this Chamber much longer than that, and perhaps right up to the eve of Christmas, will produce an even more unpleasant response. I do not now predict that, Mr. President, but I wish to make a remark on the situation as it now exists.

What we do and what prediction I must make about the time for sine die adjournment of this session of Congress depends largely on our ability to marshal the difficult appropriations process which lies ahead of us and upon which we will embark tomorrow.

In anticipation of this, I respectfully urge consideration of the fact that if the appropriations process is besieged by matters extraneous to specific authorizations, our chances of completing all 13 bills will diminish almost to the point of disappearing.

As paragraph 4 of rule XVI states in respect to appropriation bills:

> Nor shall any amendment not germane or relevant to the subject matter contained in the bill be received.

I have stated on numerous occasions that it is not the intention of the leadership to prevent any Members from addressing those issues that he or she considers imperative. My single suggestion is that these issues be dealt with on their own, later in the session. I previously have made a commitment to a freestanding debate on these issues, where we can deal efficiently and responsibly with them and thus leave the Senate free to deal with the necessary appropriations process unhindered by such considerations.

In a word, Mr. President, I reiterate the promise I have made on previous occasions: It is the intention of the leadership to provide an opportunity for the Senate to debate such issues as busing, abortion, and prayer in public schools. But that place is not the appropriations process.

I urge Members to consider that it does not serve a good purpose, a good legislative purpose, nor, I believe, the purpose of any Member, to offer these volcanic and emotional issues at every opportunity, and most especially not to every appropriations bill.

There will be a chance, Mr. President, and there will be ample opportunity for every Member to express his or her views on every side and facet of these issues. But I urge once more, please do not offer them as amendments to the appropriation bills.

There are few responsibilities that we have in this Chamber that are greater than our responsibility to provide the funds for the operation of the Federal Government, and that process will begin in the Senate on tomorrow.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, after the recognition of the two leaders under the standing order today, there are special orders in favor of the following Senators: the Senator from Mississippi (Mr. COCHRAN), the Senator from New Hampshire (Mr. HUMPHREY), the Senator from Texas (Mr. BENTSEN), and the Senator from New Hampshire (Mr. RUDMAN), each for 15 minutes.

At the conclusion of the time allocated for the recognition of Senators on special orders, there will be a period for the transaction of routine morning business, as previously provided for, but not to extend past the hour of 10:30 a.m.

At 10:30 a.m., the Senate will resume consideration of S. 1196, at which time the Hatch amendment No. 556 will be the pending amendment by a previous order.

Mr. President, I urge the managers of this bill and all Senators who have a contribution of debate or amendment to come to the floor as soon as possible after we reach this measure at 10:30 and to proceed. I believe that it is important that we try to finish this bill today.

While Thursday is the regular late day for the Senate, if a late session is required, because of other requirements that I am aware of by Senators on both sides of the aisle that will keep them away from the Chamber after a certain hour this afternoon or early this evening, I would hope that this will not be a very late evening. It is possible for us to finish this bill by 5 or 6 o'clock, or shortly thereafter, if we put our shoulders to the wheel and if we do not hang back until 1 or 2 or 3 in the afternoon before we come to the floor and offer amendments or contribute to the debate.

So, Mr. President, I hope all Members within the hearing of my voice, in their offices on our intercommunication system and in this Chamber, will take account of the fact that the hour to which we must proceed this evening will depend directly on the willingness of Members to come early and offer their amendments. We can finish by 5 or 6 o'clock if we try to do that, but if we do not we may be here very late, because

I intend to try to finish, if the Senate will agree with the undertaking.

Mr. President, I have no further need for my time under the standing order and I am prepared to yield it to any Senator or to the distinguished acting minority leader.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDENT pro tempore. The acting minority leader is recognized.

Mr. CRANSTON. Mr. President, will the Senator yield whatever time he has remaining, and I will reserve our time for Senator HOLLINGS, who wants some time.

Mr. BAKER. Yes. Mr. President, there are no requests on this side for additional time. I am pleased to yield the remainder of my time under the standing order to the control of the distinguished acting minority leader.

Mr. CRANSTON. I appreciate that very much. I reserve the time on this side for Senator HOLLINGS, who will come to the floor later.

Mr. BAKER. Mr. President, in view of the request just made by the acting minority leader, let me put this unanimous-consent request.

Mr. President, I ask unanimous consent that at this time we may proceed with the special orders, as previously ordered and in sequence, and that the time allocated to the distinguished minority leader under the standing order, plus the time just yielded by me be reserved under the control of the distinguished minority leader and may occur at such time as the minority leader may request and assuming that it is constant with the requirements of those who had previous special orders.

RECOGNITION OF SENATOR COCHRAN

The PRESIDING OFFICER (Mrs. HAWKINS). Under the previous order, the Senator from Mississippi (Mr. COCHRAN) is recognized for not to exceed 15 minutes.

S. 1761—VOTING RIGHTS AMENDMENTS OF 1981

Mr. COCHRAN. Madam President, today, I am introducing a bill to amend the Voting Rights Act of 1965. The purpose of this amendment is to assure the nationwide protection of voters' rights by making available a preclearance procedure in every State.

I am aware that an immediate reaction to an amendment offered by a white, Republican Senator from Mississippi to the Voting Rights Act may be that this is obviously an effort to dilute the effect of current law or to make it unenforceable or to somehow sabotage the Federal Government's role in protecting minority participation in elections. If that is the reaction of any of my colleagues, I want to assure them that they are wrong.

I am urging adoption of this change so the Government can act, when it needs to, to protect the right to vote of every citizen in this country, not just those who live primarily in the South. Rather than weakening enforceability, my amendment would enlarge upon the Government's ability to protect the voting rights of citizens wherever they may live.

My amendment relates only to section 5 of the act. It creates, in effect, a new preclearance procedure. I should point out that this is not an idea that has originated with me, but one that has been carefully developed by William C. Keady, a Federal district judge for the northern district of Mississippi, and George C. Cochran, not a relative, who is on the faculty of the School of Law at the University of Mississippi. This suggestion of theirs is discussed in an article entitled "Section 5 of the Voting Rights Act: A Time for Revision," which will be published soon in the Kentucky Law Journal, volume 69, No. 4, 1980–81.

The essence of the proposal would be to require political units to apply for a declaratory judgment in local Federal district court for the preclearance of any change in election or voting laws. The complaint would name the United States as the defendant, and process would be served upon the Attorney General. The relief sought would be identical to that now provided in section 5, and the burden of proof would remain on the submitting political unit.

Appropriate notice would be given to all interested parties in two forms: Publication in local newspapers for 3 consecutive weeks and actual service of the complaint upon interested persons or organizations who have placed their names in a registry with the court. Any person or group would be permitted to intervene as a matter of right within 60 days after notice of the action. The United States would also have 60 days to answer, the time period now permitted the Justice Department under the current administrative procedures for preclearance.

These declaratory judgment actions would be given a priority setting by the court, and decisions adverse to the United States or intervening parties would be automatically stayed upon notice of appeal. A provision for an expedited appeal has been included.

I am convinced that a majority in the Senate would not protest the nationwide application of a preclearance procedure to protect the voting rights of all citizens so long as there is in place a workable procedure for processing submissions. Plenary jurisdiction over voting rights cases is now vested only in the U.S. District Court for the District of Columbia. Historically, the justification for the investment of jurisdiction in this court was to insure the uniformity of interpretation.

Experience under current law, however, does not support this rationale. During the past 15 years, only 23 suits have been filed in that court, and only 10 opinions have been published, hardly a basis for the uniformity argument. Some may worry that the burden of submissions will be too great upon the court system. While statistics reveal a steady rate of increase in submissions, there has also been a steady decrease over the years in the number of objections made by the Department. Therefore, it is reasonable to assume most of the submissions can be disposed of summarily by the court, with only a few cases requiring actual litigation.

The 1980 statistics from the Justice Department indicate that of a total 7,340 submissions, only 51 objections were filed. If this is indicative of the changes that would be in dispute in the future, there would be only a minimal increase in caseload for the district courts. And assuming that voting law changes in the States not now covered by the preclearance requirements do not have as great a potential for discrimination, then one need not fear burdensome caseloads on that account either.

This new procedure, applying with equal force in every State, would make possible increased oversight by anyone interested in full minority participation in the political process. Also, the provisions for expedited appeal and automatic stay of the electoral change until approved by the appellate court would mean full protection against any adverse decision by what some may fear to be a "biased forum."

Finally, since there is no provision under the current administrative procedures to insure compliance with the preclearance requirement, it can be argued that the increased opportunity of minority voters to participate in the review of changes in the law, coupled with the familiarity of the court as the forum for resolving litigation with due process, would contribute to voluntary compliance by local political units.

I am submitting a workable, expeditious alternative to the outdated administrative procedures now available under the act that will maintain the Government's role in the protection of voting rights. This plan will insure that all States meet their responsibility to protect the right to vote which is one of our most fundamental rights.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1761

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Voting Rights Amendments of 1981".

SEC. 2. Section 5 of the Voting Rights Act of 1965 is amended—

(1) by inserting "(a)" after the section designation;

(2) by inserting after "November 1, 1972," the following: "or whenever a State with respect to which no prohibition set forth in section 4(a) based upon a determination made under section 4(b) is in effect shall enact or seek to administer any voting qualifications or prerequisites to voting, or standard, practice, or procedure with respect to voting different from that in force or effect

on the date of the enactment of the Voting Rights Amendments of 1981";

(3) by inserting "against the United States" after "institute an action;"

(4) by striking out "the United States District Court for the District of Columbia" and inserting in lieu thereof "the appropriate district court of the United States";

(5) by striking out the colon and all that follows through the end of the first sentence of such section and by inserting in lieu thereof a comma and the following: "except that any such qualification, prerequisite, standard, practice, or procedure may be enforced after 60 days after such State or political subdivision has submitted the necessary information to the appropriate district court of the United States and no objection has been raised by the United States or by any interested person during such 60 day period.";

(6) by striking out the second, third, and fourth sentences of such section and inserting in lieu thereof the following: "The procedures specified in subsection (b) shall apply to any action brought under this section. The failure of the Attorney General or any interested party to object during the 60-day period specified in the first sentence of this subsection, or a declaratory judgment entered into under this section shall not bar a subsequent action to enjoin an enforcement of such qualification, prerequisite, standard, practice, or procedure."; and

(7) by adding at the end thereof the following new subsection:

"(b)(1) Upon the filing of a complaint in an action brought under subsection (a) of this section, notice of the action shall be published in newspapers of general circulation in the jurisdiction of the appropriate district court for 3 consecutive weeks, and the complaint shall, to the extent practicable, be served on all interested persons. Persons interested in the enforcement or administration of any voting qualification, prerequisite to voting, or standard, practice, or procedure with respect to voting required to be tested under subsection (a) of this section by a State or political subdivision may, in accordance with rules made by each district court, submit their names and addresses to the appropriate district court to be kept in a registry for the purposes of this paragraph.

"(2) Any—

"(A) person who resides within the State or political subdivision seeking to enforce or to administer any such qualification, prerequisite, standard, practice, or procedure, subject to the provisions of subsection (a) of this section; or

"(B) organization which carries on activities in such State or political subdivision,

desiring to object to such enforcement or administration shall be permitted to intervene as a matter of right in the action brought under subsection (a) of this section within 60 days after the last publication required by paragraph (1) of this subsection or upon receipt of the complaint, as the case may be.

"(3) If there is a request for additional information in any action brought under subsection (a) of this section, the 60-day period during which no such qualification, prerequisite, standard, practice, or procedure may be enforced or administered shall commence when the information is received.

"(4)(A) It shall be the duty of the chief judge of the district (or in his absence, the acting chief judge) in which the action brought under this section is pending immediately to designate a judge in such district to hear and determine the action. In the event that no judge in the district is available to hear and determine the action, the chief judge of the district, or the acting chief judge, as the case may be, shall certify this fact to the chief judge of the circuit (or in his absence, the acting chief judge) who shall then designate a district or circuit judge of the circuit to hear and determine the action.

"(B) It shall be the duty of the judge designated pursuant to this subsection to assign the action for hearing at the earliest practicable date and to cause the action to be in every way expedited.

"(5) Notwithstanding any other provision of law, the appeal from any declaratory judgment entered into in any action brought under subsection (a) of this section, or any interlocutory order involving the resolution of any issue relating to the enforcement or administration of any such qualification, prerequisite, standard, practice, or procedure under section 5, shall be expedited to the greatest possible extent.

"(6) Notwithstanding any other provision of law, any declaratory judgment in any action brought under subsection (a) of this section shall be stayed until all appeals in connection with such a judgment have been exhausted or, in the event no appeals are taken, until the time for such appeals has expired.".

SEC. 3. (a) Section 14(b) of the Voting Rights Act of 1965 is amended by striking out "or section 5".

(b) Section 14(d) of such Act is amended by striking out "or section 5".

Mr. COCHRAN. Madam President, I yield back the remainder of my time and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BENTSEN. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECOGNITION OF SENATOR BENTSEN

The PRESIDING OFFICER. Under the previous order, the Senator from Texas (Mr. BENTSEN) is recognized for 15 minutes.

A SKILLED LABOR CRISIS—OCCUPATIONAL AND TRAINING OUTLOOK FOR THE 1980'S

Mr. BENTSEN. Madam President, this speech is the third in a series I am devoting to a review of the prospects for a labor, especially a skilled labor, shortage this decade.

My second speech explored this Nation's poor employment record during the seventies. I noted then that, despite a record 19 million new jobs created in the 1970's, a surge of 22 million new job entrants swamped our Nation's ability to create new jobs and to provide new workers with even the same quantity of capital at the work bench that we provided in the 1960's. The results were rising unemployment—an average number of jobless throughout the entire decade that far exceeded even the worst years of the 1950's and 1960's—and only slim productivity growth.

In my speech today, I turn away from a decade of labor surplus to a review of those occupations requiring skilled training which are expected to grow the fastest in the years ahead. In addition, I will explore what training capability exists presently to meet the demand for skilled labor in these occupations during the 1980's.

OCCUPATIONAL OUTLOOK: 1980–90

Employment in white-collar service sector occupations will increase the most through 1990. This growth will be a combination of job openings created by economic growth and by the retirement or death of persons active in those occupations. Typically, the latter factor is responsible for from 60 to 70 percent of job openings although that proportion is lower for newer occupations.

Those occupations which are expected by the Department of Labor to have the most job openings through 1990 are noted in table I. Secretaries, retail sales workers, janitors, and cashiers lead the list. I ask unanimous consent, Madam President, that a table, entitled "Table I: Annual Occupational Openings, 1978–90," be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE I.—*Annual occupational openings, 1978–90*

Occupation	Projected annual openings
Secretary/stenographer	305,000
Retail sales worker	226,000
Janitor	180,000
Cashier	119,000
Bookkeeping worker	96,000
Nursing aide, orderly, etc	94,000
Cook, chief	86,000
K–6 teacher	86,000
Registered nurse	85,000
Assembler	77,000

Source: "The Job Outlook in Brief," Occupational Outlook Quarterly, Department of Labor, spring 1980.

Mr. BENTSEN. The dominance of large and established occupations in table I reflects the reality that most job openings in our economy will occur in existing, already large occupations. It is very difficult for even rapidly growing occupations, such as computer operators, to make such a list until the number of existing employees and employee retirements become large.

The fastest growing occupations are generally not those with the largest absolute employment growth prospects. The 10 largest growth occupations based on Labor Department data for the 1980's, for example, include only one occupation listed on table I. Table II lists these 10 growth occupations, and I ask unanimous consent, Madam President, that a table, entitled "Table II: Largest Growth Occupations, 1978–90," be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE II.—*Largest growth occupations, 1978–90*

Occupation	Projected annual openings
Nurses aide, orderly, etc	94,000
Guard	70,000
Licensed practical nurse	60,000
Industrial machine repair	58,000
Computer operator	46,200
Bank clerk	45,000
Diningroom attendant, dishwasher	37,000
Homemaker/home health aide	36,000
Bank officer and financial manager	28,000
Teachers' aide	26,000

Source: "The Job Outlook in Brief," Occupational Outlook Quarterly, Department of Labor, Spring, 1980.

Mr. BENTSEN. Each of the employment categories in table II are projected to grow at least 50 percent from 1978 to 1990. A number of these are occupations which require some prior on-the-job or formal training. Similarly, a number of the occupations likely to experience the largest absolute growth during the 1980's noted in table I require previous training.

TRAINING

The type and length of training and education acquired for a specific job is typically related to employment security and stability, if not always to income. For example, new 4-year college graduates have an unemployment rate about one-half that of new high school graduates.

The increased job security, employment mobility, and income opportunities perceived to be available to men and women who received formal educational training beyond high school has made such training the most popular step to job advancement. In recent years, over 7 million Americans annually have enrolled in public or private vocational education courses and over 8 million men and women annually have enrolled in community or junior colleges, 4-year colleges or universities, or graduate schools.

The gamut of this vocational and college educational training varied from M.D. degree to courses in apparel design, auto repair, or accounting. Vocational education and formal college training dwarf that obtained from other non-on-the-job sources, including Government programs, the armed services, and apprentice programs registered with the Labor Department's Bureau of Apprenticeship and Training.

The Department of Labor collects fairly comprehensive data on the number of individuals participating in all of these educational, government, and apprenticeship occupational training programs. When matched with occupational growth data covering 1978–90, this Department of Labor training data can be used to assess employment prospects for many occupations.

SKILLED LABOR SHORTAGES

This comparison reveals that some occupations face a surplus of trained applicants now and on through the 1980's due either to lagging prospective employment growth or overly abundant training capabilities. A much larger number of occupations, however, were found to face a serious current or prospective shortage of trained workers in the 1980's.

In some cases, for example, computer specialists, prospective or present shortages exist because of rapid growth in job openings. But in other cases, especially for many of the blue collar occupations, it reflects a paucity of training programs for new workers sizable enough to permit the replacement of those experienced ones expected to retire during this decade.

A majority of the occupations appearing to face labor shortages fell into two groups. Either they require relatively little training, or they are white collar occupations, such as public relations, for which a variety of potential job claimants exist from among the 1.3 million annual graduates of American colleges and universities. A number of other occupations, however, were identified where apparent training capabilities are projected by the Department of Labor to fall significantly short of prospective employment levels in the 1980's, and where a substantial training period is typically required, as well. It is in these occupations that our Nation faces a skilled labor crisis.

The largest of these skilled labor occupations facing shortages in the 1980's are listed in table III. And, I ask unanimous consent, Madam President, that a table, entitled "Table III: Prospective Skilled Labor Shortages in Selected Occupations, 1978–90," be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE III.—PROSPECTIVE SKILLED LABOR SHORTAGES IN SELECTED OCCUPATIONS, 1978–90

Occupation	Projected annual job openings	Annual training shortfall
Industrial machinery repair	58,000	57,500
Blue-collar worker supervisor	69,000	50,000
Computer operator	46,200	28,000
Machinist	22,500	21,300
Computer system analyst	21,200	21,200
Machine tool operator and setup worker	22,600	19,000
Licensed practical nurse	60,000	19,000
Maintenance electrician	15,500	14,400
Computer technician	8,800	8,500
Forge shop worker and millwright	6,700	6,200
Television and radio repair	6,100	5,500
Tool and die maker	8,600	4,900
Stationary machine engineer	7,700	3,700

Source: U.S. Department of Labor, "Occupational Projections and Training Data," September 1980; U.S. Department of Labor, "Occupational Outlook Quarterly: Computers," Summer 1981.

Mr. BENTSEN. The Department of Labor data in table III include both the projected annual job openings and the number of these openings for which training has not been available in recent years from private or public vocational schools, apprenticeship programs, 2- or 4-year colleges or universities, graduate schools, or Government training programs.

The statistics in this table are striking: Our Nation confronts a shortage, for example, of 28,000 computer operators or 21,300 machinists each year of this decade. And, an accumulative skilled labor shortage will exist in excess of 250,000 persons annually or 2.5 million over the full decade in just the 13 cited occupations. Let me stress, Madam President, these are minimum estimates of the skilled labor shortage confronting our Nation. The actual total for all skilled occupation is substantially higher.

I will discuss some implications of this skilled labor shortage in a moment. First, let me stress that these Department of Labor data are most useful to indicate the scope rather than specific size of our skilled labor shortage. These data are constantly being updated and revised. For example, the Labor Department projected in 1980 that only 12,500 new computer operators and 7,900 new systems analysts would be required annually through 1990. Just this past summer, those numbers were revised sharply upward by the Department of Labor to the 46,200 and 21,200 respectively reproduced in table III. Data on training capabilities are similarly subject to revisions. Department of Labor data do not necessarily agree with other sources, either. For example, the U.S. Chamber of Commerce recently suggested that the number of tool and die workers needed annually may be 20-percent larger than cited in table III.

In addition, table III only reviews a handful of occupations. Marinas along the gulf coast seeking qualified diesel engine mechanics, brokerage houses on Wall Street trying to find capable business machine repairers, or airlines searching for qualified mechanics have their own valid opinions regarding skilled labor occupations where shortages exist.

In future weeks and months, I will be searching for data to supplement this Labor Department material. The first step in this effort is a hearing I will chair by the Joint Economic Committee's Subcommittee on Economic Growth and Intergovernmental Relations on November 3, in room 6226 at 10 a.m. Witnesses will include Dr. Karl Willenbrock of Southern Methodist University on behalf of the American Electronics Association, Mr. John Mandl, director of Training with the National Machine Tool Builders and Dr. Sheldon, president of Materials Research Corporation, a major fabricator of silicon products for our electronics industry.

The reasons for our shortage of skilled labor are varied. In some instances, such as computer personnel and practical nurses, it is simply burgeoning demand—demand that is far outstripping training capabilities. In other instances, it is the lure of white collar work, office work, or work in urban areas. Other factors include the attraction of jobs with short training periods over longer ones. Regardless of the causes, our skilled labor shortage has several significant implications for our economy.

IMPLICATIONS OF THE SKILLED LABOR SHORTAGE EFFECT ON PRODUCTIVITY

Efforts to boost our Nation's productivity will be less than fully effective until we address and reduce or eliminate our skilled labor shortage. The production and the productivity of our mines, factories, and service industries is directly affected by the quantity and quality of labor they use. In addition, valuable resources must be diverted to train men and women for these empty skilled labor slots—resources badly needed elsewhere for capital formation to boost the efficiency of plant and equipment.

Our skilled labor crisis is forcing American firms to spend tens of billions of dollars annually for stop-gap, in-house, on-the-job training. This shadow educational system is a patchwork quilt conceivably rivaling our entire higher education system in size. A study of the metalwork industry suggests, for example, that as much as two-thirds of all structured job training there now occurs on the job. Not all on-the-job training

is designed to address the shortage of skilled labor. But, with a bare minimum of 250,000 skilled labor jobs going begging annually since 1978—some requiring as long as 4 years of training to fill—a large share of on-the-job training today is ad hoc catch-up training by firms for jobs they cannot fill in any other fashion: the skilled labor they want to hire simply does not exist.

Madam President, I am a strong defender of on-the-job training. It is both appropriate and efficient for business firms to conduct essential on-the-job training of workers. My concern is that our Government may be forcing employers to bear an inordinate burden of the cost of providing the American worker with scarce and critical job skills—to the detriment of efforts to boost output and productivity. We spend tens of billions of taxpayers dollars to fund enormous higher education and training programs. These programs have worked well in many cases and I certainly believe they should continue, although with a greater focus on meeting our skilled labor shortage.

ECONOMIC GROWTH AND INFLATION

Our skilled labor shortage and its adverse impact on productivity is crippling efforts to attain robust economic growth without inflation. In fact, our Nation's soggy productivity performance is a major reason that we have had such a difficult time since the 1970's freeing ourselves from the morass of stagflation.

The shortage of skilled labor could loom as an even larger barrier in the future to the attainment of robust growth without inflation. Production bottlenecks arising from critically short skilled labor could be a noose limiting economic expansion just as it now threatens our ability to rapidly boost the national defense sector.

DEALING WITH THE SKILLED LABOR SHORTAGE

What alternatives do we have to deal with the skilled labor shortage? The answer has two complementary components. We can deal with it by adding more capital to the workplace in the form of labor saving equipment to stretch out the existing pool of skilled labor. That solution, incidentally, is open much more to large companies than to intermediate or small ones needing just one or two skilled craftsmen or engineers.

The other option is to redirect a portion of our Nation's education and training system to deal with the need for more skilled craftsmen, computer personnel, and so on.

Whichever course we choose—and we may well choose to pursue both options—we must realize that this skilled labor shortage is a crisis, it is an immediate problem, not a hypothetical one we may encounter in the future.

A skilled labor crisis is upon us today. The data in table III, for example, go back to 1978 as well as forward to 1990. It is a crisis that reaches deep into the heart of our factories, insurance companies, banks, and powerplants. The cadre of skilled, dedicated working men and women that forge our machines, keep our computers running, supervise plant assembly operations, and keep our industrial machinery oiled and rolling are not being replaced as they retire or the economy grows. It is a problem we face now and one requiring solutions now.

I do not intend, Madam President, to review today in detail what these solutions should be. I will in the near future. But let me offer one word of caution to those who suggest that the answer to our skilled labor problems rests entirely with technology. There is no doubt in my mind that adopting the Japanese approach of sharply increasing capital formation would help ease our shortage of skilled labor. But, turning even faster than we are now to labor saving machines, computers, and industrial robots may well aggravate rather than relieve our current skilled labor shortage. It is not the complete answer.

Let me conclude, Madam President, by noting that my next speech in this series will address the total labor supply outlook for the 1980's. It will review whether we may be facing a shortage of all types of labor this decade, rather than just labor for a number of especially skilled occupations.

I thank the distinguished Presiding Officer.

RECOGNITION OF SENATOR RUDMAN

The PRESIDING OFFICER. The Senator from New Hampshire is recognized.

SAUDI ARABIAN ARMS TRANSFER PROPOSAL

Mr. RUDMAN. Madam President, few proposals in recent memory have generated more intense controversy than the pending sale of F–15 fighter enhancements and AWACS surveillance aircraft to Saudi Arabia. At issue are whether, and how effectively, this arms package can serve our security interests in the Middle East, as well as the consequences for future U.S. policy options if it is rejected by the Senate.

Unfortunately, the brewing controversy is largely a product of contrasting perceptions fed by misguided rhetoric. Efforts to address the central strategic considerations upon which reasoned debate must pass judgment have been obscured by excessive claims, and undue emotional posturing.

In the absence of a more enlightened dialog, can it be said that the Senate will have faithfully discharged its constitutional responsibility to "advise and consent" on a major policy decision? I submit that it cannot.

There are, I believe, two fundamental questions which must precede a coherent approach to this matter. First, does the proposed arms transfer have a valid strategic rationale? And second, are there inordinate potential risks which might compromise the sale's presumed strategic value?

In this imperfect world, the fulfillment of varied, often seemingly contradictory, security objectives necessarily requires innovative statesmanship. The changing dynamics of international power no longer permit us the luxury of excluding from our policies nations with whom we lack universal political agreement.

Indeed, the essence of farsighted statecraft is precisely to cultivate those relationships and select those options which offer the greatest promise of satisfying multiple strategic purposes. As no less a visionary figure than the late Anwar Sadat once observed:

> He who cannot change the very fabric of his thought will never be able to change reality and will never, therefore, make any progress.

The challenges facing U.S. diplomacy in efforts to balance diverse interests in the Middle East are clearly enormous. In an area seething with turmoil, there are numerous opportunities for foreign penetration and exploitation of local grievances for larger policy objectives. Accordingly, Madam President, one must ask whether, and to what degree, this arms package can be a useful diplomatic instrument in promoting both an enduring Arab-Israeli peace settlement and regional stability.

It is beyond dispute that achievement of these goals, desired by all responsible parties, requires the active assistance of certain key Arab States. Contrary to the shrill pronouncements of some observers, however, it does not necessarily follow that the provision of advanced systems to one such state implies a repudiation of Israel's security concerns, or an irreversible "tilt" to the Arab position in a long-standing dispute.

Nor does this sale alter the fact that Israel is our most important regional ally, and that our commitment to her security must remain steadfast under all circumstances. Any compromise of that commitment would nullify, with dire implications, whatever temporary strategic benefits this sale might confer.

Guarantees of Israel's security cannot logically be divorced from consideration of the legitimate defense requirements of those Arab States capable of playing a constructive role in the quest for regional stability. The spectrum of potential threats to Saudi Arabia's security has unmistakably increased.

Given that nation's vast geographic expanses and critical location astride the Persian Gulf, few prudent strategists would deny that a sustained modernization of its tactical early warning and air defense systems is warranted. A Saudi Arabia unable to assure the minimum protection of its vital oil assets against external encroachments serves only the interests of those dedicated to continued unrest and regional fragmentation.

Furthermore, few experts would disagree with the proposition that lasting peace in the Middle East can only be accomplished by cooperation and mutual respect between Israel and moderate Arab nations such as Jordan, Oman, Sudan, Egypt, and Saudi Arabia. We must recognize that participation in the peace process necessarily entails risk on the part of both sides.

We must also recognize that it is human nature to reject creative risks, with the attendant probability of compromise, unless one feels a certain strength and

security. Thus, to the extent the proposed sale fosters such feelings within the Arab community, it enhances the possibility that the peace process will bear fruit.

Indeed, the ultimate measure of the Camp David framework, as the vehicle of a durable settlement, will be the extent to which it embodies the legitimate requirements and expectations of all parties sincerely aspiring to a just and peaceful order. Real security guarantees derive their basic value from the belief of all affected parties that the compromise made in the process have not substantially diminished national strength.

It will unquestionably be the supreme challenge of U.S. diplomacy to persuade those Arab nations genuinely fearful of Soviet incursions or domestic insurrection of the advantages offered by an expanded Camp David peace framework. Having identified Saudi Arabia as a necessary participant, I find it ironic that critics of the pending sale argue that Riyadh's opposition to the present Camp David structure disqualifies it as a prospective recipient of U.S. arms.

The distinction is somewhat spurious, since a similar charge could be leveled against other U.S. arms clients whose security is deemed essential to our strategic policies. Moreover, it is hardly the sum of astute diplomacy to deny an arms transfer for punitive reasons when that transfer may further our pursuit of regional equilibrium.

Having addressed and found compelling what I consider to be the strategic rationale for the sale, I turn now to the question of potential risks. Beyond serving as a convenient catch word for an arms package of several distinct components, the term AWACS has erroneously been construed by critics to signify a system with almost mystical operational capabilities.

The hyperbole that has surrounded the issue has been substantial, especially on the part of those arguing against the sale. We have all heard the following statements, neither of which is supported by empirical evidence:

First. Because some believe that Saudi Arabia is an unstable country, the risk is high that sophisticated technology delivered to the Saudis might fall into Russian hands.

Second. The delivery of AWACS to the Saudi Government will jeopardize the security of Israel.

Certainly, if these statements were supported by fact, they might well argue for the defeat of the proposed sale. However, the research that I have done has convinced me that the statements are emotional in nature, and, though well intended, might serve only to frustrate legitimate U.S. foreign policy needs and objectives while being substantially invalid in and of themselves.

The actual facts concerning the presumed technical capabilities of AWACS aircraft are as follows:

First. AWACS radar is essentially similar to radar available from several sources, including the British, the French, and the Russians. The computers used with the radar are commercially available. Indeed, only 10 of the more than 1,000 technical manuals required to operate AWACS are classified secret.

Second. The technology is 11 years old, and it is likely that by the time the AWACS are delivered in 1985, 4 years from now, the Soviets will have already deployed their new AWACS variant, the IL–76 Candid, currently under development. The AWACS radar system is not endowed with those mystical technical capabilities of which I spoke earlier. The radar cannot see vehicles on the ground, cannot collect electronic intelligence or transmit electronic countermeasures, and cannot take photographs.

Third. The hardware delivered to the Saudis in 1985 will be stripped of its U.S. encipherment gear, antijamming devices, encrypted air-to-air data links, computer data related to U.S. battle tactics, and other sensitive technologies which might present either a threat to Israel or a compromise of U.S. security should they fall into Soviet hands.

Fourth. In finalizing transfer arrangements, the Reagan administration has taken extreme care to insure that the combination of weapons systems does not provide the Saudis with battle management capabilities sufficient to jeopardize Israeli security or military options.

Among the principal safeguards designed to limit the AWACS' capabilities to their intended defensive function are requirements for timely data sharing with the United States, the nontransferral of information to third parties without explicit Presidential consent and the institution of effective security procedures for AWACS aircraft on the ground.

Fifth. A critical but curiously overlooked aspect of the sale is that delivery of the AWACS aircraft to Saudi Arabia would not commence until 1985. Thus, the United States has sufficient time to assess regional developments and determine whether the transfer of these systems still serves our security interests. Should Saudi Arabia's internal stability or foreign behavior become increasingly suspect, we clearly reserve, and would assuredly exercise, the right to rescind this commitment. A precedent exists in the case of Iran.

I believe the accuracy of these facts concerning the equipment that is the subject of the administration's proposal is unquestioned. The criticism relating to Israel's security is more subjective in nature. However, there can be little doubt but that President Reagan underscored the importance of the present United States-Israeli relationship when Mr. Begin visited this country in September.

Few can seriously doubt the depth of our commitment. And while the Israelis have stated that they believe the sale will jeopardize their security, I believe that this is a risk that both the United States and Israel should be willing to take under the circumstances. Due to the topography of the Israeli-Jordanian border, where mountains would "mask" the AWACS radar coverage of parts of Israel, existing Syrian and Jordanian radar stations in the hills east of Israel already monitor Israeli air activity almost as closely and much more efficiently than could Saudi AWACS.

Further, it is important to remember that the planes will not contain the command and control system which would allow the Saudis to coordinate an attack against Israel.

Finally, Madam President, although Saudi Arabia has never acknowledged the right of Israel to exist as a nation, that is not to say that such a position will continue in perpetuity. Few would have thought that the people of Egypt would respond so favorably to the Sadat initiative. It is precisely for this reason that the sale is merited.

Failure of the United States to sell the Saudis the AWACS package will only serve to underscore the alienation that already exists between Israel and Saudi Arabia inasmuch as the Saudis will perceive little in the way of community of interest between the three countries.

Should this sale be rejected, the Saudis would undoubtedly feel compelled to fill their military needs elsewhere, dealing with countries less concerned with Israel's welfare and less inclined to negotiate stringent controls on the use of such systems. Can anyone assert with confidence that such an alternative would not result in greater potential risks to Israel's security and prospects for a viable security structure? I, for one, cannot.

I reject the thought of Israel existing in a continuously hostile environment, isolated from the very community whose international aspirations it should share. I reject the probability of Soviet dominance in the Middle East much as Sadat rejected the probability of Soviet dominance in Egypt.

I accept the capacity for change in man, and I am willing to risk the present unstable and dangerous status quo in order to address the possibility of compromise and stability in the Middle East. And, most importantly, I accept the possibility that the Saudi leaders can find within themselves, given this impetus, the capacity for change which might lead them to participate in the peace process initiated by Anwar Sadat and Menachem Begin.

Failure to seize this initiative can only result in a tacit acceptance of continued turmoil and an unwillingness to act to bring about change. I, for one, am willing to trust in Israel's strength and understanding in order to take a step which may have more far-reaching consequences than the simple physical placement of five radar planes within a single country's boundaries. To do less would be to reject the notion that man can indeed control the circumstances which surround him.

Thus, Madam President, I stand before my colleagues today to announce my support for the administration's proposal.

Mr. BAKER. Mr. President, for the freshman Senator, conscientiously trying to adapt to the demands of life in the U.S. Senate, nothing could possibly be more trying, more difficult, and indeed more stressful, than the question of selling AWACS aircraft to Saudi Arabia.

The distinguished Senator from New Hampshire, Senator RUDMAN, in his first year as Senator, has dealt with this issue like a veteran. His actions have been thorough and responsible, and his final

determination which he announced today, was the result of exhaustive study and endless meetings with his constituents.

I am pleased, to say the least, that Senator RUDMAN is supporting the President, and supporting the sale to Saudi Arabia, and it is my expectation that his vote will be regarded as pivotal.

ORDER OF PROCEDURE

Mr. BAKER. Madam President, there is one more special order. I see the Senator from South Carolina in the Chamber, and I believe he wishes recognition as well.

I ask unanimous consent that the time to begin consideration of the pending business be extended from 10:30 until 11:15 a.m. and that the time after the expiration of the special orders be allocated to morning business, under the terms and conditions heretofore described.

The PRESIDING OFFICER (Mrs. KASSEBAUM). Without objection, it is so ordered.

RECOGNITION OF SENATOR HUMPHREY

The PRESIDING OFFICER. Under the previous order, the Senator from New Hampshire is recognized.

THE ACID RAIN DEPOSITION CONTROL ACT

Mr. HUMPHREY. Madam President, I wish to add my support, together with a number of my colleagues, for a measure introduced by the Senator from Maine (Mr. MITCHELL), S. 1706. This measure addresses the very real and complex environmental problem commonly known as acid rain.

The problem of acid rain is one which has many far-reaching implications. It is recognized that certain substances, primarily sulfur and nitrogen compounds emitted by powerplants and smelters, can combine with moisture to form droplets with a high acid content sometimes as acidic as vinegar. Acid precipitation includes not only rain, but also acidified snow, fog, hail, and frost, as well as sulfur and nitrogen dust. When sufficiently concentrated, these acids kill fish, damage material structures, and reduce crop and forest yields.

Acid rain is the indirect result of the burning of fossil fuels. This combustion produces sulfur dioxide (SO) and nitrogen oxide (NO) which are carried great distances, perhaps hundreds or thousands of miles, ignoring city, State, and national boundaries. During transit, these gases undergo transformations which produce sulfuric acid and nitric acid. These acids are washed out of the air by precipitation and settle on lands hundreds of miles away from their points of origin, causing a wide variety of environmental problems.

As a Senator from New Hampshire, I am particularly aware and concerned about acid rain. New Hampshire's streams, mountain lakes, and forests are showing the effects of acid rain. Several lakes in our State have been found to be so acidic that fish stocking is useless, and the waters are clear but lifeless. The high acidity of the soil is now threatening our already limited crop yields, and there is growing concern for the effect of acid rain on ground water. Acid rain is by no means a phenomenon which effects only Canada and the Northeast, but is a far-reaching problem, the effects of which are evident throughout the United States.

The problem of acid rain must be acted upon now. We can no longer afford the luxury of waiting for the completion of further studies while taking no action to alleviate the problem. A comprehensive study by the National Commission on Air Quality recommends additional controls on sulfur dioxide emissions to curtail acid rain. The commission also recommends that there be a significant reduction in the current level of sulfur dioxide emissions in the eastern United States by 1990 and that Congress should require such a reduction.

The Acid Deposition Control Act would implement this recommendation by requiring a reduction of annual emissions of sulfur dioxide in States bordering the Mississippi River, eastward, by 10 million tons from 1980 annual emissions. This overall reduction in sulfur dioxide emissions of 40 percent would have to be accomplished within a 10-year period. Each of these States shall determine its own plans for reducing sulfur dioxide emissions within its own borders which will contribute to an adequate share of the overall reduction. This legislation allows the States a great deal of flexibility. Furthermore, it is consistent with the recommendation of the National Governors' Association to allow States a reasonable period of time to reach agreement on reducing long-range transport of air pollutants.

Madam President, I am pleased to cosponsor Senator MITCHELL's bill, and I am confident that this bill will lay a solid foundation for Congress to address the problem of acid rain, a problem we can no longer ignore.

RECOGNITION OF SENATOR HOLLINGS

The PRESIDING OFFICER. Under the previous order, the Senator from South Carolina is recognized.

AWACS

Mr. HOLLINGS. Madam President, confronting a Soviet adversary vastly superior in manpower and numbers of weapons, the United States has one advantage—technology. When that advantage is compromised by the technology falling into the hands of the enemy, America courts serious trouble. When the Shah of Iran fell from power, F–14s and Harpoon missiles were left behind, seriously compromising the effectiveness of our weapons.

As a matter of fact, our Navy still lacks an effective countermeasure for a Harpoon attack on U.S. aircraft carriers and other ships, even while the Ayatollah has these lethal weapons. There is no education in the second kick of a mule. Experience has taught the wisdom of keeping American gear under American command and control.

In the closing days of Jimmy Carter's administration, a tentative decision was reached to sell five Boeing E–3A Airborne Warning and Control Systems (AWACS) to Saudi Arabia. Other elements were included in the package, but it has been AWACS that has generated so much controversy. The Saudis understood how tentative the decision was and knew that it would be up to the Reagan administration to set the final terms and conditions.

The opportunity existed to work out all sorts of agreements, such as a leasing agreement insuring Saudi participation but ultimate American control, or some other form of joint command. Similarly, we could have provided the E–2C Hawkeye—a similar but less sophisticated system which we have provided to the Israelis. But during the interregnum between administrations, our Air Force persuaded the Saudis of the need for AWACS.

The Air Force was anxious to sell the AWACS which it previously wanted to sell to the Shah. Luckily we did not leave AWACS behind when the Shah fell. The Reagan administration came in focusing on the country's economic mess, and devoting all its energies to the President's domestic program. A decision was hastily made to go ahead with the AWACS sale. So what was bad diplomacy at the outset was reconfirmed, and a decision was made without the homework having been done and with no sense of history.

The case for having an AWACS in Saudi Arabia is strong. The strategic importance of the Persian Gulf area cannot be denied. It is critical to our allies, critical to us. The threat from the Soviet Union is real, as are threats from Libya and the other radical regimes of the area. The United States has four AWACS operating in Saudi Arabia right now. They are American-owned and under American control. They have the most up-to-date equipment and they are flown by America's finest. If indeed there is a Soviet threat—and there is—we need our best there.

At the moment, we have a base, we have one AWACS flying defense missions 24 hours around the clock and a crew of 400 American technicians keeping the gear in shape and aloft. Now the agreement that the President wants approved is for the Saudis to take over the command and control of this weaponry and for us to lose our base. And the way the administration tries to persuade you that the technology is not such great technology is to tell you that the box aboard the AWACS that handles the scramble of the pilots to be vectored off to make their intercepts of enemy planes has been removed and the box giving off counterwarning electronic measures to confuse the enemy has been removed.

Certain it is that we do not want our F–14 pilots coming off the aircraft carrier decks and flying down the Persian Gulf to be vectored off by stripped-down AWACS and Saudi crews.

Losing our base and reducing us to this ridiculous situation is bad diplomacy. It is impossible to operate effectively in the Persian Gulf just from aircraft carriers.

The opposition is based and our defense requires a base too. The best solution, one which could have been accomplished before this became a cause celebre, would be to paint the Saudi flag on the side of the AWACS, but maintain American command and control. If ever the Soviets decide to go after the oil, it is only the United States that can keep them out.

With an Air Force of only a couple of hundred trained pilots, the Saudis would not last an hour. If it is America that will be fighting, I want our best AWACS out there and flown by Americans to detect the Soviet preparation and advance.

Just as Saudi Arabia faces an external threat, it also lives with internal problems. Certainly we should understand and heed them after our experience with Iran. There they tried to congeal a century of civilization into 30 years. Now Saudi Arabia tries to do it in 10 years. The Saudis have already experienced conspiracies and unrest and, of course, there last king was assassinated by a member of the family in 1975. In the past 8 years, Saudi Arabia has been subject to tremendous change. A 5-year, $391 billion modernization has been launched in an attempt to build up the infrastructure of a civilization.

A society with feudal remnants and tribal factionalism existing alongside fantastic wealth and modern cities is bound to suffer a certain trauma. The fundamental religious and tribal differences are historic and cannot be reconciled with money. In fact, money as in Iran makes the differences more acute. Since Mecca and Medina were taken from the Hashemite family (the family of King Hussein of Jordan), much of the Moslem world still considers them not a part of Saudi Arabia.

Many Hejazis are still not reconciled to the Saudi takeover of Mecca, and resentment by the more fanatical tribes in the country led to the 1979 seizure of the mosque at Mecca. In the oil area, there are 300,000 Shiite sympathizers of Iran's ayatollah. And with the division of those living in the Jabal Shammar area of the north who have barely received electricity, it is difficult to call the area a country.

There are as many foreign adult males as there are natives in the country, and many of those within the armed forces come from without. We know that in the last several years there have been at least two defections of Saudi pilots, with their planes, to Egypt and Iraq.

To an outside observer, the army and national guard appear stable. But we thought Anwar Sadat's army was completely loyal, too. Women are still chattels, Madam President. They are not allowed to drive a car. And stealing is still punishable by a cutting off of the hand. Whether a feudal royal family can navigate through the perilous currents of change and retain its rule is an open question.

Certainly there is no intention to offend the Saudis over this issue. But an enduring friendship must inevitably be based on realism. There are a number of instances in which the Saudis have been helpful to us. But let us not go overboard—they have not kept oil prices down to benefit the United States. As a matter of fact, when we provided the first F–15's back in 1978, which I supported, a barrel of oil was selling for $12.70.

Today that barrel of Saudi Arabian oil is $32. We cannot blame the Saudis for acting like cartelists, but neither should we ascribe unrealistic motives. The dominant member of a cartel almost always undersells the other members, and the Saudis are trying to figure a way to maximize profits over the long haul of decades, without driving the United States into a Manhattan-type project to develop alternative energy sources.

And recent developments are beginning to show that even the Saudis may have raised oil prices too high for their own good. None of this is to say we cannot be friends. Saudis live in a different part of the world and inevitably, they are going to have different relations with the Syrians, the Iraqis, and the Palestinians than we do.

But if Anwar Sadat could go to Jerusalem and make peace, the Saudis at least could have approved the Camp David accords. Instead they joined in statements in the U.N. less than a month ago that the United States perpetrated "aggression" against Libya last August and that the United States is "a threat to international peace and security."

Anyone wishing Saudi Arabia well should not want to see that country dragged into any subsequent war with Israel. But by providing Saudi Arabia with AWACS equipment, it immediately becomes a target in any flareup in the Middle East. For example, if Israel and Syria go at it again the first requirement of Israel would be to take out the surveillance capability of a Saudi AWACS. And Saudi Arabia, which has been indirectly involved in past wars against Israel, would now be directly involved. In this sense, AWACS is very destabilizing.

The bottom line is insuring ultimate American control. We must be able to insure that this plane is not in the position to conduct surveillance of other countries like Israel. And we must be able to insure either the evacuation or the destruction of the planes in the face of external attack or internal collapse. None of the Senate resolutions or administration assurances that I have seen thus far provides that kind of clear and enforceable agreement.

If an AWACS conducts surveillance of Israel and coordinates any attack on that country, the damage will be done long before our diplomats show up to complain. With less dramatic but still damaging misuse of AWACS, it would be even more difficult for the United States to enforce any penalties—without invading the sovereignty of another country. These are the kind of contingencies that must be dealt with, but they are not the kind of issues that can be handled with certainty and enforceability in a written agreement between the nations.

Some argue that the President must be given the leeway to do as he sees fit in security matters such as this. Of course many people arguing this now took a very different tack when Jimmy Carter presented his Panama Canal treaties. But even more to the point, if concerned citizens and Senators had not made their opposition to President Carter's disastrous SALT II Treaty known, and fought hard against it, we would have gone ahead and given every strategic weapons advantage to the Soviets.

In the last analysis, the AWACS sale is someone's attempt to solve a problem on the cheap. It smacks of the quick-fix—a cure-all which will provide for America's defense without ruffling anyone's feathers. It has been our unwillingness, over a decade and more since the British left, to build an adequate national security presence in the gulf area that led to the AWACS concept. But we are involved in serious business here—deadly serious to our security and that of our allies. Just as there is no painless way out of our domestic economic troubles, so there is no easy way to provide our national security. I want an American policy first and then a decision as to what planes and weapons go where. But with AWACS, we have let the airplane sale dictate the national security policy.

I shall oppose the sale because it is not in the national interest.

I thank the distinguished Presiding Officer.

Mr. CRANSTON. Madam President, will the Senator yield?

Mr. HOLLINGS. I would be delighted to yield to the distinguished Senator from California.

Mr. CRANSTON. I congratulate the Senator from South Carolina for his carefully thought-out statement in opposition to the AWACS sale to Saudi Arabia.

This new statement of opposition comes from a man who is recognized as a great expert on national defense. It comes from a Senator who is recognized as a staunch advocate of whatever is needed for national defense in terms both of our own structure, and whatever we need to invest in it, and in terms of our relationship with other nations, and what we do to bolster their strength so that they are reliable allies of the United States.

With that background and that record, the statement by the distinguished Senator from South Carolina is of the utmost significance in terms of the developing opposition to the sale in the Senate and in the country. The Senator's statement will strengthen the momentum against the AWACS transaction that began to develop in the Senate yesterday with the minority leader's announcement of his opposition.

I think we should be particularly impressed by the stress the Senator lays on the loss of a base in Saudi Arabia, a

sorely needed base for our national security purposes, which the transaction of the sale of planes to Saudi Arabia would entail. That would be a very significant setback in view of our need for bases in the Middle East and the search we have been carrying on, fruitlessly for the most part, for such bases.

We also need to be concerned about the downgrading of the capacities of the AWACS if we transfer them to Saudi Arabian control, a downgrading that will not occur if we maintain that control; and that downgrading of their capacities poses new risks to national security and, quite possibly, new risks to the lives of Americans who might become involved in military activities under unfortunate circumstances in the Middle East.

I would like to say that it appears to me that opposition to the sale is becoming so firm, as Senators think the matters through, that I no longer believe, as I did yesterday, that the sale would necessarily be saved now by a Saudi compromise allowing us to share in control and crewing of the AWACS planes.

There are other issues involved in this matter apart from the AWACS. There is the matter of the Sidewinder missiles, which many Senators and many people in the country, who are expert on military matters, do not feel should be transmitted to the Saudis for a variety of national security reasons.

There is the matter of the augmentation of the F–15 planes which many of us feel should not occur, particularly in light of the commitments made to this body, the Senate, by the previous administration when those planes were transmitted, sold, to Saudi Arabia.

There are the points beyond this made by Senator ROBERT C. BYRD in his remarkable speech of yesterday; among them the question about the advisability of simply piling up arms on both sides in the Middle East when there is reason to question whether that increases security in that volatile part of the world.

There is the question of the effect, as the minority leader pointed out yesterday, of the transaction on Israel's ability to be forthcoming and positive in seeking to resolve her differences with her Arab neighbors over the West Bank and the problems of the Palestinians.

Strengthening Saudi Arabia's military capacities is not a move designed to strengthen Israel's willingness to be forthcoming on that very sensitive issue.

The minority leader also made a very important point about what the effect of the transaction would be on Saudi Arabia's ability to be forthcoming in cooperating with America as we seek to lead the way toward a more stable peace in the Middle East based upon the Camp David process. The decision by the United States to proceed with the transaction with Saudi Arabia might very well cause the Saudi Arabians to have to be even more independent than they have been already, and they have been very, very independent of American leadership, and they would have to be more independent quite possibly in order to demonstrate that they are not an American satellite and are not controlled by the United States.

It now appears to me with the leadership of such significant people as the minority leader and the distinguished Senator from South Carolina joining the battle against the AWACS, that it will be defeated not by the narrow margin that many have been predicting but by a margin that looks quite possibly to be an increasingly strong and very significant one. I believe that that outcome would be beneficial to our country, send a clear message to all of our dedication to our own national security interests, first of all, and if that is the outcome, the distinguished Senator from South Carolina will deserve a great deal of credit for that result.

Mr. HOLLINGS. Madam President, the distinguished Senator from California has been entirely too flattering, but let me state that credit would be the last thing I would look for. These decisions really try men's souls, as they say. It is not an easy one. I have close friends in Saudi Arabia, I have a South Carolina entity doing business in that country, and a distinguished former Ambassador to Saudi Arabia who is a South Carolinian. There is no one for whom I have a higher regard than Ambassador John West, and he knows that. And it was really on account of our personal friendship that I have withheld. I have not wanted to get into an out-front position, and I certainly do not want any credit. I would like not to even be heard from again on this subject.

Let me just state that the distinguished Senator from California has handled the opposition to this particular sale in a most deliberate and considered fashion. I think that should be said in a sense of both sides. There really has not been any strong pressure. It has been a frustrating situation wherein every Senator connected with the particular problem has wished that perhaps we could save face for the administration, save face for the Saudis, continue our present situation there, and work out something whereby we could certainly respond to the military needs of Saudi Arabia as a country.

AWACS for their particular air force is going to have to be a responsibility of the United States of America for some years to come.

Much is said about the technology, like the Sidewinder. As the distinguished Senator from California pointed out, the technology has been on board now for 10 years and the Soviets would like to have it. They talk like technology is extinguished overnight. They would like to have the technology and the computerization software of our own AWACS. It cannot and it should not be compromised.

Of course, that is the bottom line in our national security position, because we do not hope to match the Soviets and our adversaries tank for tank, soldier for soldier. The little bit of superiority that we have in technology has kept us free in the free world.

I thank the distinguished Senator and I thank the distinguished Chair.

Mr. CRANSTON. Madam President, if the Senator will yield for one more moment, the Senator from South Carolina may not want credit, he may not seek credit, but credit he will get, because he is a man whose record in this field of national defense is well known and widely respected. The fact that he came down on this side of the issue will have a profound impact on the thinking of others.

There may be some blame associated with this, also. I know the Senator recognizes that when you take a position you get both credit and blame.

But he has taken a statesmanlike and very important position today that cannot help but have effect on the thinking of many others.

I think there will be greater understanding of the opposition to the AWACS sale by those who have been uncertain about why it is being opposed because of the very direct and effective way in which the Senator made plain his reasons for his opposition. I thank him once again.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. There will now be a period for the transaction of routine morning business that will last until 11:15 a.m.

Mr. CRANSTON. Madam President, as soon as Senator HATCH arrives we could end morning business and proceed to the consideration of his amendment by unanimous consent.

Pending his arrival, I suggest the absence of a quorum, unless some other Senator wishes recognition.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATCH. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

WATCH WHAT THEY DO, NOT WHAT THEY SAY: INFLATION TALK VERSUS INFLATION ACTION IN THE ADMINISTRATION

Mr. ROBERT C. BYRD. Mr. President, Prof. Milton Friedman, an economic guru of the administration, recently wrote of the mixed signals sent by the administration about its commitment to winning the battle against inflation.

On the one hand, Professor Friedman points out, the administration "has taken the elimination of inflation as one of its major objectives." The administration "has repeatedly warned the financial community that it will make a mistake if it counts on continued high inflation." That is what the public hears.

However, if the public watches the administration act, the story is vastly different. While administration spokesmen warn against inflationary expectations, Professor Friedman points out that—

The U.S. Treasury Department is telling the financial community the precise opposite—not in words, but in actions.

What Professor Friedman had in mind are the astonishingly high interest rates the Treasury is willing to make taxpayers pay for 20 and 30 years. Interest rate records have been set four times this year in Treasury bonds which we will all be paying off for 20 to 30 years. Just a few weeks ago, on September 30, the Treasury commited taxpayers to shell out a record 15.7 percent interest a year for the next 20 years.

What kind of message is this sending to the financial markets and small businessmen of this country? While the administration issues soothing words to millions of small businessmen and workers that lower inflation is around the corner, it is doling out hard cash to the handful of investors who can afford to invest $10,000 for 20 years. Can we blame workers or small businessmen for asking why the Treasury Department agrees to pay out almost 16 percent interest for 20 years, if it believes inflation will drop shortly.

Soon, the Federal Government will be paying more than $100 billion a year in interest on the national debt. Interest payments will be the third largest category of expenditures made by the Federal Government, yet the administration continues to lock the taxpayers into interest rates it contends will be unnecessarily high in a short time. If inflation drops into the 4.8-percent range predicted by the administration for 1984, taxpayers will be giving well-heeled investors real payments of nearly 11 percent a year, compared to the 2 or 3 percent real interest considered appropriate by historic standards.

The Congress and citizens of this country deserve to know just which message the administration really believes—the words it issues about low inflation and interest rates, or the actions it takes by agreeing to pay astronomical interest rates for 20 and 30 years into the future. Should we watch what they say, or should we watch what they do, as my good friend, Senator HOLLINGS, admonished us to do a few weeks ago?

I believe we have little choice but to watch what they do, and that is what concerns me here. If the administration believes we are destined to live with 16 percent interest rates for the rest of this century, it should tell the American people the truth. If, on the other hand, the administration believes that interest rates and inflation will drop soon, as it says, the Treasury Department should explain why it continues to waste the taxpayers' money by issuing long-term bonds at current high rates.

I ask unanimous consent to include in the RECORD a list of the 15 interest rate records set by Treasury Department obligations this year.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

RECORD HIGH INTEREST RATES

Listed below are the all-time record high interest rates paid on various Treasury offerings which have been established since January 20, 1981.

Treasury offering	Auction date	Rate (percent)
13-week bills	May 22, 1981	16.750
26-week bills	Aug. 24, 1981	15.854
52-week bills	May 14, 1981	14.623
	Sept. 3, 1981	15.056
2-yr notes	May 20, 1981	15.72
	July 22, 1981	15.88
	Aug. 20, 1981	16.26
7-yr notes	June 30, 1981	14.07
	Oct. 7, 1981	15.40
10-yr notes	May 6, 1981	14.56
	Aug. 5, 1981	14.98
20-yr, 1-month bonds	Mar. 26, 1981	13.21
	June 25, 1981	13.45
	Sept. 30, 1981	15.78
30-yr bonds	May 7, 1981	13.99

A TRILLION DOLLAR DEBT DAY

Mr. HARRY F. BYRD, JR. Mr. President, today is a red-letter day—or perhaps I should say it is a deep red, red-ink figure day.

On October 19—this past Monday—the national debt subject to limit was $993.3 billion.

The debt is increasing at the rate of several hundred million dollars each day. It is estimated that today—the 22d day of October, 1981—the national debt crosses the trillion dollar mark.

Thus, the national debt has more than doubled during the past 7 years. The interest cost to service the debt during the current fiscal year will exceed $100 billion—approximately one-half of the total defense expenditures.

Today, October 22, 1981, is indeed a red-letter day and a red-ink day.

HIGHWAY TRUST FUND EXTENSION

Mr. SYMMS. Mr. President, I would like to take this opportunity to thank my many colleagues who supported the Senate passage of the highway trust fund extension. I would particularly like to thank the Senator from Kansas, Senator DOLE, whose help was invaluable in bringing this matter to a vote on the floor. I also thank my kind colleagues, Senator STAFFORD, chairman of the Environment and Public Works Committee and Senators BENTSEN, RANDOLPH, and MOYNIHAN whose support and work on the Transportation Subcommittee is much appreciated.

As has been pointed out previously, the amendment allows for a simple extension of the highway trust fund for a period of 5 years.

It extends the tax collecting authority through October 1, 1989, the trust fund mechanism through September 30, 1990, and residual activity through 1991.

This extension is necessary to establish a multiyear highway program. In the course of extensive hearings, here and throughout the country, it became apparent that a major problem faced by the States in their highway programs was the uncertainty caused by short-term Federal highway policy. By establishing a multiyear Federal program, we will take a major step in ending this uncertainty and aid the States in developing long-term, long-range planning. Such planning is necessary to maximize the benefit from each dollar spent on our Nation's highways.

The trust fund extension is a major factor in maintaining and continuing our highway programs. The programs obligated now in fiscal year 1982 will be paid for with money coming from the trust fund as it is currently established. Programs developed during the mid-1980's will be funded from trust fund moneys taken into the fund in the late 1980's. Without a trust fund extension we cannot authorize a multiyear program which is essential for the building, maintenance, and repair of our Nation's vitally important highway system. The Senate's passage of the trust fund extension was an important and responsible step in furthering sound Federal highway policy.

AUTHORITY FOR ANNUAL RATES OF COMPENSATION OF EMPLOYEES OF THE SENATE UNDER AUTHORITY OF THE FEDERAL PAY COMPARABILITY ACT OF 1970

Mr. THURMOND. Mr. President, for the record, I am submitting the order of the President pro tempore of the Senate, signed by me on October 5, 1981, effecting the authority for annual rates of compensation of employees of the Senate.

The order follows:

ORDER OF U.S. SENATE, OFFICE OF THE PRESIDENT PRO TEMPORE

By virtue of the authority vested in me by section 4 of the Federal Pay Comparability Act of 1970, it hereby—

Ordered,

DEFINITIONS

SECTION 1. For purposes of this Order—

(1) "employee" includes an officer (other than a United States Senator); and

(2) "annual rate of compensation" does not include longevity compensation authorized by section 106 of the Legislative Branch Appropriation Act, 1963, as amended, merit compensation authorized by section 109 of the Legislative Branch Appropriation Act, 1979, or any other additional compensation that may hereafter be authorized by law.

RATE INCREASES FOR SPECIFIED POSITIONS

SEC. 2. (a) The annual rates of compensation of the Secretary of the Senate, the Sergeant at Arms and Doorkeeper, and the Legislative Counsel (as such rates were increased by prior orders of the President pro tempore) are further increased by 4.8 percent and, as so increased, adjusted to the next higher multiple of $1.00. Notwithstanding the provisions of this subsection, an individual occupying a position the annual rate of compensation for which is determined under this subsection shall not be paid at any time, by reason of the promulgation of this Order, at an annual rate in excess of either of the following: (1) the annual rate in effect for positions in level III of the Executive Schedule under section 5314 of title 5, United States Code, or (2) an annual rate of compensation which is $1,000 less than the annual rate of compensation of Senators.

(b) The annual rates of compensation of the Secretary for the Majority and the Secretary for the Minority (as such rates were increased by prior orders of the President pro tempore) are further increased by 4.8 percent and, as so increased, adjusted to the

next higher multiple of $1.00. Notwithstanding the provisions of this subsection, an individual occupying a position the annual rate of compensation for which is determined under this subsection shall not be paid at any time, by reason of the promulgation of this Order, at an annual rate of compensation in excess of $500 less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in subsection (a) of this section.

(c) The annual rates of compensation of the five Senior Counsels in the Office of the Legislative Counsel and the maximum annual rates of compensation of the Assistant Secretary of the Senate, the Parliamentarian, the Financial Clerk, the Assistant to the Majority Leader for Floor Operations, and the Assistant to the Minority Leader for Floor Operations (as such rates were increased by prior orders of the President pro tempore) are further increased by 4.8 percent and, as so increased, adjusted to the next higher multiple of $1.00. Notwithstanding the provisions of this subsection, an individual occupying a position the annual rate of compensation for which is determined under this subsection shall not be paid at any time, by reason of the promulgation of this Order, at an annual rate of compensation in excess of $1,000 less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in subsection (a) of this section.

(d) The maximum annual rate of compensation of the Director of the Office of Classified National Security Information in the Office of the Secretary of the Senate (as such rate was increased by the prior order of the President pro tempore) is further increased by 4.8 percent and, as so increased, adjusted to the next higher multiple of $1.00. Notwithstanding the provisions of this paragraph, an individual occupying the position the annual rate of compensation for which is determined under this paragraph shall not be paid at any time, by reason of the promulgation of this Order, at an annual rate of compensation in excess of $2,000 less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in subsection (a) of this section.

CHAPLAIN'S OFFICE

SEC. 3. The annual rate of compensation of the Chaplain and the maximum annual rate of compensation for the position of secretary to the Chaplain are increased by 4.8 percent and, as so increased, adjusted to the next higher multiple of $1.00. Notwithstanding the preceding provisions of this section, the Chaplain shall not be paid at any time, by reason of the promulgation of this Order, at an annual rate in excess of the annual rate in effect for positions in level IV of the Executive Schedule under section 5315 of title 5, United States Code.

OFFICES OF THE SENATE

SEC. 4. (a) The following individuals are authorized to increase the annual rates of compensation of the employees specified by 4.8 percent and, as so increased, adjusted to the next higher multiple of $1.00:

(1) the Vice President, for any employee under his jurisdiction;

(2) the President pro tempore, for any employee under his jurisdiction;

(3) the Majority Leader, the Minority Leader, the Majority Whip, and the Minority Whip, for any employee under their respective jurisdictions;

(4) the Majority Leader and the Minority Leader, for the Assistant to the Majority Leader for Floor Operations and the Assistant to the Minority Leader for Floor Operations, respectively (subject to the provisions of section 2(c) of this Order);

(5) the Secretary of the Conference of the Majority and the Secretary of the Conference of the Minority, for any employee under their respective jurisdictions;

(6) the Secretary of the Senate, for any employee under his jurisdiction (subject to the provisions of section 2 (c) and (d) of this Order);

(7) the Sergeant at Arms and Doorkeeper, for any employee under his jurisdiction;

(8) the Chaplain, for his secretary;

(9) the Legislative Counsel, subject to the approval of the President pro tempore, for any employee under his jurisdiction (other than the five Senior Counsels);

(10) the Senate Legal Counsel, for any employee under his jurisdiction (subject to the provisions of section 701(b) of the Ethics in Government Act of 1978);

(11) the Secretary for the Majority and the Secretary for the Minority, for any employee under their respective jurisdictions; and

(12) the Capitol Guide Board, for the Chief Guide, the Deputy Chief Guide, the Assistant Chief Guide, and the Guides of the Capitol Guide Service.

(b) The limitation on the rate per hour per person provided by appplicable law immediately prior to October 1, 1981, with respect to the folding of speeches and pamphlets for the Senate, is increased by 4.8 percent. The amount of such increase shall be computed to the nearest cent, counting one-half cent and over as a whole cent.

(c) The limitations on the gross compensation which may be paid during a fiscal year to employees in the Offices of the President pro tempore, the Majority Leader, the Minority Leader, the Majority Whip, the Minority Whip, the Secretary of the Senate, the Sergeant at Arms and Doorkeeper, the Secretary of the Conference of the Majority, the Secretary of the Conference of the Minority, the Secretary for the Majority, and the Secretary for the Minority are each increased by 4.8 percent and, as so increased, adjusted to the next higher multiple of $1.00.

(d) Except for those officers and employees referred to in section 2 of this Order, no officer or employee within the Office of the Secretary of the Senate and no officer or employee within the Office of the Sergeant at Arms and Doorkeeper shall, for any period of time, be paid gross compensation at an annual rate which is in excess of either of the following: (1) the maximum rate prescribed in section 105(f) of the Legislative Branch Appropriation Act, 1968, as amended (as such rate is adjusted in section 7(b)(1) of this Order and prior orders of the President pro tempore), or (2) an annual rate of compensation which is $2,500 less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in section 2(a) of this Order.

COMMITTEE STAFFS

SEC. 5. (a) Subject to the provisions of section 105 of the Legislative Branch Appropriation Act, 1968, as amended (as modified by this Order), and the other provisions of this Order, the chairman of any standing, special, or select committee of the Senate (including the majority and minority policy committees and the conference majority and the conference minority of the Senate), and the chairman of any joint committee of the Congress whose funds are disbursed by the Secretary of the Senate, are each authorized to increase the annual rate of compensation of any employee of the committee, or any subcommittee thereof, of which he is chairman, by 4.8 percent and, as so increased, adjusted to the next higher multiple of $1.00.

(b)(1) The maximum annual rates of "$65,234", "$67,878", and "$71,625" appearing in section 105(e) of the Legislative Branch Appropriation Act, 1968, as amended (as provided in section 5(b)(2) of the Order of the President pro tempore of October 1, 1980) are each further increased by 4.8 percent and, as so increased, adjusted to the next higher multiple of $1.00, and shall be deemed to refer to the figures "$68,366", "$71,137", and "$75,063", respectively.

(2) Notwithstanding the provisions of paragraph (1) of this subsection, any individual occupying a position on the staff of a standing committee of the Senate or the majority or minority policy committee of the Senate to which such rate applies shall not be paid at any time at an annual rate in excess of $5,900, $4,600, and $2,000, respectively, less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in section 2(a) of this Order.

(3) Notwithstanding the provisions of paragraph (1) of this subsection, any individual occupying a position on the staff of any special or select committee of the Senate or the conference majority or conference minority of the Senate to which any such rate applies shall not be paid at any time at an annual rate in excess of $5,900, $4,600, and $2,500, respectively, less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in section 2(a) of this Order.

(4) Notwithstanding the provisions of paragraph (1) of this subsection, any individual occupying a position on the staff of any joint committee of the Congress whose funds are disbursed by the Secretary of the Senate to which any such rate applies shall not be paid at any time at an annual rate in excess of $5,900, $4,800, and $2,900, respectively, less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in section 2(a) of this Order.

SENATORS' OFFICES

SEC. 6. (a) Subject to the provisions of section 105 of the Legislative Branch Appropriation Act, 1968, as amended (as modified by this Order), and the other provisions of this Order, each Senator is authorized to increase the annual rate of compensation of any employee in his office by 4.8 percent and, as so increased, adjusted to the next higher multiple of $1.00.

(b) The table contained in section 105(d)(1) of such Act shall be deemed to read as follows:

"$621,054 if the population of his State is less than 2,000,000;

"$639,068 if such population is 2,000,000 but less than 3,000,000;

"$682,488 if such population is 3,000,000 but less than 4,000,000;

"$738,381 if such population is 4,000,000 but less than 5,000,000;

"$784,111 if such population is 5,000,000 but less than 7,000,000;

"$832,151 if such population is 7,000,000 but less than 8,000,000;

"$857,557 if such population is 8,000,000 but less than 9,000,000;

"$884,348 if such population is 9,000,000 but less than 10,000,000;

"$924,536 if such population is 10,000,000 but less than 11,000,000;

"$977,194 if such population is 11,000,000 but less than 12,000,000;

"$1,017,381 if such population is 12,000,000 but less than 13,000,000;

"$1,068,654 if such population is 13,000,000 but less than 15,000,000;

"$1,119,928 if such population is 15,000,000 but less than 17,000,000;

"$1,171,201 if such population is 17,000,000 but less than 19,000,000;

"$1,209,540 if such population is 19,000,000 but less than 21,000,000;

"$1,247,879 if such population is 21,000,000 or more.".

(c)(1) The second sentence of section 105(d)(2) of such Act (as modified by prior orders of the President pro tempore) is further modified to read as follows: "The salary of an employee in a Senator's office shall not be fixed under this paragraph at a rate less than $1,155 per annum or in excess of $37,648 per annum except that (i) the salaries of three employees may be fixed at rates of not more than $68,366 per annum, (ii) the salaries of five employees may be fixed at rates of not more than $66,286 per annum, and (iii) the salary of one employee may be fixed at a rate of not more than $69,289 per annum".

(2) Notwithstanding the modification made by paragraph (1) of this subsection, any individual occupying a position to which a rate referred to in clause (i), (ii), or (iii) of such modification applies shall not be paid at any time at an annual rate in excess of $5,900, $5,400, and $2,500, respectively, less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in section 2(a) of this Order.

(d) The figures "$183,801" and "$61,267" appearing in subsections (a), (b)(1), and (b)(2) of section 111 of the Legislative Branch Appropriation Act, 1978, as amended (as provided in section 6(d) of the Order of the President pro tempore of October 1, 1980), shall be deemed to refer to the figures "$192,624" and "$64,208", respectively.

GENERAL LIMITATION

SEC. 7. (a) The figure "$1,102" appearing in section 105(f) of the Legislative Branch Appropriation Act, 1968, as amended (as provided in section 7(a) of the Order of the President pro tempore of October 1, 1980), shall be deemed to refer to the figure "$1,155".

(b)(1) The maximum annual rate of compensation of "$71,625" appearing in such section (as provided in section 7(b)(1) of such Order of October 1, 1980) is further increased by 4.8 percent and, as so increased, adjusted to the next higher multiple of $1.00, and shall be deemed to refer to the figure "$75,063".

(2) Notwithstanding the provisions of paragraph (1) of this subsection, any individual occupying a position to which such rate applies shall not be paid at any time at an annual rate in excess of $2,500 less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in section 2(a) of this Order.

NOTIFYING DISBURSING OFFICE OF INCREASES

SEC. 8. In order for an employee to receive the increase in his annual rate of compensation pursuant to section 4, 5, or 6, the individual designated to authorize such increase for that employee shall notify the Disbursing Office of the Senate in writing that he authorizes such increase for that employee and the date on which such increase is to be effective. Such increase shall become effective as provided in section 105(a)(2) of the Legislative Branch Appropriation Act, 1968, except that if the notice required by the preceding sentence is given within five days (not counting Saturdays, Sundays, or holidays) after the date on which this Order is issued, such increase may become effective on or after October 1, 1981.

LONGEVITY COMPENSATION

SEC. 9. The figure "$441" contained in section 106(b)(1) of the Legislative Appropriations Act, 1963, as amended (2 U.S.C. 60j(b)(1)), shall be deemed to refer to the figure "$463".

OFFICE OF THE SENATE LEGAL COUNSEL

SEC. 10. (a) Notwithstanding any other provision of law—

(1) the Senate Legal Counsel shall not be paid at any time at an annual rate of compensation which is in excess of the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in section 2(a) of this Order, and

(2) the Deputy Senate Legal Counsel shall not be paid at any time at an annual rate of compensation which is in excess of $2,500 less than the annual rate of compensation which is now or may hereafter be in effect for those positions referred to in section 2(a) of this Order.

(b) The foregoing provisions of this Order, other than subsection (a) of this section, shall not be applicable to the annual rate of compensation of the Senate Legal Counsel or the Deputy Senate Legal Counsel.

EFFECTIVE DATE

SEC. 11. Sections 1 through 10 of this Order are effective October 1, 1981.

STROM THURMOND,
President pro tempore.

OCTOBER 5, 1981.

APPOINTMENT BY THE VICE PRESIDENT

The PRESIDING OFFICER (Mr. QUAYLE). The Chair, on behalf of the Vice President, appoints the Senator from South Dakota (Mr. PRESSLER) as a congressional adviser to the second session of the Regional Administrative MF (AM) Broadcasting Conference of the International Telecommunications Union, to be held in Rio de Janeiro, Brazil, November 9 to December 18, 1981.

DEATH OF BYRD WALL SAWYER

Mr. CANNON. Mr. President, it is with deep regret that I announce that my State of Nevada has this week lost one of its most noted and illustrious citizens through the passing of Byrd Wall Sawyer.

Mrs. Sawyer was well known to the Nevada historical scene through her coauthored books, "Our State Nevada" and "Here Is Nevada." She received her A.B. at the University of Idaho and her M.A. in American history at the University of California, Berkeley.

Upon her marriage to Dr. Harry W. Sawyer in 1923, the couple moved to Fallon, Nev., where she immediately began a long and active career in many phases of Nevada life, including education, politics, writing, public speaking, and public service activities in many volunteer fields. She was the stepmother of three sons: Dr. Harry W. Sawyer, Jr., of San Francisco; Grant Sawyer, former Governor of Nevada; and the late Milo Sawyer, Baptist minister.

In recognition of her outstanding work, the Nevada State Education Association gave her its Educator of the Year Award in 1961. The University of Nevada made her the recipient of its Distinguished Nevadan Award in 1971.

Her last book, "Nevada Nomads," resulting from an extended period of research, is the first comprehensive study of the Nevada sheep industry in print. The illustrations are from private collections, while the bibliography makes a significant contribution to the history of the sheep industry in Nevada.

CANCUN: REDISTRIBUTION OR REJUVENATION?

Mr. HELMS. Mr. President, today the President of the United States is meeting at Cancun with the leaders of the so-called Third World. The meeting is billed as part of the North-South dialog based upon the report of the Brandt Commission. There has been plenty of commentary in the press about the basic assumptions of the Brandt Commission, and its call for the developed nations to provide more assistance to the underdeveloped nations as a matter of right. Without such a redistribution of wealth, the theory goes, there will be a worldwide explosion of the havenots against the haves.

In such highly emotional rhetoric, it is difficult to find any constructive criticism of the process. The essential element in the North-South dialog is ultimately not economic, but social. It is an argument about how society should be organized, and what kinds of freedoms people should have. Too often, not even the United States has been articulate about the charges made in the North-South dialog, and although we have rejected some of the more obviously extremist calls for redistribution, our rebuttal has been made within the terms of the dialog—that is to say, we argue over tactics, or the amount of concessions that we should make, rather than over principle.

But there are indeed two different world views at issue. The premise of the North-South dialog is openly socialist, that is, that the state should be the instrument of social distribution. And the corollary is that the successful and competent should support the unsuccessful and incompetent at levels equal to their own.

This notion is not only incompatible with our own ideas of freedom and property rights, but we know from experience that it is a way to degrade economic development and to stifle freedom and initiative. Such proposals can be made only by those who are without compassion for the poor people of the world, and are more interested in advancing programs of state control and power than in advancing the freedom and dignity of all men. Many of the advocates of North-South redistributionism may be sincere, but they seem to be blind to the consequences of their program.

Mr. President, one of the great experts of the world in the question of underdevelopment in countries is Dr. Karl Brunner, of the Universities of Rochester, N.Y., and Bern, Switzerland. Dr. Brunner is reknowned for his incisive criticisms of the economics of world development, and his accurate analyses of the social factors which are overlooked by many economists.

Last September, Dr. Brunner presented a paper to the Trade Policy Center in London, in which he examined the pretenses of the Cancun conference, and offered some concrete alternatives.

Dr. Brunner calls for a reversal of the strategy which we have followed up to now. He says that this reversal should be characterized by a greater reliance on markets and lowered levels of political

controls and regulations. Within this concept, he calls for a stable financial framework, geared to a fixed exchange rate system, which would offer substantial advantages for trade and investment.

Second, Dr. Brunner says that we should encourage open and well functioning capital markets all around the world. This goes against the trend in Europe and elsewhere. But open capital markets would make proper resources available to underdeveloped nations for projects of economic merit.

The third point is that the functions of such international agencies such as the IMF, the World Bank, and OEDC should be reevaluated. These institutions should be oriented away from social redistribution and soft loans, toward sound banking practices. Too often, soft loans result in a redistribution only toward the elite oligarchies that are prominent in many Third World countries, and never end up benefitting the poor.

Finally, we should address the domestic policies of the Third World nations. If such nations do not adopt domestic policies that provide economic discipline and market freedom, we cannot expect them to benefit from a rejuvenated world economic order.

Mr. President, I ask unanimous consent that Dr. Brunner's paper be printed in the RECORD at the conclusion of my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE INTERNATIONAL ECONOMIC ORDER AND THE UNITED STATES*

(By Karl Brunner)

I. A CHALLENGE TO U.S. POLICY

Conferences rarely settle the fate of nations. The social and political evolution is shaped by more pervasive currents influencing events over a longer horizon. But conferences frequently yield informative signs bearing on the nature of the underlying social trends. They provide moreover significant links in the ongoing political process. They offer tactical opportunities to influence future approaches to a range of problems with the admissible formulation of the issues. More or less organized processes of negotiations and "political exchanges of views" are neither neutral or irrelevant events. They often contribute to focus a political trend more clearly and condition a legacy of political and social problems in the future.

The conference to be held within a few weeks in Cancun (Mexico) should be viewed in this context. It confronts the United States and the western democracies generally with a set of social and political issues inherited from past decades. This inheritance resulted from a trend substantially influenced by policies of the United States pursued over recent years. This legacy partly shaped by conceptions and actions of our policymakers requires at this stage our careful attention. The issues may appear on a first glance to involve hardly much substance beyond some financial or diplomatic technicalities. But this view seriously misconceives the fundamental importance of the issues to be addressed at the meeting. It fails to penetrate to the substance of the problem confronting western democracies. The President of the United States will face questions bearing on the nature of our international economic order with serious implications for the future of our society.

These questions are closely associated with a basic issue about the social organization of western nations. The nature of the issues may be more clearly perceived against the background of the Reagan Administration's determined effort to reverse the socio-political trend in the United States. The President faces in Cancun the heritage of a political trend radically opposed to his conception about the social and political organization of a free society. This trend was effectively represented under the banner of a "new international economic order" (NIEO). The political forces advicating a new order increasingly exploited over the past decades the institutional opportunities offered by the United Nations Organization. The strategic conception of a "Marsch durch die Institutionen" articulated by Marxian groups during the 1960's in West Germany was successfully accomplished by advocates of a NIEO at the UNO.

A series of conferences, including the United Nations Conferences on the Law of the Seas, and UN assembly meetings provided the political focus for the NIEO. The recently published Brandt Report initiated by the World Bank under Mr. McNamara renewed the momentum of this idea in the world's political market. An understanding of the problem facing U.S. policymakers in this range requires thus that we examine the nature of the ideas advanced by the advocates of a NIEO and the groups supporting the Brandt Report. A clarification of the problems inherent in this set of ideas should ultimately determine the direction and content of U.S. policy. Section II outlines the general thrust of the NIEO and the Brandt Report. The following section explores the conception inherent in these programs and critically evaluates their proposals. Section IV examines the issues associated with a new international economic order in the context of the recent conferences on the law of the seas. The last section advances a proposal for an alternative policy consistent with the Reagan Administration's fundamental socio-political views and also consistent with the survival of free societies.

II. THE NEW INTERNATIONAL ECONOMIC ORDER

1. The United Nations and the New International Economic Order: [1]

A review of events at the United Nations highlights essential aspects of the political program and the nature of the issues facing President Reagan. Two important resolutions were adopted during the 1970's by the general assembly of the United Nations. It adopted first the "Declaration on the Establishment of a New International Economic Order" designed "to eliminate the widening gap between developed and developing countries." "The declaration recognizes that 'remaining vestiges of . . . colonial domination . . . and neocolonialism in all its forms' are among the 'greatest obstacles to the full emancipation and progress of the developing countries.' It also asserts that an 'even and balanced development' is impossible to achieve 'under the existing international economic order' and emphasizes that the inherited economic order 'is in direct conflict with current developments in political relations.' It is then proposed that developing countries participate actively, fully, and equally 'in the formulation and application of all decisions that concern the international community.' And so we read that 'international cooperation for development is the shared goal and common duty of all countries.' The 'broadest cooperation of all States, . . . whereby the prevailing disparities in the world may be banished,' should be forthcoming, and the 'full permanent sovereignty of every State over its natural resources and all economic activities' should be respected.

"Secondly, the General Assembly launched itself on a supplementary resolution introduced as a 'Programme of Action on the Establishment of a New International Economic Order.' Colonialism and neocolonialism are again properly exorcised and condemned. The actions proposed are subdivided categories covering trade and raw materials, transportation, the international monetary system, regulation of multinational corporations, and an array of means strengthening the UN system in the field of international economic cooperation. The provisions under the first item are intended to assure larger real revenues from exports and more aid and financial contributions in one form or another. Transportation costs are to be lowered (somehow), at least for the developing countries. In the range of international monetary problems, developing countries are to be 'fully involved as equal partners' in all decision making. Return to a system of fixed exchange rates is mentioned with some emphasis. This proposal requires supplementary attention to the provision of international liquidity, with a link to financial grants for developing countries. The 'link' is thus naturally tied to the restoration of fixed exchange rates. The last section of the action program lists an extensive schedule for utilizing or expanding UN institutions and in this manner rasing the leverage to be exercised by Third World countries."

A long line of conferences sponsored by the United Nations Organization somewhat separated from the rhetorical centers of a NIEO also deserve our attention. The United Nations Conference on the Law of the Sea (UNCLOS) attended to settle various levels of territorial jurisdictions bearing on the control over surfaces and bottoms of the seas. The increasing value of fishing resources and of resources embeded in continental shelves induced unilateral actions imposing differential and extended jurisdictions pertaining to fishing rights, extraction of resources and political sovereignty. New technologies promise future access to the mineral deposits in the deep seas for vast investments with corresponding returns. The wealth of the deep seas made potentially accessible by the evolution of technology and business organization unavoidably stirs many interests These temptations became visible in the proposals discussed over many years. The crucial proposal, supported by Secretary of State Kissinger, would have instituted an international authority controlled by member nations of the UNO. This authority could have licensed private operators for a limited period. Most importantly however, the authority would have its own organization (the Enterprise) extracting deep sea minerals. The international agency would have enjoyed remarkable powers of implicit taxation over the citizens of the First World. It would have been authorized to impose charges and fees on private operators. Most particularly, it would have enjoyed the power to force private operators to provide their technology to the authority's Enterprise. The voting arrangement and the institutional structuring of the new agency, designed to exploit the "common heritage of mankind in the inest of mankind", clearly implied that the Third World nations would dominate policies, procedures and the wealth of the new agency at a severe social cost to the First

Footnotes at end of article.

World. This aspect of UNCLOS corresponded thus fully to the ideas launched by the advocates of a NIEO. It forms an integral part of the institutional structuring aspired by the Brandt Commission.

2. The Brandt Report:

In 1980 a report was published on the "North-South: A Programme for Survival." The report was prepared by a prestigious international group chaired by Willy Brandt. It renewed the basic theme of the new international economic order with appropriate diplomatic vagueness in important details supported in contrast by a rather dramatic broad vision. The Brandt Commission views the restructuring of the international economic order as a crucial condition assuring peace, fostering the economic development of the Third World with prosperity for all. Peace, development and prosperity are moreover achieved by means satisfying the requirements of justice. The economic development of the Third World forms actually the key to everything else in the Brandt Commission's vision of the world. War seems dominantly caused by poverty and the corresponding political frustrations. Economic development produces thus prosperity and lowers the level and range of potential conflict. The North-South relations offer under the circumstances the decisive political instrument affecting our chances of survival. The suitable institutionalization of these relations in accordance with the program for a "new international economic order' appears moreover to satisfy the "common interests" of both North and South.

The NIEO substantially modifies the two basic conditions allegedly maintaining the poverty of the Third World. Persistent poverty is attributed by the vision guiding the Brandt Report to insufficient natural resources and the imbalance of political power between the nations of the First and of the Third World. The NIEO would remove the first obstacle by a massive transfer of wealth from North to South channeled via a wide array of old and new international agencies. The second obstruction to rapid economic development would be corrected with the aid of a new set of socio-political arrangements. These arrangements are designed to provide the nations of the Third World with some political control over the planned redistribution of wealth. The Report thus visualizes an enlarged range and power of international policy institutions and agencies.[2]

III. A CRITIQUE OF SOCIAL ANALYSIS AND GLOBAL APPROACH INHERENT IN THE NIEO AND THE BRANDT REPORT

1. Morality, Ideology and the Need for Analysis:

The underlying vision and the social message influencing proposals for a NIEO and most particularly the Brandt Report immediately address a powerful trend in western thinking. They fit naturally into a pervasive socialist conception of the world with the corresponding socio-political and normative aspirations. The usual appraisals of this influential intellectual tradition suffer unfortunately under a prevalent disposition to ignore their implicit cognitive basis. The intellingentsia market seems dominated by a sense that these issues essentially express "ideological commitments" to be judged in terms of their normative appeal. This is regrettable and hardly serves a rational approach to the assessment of alternative social organizations. "Ideology" may enter our discourse and intellectual endeavors in many ways, but beyond the operation of ideological attitudes remains a substantive core among the problems envisaged. This core challenges our cognitive aspirations and also challenges a commitment to rational and effective action. The moral or normative appeal of the message advanced with proposals of a NIEO or with the Brandt Report yields no rational basis for the policies advocated. It offers in particular no assurance that the global approach to restructure the world economy will ever produce consequences approximating the hopefully advanced promises of peace, development and general prosperity. We need to penetrate beyond the layers of moral feelings to the substantive core of the vision producing Brandt Report and supporting the claims for a NIEO.

2. An Underlying Vision of the World:

The vision of the world, i.e. the underlying theory about the world, guiding these policy documents is ultimately controlled by two basic strands of thought. One strand advances a specific view of man living in a social context. The other strand involves a notion of justice probably influenced by ancient biological conditioning from the earliest phases of human evolution.[3] The two strands jointly determine an approach to political issues and social organization outlined by the views summarized in section II.

The first strand, bearing on our intellectual perception of man, is well represented among the social sciences by a sociological model of man. This model envisions man as an essentially passive agent controlled by social norms and forces beyond his interacting reach and imposed on him as alien events. Man's general disposition to behave, beyond specific actions and responses, is seen to emerge from cultural conditioning determined in the context of prevailing social environments. Profit seeking, usually identified with self-interested behavior, is interpreted to result from a social context organized by markets based on private property. Self-interested behavior is expected to wane in the context of non-market institutions with little, if any, relation to private property.

The second strand supplements the perception of man in society with an endstate conception of justice. This conception defines justice in terms of a specific outcome pattern of the social process. The inequity of a society is measured under the circumstances by the deviation of its characteristic operation from the outcome pattern deemed to represent the standards of justice. The argument associated with this notion of justice advances the claim that a political organization of society must be designed to assure outcomes closely approximating the standards of justice.

The two notions, while logically separate, jointly imply that nonmarket institutions (i.e. a political structure) should control the economic and social coordination of society. The perception of man assures us moreover that the institutional requirement imposed by an endstate notion of justice poses really no problem. This model determines the essential malleability of men necessary for this purpose. The same perception also implies that replacing coordination by markets with political mechanisms lessens the attraction of "commercial values" and raises the quality of human attention. This implication of the sociological model reenforces a commitment to an endstate view of justice.[4]

3. An Alternative View of the World:

The two basic strands of thought influencing much of contemporary social thinking were not unchallenged by the development of the social sciences. They need to be juxtaposed to two alternative views which shaped our professional thinking in these matters for a substantial period. Economic analysis, influenced by the remarkable insights of the Scottish philosophers of the 18th century, emphasized the resourceful, evaluating and maximizing behavior of man. A searching behavior copes with the environment and gropes for improvements in accordance with the agents' interest and own understanding. This mode of man yields radically different implications about the operation of market processes and political mechanisms than the sociological model. It acknowledges that general dispositions to behave essentially form an evolutionary heritage independent of the social environment. Self-interested behavior is recognized under the circumstances to express a pervasive disposition built into man's nature. It follows that profit seeking is only one particularly form of self-interested behavior. Other forms will dominate in the context of non-market institutions. The variability of specific actions and behavior patterns thus emerges in the context of general dispositions in response to the pecularities of the social environment.

The alternative vision implies in particular that the consequences of complex political institutions and agencies usually differ substantially from their motivating intentions. It also implies that all attempts to institutionalize endstate views of justice are doomed to a dismal failure. They produce ultimately economic stagnation with a serious loss of freedom. Most importantly, the endstate pattern of justice will never be realized and remains forever a futile hope. The alternative perception of man is thus typically linked with a process conception of justice defining justice in terms of the characteristics of the process, or the rules of the social game, irrespective of its detailed outcome.

The choice between the two perceptions of man essentially involves a selection between two alternative empirical hypotheses about the world. We may specify observations accessible to all persons which offer discriminating evidence bearing on the two hypotheses. This evidence ranges from crime to marriage, divorce and many other events and patterns beyond the usual market place. This evidence, covering many different cultures, political organizations and historical periods, substantially confirms the intellectual legacy of the Scottish philosophers. But the non-cognitive and normative appeal of the sociological model with its prospects of social salvation maintains its political thrust in the public arena. This thrust is well protected by the linkage with the endstate notion of justice thoroughly threatened by the alternative view of man.

4. The Brandt Report: Central Message and Diagnosis:

The alternative views of man and concepts of justice provide us with a framework for our critique of the social messages and political proposals advanced by the Brandt Report. Major strands of this Report are conditioned by the underlying model of man and conception of justice.

Several commentators noted for example the Report's pronounced attention to distribution (or re-distribution) in contrast to a minor attention to production. This emphasis is supplemented with a systematic preference for political "solutions" over a social coordination based on market processes. This pattern favoring an increasing use of political regulation and controls is reenforced by a remarkable disregard for their unintended and often dominant consequences. The redistributionist message naturally conforms under the circumstances to the "common interest of mankind." We are told in a similar vein that the mineral deposits at the bottom of the seas form the "common heritage of mankind." We also note the pervasive disposition to define categories of "needs" requiring specific political actions directed to each "need". The explanation of poverty in terms of inadequate natural resources and "political imbalance" and the explanation of wars or political conflicts in terms of poverty offer further examples for our purposes. We find thus a wide range of arguments and detailed judgments ultimately determined by the

Footnotes at end of article.

basic vision guiding the Brandt Report and justifying the NIEO.

An examination of the argument developed by the Brandt Commission demonstrates however the crucial role assigned to the explanation of poverty in this whole structure of thought. This specific explanation, anchored by the underlying vision, determines the host of detailed views and proposals. Our critique thus addresses this central arch of the intellectual building presented to us by the Brandt Commission.

5. The Brandt Report: It's Explanation of Poverty and Associated Issues:

The more or less deliberate and conscious commitment to an endstate principle of justice yields immediately the emphasis on redistribution. The sociological model of man justifies in this context the required shift from market processes to political institutions and non-market arrangements. It also assures us that we need not worry about any negative effects on production and resource allocation produced by the operation of the institutions transferring wealth from "North to South." This result follows from the model's neglect of the role of specific incentive structures associated wtih various institutional arrangements. It disregards therefore the most crucial conditions fostering economic growth and raising the welfare of broad social groups. The "vacuous, aimless, reactive man" visualized by the sociological model cannot rise by resourceful groping and coping in the context of prevalent opportunities. Changes in opportunities due to lessened political constraints and regulations yield no systematic change in behavior. Wealth acquisition seems predetermined under the circumstances by the bounty of nature or the relative power of the nation. This theme, permeating the views developed at the UNO over the last decade, dominates the vision of the Brandt Commission.

The role assigned to political relations and the "imbalance of political power" determines the emphasis attributed to "colonialism and neocolonialism." A colonial relation produced in this view a redistribution of wealth from the colony to the "controlling country." The colonial powers enriched themselves at the cost of their colonies. The thesis of neocolonialism asserts that formal independence of the former colonies does not change, by itself, the basic reality of "exploitation". With the persistence of political imbalance favoring the western nations the pattern of wealth redistribution from the "South" to the "North" persists in many subtle ways. Thus emerges the contention that the massive transfer of wealth from the "North to the South" proposed under the NIEO should be understood as the compensation required by standards of justice for inequities imposed by colonial and neocolonial patterns.

This explanation of poverty with its further ramifications essentially rejects the insights due to Adam Smith. These insights developed into the core of modern economic analysis and were successfully applied over the past centuries to the social organization of western societies. The pervasive influence of entrenched and accustomed ideas is revealed, however, with a remarkable force by the Brandt Commission. The statements are advanced by a group of intelligent and sincerely concerned persons in spite of the serious inadequacy of the underlying vision. They are made moreover in spite of the falsehood of the claims advanced. An array of nations with bountiful or meager resources visibly demonstrates that possession of natural resources is poorly related to economic development and relative affluence. We find a similar absence of any significant correlation between political status and affluence. The facts thoroughly reject the Brandt Commission's central allegations. Relative poverty or wealth of nations cannot be reduced to the comparative state of natural resources and political power.

The alternative hypothesis combined with the rejection of an endstate principle of justice directs our attention to a very different set of policies more effectively designed to combat poverty and hunger. Little virtue is attributed to massive redistribution. It has no moral claim and only obstructs processes of economic improvement in both North and South. The political arrangements required for purposes of persistent and large redistribution lower the incentives to use current resources efficiently or to develop future resources. They raise on the other hand incentives to invest resources in the political process. The large flow of resources made available to nations of the Third World will moveover be used in accordance with political interests of the ruling oligarchies. The whole structure of thought guided by the underlying perceptions fails to understand that poverty can only be alleviated ultimately by raising the productivity of man's effort and by encouraging man's incentives and opportunities to apply such efforts. Apart from vague references to the importance of domestic policies pursued by nations of the Third World, the basic thrust of the vision associated with the NIEO and the Brandt Report denies the relevance or importance of domestic institutions and policies. The sociological model of man hardly alerts us, as the alternative view does, to the entrenched obstruction and obstacles to economic improvement built into the institutional structures and fostered by the economic policies of many nations in the Third World. A transfer of wealth will not remove these impediments and contributes therefore little to economic development. It will impoverish on the other hand the First World, lower its rate of growth and retard the increase in welfare of the mass of its citizens.

The Brandt Commission and the official line of the United Nations Organization thus misdirects our attention. We need to recognize, beyond political power and the rich possessions of non-human resources within specific national locations, the role of institutions and their consequences bearing on man's opportunities. A social coordination organized by political mechanisms and agencies stifles opportunities and obstructs imaginative and probing initiatives. An open society coordinated by market processes unleashes in contrast the energies of human resources. A pattern of political control hardly ever produced the lofty promise of rising welfare for widely dispersed segments of the population. The political control structure yields in general a police state, economic stagnation, permanent poverty and highly unequal distribution of affluence. The experience of the postwar period demonstrates the remarkable differences within the Third World between market-oriented and socialist nations. The operation of markets assures in general a substantially closer association between costs and returns of individual projects and activities. Individuals can also expect to capture the potential rewards from activities within the range of their opportunities.

The empirical irrelevance of the political explanation of poverty effectively destroys two central pillars supporting the claim for a new international economic order. The contention of systematic exploitation by the "North" of the "South" cannot be further maintained. Neither does there exist any empirical support for a more explicit Marxian reinterpretation of the "colonial relation". An economic analysis of colonial history tentatively suggests that "colonialism" was characterized by a wealth redistribution within the "mother country" benefitting the groups associated with the colonial venture at the expense of all other groups. This internal redistribution was accompanied by an external redistribution favoring the colonies quite directly. We can assert with more certainty that colonialism raised in general the economic welfare of the people in the colonies.[5] The moral claim for compensation vanishes under the circumstances with the contention of past (colonialism) and current (neo-colonialism) exploitation. The support for redistribution must rely solely on the endstate principle of justice. Such reliance cannot be reconciled with any relevant empirical analysis of social and political institutions without forfeiting all hope for a society offering some chances at human achievement.

The Brandt Commission's explanation of wars and conflicts is closely associated with its theory of poverty. Once we accept the underlying vision we will argue that levels of conflict rise with large differences in wealth. We would also argue that a complex set of institutional arrangements transferring wealth to the poorer nations lowers the level of conflict. But this position cannot be justified by economic analysis, nor is it compatible with the facts. The patterns of political conflict are not dominated by relative wealth positions. We do not possess at this point a positive theory of conflict yielding a full range of adequate explanations. We have sufficient knowledge, however, to establish the inadequacy of some explanations. We also do know sufficiently about the operation of political institutions to conclude that the arrangements proposed under the NIEO and incorporated into the Brandt Report would actually raise the level of political conflict. The existence of political institutions controlling the redistribution of wealth offers strong incentives to all participants associated with the institution to invest efforts and resources for purposes of political conflict designed to modify the total volume and the shares of the transfer.

IV. THE APPROACH TO THE DEEP SEA RESOURCES AS AN EXAMPLE OF THE NIEO AND A RATIONAL U.S. POLICY ALTERNATIVE

Our critique of the proposals for a NIEO advocated by international organizations and the Brandt Commission need not be confined to its general characteristics and consequences. We have been offered a specific and important example of the political thrust inherent in the NIEO. An examination of this representative case provided by advocates of a globally negotiated international order reveals the fundamental problem confronting the U.S. Government.

The occurrence of vast resources at the bottom of the deep seas is well known for many decades. Improving technologies and the expectations of rising real prices of major resources changed the economic significance of the deep sea mineral deposits. The world became aware of the potential wealth in the seas beyond the resources embedded in continental shelves and the potential for fishing. Access to these resources attracted political attention on various levels bearing on different dimensions of potential control. The resulting reexamination led to some differentiation in jurisdictional claims. The range covering fishing and access to continental shelves was substantially widened relative to the line marking territorial sovereignty. The geographically more extensive rights are weaker in the sense that they are limited to specific resources without constraint on innocent use of the surface. These changes were set in motion over the past decades and seem to converge to an international consensus without the benefit of an international treaty.

The negotiations for such a treaty proceeded however over many years. They attempted to impose beyond the settlement of jurisdictional changes a pattern of international control and regulation under the auspices of the UNO on the economic exploitation of the deep sea mineral beds.

Footnotes at end of article.

These negotiations were suspended by the Reagan Administration just before the U.S. delegation prepared for a final agreement. The issue is still pending and the U.S. Government needs to formulate a policy in this matter. I already emphasized in section II the close connection between the treaty proposal under negotiation over the past decade and the conceptions governing the NIEO. An execution of the treaty would have provided an important victory for the advocates of a NIEO. The arrangement specified in the proposal would have imposed substantial transfers of wealth on Western nations. An impressive political slogan seemed to obscure the prospects to be expected under the proposal. It was claimed that the sea bed resources are the "common heritage of mankind." This formulation appeared to justify without further argument the institutional arrangement addressed by the global negotiations. The U.S. delegation was moreover controlled by a coalition formed by the State and Defense Departments unable or unwilling to assess the consequences of the treaty in terms of relevant socio-political criteria. The U.S. representatives hardly contested moreover the political phraseology enshrined in many documents. They seemed either unaware of its political significance or found it irrelevant in terms of their own tactical purposes. But this means that the U.S. Government will have to articulate very explicitly and determinedly the new course of policy.

What should this course be? There is a clear lesson so far. There is really neither use nor need for any further global negotiation. We should effectively cancel the heritage of suspended negotiations. I may quote at this stage from an interesting study attending to the issues: "The seabed provisions would indeed be massively inefficient from the perspective of the world as a whole and quite hostile to the economic interests of the United States. Unfortunately these defects are not cancelled out by so-called advantages elsewhere in the treaty as the conventional wisdom appears to hold. Almost every other group of treaty articles at best conveys advantages for the United States that we can not realistically expect the treaty or the parties to it to enforce and at worst conveys real disadvantages for the United States relative to the state of the world without the treaty. The navigational protections for which we have traded away so much of our economic interests are either unnecessary or redundant; the coastal articles are inferior for us to the coastal-state resource rights that would exist without a treaty; and the seabeds provisions are beyond reason.

"The treaty would be so unsatisfactory to the United States that the Senate would probably reject it. In view of this the wiser course of action would be for the Reagan administration to reject it straightforwardly at the conclusion of its own interagency review. Setting aside this huge but flawed experiment in multilateral negotiations will make the world as a whole wealthier, have more fish and less pollution, and have greater supplies of increasingly scarce minerals. But these objectives can be realized only if the United States reverses the course of its present ocean policy and thereby ends a decade-long bipartisan mistake."[8]

And what else should the U.S. Government do? Congress already passed legislation enabling U.S. business firms to operate in the deep seas. Such operations would proceed in the tradition of enclosure applied to unowned resources. A detailed assessment of this state of affairs indicates that the absence of formalized and internationally codified property rights would not seriously affect incentives to invest. The cost of search and detailed explorations of the sea bottoms even for locations close to already operating enclosures prevents the occurrence of a free rider problem with its resulting underinvestment. Neither will there occur a common pool problem, typically appearing in oil extraction, leading to overinvestment. The enclosure procedure would seem to approximate an efficient use of resources ultimately beneficial to everybody in the context of an open competitive system. Lastly, the U.S. Government should invite other nations to pass similar legislation. The mutual recognition of such legislation involves the corresponding mutual recognition of the respective enclosures. Thus would emerge some international arrangement better geared to raise general welfare than the redistributional scheme with the delegation of implicit taxing powers of the original treaty proposal. Whatever risks may still face private operators under the circumstances would remain small compared to the uncertainty produced by the regulatory miasma to be expected under the treaty provisions administered by a body essentially hostile to the United States.

V. A RATIONAL POLICY FOR THE UNITED STATES

A critique of past trends and associated propcsals is not sufficient. We need a positive program for an international economic order offering a better promise for human aspirations and welfare. This program follows immediately from the underlying analysis guiding our critique of the Brandt Commission's Report.

1. General Aspects of the Program and the Need for Articulation:

A reversal similar to the redirection of our domestic policies need be initiated over a broad range. It involves a shift from an essentially political conception of social coordination controlled by public agencies and institutions to a market oriented approach. The international trend depicted in earlier sections, while not fully accepted in detail by the U.S. government, was neither opposed nor really understood by our foreign policy establishment. More or less subtle concessions by U.S. representatives in important aspects frequently characterized a tactical behavior of the U.S. Government. This behavior reflected little strategic sense about the nature of the problem confronting us and its implications for our future welfare. The signs of strategic failure in U.S. international economic policymaking can be noted over a wide range of events. We observe them in pretentious reports to the State Department about the results and achievements of conferences. Such reports managed to translate strategic failure and incomprehension of basic issues into positive achievements of U.S. policy.[9] The long series of conferences on the law of the seas, reveals from its inception that crucial aspects of the negotiations bearing on the exploitation of sea bed resources were hardly ever systematically analysed. There is no clue for instance that Secretary of State Kissinger or other important officials of the State Department understood the serious consequences associated with their proposals supporting an international Authority controlling the extraction of mineral deposits. We also observe meetings and conferences covering a wide range of issues where the position and view of the western nations, most particularly of the United States, was not articulated. Immediate tactical concerns addressed to the state of the conference overshadowed strategic considerations pertaining to the longer-range course of international economic policy.

We also need to consider, however, that past decades confronted our policymakers within the range of our interest with radically new situations and problems. The application of an "institutional weapon" and the extensive use of "ideological warfare" are comparatively new developments for which our foreign policy establishment is not really prepared. Their traditional training and reflexes offer no guidance on how to develop a rational strategy to meet this new type of assault on our position.

The "institutional weapon" involves a systematic infiltration of existing institutions and agencies. This infiltration is designed to exploit the available apparatus for specific interests and purposes in a long-range strategy of political control. The "ideological warfare" supplements this "institutional" infiltration. It uses an integrated and global set of ideas systematically exploited to advance a particular political interest. This set of ideas offers a comprehensive and alluring interpretation of the world.

This interpretation is designed to "explain" all actions pursued by one side to the protracted conflict as expressions of a desire for peace and justice, and to reveal all actions of the other side as expressions of evil designs hostile to peace and justice. Some major patterns of such "ideological warfare" with a corresponding erosion of the western position in the political arena may be recognized in the effective propagation of key words and their meaning in the public vocabulary.

We are frequently inclined to dismiss questions of language and the use of specific words as matters of minor significance. But words and formulations often develop a momentum in the political market. They impose constraints on future negotiations, affect the questions to be examined and how they will be considered. They subtly influence the nature of agendas and the expectations or meaning associated with a program. Words and formulations are not neutral, their consequences condition future behavior. A party to the conflict can be effectively weakened by subtly imposing on it a defensive attitude via an implicit acceptance of linguistic regulations determined by the opponent. This pattern emerges with remarkable clarity in the series of UN conferences on the NIEO, or on other issues as for instance crime, at UNESCO conferences or at UNCLOS.

We note in the latter case the effective use made by interested parties of the slogan that the deep sea mineral beds are "the common heritage of mankind." This characterization was hardly a neutral description of the relevant facts. It was advanced to justify a specific political program, a program which would have yielded little benefit for mankind however. The U.S. representatives at UNCLOS or the UNO seemed in general not inclined to counter this political slogan with an alternative articulation. It would appear that they considered it a minor exercise in verbalism with little substantive import.

The Brandt Commission's use of "common interests" joining "North" and "South" works in a similar vein. One might be easily inclined to accept the existence of "common interests" in some sense. But the Brandt Report identifies such interests with a specific interpretation and a particular program. An alluring term is thus used with a very definite meaning determined by an interpretation and a proposal hardly consistent with the relevant facts and mankind's long term interests.

We may also note the use of the terms "global negotiations" or "internationalism" in order to prod the U.S. government into a specific pattern determined by the program for a NIEO. The word "peace" has been similarly exploited by Soviet propaganda in Western Europe to produce an increasingly prevailing attitude equating "peace" with Soviet Russia's foreign policy.

Several strands may explain the observed failure in U.S. international economic policy. One strand involves the incentives built into the foreign policy establishment and the stock of inherited views pertaining to its

Footnotes at end of article.

performance characteristics. The tradition fostered by the establishment's institutional incentives conditions the bureaucracy to concentrate their attention on tactical issues and procedures. The prevalent incentives encourage a pattern evaluating performance essentially in terms of immediate tactical moves. The interaction of the foreign policy establishment with media and parliament seems to reenforce such incentives. The immediate task of negotiation dominates under the circumstances the foreign policy officials' attention. Negotiations often evolve in the context of a weak strategic conception of their own momentum. This became visible in the U.S. Government's approach to the NIEO and at UNCLOS over the past years. Even western diplomats, fully aware of the serious inadequacy of the treaty proposal emerging from UNCLOS, were offended by the Reagan Administration's suspension after many years of persistent labors.

Another strand involves the interaction between different branches of the government. The course ultimately emerging typically appears as a compromise between conceptions, strategies and tactical considerations governing different departments or different groups within departments. Shifting coalitions between and within departments produce correspondingly shifting "policies" with no sense of a coherent overall strategy. Representatives and negotiators may under the circumstances concentrate their attention and evaluation of procedures to the level of tactical considerations.

The patterns mentioned in the previous paragraphs may not exhaust the reason for our failure to cope more effectively with the assault on western positions institutionalized via international agencies. The failure seems to have been reenforced by a subtle influence within our own policy establishments of some ideas underlying the Brandt Report and proposals for a NIEO. The absence of a clear conception about the role and importance of our social organization and its contribution to human welfare weakened our ability to cope with the ideological warfare launched against the United States. The confusion within the United States about the meaning of "human rights" and associated political conceptions offers a good example in this respect.[8]

The new scenario in the international economic policy field suggests some changes in our attitude and procedure. First, we should develop a strategic conception compatible with our long-run interests and compatible with our long-run interests and consistent with a social organization appropriate for a free society. And secondly, we need to articulate explicitly and in detail our position and views. Our foreign policy establishment usually avoided such articulation for tactical reasons or in order "to prevent a confrontation". I submit however that this articulation acquired some major importance in our world with new forms of conflict and political tension. It is important that our representatives learn to cope with this world and learn most particularly to explain our case. This involves much more than a matter of just disdainful ideology. It really involves matters bearing on the core of our society, the way of life of a free society and the institutional arrangements fostering economic welfare and freedom in human society. Our policy establishment needs to understand that a rational and eloquent case can be made beyond shallow ideological attitudes.

2. Major Strands of a Strategy:

President Reagan repeatedly formulated the basic thrust of his domestic economic policy. He explicitly presented in some detail the reasons for the reversal in policy, a reversal characterized by greater reliance on markets and lowered levels of political controls and regulations. The same basic thrust should be extended to international economic policy. There is hardly any doubt that the President and at least some appointees in the Treasury understand the problem. There still remains some doubt whether other branches of the government understand our situation. An outline of major components in the strategy may be useful under the circumstances.

a. A Stable Financial Framework:

The postwar monetary system was constructed by a process of international negotiations. The agreement concluded at Bretton Woods constituted an international agency operating under a set of general rules. The arrangements were inherently inadequate for their purposes however. The necessary condition for a fixed exchange rate system remained submerged under a complex set of provisions. The treaty and its institutional execution could not assure a pattern of domestic monetary policies geared to maintain a fixed exchange rate system. The necessity to have the balance of payments dominate the movements of the monetary base seemed politically difficult to accept by participating nations. This fault in the system was reenforced by the failure of the U.S. policymakers to recognize the importance of a central economy within a fixed exchange rate system.

The world gradually moved under the Bretton Woods' arrangement to a "dollar standard." The United States, as the centerpiece of the system, was faced with a special obligation. Maintenance of a functioning system required that the U.S. reliably pursue a non-inflationary financial policy within a stable framework of policymaking. The U.S. refused to acknowledge this obligation and this settled eventually the fate of the international monetary system.

An international system anchored by fixed exchange rates offers substantial advantages for trade and investment. A well functioning international monetary system should thus be considered as a major goal of U.S. policymaking. This goal should not be approached with the aid of international negotiations, agreements, treaties and new or renewed international agencies. This approach, so appealing to professional negotiators, will not yield any useful results. An alternative strategy fully under the control of the U.S. promises more relevant results. The U.S. should develop a stable and predictable framework for its monetary and fiscal policy involving a definite pre-commitment for a specific course over a longer horizon. Implementation of a constant monetary growth at a non-inflationary level, or a similar institutional precommitment lowering the uncertainty about future monetary evolution, forms one component of the required strategy. A corresponding framework for fiscal policy need also be developed. This framework yields some assurance for a controlled budget growing at a comparatively small pace and with small variations in the deficit averaging at a low level. This framework for a stable and reliable financial policy fosters the attractiveness of the dollar as an international means of payment.

It also offers a strong inducement to other nations to peg their currency to the dollar. A fixed exchange rate area would thus emerge quite spontaneously without a complex of negotiations and treaties. All nations interested in non-inflationary policies would participate voluntarily and spontaneously. Other nations would only endanger any negotiated system and render it essentially inoperative. But the U.S. could organize in this way a central core of nations forming a system of stable financial relations. This system would moreover determine an implicit but clearly determined division of responsibilities. The U.S. is responsible for a non-inflationary policy and the remaining participants are responsible for setting their respective exchange rates relative to the dollar.

b. Capital Markets, Trade and Aid:

The U.S. Government should encourage open and well functioning capital markets all around the world. It needs to eliminate existing institutions or prevent the emergence of new policy arrangements which impair or distort the operation of capital markets. Against the context of overcontrolled and overregulated European domestic capital markets the U.S. should view all attempts to control the Euro-Currency markets with some critical hesitation. It should be recognized that an open Euro-Currency market satisfies an important function for the social coordination of resources over a worldwide range. Well functioning capital markets are particularly important as a constructive and ultimately more useful alternative to the Brandt Commission's obsession with redistribution. Nations of the Third World will have access to resources for investments in accordance with their prospects crucially determined by their own domestic policies.

A worldwide open trade forms another important strand in U.S. policy conception for an international economic order. An international institution (GATT) focussing on a framework of agreements and procedures operated for many years in this field. We cannot expect this institution to offer by itself the focus of a political force pushing for open international markets. This political force need be mobilized by the government of a central nation. The U.S. must assume the political leadership in this field. It will have to control with some determination its own protectionist impulses and exert a corresponding influence on other nations. The GATT offers a potentially useful institutional framework for this purpose. We need to add however that the opening of trade be extended beyond a traditional range of goods appearing in a "trade-balance" to all potentially tradable services.

A thorough and credible commitment to free trade forms a crucial component in the U.S. strategy. The suspension of economic aid from government to government, directly or via international agencies, would be more difficult to maintain without a determined approach to free trade, particularly in the range of U.S. trade policy. The record of economic aid extended between governments, as an instrument of raising welfare, does not justify its continuation. The U.S. Government should terminate such programs. It should not obstruct however the organization of aid by private organizations. Neither should termination be extended to aid, in one form or another, as one of our instruments of foreign policy.

c. The Range of International Agencies:

Whatever the initial intentions associated with many international agencies and institutions may have been, they frequently evolve into political conduits for the redistribution of resources. The resulting pattern of redistribution usually benefits some groups, but these seem typically concentrated around the ruling obligarchies. The distortions in the use of resources lower consequently the achievable economic development around the world. The Reagan Administration need systematically reexamine under the circumstances the role of various international agencies. Selected aspects of this reexamination are sketched in the following passages.

(1) The International Monetary Fund:

The breakdown of the Bretton Woods system substantially eroded the function of the IMF. In order to maintain a political role the agency moved over time to expand the range of "soft loans". It also advocated an extension of SDR's along the lines proposed by the Brandt Commission. A variety of new facilities are supposed to transform the IMF into a major transfer agency on behalf of Third World nations.

Footnotes at end of article.

The U.S. position should be quite simple in this matter. The IMF should return to its relevant function of short term advances intended to cover transitory balance of payments deficits. All traces of redistributional transfers in whatever form and however indirect need be terminated. It would also mean no further expansion in SDR's issued by the IMF. There is really no monetary role for such issues in the context of the international monetary system described under point (a) above. The amount of international liquidity requires no regulation by an international agency. It can more satisfactorily be determined via the exchange rate setting policies of nations participating in the fixed exchange rate area. An increased demand for international liquidity would appear in the context of the approach described under point (a) as an increased international demand for dollars. This trend could also be incorporated into the benchmark level of non-inflationary monetary growth in the USA. Such adjustment of monetary growth would lower the frequency of resetting exchange rates.

There still remain some useful functions for the IMF. It integrates a worldwide financial information system. This information bears on the interaction between balance of payments, fiscal and monetary policies of all nations. It offers a meeting ground beyond the BIS for Central Bank or Treasury officials and government functionaries in general. This meeting ground serves to exchange views and to explain policies. The IMF offers moreover an appraisal and monitoring service for the international capital market. This service suffered somewhat in recent years and the IMF could usefully provide this service again. The IMF enjoys a singular advantage which allows it to couple lending activities with the appropriate monitoring and appraisal in a mode not achievable to private commercial institutions. The successful development of this monitoring and appraisal service in the nature of an international Moody's would contribute to the operation of capital markets in the field of international private lending. Lastly, the IMF can provide the expertise required to develop commercial banking, Central Banking and to organize creditmarkets in lesser developed countries.

(ii) The World Bank:

This institution will have to eliminate all redistributionist schemes and political loans so persistently cultivated under McNamara's presidency. It should operate in the future in the mode of a private commercial bank. It would specialize on international investments around the world. Its effectiveness and business need depend on the comparative advantages most probably available in this specialization of information and procedures bearing on a wide complex of international situations. It probably also enjoys a comparative advantage in packaging major projects with the complex expertise required. Its operations offer also an opportunity to dissociate long term investments from occassionally difficult bilateral arrangements between directly involved governments. In the absence of such comparative advantage the World Bank should be driven out of business by the competition from private lenders. In contrast to the IMF the World Bank should concentrate moreover on longer term loans to private firms around the world. It should most particularly not continue as a conduit of U.S. funds to foreign governments or nationalized industries.

(iii) Some Other Organizations:

Three more agencies may still be considered: The OECD, the FAO and other suborganizations of the United Nations.

The OECD has really no relevant function at this stage. Its operations can be effectively subsumed by the IMF. It is difficult to justify under the circumstances an investment of resources in the OECD. The U.S. Government should at least seriously question the relevance of this agency.

The FAO attracted, so it appears, little attention on the part of the U.S. Government. Its conception and procedures deserve however some careful attention. The exercise of bureaucratic direction over the budget with apparently little accountability offers substantial opportunities to allocate funds on essentially political grounds, with little regard to the intended official purpose. The governing conception and procedures are barely designed moreover to foster the evolution of agriculture as a centerpiece of economic development in Third World Nations. It is noteworthy in this context that the FAO hardly, if ever, addresses the crucial institutional conditions and domestic policies obstructing the expansion of agricultural production in nations of the Third World.

There remains a host of economic organizations within the structure of the UNO (UNCTAD, ECE, ECLA, etc.). These organizations cultivate conceptions irreconcilable with the long-run interest of the United States and the development of policies attuned to the welfare of broad population groups. They are moreover centers of propaganda for an approach to economic policy which assigns to political institutions a central importance for purposes of social coordination. They have become in particular centers for the marketing of political views and socio-economic programs adjusted to the interests of Third World oligarchies. Both in the case of the FAO and these organizations a firmer assertion of our interests with an explicit articulation of our case need be prepared by the U.S. Government.

d. Domestic Policies of Third World Nations:

The Brandt Report did include a short paragraph referring to domestic economic policies of "developing nations". But this recognition remains somewhat incidental with a marginal emphasis. It hardly fits the basic vision and the resulting diagnosis of the problem. But we possess ample evidence bearing on the crucial role of domestic economic policies. This is revealed by major differences in economic evolutions among the nations of the Third World.

A variety of policies and institutions maintained in many nations obstruct the development of agriculture, the most important component of many "developing economies". The usufruct system of landholding prevalent in many countries discourages investment and soil improvements. With the political base of ruling oligarchies usually centered in the cities the resulting policies typically impose low prices on agricultural products. The ensuing wealth transfer from agriculture to city dwellers discourages productive effort and lowers agricultural output. Potentially productive land remains unused under the circumstances.

The U.S. position should be very clear in this context. We need indeed be concerned about the fate and welfare of less developed nations. This concern rationally determines our interest in effective long-range measures raising the general standards of nations in the Third World. The problems posed for economic development by the domestic policies of diverse nations should thus be fully understood and recognized by our government. This recognition need be articulated and argued in the international forum, at the FAO and appropriate other organizations. It need be argued at summits and meetings of the kind to be held in Cancun.[9]

The domestic policies to be considered among the less developed nations need include a range of legal and contractual aspects. Direct investments raising a nation's productive capacity will be encouraged with the reliability of contractual arrangements. Uncertain property rights and unreliable contractual conditions curtail direct investments and concentrate their occurrence to short payoff periods.

VI. A FINAL STATEMENT

"Peace and prosperity" are welcomed by most of the people. The incantation of the words does not assure the corresponding facts to prevail. A "global program" for "peace and prosperity" still requires a critical examination even when it is launched by a prestigious Commission or an international peace organization. The United States should indeed raise its voice in a "global context" advocating peace and rising welfare for broad groups. It should also express its concern about the fate and welfare of Third World Nations.

Peace is however better achieved by avoiding arrangements which arise the prize of domestic and international conflict. Rising welfare is moreover fostered by suspending policies and removing institutions which emasculate opportunities of millions of workers and farmers. The U.S. Government needs to recognize, as President Reagan has, that the inheritance of the "global approach" defined by an international bureaucracy advances neither peace nor prosperity. Fortunately, the U.S. Government can develop an alternative program. There is really no reason to continue on our part an international negative sum game.

PANAMA CANAL: A POST-TREATY VIEW

Mr. CANNON. Mr. President, in my recent travels among constituents in Nevada, I have on occasion had questions put to me concerning the current view of the once highly controversial Panama Canal Treaties.

Nevada residents are concerned as I am with how the agreement has been working out and undoubtedly there are some who still think that the treaties of 1977 were a mistake.

Suggestions were even made that perhaps the treaties ought to be abrogated since President Reagan, during his campaign of 1980, made many adverse comments and said that despite the support of all of the last five former Presidents and the Joint Chiefs of Staff, he would not have proposed the treaties and would, in fact, have withheld his support.

Acting to secure information concerning the question of the present view toward the treaties, I wrote earlier this year to Secretary of State Alexander Haig and the President inquiring into the current situation in Panama and asking the question of whether the administration still views the treaties as a negative or destructive instrument and other arrangements vis-a-vis Central and Latin America.

I further asked whether there were plans now to abrogate or alter in any way the conditions of the treaties or whether the benefits seemed to outweigh previous doubts and concerns. I held open the question of whether I might even join such abrogation if, indeed, hindsight proved that a mistake had been made, since I believe most of us are not so wise as never to have made a mistake from among thousands of the important votes affecting our country which we are called upon to make over the years.

The replies from the administration representing the views of both Mr. Reagan and Mr. Haig have made it clear to me that the administration's position is that the treaties are working out well and the situation in Panama is of no alarm or concern to the executive department which is busy putting out fires and attempting to create stability elsewhere in Central and Latin America.

Because I feel this information needs to be laid out clearly to our colleagues and to the people generally I ask unanimous consent that the correspondence be printed at this point in the RECORD together with my own position paper on the subject compiled at the time the vote was taken.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

APRIL 23, 1981.

Mr. PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Owing to a continuing interest which I have in the stability of the political and security situation in Central and Latin America, I wonder if you could furnish me with some information on current Administration thinking in certain specific areas.

I would like to know whether the situation in Panama is working out as forecasted by Treaty supporters or whether the Administration still views the Treaty as a negative or destructive instrument leading to the weakening of our security and other arrangements vis-a-vis Central and Latin America.

Are there plans to abrogate or alter in any way the conditions of the Treaty or do these benefits seem to outweigh previous doubts and concerns relative to the Treaty?

These questions will be most important in shaping my own viewpoint regarding the turmoil which periodically strikes in the countries south of Mexico, and I would appreciate your expeditious response.

Sincerely,

HOWARD W. CANNON.

APRIL 23, 1981.

Hon. ALEXANDER HAIG,
Secretary of State,
U.S. Department of State,
Washington, D.C.

DEAR MR. SECRETARY: Owing to a continuing interest which I have in the stability of the political and security situation in Central and Latin America, I wonder if you could furnish me with some information on current Administration thinking in certain specific areas.

I would like to know whether the situation in Panama is working out as forecasted by Treaty supporters or whether the Administration still views the Treaty as a negative or destructive instrument leading to the weakening of our security and other arrangements vis-a-vis Central and Latin America.

Are there plans to abrogate or alter in any way the conditions of the Treaty or do these benefits seem to outweigh previous doubts and concerns relative to the Treaty?

These questions will be most important in shaping my own viewpoint regarding the turmoil which periodically strikes in the countries south of Mexico, and I would appreciate your expeditious response.

Sincerely,

HOWARD W. CANNON.

DEPARTMENT OF STATE,
Washington, D.C., May 18, 1981.

Hon. HOWARD CANNON,
U.S. Senate.

DEAR SENATOR CANNON: Thank you for your letter of April 23 which was addressed to Secretary Haig and which concerned the Panama Canal Treaties of 1977. The Secretary has asked that I reply in his behalf.

President Reagan, during the campaign, categorically stated that the Treaties are now the law of the land and that he intends to abide by their provisions. The United States has, of course, an obligation to honor international agreements which our government has negotiated and ratified. At the same time, this Administration intends to insist that Panama also abide by its obligations under the Treaties. The Treaties will be implemented in a manner which takes into account fully our national interest concerns.

The first year and a half of implementation of the Treaties have proceeded without serious problems. The two governments are moving to institutionalize the new relationship between our countries in the operation of the Canal; the waterway itself has continued to function safely and efficiently, even at the record traffic levels which have been handled in recent months. We see a situation in which Panama has an economic interest in the effective operation of the Canal and in its security.

The Canal is not today the issue of contention and confrontation between the United States and Panama that it once was. Problems and different points of view remain, of course, but they are being approached through normal diplomatic channels and through the institutional mechanisms established by the Treaties to handle such problems. In seeking their resolution, the Administration is firmly committed to protecting American interests in the isthmian region. It might be worthwhile to note that Panama, today, is not among the countries of greatest security concern in the Central American area and that our military forces in Panama are exercising their full Treaty rights.

Regarding your inquiry about abrogating the Treaties, the Administration has no plan for such action. It is important to note that the 1977 Treaties contain no procedure for termination at the option of either party. The Panama Canal Treaty, which provides for United States control of the canal operation and for the presence of United States military forces in Panama, specifies that it will terminate on December 31, 1999. The related Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal, which provides for non-discriminatory passage of vessels of all nations, priority passage of United States warships in an emergency, and a basis for the United States to take necessary and appropriate action to maintain the security of the Canal, includes no termination date or procedure for termination inasmuch as it was designed to remain in force permanently. Thus, neither Treaty may be terminated by the action of a single party; the agreement of both the United States and the Republic of Panama would be required.

It should also be noted that on October 1, 1979, the date of the entry into force of the new Treaties, the 1903 Treaty, and subsequent earlier Treaties, terminated irrevocably. An abrogation of the 1977 Treaties would not result in the restoration of the earlier Treaties on which our presence in Panama had been passed. Thus, termination of the 1977 Treaties would, absent a totally new agreement with Panama, leave the United States without rights to operate the canal or to maintain military forces in Panama.

This Administration views the fundamental interest of the United States in Panama as the secure availability of an efficiently operating canal to our commercial and military vessels. Its policies will be based on compliance with our Treaty obligations, insistence on our full Treaty rights, and the most business-like and efficient management of the Canal enterprise.

I hope that the foregoing information will be helpful in your further consideration of these important issues.

Sincerely,

RICHARD FAIRBANKS,
Assistant Secretary
for Congressional Relations.

DEPARTMENT OF STATE,
Washington, D.C., July 30, 1981.

Hon. HOWARD CANNON,
U.S. Senate.

DEAR SENATOR CANNON: Thank you for your letter of April 23 to President Reagan on the Panama Canal Treaties of 1977. As indicated in Mr. Friedersdorf's interim reply of June 22, the Department of State has been asked to prepare a response on behalf of the President.

The Panama Canal Treaties of 1977 entered into force on October 1, 1979. Since then the Canal has continued to serve world commerce and handle record volumes of cargo. Today the Canal is not the issue of conflict and confrontation between the United States and Panama that it once was. Problems remain, but they are being approached through normal diplomatic

channels and through the institutional mechanisms established by the Treaties to handle such problems. All the clarifications to the Treaties made by the Senate when it gave its consent to their ratification have been accepted by the Government of Panama which has affirmed its assent in the Instruments of Ratification.

The Canal has been and will continue to be the unique element affecting our bilateral relationship with Panama. Prior to October 1, 1979 the United States operated the Canal and exercised jurisdiction over a Zone which bisected Panama; since the entry into force of the new Treaties, the United States has continued to operate the Canal in accordance with United States laws, but with Panamanian participation in anticipation that Panama will assume responsibility for operation of the waterway in the year 1999.

For a more detailed response to your inquiry about the Canal, may I refer to my letter to you of May 18 which was in reply to essentially the same question, but which you had directed to the Secretary of State. I have enclosed a copy of my letter for your convenience.

I hope that this information will be of assistance to you.

Sincerely,

RICHARD FAIRBANKS,
Assistant Secretary
for Congressional Relations.

THE PANAMA CANAL TREATIES POSITION PAPER

(By Senator HOWARD W. CANNON)

One of the most thoroughly investigated and debated issues ever addressed by the American Congress was ratification of the Panama Canal Treaties in 1978.

In addition to normal consideration of the treaties by the Senate Foreign Relations Committee, the Armed Services Committee, on which I serve, also held extensive hearings. This was proper because of their importance to our nation's defense.

Although there were many complicated aspects of the treaties, the question really boiled down to the following: Did the United States have a better chance of using and defending the Canal with the treaties or without them?

It was the unanimous belief of our Joint Chiefs of Staff that defense of the Canal would be enhanced by ratification of the treaties. Each of these men, Chairman General George S. Brown, Chief of Naval Operations, Admiral James Holloway, Air Force Chief of Staff, General David Jones, Army Chief of Staff, General Bernard Rogers and Marine Corps Commandant General Louis B. Wilson, strongly recommended approval.

Their attitude was best summed up in a statement by the Chairman, General Brown: "Our capability to defend the Panama Canal will be enhanced through cooperation with the Government of Panama. I have personally worked very diligently for four years to achieve these treaties. We have worked hard for these treaties because we feel they are right."

I was impressed by these words, as well as the fact that four American Presidents—Lyndon Johnson, Richard Nixon, Gerald Ford and Jimmy Carter—recognized the need for a new agreement with Panama and were involved in negotiations for the treaties.

The logic of these military experts and our Presidents was simple. They reasoned that the difficulty of defending the Canal against internal attack by guerrillas or insurgents was lessened if we had the cooperation of the Panamanian people. Cooperation gained by ratification of the treaties would also elimnate the most likely source of a terrorist attack—a hostile population.

As for defending the Canal against an external attack, the key is control of both entries to it. We had this capability before the treaties were ratified and they will not affect it in any way. Under the treaties, the United States will continue to operate and defend the canal until the year 2000. After that, we will still retain the right to defend the Canal against any threat from any source.

The alternative to cooperating with the Panamanian people was a strong-arm approach that would have gained us nothing but the hatred of all of Latin America. Americans should not underestimate the price of maintaining an armed guard over the Canal; one of our military experts predicted a force of 100,000 men would be necessary to protect the Canal from a terrorist attack.

It should be remembered that the Canal is extremely vulnerable to terrorist action. A handful of men and a few well-placed explosive charges could render it useless for normal commercial traffic.

Because of the intense public interest in the Canal treaties, I have been keenly interested in how the Canal has fared since ratification in 1978. I am glad to say the experience has been almost totally positive, giving the United States one of its rare foreign policy successes in recent years.

Let me cite a few examples:

In the first year of joint U.S.-Panamanian operation, the Canal handled more ships on average and received more revenues than at any other point in history;

Since ratification, Panamanian Strongman Omar Torrijos—portrayed by treaty opponents as a communist sympathizer—has openly opposed initiatives of Cuban President Fidel Castro among the nonaligned nations;

Gen. Torrijos denounced the Soviet invasion of Afghanistan and influenced Panama to boycott the Moscow Olympics last summer; and

Panama has offered a place for United States advisors to train anti-insurgent troops for combat in the El Salvadoran civil war.

In a nutshell, we have significantly improved our relations with Central America while operations of the Canal have continued without a hitch. Those were the goals of the Canal treaties and we must note they have been achieved so dramatically.

I have received a great deal of mail during consideration of the treaties. Here are the answers to the questions asked most frequently.

Q. We had sovereignty over the canal. Why did we give it away?

A. In fact, we did not have sovereignty over the Canal although the 1903 Treaty gave us extensive rights and privileges "as if we were sovereign." To try to keep the Canal under the terms of that treaty, however, would probably have meant that we could no longer use it. It could easily be rendered useless by a very small number of hostile guerrillas. The new treaties did not give the Canal away; rather they guaranteed that we will be able to keep it open for our use.

Q. Why did we pay Panama to take the canal back?

A. We did not. The treaties call for increased payments to Panama, but they will be paid entirely from Canal revenues. Under the treaties, it is clearly specified that the increased payments are to come only from the tolls all nations pay and not from the United States Treasury.

There was some transitional cost to the United States government, but charges that turning the Canal over to Panama will cost taxpayers billions of dollars were highly exaggerated. The required appropriations for relocation of some defense installations and early retirement benefits for American employees of the Canal Zone are estimated to be a total of $350 million over 21 years.

The implementing costs of these treaties are far less than what it could cost us to try to hold onto the Canal under adverse and hostile circumstances.

Q. Doesn't Panama have a military dictatorship?

A. Yes, it does, unfortunately. Proponents of the ratification do not deny that Torrijos is a dictator, nor argue that the Panamanian record on human rights is what it should be. However, negotiations with the Panamanians began before Torrijos came to power, and, on this issue, he does represent the legitimate interests and wishes of a majority of the Panamanian people.

Q. Is there a danger that we played into the hands of the Communists by ratifying these treaties?

A. In fact, nothing could have played into the Communists' hands more than our failure to ratify the treaties. Those close to the Latin American political situation believed that treaty ratification robbed the Communists of their one potent issue—nationalism. Panama is not pro-Communist now; out of a population of 1.7 million, there are only an estimated 600 Communist party members, but it is the Communists who opposed U.S. ratification of the treaties.

Q. What is the primary U.S. interest in the Panama Canal?

A. To use. it. Our primary interest in the canal is to have routine access to it and priority access in time of war. The new treaties guarantee this.

Q. What guarantees and rights does the U.S. have under the new treaties?

A. The Panama Canal Treaties provide that:

A United States-controlled commission will continue to operate, manage, and regulate the Panama Canal until the year 2000;

The United States has the primary responsibility to protect and defend the Canal and may act unilaterally against any threat to the Canal from any source.

In the year 2000 Panama will become responsible for the operation of the Canal but the Neutrality Treaty provides that:

The United States will continue to have the right to defend the Canal and ensure that it remains open;

U.S. military vessels will have the right to go to the head of the line whenever we consider it necessary;

No foreign power will be allowed to maintain troops or bases in Panama; and

Our right to take unilateral action to defend the Canal and keep it open continues indefinitely.

Q. Isn't our ability to defend the canal diminished by the new treaties?

A. No. The Joint Chiefs of Staff, who unanimously supported the treaties, have stated that they would rather defend the Canal under the provisions of the new treaties than under the provisions of the old.

Q. Isn't a Senator who votes for the treaties being unresponsive to his constituents?

A. Only in the most narrow sense of our form of representative government. Many people seem to believe that the weight and volume of expressed opposition to the treaties should have shaped the Senate's action. That sentiment also holds that our role in this, and presumably any other issue where emotions run high and opinions are strongly held and expressed, is simply to convert these emotions and opinions into a vote. But representation is not so simple. Not only are those who might be in the majority on this issue often in the minority on other issues, but they in fact then expect

their representatives to buck trends and adopt unpopular causes in those cases.

I have received a great amount of mail concerning the Canal treaties, and I studied and weighed it carefully. I share the concern of my constituents that these treaties be in our national interest. Not only did I study the testimony presented in the Armed Services and Foreign Relations Committees, but I raised my constituents' questions and questions of my own with the military and political leaders of this country. I concluded that ratification of the treaties would be in our national interest and that it would make the Canal a new symbol of America's vision for a peaceful world.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

INTERNATIONAL SECURITY AND DEVELOPMENT ACT OF 1981

The PRESIDING OFFICER. The clerk will report the pending business.

The legislative clerk read as follows:

A bill (S. 1196) to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, to provide authorities for the Overseas Private Investment Corporation, and for other purposes.

The Senate resumed consideration of the bill.

AMENDMENT NO. 556

(Purpose: To strike out language providing for the autonomy of the Peace Corps, to ensure maximum efficiency of ACTION and Peace Corps)

Mr. HATCH. Madam President, I ask unanimous consent that the Senator from Alabama (Mr. DENTON) and the Senator from Oklahoma (Mr. NICKLES) be added as cosponsors of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Madam President, in July, Senator CRANSTON correctly perceived that it was going to be impossible to move his bill to separate the Peace Corps from ACTION, because of widespread opposition to this proposal. This opposition was completely uniform throughout the administration. The White House, OMB, the ACTION agency and the Peace Corps itself all rejected the proposal that Peace Corps should be separated.

In order to push this measure through, rather than having a full and thorough debate on the issue, Senator CRANSTON made a rush move to attach his bill as an amendment to the State Department reauthorization. It did pass the Senate by a narrow margin at that time. But I feel that the reason it passed was precisely that the debate was not thorough and the issues were not well discussed.

I feel confident that as we look at those issues today, in more careful detail, we will come to see that separating the Peace Corps from ACTION would be a serious mistake, a mistake which would be harmful to the Peace Corps.

Madam President, instead of helping the Peace Corps, as I am sure the distinguished Senator from California wants to do, separation would only harm the Peace Corps. I know there is widespread opposition to this proposal not only from the administration, but from many of my colleagues here in the Senate. A major reorganization within the executive branch is something for which we have proper channels to consider. Instead of bypassing those channels, and a proper examination of the issues, I urge that we examine those issues very carefully, not just here on the floor, but by the committees who have appropriate jurisdiction.

COST

One of the major reasons not to separate the Peace Corps from ACTION is cost. Such an action would cost the taxpayers more money. Additional funds would be needed for administration recruitment, communications, computer services, accounting, payroll, rent for new office space and so on. OMB estimated added cost at up to $3 million in a preliminary review earlier this year. In 1979 the Senate Governmental Affairs Committee estimated the additional costs for separation at $15 million.

My distinguished colleague from California has made a point of the CBO remarks earlier this year that separation would not incur additional expense. However, the CBO has not done an in-depth study, and in the face of such widespread disagreement about the exact amount of increased costs I feel a more thorough study should be done before we rush into a premature decision.

Madam President, I would remind my colleagues that no one who has looked at this issue has said that separation would save the taxpayers money. Separation is not a budget trimming operation. There is general agreement that separation will cost more money, though there is disagreement about exactly how much. These are times when we are looking to save taxpayers dollars; when we are looking for ways to cut back on the Federal bureaucracy—not expand it. The fact that there are different opinions about additional costs only argues that we should have a thorough study of this issue, not rush to a premature decision.

Senator CRANSTON has made a good deal of the CBO report. He has claimed that the CBO analysis should be the authoritative opinion on this cost issue. My staff has talked to the analyst in CBO who prepared that report. According to CBO their report was based on a casual and very hurried look at the cost of separation. They said there was no detailed backup, more than a few scratched up work sheets and a marked up bill.

There were other issues concerning spending issues which had higher priority last spring, and the Peace Corps separation did not receive careful attention or a thorough analysis. The basis of the CBO estimate was primarily at a look for additional authorizations, not at a detailed cost analysis of running the Peace Corps programs. Finally, Madam President, CBO said that, "The OMB estimate is probably as good as anything you will get, and that they would have to defer to OMB."

I would hasten to point out, Madam President, that OMB did not do a thorough and searching cost analysis either, but their estimate is more of a preliminary analysis also.

So to argue that there will be no additional costs, and to base that argument on a CBO report which contradicts every other analysis which has been done, would not be wise. We all know that new agencies require additional funds. It is clear that we do not have an accurate and thorough analysis to estimate just how much separation would cost. We need such an analysis. Any additional costs would be a strong argument against separation in these times of extreme fiscal restraint.

MILITARY INTELLIGENCE

The current Director of ACTION, Tom Pauken, had some connection with Army intelligence during his voluntary service in the Vietnam war. But that was years ago, and would not effect his relationship with Peace Corps today. The Senate decided there was no real substance to the opposition to Pauken's nomination on these grounds and confirmed his appointment by voice vote.

We do not want to have any appearance of soldier baiting. We should honor those who served their country during those difficult years—while some of their peers chose to violate the law and attack the Government policies.

This intelligence connection argument has absolutely no substance. Tom Houser, the Deputy Director of the Peace Corps from 1969–71 served in military counter intelligence before his service in the Peace Corps itself. No one complained about his nomination. No harm came to any Peace Corps volunteers.

ACTION is completely separated from Peace Corps in terms of day-to-day policy. When there is clear precedent for Peace Corps leaders themselves having military background with no resulting negative impact on Peace Corps, it is ridiculous to argue that Mr. Pauken's military background will have any effect on Peace Corps volunteers' safety.

ADMINISTRATION POSITION

As I have said before, Madam President, the administration is completely opposed to the idea of separation. I submitted for the RECORD yesterday copies of letters from the White House and from the Peace Corps itself saying they were strongly opposed to separation. I cannot imagine why we would not listen to the Director of the Peace Corps itself when she states her complete support for the administration position.

The Peace Corps is thriving under the new administration. Rather than being in chains, as Senator CRANSTON said yesterday, "The Peace Corps is prospering". Separation would only make the Peace Corps more vulnerable to attack. The administration feels, and I am in complete agreement here, that the Peace Corps should be linked with the administrations increasing emphasis on volunteerism in the ACTION Agency.

We have the Peace Corps Director's assurance that they are working

smoothly with the ACTION people, and that their joint relationship is mutually supportive. Why would we want to take the radical move of separation when things are going so well?

GOVERNMENTAL AFFAIRS HAS JURISDICTION

Madam President, the rules of the Senate clearly state that the Governmental Affairs Committee has jurisdiction for any reorganization of the executive branch. Senator ROTH of the Governmental Affairs Committee has joined in support of my amendment today, because they have not had the opportunity to hold hearings and examine this issue closely.

I would note, Madam President, that when the Governmental Affairs Committee held hearings on this issue in 1979 they voted overwhelmingly to keep the Peace Corps and ACTION together. The distinguished Senator from California, Senator CRANSTON, was one of the strongest supporters of keeping the Peace Corps and ACTION together at that time.

It is very difficult for me to understand why the sudden change of heart at this time.

REQUIREMENT

Proponents of separation have cited a decline in the number of Peace Corps volunteers as a reason for separation, saying that the Peace Corps recruitment process is hindered by its connection with ACTION.

However, an individual becomes a Peace Corps volunteer and is sent overseas only after passing through various stages of preparation for such duty. Inevitably, numerous applicants are rejected for a variety of reasons during the weeding out process. This is done by the Peace Corps itself and not by ACTION, so it is the Peace Corps which determines how many of the initial applicants actually go on to serve.

The real gage of whether Peace Corps has been hindered by its association with ACTION is to look at the application and inquiry figures. And this data clearly indicates a rise in interest in serving as a Peace Corps volunteer since the placement of Peace Corps within ACTION in 1979.

Madam President, I ask unanimous consent that a table showing the inquiry figures be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Peace Corps

	Fiscal year 1978	Fiscal year 1981
Applications	13,661	[1] 15,622
Nominations	7,987	8,382
WATS Line inquiries	37,902	[2] 53,917

[1] The applications received are as of September 30, 1981.

[2] The WATS Line inquiries data is as of September 30, 1981.

(Mr. QUAYLE assumed the chair.)

Mr. HATCH. Mr. President, second, the October 1980 issue of Government Executive cited the international situation and not any connection with ACTION as a factor in the decline in the number of volunteers serving overseas.

Mr. President, I ask unanimous consent that that information from the October 1980 issue of Government Executive be printed in the RECORD at this point.

There being no objection, the information was ordered to be printed in the RECORD, as follows:

In fact, the elements governing the size of the Corps are outside of the U.S. and totally independent of anything the U.S. can do. It is a matter of record that all foreign volunteer programs—including the Peace Corps—have suffered a world-wide decline. This in the face of a enormous increase in domestic volunteer programs in all other foreign countries.

The principal factors controlling the size of the Peace Corps operations are largely exogenous. They are a product of the changing international environment and it is now apparent that neither the Corps itself nor the U.S. Government can do much to influence them. The world is a far different place than it was back in 1961.

Mr. HATCH. Proponents of separation have consistently stated that the current situation is unfair because Peace Corps contributes 60 percent of the cost of joint services. Inferring, presumably, that anything over 50 percent is unfair. In response, several points:

First. The figure is incorrect. In fiscal year 1981 the contribution figure was 53.3 percent and the projected contribution level for fiscal year 1982 is 51.5 percent.

Second. During the Peace Corps authorization hearing in April of this year, Acting Peace Corps Director William Sykes was asked by Senator CRANSTON if he thought the current arrangement wherein the Peace Corps pays 60 percent of the costs of the shared costs is equitable? Sykes replied:

I think in some offices it is and in some offices it is not. For example, in health services, we pay about 60 percent of the costs and we get over 90 percent of the services out of that office.

I ask unanimous consent to have printed in the RECORD a list of the shared services and the actual share of Peace Corps' contribution.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

JOINTLY SUPPORTED SERVICES (JSS)

Administrative and technical support services provided to Peace Corps by ACTION are termed "jointly supported" because they are funded from both the Domestic Programs and Peace Corps appropriations. These services include:

Recruitment of qualified and well-motivated applicants for volunteer assignments;

National and local communications campaigns promoting Peace Corps' programs and recruitment efforts;

Audits and investigations;

Legal services;

Delivery of health care and benefits to applicants as well as current and former Peace Corps volunteers;

Negotiation, award, administration, and close-out of contracts, interagency agreements, and grants;

Data processing services;

Such administrative services as volunteer and staff travel arrangements (including passports and visas); cable, mail, and pouch services; headquarters space and property management; WATS switchboard, FTS, and local telephone services; office supplies; copy machines; library services;

Management analysis studies;

Personnel security investigations; and

Financial reporting and accounting systems; volunteer and staff payroll; processing of financial transactions.

In FY 1981, Peace Corps contributed $15,117,000 to ACTION for its share of the funding for JSS; this amount is 14.3 percent of the Peace Corps appropriation and 53.3 percent of the total JSS budget. In FY 1982, Peace Corps contribution of $13,543,000 is 14.2 percent of its appropriation request and 51.5 percent as of October 20, 1981 of the amount requested for JSS. The remainder of the JSS funding comes from the Domestic Programs appropriation.

Mr. HATCH. Mr. President, at this time, I yield to the distinguished Senator from Georgia.

The PRESIDING OFFICER. The Senator from Georgia is recognized.

Mr. PERCY. Mr. President, may I inquire of my distinguished colleague about how long he will be speaking?

Mr. MATTINGLY. About 5 minutes.

Mr. PERCY. Mr. President, I must return to continue chairing a hearing and I have recessed for just a moment so I would be able to respond to Senator HATCH. Five minutes will be fine.

The PRESIDING OFFICER. The Senator from Georgia is recognized.

Mr. MATTINGLY. Mr. President, I support the amendment offered by the distinguished Senator from Utah, which would delete language in S. 1196 separating the Peace Corps from the ACTION Agency and creating a new, independent agency.

I favor the amendment, Mr. President, because I believe that now is not the time for us to be creating any new Federal agencies, or departments, or bureaus, or any other similar new layers of bureaucracy. Cost estimates vary, but it appears that a minimum of $3 million would be needed in order to create this new agency. A 1979 Governmental Affairs Committee report put the figure at $15 million and those of us who are familiar with the general accuracy of Federal cost estimates will understand my belief that the actual cost of realining the Peace Corps would, in all probability, be several times higher than any of the estimates.

I say frankly, Mr. President, that about the last thing that our constituents in Georgia or any place else in this country need or want to hear from us is that we have legislated into existence a new Federal agency. At a time when we are closely examining every expenditure in an effort to reduce a swollen Federal budget, how can we justify the creation of yet another Federal agency with all the costs and bureaucracy associated with such a move? I do not believe that that is what the elections of last November 4 were all about.

Consideration of such an action seems particularly unnecessary and inappropriate as far as the Peace Corps is concerned because the Corps already enjoys virtual autonomy within the ACTION agency, sharing only some administrative and technical services with ACTION. ACTION, of course, was established in 1971

as the parent body of all Federal volunteer programs.

My understanding of the Corps' current situation is that, under an Executive order issued by President Carter in 1979, the Peace Corps Director reports directly to the President on policy matters and deals directly with the Secretary of Treasury and with the Director of the Office of Management and Budget on budget items. Several individuals with broad knowledge of Peace Corps affairs stated at the time of the issuance of the Executive order that under its provisions, the Peace Corps would have and still has more independence than at any time in its history, including its first years in the early sixties.

The Governmental Affairs Committee examined the Peace Corps' relationship with ACTION in 1979 and concluded that there was no need to separate the two agencies. In fact, the committee report noted the importance of retaining the Peace Corps within ACTION as a means of emphasizing the "special volunteer nature of the program."

I have not seen any data, Mr. President, or other evidence which demonstrates that the committee findings in 1979 are no longer valid. In fact, I am told by a member of the Governmental Affairs Committee, which has jurisdiction over matters involving executive branch reorganizations, that we have held no recent hearings on the proposal and have not examined the question in any detail whatsoever since the 1979 hearings. So one question ought to be asked: Why are we bypassing our established committee process?

The biggest problem confronting the Peace Corps, from what I have gathered, is not its affiliation with ACTION but, in fact, is the same one confronting every other Federal organization—a lack of money. I do not understand how that particular problem will be resolved during these times of economic distress by a reshuffling maneuver costing the taxpayers millions of dollars. I have heard it mentioned that the cost estimates on the proposed Peace Corps separation are minimal and not worth worrying about, certainly not worth considering as a major factor during deliberations on the proposal. Well, how many of us could name one hard-working, hard-pressed, taxpaying constituent who would agree that $3 million, or $15 million or $30 million is not worth worrying about?

Some proponents of separation have cited a subordination of Peace Corps interests by ACTION as a reason for separation but again, Mr. President, I have not seen any documentation to back these assertions.

Peace Corps volunteer application requests remain high; telephone inquiries expressing interest in obtaining more information about Peace Corps activities are way above what they were several years ago; and public service announcements on the Peace Corps continue to be placed in television and radio markets across the country.

The administration is united in its opposition to the proposal. Max Friedersdorf, Dave Stockman, ACTION Director Tom Pauken, and Peace Corps Director Loret Ruppe are all on record as opposing the separation.

Finally, Mr. President, during the hearings on Mr. Pauken's nomination to serve as Director of ACTION, concern was expressed by some proponents of separation that his military intelligence background disqualified him from serving as head of ACTION. In fact, this military service was cited as the "impetus" behind the latest effort to separate Peace Corps from ACTION.

Concern was expressed by some that his Army intelligence duties in Vietnam would breach the traditional separation of U.S. intelligence matters and Peace Corps activities. Further, it was said, Pauken's particular military service could possibly endanger Peace Corps field volunteers.

Such assertions, in my view, have been effectively rebutted by my colleague, the distinguished Senator from Utah, in his opening remarks. I would just add several comments:

First, I do not believe that honorable service in our Nation's military should be a disqualifying factor during consideration for Government service;

Second, no matter how honorably motivated, such insinuations tend to reflect poorly on all those who served honorably during the difficult period of the Vietnam war; and

Third, the Vietnam war and our Nation's gallant effort to save freedom for a struggling people is not the issue here and should not become the issue.

The matter should be considered, and rejected, on its own merits or lack of same.

I urge a yes vote on the amendment, Mr. President.

Mr. PERCY. Mr. President, I would very much appreciate the close attention of my distinguished colleagues. I deeply regret being on the opposite side to them in this issue, but I strongly support the committee position. I do so having been on the Governmental Affairs Committee for 15 out of my 15 years in the Senate. I was the ranking Republican on that committee when ACTION was set up at the request of President Nixon a decade ago. At that time, I went through all the theoretical arguments and I just gave the administration the benefit of the doubt and decided that ACTION was a worthy and a noble attempt. We approved it, and now we have had a decade of experience with it.

I find myself, as a member of the Governmental Affairs Committee and the Committee on Foreign Relations, now in a somewhat different position. When Senator GLENN, who is the only other Senator who was a member of the Governmental Affairs when we set ACTION up and a member of the Committee on Foreign Relations, has come to the identical conclusion, that this is a bad idea, that we ought to end it and we ought to end it right now, and for sound, logical reasons.

Mr. President, the resources of the Committee on Foreign Relations have not been totally adequate to give me all the cost accounting that I need. I think the Senator from Georgia and the Senator from Utah have raised some very good questions. We do have answers to those questions now and I should like to give these answers as carefully as I can. I think they conclusively support the position already made by the Committee on Foreign Relations in one vote and already made in the Senate of the United States by another. I hope they will be supported today and I hope those facts will provide some of the reasoning for either withdrawing this amendment or, at least for the Senate, overwhelmingly supporting it.

The Senator from Georgia has said that he has seen no evidence that would change the Governmental Affairs Committee's judgment from the decisions made 10 years ago and the decision made just a few years ago not to merge it into ACTION. Let me give that evidence in the course of my comments. Let me simply state that the purpose of the proposal to separate the Peace Corps fully from ACTION, really the underlying purpose, is to strengthen the Peace Corps recruiting and to restore its identity in the United States and abroad. I have yet to see or know of any Senator who has challenged my statement, or a House Member, that I have visited with more Peace Corps members throughout the world since the inception of that program than any other Member of Congress. I began doing this as a businessman traveling abroad. I found it the best way to understand and learn about the concerns and interests of the normal citizen.

Sure, I could go to the State Department and the Embassies in the countries, and of course, for political and economic briefings, I often did so. But I also traveled with the Peace Corps volunteers to learn more about the human dimension of the country. I would go into the villages with them. I have traveled all over countries of Latin America and Afghanistan. Of the 210 Peace Corps members in Afghanistan, I met with 200 of them. Some places, I had to walk 5 days to get to a landing strip and meet with them there. I met with virtually every one of them. From that, I got a picture of the human side of Afghanistan that I never could have gotten sitting in the Embassy or from any other source of information.

Mr. President, I feel that the Peace Corps, one of the great successes we have had, has been losing its identity. It does still exist. It is alive and well. Autonomy, however, I think will help the Peace Corps build a great esprit de corps as it begins its third decade of service in the developing countries.

Let us listen to the cost of separation. I am delighted that the distinguished Senator from Delaware (Mr. ROTH) is here, because he is a member of the Governmental Affairs Committee. He looks at figures; he understands the impact of these figures.

Some of the estimates I have seen thrown around as to the savings are just a lot of baloney. They do not exist. They cannot be proved by anyone, and they can be disproved by the Comptroller General of the United States. The cost of separating the Peace Corps from ACTION should not be anywhere near

the $15 million estimated by the sponsor of this amendment.

OMB's estimate, made after the administration had gone on record as opposed to autonomy, was that joint services by ACTION and the Peace Corps save no more than $3 million per year. That is only one-fifth of what the estimate has been. The OMB analysis, which is printed in the Foreign Relations Committee report, states that "the $3 million figure should be viewed as an outside estimate for additional operating costs" for Peace Corps autonomy. The OMB analysis says explicitly that the 3 million figure "is likely to be too large." So we are not even near 15 million.

In fact, it may well be negative that is, it may save money.

The Peace Corps itself prepared an analysis of the cost of separation. That analysis, prepared before the issue became politicized, concluded that separation from ACTION would cost the Peace Corps no more than $1 million and might even lead to budgetary savings.

Finally, the Congressional Budget Office reviewed this proposal, as it does all bills, and their conclusion was that the measure "is expected to have no budget impact."

This measure does not violate the President's budget or the congressional budget in any way.

The Senate will have to make its own decision on this issue, and the Senate will. When the issue came up last June 17, the Senate voted—without all these new facts—52 to 45 to separate the Peace Corps from ACTION. The facts have not changed in the past 3 months, except for the new information I will give today.

The Peace Corps functioned well as an autonomous agency for the first 10 years of its existence. This year is the 20th anniversary of the Peace Corps, and it is a good time to return to the formula which worked so well at the outset; the Peace Corps as a fully separate agency.

With respect to the new information I have been able to discern, the purpose of the proposal to separate the Peace Corps fully from ACTION is purportedly to strengthen Peace Corps recruiting and restore its identity in the United States and abroad. The Peace Corps has been submerged under ACTION, and many Americans do not even know that the Peace Corps still exists. Autonomy will help the Peace Corps build greater esprit de corps as it begins its third decade of service in developing countries, as I have mentioned.

Peace Corps overhead for administrative requirements is 3 percent of the budget. Peace Corps payment to ACTION is 14 percent of budget. Less than half the payment to ACTION is for direct Peace Corps support—that is, recruitment and health services. More than 7 percent of the Peace Corps budget is expended on overhead items controlled by ACTION.

The Peace Corps bill from ACTION is for $13 million at the President's March request. It includes large shares of all the costs of ACTION staff offices, many of which conduct little, if any, activities for the Peace Corps.

The Peace Corps to date has had no control over which offices are included in the bill, the staffing of these offices, or their work plans.

In other words, we have an agency here which is being cut and slashed and reduced, as other agencies are; yet, they have an overhead charge thrown on their backs over which they literally have no control. That is a gross distortion. It is a gross disincentive for the management of the Peace Corps, an operation that has been known for its frugality, many of whose employees volunteer, receiving far less than their counterparts in AID, living in the villages, living off the land. They have a big overhead upstairs, over which their management simply has frustration and no real budget control.

Budget reductions in ACTION have called into question the real need for a joint support program. The VISTA program, the only stipended volunteer program in ACTION, is being dismantled. With the dismantling of that volunteer program, the rationale for joining the remaining programs is very weak. None of the remaining ACTION programs has terms of service and logistical requirements like those of Peace Corps. The necessity ACTION faces of establishing management systems for both domestic and international operations is no longer justified.

The present arrangement creates inefficiencies in operation. The most critical example is in the recruiting and placement function. Some activities are duplicated. For example, ACTION must prepare and transfer materials on applicants to Peace Corps. Peace Corps then reviews the same materials in order to provide for final placement.

RIF's are being conducted in ACTION which affect large numbers of employees in the joint support offices. The Peace Corps has no knowledge of the numbers of employees, the functions affected, or the ultimate cost of these reductions. Peace Corps appears not to have been included in the decision process

The recruiting staff has been substantially reduced at the height of the recruiting season—this despite the fact that 90 percent of the recruiting is Peace Corps volunteers. Here we are at the height of the season, 90 percent of the recruiting is Peace Corps, and the staff is being slashed.

They should slash it at the time of low recruiting, not at the peak of recruiting, which is a disincentive and creates chaos and confusion, in effect. Fiscal year 1982 recruiting will be 2,000 for Peace Corps, less than 100 for ACTION.

Offices of Former Peace Corps Volunteer Services and Peace Corps Partnership have been abolished, over the objection of Peace Corps.

There is no assurance that cuts in logistical support, computer operations, or fiscal services have taken into account Peace Corps requirements.

Let me cite one concrete example of what separation might mean in practice. The Chicago ACTION office has a small unit on a separate floor of the building which does Peace Corps recruiting. If Peace Corps is separated from ACTION, this is the dramatic effect it will have: The Peace Corps recruiters will change their letterhead and doorplate and receive their instructions from Peace Corps headquarters in Washington, without routing paper through ACTION.

I urge every Senator who has any kind of ACTION office in this or her State to take a look and see. Go in that office, talk to the people, find out what we are doing, and find out why this particular amendment at this particular time is really ill advised.

The argument has been raised that we are creating a new Federal agency. This is misleading. In fact, the Peace Corps is already an autonomous agency. All we are talking about is shared administrative expenses.

Peace Corps should be free to decide what kind of support it requires and whether it should determine its own needs in the areas of personnel, recruiting, and computer support.

I certainly feel that the facts now warrant and justify support for the amendment being offered by our distinguished colleague from California, supported by the ranking member of the committee, supported by other members of the committee, and certainly supported by the chairman of the committee.

The position of the committee in this area is very clear indeed.

Mr. President, I am happy to yield the floor at this time.

Mr. ROTH and Mr. BRADLEY addressed the chair.

The PRESIDING OFFICER. The Senator from Delaware is recognized.

Mr. BRADLEY. Mr. President, will the Senator yield briefly to me?

Mr. ROTH. I am happy to yield briefly to the Senator from New Jersey.

ESTABLISH THE PEACE CORPS AS AN AUTONOMOUS AGENCY

Mr. BRADLEY. Mr. President, last June the Senate wisely approved legislation introduced by the distinguished Senator from California to establish the Peace Corps as an independent agency. I am proud that I was a cosponsor of that legislation. Mr. President, nothing has changed since that time, and there is no good reason for the Senate to reverse its position today. A strong Peace Corps is a vital ingredient in U.S. policy toward the developing world. It would be particularly appropriate to renew our vote for a more effective Peace Corps as the President meets with leaders of the developing and industrialized world in Cancun, Mexico to revive a discussion on North-South cooperation. To do this, we must reject the Hatch amendment.

Mr. President, the time has come to establish the autonomy of the Peace Corps and thereby restore to it the strong identity that motivated its volunteers during its formative years. Nothing less will do. Separation of the Peace Corps from the ACTION umbrella has been gaining support among legislators, members of the executive branch, and the Peace Corps family over the past few years. Those closest to the organization have long recognized that autonomy for the Peace Corps will increase its visibil-

ity, enhance recruitment, and thus lift up the morale of its personnel. It will renew the sense of purpose and vitality that distinguished this special organization during its early years and I believe it could launch the Peace Corps into a new era of commitment and effectiveness.

In 1961, the Peace Corps was born of a compelling idea: Dedication to bettering the conditions of the world's poor by sharing America's resources of human talent, skills, and idealism. To establish its special identity, it was made a separate agency within the Department of State. The dynamism and exuberance of the first Director of the Peace Corps, Sargent Shriver, a man whose name has become almost synonymous with the Peace Corps, turned the idea into an institution.

For 10 years, the Peace Corps remained a vibrant agency in the State Department. In 1971, it was transferred to the ACTION Agency, whose umbrella also extended over VISTA and other domestic volunteer programs. Then in 1979, the House approved legislation which would have removed the Peace Corps from the ACTION Agency and placed it within the newly created International Development Cooperation Agency (IDCA). However, this proposal disturbed many supporters of the Peace Corps including Members of this body, who feared that placing the Corps within IDCA, the proposed umbrella aid agency, would cast it as another foreign aid program.

This image would rob it of its unique people-to-people character, which emphasizes the mutual benefit of interaction between Peace Corps volunteers and the people of their host countries. Responding to these concerns, and recognizing the value of Peace Corps independence, President Carter offered a compromise. He issued an Executive order which made the Peace Corps "semiautonomous" within the ACTION Agency.

Mr. President, the 1979 Executive order apparently has resolved some of the administrative, personnel, and budgetary problems that concerned Members of Congress. However, being subsumed within ACTION continues to hinder the ability of the Peace Corps to project a strong independent identity, and this, no doubt, has affected the recruitment of Peace Corps volunteers. Remaining under the ACTION umbrella obscures Peace Corps' visibility both at home and abroad. Peace Corps is a unique institution with a special global purpose, and should not be grouped with domestic programs which have a noble, but different purpose. It can best accomplish its mission by standing on its own.

A report entitled the "Future of the Peace Corps," prepared under a contract for the ACTION Agency by the Aspen Institute for Humanistic Studies, concluded, in 1977, that "as the 'holding company' for the Peace Corps," ACTION drastically reduced the Peace Corps' visibility, subordinated its recruitment function to several different domestic volunteer groups, kept the number of volunteers low, allowed the unit cost of a volunteer to rise, and "in general, made the Peace Corps a somewhat more routine, less exciting adjunct to the foreign aid function, rather than a uniquely vibrant expression of 'the best that is in us'." Revitalizing what can become our best means for broadening international understanding is sufficient reason to authorize the separation of the Peace Corps.

Mr. President, confirmation of Thomas Pauken, as head of ACTION, presented a forceful argument for separating the Peace Corps last June, and it still is one today. Like a number of my colleagues, I opposed Mr. Pauken's nomination not because I questioned his character, ability, or qualifications, but because I feared that his previous service as a military intelligence adviser in Vietnam would be construed abroad as evidence of a connection between the Peace Corps and the U.S. intelligence community. Such suspicions can compromise irreparably the effectiveness of the Peace Corps. For this reason, the Corps has maintained a policy of complete separation from the intelligence community and its activities. Merely raising such suspicions would seriously rob the Peace Corps of its effectiveness and such could endanger the security of its overseas staff and volunteers.

The confirmation of Mr. Pauken as Director of ACTION makes it imperative that we enact autonomy of the Peace Corps into law not next year, or the next year, but now. I hope my colleagues will join with me in reinforcing the credibility of this important institution and reinvigorating its activities. I urge them to once and for all resolve the decade-old problem of submersion that has plagued the Peace Corps. I urge them to reject the Hatch amendment.

I thank the Senator from Delaware for yielding to me.

The PRESIDING OFFICER. The Senator from Delaware is recognized.

Mr. ROTH. Mr. President, I support on both substantive and procedural grounds the Hatch amendment to remove the provision in S. 1196 establishing the Peace Corps as an independent agency.

Procedurally, I note for the record that this proposal was included in the foreign assistance bill without any reference to the oversight responsibilities of the Governmental Affairs Committee for matters relating to reorganizing the executive branch of Government. Yet the mandate of the committee in this area is clear. The legislative history traces back to 1921, 60 years ago, when the Senate charged the Committee on Expenditures in executive departments with the responsibility to evaluate the effects of laws enacted to reorganize the legislative and executive branches of the Government. Since 1949 alone, some 103 reorganization proposals have been submitted to the Governmental Affairs or its predecessor committees for approval.

This procedure has proven over the course of 60 years to be an effective way to balance the need for executive branch flexibility in reorganizing itself with the constitutional requirement for congressional oversight of effectiveness in Government. In fact, the Senate recently reauthorized for another 4 years the Reorganization Act, under which these procedures were established.

Mr. President, in noting this procedural irregularity, I hasten to assure my good friend, the chairman of the Foreign Relations Committee, that I recognize that there may be in this case some overlapping jurisdiction. Certainly there are foreign policy implications to an independent Peace Corps that his committee should rightly address.

But at the same time, I think that it is fair to say that this proposal is a perfect example of why the Senate, in its wisdom, established separate review procedures for reorganization proposals. In 1971 the Government Operations Committee, predecessor to the Governmental Affairs Committee, held 4 days of hearings on then-President Nixon's proposals to merge into a new ACTION Agency all Federal volunteer citizens programs. A number of justifications for this proposal were advanced, including very persuasive arguments concerning budgetary savings and the pooling of human resources. The record of committee hearings ran to 400 pages.

In other words, Mr. President, the creation of ACTION as an agency that included the Peace Corps was not a step that was taken lightly by the Government Operations Committee. Nor, might I add, was it taken lightly by the Senate.

Furthermore, in May 1979, the Government Operations Committee again held extensive hearings on the subject. In a 15 to 1 vote, the committee recommended overwhelmingly to keep the Peace Corps in ACTION.

Yet for reasons that are unclear to me, the Foreign Relations Committee has decided that the Peace Corps should be separated from ACTION and made an independent agency. So far as I know, the Foreign Relations Committee did not even hold a hearing on the subject. The Foreign Relations Committee may have good and sufficient reasons for its recommendation to the Senate. All I am saying is that this subject has not been thoroughly vented by the committee charged with the responsibility for determining whether a reorganization of the U.S. Government makes sense in terms of the best allocation of budgetary resources and effective Government.

Furthermore, it seems to me that there are strong substantive grounds for keeping ACTION intact.

Mr. MATHIAS. Mr. President, will the Senator from Delaware yield for a comment?

Mr. ROTH. I yield.

Mr. MATHIAS. Mr. President, the Senator from Delaware says that the committee has not vented this subject. I feel the committee really has very carefully looked into this question. We held hearings on the authorization. We have had hearings on the assistance program from which funds are derived. The subject of the efficiency of the joint venture has been looked into. The fact is that the VISTA program is being dismantled and the VISTA program was the only real excuse for keeping the two programs administratively together, and when that one dries up there is not much point in keeping the other.

But in any event, just so the Senator from Delaware can have his mind put at

ease on the question of whether or not the Foreign Relations Committee has looked into this subject, I direct his attention to the record of hearings on the Peace Corps and AID that were held in April.

Mr. ROTH. Mr. President, I say to my distinguished colleague who is a member of both the Foreign Relations Committee and the Governmental Affairs Committee that what I said was that this had not been reviewed by the committee charged with the responsibility for reorganizing. This is a matter of grave concern to me. It seemed to me that those who are advocates of such modification certainly are entitled to promote that idea, but in keeping with the procedures of the Senate, it should be brought to the Governmental Affairs Committee which has that responsibility.

As I already mentioned, the creation of ACTION was taken after long and extensive hearings, and I shall put the Foreign Relations Committee as well as other committees on notice that when it comes to reorganizations we in the Governmental Affairs Committee have a special responsibility and we intend to insure that that responsibility is maintained and will object to any efforts like trying to avoid that jurisdiction and promoting reorganization through other authorizing committees.

It may very well be that had those who feel this change should have come about come to our committee that would have been the will of the majority there.

But what I am saying is that the Governmental Affairs Committee has that special responsibility and we intend to maintain it.

But in any event, as I said earlier, it seems to me that there are some very good reasons for keeping ACTION intact. From budgetary and administrative efficiency points of view alone, the present structure is certainly logical. At a time when we are cutting not only Federal programs but it is proposed to cut whole departments, it makes no sense to me to recreate an independent agency which has been functioning perfectly well in an existing organizational structure.

OMB has estimated that the added costs of just setting up a newly independent Peace Corps would be at least $3 million. Reference has already been made that based on the results of the 1979 hearings, the cost could be as much as $15 million. There does seem to be some disagreement as to what the actual costs today would be. I would say that this disagreement itself should be sufficient reason to subject this proposal to regular Senate procedures. I would also note that whatever the comparable cost was in 1979, it would surely be considerably higher today.

Finally, I understand that one of the motives for separating the Peace Corps from ACTION may be unhappiness on the part of some Senators with the background of the present ACTION Director, Mr. Pauken. All I would say about that line of reasoning is that, if every time someone does not like the head of an agency who has been confirmed by the Senate, all we need do is dismember that agency, we might as well forget about keeping any kind of organizational order in Government.

For these reasons, Mr. President, I strongly support the Hatch amendment. I would urge and suggest to those who are advocates of revision, or reorganization, to propose it through the regular procedures of the Senate.

I yield back the floor.

Mr. PELL. Mr. President, I think if this amendment is accepted we will be sending exactly the wrong signal all around the world, especially to those Third World nations where so many of our Peace Corps volunteers are located: a signal to the effect that we are taking the wraps off and that we will perhaps consider using the Peace Corps for intelligence-gathering purposes.

I think one of the reasons why the Peace Corps has been so well accepted for the past 20 years is the fact the developing countries know that Peace Corps volunteers are not being used for intelligence purposes, and for that reason they have been able to go into sensitive regions of the recipient country and carry out their assigned development missions.

This amendment would wave a flag of warning. Even though we know ourselves that we would not use them for this purpose, it would still wave a flag, and I think it would do harm to the acceptability of the Peace Corps. It could even put in jeopardy the lives of 5,400 volunteers currently stationed overseas.

We should also recognize that this very issue was thoroughly discussed in the committee and we voted 10 to 2 to separate Peace Corps from the ACTION Agency.

In addition, we all know, and it has been referred to here, that the full Senate decided this past June that there should be this separation.

I would agree with the previous speakers that an intelligence background or military background should not only not disqualify the present Director of ACTION from being the Director of ACTION, but it should enhance his performance in that job, because I am one of those who believes that military service rounds out a man, and there is no reason in the world why it should be considered a disqualifying factor. I would like to think it should be thought of as an added factor, one more facet of experience. I say this in recognition of the fact that Mr. Pauken should be well suited to be the head of ACTION, but that because of the intelligence part of his background I do not think he should have supervision over the Peace Corps, not because of the fact, but because of the appearance, which could be misunderstood overseas. It is this that is so important.

More important than whether it is Mr. Pauken who is the head of ACTION or not is the long-term symbolism of the Peace Corps as being a group of American volunteers interested in helping the recipient countries and promoting the cause of peace around the world. I firmly support the bipartisan committee position on this issue.

Mr. CRANSTON. Mr. President, I have a few remarks to add to my statement of yesterday.

First, the distinguished Senator from Utah (Mr. HATCH) yesterday submitted for the RECORD a letter to the editor written by Joseph H. Blatchford, director of the ACTION Agency under President Nixon, which appeared in the Washington Post on May 26, 1981. I would simply like to insert a letter which takes a contrary position—published in the Washington Star on May 1, 1980—from John R. Dellenback, Director of the Peace Corps under President Ford. Mr. Dellenback, who is also a former Republican Congressman from Oregon, stated, referring to the current inclusion of the Peace Corps in the ACTION Agency:

> However much those programs look alike on the surface, below the surface they are very considerably different and I think that experience has demonstrated that the attempt to combine all these programs in a single agency was a legislative error.

I ask unanimous consent that Mr. Dellenback's letter to the Washington Star be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

LETTER TO THE EDITOR

For the sake of our present and potential future Peace Corps volunteers all over the world and their families, as well as for the Peace Corps itself, I deeply regretted your April 22 editorial on the ACTION nominee.

As a former member of the Congress from Oregon I must share the blame for the present unfortunate situation. It was the Congress that, at the time of Mr. Nixon's presidency, saw fit to take some domestic volunteer programs and couple them with the Peace Corps in the new agency called ACTION. However much those programs look alike on the surface, below the surface they are very considerably different and I think that experience has demonstrated that the attempt to combine all these programs in a single agency was a legislative error.

During my two years as director of the Peace Corps during Mr. Ford's presidency we gave high priority to making as absolutely certain as we could that there existed neither fact nor impression of any connection between the Peace Corps and any intelligence service of the government. Our first reason was to keep our volunteers safe from any counter-intelligence operations in any foreign country. Our second reason was to maximize their effectiveness as communicators between our country and the land in which they were serving and to make their road there as smooth as possible in that regard. Our third reason was to assist the fulfilling of the Peace Corps mandate of promoting world peace and friendship, assisting by eliminating as effectively as possible any suspicion that our volunteers were intelligence agents.

Periodically the charge would be raised that our people were really intelligence agents, most particularly CIA. We would immediately jump on the accusation and challenge the spreader of any such charge or rumor to cite specifics. During my full two-year tenure in the Peace Corps there was no successful challenge to our claim that no such links existed.

Mr. Pauken is very possibly and even probably an extremely fine and competent person. So far as the domestic side of ACTION is concerned, he might well make an excellent administrator. While, under a combination of statute and executive order, the Peace Corps is operationally predominantly autonomous, there remains enough structural

linkage between Peace Corps and ACTION, however, that, if Mr. Pauken is confirmed as ACTION director, there can no longer be a successful refutation in the field of a charge that a linkage of some sort exists between Peace Corps and U.S. intelligence agencies. There are certainly equally responsible positions in our government where his military and intelligence background would be a positive asset. That would not be so as director of ACTION.

I spent four years as an officer in the U.S. Navy during World War II and am proud of that service and of our nation's military. I am strongly supportive of our nation's properly conducted intelligence services. But the record of the Peace Corps and its 80,000-plus volunteers in service to our country and to some of the neediest parts of the world is extraordinary. The appointment of Mr. Pauken as ACTION director may well entail the paying of a fearsome price by the nation, by the Peace Corps, and most importantly of all by our volunteers in the field.

Some of those volunteers could well become sitting ducks, and that would be tragic.

JOHN R. DELLENBACK.

Mr. CRANSTON. Mr. President, second. I want to speak briefly to the point made that the Governmental Affairs Committee examined this issue in 1979. I want to reiterate that the 1979 review was of the entire ACTION Agency and whether all of its programs should be dispersed throughout various Federal agencies. The Senator from Utah is correct that the committee did consider the impact that removal of the Peace Corps would have upon the other programs in the ACTION Agency. However, the committee's recommendation assumed continuation of the VISTA program—an assumption that we can no longer make given the administration's efforts to terminate VISTA. I do not believe we can in any way assume that the Governmental Affairs Committee would make the same recommendation today in light of this considerable change.

Moreover, both the Senate Foreign Relations Committee and the House Foreign Relations Committee and the House Foreign Affairs Committee—the two committees with jurisdiction over the Peace Corps—made it abundantly clear in the 1979 joint statement accompanying the conference report on H.R. 3324, the 1979 Peace Corps and foreign assistance authorization legislation, that the authorizing committees were deeply concerned about continuation of the Peace Corps within the ACTION Agency and specifically stated that "If implementation of the Executive order does not provide sufficient autonomy and alleviate the problems which the Peace Corps has been facing in recent years" the committees intend to reconsider the issue of separation. That conference report was filed in July of 1979—2 months after the Governmental Affairs Committee report—and was approved by both Houses.

This year, both the House and Senate authorizing committees approved legislation separating the Peace Corps from the ACTION Agency. Considerable deference is owed, I believe, to the judgment of these two committees with responsibility for the Peace Corps and longstanding awareness of the problems the Peace Corps has experienced within the ACTION Agency. Their judgments are made on the basis of the situation today.

I also wish to stress that much of the sentiment to keep the Peace Corps within the ACTION Agency in 1979 was based upon a desire to give the 1979 Executive order a chance and see if it alleviated the problems experienced by the Peace Corps within ACTION.

In my view, that experiment has not succeeded. My colleague from Utah argued yesterday that there is considerable harmony within the ACTION Agency. That is not the picture I have been given. Yesterday, I inserted in the RECORD an article which recently appeared in the Washington Post describing the degree to which relationships between the Peace Corps and the ACTION Agency had deteriorated. I have also been contacted by a number of Peace Corps volunteers and staff expressing the same concerns discussed in the Post article. The unilateral termination by the ACTION Agency of Peace Corps recruiters this very week has exacerbated the discord described in the Post article.

It is clear to me that the 1979 Executive order has not resolved these longstanding problems.

Mr. President, we can continue to debate the cost issue for some time. I have obtained—although not from any official Peace Corps source and certainly not with the knowledge of Mrs. Ruppe—a copy of an internal Peace Corps budget analysis which estimates that after separation the Peace Corps will save $1 million per year. This analysis is a detailed, program-by-program analysis. It is the estimate to which the distinguished committee chairman (Mr. PERCY) just made reference.

Mr. President, this internal Peace Corps budget workup estimates a one-time cost for separation of $920,000. However, this one-time cost is more than made up by the subsequent yearly savings of $1 million.

According to this document, the projected savings is the result of two factors. First, the analysis states that several functions performed by ACTION as a part of the joint support services duplicate largely or entirely existing Peace Corps functions, therefore, according to the Peace Corps budget projection, little or no additional costs would be incurred by the Peace Corps due to autonomy.

Second, the remaining functions to be transferred will be exclusively tailored to meet Peace Corps needs rather than having to meet the needs of two agencies. According to this analysis, this will result not only in reduced cost but also more effective services—not because ACTION provides the services inefficiently or badly, but simply because the Peace Corps will be designing the functions to serve itself.

Mr. President, I ask unanimous consent that this document be printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

ANALYSIS

The following analysis provides an estimate of the cost to the Peace Corps of acquiring for itself those services now performed for it by ACTION as Joint Support Services. The analysis is based on the level of services required to support the Peace Corps in FY 1982 at the $95 million level and presumes that the transferred functions would be integrated into the Peace Corps organizational structure now being established in response to the FY 1982 budget restrictions rather than maintaining the current ACTION organization structure.

The analysis is in two parts. The first part deals with the continuing costs of providing the services to be transferred. The second part deals with the one-time cost of implementing the transfer.

PART I—CONTINUING COSTS

SUMMARY OF PEACE CORPS COST OF JSS FUNCTIONS

Function [1]	Positions	Amount (thousands)
Recruiting	161	$5,057.5
Administration and finance	99	5,669.0
Miscellaneous functions	31	1,489.0
Contingencies		200.0
Total	291	12,415.5
Budgeted Peace Corps payment for JSS		13,543.0
Potential savings		1,127.5

[1] See following tables.

MISCELLANEOUS FUNCTIONS

Function	Positions	Amount (thousands)
Compliance and auditing	8	$275
Legal	2	81
Congressional relations	2	60
Public affairs and communications	10	820
Personnel	4	110
PCPP	2	65
Former volunteer services	3	78
Total	31	1,489

CURRENT ADMINISTRATION AND FINANCE FUNCTIONS

Function	Positions	Amount (thousands)
Heath services	25	$845
Computer services	10	1,145
Contracting/procurement	5	151
Space management	5	80
Library	3	69
Communications	6	89
Supplies and stationery		185
Printing	3	70
Accounting	30	600
Travel office	6	110
Director's office	4	150
Management analysis	2	75
Accounting system operations cost [1]		50
SLUC, WATS, FTS, penalty mail, etc.		2,050
Total	99	5,669

[1] The assumption is that we would use on a reimbursable basis the accounting system developed by Interior or State. Most P.C. accounting is already provided by State as part of FAAS.

Note: In the current A. & F. budget in ACTION supplies and materials for all components funded centrally. This display reflects that structure.

PART II.—*One-time costs*

	Amount
Relocation costs (recruiting)	$200.0
Cost of specialists detailed from other agencies to assist in reorganization and transfer	120.0
Office moves within Washington, D.C.	400.0
Equipment	100.0
Cost of carrying unassigned personnel pending final assignment or termination	100.0
	920.0

The projected savings shown by the analysis are the result of two factors.

Several functions performed by ACTION

as a part of the Joint Support Services duplicate largely or entirely existing Peace Corps functions (e.g. planning, budgeting, personnel) therefore, little or no additional costs are incurred by Peace Corps due to autonomy.

The remaining functions to be transferred will be exclusively tailored to meet Peace Corps needs rather than having to meet the needs of two agencies. This results not only in reduced cost but also more effective services—not because ACTION provides the services inefficiently or badly, but simply because Peace Corps will be designing the function to serve itself.

This is a preliminary analysis and is, of course, almost certain to be revised and corrected as circumstances dictate. The general conclusion, however, is believed to be accurate.

Mr. CRANSTON. Mr. President, I think this analysis is very significant. Whatever one-time costs arise out of separation will be more than compensated for by the annual savings to the Peace Corps once it has control of its entire budget and expenditures. In sum, this separation will end up saving the taxpayers' money, not requiring more spending.

Mr. President, with respect to the discussion by the Senator from Utah about the background of the former Peace Corps Deputy Director—from 1969 to 1971—Thomas Houser, let me simply say that I have reviewed the transcript of the hearings before the Committee on Foreign Relations concerning Mr. Houser's confirmation in 1969. There is no mention of Mr. Houser's intelligence background in the hearing. The biographical statement submitted by Mr. Houser, which is included in the transcript, explicitly mentions his military service without any reference to service in military intelligence. His biographical statement simply says "U.S. Army, August 1954–56, honorable discharge."

There is no indication that there was any public or congressional knowledge of his military intelligence experience. That contrasts, I might point out, to the circumstances with regard to Mr. Pauken where his military intelligence background was specified in his official biography and administration announcements and was reported in the press well before the committee began its review of his nomination. Indeed, Mr. Pauken himself highlighted this aspect of his background during his congressional campaigns.

In any event, what difference does any of that make in 1981 in terms of whether the Peace Corps should be part of the ACTION Agency today.

With respect to Mr. Pauken's military intelligence background, let me say that Mr. Pauken is not the issue here—the issue is what's best for the Peace Corps and for the Nation.

Any suggestion that a vote on this amendment is a vote for or against Mr. Pauken is just not true. Our Committee on Foreign Relations voted 10 to 2 for the separation. Four of those 10 Senators voted in committee for the confirmation of Mr. Pauken, yet voted for Peace Corps autonomy in committee and on the floor on June 17, when the Senate approved this provision as part of S. 1193, the State Department authorization bill now pending in the other body.

Moreover, a fifth Senator on our committee, the principal cosponsor of the separation legislation, the distinguished Senator from Maryland (Mr. MATHIAS), also voted for Mr. Pauken's confirmation in committee and for Peace Corps automomy on the floor last June.

So, this is not in any way a vote on whether or not Tom Pauken should head that ACTION Agency.

Moreover, to the suggestion that our vote to separate the Peace Corps could somehow "cast any kind of cloud over our veterans who served honorably and well in Vietnam," I say: Nonsense. The Deputy Director of the Peace Corps, Everett Alvarez is one of our most distinguished Vietnam veterans.

He was held as a prisoner of war in Vietnam longer than any other POW there. He certainly served there honorably and well—as Mr. Pauken did—and, under the autonomy legislation, he would become the No. 2 person, with heightened visibility and responsibility, in an independent agency.

Mr. President, in the event that an argument is made by the proponents of the amendment that the ACTION Agency has plans to develop new programs to replace the VISTA program once it has been terminated and that therefore continuing the Peace Corps in the ACTION Agency still makes sense, let me make a few anticipatory responses.

First, Mr. President, I think we ought to clarify for the record what the other programs are which are operated by the ACTION Agency and how these programs differ dramatically from the Peace Corps.

Aside from VISTA, the ACTION Agency has no full time, stipended volunteer programs.

The Older American programs consist of RSVP, a part-time unstipended volunteer program, and the Foster Grandparent and Senior Companion programs, which are also part time, but do involve a stipend for the low-income volunteers.

Volunteers for all the Older American programs must be over 60 years of age. I truly doubt, Mr. President, that, if VISTA is terminated and separation does not occur, the ACTION Agency will be undertaking any joint recruiting efforts between the Peace Corps and the Older American volunteer programs.

Second, I note, that the Director of the ACTION Agency in a recent interview in Prime Times, an ACTION Agency publication, and in various public discussions, has indicated that the emphasis of any new volunteer programs will be on recruiting more part-time unstipended volunteers. These programs, Mr. Pauken, indicates would be modeled upon the Older American volunteer programs, which are part time, nonstipended.

The Peace Corps is a full-time, stipened volunteer program. The support services—health services, transportation, training—are very, very different from those necessary for the Older American program.

Third, I will be watching with a great deal of interest efforts to develop congressional support for such new initiatives by the ACTION Agency at a time when they have terminated a time-tested, excellent volunteer program such as VISTA. I will be very interested in seeing whether there is congressional support for expensive experimenting with new initiatives when proven programs in every agency are being terminated with what I believe is little or no justification.

Mr. President, in the event that point is raised during this debate that I have somehow changed my position from that which I took during the 1979 debates on the proposed transfer of the Peace Corps from the ACTION Agency.

I think it is extremely critical to note that much of the recommendation of the Governmental Affairs Committee opposing a transfer in 1979 and the position of many Senators at that time was based upon the issuance of Executive Order 12137 giving the Peace Corps a new status within the ACTION Agency. We felt at that time that we ought to give the Executive order an opportunity to work. I specifically said in my remarks on June 14, 1979, that I felt we "should give that new structure a chance to work."

It is now 2 years later. The Peace Corps does not enjoy the substantial autonomy we had hoped would follow the Executive order. The ACTION Agency controls the most visible and critical services, such as recruitment and communications. The Peace Corps continues to be subjected to the bureaucratic layers and conflicts which sap it of its visibility and vitality.

The new Director of the ACTION Agency in his confirmation hearing emphatically refused to consider allowing the Peace Corps to control its own recruitment or otherwise changing the status quo. The Executive order has not alleviated the problems facing the Peace Corps within the ACTION Agency. My position today is in no way inconsistent with what it was 2 years ago. I urged then giving the new structure an opportunity to alleviate the problems. We have done that. It has not worked to my satisfaction.

I would also note for the record that the debate on June 14, 1979, took place in connection with a proposal to transfer the Peace Corps into IDCA—the International Development Cooperation Agency. I felt, as did many others, that the Peace Corps should not be transferred into an international development agency, a transfer that would undermine the essential people-to-people essence of the Peace Corps.

It should also be noted for the record that the Senator from Utah on June 20, 1979, voted for an amendment to transfer the Peace Corps out of the ACTION Agency and to establish it as an independent agency—a position exactly opposed to his position today.

Perhaps the Senator from Utah will be explaining the basis for his change of position during the debate today, but unlike those of us who in 1979 expressly stated our desire to give the Executive

order a chance to alleviate the problems faced by the Peace Corps within the ACTION Agency and who have become convinced today that the Executive order has not worked, it is somewhat difficult to imagine the basis for the Senator from Utah's change of heart in this matter. Perhaps he will enlighten us.

Finally, with regard to the issue of the cost allocation of the joint services, I note that the Senator from Utah quoted from the testimony of the Acting Director of the Peace Corps at the April 29 hearing of the Senate Foreign Relations Committee. In a response to my question as to whether he felt the current allocation was equitable, he responded at page 12 of the unprinted transcript:

I think in some offices it is and in some offices it is not. For example, in health services, we pay about 60 percent of the costs and we get over 90 percent of the service out of that office. In some of the other offices, we don't get 60 percent of the service, but we do pay 60 percent of the cost. So it varies.

Regrettably, I must note, the Senator seems to have omitted the last two sentences.

Mr. President, I strongly urge that the amendment be rejected by the Senate.

I would like to ask the distinguished Senator from Maryland does he wish to speak before we reach the hour of 12 noon?

Mr. MATHIAS. Yes, I would like to say a few words.

Mr. CRANSTON. How do we divide this time?

Mr. MATHIAS. Mr. President, first of all, let me respond to the concerns of the distinguished Senator from Delaware, the chairman of the Committee on Governmental Affairs, because I share with him the kind of desire or the sense of propriety about committee jurisdiction, and the fact that we should act in accordance with our established procedures.

I do not share with him a sense of concern that this is a reorganization of the kind that demands the attention of the Committee on Governmental Affairs because what we are doing here is just severing a few shared services, recruiting and computering, in order to give the Peace Corps better management of its program, and to give it a clearer identity and to give it in the eyes of the world an integrity and a perception of independence.

That really is what it is all about.

I would say that nothing could be more important than these latter points, integrity and a perception of independence.

We are in a very dangerous period in history. We are in a period in which the United States should be able to reach out in the world and reach out with the best that we have got and to be able to communicate accurately and effectively around the world.

It seems to me that without this concept of integrity and a perception of independence we will not be able to do as well as we should. For that reason I strongly support the concept of separation.

Mr. CRANSTON. I thank the distinguished Senator from Maryland for his very significant and important leadership in this matter.

I will just take one further moment to say, Mr. President, that under the current arrangement, the Peace Corps is submerged under unnecessary layers of bureaucracy—a bureaucracy that saps its strength and vitality and has now adopted an adversarial and hostile attitude toward the Peace Corps.

Mr. President, the very essence of the Peace Corps and its appeal to Americans lies in its being the antithesis of a government bureaucracy. Yet, buried within the ACTION Agency, the Peace Corps has lost much of the visibility and strength which it enjoyed in its early days. Separation will restore the Peace Corps to the autonomy it had during its first 10 years and permit it to emerge again as a shining example of the willingness of the American people to give of themselves for the betterment of mankind.

I can think of no greater tribute to the Peace Corps, in this its 20th year, than to free it to regain its strength and vitality. Today, more than ever, we need a strong Peace Corps working overseas as a living, daily manifestation of the best that is in us and our way of life.

Let us do what is best for this fine program. I urge rejection of this amendment

The PRESIDING OFFICER. The Senator from Delaware.

Mr. ROTH. I would just like to respond to the comments of the distinguished Senator from Maryland who, I know, has great respect for Senate procedures. But I have to take strong exception when he says that this is not a matter of great importance because all we are doing is cutting off a few shared services.

Let me underscore very clearly what is being proposed here, and that is the creation of a new independent agency. Make no mistake about it an independent agency is a status that the Peace Corps did not even enjoy prior to ACTION because in those days it was required to report to the State Department.

Perhaps what the advocates of this independent agency are saying is sound but they should come to the Committee on Governmental Affairs to make their case. To claim that it is not important because it is small is a little bit like making the old argument that a person, a girl, is just a little bit pregnant. The fact is that this is a reorganization of great significance, and I urge again that we use the regular procedures of the Senate.

Mr. HATCH. Mr. President, I am prepared to vote. Let me, however, make a further statement at this point.

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Senators CRANSTON and PERCY are concerned that VISTA is being phased out and there will not be enough critical mass in ACTION to keep it alive.

The ACTION Agency is very much alive and planning new initiatives. Let me cite a few.

OTHER PROGRAMS

There are other major programs at ACTION, other than the VISTA program. The Foster Grandparent program which was created in 1965 to link older Americans with children in need is well known. Through the Foster Grandparent program, low-income people who are 60 years of age or older can volunteer their time to help children with physical, mental, emotional, or social disabilities. The volunteers serve 20 hours a week and are provided a daily meal, transportation assistance, accident insurance, and an annual physical examination. In 1980, some 17,370 foster grandparents assisted more than 43,000 children.

Another important ACTION program is the retired senior volunteer program, "RSVP." RSVP was authorized in 1969 to give people at least 60 years of age or older a chance to use their talents, skills, and experience while performing community services. RSVP volunteers serve part time in their own communities on projects sponsored by nonprofit groups including community ACTION agencies, local governments, and senior service organizations.

The senior companion program is another major volunteer program at ACTION. The program provides volunteer opportunities for low-income Americans 60 years of age and older. Authorized in 1975, SCP enables older people to play a critical role in moderating some of the disadvantages of growing old alone, afraid, and frail.

The program coordinates and places volunteers through direct-service health care providers, social service agencies, and Federal and State long-term care networks. SCP volunteers assist older people who are chronically homebound and at the risk of being institutionalized. SCP volunteers throughout the country have helped strenghten the capacity of vulnerable older people, enabling them to live independently in their homes and avoid inappropriate institutionalization.

Millions of Americans on fixed incomes are particularly vulnerable to inflation and rising energy costs. ACTION has a program to meet the needs of these Americans. The fixed income consumer counseling (FICC) program offers people on fixed incomes information about consumer issues such as health care, energy, food shopping, and food preparation. This program has helped millions of Americans who are on fixed incomes.

Problems of urban crime are being addressed with volunteers in various programs, particularly those in ACTION's older American volunteer programs. This is an important aspect of our overall program to stimulate voluntarism.

Furthermore, ACTION is now in the process of establishing a number of brandnew initiatives promoting voluntarism. These new programs include the following:

1981 ACTION PROGRAM INITIATIVES

Literary Initiative Program—perhaps the most significant form of anti-poverty effort devised—will be conducted in cooperation with teachers and will supplement classroom work with outside and after hours efforts—will complement and no duplicate other literary programs by focusing on key target groups.

Target Groups—ACTION volunteers assigned to existing programs for refugee children. English as a second language children, migrant workers' children, American Indian

children, poor and minority children, and troubled children (those in institutions, juvenile offenders, etc.).

Peer Tutoring—encourage development of peer tutoring program.

Parent Involvement—involve the parents in activities designed to provide an environment conducive to literacy.

Industry and School—help identify needs and arrange grants from industry to schools to provide locally-available in-school tutors for the learning-disabled.

Drug Abuse Program—will comprise three components and emphasize prevention—three components will be organized separately as volunteers but will work together in each locale.

Youth—created and disseminate a drug prevention model based on anti-smoking campaigns for use in peer education—also identify and disseminate information on other successful programs.

Parents—support efforts of local parents groups and aid the National Federation of Parents for Drug-free Youth.

Community—work to coordinate community wide efforts and improve especially valuable groups such as county medical societies or cable television companies (increase drug abuse programming).

Young Volunteers in ACTION—create a corps of part time, non-stipened young volunteers for service in their communities.

Demonstration Phase—now in targeted areas.

ACTION may seek a specific legislative mandate depending on success of demonstrations.

Projects to offer opportunity for sustained or short term service by youth between the ages of 14 and 22. Volunteers will serve 10 hours a month under the direction of a Project Director with an informal contract.

Runaway Program—seeks a comprehensive approach to this problem with a reliance on voluntary action—it is designed to be economical with a minimum of government funds and to enhance rather than compete with existing programs—ACTION will supplement private efforts rather than run actual operations.

National Runaway Hotline—encourage and publicize.

Maintaining Current Information about Social Services for Runaways—enhance effectiveness of the Hotline by adding this capacity.

Insuring that Services are Effectively Provided.

Providing Temporary Shelter.

Providing for the Transition to Adulthood.

Preventing Running Away.

Vietnam Veterans Leadership Program—will encourage Vietnam Veterans to serve as volunteers to help their fellow veterans who have needs—assure help for the veterans who still have significant lingering problems such as unemployment or under employment—demonstrate the leadership of the Vietnam veteran.

Demonstration Phase underway now—will have 50 projects designed for local needs underway by the end of FY 1982.

Hearing October 22, 1981, before House Veterans Subcommittee on Program by Director Pauken.

Mr. HATCH. Mr. President, I ask unanimous consent that there be printed in the RECORD the excellent arguments made by the distinguished Senator from California against doing precisely what he is requesting to be done here in a statement of June 14, 1979, in the CONGRESSIONAL RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

SPEECH OF SENATOR CRANSTON

Mr. CRANSTON. Mr. President, I oppose the amendment.

I have given a great deal of thought to this matter, and have concluded that the legitimate concerns of proponents of a Peace Corps transfer can be met within the existing administrative structure of the ACTION Agency, given the President's May 16, 1979 Executive Order (No. 12137) to grant the Peace Corps a large measure of independence within the agency. I think we should give that new structure a chance to work.

Keeping the Peace Corps within the ACTION Agency under the terms of the Executive order is preferable, I am convinced, to any of the available options.

I cannot support the alternative of placing the Peace Corps in the proposed new International Development Agency.

The fundamental purpose of the Peace Corps is to help promote a better understanding of the American people on the part of the peoples served and a better understanding of other peoples on the part of the American people. It is a people-to-people program, not a material assistance program. I believe that its essential spirit and integrity would be very seriously compromised by any suggestion that it is an international development program.

For different reasons, I cannot support the proposal that the Peace Corps should be transferred back to the State Department. Such a transfer now could be construed as being for the purpose of subjecting the program to political and foreign policy dictates. The reality of restoring the pre-1971 independence of the Peace Corps within the State Department would not, in my estimation, resolve this serious perception or misperception question.

Nor do I believe it would be feasible at this time to abolish one agency and then establish a new, independent Peace Corps Agency—whether that new agency were styled as a foundation, a nonprofit private corporation, or, as I might prefer under other circumstances, a new Federal agency.

It is for these reasons that I support retaining the Peace Corps within the ACTION Agency.

Mr. President, Richard Celeste, Director of the Peace Corps, has provided me with an analysis of the effects of Executive Order 12137 prepared by a former general counsel of the Peace Corps, Bill Josephson. Mr. Josephson concludes that under the arrangements of the Executive order, the Peace Corps will have even more independence than it had during the 1960's.

This analysis, prepared by an individual who was closely involved with the Peace Corps during the program's early history is most significant in light of the current debate.

Mr. President, I ask unanimous consent that Dick Celeste's letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

PEACE CORPS,
Washington, D.C., June 6, 1979.

Hon. ALAN CRANSTON,
U.S. Senate, Washington, D.C.

DEAR SENATOR CRANSTON: President Carter recently issued an Executive Order which re-established the autonomy of the Peace Corps. Since then I have had a number of inquiries regarding the scope of the Executive Order.

At my request, Bill Josephson, a distinguished New York attorney and early General Counsel of the Peace Corps, analyzed the Executive Order in the context of the original Peace Corps mandate. I believe you may find some of his observations of particular interest. Josephson observes:

"While for technical reasons Executive Order No. 12137 establishes the Peace Corps as an agency within ACTION, actually the Peace Corps and its new Director, Richard F. Celeste, have more independence than the Peace Corps had in 1961 and 1966."

". . . *Independence of Peace Corps Director.* Executive Order No. 12137 delegates the principal program and administrative functions conferred on the President by the Peace Corps Act *directly* to the Director of the Peace Corps. In 1961 to 1966 those functions were delegated by the President first to the Secretary of State and then by him to the Director of the Peace Corps. Thus, the Peace Corps Director, in 1961 to 1966, was technically subject to the direct authority of the Secretary of State. Under Executive Order No. 12137, the Peace Corps Director in effect reports directly to the President. Any other United States Government officials (including the Director of ACTION but possibly not the Secretary of State) who disagrees with the Director of the Peace Corps with respect to the carrying out of a Peace Corps Act function must take his case to the President."

". . . the Order provides that all funds appropriated or otherwise made available to the President for carrying out the provisions of the Peace Corps Act are allocated directly to the Director of the Peace Corps. Thus, the Peace Corps Director will deal directly with the Office of Management and Budget and the Treasury Department with respect to the apportionment, obligation and expenditure of Peace Corps funds. Previously, those funds were allocated to the Director of ACTION. (In 1961 to 1965, they were allocated to the Secretary of State.)"

". . . *Relationship to ACTION.* Executive Order No. 12137 establishes the Peace Corps as an agency within ACTION. None of the functions under the Peace Corps Act are delegated to ACTION or its Director. As we have seen, all the principal Peace Corps Act program and administration functions are delegated directly to the Director of the Peace Corps. The sole authority delegated to the Director of ACTION with respect to the Peace Corps is, under section 1–605 of the Order, the 'general direction of *those ACTION functions which jointly serve* ACTION domestic volunteer components and the Peace Corps.' (Emphasis added.) The Peace Corps Director under section 1–112 of the Order is to *consult and coordinate* with the Director of ACTION so that they carry out *their respective functions* consistently. Likewise, under section 1–605 of the Order the Director of ACTION is responsible for '*advising* the Director of the Peace Corps to ensure that the functions delegated under this Order to the Director of the Peace Corps are carried out.' "

I hope these excerpts will clarify for you the President's mandate that the Peace Corps is to be autonomous and that the responsibility for, and control of, its program, policies, and budget rest solely with the Peace Corps Director.

If you have any questions, please do not hesitate to contact me at 254–7970.

Sincerely,

RICHARD F. CELESTE,
Director.

Mr. CRANSTON. Mr. President, throughout the debate on what should be the future administrative arrangement for the Peace Corps, I have been concerned that many who call for a transfer of the Peace Corps are basing their decisions on unwarranted, unfair, uniformed attacks on the ACTION Agency Director, Sam Brown.

When Sam Brown took over the leadership of the ACTION Agency in 1977, he inherited a multitude of problems. He has done much to improve the situation. In fact, a recent GAO report examining prob-

lems in the Peace Corps concluded by acknowledging that Sam Brown has contributed significantly to resolving the problems studied by the GAO.

Mr. President, decisions on the future of the ACTION Agency programs, including the Peace Corps, should not be based on personality politics. They should be based on what is best for the optimum development of the programs and how the volunteer participants can best continue their work in human development endeavors.

Mr. President, I chair the Senate Subcommittee on Child and Human Development which has legislative and oversight responsibilities for the domestic volunteer programs of the ACTION Agency, and am the author of S. 239, the Domestic Volunteer Service Act Amendments of 1979, which reauthorizes certain of the Agency's domestic programs, including VISTA, the Peace Corps' counterpart program.

When S. 239 was considered by the Committee on Labor and Human Resources, there was much discussion as to what would be the most responsible course of action to take with respect to the future administrative arrangements for the agency's domestic programs. It was the sense of the committee that the future of the Peace Corps would weigh heavily on what would be the future of the domestic programs.

Mr. President, to address these concerns, the Senator from Wisconsin (Mr. NELSON) proposed during full committee consideration of S. 239 that the committee agree to a resolution requesting the Governmental Affairs Committee to look into the question of where the ACTION programs should be housed, and report to the full Senate by June 4.

Mr. President, the Governmental Affairs Committee was most responsive to the resolution submitted to it by our committee. The Governmental Affairs Committee held a day of hearings, receiving testimony from a range of witnesses concerned about the future of both the Peace Corps and the domestic programs, and submitted a detailed report (No. 96-199) to the full Senate on the day it was requested—June 4. It was the conclusion of the Governmental Affairs Committee—which voted 15 to 2—that none of the programs now in the ACTION Agency should be transferred to other agencies. It is that committee's position that no compelling reasons have been identified to justify reorganization of the ACTION Agency, and to the contrary, that retaining the current organization structure, particularly in light of the President's Executive order giving more autonomy to the Peace Corps within the ACTION Agency, would provide the best opportunity for all the volunteer programs to achieve the mission established for them by Congress.

Mr. President, let me highlight the conclusions of the Governmental Affairs Committee's recommendations with respect to the Peace Corps:

First. Association of Peace Corps with ACTION helps insure continued emphasis on the small humanitarian nature of the volunteer program.

Second. The Peace Corps programs benefit from coordination with domestic programs.

Third. The new Executive order protects Peace Corps autonomy.

Fourth. Reorganization linking the Peace Corps with AID could lead to undue domination by other foreign policy agencies.

Fifth. The alternative of establishing the Peace Corps as a completely separate agency is unjustified at this time.

Sixth. The alternative of establishing the Peace Corps as a quasi-Government foundation involved too great a separation from U.S. interests.

Mr. President, the legitimate concerns of proponents of a Peace Corps transfer can be met within the existing administrative structure of the ACTION Agency through the Executive order that the President has promulgated to give the Peace Corps a large measure of independence within the agency. I think we should give that new structure a chance to work.

Mr. DODD. Mr. President, I oppose the amendment of the distinguished Senator from Utah.

As one of only two former Peace Corps volunteers currently serving in the U.S. Senate, I believe it is important to the continued viability of the Peace Corps that it be an independent agency.

At the outset, Mr. President, it is important to note that the Senate has already dealt with the separation of the Peace Corps from ACTION this year. On June 17 of this year, the Senate by a bipartisan vote of 52-to-45, expressed its support for an amendment to the State Department authorization bill separating the Peace Corps from Action. Reestablishing the Peace Corps as an independent agency has already been fully debated and acted on by the Senate.

In 1961, the Peace Corps was first created as an independent agency. However, in 1971, it was incorporated into the ACTION Agency. Since that time, I believe the Peace Corps has lost much of its visability and its effectiveness in recruiting motivated volunteers. As part of ACTION, the unique international mission of the Peace Corps has been blurred by its association with all the other domestic volunteer programs. Separation from ACTION will help restore the public image and identity of the Peace Corps and enhance its recruiting efforts, I believe.

The Peace Corps is a remarkable Government program. It enjoys strong public support and a positive public image, which alone makes it unique among Government efforts. In order to maintain that strong support, the Peace Corps' image must not be diluted by its association with the larger ACTION Agency.

One of the arguments used by opponents of an independent Peace Corps is that it would cost more. I should point out, however, that the Congressional Budget Office has already determined that there will be no new costs arising from the separation of the Peace Corps from ACTION. If there are disputes about the cost impact of reestablishing the Peace Corps as an autonomous agency, we should listen to the Congressional Budget Office which we created, in part, to provide such estimates, rather than to an interested party like the ACTION agency.

Finally, we come to the issue of the Peace Corps' historic policy of complete and total separation from intelligence activities. Some have interpreted the move to reestablish the Peace Corps as an independent agency as a reaction to the nomination of Thomas Pauken to head ACTION. Mr. Pauken's previous experience in military intelligence has caused concern that his oversight of the Peace Corps could blur the strict separation of the Peace Corps from intelligence gathering activities. As a former Peace Corps volunteer in Central America, I am keenly aware of the importance of insuring both the reality and the perception of complete and total separation of the Peace Corps and intelligence functions.

Separating the Peace Corps from ACTION will help insure that perception remains intact. However, it is not the primary reason, or even one of the more important reasons, to give the Peace Corps its independence back. The primary reason is that an independent Peace Corps will be a stronger, more vital, and more effective Peace Corps. I urge my colleagues to oppose this amendment.

A NEW BUREAUCRACY?

Mr. DOLE. Mr. President, it seems to me that at a time when we are abolishing two newly created Federal agencies—the Departments of Energy and Education—it would be both costly and hypocritical to turn right around and establish a new bureaucracy—a separate Peace Corps.

The total cost of separation is debatable, but it is generally agreed that it would range from OMB's $3 million estimate to a 1979 Senate Governmental Affairs Committee report estimate of $15 billion. This high estimate was broken down to $5.5 million for recruitment and communications, $7.1 million for administrative services, $2.5 million for planning and evaluation and $744,000 for other start-up costs. For an organization which effectively is already an autonomous agency following the Peace Corps Autonomy Act of 1979, the cost associated with separation would be an inexcusable example of the squandering of taxpayers' money at a time which we are seeking ways to cut the Federal budget.

Separation of the Peace Corps from ACTION would actually grant it no more autonomy than it already has. With its budget and policy already separate from ACTION, the Peace Corps' Director reports directly to the President—not to the Director of ACTION. In fact, only administrative, computer, and personnel services are shared, saving America's taxpayers millions of dollars.

Mr. President, the Senator from Kansas thinks it is significant that the only hearings held on this subject—more than 2 years ago, by the Senate Governmental Affairs Committee—resulted in a 15 to 2 vote opposing separation. Cost was a determining factor in that vote. The committee did agree that the Peace Corps should be granted autonomy within ACTION, and not long afterward, the Peace Corp Autonomy Act was enacted. I should think that this solution would have effectively put to rest the question of an independent Peace Corps. The organization now has the best of two worlds—autonomy within ACTION, with a direct line to the President, and low costs. This is more than can be claimed for most agencies in the bureaucratic jungle we have created over the years.

Mr. President, we have set out to reduce a mammoth Federal budget. We have begun to dismantle two agencies in that pursuit. Let us not throw a monkey wrench into the operation by turning right around and burdening taxpayers with one more expensive agency. The

time for restraint in Government has arrived.

Mr. GLENN. Mr. President I rise today in support of the action taken in the Senate Foreign Relations Committee to separate the Peace Corps from the ACTION Agency. Over its life the Peace Corps has sponsored the volunteer efforts of some 80,000 Americans serving the people of almost 100 countries around the world.

Even though today the number of volunteers is significantly lower than at its peak, still the Peace Corps represents a unique American contribution to international person-to-person understanding. Its concept is still appealing after 20 years.

American volunteers teaching the less advantaged of the developing world by working and living with them. One wonders who benefits the most from the relationship, the farmer who learns new agricultural methods, the village which obtains a new water system, or the American volunteer whose life is enriched by this unique experience of giving. We must preserve its unique character.

Mr. President, I have come to the conclusion that this can best be done outside, and independent of, the ACTION Agency. While ACTION and the Peace Corps do share the characterization of volunteer agencies, their missions and clients are vastly different.

Problems have existed in the ACTION-Peace Corps marriage since its inception in 1971. Although pushing for Peace Corps autonomy, I acceded to the wishes of former President Carter that the Peace Corps remain in ACTION but with increased independence. In May of 1979, in an effort to forestall a move to separate the Peace Corps from ACTION, President Carter issued Executive Order 12137 which established a new semi-autonomous status for the Peace Corps within ACTION.

I followed with interest the efforts of former Peace Corps Director, and Ohioan, Dick Celeste to make this arrangement work. The Senate may be interested in knowing that after striving to implement Executive Order 12137, former Director Celeste is now of the opinion that the Peace Corps should be independent of ACTION in order to "renew its sense of mission and strengthen its program."

I hope the Senate will act to relieve the Peace Corps of the administrative burdens and bureaucratic loss of identity which its association with ACTION has imposed. I see no benefit to the Peace Corps from its connection with ACTION; the joint administration arrangement should now be set aside and the Peace Corps returned to the status it enjoyed during its first 10 years—a small but independent people-oriented international volunteer program.

THE PEACE CORPS AND ACTION

● Mr. TSONGAS. Mr. President, the Senate today is being asked to consider an issue on which it has already rendered its judgment earlier this year. The issue is the separation of the Peace Corps from the ACTION Agency and the judgment was affirmative. Today's amendment would have us reverse that judgment.

Mr. President, the sound reasons for separating the Peace Corps from ACTION are as convincing as they were on June 17. The Peace Corps began as an independent agency and thrived under that status for 10 years. The very special and very sensitive mission of the Peace Corps abroad distinguishes it from our foreign aid program, from our diplomatic representation, and most emphatically from our intelligence operations overseas.

The effectiveness of the Peace Corps has directly depended on the motivation, morale, and unique sense of purpose which an independent Peace Corps once and could again confer on the volunteers working at the local level in developing countries.

It is crucial that the administration of the Peace Crops reflect and serve its unique mission. If such key functions as volunteer recruitment and communications activities are performed by a parent agency such as ACTION, the Peace Corps suffers a loss in effectiveness. That is not to blame ACTION for purposely undermining the Peace Corps.

No, the issue is essentially bureaucratic. Can a large bureaucracy designed to serve disparate domestic volunteer activities deal effectively with the highly specialized recruitment and promotional activities required for an overseas Third World developmental program? In my view, the answer is no. As a former volunteer, I think I can speak with some authority on the effectiveness of various approaches to Peace Corps recruitment and promotion.

Those duties are best performed by Peace Corps personnel who know intimately the appeal and the challenge of working overseas with the Peace Corps.

The proponents of the pending amendment are basing their argument on the question of cost. They maintain that separation of the Peace Corps from ACTION would add an additional $3 to $15 million to annual Peace Corps costs. My colleague from California has spoken eloquently on that question and has correctly pointed out the true range of additional costs which would fall below $3 million.

I do not believe that the cost issue is irrelevant. The Reagan administration has asked the Peace Corps to absorb substantial cuts in funding for fiscal year 1982. Any additional costs which the Peace Corps would have to absorb would be burdensome. But I think it is important to view this question in perspective. At stake is the long term future of the Peace Corps and its ability to thrive under its own direction. The relatively minor costs associated with separation are worth absorbing given the significant improvements in the overall administration of the Peace Corps to be gained from separation.●

Mr. HATCH. I am prepared to vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Utah. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CANNON (when his name was called). Mr. President, on this vote I have a pair with the Senator from Massachusetts (Mr. TSONGAS). If he were present and voting, he would vote "nay." If I were at liberty to vote, I would vote "yea." Therefore, I withhold my vote.

Mr. ZORINSKY (when his name was called). Mr. President, on this vote I have a pair with the Senator from Connecticut (Mr. DODD). If he were present and voting, he would vote "nay." If I were at liberty to vote, I would vote "yea." Therefore, I withhold my vote.

Mr. BAKER. I announce that the Senator from Rhode Island (Mr. CHAFEE), the Senator from Maine (Mr. COHEN), the Senator from South Dakota (Mr. PRESSLER), the Senator from Alaska (Mr. STEVENS), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arizona (Mr. DECONCINI), the Senator from Connecticut (Mr. DODD), the Senator from Nebraska (Mr. EXON), the Senator from Alabama (Mr. HEFLIN), the Senator from Hawaii (Mr. MATSUNAGA), and the Senator from Massachusetts (Mr. TSONGAS) are necessarily absent.

The PRESIDING OFFICER (Mr. GORTON). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 39, nays 48, as follows:

[Rollcall Vote No. 321 Leg.]

YEAS—39

Abdnor	Goldwater	Packwood
Andrews	Grassley	Quayle
Armstrong	Hatch	Roth
Baker	Hawkins	Rudman
Boren	Hayakawa	Schmitt
Byrd, Harry F., Jr.	Heinz	Simpson
	Helms	Stafford
D'Amato	Jepsen	Symms
Denton	Laxalt	Thurmond
Dole	Long	Tower
Domenici	Lugar	Wallop
Durenberger	Mattingly	Warner
East	Murkowski	
Garn	Nickles	

NAYS—48

Baucus	Gorton	Melcher
Bentsen	Hart	Metzenbaum
Biden	Hatfield	Mitchell
Boschwitz	Hollings	Moynihan
Bradley	Huddleston	Nunn
Bumpers	Humphrey	Pell
Burdick	Inouye	Percy
Byrd, Robert C.	Jackson	Proxmire
Chiles	Johnston	Pryor
Cochran	Kassebaum	Randolph
Cranston	Kasten	Riegle
Danforth	Kennedy	Sarbanes
Dixon	Leahy	Sasser
Eagleton	Levin	Specter
Ford	Mathias	Stennis
Glenn	McClure	Williams

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—2

Cannon, for.
Zorinsky, for.

NOT VOTING—11

Chafee	Exon	Stevens
Cohen	Heflin	Tsongas
DeConcini	Matsunaga	Weicker
Dodd	Pressler	

So Mr. HATCH's amendment (No. 556) was rejected.

Mr. MATHIAS. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. MOYNIHAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 496

(Purpose: To postpone the establishment of the Peace Corps as an independent agency until October 1, 1982)

The PRESIDING OFFICER. The Senator from Georgia.

Mr. MATTINGLY. Mr. President, I have an amendment which I send to the desk and ask for its immediate consideration. It postpones the establishment of the Peace Corps as an independent agency until October 1, 1982.

The PRESIDING OFFICER. The clerk will state the amendment.

The bill clerk read as follows:

The Senator from Georgia (Mr. MATTINGLY) proposes an unprinted amendment numbered 496.

Mr. MATHIAS. I ask unanimous consent that the further reading of the amendment be dispensed with, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 45, lines 12 and 13, strike out "the date of enactment of this Act" and insert in lieu thereof "October 1, 1982".

On page 45, line 18, strike out "are" and insert in lieu thereof "shall be".

On page 45, line 21, strike out "the day before the date of enactment of this Act" and insert in lieu thereof "September 30, 1982".

On page 46, line 5, strike out "before the date of the enactment of this Act are" and insert in lieu thereof "on September 30, 1982 shall be".

On page 47, lines 1 and 2, strike out "immediately before the date of enactment of this Act" and insert in lieu thereof "September 30, 1982".

On page 47, lines 3 and 4, strike out "the date of enactment of this Act" and insert in lieu thereof "October 1, 1982".

On page 47, line 14, strike out "the date of enactment of this Act" and insert in lieu thereof "October 1, 1982".

On page 49, between lines 1 and 2, insert the following:

(b) The amendments and repeals made by subsection (a) shall take effect on October 1, 1982.

On page 49, line 2, strike out "(b)" and insert in lieu thereof "(c)".

On page 49, lines 4 and 5, strike out "the date of the enactment of this Act" and insert in lieu thereof "October 1, 1982".

On page 49, lines 8 and 9, strike out "the thirtieth day after the date of enactment of this Act" and insert in lieu thereof "October 31, 1982".

On page 49, lines 20 and 21, strike out "the forty-fifth day after the date of the enactment of this Act" and insert in lieu thereof "November 15, 1982".

Mr. MATTINGLY. Mr. President, the Senate amendment just passed makes Peace Corps separation from ACTION effective immediately. My amendment will place the effective date of separation on October 1, 1982.

If we are going to separate Peace Corps from ACTION, I think we should proceed in an orderly, efficient, and responsible manner. Immediate separation would play havoc with the day to day operations of ACTION and the Peace Corps.

I can give one small example—the area of recruitment. Currently, recruitment is a shared service of ACTION and the Peace Corps. The Peace Corps recruits volunteers 6 to 9 months in advance. In other words, at the present time, the ACTION-Peace Corps Office of Communications and Recruitment (OCR) is recruiting Peace Corps volunteers for the summer 1982 period. To disrupt this recruitment process in midstream and create two new recruitment offices immediately—one for the Peace Corps and one for ACTION—would be chaotic. My amendment would allow for a reasonable transition period in which to effect separation.

The PRESIDING OFFICER (Mrs. HAWKINS). Who seeks recognition?

Mr. MATHIAS. Madam President, I appreciate the interest of the Senator in trying to work out the most economical means of operating Government in this regard.

The Committee on Foreign Relations is advised, however, that the cost of separation would be nothing like that which concerns him. The Peace Corps itself has prepared an analysis of the cost of separation, and that analysis—which, incidentally, was prepared before this became a political issue and therefore is likely to have been the most objective analysis one can get—indicated that the cost of separation would be no more than $1 million and that that might be offset in large measure by budgetary savings which would result from the separation.

OMB made an estimate after the issue had become politicized, after the administration had gone on record as opposed to autonomy, and that was that the joint services utilized by ACTION and the Peace Corps at the outset save no more than $3 million a year. In other words, that would be the cost of separation. The OMB analysis—which, incidentally, appears in the committee report—states that the $3 million figure should be viewed as an outside estimate for additional operating costs. I would think that those figures would be of some comfort.

Mr. MATTINGLY. The Government has never been known for a proper accounting. I should think it would be pleased to be placed on a fiscal year basis. That is the reason for putting it to October 1982, just for an orderly movement.

Mr. MATHIAS. No. 1, I do not view the Government's accounting system with the same sense of despair that the Senator seems to. But if we were talking about, let us say, terminating the existence of the Department of Education or terminating the existence of the Department of Energy, then we might need a period of time in which to make the separation. But here we are not really talking about an enormous reorganization of Government. We are talking here about severing a few shared services—specifically, the recruiting service and the computer service, which are used jointly by ACTION and the Peace Corps.

The purpose of this, of course, is to give the Peace Corps better management of its programs and a clearer identity in the world.

It may very well be that there will not only be savings that result which offset the additional costs of separation, but also, in my judgment, the Peace Corps will become a very much more valuable agency in which to project American thoughts, American ideals, and American policies in the world, and to project to the people of the world the concept that Americans are citizens of the world and are concerned about what is happening in all the countries in which the Peace Corps operates. That is really the bottom line.

Mr. RANDOLPH. Madam President, who has the floor?

The PRESIDING OFFICER. The Senator from Maryland has the floor.

Mr. MATHIAS. I yield to the Senator from West Virginia.

Mr. RANDOLPH. Madam President, the able Senator from Maryland (Mr. MATHIAS) has correctly assessed this situation.

I can understand that the amendment was offered by my able colleague from Georgia (Mr. MATTINGLY) in the best of intent to make the transition of Peace Corps autonomy in a period of time, which would be perhaps, more economical. But, really, that is not a problem in this situation. We feel with the figures available that the transfer will not be as costly as some believe.

I only wish to add, with respect to the autonomy of the Peace Corps, that the action taken today in returning it to its original operational plan is more important than most people who will read the action of the Senate will realize. What we have done is very practical in connection with the effectiveness of the Peace Corps.

As my colleagues know, I seldom vote for foreign aid, but I am a strong believer in the Peace Corps. I was a Member of Congress in 1961 when it came into being. I worked in those early weeks when we attempted to bring an understanding of why this sort of effort should come into being; where not only the hands but also the hearts of people could come together; where not only would we say that we were tolerant but also that we were understanding; not only would we say that we wanted to work with other people; but also that we were doing just that.

It was my privilege to work with the first Director of the Peace Corp, Sargent Shriver, and others, as the program began to grow. It was my privilege to address the first Peace Corps group that left the United States to go overseas.

I am proud of my association with the Peace Corps during its 20-year history. Through the Peace Corps we are hopefully building a better world.

So this action today, the favorite vote for the autonomy of the agency is indicative of the best judgment of the Senate and, it is hoped, the approval of the American people.

I hope the effort does not prevail to postpone to a year hence the change over to the autonomy of the Peace Corps. The Peace Corps conceived as it was with the best of desires and carried on with a minimum of mistakes, is a monument to what I call the very best in America.

Mr. MATHIAS. I thank the Senator from West Virginia.

Mr. CRANSTON. Madam President, will the Senator yield?

Mr. MATTINGLY. Madam President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MATHIAS. I yield to the Senator from California.

Mr. CRANSTON. Madam President, I should like to have the attention of the Senator from Georgia for a moment with respect to the cost factor. Various figures have been bandied about with which I would like to deal.

Earlier I made reference to an internal Peace Corps budget analysis, which was also cited by the chairman of the committee in debate on the Hatch amendment. That Peace Corps analysis estimates that after separation, the Peace Corps will actually save $1 million per year. This analysis is a detailed program-by-program analysis.

This internal Peace Corps budget workup estimates a one-time cost for separation of $920,000. However, this one-time cost is more than made up for by the subsequent yearly savings of $1 million. So, the longer we delay, the longer it will take to get to the $1 million saving.

According to this Peace Corps estimate, the budgetary savings will be a result of two factors. First, the analysis states that several functions performed by the ACTION Agency as a part of the joint support services are duplicated in the existing Peace Corps functions. Therefore, according to the Peace Corps budget projection, little or no additional costs would be incurred by the Peace Corps as a result of autonomy.

Second, the remaining functions to be transferred will be exclusively tailored to meet Peace Corps needs rather than having to meet the needs of two agencies.

According to this analysis, that will result not only in reduced cost but also more effective services, not because the ACTION Agency provides the services inefficiently or badly but simply because the Peace Corps will be designing the functions to serve itself.

This analysis is very significant. Whatever one-time cost arises out of separation will be more than compensated for by the annual savings to the Peace Corps once it has control of its entire budget and expenditures.

Let me also say, in closing, that we have delayed too long already. We have waited too long for this separation voted for overwhelmingly by both authorizing committees over 5 months ago and by the full Senate in June. The situation right now is critical. A year's delay would be devastating to the activities of the Peace Corps and to its effectiveness.

This week alone the ACTION Agency unilaterally laid off 70 Peace Corps recruiters. As Senator PERCY has noted, this reduction is taken at the height of the recruiting season, a devastating blow to the work of the Peace Corps. We cannot let this demoralizing, very negative situation continue.

There may not be much remaining of the Peace Corps if we continue to wait.

Mr. MATTINGLY. Mr. President, will the Senator yield for a question?

Mr. CRANSTON. I yield.

Mr. MATTINGLY. Madam President, does the Senator wish to have the amendment revised to where it would be of no cost, separate the cost from it, but we write into the amendment that we guarantee no cost?

Mr. CRANSTON. The amendment is already serving that purpose. There is no ultimate cost. It is a net saving.

Mr. MATTINGLY. We could write in on page 48 between lines 2 and 3 and make the comment that prohibits use of funds to separate the Peace Corps. None of the funds authorized to be appropriated by this act or by any other provision of the law shall be made available for the purpose of separation of the Peace Corps from ACTION, and then one other small technical thing and then we could modify it also to agree with the distinguished Senator from Maryland and change that date to March 31, 1982, at no cost.

Mr. CRANSTON. That would serve no constructive purpose. The delay proposed by the pending amendment will cost money rather than save it. Separation will save money. There will be $920,000—we recognize that—start-up cost, the one-time cost of separation; but thereafter we will save $1 million a year according to the detailed Peace Corps analysis I have entered into the RECORD.

So, the longer we wait, the more we are wasting the taxpayers' money.

Mr. MATTINGLY. I withdraw the modification then.

Mr. MATHIAS. Mr. President, if there be no other Member of the Senate who wishes to speak on this subject, I move to table the amendment.

The PRESIDING OFFICER (Mr. MATTINGLY). The question is on agreeing to the motion to lay on the table the amendment of the Senator from Georgia.

(Putting the question.)

Mr. MATHIAS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. MOYNIHAN. Mr. President, I move to lay that motion on the table.

The PRESIDING OFFICER. The Chair has not announced its decision.

Mr. CRANSTON. Will the Chair please announce the vote?

Will the Presiding Officer please announce the vote? Regular order.

Mr. HATCH. Mr. President, I ask for the yeas and nays on the motion.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Maryland to lay on the table the amendment of the Senator from Georgia.

On this motion, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BOREN (when his name was called). Mr. President, on this vote I have a pair with the Senator from Connecticut (Mr. DODD), who is not able to be present today. If he were present and voting, he would vote "aye." If I were at liberty to vote, I would vote "nay." Therefore, I withhold my vote.

Mr. PACKWOOD (after having voted in the negative). Mr. President, on this vote I have a pair with the Senator from Massachusetts (Mr. TSONGAS). If he were present and voting, he would vote "aye." If I were at liberty to vote, I would vote "nay." I withdraw my vote.

Mr. BAKER. I announce that the Senator from Rhode Island (Mr. CHAFEE), the Senator from Arizona (Mr. GOLDWATER), the Senator from Idaho (Mr. MCCLURE), the Senator from South Dakota (Mr. PRESSLER), the Senator from Alaska (Mr. STEVENS), the Senator from Idaho (Mr. SYMMS), the Senator from Texas (Mr. TOWER), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Arizona (Mr. DECONCINI), the Senator from Connecticut (Mr. DODD), and the Senator from Massachusetts (Mr. TSONGAS) are necessarily absent.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON) would vote "yea."

The PRESIDING OFFICER (Mrs. HAWKINS). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 49, nays 37, as follows:

[Rollcall Vote No. 322 Leg.]

YEAS—49

Andrews	Glenn	Metzenbaum
Baucus	Gorton	Mitchell
Bentsen	Hart	Moynihan
Biden	Hatfield	Pell
Boschwitz	Hollings	Percy
Bradley	Huddleston	Proxmire
Bumpers	Inouye	Pryor
Burdick	Jackson	Randolph
Byrd, Robert C.	Johnston	Riegle
Chiles	Kassebaum	Sarbanes
Cochran	Kasten	Sasser
Cranston	Kennedy	Specter
Danforth	Leahy	Stafford
Dixon	Levin	Williams
Eagleton	Mathias	Zorinsky
Exon	Matsunaga	
Ford	Melcher	

NAYS—37

Abdnor	Grassley	Murkowski
Armstrong	Hatch	Nickles
Baker	Hawkins	Nunn
Byrd, Harry F., Jr.	Hayakawa	Quayle
	Heflin	Roth
Cohen	Heinz	Rudman
D'Amato	Helms	Schmitt
Denton	Humphrey	Simpson
Dole	Jepsen	Stennis
Domenici	Laxalt	Thurmond
Durenberger	Long	Wallop
East	Lugar	Warner
Garn	Mattingly	

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—2

Boren, against.
Packwood, against.

NOT VOTING—12

Cannon	Goldwater	Symms
Chafee	McClure	Tower
DeConcini	Pressler	Tsongas
Dodd	Stevens	Weicker

So the motion to lay on the table was agreed to.

Mr. KASTEN. I move to reconsider the vote by which the motion was agreed to.

Mr. MOYNIHAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MOYNIHAN addressed the Chair.

The PRESIDING OFFICER. The Senator from New York.

UP AMENDMENT NO. 497

(Purpose: To prohibit the transfer of economic and military assistance to countries represented at the meeting of Foreign Ministers and Heads of Delegations of Non-Aligned Countries which fail to dissociate themselves from the Communique of September 28, 1981)

Mr. MOYNIHAN. Madam President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from New York (Mr. MOYNIHAN), for himself, Mr. BRADLEY, and Mr. CHILES, proposes an unprinted amendment numbered 497.

Mr. MOYNIHAN. Madam President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 84, between lines 2 and 3, insert the following:

NONALINED COUNTRIES

Section 716(a). None of the funds authorized to be appropriated by the Foreign Assistance Act of 1961, as amended, may be furnished, and no sales may be made, no credits extended, and no loans guaranteed under the Arms Export Control Act, with respect to any country represented at the Meeting in New York, on September 25 and 28, 1981, of the Ministers of Foreign Affairs and Heads of Delegations of the Non-Alined Countries to the 36th General Session of the General Assembly of the United Nations which does not dissociate itself from the statements concerning the United States of America contained in the Communique issued from that meeting.

(b) With respect to the nations concerned, the Secretary of State shall determine whether this condition has been met, and from time to time will report his determination to the Congress.

(c) This section shall not apply to any assistance to other countries authorized by the Agricultural Trade Development and Assistance Act of 1954, as amended, or to medical supplies, disaster relief, or other humanitarian assistance, as the Secretary of State may determine.

(d) The President may waive the prohibition contained in this section if he determines, and so reports to the Congress, that furnishing such assistance would further the foreign policy interests of the United States.

(Mr. MATTINGLY assumed the chair).

Mr. MOYNIHAN. Mr. President, the subject which I raise now is one to which I have addressed each of the Members of the Senate in a letter.

It concerns the courageous and deeply responsible act of this Nation's Permanent Representative at the United Nations, Jeane J. Kirkpatrick.

On October 6, Ambassador Kirkpatrick wrote to representatives of 40 nonalined countries who had been associated with a communique, issued at the conclusion of a meeting of Foreign Minister and U.N. ambassadors of the Movement of Non-Aligned Countries.

She quite rightly described this document as consisting of "base lies and malicious attacks upon the good name of the United States." She said the communique was replied with "vicious lies" and asked these other ambassadors whether they really did subscribe to these views and, indeed, asked if they would dissociate themselves from them.

It is in order to support the Ambassador, for the communique was every bit as hostile toward the United States as Mrs. Kirkpatrick indicated, that I have submitted this amendment.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

UP AMENDMENT NO. 498

(Purpose: To discourage the transfer of economic and military assistance to countries represented at the meeting of Foreign Ministers and Heads of Delegations of Non-Aligned Countries which fail to dissociate themselves from the Communique of September 28, 1981)

Mr. MOYNIHAN. Mr. President, in order that the action which we take today in support of our Ambassador at the United Nations, should be as nearly as possible to unanimous, I have lately discussed this matter with the ever generous and always open-minded chairman of the Committee on Foreign Relations.

The distinguished Senator from Illinois has told us that he would have felt compelled to oppose the particular form of the amendment I had intended to offer at this point. That amendment would have established a prohibition on the transfer of economic or military assistance to any nonalined country which failed to dissociate itself from the September communique.

The chairman is, however, prepared to accept a variation which accomplishes as well the purpose I had in mind. My purpose is to provide an opportunity for this body to express its firmest support for the action of Ambassador Kirkpatrick. This is also an occasion for the Senate to say to the world that there are things which a nation says about the United States at some risk to the bilateral relationship. I mean that it should be made clear that it is not possible any longer for officials of other governments to say anything at all about this country and assume there will be no consequence of any kind.

With that in mind, and with an expression of my gratitude to the chairman and his colleagues on the Foreign Relations Committee for their contributions, I send to the desk a substitute for the amendment now pending and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. ABDNOR). The clerk will report.

The bill clerk read as follows:

The Senator from New York (Mr. MOYNIHAN), for himself, Mr. BRADLEY, and Mr. CHILES, proposes an unprinted amendment numbered 498 to unprinted amendment numbered 497.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 84, between lines 2 and 3, insert the following:

In lieu of the pending amendment, substitute the following:

NONALINED COUNTRIES

SEC. 716. (a) In considering whether to provide assistance, make sales, extend credits, or guarantee loans under the provisions of the Foreign Assistance Act of 1961, as amended, or the Arms Export Control Act, to any country represented at the Meeting of the Ministers of Foreign Affairs and Heads of Delegations of the Non-Aligned Countries to the 36th Session of the General Assembly of the United Nations on September 25 and 28, 1981, the President shall take into account whether such country has dissociated itself from the Communique issued following the meeting.

(b) Within 30 days of enactment of this section, the President shall send a report to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate setting forth the countries which have dissociated themselves from the Communique together with a full description of the method of dissociation and the forum in which the dissociation has been made. The President shall transmit with the report a copy of each statement of dissociation.

(c) Within 30 days after the receipt of a statement of dissociation from any country the President shall transmit a copy of the statement of dissociation together with a full description of the method of dissociation and the forum in which the dissociation is made to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate.

(d) On page 84, line 4, strike out "Sec. 716." and write in lieu thereof "Sec. 717."

Mr. MOYNIHAN. Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MOYNIHAN. I thank the Chair.

Mr. President, I will be brief in this matter. There are others who will undoubtedly wish to speak. Senators BRADLEY and CHILES join in cosponsoring my original amendment and, if possible, will surely want to be heard.

It is sufficient to lay out the purpose of this action. In order to do that, a moment of background is necessary.

As is their practice, the Ministers of Foreign Affairs and the heads of U.N. delegations of the 97 nonalined nations, as they call themselves, convened at the time of the opening of the current session of the General Assembly. They met this year in New York, on the 25th and 28th of September, under the chairmanship of the Cuban foreign minister. There was subsequently issued from that meeting a communique of unparalleled viciousness toward the purposes, the character, the credibility, and the good name of the United States of America.

It was not a break with the past, I am sorry to say. It was in many ways simply an extension of what has been going on for a very long time, as the totalitarian states, together with other unfree coun-

tries, have come to dominate the United Nations. As they have become more numerous than the countries which have elected governments, they have increasingly turned the institutions of the U.N. against the very democracies which created the U.N. They have with even greater frequency, and viciousness, used the forums of the U.N. to attack and discredit the Western societies and most especially the United States.

Too long we have been reluctant to say to these countries that there are limits to what can be said about our country without any consequences in the relations between ourselves and them.

In that mood, and with a marvelous sense of appropriateness, Ambassador Kirkpatrick wrote on October 6, to some 40 nations that had associated themselves with the September Communique, the most recent, and perhaps the most vituperative, slander of the United States at the United Nations.

There were 40 with which we had assumed our relationship to be relatively good. I do not mean necessarily that our relations had been friendly, but that they were not hostile. She said she was stunned. I read from her letter:

Quite frankly, I was startled to find your government associated with the Communique . . . I am startled that you or your government would or could associate yourselves with a document composed of such base lies and malicious attacks upon the good name of the United States.

I would also note that she said:

I can assure you, Your Excellency, that I would never allow the United States to be associated with any document from any group—no matter how large or diverse—that contained such vicious and erroneous language against your country.

Ambassador Kirkpatrick then asked could she not hear from the nation to whom she addressed her letter whether it wished to disassociate itself from that communique. To read one last time from her letter, she said:

Convinced that this communique does not represent your views, I would very much appreciate hearing from you about it.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point the communique of the nonalined, the October 6 letter from our distinguished Ambassador, of whom we are all so proud, Ambassador Kirkpatrick, and a list of the names of the countries and ambassadors to whom the letter was sent.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ANNEX

(Meeting of the Ministers of Foreign Affairs and Heads of Delegations of the Non-Aligned Countries to the 36th Session of the General Assembly of the United Nations 25 and 28 September 1981)

COMMUNIQUE

I

1. The Ministers of Foreign Affairs and Heads of Delegation of the Non-Aligned Countries to the 36th Session of the United Nations General Assembly held their meeting at the Headquarters of the Organization on 25 and 28 September 1981, with a view to considering their actions in connection with the items to be considered during the current session which are of special concern to the non-aligned countries.

2. The Meeting welcomed the independence of Belize, greeted its entry into the United Nations and admitted it as a full member of the Movement of Non-Aligned Countries. The Meeting also considered and approved the admission of Ecuador as a full member of the Movement. The steady growth in the number of non-aligned countries is a testimony to the growing relevance and importance of the policy of non-alignment and the Movement of Non-Aligned Countries.

3. The Meeting took note of the Chairman's Report on the activities of the non-aligned countries since the Ministerial Conference held in New Delhi, and urged all non-aligned countries to continue their efforts towards the fulfillment of the decisions taken by the VI Summit Conference as well as those of the above-mentioned Ministerial Conference and the Extraordinary Ministerial Meeting of the Coordinating Bureau on Namibia held in Algeria.

4. The Meeting expressed satisfaction that the Eighth Emergency Special Session of the United Nations General Assembly called upon all States, in view of the threat to international peace and security posed by the apartheid regime of South Africa, to impose against that country the comprehensive mandatory sanctions in accordance with the provisions of the Charter and to cease all dealings with the apartheid regime of South Africa in order to totally isolate that country. The Ministers and Heads of Delegations committed themselves fully to the implementation of the resolution adopted by the Eighth Emergency Special Session of the General Assembly.

5. The Meeting took note of the report by the Foreign Ministers of Cuba, India and Zambia and the Head of the Political Department of the Palestine Liberation Organization to bring about a peaceful solution to the conflict between Iran and Iraq. The Meeting commended these endeavors and requested them to continue their important efforts in accordance with the mandate given to them by the Conference of Ministers of Foreign Affairs of Non-Aligned Countries, held in New Delhi.

The Ministers of Foreign Affairs and Heads of Delegations took note with great satisfaction of the decision unanimously adopted by the 18th Summit Conference of the Heads of State and Government of the Organization of African Unity regarding the candidature of H. E. Mr. Salim Ahmed Salim, Minister of Foreign Affairs of the United Republic of Tanzania to the post of Secretary-General of the United Nations and decided to fully support this candidature.

II

6. The Ministers and Heads of Delegations noted with great concern that the 36th Session of the General Assembly of the United Nations is being held in an atmosphere of continuing deterioration of international peace and security. As assessed by the VI Conference of Heads of State or Government of Non-Aligned Countries held in Havana in September 1979 and reiterated by the Ministerial Conference of Non-Aligned Countries held in New Delhi in February 1981, the crisis in the process of détente, the policy of bloc rivalry and spheres of influence, manifested in the senseless and very dangerous escalation of the arms race, particularly in its nuclear aspect, and the total suspension of meaningful negotiations on the halting and reversal of the arms race and the obsession to negotiate from positions of strength, the use or threat of use of force, aggression, military intervention, foreign occupation, involving the introduction and presence of foreign troops, mercenaries or irregulars under any pretext whatsoever against the sovereignty, independence and territorial integrity of States, and interference in their internal affairs, and in the obstruction of the struggle of the peoples under colonial or alien domination for self-determination and national independence; the continued existence and aggravation of focal points of tension and aggression, particularly in the Middle East, Southern Africa, South-West Asia, South-East Asia, North-East Asia, the Caribbean and Central America, have brought the world closer to the brink of a worldwide conflict. Such a policy is leading to the resurgence of the cold war to new and alarming proportions thus increasing the danger of war and the total annihilation of mankind.

The Ministers and Heads of Delegation reiterated their concern over the acceleration of the arms race, particularly in the nuclear armaments race, the stockpiling of all kinds of weapons of mass destruction, the development of newer and more destructive and lethal weapons systems such as the neutron bomb, as well as attempts to promote new and dangerous concepts of "limited nuclear war" aimed at blurring the distinction between nuclear and conventional warfare. They emphasized the special role and responsibility of the Great Powers in halting and reversing the arms race, in particular the nuclear arms race, and called upon them to immediately and resolutely start with the serious negotiations aiming at the elimination of the threat of a global nuclear war and the implementation of disarmament measures with a view to achieving general and complete disarmament. In this connection, the Ministers and Heads of Delegation urged all member States to exert their maximum efforts for the success of the Second Special Session of the General Assembly of the United Nations devoted to disarmament, to be held in 1982.

The Ministers and Heads of Delegation recalled the very important appeal made at their Conference in New Delhi, in which they called upon all nations and peoples and their leaders to earnestly work for the avoidance of war and the consolidation of international peace and security through the implementation of the principle of active peaceful coexistence in relations among all States, the avoidance of measures leading to confrontation, the elimination of foreign intervention and interference in the internal affairs of States; for strict adherence to the principles of the non-use or threat of use of force; for non-acquisition of territories by force; for the peaceful settlement of disputes; for the halting and reversal of the arms race, particularly the nuclear arms race; for the exercise of the right to self-determination and independence of peoples under colonial, alien and racist domination as well as under foreign occupation; for full respect for the sovereignty and national independence of all countries; for consistent adherence to the objectives, principles and provisions of the Charter of the United Nations, and for urgent practical measures aimed at the establishment of a New International Economic Order. The Ministers and Heads of Delegations urged the Great Powers to work for a relaxation of international tensions. They stated that the process of detente should be universal in scope and in geographic application. They stressed that security for all States must be ensured and that all States, particularly non-aligned countries, must actively participate on an equal footing in the peace-preserving process.

The Meeting recalled the conclusion of the Ministerial Conference held in New Delhi to encourage efforts for the general reduction of tensions and to oppose foreign interference and intervention from whatever quarter in Africa, Asia, Latin America and Europe. To that end, the Meeting decided to intensify efforts by the non-aligned countries for the early adoption by the General Assembly of the United Nations of the Declaration of Inadmissibility of Intervention and Interference in Internal Affairs of States.

The Ministers and Heads of Delegations recalled that the holding of the meeting of the Security Council, in accordance with the decision of the Extraordinary Ministerial Meeting of the Coordinating Bureau of the Movement of Non-Aligned Countries in Algiers was intended to impel and promote the just cause of the people of Namibia.

The Ministers and Heads of Delegation noted with regret and concern that the Security Council had fallen short of its fundamental responsibility for the maintenance of international peace and security when the Resolutions proposing comprehensive and mandatory sanctions against South Africa under Chapter 7 of the Charter of the United Nations met with the veto of the three Western Permanent Members of the Council, on 30 April 1981.

They reaffirmed that Namibia is the legal responsibility of the United Nations until it reaches true self-determination and national independence, in accordance with Resolution 435 (1978) of the Security Council and with the relevant Resolutions of the United Nations General Assembly, inter alia, Resolution 2145 (XXI) of 27 October 1966 and 2248 (S–V) of 19 May 1977.

They firmly rejected certain maneuvers aimed at undermining the international consensus as expressed in Resolution 435 (1978) of the Security Council and to despoil the oppressed people of Namibia of its hard-won victories in its national liberation struggle.

The Ministers and Heads of Delegation expressed their grave concern about the threat to international peace and security posed by racist South Africa's continued illegal occupation of Namibia, its repeated wanton and unprovoked acts of aggression against neighboring States, its reprehensible policy of apartheid, and its acquisition in collaboration with certain western countries of nuclear weapons.

The Meeting expressed its deep concern over the rapidly deteriorating situation in South Africa itself as characterized by the stepped-up brutal oppression, militarization of the entire country, as well as the murder of ANC leaders and activists. In reaffirming the nonaligned position that there would be no peace, stability and security in southern Africa until the apartheid system is destroyed and replaced by a democratic society, the Meeting renewed its unswerving support for the national liberation movements recognized by the Organization of African Unity. The Meeting commended the National Liberation Movements of South Africa, particularly the African National Congress, for the intensified mass political mobilization and armed action against strategic installations. It also commended the people of New Zealand and the United States of America for their resolute opposition to the Springboks rugby tour to these two countries undertaken in violation of the United Nations position calling for the severance or sports ties with South Africa. The Meeting called for the strengthening of the world campaign for the unconditional release of Nelson Mandela and all political prisoners, for the securing of Prisoner-of-War status to all captured freedom fighters, and for the comprehensive and mandatory sanctions against the apartheid regime of South Africa.

They further forcefully condemned the fact that the apartheid regime of South Africa has persistently refused to comply with the decisions and Resolutions of the United Nations providing for Namibia's transition to independence. In this regard, they deplored the recent vetos in the Security Council by three Western Permanent Members of the Council of proposals for the imposition on racist South Africa of comprehensive and mandatory sanctions under Chapter VII of the United Nations Charter.

The Ministers and Heads of Delegation reaffirmed that Security Council Resolution 435 (1978) endorsing the United Nations Plan for the Independence of Namibia is the only basis for a negotiated settlement of the Question of Namibia and demanded the immediate commencement of the unconditional implementation of that resolution without prevarication, qualification or modification and not later than 31 December 1981.

The Meeting reaffirmed its support for the South West Africa People's Organization as the sole and authentic representative of the Namibian people and called upon member States to render increased and sustained support, and material, financial military and other assistance to the South West Africa People's Organization to enable it to intensify its struggle for the liberation of Namibia.

The Meeting further expressed its satisfaction that, pursuant to the VI Summit Conference decision, a Non-Aligned Solidarity Fund for Namibia has been established. The Ministers and Heads of Delegation decided that a Pledging Conference for the Fund should be held in New York in November 1981, and they called upon all members, observers and guests of the Movement of Non-Aligned Countries to contribute generously to the Fund.

The Meeting strongly condemned the apartheid regime of South Africa for using its armed forces, mercenaries and its puppets for its massive aggression against Angola. It deplored the action of the United States in preventing the Security Council, by the exercise of the veto, from discharging its responsibilities in the face of unprovoked aggression by South Africa against Angola. This action has encouraged the racist authorities of Pretoria into new acts of military aggression and adventures. The Meeting demanded that the apartheid regime of South Africa pay reparations to the Government of Angola for the damage inflicted resulting from that aggression. The Meeting called upon member States to extend all support and assistance, including military assistance, to the Front Line States in order to assist them in defending their sovereignty and territorial integrity.

The Ministers and Heads of Delegation noted with satisfaction the decisions adopted by the Eighth Conference of Heads of State and Government of the Organization of African Unity and its committee of implementation, regarding the organization of a general and free referendum of self-determination in the territory of Western Sahara.

The Ministers and Heads of Delegation were convinced that the immediate implementation of these decisions would ensure the full exercise by the people of Western Sahara of their inalienable right of self-determination in accordance with the United Nations General Assembly Resolution 1514 (XV), the principles of the Movement of Non-Aligned Countries and the United Nations Charter and would also fulfill the aspirations of the peoples of the region for peace, stability and cooperation.

IV

The Ministers and Heads of Delegations recalled the declaration of the VI Summit Conference in Havana in September 1979 and the Ministerial Conference that was held in February 1981 in New Delhi and reaffirmed that the Question of Palestine is at the core of the problem of the Middle East, and that any solution to this conflict demands, on the one hand, the exercise by the Palestinian people of their inalienable rights, including the right of return, the right to self-determination, and the right to establish their sovereign and independent State in Palestine and, on the other hand, the complete and unconditional withdrawal by Israel from all Palestinian and Arab territories occupied since 1967, including Jerusalem.

The Meeting called upon all States to assist and facilitate actions and movements by the Palestinian people, under the leadership of the Palestine Liberation Organization, to pursue its efforts and legitimate struggle to achieve its inalienable rights, including the right of return, right of self-determination and right to establish its own independent sovereign State in Palestine, in the context of a comprehensive and just settlement that would ensure peace and stability in the region.

The Meeting condemned all initiatives to impose those provisions of the Camp David Accords purporting to determine the future of the Palestinian people and Palestinian territories occupied by Israel in spite of the fact that the United Nations General Assembly resolution declared that those provisions had no validity. They also condemned any partial or separate solution and any agreement that would harm the rights of the Arab countries and the Palestinian people; violate the principles and resolutions of the Movement of Non-Aligned Countries and the United Nations General Assembly or prevent the liberation of Jerusalem and the occupied Palestinian and Arab territories and the attainment and full exercise by the Palestinian people of their inalienable national rights.

The Ministers and Heads of Delegation condemned Israeli policies of aggression and expansionism intensified recently against the Palestinian people, in particular in the territories occupied since 1967, the expropriation of land, the establishment of settlements and the usurpation of water and other natural resources which are considered essential for the livelihood of the Palestinian people.

They recalled Security Council Resolutions 465 (1980) and 478 (1980) and condemned the promulgation of the "fundamental law on Jerusalem" as well as all other measures tending to alter the demographic composition, the geographic character and the institutional structure of the occupied Arab territories.

The Ministers and Heads of Delegation strongly condemned Israeli measures aiming at the Judaization of the Holy City of Jerusalem including the ongoing excavations under and around the Moslem holy places of worship.

Furthermore, they expressed their most profound concern over the continuing deep diggings and excavations beneath the Al-Agsa Mosque and the Dome of the Rock within the Haram al-Shareef holy sanctuary in Jerusalem which threaten the collapse of these millenia-old structures. They endorsed the UNESCO resolution of 11 September 1981 to place East Jerusalem on UNESCO's World Heritage Committee list, in order to safeguard the cultural and historical sites in the City.

The Ministers and Heads of Delegation denounced the project for the digging of a canal joining the Mediterranean and Dead Seas and declared that its opening would constitute an act of aggression that would threaten international peace and security. They called on all countries not to provide Israel with human or moral support, or political and economic assistance, including the necessary equipment for the construction of this canal.

The Meeting condemned Israeli policies and practices aimed at imposing the Israeli nationality on Syrian citizens under Israeli occupation in the Golan Heights.

The Ministers and Heads of Delegation recalled Resolution ES–7/2, adopted by the General Assembly at its Emergency Special Session (July 1980) and noted with grave concern that since that date the recommendations of the General Assembly and of the Committee on the Exercise of the Inalienable Rights of the Palestinian People have not yet been implemented. They invited the Security Council to consider the situation and adopt measures without further delay

with a view to enabling the Palestinian people to exercise their inalienable rights. They condemned the hostile position of the Government of the United States of America toward the inalienable national rights of the Palestinian people and its sole legitimate representative, the Palestine Liberation Organization.

The Ministers and Heads of Delegation decided that an extraordinary meeting of the Coordinating Bureau at the Ministerial level should be held at the appropriate time to undertake an evaluation of the situation and take practical measures to strengthen comprehensive assistance to the struggle of the Palestinian people and to attain and freely exercise its inalienable rights under the leadership of the Palestine Liberation Organization.

The Ministers and Heads of Delegation expressed grave concern at the continued escalation of the barbaric attacks by Israel on southern Lebanon and Palestinian refugee camps in Lebanon. They recalled that the Sixth Summit Conference considered that aggression, carried out by land, sea and air, as tantamount to genocide of the Lebanese people and the Palestinian refugees, with Israel using the most sophisticated weapons supplied by the United States of America.

The Ministers and Heads of Delegation noted with concern that the Government of the United States is currently engaged in the conclusion of a "strategic alliance" in the Middle East instead of participating in the endeavors to achieve a comprehensive and just solution based on Israel's total and unconditional withdrawal from all the occupied Palestinian and Arab territories and the restoration of the inalienable rights of the Palestinian people. They declared their grave concern over the development of the "strategic cooperation" between the Governments of the United States of America and Israel, which confirms the role of the latter as a true bridgehead of imperialism, as an element threatening the stability of the countries in the Middle East region as well as international peace and security.

The Ministers and Heads of Delegations strongly condemned the naked Israeli aggression on the Iraqi nuclear installations devoted exclusively to peaceful purposes as an act of state terrorism and a blatant violation of the sovereignty of a non-aligned country. The Meeting reaffirmed the inalienable right of non-aligned countries to develop nuclear energy for peaceful purposes in conformity with their priorities, interests and needs. The Ministers and Heads of Delegation reaffirmed the General Assembly resolutions concerning Israeli nuclear armaments, the Security Council Resolution 487 of 18 June 1981, and demanded that Israel comply with said Resolutions. In particular, the Meeting called upon the Security Council to take effective measures against Israel in accordance with Chapter VII of the United Nations Charter, and they pledged themselves to work at the 36th Session of the General Assembly to adopt decisions that will prevent Israel from committing further acts of aggression and force it to comply with the norms of international law, the principles of the Charter and the provisions of the relevant resolutions of the United Nations.

The Non-Aligned Countries called upon all States, and especially the United States of America, to refrain from giving Israel any human, military, political or economic assistance that might encourage it to pursue its aggressive policies against the Arab countries and the Palestinian people.

The Ministers and Heads of Delegation reiterated their support for Lebanon's sovereignty, territorial integrity, unity and political independence, and called for the full implementation of Security Council Resolution 425 (1981). They condemned continued Israeli aggression and acts of violence against Lebanon and interference in Lebanon's national affairs. They condemned, in particular, the recent Israeli raids on South Lebanon and Beirut, which caused heavy casualties among the Lebanese civilian population and extensive damage to property. In that context, they recalled Security Council Resolution 490 (1981), which reads as follows:

"The Security Council,

"Reaffirming the urgent appeal made by the President and the members of the Security Council on 17 July 1981 (S/14599) which reads as follows:

" 'The President of the Security Council and the members of the Council, after hearing the report of the Secretary-General, express their deep concern at the extent of the loss of life and the scale of the destruction caused by the deplorable events that have been taking place for several days in Lebanon.

" 'They launch an urgent appeal for an immediate end to all armed attacks and for the greatest restraint so that peace and quiet may be established in Lebanon and a just and lasting peace in the Middle East as a whole.'

"Taking note of the report of the Secretary-General in this respect,

"1. Calls for an immediate cessation of all armed attacks;

"2. Reaffirms its commitment to the sovereignty, territorial integrity and independence of Lebanon, within its internationally recognized boundaries;

"3. Requests the Secretary-General to report back to the Council on the implementation of this resolution as soon as possible and not later than 48 hours from its adoption."

and supported its contents. They called further for the restoration of Lebanese Government authority over all its territory within its internationally recognized borders. They welcomed the decisions of the Arab Summit Conferences to solve the Lebanese crisis.

The Ministers and Heads of Delegation endorsed the Report of the Mission of the tries that visited Lebanon in August 1981 Coordinating Bureau of Non-Aligned Coun- at the request of Yasser Arafat, Chairman of the Executive Committee of the Palestine Liberation Organization.

VI

The Meeting considered the situation in Cyprus and reaffirmed its support for the independence, sovereignty, territorial integrity, unity and non-alignment of the Republic of Cyprus and reiterated its solidarity with the Government and people of Cyprus. The Ministers and Heads of Delegation expressed the hope that the intercommunal talks currently held under the auspices of the Secretary-General will be conducted in a more substantive, constructive and result-oriented manner in order to bring about, without further delay, a just solution of the problem in accordance with the relevant United Nations resolutions, the Non-Aligned decisions and Declarations, and the High Level Agreements. The Ministers and Heads of Delegation requested the Contact Group of the non-aligned countries to have the situation under constant review and take action as appropriate.

The Meeting expressed deep concern over the dangerous and increasing concentration of weapons in Europe and other parts of the world and a heightened tension in the continent that deepens block confrontation and threatens the peace and security of European States. It commended positive cooperation among the non-aligned and neutral States at the Conference on Security and Cooperation in Europe and called upon all participating States to cooperate in the efforts to implement the Helsinki Final Act in all its parts, including that on the Mediterranean. It supported the request of the non-participating Mediterranean States and other interested parties to participate fully in deliberations of the Conference on Security and Cooperation in Europe on all matters concerning the situation in the Mediterranean with the view to eliminating hotbeds of crisis and areas of tension in the region and convert it into a zone of peace and cooperation.

The Ministers and Heads of Delegations expressed deep concern over the aggression by the United States of America against the Libyan Arab Jamahiriya on 19 August 1981. They considered that that aggression constitutes a threat as well as flagrant violence against the sovereignty, independence and territorial integrity of non-aligned countries in the region, which advocate the creation of a zone of peace and cooperation in the Mediterranean, and a threat to international peace and security.

VII

The Ministers and Heads of Delegation recalled that the New Delhi Conference of Ministers of Foreign Affairs of Non-Aligned Countries in February 1981 had expressed grave concern over the growing buildup of Great Power military presence in the Indian Ocean area and that despite the expressed wishes of the Littoral and Hinterland States of the Indian Ocean, military activity in all forms and manifestations of the Great Powers in the Indian Ocean areas had intensified and that there had been a marked deterioration in the climate of peace and security in the area. The Meeting, seriously concerned at the dangerous tension caused by the expansion of the existing foreign bases, military installations, logistical supply facilities, the disposition of nuclear weapons and weapons of mass destruction, as well as the search for new base facilities in the Indian Ocean area, recalled that the Ministers in New Delhi had warned of the dangers of any actions that would provide pretexts for the intervention or the presence of the Great Powers in the area. In this connection, it also noted with regret that the Ad Hoc Committee on the Indian Ocean had been prevented by some Great Powers and major maritime users from finalizing a date for the convening of the Conference on the Indian Ocean scheduled to be held in Sri Lanka to achieve the objectives of the Declaration of the Indian Ocean as a Zone of Peace. The failure of the Committee to take a decision on the date of the Conference had frustrated the desire of all Non-Aligned Littoral and Hinterland States of the Indian Ocean who, supported by all other Non-Aligned Countries, have been working persistently for nearly ten years in pursuit of their goal of realizing the objectives contained in the non-aligned initiatives for the declaration of the Indian Ocean as a Zone of Peace, first adopted by the General Assembly in 1971.

The Ministers and Heads of Delegations reaffirmed their determination to work for the convening not later than the first half of 1983, of the Conference on the Indian Ocean in Sri Lanka and reiterated their hope and expectation that all the Great Powers and other major maritime users would participate in this Conference in a constructive spirit while at the same time initiating the process of reducing their military presence in the Indian Ocean area.

In this context, the Ministers and Heads of Delegation also welcomed, as in the New Delhi Conference, the initiative of the President of the Democratic Republic of Madagascar to convene a summit conference on the Indian Ocean, to be held in Tananarive.

VIII

The Ministers and Heads of Delegation were gravely concerned over the continuing tensions and conflicts in the South East Asian region that have affected State members of the Movement of Non-Aligned Coun-

tries and expressed that the tension in and around Kampuchea should not escalate over a wider area and that efforts should be directed towards a comprehensive peaceful political solution based on the principles of non-interference in the affairs of sovereign States and on the inadmissibility of the use of force against sovereign States. Such a political solution, as expressed in the Declaration of the New Delhi Conference of Ministers of Foreign Affairs of Non-Aligned Countries held in February 1981, would provide for the withdrawal of all foreign forces, thus ensuring full respect for the sovereignty, independence and territorial integrity of all States in the region including Kampuchea. Noting the various efforts made in this direction, they hoped that constructive efforts would be made towards dialogue that will lead to the resolution of differences among all States in the region and to the establishment of durable peace and stability in the area as well as the elimination of the involvement of and threats of intervention by outside powers.

The Minister and Heads of Delegation reaffirmed the right of the people of Kampuchea to determine their own destiny free from foreign interference, subversion and coercion and expressed the hope that through a process of negotiations and mutual understanding a climate conducive to the exercise of that right would be created.

The Ministers and Heads of Delegation also noted with approval the efforts being made for the early establishment of a zone of peace, freedom and neutrality in the region and called upon all States to extend their fullest support to these efforts.

IX

The Ministers and Heads of Delegation noted with grave concern that the situation in South West Asia carries dangerous consequences for the peace and stability of the region and that its continuation poses serious implications for international peace and security. In this context, they viewed the situation in Afghanistan with particular concern. They recalled in this regard the urgent call made by the Ministers of Foreign Affairs of the Non-Aligned Countries for a political settlement on the basis of the withdrawal of foreign troops and full respect for the independence, sovereignty, territorial integrity, and non-aligned status of Afghanistan and strict observance of the principle of non-intervention and non-interference. While reaffirming the rights of the Afghan refugees to return to their homes in safety and honor, the Ministers and Heads of Delegation urged all concerned to work toward a settlement that would ensure that the Afghan people would determine their own destiny free from outside interference and enable the Afghan refugees to return to their homes. They expressed their appreciation for the sincere efforts made in the search for a political settlement of the situation in Afghanistan. They also called on all States to exercise restraint to avoid further endangering the peace and security of the region and to work for the creation of conditions conducive to stability and harmonious relations among all States of the region based on the non-aligned principles of peaceful coexistence, respect of sovereignty, national independence, territorial integrity and non-intervention and non-interference in the internal affairs of States.

X

The Ministers and Heads of Delegation noted with deep concern that in the Western Hemisphere also increased tension has been building up in the Caribbean and Central America. The Ministers and Heads of Delegation stressed that the policies of aggression, interference and intervention, pressures and economic or military blockades can only worsen the situation and endanger international peace and security even more. In this context, they expressed concern about the carrying out of military naval maneuvers in the region and about the attempts at destabilizing the Government of Grenada, the exertion of economic and other pressures, destabilizing maneuvers against Nicaragua and the pursuit of hostile policies and actions against Cuba by the United States of America. The Meeting reiterated its full support for Cuba's just demand that the United States return the naval base and territory it illegally occupies in Guantanamo and cease its blockade against that country.

The Ministers and Heads of Delegation, in relation to El Salvador, firmly reiterated the application of the principles of non-alignment, self-determination, non-intervention and non-interference in the internal affairs of States, so that the current situation in that country would be settled in a peaceful, just, democratic and dignified manner.

In this context, the Meeting welcomed with satisfaction all the expressions and effort of the international community, that, reaffirming these principles, promote a genuine and democratic political solution that takes into account all political forces in El Salvador and its genuine political representatives, which would lead to a process of ample democratic participation that would put a stop to bloodshed in that country.

The Meeting expressed concern over the increased flow of Israeli war material, particularly aircraft, into some Caribbean and Latin American countries.

The Meeting further renewed its support for the inalienable rights of the people of Puerto Rico to self-determination and independence and supported the decision of the Special Committee on Decolonization to include the question of Puerto Rico in the agenda of the 37th Session of the General Assembly.

The Ministers and Heads of Delegation reiterated their hope that the United States would implement and strictly respect the Panama Canal treaties to give effect to the full sovereignty and jurisdiction of Panama over all its national territory, as well as to the regime on neutrality of the interocean waterway.

The Meeting firmly reiterated its support for the right of the Republic of Argentina to the restitution of the Malvinas Islands and territorial sovereignty over them and requested that the negotiations with the United Kingdom in this regard be speeded up.

The Meeting reaffirmed once again the Republic of Bolivia's just and legitimate claim to recover its outlet to the Pacific Ocean with full sovereignty.

XI

In accordance with the decision of the Ministerial Conference of the Non-Aligned Countries held in February 1981 in New Delhi and contained in paragraph 109 of the New Delhi Declaration on the peaceful settlement of disputes, the Meeting decided to set up an open-ended working group for the purpose of studying the proposals submitted to the New Delhi Conference and of drafting proposals for the next Seventh Summit Conference of Heads of State or Government to take place in Baghdad.

XII

The Ministers and Heads of Delegation expressed their concern over the increasingly deteriorating situation in the international economic relations and to the extremely difficult position of developing countries. This was not only a result of structural problems of the world economy but also a consequence of the serious aggravation of the international situation unleashed by the arms race. The lack of will to help in the solution of serious problems affecting the world economy, in particular the economies of developing countries, itself contributes to the further exacerbation of the international situation.

The Meeting noted that the continuing deterioration of economic conditions in the world has assumed unparalleled dimensions affecting most of the developing countries in a most serious way, as demonstrated inter alia by their growing imbalances in international payments, the sharp deterioration in the terms of trade, the growing burdens of external indebtedness and the insecurity and insufficiency of food supply.

In the light of this grave situation and its underlying causes, the response of the major developed countries has been most disappointing. The Meeting deplored the fact that the launching of global negotiations continues to be jeopardized through prolonged delays caused mainly by one country, thus blocking a major nonaligned initiative for an integrated and global review of the totality of crucial items on international cooperation for development.

It is evident that some developed countries also lack the positive political will to proceed without delay with concerted efforts designed to achieve effective and equitable solutions to the present world economic crisis.

The Ministers and Heads of Delegation reaffirmed their conviction that the present unjust international economic system, already in crisis, demands a structural reform which could only result from a global and integrated approach to the present world economic problems with the participation of all countries and resulting in agreed solutions and the establishment of the New International Economic Order that will be lasting and beneficial to all. They were more than ever convinced of the urgency of the launching of global negotiations, and urged the developed countries to display real political will to that purpose.

The Ministers and Heads of Delegation of Non-Aligned Countries welcomed the encouraging decisions taken during the Caracas conference on cooperation among developing countries and called upon all the nonaligned and other developing countries to spare no effort in rapidly implementing the important decisions contained therein.

The Meeting viewed the outcome of the recent United Nations Conference on Least Developed Countries held in Paris in September 1981 as significant and encouraging. It called for a speedy implementation of the substantial new Programme of Action as adopted at the Conference as an essential step towards the establishment of the New International Economic Order.

XIII

7. The Ministers and Heads of Delegations further decided to renew the mandate of the working, contact and drafting groups of the nonaligned countries.

XIV

8. The Ministers and Heads of Delegations underlined the importance of the forthcoming Ministerial Meeting of the Coordinating Bureau of the Non-Aligned Countries to be held in Havana, Cuba, for enhancing the role and effectiveness of non-alignment in the solution of outstanding international problems and the preparation of the VII Summit Conference of Heads of State and Government to be held in Baghdad. They noted with satisfaction that the Coordinating Bureau at the level of Permanent Representatives to the United Nations will meet soon in order to start the preparatory work of this important ministerial meeting of the Coordinating Bureau to be held in Havana from 31 May to 4 June 1982, in close coordination with the host country.

9. The Ministers and Heads of Delegation expressed their deep satisfaction that the 20th Anniversary of the First Summit Conference of the Non-Aligned Countries held in 1961 in Belgrade was solemnly commemorated during the Ministerial Conference in

New Delhi. They noted with appreciation that this year, for the first time, in accordance with the decision adopted at the Ministerial Conference in New Delhi, the Day of Non-Alignment was observed in the United Nations and on the national level in non-aligned countries, which contributed to a wider perception of the relevance, in the current international situation, of the policy of non-alignment and of the Movement of Non-Aligned Countries and its irreplaceable role in the efforts towards the establishment of new political and economic relations in the world. The Ministers and Heads of Delegation expressed their satisfaction that the Twentieth Anniversary of the First Conference of Heads of State or Government of Non-Aligned Countries will be solemnly observed during the 36th Session of the General Assembly. They invited all member countries to contribute to the observance of this historic event.

10. The Meeting resolved that non-aligned countries will act in close cooperation with each other in respect to all items of special concern to the non-aligned countries on the agenda of the 36th Session of the United Nations General Assembly, in accordance with the principles and objectives of non-alignment.

THE REPRESENTATIVE OF THE UNITED STATES OF AMERICA TO THE UNITED NATIONS,

October 6, 1981.

YOUR EXCELLENCY: Since coming to New York as the United States Permanent Representative to the United Nations some ten months ago, I have come to appreciate more warmly the positive role of the United Nations, and to greatly value relations between the United States Mission and that of many other Missions here at Turtle Bay.

Because I sincerely value the good relations between our Missions and the strong bilateral ties between our nations, I wish to share with you now my thoughts on a matter of some importance.

Quite frankly, I was startled to find your government associated with the Communique of the Ministers of Foreign Affairs and Heads of Delegation of the Non-Aligned Countries which was issued on September 28, 1981 in New York.

I well realize, Your Excellency, that your country is but one of some one hundred members of the Non-Aligned Movement, and that the Movement itself is a body of divergent nations. Nonetheless, I am startled that you or your government would or could associate yourselves with a document composed of such base lies and malicious attacks upon the good name of the United States.

I can assure you, Your Excellency, that I would never allow the United States to be associated with any document from any group—no matter how large or diverse—that contained such vicious and erroneous language against your country.

The communique has no more claims to being truly non-aligned than does the Permanent Mission of Cuba which issued it. In a year which sees a continuing military occupation of Afghanistan, Kampuchea and Chad—all with the support of the USSR, the non-aligned communique contains no mention of the Soviet Union. Yet it negatively mentions my country—which invades and occupies no one, and undermines no one's independence—nine times by name and dozens of times by implication, making the most absurd and erroneous charges such as:

That the U.S. perpetrated "aggression" against Libya last August, an "aggression" which "constitutes a threat as well as flagrant violence against the sovereignty, independence and territorial integrity on non-aligned countries" and "a threat to international peace and security" (page 13); and

That the U.S. participates in "attempts at destabilizing the Government of Grenada, the exertion of economic and other pressures, destabilizing maneuvers against Nicaragua" (page 17).

These, Your Excellency, are only two of the fabrications and vile attacks against the United States, which fill this 21-page document.

I need not elaborate all the falsehoods, nor need I explain to you the truth on these and other issues. For I believe, Your Excellency, that you know the truth about these matters and that, by and large, our countries share values and principles of basic human decency, national independence, self-determination, and non-aggression.

In fact, Your Excellency, I think that you no more believe these vicious lies than do I and I do not believe they are an accurate reflection of your government's outlook. And yet, what are we to think when your government joins in such charges, for that is what you have done in failing to disassociate yourself from them.

I think you will understand how disturbed I feel about this communique and your government's association with it, if only you imagine how you would react to having friendly nations level such charges against your government.

The fact that the United States is a large and powerful nation does not make us less concerned about our good name or the reliability of our friends.

Convinced that this communique does not represent your views, I would very much appreciate hearing from you about it.

With all good wishes, I am

Sincerely yours,

JEANE J. KIRKPATRICK.

Mr. MOYNIHAN. I thank the Chair.

I also ask unanimous consent to include in the RECORD an excellent editorial in the Wall Street Journal commending Ambassador Kirkpatrick, and two reports on this subject by the well-known and highly regarded United Nations correspondent for the New York Times.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the New York Times, Oct. 14, 1981]

MRS. KIRKPATRICK ASKS 40 NATIONS TO EXPLAIN THEIR ANTI-U.S. STAND

(By Bernard D. Nossiter)

UNITED NATIONS, N.Y., October 13.—Jeane J. Kirkpatrick, the American delegate, has privately asked 40 nations to explain their support for a document of "base lies and malicious attacks upon the good name of the United States."

The letter, addressed to third-world nations that identify themselves as non-aligned, was sent on Oct. 6, Mrs. Kirkpatrick said. It complained that the "vicious and erroneous language" in a communique issued after a meeting Sept. 28 of foreign ministers and delegation heads from 93 other third-world nations.

Mrs. Kirkpatrick also says that many of those to whom she wrote have responded favorably. She would not name them, on the ground that it "would be inappropriate."

WHAT ARE WE TO THINK?

Diplomats here could not recall a letter to match the tone of Mrs. Kirkpatrick's. "Your Excellency, I think you no more believe these vicious lies than I do," she wrote, "and I do not believe they are an accurate reflection of your Government's outlook. And yet what are we to think when your Government joins in such charges, for that is what you have done in failing to disassociate yourself from them."

Mrs. Kirkpatrick concluded by telling the mission chiefs, "I would very much appreciate hearing from you about it."

Several delegates to the meeting have commented in private that the communiqué, a 21-page summary of the state of the world, was one-sidedly anti-American. Some attributed this to the chairmanship of Cuba's Foreign Minister, Isidoro Malmierca. Egypt and Pakistan succeeded in changing language they considered too harsh on the United States.

Other delegates said because of third-world opposition to the Reagan Administration's growing ties to South Africa and its proposed "strategic alliance" with Israel, there had been no disposition to challenge passages assailing the United States.

The third-world bloc does not vote on such documents. It approves them by consensus, which means that any passage can be stricken on the objection of one member.

Members of the third-world group range from close allies of the Soviet Union, like Ethiopia, Afghanistan and Vietnam, to staunch friends of the United States, like Singapore, Somalia and Egypt. Most of the 93 nations, however, swing between the United States and the Soviet Union, depending on the issue being discussed.

Mrs. Kirkpatrick said she chose the 40 recipients of her letter on the basis of personal contact that she or a senior American official had had with the foreign missions.

In effect, she chose missions regarded as friendly to the United States.

Mrs. Kirkpatrick said today that she had received 15 replies and all of them accepted her thesis. Delegates from nine nations, she said, told her, "We don't believe it," meaning that they do not accept the attacks on the United States. Three others said they were not present at the meeting, and three showed her letters they had sent, disassociating themselves from the document. She added that she expected further favorable replies.

A random check of some missions turned up a cooler response. Yusufu Maitima Sule of Nigeria said that his Government was studying the letter and that "there will be no rush to reply." Ghassan Tueni of Lebanon said he had spoken with Mrs. Kirkpatrick personally and told her he did not agree with her letter.

"I told her," he said, "that if she wanted more than polemics, she should abandon the epistolary style and meet with some of us"

This was an allusion to Mrs. Kirkpatrick's recent absences from the United Nations.

In her letter, Mrs. Kirkpatrick contended that the communiqué "has no more claims to being truly nonaligned than does the Permament Mission of Cuba, which issued it."

She singled out two examples of what she called "absurd and erroneous charges" and "fabrications and vile attacks." One was the document's assertion that the United States had committed aggression when the Navy in August shot down over the Gulf of Sidra off the Libyan coast two Libyan planes that Washington had said fired first. The other instance was the communiqué's claim that the United States was trying to "destabilize" Grenada and Nicaragua.

NO CRITICISM OF RUSSIANS

Mrs. Kirkpatrick was indignant over the absence of criticism of the Soviet Union in the communiqué "in a year which sees a continuing military occupation of Afghanistan, Cambodia and Chad."

About 85,000 Soviet troops remain in Afghanistan. Cambodia is governed by a regime installed by Vietnam, a country closely tied to the Soviet Union. Libya, also pro-Soviet, has stationed troops in Chad since last December.

[From the New York Times, Oct. 5, 1981]

U.S. AS WHIPPING BOY

(By Bernard D. Nossiter)

UNITED NATIONS, N.Y., Oct. 3, 1981.—If the 93 nations professing nonalignment are to be taken literally, the United States is the only threat to world peace and prosperity.

This is the thrust of a 21-page document that the group adopted this week after two days of private discussion. "It has been a strongly anti-American formulation," said a senior Arab diplomat who was unhappy with the proceedings.

In the document, the United States is accused of "aggression" for downing two Libyan planes that Washington said had fired first over international waters. The United States is also "condemned" in the document for its "hostility" toward the "inalienable rights" of Palestinian Arabs, for planning to build new strategic links with Israel, for attempting to "destabilize" Nicaragua, Grenada and Cuba, and for refusing to grant Puerto Rico independence, although the island's voters have repeatedly rejected this option at the polls.

AMERICAN VETO IS DEPLORED

The 93 nations also "deplored" the American veto of a resolution condemning South Africa for its raid into Angola in August. The communiqué implies that Washington will breach its treaty to Panama at the end of the century. The document voices alarm over the accelerating arms race but singles out only one weapon, the American neutron bomb. It has nothing to say about Soviet deployment of medium-range missiles in Europe.

In fact, the Soviet Union and its allies are never mentioned, save as victims, anywhere in the survey. It says that "foreign forces" should pull out of Afghanistan but fails to describe them as Moscow's. Similarly, it says unidentified "foreign forces" should also withdraw from Cambodia; it discreetly does not name them as Vietnamese.

The nonaligned group, celebrating its 20th anniversary, organized in the name of independence from the camps led by Washington and Moscow. Several delegates to the conference acknowledge that the latest communiqué is more strongly tilted toward the Soviet Union than any produced since the group's meeting in Havana two years ago. These diplomats, however, contend there is both less and more here than meets the eye.

Cuba is still chairman of the group and its foreign minister, Isidoro Malmierca, ran the latest meeting here with an iron hand. According to those present, when a delegate demurred at some language, Mr. Malmierca would reply: "Don't waste time. Send your reservation in writing." This way he could preserve an artificial appearance of consensus or unanimity, required at nonaligned gatherings.

"The moderates never organized," said an Asian envoy. "The extremists did." The meeting was presented with a relatively mild working paper. But Syria, Libya, Algeria, Nicaragua and the Palestine Liberation Organization—a 94th "nation" in nonaligned circles—introduced carefully timed amendments to stiffen the document's anti-American tone.

Several dozen members of the group, including Bangladesh, Nepal, Bhutan, Zaire, Senegal and Gabon, say they will file objections to one section or another. But for the record, the paper stands as the group's unanimous view. "It was just not important enough to fight over," said an Asian diplomat.

Some nations did, however, fight for their own cause. Egypt succeeded in erasing words that would have condemned Cairo for signing a peace treaty with Israel. Pakistan got rid of language diluting the section dealing with those anonymous "foreign forces" in Afghanistan.

The moderates concede that their unwillingness to insist on a less one-sided document reflects a widespread undercurrent of dismay with the policies of the Reagan Administration.

"You're sending out the wrong signals," said an African diplomat. In the African view, the Administration's proclaimed neutrality between South Africa's ruling whites and its black population is immoral. Washington's repeated actions to support Pretoria or spare it from rebuke have aroused deep suspicion over American intentions toward the South African-administered territory of South-West Africa, also known as Namibia.

[From the Wall Street Journal, Oct. 19, 1981]

EXPLAIN YOURSELF

Something that shouldn't pass without comment happened at the United Nations the other day. Delegates from the nonaligned nations met and issued a consensus statement that excoriated the United States for all kinds of sins while remaining silent on the subject of the Soviet Union. This, of course, was nothing new. But this time Ambassador Jeane Kirkpatrick wrote individual letters to many of the envoys involved, asking them explicitly whether they really believed the lies they had attached their counties' names to. It is a healthy precedent.

The document in question was the communique of ministers of foreign affairs and heads of delegation of the nonaligned countries, put out after a meeting of these notables in New York on Sept. 28. Chairing the meeting was the Cuban Foreign Minister, and this fact showed in the final product. The "nonaligned" nations accused the U.S. of "aggression" against the hapless nation of Libya and against the nonaligned world in general; they excoriated us for trying to "destabilize" Grenada and Nicaragua, two new Soviet bases in the Caribbean region. There was no mention of current events such as the Soviet role in Afghanistan.

The U.S. letter asked the less antagonistic among the nonaligned to explain for themselves what they meant by all this. These are "vicious lies," the letter said, "and I do not believe they are an accurate reflection of your government's outlook. And yet what are we to think when your government joins in such charges." Such actions, the letter suggested, are hardly compatible with a general posture of friendly relations.

We are told that some of the nonaligned have sent back written or oral word that they have in fact dissociated themselves from the Cuban communique. Others, it seems, are rather miffed that they have been called on the carpet. Some are saying that they let the unfriendly language go through because they are mad at the U.S. for being increasingly soft on South Africa and for actually contemplating an expanded strategic alliance with the pariah Israel. The ambassador from Lebanon, who should know something about the Soviet role in world affairs, is reported to have met the issue with a courageous demand for fewer letters from the U.S. and more personal meetings.

We hope the U.S. delegation stirs up this species of ferment again and again. One of the most persistent features of UN life has been the habit of its delegations to speak one way in private and another in public. They express perfect understanding of U.S. interests in personal conversation and can be counted on to vote the opposite, professing their problems, their difficulties, their delicate situation. They know we will understand. Unfortunately, we usually do.

The habit is not going to change until we become a little less understanding and a little more respectful—until, that is, we develop a consistent pattern of treating our nonaligned colleagues as adult nations responsible for the words they utter. This letter was a step toward that new pattern, and it will be refreshing if it proves to be the first of many.

Mr. MOYNIHAN. I thank the Chair.

Mr. President, it remains to me only to explain the purposes of the substitute amendment.

My original amendment would have simply required that no grants of funds or equipment, no arms sales, and no credit or loans could be extended to nations that had subscribed to this vile communique and then not disscciated themselves.

As I said earlier, the chairman and the distinguished ranking member have found that too strong an assertion by the Senate as to how the President should conduct his foreign affairs. So we have agreed on a substitute which says that there will be no aid, assistance, sales, credits, or loans under the Foreign Assistance Act or the Arms Export Control Act to any country that has been involved in this communique—there are 97 in total—until the President shall have taken into account whether that country has dissociated itself from the communique. Within 30 days of the enactment of this section the President shall

report to the Congress, to the Speaker of the House, and to the Committee on Foreign Relations, which countries have dissociated themselves and the form in which the dissociation was made. Thereafter, when any country chooses to do this to assert that it does not subscribe to the communique, Congress will be informed by the President.

Mr. President, in order to ascertain whether there has not been a small typographical mistake in the document at the desk, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. The text is now correct.

With that, Mr. President, I conclude my remarks with special thanks to the distinguished chairman and his colleagues for their cooperation in this matter.

Mr. KASTEN. Mr. President, I fully understand the frustrations felt by the Senator from New York with the kind of irresponsible rhetoric which sometimes emanates from international organizations, all too frequently aimed at the United States, and I commend the Senator for his amendment and for his interest.

This amendment makes clear that the Congress believes that the comportment of countries in international forums should be considered as a part of our overall relationship with that country and requires the President to consider such conduct in constructing his foreign assistance programs.

This clearly puts countries on notice that we will look at their attitudes in international forums and the cheap shots at the United States will have a cost in the future.

Along with the chairman of the Foreign Relations Committee, Mr. President, and the majority manager of the bill, I support this amendment. We actively support this amendment.

Mr. MOYNIHAN. Mr. President, may I express appreciation to the Senator from Wisconsin for what he has said and call attention to just one further point in this communique?

The 97 nations were in flagrant violation of article 7 of the United Nations Charter which states that—

> Nothing contained in the present charter shall authorize the United Nations to intervene in matters which are essentially within the domestic jurisdiction of any state.

Yet the movement of nonalined countries called for the United Nations General Assembly to take up the issue of Puerto Rico as if this were not, in fact, wholly an internal matter of the United States.

May I say to the distinguished Senator from Wisconsin that while I was this Nation's permanent representative at the United Nations, I set out to do a simple survey of members of the Assembly.

There were then, I believe, 143; there are now 155. I endeavored to determine which among this collection of nations, by a very loose set of criteria, very easily met criteria, were with respect to the United States bilateral, as opposed to multilateral, nations.

The multilateral were those with whom we did not have significant relations, except in the multilateral forums.

To qualify as a bilateral country, a country had to meet some very minimal standards. It had to sell us a few things, we had to sell it a few things. There were about five categories such as this.

Even with that very loose set of standards, we found with more than half of the nations in the world that our relationship with them was conducted principally in the United Nations or the World Health Organization or the ILO, or other international bodies. Otherwise, we generally did not have anything much at all to do with each other.

This remains true today of scores of countries. Therefore, it matters to us only how they conduct themselves at the United Nations.

We do not ask any country to subject itself to our judgment, much less to abase itself. But the relationship between nations ought to be attended by a certain comity. Certainly, when the one is a donor, it is not unreasonable to expect not to be vilified by the receiver, not to have vicious lies stated by the country that one is wishing to assist.

I conclude on the simple point that Mrs. Kirkpatrick meant it when she said she would never allow the United States to be associated with such statements made to the countries that she addressed. Such statements should not be allowed to be a normal part of international relations, and we in the U.S. Senate should be alarmed that malicious lies about this Nation are told, and subscribed to, by two-thirds of the nations of the world.

This Nation will no longer say, "Well, it is only words." Because these are more than words.

We are fighting, Mr. President, for the language of international politics. If we let that Orwellian perversion of meanings and distortions of truth become a norm, we shall lose far more than we understand. Ambassador Kirkpatrick sees this point. This is an opportunity to support her.

Mr. President, I again want to thank the distinguished Senator from Wisconsin for his insightful and very important remarks.

I urge the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. BAKER. I announce that the Senator from Colorado (Mr. ARMSTRONG), the Senator from Rhode Island (Mr. CHAFEE), the Senator from Alabama (Mr. DENTON), the Senator from Arizona (Mr. GOLDWATER), the Senator from Idaho (Mr. MCCLURE), the Senator from South Dakota (Mr. PRESSLER), the Senator from Alaska (Mr. STEVENS), the Senator from Texas (Mr. TOWER), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arizona (Mr. DECONCINI), the Senator from Connecticut (Mr. DODD), and the Senator from Massachusetts (Mr. TSONGAS) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 88, nays 0, as follows:

[Rollcall Vote No. 323 Leg.]

YEAS—88

Abdnor	Glenn	Metzenbaum
Andrews	Gorton	Mitchell
Baker	Grassley	Moynihan
Baucus	Hart	Murkowski
Bentsen	Hatch	Nickles
Biden	Hatfield	Nunn
Boren	Hawkins	Packwood
Boschwitz	Hayakawa	Pell
Bradley	Heflin	Percy
Bumpers	Heinz	Proxmire
Burdick	Helms	Pryor
Byrd, Harry F., Jr.	Hollings	Quayle
Byrd, Robert C.	Huddleston	Randolph
Cannon	Humphrey	Riegle
Chiles	Inouye	Roth
Cochran	Jackson	Rudman
Cohen	Jepsen	Sarbanes
Cranston	Johnston	Sasser
D'Amato	Kassebaum	Schmitt
Danforth	Kasten	Simpson

	Melcher	

NOT VOTING—12

Armstrong	Dodd	Stevens
Chafee	Goldwater	Tower
DeConcini	McClure	Tsongas
Denton	Pressler	Weicker

So the amendment (UP No. 498) was agreed to.

Mr. MOYNIHAN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PERCY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the order for the yeas and nays on the amendment now pending be vitiated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. I thank the Chair.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York, as amended.

The amendment (UP No. 497), as amended, was agreed to.

Mr. MOYNIHAN. I thank the Chair.

UP AMENDMENT NO. 499

(Purpose: To eliminate provisions earmarking funds)

Mr. KASTEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. KASTEN) for himself and Mr. HATFIELD, proposes unprinted amendment No. 499.

Mr. KASTEN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning on page 22, strike out line 20 through line 23 on page 23 and insert in lieu thereof the following:

"(b) Not less than two-thirds of the funds made available to Turkey under this chapter for the fiscal year 1982 shall be provided on a grant basis.

"(c) Up to $50,000,000 of the funds appropriated to carry out this chapter for the fiscal year 1982 may be made available for emergency use under this chapter when the national interests of the United States urgently require economic support to promote economic or political stability.

"(d) None of the funds appropriated to carry out this chapter for the fiscal year 1982 may be made available to Syria.".

(c) Section 533 of such Act is repealed.

On page 26, line 8, strike out the comma and all that follows through "Activities" on line 14.

Beginning on page 26, line 24, strike out through page 27, line 13.

On page 30, strike out lines 13 through 20.

On page 30, line 22, strike out "Sec. 307." and insert in lieu thereof "Sec. 306.".

On page 31, line 2, strike out "Sec. 308." and insert in lieu thereof "Sec. 307.".

On page 32, line 20, strike out "Sec. 309." and insert in lieu thereof "Sec. 308.".

On page 33, strike out lines 3 through 17.

On page 33, line 19, strike out "Sec. 311." and insert in lieu thereof "Sec. 309.".

On page 34, beginning on line 4, strike out the first comma and all that follows through "Program" on line 9.

On page 34, line 11, strike out "Sec. 312." and insert in lieu thereof "Sec. 310.".

On page 35, line 4, strike out "Sec. 313." and insert in lieu thereof "Sec. 311.".

Beginning on page 36, strike out line 23 through line 2 on page 37.

On page 37, line 3, strike out "(4)" and insert in lieu thereof "(3)".

On page 84, between lines 2 and 3, insert the following:

AVAILABILITY OF ECONOMIC SUPPORT FUND ASSISTANCE FOR LEBANON

SEC. 716. Notwithstanding the amendment relating to Lebanon made by section 715(b) of this Act, which added subsection (h) to section 532 of the Foreign Assistance Act of 1961, the dollar amount of funds specified in such subsection may be available for any of the purposes authorized under chapter 4 of part II of the Foreign Assistance Act of 1961.

On page 84, line 4, strike out "SEC. 716." and insert in lieu thereof "SEC. 717.".

Mr. KASTEN. Mr. President, I am offering this amendment on behalf of myself and the senior Senator from Oregon, Senator HATFIELD.

The rationale behind this amendment is a simple one. Expressed in general terms, it addresses the problems caused by earmarking funds at this early stage of the congressional process only to find out at the end of this process, when the appropriations legislation is passed, that the well-intentioned earmark has the effect of severely limiting programs, or, in some cases, actually eliminating programs.

Mr. President, the problem can be expressed in this fashion: The Foreign Relations Committee authorizes an activity at $100, earmarking $20 of the $100 for a specific program. As is almost always the case, the appropriations for the activity is reduced, say in this case to $60, and the situation thus changes dramatically—where first the committee mandates earmarking one-fifth of the activity, now it becomes one-third. Not only would not the committee's original intent be enacted, but there is an adverse effect of squeezing other programs in order to make room for a larger proportionate earmarking. As I will show in a moment, with the current stringent budgetary situation, this adverse effect is greatly exaggerated.

Mr. President, to demonstrate my point, I would like to cite a few actual examples found in the legislation before us under the international organizations and programs account—voluntary contributions to the United Nations and the Organization of American States—the committee has authorized for this purpose $229,500,000, earmarking funds for 3 of the 14 programs for which funding is requested under the activity. The three earmarkings total $189,500,000.

The administration's revised budget request received on September 30 seeks a total of $189,200,000 for the entire account, or $300,000 less than the total earmarking for the three programs. As chairman of the Foreign Operations Appropriations Subcommittee, and as a member of the Senate Budget Committee, I am as certain as possible that the total funding available for international organizations and programs in fiscal year 1982 will be very close to the administration's request—in fact, unfortunately, it is likely that we will once again be on a continuing resolution for the entire fiscal year, a continuing resolution, as in the case right now, where the rate of operation for this activity is set at $189,200,000. So, Mr. President, what are the effects of these earmarkings?

Instead of $13.250 million for the International Atomic Energy Agency there will be zero;

Instead of $14.5 million for the Organization of American States there will be zero;

Instead of $2 million for the United Nations capital development program there will be zero;

Instead of $2 million for the world food program there will be zero;

Instead of $500,000 for the United Nations Decade for Women/Voluntary Fund there will be zero;

Instead of $1 million for the United Nations education and training program for southern Africa there will be zero;

Instead of $500,000 for the Institute for Namibia there will be zero;

Instead of $2.3 million for the World Meteorological Organization there will be zero; and

Instead of $150,000 for operation of the Conference on International Trade in Endangered Species there will be zero.

The Foreign Relations Committee has also earmarked a total of $2,017,000,000 of the economic support fund. Most of this earmarking—$1,577,000,000—is for Israel and Egypt. I know as well as anyone that one way or another Congress is going to earmark the funding for these two countries. I suspect this is the one case in this legislation where the earmarking will stay the same no matter the size of the pot. That is not true, however, of the rest of the earmarkings. Under the continuing resolution, funding for the economic support fund totals $2,104,500,000; and, therefore—again it is likely that this will end up as the total funding for fiscal year 1982—the effects of these earmarkings is to squeeze all of the other ESF country programs.

There would be only $87,500,000 for $564 million worth of requests for the Philippines, Thailand, Jordan, Lebanon, Oman, Portugal, Spain, all of the African countries including Kenya, Liberia, and Zimbabwe and the Sudan, the eastern Caribbean program, El Salvador and Jamaica. Recognizing that the earmarks for Egypt and Israel are cerain to be enacted one way or another, at least there would be some flexibility were those the only earmarkings.

Mr. President, let me cite one more example to further illustrate my point. There has been an enormous amount of pressure up here to earmark $5.7 million of the funds in AID's education and human resources account for a scholarship program for black South Africans. I realize that the Foreign Relations Committee has provided for a ceiling and not an earmarking, but the House Foreign Affairs Committee has earmarked these funds. Since the particular item is an especially good example of the problem I would like to use it.

The administration's revised request for education and human resources is $96 million. Of this amount approximately $17.6 million will be available for all of the education and human resources programs in all of the countries in Africa. The earmarking would thus account for nearly one-third of the entire African program—not one-third of the scholarship program—one-third of the entire program that simply does not make sense.

Mr. President, we have no hidden motive or agenda behind offering this amendment. It is offered out of concern that we be able to have the flexibility necessary to maximize the shortage of foreign assistance dollars. Gone are the days when high appropriation levels were assured, thus greatly lessening the adverse effect of earmarkings. More than anything we must recognize that fact. These are new times, and while I know earmarking has been a practice in the past, not only are these new times a chance to break these practices, but as I believe I have illustrated, we must break it.

The ideal way to operate, and I think the chairman of the Foreign Relations Committee would agree with this, is for the Foreign Relations and Appropriations Committees to avoid earmarkings and where we disagree in the differing policy suggested in our reports—negotiate those differences. But let us not be inflexible—and most of all, let us not harm our foreign assistance programs and policies because of presumed com-

mittee prerogatives—whether the committee is Appropriations or Foreign Relations.

The original version of the amendment I am offering today eliminated all of the earmarkings in the legislation before the Senate. A number of my colleagues have expressed general support of this amendment, but have raised concerns with respect to the earmarkings for Israel and Egypt. In the Dear Colleague letter that I sent each Senator last Friday, I pointed out that the appropriations legislation, under the jurisdiction of the subcommittee I chair, would be providing for those two earmarkings and that, therefore, any concern with respect to Israel and Egypt was unfounded. However, some uneasiness still exists with respect to this particular issue and, therefore, in the version of the amendment before us, the earmarkings for Israel and Egypt remain intact—I repeat, the earmarkings for Israel and Egypt remain intact.

Mr. President, two more points:

I am not totally against earmarkings—sometimes it is necessary when Congress feels strongly on an issue—but let us do it at the end of the process so that we have no unintended and unnecessary adverse effects.

Second, I want to assure the chairman of the Foreign Relations Committee that it is my desire to work with him as closely as I can in our common efforts to secure a strong and sensible foreign assistance policy and program.

(By request of Mr. KASTEN the following statement was ordered to be printed in the RECORD:)

● Mr. HATFIELD. Mr. President, the Senator from Wisconsin (Mr. KASTEN) has made an overwhelming case for acceptance of our amendment. I want to associate myself with his remarks, and underscore some of his arguments.

One of the results of the various budget-related matters that passed this year is that authorization and appropriation levels will be much closer than they have been in the past. As recently as fiscal year 1980, appropriations were only 57 percent of authorized levels. But reconciliation lowered authorizations in numerous cases to under the previously appropriated level. So we will not see many situations where the authorization legislation provides the Appropriations Committee with a great deal of room with which to set funding priorities—the Appropriations Committee's main responsibility. Under these conditions, earmarkings in authorization legislation are simply not practical. They will result in situations such as described by the Senator from Wisconsin where programs are actually eliminated because of the earmarkings and the total amount earmarked will exceed the total appropriation.

Mr. President, I would also like to join with the Senator from Wisconsin by indicating that I will work closely with the chairman of the Foreign Relations Committee in the furtherance of a sound and sensible foreign assistance program and policy. I do not think that this matter which is highlighted by our amendment should be considered as a disagreement of committee prerogatives or jurisdiction, but rather as a recognition of the budgetary limitation which faces us in this period of time. I hope the Foreign Relations Committee will accept this amendment, and I again congratulate the Senator from Wisconsin for bringing this matter to the Senate's attention.●

Mr. PERCY. Mr. President, before replying to my distinguished colleague, I would just like to say to him that last night, in giving the keynote address at the annual meeting of the Council for the Johns Hopkins School of Advanced Studies, about 140 of the most powerful and influential people in the international community in Washington and across the country, during the question-and-answer period I was asked for an evaluation of the new Senators, the freshman class, and how sophisticated I felt they were in international affairs, and did they really understand the nature of the world, the complexity of it, and so forth.

I commended highly the quality of the Members on both sides of the aisle of the new class, and then took occasion to particularly point out the very close working relationship that we had established with the chairman and the ranking member and the members of the Committee on Foreign Relations in dealing with authorization bills, and that we had extended invitations to the distinguished chairman of the Appropriations Subcommittee for International Operations, and his deep interest in the policy-making aspects of foreign policy which has been a tremendous encouragement to us, and that we had worked in tandem, arm in arm, in many areas.

The pending amendment is just a good example of the cross-fertilization of ideas and the responsible position taken by my distinguished colleague. I hope my friends from Wisconsin as well as Illinois hear these words of praise which have been so well deserved.

UP AMENDMENT NO. 500

I do recognize that the President's revised request creates problems in the I.O. & P. account if modifications are not made in earmarks for those accounts. Therefore, I send to the desk a substitute amendment for the one offered by Senator KASTEN which makes the earmarks in the I.O. & P. account proportional for the total amount appropriated for the entire account.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 500 to the Kasten amendment numbered 499.

Mr. PERCY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language to be inserted, insert the following:

On page 34, strike lines 4 through 9 and insert the following: "the fiscal year 1982. Of the funds appropriated pursuant to the authorities of this section in fiscal year 1982, not less than 19.6 percent of the total appropriated or up to $45,000,000 shall be available only for the United Nation's Children's Fund, not less than 58.7 percent of the total appropriated or up to $134,500,000 shall be available only for the United Nations Development Fund, and not less than 4.4 percent of the total appropriated or up to $10,000,000 shall be available only for the United Nations Environmental Program."

Mr. KASTEN. Mr. President, first of all, I would like to thank the distinguished Senator from Illinois, the chairman of the committee, for his kind words, and to just say it has been a privilege and a pleasure to work with the Senator and to learn from him. I look forward to the working and the learning as we work together in the future.

Mr. President, if I understand the compromise which is now being proposed by the chairman of the Foreign Relations Committee, he would change the earmarkings for the international organizations and programs account from fixed dollar amounts to percentages. Frankly, I am not too fond of that method either, though it is a step in the direction of recognizing the problems which have been created by the earmarking of funds on this legislation. I appreciate the chairman's recognition of this and his spirit of compromise.

I had hoped that his compromise would cover the rest of the legislation, but I now believe we have reached an understanding which will help solve problems which might arise later because of the other earmarkings. I know the chairman and members of the Foreign Relations Committee feel strongly about their right to earmark on this legislation, and, of course, they have that right. What I have been trying to do by offering this amendment, however, is to demonstrate that that practice should probably not be continued in the future if we are going to continue to have very scarce foreign assistance dollars. Earmarking on authorizing legislation in the past presented no problem because there was always enough room to maneuver—with decreased funding that room greatly diminishes.

Mr. President, it is my understanding that the leadership of the committee would be willing to support legislation on an appropriation measure, should such legislation be required, in order to overcome any severe problems created by earmarkings in this legislation. With that understanding I am perfectly willing to accept his modification to my amendment. I want to say once more that I greatly appreciate the attitude the chairman has taken throughout our discussions on this matter, and I look forward to working with the distinguished Senator from Illinois, the chairman of the committee, in the future on this and other issues.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

The amendment (UP No. 500) was agreed to.

Mr. PERCY. Mr. President, I want to thank the Senator from Wisconsin for his statement and for his understanding of our concerns. I also believe the Senate owes him a debt for bringing this matter

to the attention of the Senate. The case he has made for his position has been very effective, and I can assure him we will be looking into this problem. Just as he has cooperated with the Foreign Relations Committee on a number of items, I want to assure him that I will likewise offer my support and counsel when the Senate considers the foreign assistance appropriations legislation which he will be managing. I also want to thank the chairman of the Appropriations Committee, the cosponsor of Senator KASTEN's amendment, for his understanding.

I know that the ranking member of the Foreign Relations Committee joins me in saying that we will support legislation on an appropriations measure if it becomes necessary to alleviate any severe problems caused by earmarkings in this legislation.

I move the adoption of the Kasten amendment as modified by the Percy substitute.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin, as modified by the amendment of the Senator from Illinois.

The amendment (UP No. 499), as modified, was agreed to.

Mr. PERCY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. KASTEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, may I have just a brief moment, if the Senator from California will permit me? It is now 2 o'clock, and after consulting with officials on both sides of the aisle it would appear that there are eight amendments left to be dealt with yet this afternoon.

I urge Senators once again to come to the floor and offer their amendments. I especially urge if there are any Members who have amendments on the list of eight, which is at the desk, that they do not intend to offer that they let us know as soon as possible so that we can proceed with planning for the remainder of this day.

As I announced earlier, I am prepared to ask the Senate to remain late tonight in order to finish this bill. I want us to try to finish it if the Senate is agreeable, and we can finish, but not, Mr. President, if Senators hang back and do not offer their amendments.

So the answer to the question that is being put to me with increasing frequency now about how late we will be in depends entirely on how fast Members will come to the floor and offer and dispose of their amendments. I believe we can finish by 7 or 8 o'clock. I am prepared to stay later than that to finish. But we can improve on that time if Members will help us in trying to accelerate the consideration and disposition of this measure.

Mr. PERCY. Mr. President, I would like to address a question to the majority leader on this. I join in his urging Senators to come to the floor. This bill has been hanging around for a long time. We are bound and determined to finish it. But there are commitments that Senators have made. We thought we could finish this late this afternoon, and I would really like to aim toward a time certain of 7 or 7:30 this evening so that we would be on notice and Senators would recognize that we do not intend to stay around until midnight. If they have amendments they want to offer let them come to the floor and we are prepared to take them and to debate them right now.

But we really do urge once again that we move on this.

I have asked the minority to consider whether we could enter into a unanimous-consent agreement to have a time certain this evening to vote. With the eight amendments, I see no reason that we cannot finish those by 7 or 7:30.

Mr. BAKER. Mr. President, if the Senator will permit me, I would be perfectly happy to clear that through our system. I am sure the minority would wish to do the same. We can address the question later.

I am advised now that the Senator from Ohio (Mr. GLENN) has two amendments that will not require a great length of time, but that will make 10 in all.

Mr. President, I even hope that we could finish this bill by 5 or 6 o'clock. It is possible to do that if we will just settle down and get busy with the amendments at hand.

Mr. PERCY. Mr. President, I thank the majority leader. I assure him that the floor managers of the bill for the majority and minority will cooperate in every way possible. With the cooperation of staff members and other Senators, however, we could finish this by the targeted time of 5 or 6 o'clock.

Mr. BAKER. I thank the Senator.

UP AMENDMENT NO. 501

(Purpose: To increase the amount of ammunition that may be stored in fiscal year 1982 in Korea by the U.S. Government for possible Korean use)

Mr. HAYAKAWA. Mr. President, I send an amendment to the desk to increase the amount of ammunition that may be stored in fiscal year 1982 in Korea by the U.S. Government for possible Korean use and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from California (Mr. HAYAKAWA) proposes an unprinted amendment numbered 501.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 19, line 9, strike out "$100,000,000" and insert in lieu thereof "$160,000,000".

Mr. HAYAKAWA. Mr. President, I submit this amendment to raise the authorized ceiling for the fiscal year 1982 war reserve stock for allies program for Korea from $100 million to $160 million. This change to the program will significantly enhance the readiness posture of the Korean forces by adding an additional 2 days of ammunition to the stockpile which is held in Korea for use in contingencies under U.S. accountability. It should be kept in mind that these assets will not be procured from production but will be obtained from excess U.S. needs. There are several reasons which make this amendment advantageous to the United States. First, as I mentioned, the assets are available and excess to our needs. Second, transportation funds are available in the budget of the U.S. Army to move the assets in fiscal year 1982. Third, the United States will realize substantial savings in ammunition storage costs if the move is accomplished in this fiscal year. Finally, the Korean Government, as part of our combined defense improvement program, is constructing storage facilities at no cost to the United States. We will be fortifying its credibility with, and support the Korean Government.

In summary, this initiative will, at minimum cost, strengthen both our material defense readiness with our longtime ally, Korea, and will visibly enhance U.S. regional credibility among member nations in the Northeast Asian community.

Mr. GLENN addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. GLENN. Mr. President, I am glad to rise in support of the amendment of the distinguished Senator from California. I compliment him for bringing this before us. I think it is a very worthwhile amendment.

He is chairman of our Far East Subcommittee and I am the ranking minority member. At one time, I was chairman of it, of course. But I have been following this Korean situation, the ammo supplies, for a long period of time.

In fact, when President Carter was proposing to pull the troops out of Korea, we had several meetings with him at that time and, whether for that or for other reasons, that order to pull the troops out of Korea was reversed. I think it was fortunate that that was the case, because they do remain there as a trip wire.

But, in my several trips to Korea, one of the things that I had looked into at one time was this ammo supply business, because there were rumors afoot that much of the ammunition there was outdated, far overaged, and was left over from the Korean war and was having to go through a reprocessing, a rehabilitation, a refurbishing to make it usable. So those ammo supplies were down. We were very concerned about it.

We were even talking here about whether we would put in special legislation to get separate contracting for new ammo supplies.

I am very glad to say that situation has now been reversed. The situation does appear to be in good shape. It is clear that the United States, the Korean Government, and, indeed, the stability we provide for everyone in that part of the world, will all gain by approving this amendment of the distinguished Senator from California, for it will bring the level of ammunition stored in Korea for

use in emergencies to a more acceptable level. As we all know, that has been our goal for the last several years.

It has been frequently requested, I might add, by both our Ambassador and by military commanders there. The ammunition we are talking about is that which is no longer used by U.S. forces and can be stored in Korea at no expense to the U.S. Government. In fact, the Koreans are now building extensive storage facilities for this ammunition at their own volition and they are paying all the construction and storage costs. So there is no cost to us for that.

The ammunition, once it is in place, will help to provide a very real deterrent and, I might add, also, by knowing it is there, a psychological deterrent to the forces in the region which might be tempted to aggression in the face of a less positive U.S. posture.

Therefore, for minimal expense, the United States will have reinforced a longstanding relationship, a longstanding commitment, and will once more have given credence to our position of a continuing interest in Northeast Asia and our continuing support for the South Korean Government, which stands under a state of duress all the time from the alinement of military forces on their border to the north across the DMZ.

So I am glad to be able to support this. I urge my colleagues to support it.

I have not moved for a record vote. I do not believe the Senator from California wishes a record vote. I would be happy to pass it on a voice vote.

Mr. PERCY. Mr. President, I ask unanimous consent to have printed in the RECORD a letter dated October 22, 1981, from R. D. Webster, Deputy Assistant Secretary of Defense.

There being no objection, the letter was ordered to be printed in the RECORD, as follows.

ASSISTANT SECRETARY OF DEFENSE,
Washington, D.C., October 22, 1981.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The purpose of this letter is to request a change in the authorized ceilng for the FY 82 War Reserve Stock for Allies Program for Korea from $100M to $160M. The reason for this request is to enhance the readiness posture of the Korean forces by adding an additional two days of ammunition to the stockpile which is held in Korea under U.S. accountability. The additional $60M above the original requested ceiling has resulted from a late request from the U.S. Army stemming from a determination that there are excesses in Army stockpiles to their needs. Additionally, transportation funds are now available to move these assets in FY 82.

There are three basic advantages to increasing the ceiling: first, the U.S. will accrue substantial savings in ammunition storage and transportation costs provided the transfers are accomplished in FY 82; second, the Korean Government is constructing storage facilities at no cost to the U.S.; third, by the transfer, the U.S. will strengthen its credibility with the Korean Government.

Sincerely,

R. D. WEBSTER,
Deputy Assistant Secretary of Defense (Logistic and Materiel Management).

Mr. PERCY. Mr. President, in this letter, the Secretary points out three basic advantages to increasing the ceiling:

First, the U.S. will accrue substantial savings in ammunition storage and transportation costs provided the transfers are accomplished in FY 82; second, the Korean Government is constructing storage facilities at no cost to the U.S.; third, by the transfer, the U.S. will strengthen its credibility with the Korean Government.

Mr. President, I commend my distinguished colleague once again for being creative and ahead of everyone else in introducing this amendment, which I think is an extremely important amendment. It helps strengthen the combined United States-South Korean forces by adding to the ammunition placed in South Korea in reserve.

This is done without affecting the budget totals in this bill.

The majority floor manager accepts this amendment.

The PRESIDING OFFICER. If there be no further debate, the question is on agreeing to the amendment of the Senator from California (Mr. HAYAKAWA).

The amendment (UP No. 501) was agreed to.

Mr. PERCY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HAYAKAWA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 502

(Purpose: To repeal a prohibition on furnishing certain assistance for Chile)

Mr. HELMS. Mr. President, I send to the desk an unprinted amendment, and I ask that it be stated.

The PRESIDING OFFICER (Mr. GRASSLEY). The amendment will be stated.

The bill clerk read as follows:

The Senator from North Carolina (Mr. HELMS) for himself and the Senator from South Carolina (Mr. THURMOND), proposes an unprinted amendment numbered 502.

Mr. HELMS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 84, between lines 2 and 3, insert the following:

REPEAL OF LIMITATIONS ON ASSISTANCE, SALES, AND SALES CREDITS FOR CHILE

SEC. 716. Section 406 of the International Security Assistance and Arms Export Control Act of 1976 (22 U.S.C. 2370 note) is repealed.

On page 84, line 4, strike out "Sec. 716." and insert in lieu thereof "Sec. 717.".

Mr. HELMS. Mr. President, section 406, International Security Assistance and Arms Export Control Act of 1976, prohibits military assistance, security supporting assistance, military education and training, credits, guaranties, cash sales, or the provision of export licenses to Chile. This is an absolute, stringent prohibition. There are no exceptions, no provision for a Presidential waiver in the interest of U.S. national security, as is the case with Communist countries (section 620(F)). It is a totally restrictive, punitive law. In fact, the restriction on Chile is even more severe than those imposed upon those paragons of human rights, Cambodia, Vietnam, Angola, and South Africa.

This provision—the so-called Kennedy amendment—was adopted in 1976 on the floor of the Senate. The House agreed to it in conference. Thus, this provision of law has never been discussed by a congressional committee nor has it been brought up and debated on the floor of the House.

Stringent and specific legislative restrictions based on human rights considerations, especially with regard to Chile, should be modified because those restrictions are inappropriate, ineffective, inflexible, and are counterproductive.

There are at least six reasons why section 406 should be repealed:

First. These restrictions are an inappropriate way to pursue the legislative dictate (section 502B(a)(3), Foreign Assistance Act of 1961) which requires the President to conduct international security assistance programs "in a manner which will promote and advance human rights."

We do not help the cause of human rights by withholding economic help to the victims of human rights violations. Nor do we help the cause of human rights by branding certain governments as pariahs and eliminating our trade with those countries, sacrificing American jobs and diplomatic influence as well. It would be more effective to maintain our trade relations and our influence and to work with quiet diplomacy to achieve our commendable objectives.

Second. These legislative restrictions represent a clear double standard of morality in implementing U.S. trade policies.

The United States has little or no leverage over some of the world's most repressive regimes—China, North Korea, Cambodia, and the Soviet Union. In cases where we do have significant influence, such as South Korea, Saudi Arabia, or the Philippines, our human rights concerns bump against other, perhaps more important, considerations such as national security or economic necessity. So the brunt of our human rights policy has fallen on those nations that are poor enough and friendly enough to need and be eligible for U.S. aid.

But they are not strategically or economically important to this country. Neither are they in the forefront of human rights violation. Thus, Chile has been singled out in legislation as a human rights violator and has had penalties imposed on it through legislation far more severe than those imposed upon North Korea, and China, for example. Indeed, the United States has recently approved the sale of certain defense articles to China and is encouraging military sales to China by France and the United Kingdom.

Third. These restrictions do not help the victims of human rights violation.

In March 1978, a delegation from the House Committee on Banking, Finance and Urban Affairs, in a letter to the President reporting on their visit to Latin America, stated:

The people of the countries we visited seem to believe that moral suasion and the power of world opinion were more effective in

achieving progress toward human rights than economic sanctions imposed indirectly by the United States through its participation in multilateral lending institutions and directly by the United States through its bilateral aid and/or military sales and credit programs . . .

We think the Congress may have overreacted in attempting to put these statements of principle into legislative form . . . in a way that is not only detrimental to the United States but also the people about whose human rights we are concerned.

Fourth. This legislation has penalized the U.S. economy and bolstered the economies of other nations.

Traditional trading patterns between the United States and Chile have been permanently altered. Other nations have eagerly stepped in to supply the items which we have denied.

Other nations do not attempt to export their morality, and the products we deny Chile have been easily obtained from other nations. The United States is perceived as an unreliable supplier and so our commercial sales have also been affected.

Fifth. This restriction is counterproductive.

This embargo—and that is what it is—calls into question the reliability of the United States as a supplier, particularly if we deny spare parts for U.S. origin equipment previously furnished. By denying this equipment, we encourage countries to turn to other suppliers for replacement equipment. In the process, the new equipment being provided by other suppliers is inevitably more sophisticated, working in opposition to our efforts at conventional arms restraint.

The new equipment is also more costly, impacting adversely on the economy of Chile. In addition, we encourage the development of indigenous arms industries, further reducing opportunities for restraint.

Sixth. This restriction has diluted the longstanding mutual security relationship embodied in the Rio Pact. And. probably most important, we sacrificed U.S. influence as a stabilizing factor in an increasingly important area of the world.

Mr. President, who will be affected by repeal of this restriction? Let me suggest a few:

First. All industries and unions in the United States that are involved in the production and export of medium and high technology products—particularly the electronics, general aviation, commercial aviation, heavy electrical, and specialized computer industries will be affected.

Second. The U.S. balance of trade will benefit, thus reducing inflation at home and strengthening the dollar in the international marketplace.

Third. U.S. diplomatic relations and influence will be restored in an important area of the world and with a country that is obviously demonstrably inclined to be friendly to the United States.

Mr. President, I believe the time has come to rescind the prohibition on military sales and assistance to Chile. Chile has been working hard to restore stability and prosperity. Although Chile has not restored the same level of political freedoms that we enjoy in the United States, it has restored the framework of law and order to make it possible to depoliticize the highly charged atmosphere of a country torn apart.

Chileans are making good progress, and they have endorsed that progress recently by overwhelmingly approving a referendum for the new Chilean constitution, which brings us to the pending amendment cosponsored by the Senator from North Carolina and the able Senator from South Carolina (Mr. THURMOND.)

This amendment, would repeal section 406 of the Foreign Assistance Act. There is no need to have a special section of the law aimed at one particular country. We already have statutory provisions that take care of human rights concerns and arms exports concerns, so in fact section 406 is redundant.

Mr. President, Chile has made progress in the human rights field in recent years. According to the country report on human rights practices filed with the U.S. State Department this past February, "there has been improvement since 1977 in the treatment of prisoners and general police procedures." The report also notes that there have been no confirmed disappearances since 1977. The report notes that Chile "respects freedom of religion" and that the "Jewish community reports full freedom and toleration." In addition, the report notes a 1979 annual report by the Inter-American Press Association which stated that improvements in press freedom had been registered in Chile.

Mr. President, since 1973, Chile has registered such great accomplishments in economic recovery and growth that the Chilean economic miracle has earned its place in the annals of economic progress in the New World.

On her recent tour of South America, Jeane Kirkpatrick, our Ambassador to the United Nations, remarked that the great accomplishments borne of Chile's free enterprise approach to economic development have not received adequate international attention.

Mr. President, it is certainly time that we in these United States take note of the great changes which have occurred in Chile since the dark and turbulent days of the Allende regime. It is time that we take note of the great strides in economic progress that have resulted from prudent governmental policy in Chile. Further, it is certainly time that the international community recognizes the Chilean case as a demonstration of the success of the free enterprise approach in releasing the productive powers of a nation in order to build a prosperous and stable economy for the benefit of all citizens.

Now there are those in this world, Mr. President, who would prefer that the Chilean economic miracle never happened. They would prefer that the Chilean economic miracle never happened because it poses a serious challenge to their own orientation and preference for Marxism. This would include, of course, Marxism in any of its variations. That is to say Fabian Socialist Marxism, so-called Humanist Marxism, and Marxist-Leninism of the Soviet or Red Chinese varieties, for example.

The Chilean economic miracle is a demonstration of the fact that the free enterprise system, based on freedom of economic initiative and private property, is the greatest means that man has ever devised to raise his standard of living and quality of life on this Earth.

Mr. President, a brief review of a few facts about the Chilean economy will illustrate the progress made in recent years.

The inflation rate in Chile was 580 percent during the last days of the Marxist-influenced Allende regime. Since then, under a prudent and determined governmental policy, the inflation rate was reduced to 30 percent by the end of last year. By the middle of this year, the cumulative rate of increase in the Consumer Price Index (CPI) was 6 percent. According to a number of analysts, the yearend rate may be in the range of 10 to 15 percent. The Chilean Minister of Finance, Mr. Sergio de Castro, has himself stated that the 1981 inflation rate might even be under 10 percent. The Chilean achievement in the reduction of inflation is certainly one of epic proportions Mr. President. I might add that our own inflation rate, though historically much lower than that of Chile, has in recent years caused great hardship to our own citizens. One can imagine the hardship endured by the Chilean people under astronomical rates of inflation and the relief that they must now feel as inflation has been brought under control by their government's policies.

Not only has Chile been able to drastically lower her rates of inflation, Mr. President, but Chile has been able to improve her balance-of-payments position as well as achieve an annual average rate of economic growth of some 7 percent. Real wages have constantly increased, employment levels have conconstantly increased, and extreme poverty is being progressively eliminated.

Industrial production in Chile has also registered substantial gains. During the first 5 months of 1981, industrial production grew by 2.7 percent compared to the same period last year. Sales grew in 20 of the 30 major areas of activity which comprise the industrial index. In 13 of these areas, sales grew by more than 6 percent.

Chilean achievements in the field of energy exploration and development are significant. In 1978, Chile imported 80 percent of her needs while this year imports are estimated to be about 50 percent. The National Petroleum Co., of Chile has increased its production by 25 percent over 1980 levels. Diligent exploration has paved the way for a number of new wells in very promising fields.

In the field of agriculture, the Government is systematically transferring formerly governmental functions to the private sector. By the end of this year, all 10 agricultural institutes in Chile will have their administrative functions taken over by an entity tied to the private sector. The purpose of the transfers is to more effectively link agricultural

education to farmers and to the farming organizations which will later employ institute graduates. Curriculum and educational practices are to keep pace with changes in agricultural development. These institutes will serve as meeting places for farmers and will serve as centers of activity for farmers and residents of the regions involved.

The most dynamic area of Chilean economic progress has been the construction sector for the last 2 years. Total new construction in 1980 rose 36.9 percent above 1979. In 1979, total area constructed rose 34.7 percent over 1978 and raised construction's contribution to the gross domestic product by 26 percent.

Housing starts in the greater Santiago area between January and May of this year rose by 97.3 percent over 1980. The 1980 increase was itself 58.6 percent over 1979. The Government's policy to ease the current housing shortage is to encourage private enterprise to construct some 900,000 units by 1990.

Mr. President, these are but a few of the many examples which illustrate the economic progress made in Chile in recent years. Time prevents me from entering into a more detailed survey of the facts. But I must state again, Mr. President, that the Chilean economic miracle has certainly earned its place in the annals of economic progress in the New World.

Through the free enterprise system, the productive powers of the nation have been released to advance the standard of living and the quality of life in Chile.

I must add, Mr. President, that every day of every year the wrongness and failure of the Soviet system is revealed to the world. The Polish case is but a symptom of the failure of communism and a demonstration of the human misery engendered by Communist tyranny.

In our own hemisphere, Mr. President, we have the Chilean example of what people can accomplish after throwing off the chains of Marxism and then fostering productive capitalism. Every day in this New World, Mr. President, the people of Chile are showing what economic progress can be made under the free enterprise system.

The people of the free world, Mr. President, owe a debt of gratitude to the Chilean people for their courageous and determined efforts to build a better life and for demonstrating to the peoples of the entire world the advantages of the free enterprise system and productive capitalism.

Mr. President, I have been told that the distinguished Senator from Massachusetts needs to catch a plane, at least that is my understanding. I yield.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, just to start by correcting the record, the Senator from Massachusetts is not intending to catch any plane. He did catch a plane earlier this morning and made a scheduled stop.

But the Senator from Massachusetts welcomes the opportunity to spend whatever time is necessary to debate and discuss this extremely important issue.

I wish first of all to inquire of the Senator from North Carolina if he would like to read section 706. Does he have section 706 in front of him? The 1976 Kennedy amendment on Chile is section 406, and the description given by the Senator from North Carolina of the Kennedy amendment has little resemblance to that amendment. The Senator has misstated the title and the section, as well as the amendment itself.

Mr. President, first of all I think it is important for us to realize that no country in the world is automatically entitled, as a right, to American military assistance.

I wonder why we hear from the Senator from North Carolina, time in and time out, how we are violating the rights of the Argentine people or Argentine Government or the Chilean people or Chilean Government because we are not guaranteeing them military assistance.

Why is it, if we provide military assistance, we are not interfering in their internal affairs and yet, if we deny them military assistance, we are interfering in their affairs? What is possibly the logic of that particular argument?

The amendment that was adopted in 1976, applied to security assistance and military sales. And it is included in section 406 in the Foreign Assistance Act.

For the benefit of the Senate, I shall review the recent history of our relations with Chile. The Senator from North Carolina talks about the progress in human rights in Chile during the past year. The Senator could not have read the Department of State's report on the human rights practices of Chile during the last year or he never could have made the statement or given the assurances, which he just did, to the Members of the Senate on that particular item. I will refer to those in just a few moments. But there are some other factors that I wish to mention first.

Has it been so long since assassins were working here in the United States for the Chilean Government? That is not just a finding of the Senator from Massachusetts, that is documented in the Department of State's human rights report. On page 379 the report says:

The Chilean Government has failed to investigate fully and prosecute three former security officers indicted in the U.S. for complicity in the 1976 assassination of ex-Ambassador to the United States Orlando Letelier and U.S. citizen Ronni Moffitt.

Can people forget so quickly and through their silence condone such a brutal act of terrorism? I would emphasize to my colleagues that there is absolutely no question of the responsibility of the Chilean regime for the planning and financing of this act of terrorism. I would include at this point in the RECORD, and I ask unanimous consent to do so, a detailed chronology of the events related to the assassinations of Orlando Letelier and Ronnie Moffitt.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE LETELIER CASE: A PRE- AND POST-ASSASSINATION CHRONOLOGY 1976

Late June, 1976—Gen. Vernon Walters visits Paraguay; meets with Stroessner aide, Pappalardo on CIA related matters.

July (first week) 1976—Chilean secret police chief, Manuel Contreras, orders DINA agents Michael Townley and Armando Fernandez to go to Paraguay and obtain false Paraguayan passports for a mission to Washintgon, D.C. to kill Orlando Letelier. Telegram from "Condor One" (Contreras) sent to Chief of Paraguayan Intelligence Guanes to notify of their impending arrival.

July 20–24, 1976—Townley and Fernandez, alias Andres Wilson and Alejandro Rivadeneira arrive in Asuncion, Paraguay, and meet with Paraguayan officials and explain mission to U.S. in various ways, among them they are going to be in contact with the CIA in Washington.

July 21–24, 1976—Colonel Benito Guanes, head of Paraguayan military intelligence, told two Chilean officers need passports to purchase weapons in U.S. and that the CIA will help them there; he calls Conrado Pappalardo, Paraguayan Chief of Protocol and high advisor to President Stroessner, to request assistance in obtaining U.S. visas for Townley and Fernandez. Pappalardo tells Guanes they will have to wait until Ambassador George Landau returns to Asuncion on July 26.

July 26, 1976—Townley and Fernandez meet with Pappalardo at the Government Palace. Papalardo assures them that he will obtain U.S. visas for them and he gives them the phone number of CIA Deputy Director Gen. Vernon Walters to call while they are in Washington. Townley and Fernandez sign their passports, Juan Williams and Alejandro Romeral.

July 26, 1976—Pappalardo tells Landau that President Stroessner had received a request from Gen. Pinochet personally to facilitate the trip of two Chilean agents to the U.S. for surveillance of several private commercial firms. Pappalardo asks for visas and tells Landau the two agents will be in touch with Walters in Washington, which Landau understands as CIA awareness of the Chileans' operation.

July 27, 1976—Landau personally authorizes visas a Alejandro Romeral, and a Juan Williams, but as a precaution photographs the passports, unbeknownst to Townley and Fernandez. Townley and Fernandez pick up B–2 (special) visas signed by U.S. consular officer, William F. Finnigan. The usual requirements for interviews and photos are waived. After contacting DINA in Chile, Townley and Fernandez are ordered to return to Santiago, instead of going to Washington.

July 27, 1976—Ambassador Landau sends photocopies of the passports to CIA deputy director, Vernon Walters by courier pouch.

July 28, 1976—Landau sends a cable to Walters "outlining the whole matter and suggesting that I presumed that this matter fell within the scope of his agency and that he was aware of all this." (Landau's deposition)

July 28 or 29—Landau receives a "service message" from CIA acknowledging receipt of his cable and stating that it had been "delivered to George Bush, the Director of the Central Intelligence Agency, because General Walters was no longer with the Agency." (Landau testimony)

August 4, 1976—Landau receives a reply from General Walters stating that "he considered this an odd way to do business . . . that he was unaware of the visit and that his agency did not desire to have any contact with the Chileans." (Landau deposition)

August 4, 1976—Landau calls Pappalardo and tells him that the visas are revoked and that a "visa look out had already been issued and the people would be denied entry upon arrival in the U.S. if they attempted entry." Landau asks Pappalardo to retrieve the passports and return them to him.

August 6, 1976—Chile desk officer at the State Department, Robert Driscoll receives a memo from CIA along with copies of the passports sent by Ambassador Landau.

The memo reads: Memo to Harry Schlaudeman from CIA. Subject: Transmittal of photos and negatives of Paraguayan passports. We are forwarding photographs and negatives of two Paraguayan passports which were recently sent to Washington from Asuncion.

August 17, 1976—The U.S. consulate in Santiago, Chile, processes four official Chilean visa requests for: Armando Faundez Lyon; Liliana Walker Martinez; Juan Williams Rose and Alejandro Romeral Jara. A few days later a fifth passport in the name Hans Petersen Silva is issued and an official U.S. visa is stamped in it.

August 22, 1976—DINA agents Rene Riveros and Rolando Mosqueira, using the aliases Romeral and Williams (the names used by Townley and Fernandez earlier in Paraguay), arrive in Miami. They are not stopped by immigration officials, although their arrival is detected. They show a high profile at the Chilean embassy in Washington, D.C. for several days, including telephone contact with the CIA in an attempt to reach Gen. Walters. State Dept. Chile desk officer Robert Driscoll also learns of their presence in Washington.

August 26, 1976—Fernandez, posing as Armando Faundez, and the DINA agent using the alias Liliana Walker arrive in the U.S. "to conduct surveillance on Letelier" according to the FBI.

September 9, 1976—Townley, alias Hans Peterson Silva, arrives in the U.S. on the mission to make contact with Cuban exile terrorists to aid him in assassinating Letelier.

September 19, 1976—Townley places the bomb under Letelier's car.

September 21, 1976—Letelier and Moffitt are assassinated.

THE INVESTIGATION

September 28, 1976—FBI headquarters receives a cable from special agent Robert Scherrer in Buenos Aires outlining the existence of a Latin American intelligence network code named "Operation Condor". The cable states: "It is not beyond the realm of possibility that the recent assassination of Orlando Letelier in Washington, D.C. may have been carried out as a third phase action of "Operation Condor."

October 4, 1976—Special prosecutor Eugene Propper meets with CIA Director, George Bush and CIA general council, Anthony Lapham. Bush pledges CIA cooperation but does not reveal his knowledge of the covert mission of Romeral and Williams from Paraguay nor CIA awareness that two men using those names had entered the U.S. on August 22nd.

October 11, 1976—Newsweek, using CIA sources, states that "The CIA has concluded that the Chilean secret police were not involved in the death of Orlando Letelier." (Newsweek: "Periscope" Oct. 11, 1976). Nearly identical information appeared in the Washington Post, Washington Star and the NY Times at about the same time.

October 21, 1976—A memo is sent from the State Department to the FBI informing them of the Paraguayan incident. The memo was accompanied by secret attachments, probably copies of the passports. It read:

Attached are several documents for two individuals who obtained Paraguayan passports and who solicited and obtained visas to enter the U.S. under false pretenses.

The visas were issued at Asuncion, Paraguay but the two individuals subsequently entered the U.S. at Miami on August 22, bearing A-2 diplomatic passports and visas issued at Santiago, Chile to Chilean passports.

(Enclosures as stated.)

Signed: Bill

This memo fails to inform the FBI that the "two individuals" were Chilean army officers on an intelligence mission, information conveyed to the State Department and the CIA Ambassador Landau.

November 11, 1976—Chile desk officer, Robert Driscoll sends a memo telling his superior, Harry Schlaudeman about his information on Romeral and William's presence in Washington around the time of the assassination. Schlaudeman orders him to turn over his information to the FBI. But Driscoll does not.

July, 1977—Cuban exile Rolando Otero identified "Williams" picture as that of a DINA agent who interviewed him in early 1976 in Santiago. New Chile desk officer, Robert Stevens, turns over original Landau cable (July 28, 1976) to Eugene Propper, allowing Propper to learn for the first time the full extent of what transpired in Paraguay.

November 29, 1977—The pictures of Romeral and Williams are sent by the FBI to special agent Robert Scherrer in Buenos Aires.

December 11, 1977—Scherrer receives Romeral and Williams pictures.

February 17, 1978—Assistant Secretary of State, Warren Christopher meets with Chilean ambassador, Jorge Cauas, and asks Chile to produce Romeral and Williams for questioning.

March, 1978—FBI agent Scherrer discovers that Townley's picture has been ripped off of U.S. citizens registration card at the U.S. consulate in Santiago.

March 3, 1978—The Washington Star publishes the passport pictures of Romeral and William:. Michael Townley is recognized and identified by a Santiago journalist.

March 20, 1978—Ambassador Landau (now ambassador to Chile) turns over the original Paraguayan passports of Romeral and Williams to Scherrer.

April 8, 1978—Michael Townley is turned over to FBI agents in Chile.

April 14, 1978—Cuban exile accomplices Alvin Ross and Guillermo Novo are arrested in the United States.

January, 1979—The U.S. requests the extradition of DINA chief Manuel Contreras, and DINA agents, Pedro Espinosa and Armando Fernandez to stand trial in the assassination of Letelier and Moffitt.

February 14, 1979—Guillermo and Ignacio Novo, and Alvin Ross are convicted. Townley plea-bargains with the U.S. government a maximum 10-year sentence with the possibility of parole after 36 months.

May 16, 1979—Chilean Supreme Court Justice Borquez rules that the U.S. claim for extradition is groundless and denies extradition of the three DINA officials.

October 1, 1979—Borquez ruling is upheld by the Chilean Supreme Court.

November 30, 1979—The Carter Administration announces a set of minimal sanctions against the Pinochet regime for refusing to extradite Contreras, Fernandez and Espinoza.

September 16, 1980—Conviction of Cubans found guilty of conspiracy in Letelier-Moffitt assassination overturned by a panel of the U.S. Court of Appeals.

November 5, 1980—Federal Judge Joyce Hens Green found the Chilean government responsible for the assassination of Orlando Letelier and Ronni Moffitt and ordered the Chilean government to pay $4.9 million in damages to the Letelier and Moffitt families. In her opinion, Judge Green wrote, "Whatever policy options may exist for a foreign country, it has no 'discretion' to perpetrate conduct designed to result in the assassination of individual or individuals, action that is clearly contrary to the precepts of humanity as recognized in both national and international law."

To this day, the Chilean government has failed to comply with the orders of U.S. District Court to pay damages for their responsibility in the Letelier-Moffitt assassination.

February 20, 1981—The Reagan administration announces its decision to lift sanctions imposed on Chile for their refusal to extradite Chilean officials implicated in Letelier-Moffitt assassination.

May 5, 1981—New trial of Cubans commences.

May 31, 1981—Cubans are acquitted of charges in conspiracy to murder Letelier and Moffitt.

A Federal grand jury indicted the former head of the Chilean secret police and other Chilean officers. Every knowledgeable agency of the U.S. Government has concurred in the direct responsibility of the Government of Chile for this assassination.

What has been the response of the regime in Chile? Steadfast refusal to extradite those accused of the assassination. And what actions has the administration taken? It has reversed the earlier U.S. Government stance and now extends export-import credits to Chile, ignoring the anti-terrorist provision of the law. It no longer casts votes against Chile in international financial institutions. And now we have a proposal to remove the final restrictions and provide military support as well.

This represents a mockery of U.S. policy in opposition to state-supported terrorism. I do not believe that we in the U.S. Senate want to be a part of this mockery. Our message must be loud and clear—that we stand against the human rights violations and against acts of terrorism as practised by the regime in Chile.

A change in U.S. policy toward the military regime in Chile will hearten and encourage those nations and leaders who condone and use terrorism—a change in direct contradiction to this administration's stated policy to stand against international terrorism. Such leaders will see that if they engage in terrorism even in the United States—resulting in the death of Americans—there will be no penalty in relations with the United States after a brief passage of time.

This is too important an issue for the Senate to consider without careful study and recommendations by the committee. Unlike Argentina which was considered first by the committee, the situation in Chile was not, and it involves a military junta which has sponsored acts of terrorism including the assassination of an American citizen and an American resident on the streets of Washington.

I therefore believe the Senate should table this amendment pending a full review and recommendations from the committee on U.S. security assistance to Chile.

I ask my colleagues to recall with me the history of this provision of law and, more importantly, the record of this regime and its standing in the international community. These show indisputably that there are many strong reasons for not removing the prohibition against sending weapons or other security assistance to this nation. They include the Chilian junta's disregard of international legal obligations, its violation of fundamental human rights, its denial of labor union freedoms, its restrictions on the press, its continued authoritarian rejection of any free political process, and its proven responsibility for planning, funding and carrying out an assassination by its own henchmen of a foreign diplomat and an American citizen here in Washington, D.C.

Mr. President, the committee has neither discussed nor held hearings on

this issue. The committee has not reviewed the current situation in Chile, developments since the legislation first passed, or the implications of any change.

These are reasons far in excess of the necessary justification to reject the amendment offered today.

Simply stated, sending military arms, equipment, and other assistance to the regime of General Pinochet is fundamentally contrary to the foreign policy interests of the United States.

First, a change in U.S. policy will be a clear and unmistakeable message to governments and political leaders throughout the world—that the United States no longer places major importance on protecting basic human rights. Our friends in Western Europe, Asia, Africa, and Latin America will conclude that the U.S. Government is no longer concerned with human rights in its foreign policy.

As a result, the next time we seek to press the Soviet, the Cuban or other governments to release political prisoners, our task will be more difficult. Every time we seek to encourage other countries to move toward greater freedom, both for the sake of their own people and to avoid dangerous and destabilizing polarization, our argument will carry less force.

Second, the military junta of Chile continues to engage in harassment of Chilean refugees in the United States and to disregard the basic rights of American residents and foreign travelers.

On February 23, 1967, an American resident, Edgardo Onate Parra, married to an American citizen, went to Chile to visit his elderly parents. Originally a Chilean refugee, he had waited these 6 years, hoping that the situation in Chile might have changed. When the Government of Chile extended him a visa, he assumed that he could finally visit his parents without fear. Instead, on arrival, he was arrested and tortured. For 5 days he was held by Chilean secret police, beaten and tortured with electric shocks. Only strong international pressure and the personal intervention of Ambassador George Landau succeeded in securing his release

What was it that the secret police wanted of this man who had been away from Chile for so long? Under torture, they showed him pictures of other Chilean exiles in the United States, pressing him to identify the faces and give the names of refugees and of American citizens who have protested human rights violations by the Chilean Government here in the United States.

This event did not happen 6 years ago. It happened 6 months ago. I do not believe that we want to lift the restrictions on military aid, so soon after the Government of Chile has flagrantly violated the rights of an American resident.

Third, the Chilean junta is an enemy of free discussion and dissent—principles at the root of our tradition of freedom here in America as they were previously in a democratic Chile. Private citizens are fair game for imprisonment and torture. And it is these innocent victims who suffer the most.

According to the Chilean Committee for Human Rights, on January 24 of this year plainclothes policemen apprehended a couple, Arturo García and Carmen Escolór, and their 16-month-old daughter. Apparently taken to intimidate her parents, the baby was returned to her grandmother 12 days later with blisters on her body and in a state of terror.

There is systematic repression of the church and its offices in Chile. The strongest voice of moderation within the country—the Vicaria de la Solidaridad of the Catholic Church—is under extreme pressure to stop speaking out for otherwise helpless victims of torture in Chile. Three distinguished Chilean physicians working with the Vicaría to treat those subjected to torture and their families—Dr. Manuel Almeyda Medina, Dr. Patricio Arroyo Pinochet, and Dr. Pedro Castillo—were detained by secret police between May 19 and 27, and held incommunicado in secret detention centers until they appeared on June 7 in a public jail. During this time their eyes were taped shut and they were held in solitary confinement in tiny cells. They were allowed 3 minutes a day for personal hygiene.

These physicians have since been released due to domestic and international pressure. The Catholic Church in Chile, the Chilean Committee on Human Rights, and five North American health and professional associations, who sent a team of two American physicians to investigate, have said that these brave men were prosecuted for their concern and treatment of victims of torture.

In all of these cases I have cited and hundreds more in this year alone, victims are held without charge under the Chilean constitution. This is the same constitution designed to perpetuate General Pinochet's strong arm rule until 1988, and the military junta in Chile into the 1990's.

Not only does the new constitution fail to provide for basic human rights, but the Chilean junta itself acts in disregard of even these laws in its persecution of those who stand for human rights.

I had the opportunity recently to meet with Jaime Castillo Velasco, the former Chilean minister of justice and Chilean attorney for the family of Orlando Letelier. Mr. Castillo explained to me his cruel expulsion from Chile just 2 days after U.N. Ambassador Jeane Kirkpatrick's July visit with General Pinochet and members of the junta. He told me that even by junta standards this was an illegal act: Under the junta's constitution they cannot expel an attorney working on a case which is pending in court, and the Letelier case on which Mr. Castillo was working was on appeal to the highest military court. Since Jaime Castillo's sudden exile, the appeal has been rejected, and Mr. Castillo was unable to appeal the case to the Chilean supreme court because the Chilean junta denied an extension of the normal 5-day appeal time and also refused to permit Mr. Castillo to return. This flagrant intervention into judicial proceedings has severely damaged both human rights and the rule of law in Chile.

Finally, our action to change U.S. policy toward Chile would undermine the efforts of respected international institutions, voluntary organizations, and other groups which are actively working to improve the human rights situation not only in Chile but throughout the world. Chile has been the subject of investigations and condemnations by many of these institutions. Their reports of abuses and violations are extensive and well-documented.

Only a few months ago, the International Labor Organization condemned violations of human rights in the Soviet Union. That action represented a thoroughly appropriate denunciation of Soviet disregard for the right of workers. The ILO also has condemned the Government of Chile for its violations of labor freedoms—ranging from the torture and killing of labor leaders to the disbanding of labor unions. There have been similar reports by the Inter-American Human Rights Commission, the United Nations Human Rights Commission, and others.

The same concerns have been expressed by many nongovernmental groups, including Amnesty International, the International League for Human Rights, Freedom House, and the International Human Rights law group. All have issued documented statements of human rights violations by the Government of Chile.

These respected international institutions, voluntary agencies, and private organizations work in the fact of almost insurmountable obstacles to try to improve the human rights situation throughout the world. They face relentless opposition by such regimes as the one in Chile which refuses to cooperate with the U.N. Human Rights Commission. While these regimes may take a hardline position in public, we know they are often, in private, alert to international criticism and often take actions which they would not otherwise do to lessen international pressure. U.S. action to change our policy toward Chile without question would encourage these regimes and other such governments to ignore international pressure and, in effect, continue their repressive human rights policies. A change in the U.S. position will undermine the efforts of all these international institutions and organizations at the very time we should be taking action to bolster their position.

In conclusion, I would note for my colleagues that the general human rights situation in Chile over the past year has deteriorated. There have been more detentions, more people held incommunicado, more people sent to internal and external exile, more torture, and more restrictions of basic civil rights this year than last. The 1980 human rights report on Chile published by the U.S. State Department documents this tragic human rights situation.

Mr. President, I will only read a few of the pertinent parts, but I ask unanimous consent to have full text of the Country Report on Human Rights Practices in Chile printed in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

79-059 O-85-14 (Pt. 19)

COUNTRY REPORTS ON HUMAN RIGHTS PRACTICES

CHILE

Chilean democracy came under increasing strains from the 1950s onwards as the result of rapid growth in political participation, slow economic growth and endemic inflation. In September 1973, as the result of severe economic dislocation and increasing violence broad opposition developed to the elected Allende government. The armed forces broke with their tradition of non-interference in politics and overthrew the government. The trauma of the Allende period (1970–73) and the view that his policies were leading to a Marxist state continue to influence the attitudes of many Chileans.

Rather than returning power to civilians after the coup, the military, led by General Augusto Pinochet, embarked on a wide-ranging effort to change the Chilean political and economic systems. In the period 1973–77, the regime undertook to curb dissent through a series of repressive measures, unprecedented in contemporary Chilean history. These included mass arrests, torture, exile and the disappearance of hundreds of persons. This period also saw the banning of political parties, the suspension of labor rights, the closing of many newspapers and radio stations, and the purging of the educational system.

There have been no confirmed "disappearances" since October 1977. Arbitrary detention and cases of torture continued to occur in 1980 although there has been improvement since 1977 in the treatment of prisoners and general police procedures. Political parties remain formally dissolved, and basic freedoms of speech and assembly are restricted, although some political activity, criticism and limited press discussion is tolerated. Labor union activity continues to be under some restraints, but collective bargaining and the right to strike were restored, subject to new limitations by the 1979 labor law. The continuing "state of emergency," extended regularly every six months, gives the government extraordinary authority similar to that under a state of siege. The right to due process was weakened further in 1980. By means of decree laws, the government reinstituted executive-ordered internal exile for periods of up to three months; further, the authorized period of detention without formal charges was extended from five to twenty days in internal security law violations involving death, injury or kidnapping. In several instances, however, the courts and press have taken positions defending human rights.

Following two years of relative calm, Chile suffered a moderate increase in extremist violence during 1980, including armed robberies, attacks and bombings in which three carabineros, an army officer and several innocent bystanders were killed. While increasingly active Movement of the Revolutionary Left (MIR) groups have claimed credit for some of these incidents, their involvement in others, particularly the assassination of an army officer in July, has not been established. A few MIR members have died in gun battles with police. Suspicions that rightist extremists are also active continue in the absence of any breakthroughs in solving these major cases. In July the government detained approximately 20 civilian police detectives, reportedly associated with a right-wing organization, in connection with a series of kidnappings in which some of the victims were tortured and a university student was beaten to death; the matter is now in the hands of the civilian courts, but no charges have yet been brought for the death. Two have been charged for one of the kidnappings.

With respect to socio-economic policy, the administration decided in 1975 to reduce the role of government, open the economy to world market competition and reform taxation. GNP growth has since averaged more than 7 percent per year in real terms, inflation has declined from over 300 percent to about 30 percent, unemployment has declined gradually from just under 20 percent to about 10 percent and real wages have increased more than 80 percent. High growth rates and better tax collection have enabled the government to increase social spending both in real terms and by comparison with previous periods in Chilean history. Social spending is now targeted primarily at the poorest 20 to 25 percent of the population. An important effort in health and nutrition programs has cut the infant mortality rate in half from 1973 to 1979. The government has increased real spending at all levels of education, including university education, but has increased the percentage allocated to pre-primary, primary and intermediate levels in order to eliminate illiteracy.

In September 1980, the government held a plebiscite seeking approval (by means of a simple yes or no vote) of a new constitution and political transition plan. The plan restores congressional elections in 1990 and regular presidential elections in 1997. In 1989 there will be another plebiscite on a junta-proposed candidate for president until 1997. The alternative to approval was continuance of the status quo. Approximately 93 percent of eligible voters cast ballots; 66 percent voted "yes", 30 percent voted "no", 1 percent cast blank ballots and 3 percent cast void ballots. Opposition leaders criticized the content and procedures of the plebiscite, arguing that it did not permit free debate or a meaningful choice, and that opponents did not have equitable access to the communications media. The new constitution is to take limited effect beginning in March 1981.

1. Respect for the Integrity of the Person, Including Freedom from:

a. Torture.—The 1925 constitution forbids torture. Constitutional Act No. 3, issued in September 1976 to strengthen and perfect the rights recognized in the 1925 document, recognizes the right to life and integrity of the person and forbids the application of all illegal constraints. High-level government officials publicly and privately deny that the use of torture by government agents is authorized. Reports of torture declined from 1976 through early 1980. Since then, paralleling an increase in extremist violence, reported incidents of torture increased. At least 100 incidents of torture were reported to human rights organizations in 1980—with most individuals alleging psychological duress, beatings and the use of electric shock during interrogation by members of the National Information Center (CNI) or civilian police. While in some cases questions can be raised about the validity of the allegations, in other cases there is no apparent reason for the individuals to make false claims. According to such accounts torture was applied on the first and second day of detention to allow sufficient time for full recovery before release.

Local human rights organizations have expressed concern that the lengthening of the period of executive detention from five to 20 days in internal security law violations involving murder or kidnapping could facilitate more sustained physical abuse.

b. Cruel, Inhuman or Degrading Treatment or Punishment.—Human rights sources report that during the first ten months of 1980 the courts received 96 complaints of serious mistreatment including torture. Three men have died since November 1979 while in the custody of civilian police. Accounts by relatives suggest that physical abuse by police was the cause; the cases are under investigation but no persons have been indicted. While a large percentage of detainees report correct treatment, some persons detained during peaceful demonstrations or otherwise picked up on suspicion of proscribed political activities, have complained of beatings and being forced to remain unclothed for extended periods of time. The living conditions of the various locations to which the government has ordered individuals into internal exile vary considerably.

In prison, persons detained for political or terrorist activities are normally separated by cell blocks from common criminals. They are able to receive visits from, and communicate with, family, friends, legal counsel and representatives of the International Committee of the Red Cross (ICRC).

c. Disappearances.—The last reported "disappearances" occurred in 1977. About 635 cases from the period 1973–1977 remain unresolved. Although the Chilean supreme court appointed special judges in 1979 to investigate many of these disappearances, no one has been formally indicted. This year, the supreme court confirmed that the general amnesty declared in 1978 applied to the policemen identified as having executed sixteen persons and deposited the bodies in a lime kiln at Lonquen in 1973. The special judges are continuing investigations into some cases, have suspended action in numerous others, and have referred still others to military justice when the military or police are believed to have been involved. Some families of the disappeared have appealed the suspension or referral to the military courts. To date, the appeals have had little effect in resolving the whereabouts of their relatives.

d. Arbitrary Arrest and Imprisonment.—Although the government has denied holding political prisoners, there are more than 100 persons formally sentenced or in trial process for seditious activity. Most are accused of violating either the Internal Security Law or the Arms Control Law, or both. Some cases date from before the military takeover. In 1980 a few of those who had been sentenced were allowed to exchange prison for exile.

People detained for participating in banned public demonstrations or illegal meetings are often held for the full five days permitted under executive discretion and then may be released (the large majority of cases), sent into internal exile, or charged with internal security violations. In those cases reaching the courts, the investigating judges may take up to five more days to deliberate but, in practice, have rarely issued indictments.

When people are detained, friends or relatives normally report the detentions, the press publicizes them and the government eventually acknowledges them. According to studies compiled by church human rights reports, a total of 729 persons were detained in Chile during the first six months of 1980. For the subsequent period of mid-July through mid-September, which included activities related to the September 11 plebiscite, about 350 detentions occurred—including those individuals picked up and subsequently released within a matter of hours.

In theory, the right of habeas corpus (writ of amparo) exists; however, in internal security cases the courts often do not act on such petitions in either a rigorous or timely manner. Based upon a recommendation by the church in May 1980, the supreme court in June 1980 instructed lower and military courts to issue more expeditious and rigorous rulings on these writs. State of emergency provisions authorize the president, or minister of interior acting in his behalf, to order the executive detention of persons without charge for up to five days. Under a new decree law, this period can be prolonged to twenty days in internal security investigations involving murder, kidnapping or other injury. A few arrests not falling into this category have also resulted in detentions longer than five days. Civilian and military

courts have another five days, from the time of arraignment, to decide whether to indict.

Court investigations into the kidnappings and torture carried out in mid-1980 by civilian detectives, reportedly acting without authorization, have resulted in the indictments of two senior detectives, but only so far in relation to one of the women who was held. No one as yet has been charged in the kidnapping of the other persons, including the student who died from blows he received.

The intelligence service (CNI) has only limited legal authority to arrest people on its own initiative; in practice, it has been able to obtain vaguely-worded warrants which provide considerable latitude in making searches or arrests. The public concern aroused by the unauthorized kidnappings by civilian police has led to greater care by security agents to identify themselves and to show warrants when detaining people.

e. Denial of Fair Public Trial.—Chile's civilian judges are career officials and most have served in the judiciary since before the present military government took power in 1973. Since 1978, most violations of the ban on political activity and most cases relating to alleged human rights abuses have been handled in the civilian court system. A decree law of February 1980 shifted first instance jurisdiction for the prosecution of proscribed political activities from the appellate courts to the regular lower level proceedings of the criminal courts.

Civil court proceedings are conducted in accordance with Chile's civil code tradition. There is no trial by jury; reliance is placed on the written record. In the criminal courts of first instance, a judge serves multiple functions: as investigator, with the aid of the police or others; as prosecutor; as defense attorney, at times; and, ultimately, as the one who decides the innocence or guilt of the accused. Criminal proceedings begin when the court of the accused receives a report of a crime, or a complaint by interested parties, or when the judge begins an investigation. In the investigatory stage, the judge accumulates evidence in closed proceedings. The judge can either suspend the proceedings, in case of innocence, or name the presumptively guilty party. When the latter occurs, the proceedings move to a second, more open, stage which allows for defense rebuttal. Once these activities have been completed, the judge issues a finding of innocence or guilt with appropriate punishment. These decisions may be appealed up to the supreme court.

Criticisms of the functioning of civilian courts focus not on the procedures, but rather on the general unwillingness of judges to assert a vigorously independent role or, with rare exceptions, to effectively challenge the legality of actions by the executive under emergency powers. In cases involving alleged human rights abuses by uniformed personnel, civilian judges have frequently reached a determination that they lacked jurisdiction to proceed further. The Inter-American Human Rights Commission (IAHRC) reported in October 1980 that the rights to fair trial and of due process were subject to major significant restrictions—principally because of the active role of the military courts in judicial proceedings and the failure of the civil courts to exercise their responsibilities on behalf of detained persons.

Arms control violations go before a military prosecutor; he carries out the investigation and then makes recommendations to a military judge, who issues the decision. Appeals may be made to a military court of two civilian judges and three professional military judges and, in the last resort, to the supreme court. Defendants have the rights of any Chilean citizen before the law, including the right to legal counsel. An April 1979 anti-terrorist decree law makes all members of an organization responsible for the acts of each member and establishes legal presumption of guilt in cases covered by the decree; it has not been invoked, however.

f. Invasion of the Home.—The 1925 constitution and Constitutional Act. No. 3 prohibit searches of the home and interception of private communications and documents except as determined by law. Provisions in the penal code require search warrants issued by either a judge or military prosecutor for specific locations. In practice, however, such searches are carried out under a general order issued by the judge or prosecutor. Human rights organizations report that legal formalities, such as the display of a warrant, have not been observed by the authorities in a number of searches.

2. Government Policies Relating to the Fulfillment of Such Vital Needs as Food, Shelter, Health Care and Education:

Government policy aims at a rapidly growing free enterprise oriented economy in which most workers have increased real income, and public welfare spending is focused primarily on the poorest quarter of the population. In response to the foreign exchange crisis and a continuing high level of inflation, the government introduced a drastic austerity program in 1975. Also, copper prices declined by half between 1974 and 1975. The Chilean economy underwent its worst depression since the 1930's, hurting Chileans in every economic stratum. According to most analyses, the greatest hardships were borne by the lowest income groups although in relative terms middle and upper income groups suffered a greater fall in net income. The depression bottomed out in early 1976. Since then the economy has expanded at historically unprecedented rates.

Major policy changes which have been introduced in the last five years include reducing tariffs in stages to their present basic level of 10 percent, establishing a realistic exchange rate, returning many small and medium-sized nationalized companies to the private sector, reducing or eliminating various price controls, special interest subsidies and regulatory mechanisms, reducing and then eliminating deficit spending and radically altering taxation by indexing corporate and individual taxation, eliminating capital gains tax, double taxation of dividends, and various loopholes and substituting the previous cascading sales tax with a value added tax. From 1976 to 1979 real GDP growth averaged 8.3 percent per year—more than twice the historical average. By 1977, GDP in real terms had begun to surpass previous peak levels. Real GDP growth is estimated at 6.0 percent in 1980, and per capita GDP should surpass $1800. At the same time inflation has been brought down to 30 percent. Real wages increased 83 percent from 1976 through mid-1980. International reserves have accumulated to a net $2.4 billion.

The unemployment rate, however, remains high at 10.2 percent. It is down considerably from 19.6 percent reached in March 1976, at the bottom of the depression. The unemployment rate would be higher if it were not for the 5.1 percent of the labor force participating in the government s minimum employment program. This figure has more than doubled in the past year because of an eligibility liberalization which permits more than one member of a family to be enrolled in the program. The persistently high unemployment rate is attributable in part to the structural adjustments in the economy; there are also increased numbers of people, particularly women, in the labor force. A 1979 University of Chile study suggests that the poor have benefited proportionately more from the successes of Chilean economic policy. On either a personal or family income basis in the greater Santiago area, income of the most affluent 20 percent of the population has grown more slowly since 1976 than any other category while that of the poorest 20 percent has grown most rapidly. As a result, the degree of income concentration has declined since 1976 and is now approximately the same as at the start of the decade in 1970. Critics of the government's economic policies have argued that the income of the poor fell disproportionately between 1974 and 1976 and that wealth remains highly concentrated.

The government is attempting to make its social programs more effective by focusing its efforts on the poorest quarter of the population, considered to be in "extreme poverty." In late 1979, it established a social council of ministers to oversee a social coordination plan for fiscal expenditures on social welfare programs. The amount to be invested in 1980 is $2.64 billion, representing more than 50 percent of the total central government spending. This figure includes normal ministry budgeting in the social field and also a new $161 million emergency social fund intended for high-impact, high-visibility anti-poverty projects. These government expenditures will amount to $238 per capita, the highest (in constant dollars) in Chilean history. As part of its administrative reform effort, the government issued in June legal guidelines for transferring administrative responsibility for social services, including schools and health care facilities, to municipalities, while maintaining financial oversight.

In education, the government has given increasingly greater funding support to preprimary and intermediate levels, relative to the university level in order to increase the country's 90 percent literacy rate (77 percent in rural areas). During 1980, the government also instituted a new literacy campaign.

Government health and nutrition programs have led to a reduction in the incidence of malnutrition in the officially reported infantile population (less than six years of age) from 15.5 percent in 1975 to 12 percent in 1979 and in the incidence of advanced malnutrition from .7 to .2 percent. There were similar declines in infant mortality (from 65.2 to 36.3 per thousand live births) and maternal mortality at childbirth (from 1.32 to .73 thousand live births) from 1973 to 1979. Over the same period, the overall death rate per thousand fell from 8.4 to 6.8, increasing average life expectancy from 64.2 to 65.6 years.

Social security expenditures in real terms have continued to increase. Regulations have been changed to eliminate discrimination against blue collar workers, and benefits have been extended to a wider segment of the population, including 110,000 indigent elderly and handicapped, not previously eligible. In addition, in late 1980 a new social security plan was begun under which employees would pay 17 percent of their salary toward their pensions and life and health insurance, firms would increase salaries of these employees by 18 percent, and the funds collected would be invested by private companies in a limited range of triple-A type securities and investments. The employees pension and insurance money is protected by the requirement that the investment companies must contribute from their capital if their earnings fall 7 percent below the industry average and, failing this, the absorption of the company by other companies and a government contribution to make up the shortfall. The plan decreases the overall cost to the employee by 9.7 percent and strengthens the social security system by investing the funds in earning assets. Critics of the social security reforms argue that this will reduce some benefits. It should be noted that workers may choose voluntarily between moving to the new system and remaining under their current plan.

Public housing expenditures are small in comparison with evident needs. Although funding levels have risen since 1978, they still amount to little more than half of peak levels in 1973. At the same time, programs

have been overhauled to benefit the most needy rather than the middle class. In addition to expenditure policy, the government has also been revising the tax structure in favor of lower income categories; in a recent change, it raised the percentage of taxpayers totally exempt from income tax liability from 38 to 66 percent. The main thrust of the economic policy in housing is to encourage the private sector to fill this need. In 1980 construction of a record 50,000 residential units were started.

The impact of government economic policies on lower income portions of the population remains a controversial issue in Chile. On the one hand, it is argued that the present economic policies have not brought down the high level of unemployment fast enough, and the unemployed are mostly low skilled and low income. On the other hand, it is argued that Chile's historically endemic inflation and hyperinflation of the early 1970's had the most severe impact on low income people so that the present reduction of inflation has helped the poor. While the present regime is making a determined effort to channel more resources to poorer sectors, there remains a tremendous breach between resources and needs. A recent World Bank report noted, moreover, that the government's policies were directed primarily to the urban poor and barely addressed the problem of rural poverty.

According to statistics gathered by the University of Chile for the Santiago area (surveys have not been made for other regions), the proportion of income earning females over 14 years of age has been recovering from a sharp drop caused by the high unemployment of the mid-1970's. Although still slightly below the level reached in the early 1970's, the employment figure for women has recovered more rapidly than that for male wage earners. Women currently constitute 28.5 percent of the work force.

The education level of females appears to be improving more rapidly as well. The survey results for the Santiago area indicated that the proportion of females over 14 years of age with better than primary education rose from 41 percent in 1970 to 51 percent in 1978. At the same time, the corresponding figures for males, though still higher, increased from 48 percent to 57 percent.

Middle and upper class women generally have good access to education and entry-level professional jobs. Women do not occupy a proportional share of upper level decision making positions in the major institutions of government, business and academia. There are marked differences in the distribution of incomes for females in comparison with males. Among women, 29.8 percent (again, according to the Santiago survey) fell within the lowest income category and only 11.5 percent within the highest, whereas almost the reverse pertains to men. In the current government, there is one woman of cabinet rank and several just below the ministerial level. This past September, President Pinochet announced plans to establish a new ministry of the family, which will also address the concerns of women.

Women wishing to travel abroad with minor children must have the father's written permission, even in the event that the courts have granted custody to the mother. On the other hand, a mother must obtain a court order to prevent the father from taking the children abroad. This disparate treatment is common in Latin America.

3. Respect for Civil and Political Liberties, Including:

a. Freedom of Speech, Press, Religion and Assembly—A basic constitutional act decreed by the government in 1976 states that "any individual or group action is illegal and against the institutional order of the republic if such action is aimed at spreading doctrines which oppose the family, propose violence or a society based on class struggle; or which are against the constituted regime or the integrity or function of the state of law." In curbing dissent, the government usually cites other more specific legal provisions and decrees outlawing Marxism and the advocacy of violent revolution.

Virtually all public meetings require prior approval of the local military zone commander. In practice, permission is regularly denied when the subject is politically sensitive. Among exceptions, the government permitted a pre-plebiscite opposition rally attended by about 40,000 in Santiago in August 1980, and ignored various smaller opposition meetings. Except during the pre-plebiscite period most demonstrators who met without authorization in 1980 were arrested and held for brief periods. The government charged some with violations of the internal security code but the courts did not find adequate basis for judicial action.

A decree law of February 1980 gave the government authority to internally banish persons for up to three months without charges, court review or the right of appeal. Previously, such action had been possible only under state of siege authority. Since the decree took effect, over 100 individuals have been internally exiled, some to remote towns far from their homes and families.

The media are technically free from official prior censorship, but, in practice, the government informally tells publications and broadcasters when they are considered out of line. Thus, self-censorship is widely practiced, with most editors careful about the content of material prior to its release, although articles which are critical of the government appear regularly in several leading publications. Under state of emergency authority, local military zone commanders can close down media, restrict coverage of internal security cases, forbit publicity of non-official activities of government officials, and prevent the sale or distribution of new publications. In one case this year, the Santiago zone commander prevented the distribution of a new book on the 1973 Longuen killings, although dozens of articles and reports have been published in media on this subject. In another case, the zone commander prevented the start of a new magazine. The latter decision was reversed by an appeals court and then appealed by the government to the supreme court which upheld the zone commander.

The government owns the only national television network. Other local or regional stations are operated by the universities, whose rectors are appointed by the government. While the directors of these TV stations have autonomy, they use considerable discretion. There are several periodicals and at least two radio stations critical of the regime; these give major voice to the opposition viewpoint and were very active in the period leading up to the plebiscite. "Non-Marxist" books and pamphlets critical of the government are permitted free circulation.

In its 1979 annual report, the Inter-American Press Association noted improvements in press freedom in Chile, but concluded that restrictive laws, particularly controlling new publications, resulted in a lack of full press freedom.

Chile, predominantly a Catholic country, respects freedom of religion. A number of Protestant and other sects are active. The Jewish community reports full freedom and tolerance.

In 1979 the right to elect student government was restored at the universities. Rectors of the universities are military men. Vice Rectors are university professionals.

Labor unions

Most trade union rights, suspended after the military takeover in 1973, were legalized again in July 1979 by the "Labor Plan" (a series of decree laws forming a labor code), or its subsequent technical additions and revisions although in a number of respects these rights are limited. The trade union movement had no practical input into the formulation of the labor plan.

In general, even labor leaders favorable to the government and with access to high ranking officials have minimal influence on important labor matters. Opposition labor leaders have neither access nor influence and are occasionally subject to public attacks by government officials.

Trade union organizations can normally elect their leaders instead of having them appointed by the government. In individual unions, however, elections are not obligatory, and there are some instances where appointed leaders have managed to hold off having elections despite rank and file sentiment to the contrary. As elections continue to be held, the number of appointed leaders are gradually decreasing.

On some occasions the government has facilitated the formation and the smooth functioning of labor organizations favorable to it, while opposition labor organizations at times suffer bureaucratic and other forms of harassment.

Collective bargaining has resumed for the large majority of workers—albeit in a somewhat restricted fashion. Workers are guaranteed their existing wage and benefit package, plus any increase in consumer price index. Since the last adjustment (for the year up to July 1980), the average real increase was 7–8 percent. On the other hand, the scope of what can be bargained has been narrowed considerably to include only wages, benefits paid in cash or in kind, and certain common conditions of employment, such as safety.

Specifically excluded from collective bargaining are the civil service and the maritime sector; in the latter case, special presidential legislation is to be promulgated in the future to regulate that sector.

Each year, the government publishes a list of those entities which can bargain collectively but are classified as "strategic." As such, they are prohibited from striking. Approximately thirty were listed in 1980. Most are public utilities and state-owned firms. For these companies, failure to reach agreement during negotiations leads to binding arbitration.

For workers who can bargain collectively and can strike, the right to strike is limited in the sense that, after the 60th day of a strike, all striking workers are considered to have resigned their jobs, and they can be permanently replaced by the employer. Also legal for the first time in Chile is management's ability to hire strikebreakers, an effective strike deterrent given the presently high unemployment rate.

There is no grievance procedure system in Chile. The only recourse available to an aggrieved party is to appeal to the labor tribunals, a procedure which usually takes several months. Strikes cannot result from an individual grievance; they are only permitted in the case of a failed collective negotiation.

b. Freedom of Movement Within the Country, Foreign Travel, Emigration and Repatriation—Chileans are free to leave their country. Some one million Chileans live abroad, principally for economic reasons. Over half this number have resided for many years in Argentina (mainly Patagonia) where they provide the basic labor pool. In the judgment of international organizations dealing with refugees, the volume of skilled and unskilled workers returning to Chile now slightly exceeds the number leaving—a reflection of the improvement in the Chilean economy.

Many thousands fled Chile when the current government took power; hundreds sought asylum in foreign embassies, thousands were convicted of internal security violations and had jail sentences commuted

to exile. The government was eventually willing to grant safe conduct passes to people who obtained asylum and wanted to leave Chile. Expulsions are no longer a regular practice by the government in dealing with opponents, although there was at least one instance in 1980 involving a prominent politician.

Government decrees require those who are considered to have left Chile illegally to file a petition with a Chilean consul if they seek to return. The interior ministry reviews all petitions and rejects those from people who are considered to have engaged in anti-government activities abroad. The government has released no current figures on petitions received, rejected, approved or pending. In most cases the courts have upheld interior ministry decisions barring individuals from returning. In a small number of cases, the government has permitted some barred individuals to return, generally for short periods and on humanitarian grounds.

Chile has accepted a few refugees in recent years and makes regular modest financial contributions to international organizations aiding refugees.

c. Freedom to Participate in the Political Process—*Political party activity is banned.* In 1973, the government dissolved the Marxist parties and other parties forming the Unidod Popular Political Front. A 1977 decree law dissolved all remaining parties. There have been no elections for local or national political office since 1973. There was universal suffrage in the September 1980 constitutional plebiscite (voting is required by law), but without electoral registers or other safeguards acceptable to the opposition. Following the 1973 coup, the government assumed authority to amend the constitution. With congress dissolved, the junta exercises legislative powers, delegating executive authority to President Pinochet.

Notwithstanding the formal ban on political activity, the non-Marxist parties, notably the Christian Democrats and some of the Radical Party offshoots, are able to continue to operate on a limited basis. Even some socialists and splinter leftist groups maneuver among themselves with tacit government acquiescence. Communists who are found engaging in political activities are generally detained for violating the internal security code or the 1973 law prohibiting Marxist activity.

4. Government Attitude and Record Regarding International and Non-governmental Investigation of Alleged Violations of Human Rights:

The government set a precedent when in July 1978 it allowed members of the special ad hoc working group of the United Nations Commission on Human Rights (UNHRC) to conduct a long-delayed visit to Chile. Although the groups subsequently disbanded, a special rapporteur was tasked to submit Chile human rights reports to the commission and the U.N. General Assembly (UNGA). The Chilean government communicated officially to UN authorities in March and May of 1979 its objection to, and refusal to cooperate with, continuing special consideration of Chile by ad hoc procedures, such as the use of a rapporteur, contending that these measures had no legal or moral force.

A Chile item appears each year on the agenda of the UNGA and the UNHRC. The 1980 UNGA resolution expressed "particular concern that the Chilean authorities have failed to take and urge effective measures, as requested in its resolution and urge effective measures, as requested in its resolution 33/15, to investigate and clarify the fate of persons reported to have disappeared for political reasons", and urging the authorities of Chile to respect and promote human rights in accordance with the responsibilities it has undertaken under various international instruments.

The Inter-American Human Rights Commission also maintains a watching brief on the Chilean situation. In its October 1980 report on human rights in Latin America it stated that "There have been violations of the right to life and personal security in Chile" and that severe restrictions on the exercise of other rights embodied in the American Declaration of the Rights and Duties of Man continue. In late 1978, the ICRC reduced its Chilean presence to one local employee primarily because of the substantial decline in the number of political prisoners. Earlier it had played an active role in prison visits in attempts to locate missing persons. The Intergovernmental Committee for European Migration (ICEM) also has been active in Chile, conducting a program permitting convicted political prisoners an opportunity to serve out their sentences in exile. The government cooperated in making this program possible. Counting all categories of refugees, ICEM has moved some 20,000 people out of Chile since the coup.

Amnesty International, the International Commission of Jurists and other non-governmental organizations have expressed concern over Chile. During 1980, the first two organizations issued reports alleging a relative increase in human rights violations in Chile and criticizing the courts for their ineffectiveness in protecting the rights of detainees or people who have disappeared. Although the government believes that the reports produced by these organizations exaggerate the scope and volume of abuses, it has permitted visits by their representatives.

The Catholic Church, along with the representatives of several other religious communities, has taken the lead in defending human rights and implementing social action programs. This has resulted in visible tensions between the government and the church, and disagreement over the church position by more conservative Catholics.

In a number of instances, church property has been the target of attacks carried out by assailants who have not been identified or apprehended.

The Chilean Commission for Human Rights, now two years old, has also publicized abuses and spoken out strongly against them. It and the other human rights groups operate openly, albeit cautiously, in Chile; some of their members have experienced harassment in the form of arrests and searches.

The Chilean government has failed to investigate fully and prosecute three former security officers indicted in the U.S. for complicity in the 1976 assassinations of ex-Chilean Ambassador to the U.S. Orlando Letelier and a U.S. citizen Ronni Moffitt. In October 1979 the Chilean supreme court denied a U.S. government extradition request for the three officers.

Mr. KENNEDY. Mr. President, I wish to emphasize some of the more pertinent parts of this report, as submitted to the Committee on Foreign Relations by the Department of State in February 1981:

High-level government officials publicly and privately deny that the use of torture by government agents is authorized. Reports of torture declined from 1976 through early 1980. Since then, paralleling an increase in extremist violence reported incidents of torture increased. At least 100 incidents of torture were reported to human rights organizations in 1980—with most individuals alleging psychological duress, beatings and the use of electric shock during interrogation by members of the National Information Center (CNI) or civilian police. While in some cases questions can be raised about the validity of the allegations, in other cases there is no apparent reason for the individuals to make false claims. According to such accounts torture was applied on the first or second day of detention to allow sufficient time for full recovery before release.

And now, with the lengthening of the executive detention in Chile from 5 to 20 days, there is very deep concern that the practices of torture will increase. The report says:

Human rights sources report that during the first ten months of 1980 the courts received 96 complaints of serious mistreatment including torture. Three men have died since November 1979 while in the custody of civilian police. Accounts by relatives suggest that physical abuse by police was the cause; the cases are under investigation but no persons have been indicted.

On the disappearances, Mr. President, the report says:

The last reported "disappearances" occurred in 1977. About 635 cases from the period 1973–1977 remain unresolved. Although the Chilean supreme court appointed special judges in 1979 to investigate many of these disappearances, no one has been formally indicated. This year, the supreme court confirmed that the general amnesty declared in 1978 applied to the policemen identified as having executed sixteen persons and deposited the bodies in a lime kiln at Lonquen in 1973. The special judges are continuing investigations into some cases, have suspended action in numerous others, and have referred still others to military justice when the military or police are believed to have been involved. Some families of the disappeared have appealed the suspension or referral to the military courts. To date, the appeals have had little effect in resolving the whereabouts of their relatives.

Still there continues to be a significant number of arbitrary arrests and detentions. The State Department report says:

According to studies compiled by church human rights groups, a total of 720 persons were detained in Chile during the first 6 months of 1980.

Further:

The Inter-American Human Rights Commission (IAHRC) reported in October 1980 that the rights to fair trial and of due process were subject to major significant restrictions—principally because of the active role of the military courts in judicial proceedings and the failure of the civil courts to exercise their responsibilities on behalf of detained persons.

Amnesty International, the International Commission of Jurists and other non-governmental organizations have expressed special concern over Chile. During 1980, the first two organizations issued reports alleging a relative increase in human rights violations in Chile and criticizing the courts for their ineffectiveness in protecting the rights of detainees or people who have disappeared.

And then the final quote:

The Chilean government has failed to investigate fully and prosecute three former security officers indicted in the U.S. for complicity in the 1976 assassinations of ex-Chilean Ambassador to the U.S. Orlando Letelier and a U.S. citizen, Ronni Moffitt. In October 1979 the Chilean supreme court denied a U.S. government extradition request for the three officers.

At this point in the RECORD, I would note that on November 5, 1980, Federal Judge Joyce Hens Green found the Chilean Government responsible for the assassination of Orlando Letelier and Ronni Moffitt. Now, we know that the

Chilean Government refused to extradite those who were directly responsible and named by the grand jury. Still, the Federal court ordered the Chilean Government to pay $4.9 million in damages to the Letelier and Moffitt families.

In her opinion, Judge Green wrote:

> Whatever policy options may exist for a foreign country, it has no discretion to perpetuate conduct designed to result in the assassination of an individual or individuals, action that is clearly contrary to the precepts of humanity as recognized in both national and international law.

To this day, Mr. President, the Chilean Government has failed to comply with the order of the U.S. district court to pay the damages for their responsibility in the Letelier-Moffitt assassinations.

For the many reasons mentioned above, Mr. President, I intend to move to table the amendment offered by the Senator from North Carolina. Senator HELMS' amendment would alter the current prohibition in law against providing the Chilean military junta of General Augusto Pinochet with weapons and military support.

Mr. President, I strongly urge that this amendment be tabled. No evidence has been brought forward to justify a change in this law. To the contrary, to alter the law and to permit military aid to flow to Chile would be directly contrary to the interest of the United States.

Mr. HELMS. I thank the Chair.

Mr. President, let me assure the Senator and the Chair that my remarks will not be extensive.

Mr. President, this Senator has not argued that aid should be guaranteed to Chile or anybody else. That is not what the amendment proposes. The amendment proposes only that the President be given flexibility in dealing with Chile, as with other countries. It removes a prohibition, it does not grant assistance, nor is any proposed.

As I listened to my friend from Massachusetts, I thought, "Gee whiz, the Senator seems to be arguing in favor of my amendment, because he maintains that the human rights climate, assuming that his facts are correct, in Chile has not been successful; if so, then, his amendment has done great harm to the people of Chile—again assuming that his facts are correct"—and I know that he stated them with all sincerity. So assuming that all of the activities which he described with his customary eloquence are correct, then he is saying to the Senate what I did when I offered the amendment without any hearing before any committee has been a tragic mistake for the cause of human rights in Chile.

The Senator from North Carolina has not said that the situation in Chile is perfect. What he is saying is that it could be improved if the law permitted us to offer an inducement. But the law is rigid. There is no inducement, and there can be none, as long as the Kennedy amendment remains law.

I am a little bit surprised therefore that the Senator would move to table the amendment. I would imagine that he would be anxious for the President to have some flexibility in working with the Government of Chile, which the Senator so ardently opposes.

Mr. President, the able Senator from Massachusetts introduced the name of Orlando Letelier into this discussion.

Of course the death of this man was an act of murder, and this Senator from North Carolina does not condone murder under any circumstances. I have no difference whatsoever with the Senator from Massachusetts on that point.

Where I do perhaps differ with him is that I infer that he regards the late Mr. Letelier as some sort of martyr, as though he were an innocent citizen struck down by terrorists.

What does the word "martyr" mean, Mr. President? Certainly it suggests that a person is an innocent victim for a worthy cause.

Let me say that I regret the murder of Mr. Letelier just as much as the Senator from Massachusetts, but let the record also show that Mr. Letelier was neither an innocent victim nor was he working for a worthy cause. He was himself an agent of terrorists. He was an agent of the Cuban Government working within the United States with a terrorist network for the overthrow of a government friendly toward the United States.

That is not my interpretation. These are facts, facts which have been well established by papers which Mr. Letelier was carrying in his briefcase at the time of his death. I saw the papers, Mr. President. Those papers showed that he went from his contact with prominent American leaders to contacts with Marxists, Communists, agents of the KGB, the Cuban DGI, and various terrorist organizations. Just as terrorists are sometimes blown up by their own bombs, so too Letelier was entrapped in a web of plots and counterplots of his own making. Nor was Ronnie Moffit an innocent either; knowingly or unknowingly, she was his accomplice.

What was Letelier's job in the United States? It was to manipulate public opinion in this country and to lobby for Cuban interests in the Chile matter. His strategy was to present himself as an objective critic of human rights while he was really trying to bring down the Chilean Government that had thrown out the Marxist Salvador Allende.

While we are at it, Mr. President, I think it is about time that we stop this business of trying to canonize Salvador Allende. He was a Marxist, and he drove that country, with his socialist policies, into the ground.

At the time Allende was deposed, the inflation rate in Chile was 1,000 percent, and the ouster of Mr. Allende was demanded by the housewives of Chile. The army in Chile was not even interested in a coup. They were forced into it by public opinion and growing national chaos.

The housewives of Chile despaired of what had been done to their churches and their schools, and it was the housewives of Chile who got out on the street every afternoon at 4 o'clock beating on pans demanding that the army do something to remove this dictator, this Marxist, whom some now would declare to be some sort of saint.

The letters found in his briefcase show that Letelier was in a conspiracy with Allende's daughter, Beatrice, who was living in Cuba as the wife of the second ranking official of the Cuban secret police, the DGI. On May 8, 1975, Beatrice Allende sent him $5,000 from Cuba with the promise of $1,000 a month "for your work."

In a letter which Mr. Letelier wrote to Allende's daughter on March 26, 1976, he said that his strategy was to present "an apolitical character, oriented exclusively to the problems of human rights."

He wrote, and again I quote from Mr. Letelier's own letter:

> The object is to mobilize the liberals and other persons who, if they don't identify with us from an ideological point of view, are in it for what human rights reflects.

He was worried that his connections with the Communists might become known. He wrote:

> You know how these liberals are. It's possible that one of the sponsoring Congressmen might fear that they might be connected with Cuba, et cetera, and eventually stop giving his support to the committee.

Let me say again for the purpose of emphasis that I regret and I abhor the murder of Letelier as much as anybody, including the Senator from Massachusetts, but a bit of perspective is needed before we go too far in assessing what the real situation was at that time.

In January of 1976 Letelier traveled to San Juan, Puerto Rico, to consult with the Castro-oriented founder of the Communist Party of Puerto Rico, the so-called Puerto Rican Socialist Party, which has long supported the bombings and terrorist attacks in the United States by the Puerto Rican independence movements.

According to other documents found in Mr. Letelier's briefcase on the day that he was killed, he had also been in contact with officials of the Soviet Union, the East German, and the Cuban Governments, including some with known intelligence duties.

They included Yuly M. Vorontsov, Minister Counsellor of the Soviet Embassy in Washington, Rolf Sieber, the East German Ambassador; Oleg Ignatsiev of Pravda; Stephen Shalaev, president of the Moscow Soviet; Calos Altamirano and Clodomiro Almeyda, two top leaders of Allende's Socialist Party living in East Berlin, and Raul Roa, the Cuban Foreign Minister.

A word should also be said about the Institute for Policy Studies, and the Transnational Institute, an IPS spin-off which Letelier headed. IPS has been notorious for its support of international terrorist groups, including Latin Americans, Africans, and the PLO. Last year the journal, Midstream, reported:

> Upon Letelier's death, IPS made Tariq Ali head of the Transnational Institute. Ali is a leader of the British section of the Trotskyite Fourth International, which maintains contact with terrorist groups world-wide. A long-time promoter of the PLO, Ali has been barred from entering the United States, France, India, Japan, Turkey, Thailand, Hong Kong, and Bolivia. Ali is quoted by Newsweek (Jan. 14, 1974) as saying: "We are dedicated to achieving socialism all over the world and not through peaceful revolution."

That quotation, Mr. President, is from

a very interesting article by Rael Jean Isaac, which went into complete detail on the IPS and Letelier. Midstream describes itself as "A Monthly Jewish Review," published by the Theodor Herzl Foundation. Its liberal, intellectual, and anti-Communist reputation is not in question.

Another article appeared on Letelier by John Rees, in the Review of the News, entitled "A KGB Agent in Washington." That Journal is a publication of Robert Welch, Inc., founder of the John Birch Society. The conclusions of the two magazines are similar, despite the totally different intellectual framework within which they are working.

Mr. President, I ask unanimous consent that both these articles may be printed at this point in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

THE INSTITUTE FOR POLICY STUDIES: EMPIRE ON THE LEFT

(By Rael Jean Isaac)

An unusual organization has been edging into prominence for some years. Its members—"Fellows"—have published many articles in The New York Times, and have appeared on television: The Times identifies the organization only as "a research organization based in Washington, D.C.," while Jim Lehrer, on Channel 13, the "educational channel" of New York City, refers to it as a "liberal research outfit."

Moreover a new novel, "The Spike" has just appeared, written by two well-known commentators on world affairs. Arnaud de Borchgrave and Robert Moss, which is widely assumed to be based on this same organization. In the novel it is the channel through which the Soviet Union hopes to take over the United States.

Plainly, this "liberal research outfit" would seem to deserve some attention. What, in fact, is the Institute for Policy Studies?

Though the subject of a 1971 article in Esquire, a two-part series in Barron's in 1976, and a 1978 article in The New York Post, the Institute has received remarkably little attention in the major media, which, however, frequently publish the writings of its Fellows.[1] Yet the Institute represents an unprecedented success story: the achievement of the New Left, after its supposed demise, in shaping United States policy.

The Institute for Policy Studies was founded almost 20 years ago by Marcus Raskin and Richard Barnet, who were to remain its directors for 15 years. The two men had met while attending a White House/State Department disarmament conference on April 14, 1961. Raskin was on the staff of the National Security Council as an aide to McGeorge Bundy, and Barnet was Deputy Director for Political Research of the U.S. Arms Control and Disarmament Agency. Barnet noticed Raskin's alienation—his contempt for and hositility toward "the whole military-industrial establishment sitting there at one table." As Barnet later told an interviewer: "Marc and I both grimaced at the same moment—and knew we didn't belong here." Within two years Barnet and Raskin had put together the necessary funding, personnel, and programming: the Institute began work in 1963.

But the roots of IPS go back earlier. While Barnet's prior activities gave no hint of the path he was to take (Harvard Law School, graduate studies at Harvard and Princeton, a stint at a respected Boston law firm before entering government), on coming to Washington in 1959 as a legislative assistant to the then freshman Wisconsin Democratic Congressman Robert Kastenmeier, Raskin had organized the "Liberal Project."

These were the Eisenhower years, when the major criticism of the Presidency was that its incumbent spent too much time on the golf course. While in retrospect they seem golden years, scarcely rich soil for the appearance of a Congressional protest movement, a small group of Congressmen, most of them first elected in 1958, felt that American policy was coasting on the outworn ideas of the New Deal and did not take into account a radically changed post-war world. James Roosevelt, one of the leaders of the group, spoke of a breakdown in "the transmission belt of ideas between intellectuals and politicians." The model the Congressmen had in mind for the "Liberal Project" was the English Fabian Society, which provided the ideas (and to a considerable extent the personnel) for the Labor Party in England in the first decades of the century.

The Liberal Project died when five of the dozen Congressmen who made it up lost their seats in 1960. Its chief legacy was a volume called The Liberal Papers, edited by James Roosevelt, presenting the new perspective it was hoped would provide a foundation for policy.

Though the tone of the Liberal Papers is calm, civilized, and rational, and—in sharp contrast to what was to become the Institute for Policy Studies—the good faith of United States policy-makers is not impugned, an analysis of it points to themes that were to be fundamental for IPS: the need for total disarmament; the abandonment of existing alliances; the need to encourage revolutionary change in the underdeveloped world. Several contributors to the Liberal Papers were to play a part in IPS. David Riesman (with Barnet and Raskin) was one of the three trustees listed in the certificate of incorporation in November, 1962; Michael Maccoby and Arthur Waskow were to become Fellows of the Institute.

The distinguished marks of IPS have been its choice of audience, its methods, and its ideas. To begin with the least imaginative of these—the ideas—they have been endlessly restated in the voluminous writings of the IPS founders and Fellows, some of them published directly by the Institute, some by mainstream publishing houses. Perhaps the best source is the writings of Marcus Raskin, described by IPS colleagues as "one of this country's most able political thinkers and theorists" and "one of America's leading political scientists and political philosophers."

Raskin describes the United States as an imperialist country ("The American imperium . . . is now viewed as the world's primary enemy by the poor and the young") whose inhabitants themselves are colonized.[2] Within our Colonized Society (these as well as all subsequent capital letters are Raskin's) there are "four overlapping Colonies" each of which "hollows out man and objectifies him for the purpose of running the Colony." The most important Colony, the one that maintains the others, is the Violence Colony, whose rulers, specialists in the techniques of violence, use "the rest of society as their hostage." A primary tool of the Violence Colony is the university, which is "the fundamental shield and terrorizing instrument of the state."

Cowed by the Violence Colony, people in the Plantation Colony "work at meaningless and unreal jobs to obtain things that they are led to want" but which do not satisfy "human needs." In the Channeling Colony (known by less profound minds as the educational system) people are "broken" into "accepting authority structures. Its inmates learn to become bored, user-used and hollowed out." People are lulled into passive acceptance of the other colonies by the Dream Colony, which "provides a surrogate of action and passion for the colonized, replacing their own actions and passions which could stem from human feeling."

Raskin explains how the small elite that colonizes the mass of American citizens enforces the external empire. The turning point, says Raskin, came in 1940, when the United States gave up its status as one of several great powers "to reach for the brass ring: world hegemony." While war with "great powers" would be avoided after 1945, "fighting continuous war in the lands of the poor and wretched was acceptable, and to some extent was the way the ruling elite thought American dominance would be maintained." Eventually, a President's day would be "spent in activities that were more criminal than political, from plotting wars to buying foreign government officials." As the elite saw it, war for the public "would be a sport, a diversion at most. . . . The droning of everyday life would be relieved with the purpose and determination of the leaders."[3]

In Raskin's books the political leadership of the United States becomes a cabal of evildoers, a replica of the Nazi leadership—to be dealt with in a similar way. "Decolonization" can only be accomplished if the "national-security state is dismantled." The only incentive for leaders to avoid imperial adventures is to know they will be held personally responsible. Citing the Nuremberg Laws, Raskin provides his own model law "for demilitarizing American society." Crimes include "threatening and provoking other nations and lands with U.S. or third-party military and paramilitary forces," and even "developing a militarist economy." Those found guilty would be liable to discharge from the Civil Service or, if their offense was severe, confiscation of property and custodial imprisonment for seven years "at socially useful work."

Once the Violence Colony is eliminated, decolonization of other social sectors will become possible. The Plantation Colony will be replaced by workers operating their own industries established with government taxes. One presumes that those, like Raskin, who know what human needs really are will decide what is produced by them. The Channeling Colony will be overcome when records are destroyed, grades and tests abolished, and "free inquiry" put in its place. The Dream Colony will be replaced by a television that is used "to build continuous new relationships between people in an associative, democratic way."

There is not much danger that a dismantled Violence Colony will be resurrected because in the "Reconstructed Society" all decisions will be made in face to face local meetings. These meetings will choose whether, for example, a MIRV missile is desired over a new community center. Workers will control their own taxes until the end of the year and then decide to what authority they wish to give them. National budgets will be voted in local assemblies. In short, the "Reconstructed Society" is an anarchist-syndicalist federation of autonomous cooperatives. Since present human imperfection is wholly attributable to the colonizing agents, in Raskin's utopia there will be no hierarchy, no coercion, no real organization beyond the local level.

The flood of writings by IPS Fellows neither add to nor contradict Raskin's outpourings. The United States is evil. IPS Fellows Paul Jacobs and Saul Landau explain[4] how Americans have celebrated a terrible past. "Racism" against every minority group is the real history of the United States. The democratic institutions of the United States are worthless. Elections, says IPS Fellow Michael Parenti,[5] are only a symbol and voting "less an exercise than a surrender of sovereignty." A favorite IPS theme, it is echoed

Footnotes at end of article.

by, among others, Arthur Waskow, who calls elections "an elaborate way of collecting power from the people and handing it over to someone else." IPS Fellows are enthusiastic about Third World terrorist and revolutionary movements and the states that embody them; many of these of course, have dispensed with elections altogether.

While the Soviet Union is not always defended as flawless, the United States is consistently portrayed as the aggressor in U.S.-Soviet relations. Parenti puts "totalitarian" in quotes, suggesting this is a false label applied to the Soviet Union. Richard Barnet contrasts "substantive" and "procedural" freedoms. We have the "procedural" freedoms (speech, the press, assembly) while the Soviet Union has the more solid-sounding "substantive" freedoms (medical care, jobs, housing). Barnet asserts on his own authority that he is sure that Soviet citizens, if given the choice between the two, would select their "substantive" freedom. What IPS Fellows never concede is that the Soviet Union poses any threat to the United States. Soviet behavior is invariably defined as "defensive" in nature.[6]

Although IPS is normally classified as a movement of the radical Left, it works readily with individuals and movements of the radical Right, and could easily move wholly in that direction. Karl Hess, a founding editor of National Review and a one-time speechwriter for Barry Goldwater, found that IPS corresponded to his own "right wing anarchist libertarian" philosophy. IPS staffers fill the pages of Inquiry, the chief journal of the Libertarian movement, and IPS and the Libertarian Cato Institute have undertaken a joint project to "study the military, financial and political implications of a strictly non-interventionist United States foreign policy."

What IPS is really concerned about is assuring United States withdrawal of support from "reactionary" regimes world-wide. Once that is done, IPS is quite confident in the ability of "progressive" forces (backed presumably by the "progressive" arms of Cuba, the Soviet Union, etc.) to achieve victory. Although IPS, with its goal of some sort of decentralized communal socialism is more strictly in the anarchist tradition than the Libertarians with their belief in the free market, the two make common cause in calling for an end to U.S. intelligence services and for unilateral U.S. disarmament.

The radical Right orientation in IPS thought is visible in a book by IPS Fellow Earl Ravenal,[7] who argues for "nonintervention." He contrasts this with appeasement, which he accurately observes, is a form of intervention. United States policy toward Israel, says Ravenal, is a policy of appeasement. Israel is pressured to make concessions to the Arab states—at present to relinquish the West Bank to some form of Arab rule. American aid and promises of future support are predicated on these concessions. Yet ironically, Ravenal notes, appeasement produces a more dependent ally in a position of less strength, more dependent than ever on a less reliable guarantor. Ravenal's solution is withdrawal. Countries to which the United States has made commitments will have to seek the best deal they can with their adversaries.

What of powers that might seek to advance as the United States withdraws? Ravenal says airily that we will have "to let our adversaries have their season of mischief in the world." The process of disengagement will not end until the United States has found "a new, obviously defensible security frontier." Europe? Canada? Mexico? The borders of the U.S.? Ravenal does not define what an "obviously defensible" frontier would be.

The strength of IPS has, indeed, been much less in its ideas than in its methods. IPS combined theory and action in what Raskin called "the project" and the "social invention." As Arthur Waskow, a founding Fellow who remained at the Institute until a wage dispute led him and a number of other long-time Fellows to begin a rival Policy Resource Center in 1977, described this approach:

"The Institute is not just an ordinary research center because it's committed to the idea that to develop social theory one must be involved in social action and in social experiment. And therefore, the Institute stands on the bare edge of custom in the United States as to what an educational research institution is, as against what a political institution is."[8]

In IPS the distinction between research and political action virtually disappears. We shall show that the genius of IPS has been the use of all the political techniques whose legitimacy it denied and sought to eliminate from the arsenal of government. Major targets of IPS have been government intelligence agencies for their spying, covert actions, and subversion; the corporation, especially the multinational corporation; and U.S. "imperialism."

IPS can fairly be described as an enormous intelligence operation practicing both covert action and subversion. It is itself an adaptation of the multinational corporation, and serves as an "imperial" nerve center, with endless subsidiary operations that in turn influence and shape a whole series of ostensibly independent groups.

The most imaginative of the IPS intelligence operations is the so-called Government Accountability Project (GAP). The Government Accountability Project encourages government employees to expose wrongdoing in their agencies. It calls this "whistleblowing" and provides a whistleblower's hot line directly to IPS. A threeday Conference on Whistleblowing held in Washington in June, 1977, featured a number of participants whose remarks centered on such areas as pilferage, bribery, discrimination, and conflict of interest, but IPS staffers at the conference made it clear that their primary area of interest was intelligence operations and Defense Department activities.[9] To underscore the point they planned a special conference on whistleblowing in the national security agencies. IPS urges federal employees to push (through their unions) for the establishment of a written, guaranteed, and legislated right "to blow the whistle." IPS has provided model legislation to encourage and protect whistleblowers by, among other provisions, forcing the government to pay a whistleblower's legal fees, give him paid leaves of absence during litigation, and punish supervisors for harassment.

Another major information-gathering operation of IPS is directed against the large corporation. And while monitoring the large corporation for abuses has an appealing ring, it must be remembered that the purpose of IPS is not to force the corporation to live up to a high standard of behavior but, as IPS freely admits, to abolish it. One of the early projects was a 1970 study of "industrial security" in 500 corporations, most of them with government defense contracts. The corporations were asked, "as a starting point," to give information about the "person or persons in charge of your security program." According to Raskin, some 200 corporations cooperated in the study.[10]

Another project is the Counter-Information Services of the Transnational Institute (the international arm of IPS). Information that IPS describes as "closely guarded behind boardroom doors or barred in secret files" is unveiled in a series of "anti-Reports" focussing upon, for example, the Rio Tinto Zinc Corporation, General Electric, British Leyland, Unilever, etc.[11] The Corporate Data Exchange is a more ambitious project. Started in 1975, it is designed to investigate corporate control and economic concentration in all the major industries. Revealing the principal stockholders and investments of companies, the Exchange is useful in economic warfare campaigns in the name of "human rights" against countries targeted for "progressive" revolution.[12]

The Transnational Institute also has a Multinational Monitoring Project that is "developing an international network of researchers who investigate the operations of different multinational corporations * * * analyzing their impact upon development abroad and economic dislocation at home." Similarly, the Institute for Southern Studies, an IPS subsidiary established in 1970, is directed against the "explosion" of regional workers by major corporations and according to its own literature "is systematically collecting, evaluating and disseminating data on the operations of over 400 corporations in the South."[13] As part of its Militarism and Disarmament Project, IPS "monitors" U.S. arms sales and transfers.

Spying on the spies, or more elegantly, the exposure and nullification of Western intelligence operations is an important part of IPS concerns. In 1971, IPS began its own Internal Security Project to study the intelligence agencies. When, around the same time, disenchanted military intelligence officers from Vietnam Veterans Against the War joined together to provide the basis for what was to become *Counterspy*, IPS made its facilities available to them. The key figure in *Counterspy* was to be CIA defector Philip Agee. *Counterspy's* revelations of the identity of CIA agents around the world was followed by the murder of one of them, Richard Welch, in Athens. IPS co-director Marcus Raskin was on the advisory board of the Organizing Committee for the Fifth Estate which published *Counterspy*.

Agee, in the British edition of his book, *Inside the Company: CIA Diary*, wrote of the debt he owed to the Cuban government and to three people who had provided him with information. One of the three was Michael Locker,[14] who became the director of IPS/Transnational Institute's Corporate Data Exchange and a member of the IPS Ad Hoc Working Group on Latin America. (Agee now lives in Cuba, having been deported from both England and Holland for contacts with Soviet intelligence.)

IPS has also sought to discredit the intelligence agencies. It has made two films on defectors, one on former CIA officer John Stockwell revealing, in the words of IPS, "heretofore unknown information about CIA practices and policies,"[15] and another on former FBI agent Robert Wall, which has the additional merit of describing an FBI investigation of the Institute. A number of IPS Fellows took part in "A teach-in on Techno-Tyranny" in 1975 at the University of Michigan focusing on alleged "political assassination" and "police repression" in the United States.[13]

The projects described above involve covert action by IPS as well as simple intelligence gathering. Government employees were not informed that the Government Accountability Project (GAP) was an IPS project operating from the ground floor of the IPS building at 1901 Q Street. The brochure distributed by IPS to government employees states that the Government Accountability Project is the work of a "public interest group to help restore confidence in the federal system." A typical IPS handout for the project has a red, white, and blue cover with an American flag. Government employees are made to believe that they engage in patriotic acts, preventing abuses in their agencies, not that they contribute toward bringing down what IPS likes to call the "national-security state." And while the Project's literature states that GAP "works directly with jour-

Footnotes at end of article.

nalists" it does not mention that this builds up the influence of IPS Fellows with newsmen—making them a source of valuable "leaks"—to whom favors are due in return.

The Corporate Data Exchange also involves IPS in "covert action." The Corporate Data Exchange, in the literature it sends out describes itself as "an independent tax-exempt research organization." [17] Actually it is a project of IPS's Transnational Institute and is listed as such in Transnational Institute material.

IPS activity on behalf of the PLO deserves to be characterized as yet another "covert operation." Since blatant identification with the PLO might be embarrassing to some IPS funders, support is given indirectly. MERIP, the Middle East Research and Information Project, founded in 1971, supports the major Middle East terror groups.[18] IPS Fellows Joe Stork and Fred Halliday are editors of MERIP Reports and MERIP has repeatedly used IPS facilities for its meetings. IPS Fellow Eqbal Ahmad has engaged in fund-raising efforts for MERIP.[19] The Institute for Policy Studies' Cambridge offshoot offered courses on the Middle East taught by MERIP staffers: the catalogue description stated that "research will be oriented towards eventual publication in MERIP Reports."

A number of IPS Fellows have been featured speakers at the conventions of the Association of Arab-American University Graduates and suggested speakers of the Organization of Arab Students in the U.S. and Canada.[20] IPS Fellows attend PLO conferences: in November, 1976, IPS Fellow Joe Stork spoke at the "International Symposium on Zionism as a Racist Phenomenon" in Baghdad. Eqbal Ahmad is listed as a sponsor of the PLO support group, the Palestine Human Rights Campaign. An internal IPS memo sent on February 11, 1976 by IPS Fellow Saul Landau proposed a series of discussions among "friendly" members of Congress, such as James Abourezk and Anthony Moffett, members of the PLO, Jewish "doves," IPS people, and Arab-Americans not in Congress.[21]

The advantages of covert operations are obvious. On the one hand, potentially embarrassing affiliations can be concealed, and on the other, supposedly independent groups, publications, news services, etc. can echo the IPS line while it appears to the public that they are being exposed to information, issues, and opinions developed by independent organizations.

Mother Jones, a glossy West Coast magazine which fills the gap left by the passing of Ramparts, poses as an independent journal. In the February–March, 1977 issue the magazine raises the question, "Who's Behind Mother Jones?" The reply is lengthy and virtuous, "no banks, no corporations," but there is no mention of the Institute for Policy Studies. Mother Jones asserts that it is published by a nonprofit foundation, the Foundation for National Progress. The magazine's readers have no way of knowing that the Foundation for National Progress is a project of IPS. This can be ascertained from the Foundation's financial statements, but these are not, of course, distributed to readers of Mother Jones. In an April, 1977 article Mother Jones endorsed its own candidates for high position in the Carter administration. It offered IPS co-director Richard Barnet as the ideal Secretary of State and Gar Alperovitz of the IPS offshoot, the Cambridge Institute, as the ideal director of the Office of Management and the Budget. Again, readers did not realize this was simple self-aggrandizement by the Institute.

The Internal Revenue Service prohibits a substantial part of the activities of a publicly supported organization from going for "propaganda." To help circumvent possible problems, Mother Jones, which relies on IPS writers and echoes all IPS themes, is defined as a journal of the Foundation for National Progress. One does not subscribe to Mother Jones but becomes a member of the Foundation, entitling one to the Foundation's publication.

The subversion of IRS requirements is also apparent in IPS transferring of foundation funds. The Stern Fund, a long-time IPS supporter, gave IPS $30,000 in 1976 earmarked for the IPS project, the National Committee for Alternative State and Local Public Policies. One of the most successful of IPS projects, it brings together elected city and state officials to consider "alternative" legislation at the local level (government control of utilities, government ownership of banks, "community control" of business, etc.). According to the Internal Revenue Code of the Stern Foundation must certify that it did not pay any monies to "attempt to influence legislation" or "communicate with any other government official or employee who may participate in formulation of legislation." [22]

Again, the Pacific Alliance of the Foundation for National Progress produces anti-nuclear energy materials and wrote and coordinated an anti-nuclear ballot initiative for California. This activity, too, would appear to be prohibited by the IRS code, which says that no publicly supported charity can "attempt to influence any national, state or local legislation" or "participate or intervene in any political campaign." [23]

The combination of "covert action" with "subversion" is also apparent in the operations of the Pacific News Service. This masquerades as an "independent, nonprofit source of news and analysis." Brochures do mention that the Service is a project of the Bay Area Institute—but not that the Bay Area Institute is a subsidiary of the Institute for Policy Studies. Although the Service is a propaganda vehicle, and should not be eligible for foundation funds, it is able to offer lower rates than rival news services that pay taxes. It has become attractive to editors of major papers, especially now that it has become more sophisticated, dropping repetitive tell-tale phrases like "fascist regimes," "U.S. imperialism," etc. that marred earlier writing.

But perhaps the most impressive project for what certainly can be described as "subversion" has been David Cortright's study for IPS of insurgent movements in the armed forces. Active in the so-called GI Movement of protest against the Vietnam War, Cortright was brought to IPS where he engaged in a study of the army for several years. In a report on his IPS-sponsored trip to an anti-NATO Congress in Holland, Cortright professed to be encouraged by a rank and file opposition to military service in all the "highly capitalized nations." Cortright asserts that "democratization and resistance inside the army represent our best hope for preventing war and restraining aggressive State power." Although the specific grievances of soldiers (more money, long hair, better conditions) might seem "reformist" demands. Cortright points out that "to gain mass support" they must be addressed. Furthermore, Cortright notes, even such marginal issues can produce radical change for they have implications for the relations of power within the ranks and thus can undermine military discipline. Cortright concludes that the effort to achieve a mass soldier organization within the American armed forces should be considered, for it could have the effect of "crippling military effectiveness." [24]

The Institute for Policy Studies has in fact, created its own empire—its own version of the "multinational corporation." Just as multinationals developed because they found that rational economic organization required operation across national lines, so IPS established the Transnational Institute because it recognized, in its own words, "that the social and political problems of the United States . . . are in fact part of larger global problems." [25] More prosaically, IPS found a foreign-based operation a more convenient way to establish working contacts with a host of international "liberation" groups, among them the PLO.

In Race and Class, the Transnational Institute's journal "for Black and Third World Liberation," Eqbal Ahmad, in a memorial tribute, describes his close relationship with PLO leader Rashed Hussein who, writes Ahmad, "was clearer than many of us on the dangers Israel represented for the future." One of Rashed Hussein's plans that Ahmad praises was to embark on a massive funeral march from Amman to Jerusalem to bring the body of the ex-Mufti Hajj Amin al-Husseini "home" for burial.[26] (The ex-Mufti was the notorious fomentor of terror who spent World War II in Germany urging Hitler to murder the Jews faster.)

Although only a fraction of IPS projects have been mentioned here, the empire is much broader than even a complete listing would suggest. Other groups that seem independent of IPS are in fact linked with it through a network of interlocking directorates of a complexity and multiplicity most multinationals would envy.[27] Even more important, IPS serves as the nerve center of what is known as "the Movement," the coalition of groups advocating radical change in American society that developed out of the civil rights movement, the New and Old Left, and the anti-war movement; it now finds itself coalescing in the anti-nuclear energy campaign.

Were it not for the rise of the New Left, which emerged almost simultaneously with IPS, IPS might have had little more impact than the Liberal Project. Although Barnet, Raskin, Maccoby, Waskow, and Alperovitz, the key early IPS figures, were ten years older than the new student radicals, they had anticipated many of their concerns. Others they quickly adopted as their own. IPS, partly through its student intern programs, partly through the leadership role its Fellows took in the anti-war movement, partly through being an ongoing presence for a movement that was amorphous and prone to split when it organized, played a major role for the New Left.

At first IPS involvement with the New Left and the anti-war movement seemed to have derailed the Institute. Most of its original audience of policy-makers was lost as IPS became increasingly militant and its leading Fellows were arrested. But once the war was over, IPS was greatly strengthened. IPS now had a new credibility among policy-makers for, with the war lost, those who had opposed it early appeared vindicated. The "extreme" nature of IPS Fellows' opposition (a trip to North Vietnam, disruptive demonstrations) was forgotten. And IPS had a wider audience now. While the New Left disappeared from public consciousness after the war, its adherents did not disappear. Many became government officials at various levels and were responsive to IPS efforts to bring down the system through the system. They flocked to the annual National Conferences on Alternative State and Local Public Policies. "Graduates" of the New Left constitute much of the broader IPS public and subscribe to the various IPS journals.

The rise of new protest movements, many of them deriving inspiration from the old, has also enhanced the importance of IPS. Many of the new groups are primarily concerned with a single issue—peace groups, consumer groups, anti-nuclear groups, groups of dissatisfied minorities from gays to American Indians, groups seeking the "liberation" of one of a number of foreign lands from "Palestine" to El Salvador. IPS is able to supply what Fellow Gar Alperovitz

Footnotes at end of article.

calls the "conscious political vision" essential to set the "partial" goals in an overall ideological context.

For IPS, the nuclear energy issue is now crucial, an equivalent of the Vietnam War in its ability to mobilize masses. From the standpoint of IPS, nuclear energy is a "reformist" issue, like long hair and higher pay in the army, but like those issues it has the potential for creating structural changes (e.g., retarding growth) that do concern IPS.

It has been part of the "conscious political vision" of IPS that, in Raskin's words, "this country and modern nations run on ideas to a large extent" and "on the political level, you have to develop a sense that there are groups within the organized political structure—Congress or the Executive—who are interested in such ideas. Otherwise no real political transformation can occur."[28]

IPS's experiences in its years on the "outside" had strengthened this view among its Fellows. The demonstration at the Democratic National Convention in 1968 strengthened the IPS conviction that its original course had been correct. After the demonstrations at the convention, which he helped to plan, Waskow wrote: "The lesson of Chicago is guerrilla politics—not guerrilla war . . . Our armies of the night need new recruits—to get them we must invent a political course of action, not street tactics."[29]

Initial access to policy-makers was, of course, not difficult because IPS founders had all played a role in government. Shortly after its founding, IPS, in the fall of 1963, held a "Seminar on National Security and Disarmament" to which White House and State Department officials, Congressmen, and their leading staff members were invited. It exemplified the pattern of "information gathering" that was the IPS hallmark. The seminar studied the structure and operations of the U.S. defense system; its Congressional, Defense Department, and defense industry interactions; and how and by whom policies were formulated and decisions implemented down the chain of command. In the words of the IPS prospectus, the seminar was designed to find "the loci and levers of change in the present system," i.e., the pressure points to bring it down. The information was provided by the government aides and officials who participated as well as by other officials with whom they established contacts for IPS.

Seminars held by IPS for Congressmen in 1965 on "The New Era of American Policy and Statecraft," according to John Rees, were seminal in the formation of Members of Congress for Peace through Law (MCPL).[30] During the period of IPS disfavor on Capitol Hill, MCPL in many respects carried forward the kinds of policies IPS would have favored. MCPL coordinated votes against appropriations for the Vietnamese War and against aid to the South Vietnamese government. From small beginnings, the MCPL has developed into a body of 188 members of the House and Senate that acts as a lobby to limit defense spending; it has opposed all the major new weapons development proposals. Individual members of the MCPL have been in the forefront of the effort to hobble the intelligence agences.[31] The MCPL also serves as a "human rights" lobby. The human rights problems examined are primarily those of countries allied with or friendly to the U.S.

Perhaps the most dramatic instance of renewed IPS influence on Capitol Hill is the "alternative budget." In 1975, John Conyers (Dem.-Mich.), one of the most stalwart IPS supporters on the Hill, in the name of 47 members of Congress, almost all of them members of the MCPL, invited IPS to prepare a study of the (Ford) budget. IPS produced a 120-page study. The following year, 55 members of Congress asked IPS "to extend its excellent analysis of the Budget to include concrete proposals on how federal spending should be redirected."[32] The Alternative Budget, now called the Basic Needs Budget, has become an IPS institution. IPS's National Priorities Project is now active in developing strategy for the Transfer Amendment that would mandate the spending of billions of dollars to be cut from the defense budget for programs that "meet human needs." The Amendment has wide support among the Members of Congress for Peace through Law.

The human rights campaign of the Carter administration has proved an enormous boon to IPS. In its campaigns on Capital Hill, IPS has concentrated upon Chile and South Korea, the first because a "progressive" regime (that of Salvador Allende) was toppled by a "reactionary" regime (that of Augusto Pinochet); the second because it represents the most direct United States commitment remaining outside Europe. IPS has successfully mobilized support from its Congressional admirers. Representative Tom Harkin (Dem.-Iowa) called a Capitol Hill news conference in April, 1978, at which IPS's Howard Wachtel and Isabel Letelier presented a "new" report (it had already been given seven months earlier at a U.N. hearing) on loans from private banks to the Chilean government. In response to these revelations, Representative Henry Reuss (Dem.-Wis.), chairman of the House Banking Committee, sent telegrams to six of the major banks cited in the report urging them to "give the American people a full public explanation of why they are keeping a pariah nation afloat."[33]

IPS held a "Conference of Japanese and U.S. Parliamentarians on Korean Problems" in September, 1977, under Congressional sponsorship in the Cannon Office Building. In his keynote speech, George McGovern called for a "new" policy in Korea based on detachment of the United States from South Korea because of its human rights violations. The United States and North Korea together, said McGovern, could effect a "peaceful resolution" of the conflict. Subsequent speakers dwelt at length on South Korean human rights violations and "corruption" in the relations between both Korea and the United States, and Korea and Japan. Since IPS had structured the conference, there was little opportunity to examine what the human rights situation was in North Korea.

IPS also was one of the sponsors of a Capitol Hill conference on Chile, Argentina, Bolivia, and Uruguay entitled "U.S. Latin American Policy and Human Rights" in September, 1977. That the Institute for Policy Studies should have become a moral arbiter on human rights for Congressmen must surely rank as a macabre joke, for it excuses the most repressive states on the Left and the most vicious terror organizations.

IPS has had a major impact in the weakening of U.S. intelligence capabilities. The Church committee hearings on intelligence abuses in 1975–76 were influenced by the long-standing campaign of IPS and related groups against the intelligence agencies. At present, the Center for National Security Studies, to which IPS is closely related (its previous head, Robert Borosage, a former Fellow and long-time trustee of IPS, is now IPS director), has assumed a leading role in the battle for further restricting the powers of both the FBI and CIA, already severely restricted in the current proposed charters being considered by Congress. At a January, 1980, hearing on an Intelligence Identities Protection Act that would make it a criminal offense to disclose the names of U.S. intelligence agents operating abroad, Morton Halperin of the Center testified that this would be an unconscionable violation of "freedom of speech." The director of the CIA testified that unless disclosure was penalized, the agency would find it impossible to operate.[34]

Another indication of the extent of IPS influence on policy-making is that the Institute's "policy experts" have become Establishment experts. IPS-Transnational Institute established in 1976 an Ad Hoc Working Committee on Latin America headed by Roberta Salper, who in 1973 had served as a member of the Central Committee of the Puerto Rican Socialist Party, a Castroite group calling for immediate liberation of Puerto Rico from U.S. "imperialism."[35] Of the other six members of the group, four were also staff or consultants to the privately funded (Ford and Rockefeller Brothers) Commission on United States-Latin American Relations, better known as the Linowitz Commission. Not surprisingly, the two groups came up with similar policy recommendations. The IPS study was released after the Linowitz one and was designed to increase support for it. Since many of the recommendations were adopted by the administration, one assumes that the IPS document, known among IPS staff as "Son of Linowitz," did not hurt the parent.

In a remarkable irony, IPS has become mentor to Congress on the American democratic process it despises. "The Program of Political Transition" of IPS in 1978 directed an ongoing seminar on the Democratic Party, "its composition, direction, and the role of progressives within it" for Congressmen and their staff.[36]

In Congress then, IPS has concentrated its efforts on undermining support for the defense budget (in the name of "human needs"), making it impossible for the intelligence agencies to function (in the name of "freedom of speech") and denying the legitimacy of governments allied with or friendly to the United States (in the name of "human rights"). Since the ability of the United States to maintain itself as a great power rests on its defense forces, its intelligence services, and its allies, IPS has concentrated upon the crucial areas in its campaign to destroy the United States as what IPS calls "the Violence Colony."

IPS has won financial support to match its increased influence. Beginning with a budget of under $200,000 contributed by a variety of liberal foundations, IPS now has a budget of over $1 million. This does not include many of its projects which bring in an additional million a year.

By far the most important donor in the last decade has been the Samuel Rubin Foundation. The President of the Rubin Foundation is radical lawyer Peter Weiss, married to Rubin's daughter Cora Weiss, also an officer of the Foundation and a radical activist. Peter Weiss is chairman of the board of the Institute for Policy Studies. In 1974, the Rubin Foundation gave $1,200,000 to the Transnational Institute and, while that was the high point of funding, it has since given between $400,000 to $500,000 a year to IPS. Since substantial funds have gone separately to IPS projects, the Rubin Foundation's contribution is even larger than it appears to be. (For example, in 1974 the Rubin Foundation also gave $62,500 to IPS's Health Policy Advisory Center, $20,000 to the Exploratory Project for Economic Alternatives, etc.[37]) Since large sums have also gone to the Fund for Tomorrow, another Peter and Cora Weiss-controlled foundation, which in turn siphons more money to IPS, the Rubin Foundation contribution indeed mounts up. Over $2 million went to IPS from the now defunct DJB Foundation, whose founder, Daniel J. Bernstein, said the chief enemy of mankind was "the injustice of governments and of the United States government in particular."

IPS Fellows are encouraged to find their own sources of support for specific projects to supplement monies raised by the Institute. A consistent source of this kind of support has been the Louis Rabinowitz Foundation.

Footnotes at end of article.

The Rabinowitz Foundation, like IPS, has displayed interest in the armed forces, and financed the National Lawyers Guild South East Asia Military Project, which according to a Congressional study "Organized Subversion in the Armed Forces" was engaged in efforts to foster disobedience within the army in the Pacific area.[38]

An internal Transnational Institute memo dated September 9, 1976, discovered by police in the briefcase of its then director Orlando Letelier following his murder (of which, more shortly), suggests another source for IPS funds. The memo mentioned the difficulties the Institute would face if it accepted money from foreign governments while continuing to maintain financial independence from the U.S. government. The memo suggested that a way around the problem could be found if such funds were used indirectly to fund jointly sponsored conferences or by funding facilities, travel, etc. by direct purchase so that they did not enter the books. To what extent such practices have been employed by IPS must be unknown—if used, they do not appear on the books.

We have already noted that many of the leading figures of IPS were originally government officials in responsible positions who left the government because of disillusionment with prevailing policy assumptions. Under the Carter administration, there has been a reverse movement as individuals linked to IPS, its subsidiaries, and closely related groups, have moved into government, especially into the National Security Council, the Department of State (not surprisingly they are attracted to the "human rights" sector), and ACTION, which controls various social action programs. It was presumably to this new cadre that Senator Moynihan referred when he urged President Carter to demonstrate his seriousness about adopting a more realistic policy toward Soviet expansion by dismissing those of his appointees who held the reverse perspective and now implemented policy.

The return of IPS to government is a symptom of the Institute's greatest triumph: winning a broadly accepted legitimacy. The Institute has established cooperative programs with leading universities, including Johns Hopkins School of Advanced International Studies and Antioch College among others. IPS has offered a Ph.D. program in conjunction with Union Graduate School of Yellow Springs, Ohio. IPS now runs its own "Washington School" offering courses by present and former Congressmen, Institute Fellows, and government bureaucrats. Courses are also offered by such luminaries as James Zogby, director of the PLO support group, the Palestine Human Rights Campaign. (It is yet another indication of IPS influence on Capitol Hill that John Conyers sent out a letter on March 20, 1980 to his Congressional colleagues enclosing the IPS catalogue and asking that they share it with their staff.)

IPS Fellows have produced a veritable avalanche of publications. While "progressive" journals are of course open to them, mainstream publications like Harpers and Atlantic and reputable daily papers have published the essays of IPS Fellows. The New Yorker magazine ran a three-part series on "The World's Resources" by Richard Barnet in March and April, 1980.

The most disturbing indication of IPS's increased legitimacy among opinion-makers as well as policy-makers is that IPS has practically become an institutional columnist for The New York Times. While the frequency of its use of IPS varies, in the three-month period between March 1 and June 1, 1979, (The New York Times published an article by the Soviet KGB), revealed that Letelier had received a lump sum followed by monthly payments from Cuba and that his strategy Peter Weiss (March 2), five articles by Eqbal Ahmad (March 28, April 15, April 25, May 13, May 23), an article by Fred Halliday (May 18), and an article co-authored by Marcus Raskin (June 1). A major article by Richard Barnet appeared in The Times Magazine on April 1.

IPS Fellows use their Times space to undermine support for every U.S. ally in the Third World and to glorify terrorist groups and countries that have gone over to the Soviet bloc, while blaming untoward Soviet actions on American provocation. Peter Weiss casts the blame for the Vietnamese invasion of Cambodia, the Chinese invasion of Vietnam, and the genocidal mania of the Pol Pot regime on the United States. Eqbal Ahmad portrays the United States as the villain heading the "pusher's list" of arms suppliers, "hooking" Third World countries on arms partly through training programs for foreign students. In another column Ahmad praises the Polisario, the West Saharan "liberation" movement backed by "democratic" Algeria.

Fred Halliday in an essay on Afghanistan, then in the Soviet orbit but not yet invaded by the Soviet Union, praised the Soviet-backed regime. Those waging a guerilla war against it he accused of being feudal remnants whose income from smuggling had been cut or who opposed the emancipation of women. After the Soviet invasion, in the IPS journal In These Times (January 16–22, 1980) Halliday blamed the invasion on Pakistan and Saudi Arabia. In The New York Times (March 4, 1980), he confined himself to warning against U.S. aid to those fighting the Soviet takeover. He concluded his article by asserting that U.S. interests did not lie in turning the clock back in Afghanistan; instead, the U.S. should "exert its influence upon Israel to bring about an acceptable solution of the Arab-Israel dispute," since the Muslims did not really care what happened to Afghanistan but were concerned about "Palestine."

Since The Times identifies the Institute simply as "a research organization in Washington, D.C." (when it identifies it at all), the reader is in no position to know that he is the object of a sophisticated propaganda barrage with the complicity of a newspaper whose integrity he trusts.[39]

The activities of the Institute inevitably raise serious questions of motivation. IPS has consistently advocated policies that accord with the Soviet line, whether the issue is disarmament (for the West), abolition of nuclear power (for the West), support for Soviet-linked revolutionary groups, apologetics for Soviet expansion, etc. Brian Crozier, director of the London Institute for the Study of Conflict, says bluntly that IPS is the "perfect intellectual front for Soviet activities which would be resisted if they were to originate openly from the KGB."[40]

The personnel of the Institute do little to ease suspicion. While IPS may not have known that Orlando Letelier was using his position as Director of the Transnational Institute as a "cover" for his activities as an (unregistered) agent receiving payments from Cuba, the Institute's reaction on learning of Letelier's "Cuban connection" was not to dissociate itself from him but to make him a hero and a martyr.[41]

Letelier had been ambassador to Washington under the Allende regime and, later, Foreign Minister. Arrested by the new regime, he was eventually released and worked for IPS until he was killed in September, 1976 (along with IPS staff member Roni Moffitt) by a bomb detonated under the seat of his car. Agents of Chilean intelligence have been convicted of the crime. Correspondence found in Letelier's briefcase between Letelier and Beatrice Allende, wife of the second in command of the Cuban secret police (in turn wholly controlled by) was to present "an apolitical character, character, oriented exclusively to the problems of human rights."

What is perhaps most interesting about the Letelier case is the "news management" of the incident. The long-cultivated IPS relationship with the media paid off. While the Washington Post published an initial column by Evans and Novak detailing the story, it suppressed their second column and substituted an IPS coverup story. Reed Irvine, director of Accuracy in Media, summarized the contents of the documents and described the Post coverup in a full page ad which he sought to place in the Post. When the Post refused to print it, Irvine took the ad first to the Washington Star and then to the New York Times, which refused to print the ad without deletions Irvine would not make. It refused to print the story of the Letelier documents on the grounds it did not find them of "news interest."[42] The Washington Post, a voracious consumer of "leaks," had the effrontery to publish an editorial on April 14, 1977, denouncing the leak of the Letelier documents.

To this date, although the Times continues to print stories on the Letelier murder, it has refused to breathe a word about the contents of the briefcase. Yet the killing of the agent of one foreign country by the agents of another is a rather different story from the wanton murder of a liberal exiled diplomat dedicated to human rights.[43]

Upon Letelier's death, IPS made Tariq Ali head of the Transnational Institute. Ali is a leader of the British section of the Trotskyite Fourth International, which maintains contract with terrorist groups worldwide. A long-time promoter of the PLO, Ali has been barred from entering the United States, France, India, Japan, Turkey, Thailand, Hong Kong, and Bolivia. Ali is quoted by Newsweek (Jan. 14, 1974) as saying: "We are dedicated to achieving socialism all over the world and not through peaceful revolution." IPS appointed as head of the Holland office of the Transnational Institute another revolutionary, Basker Vashee, who doubled as representative of the Zimbabwean African People's Union and as director of WISE, World Information Service on Energy, which dispenses advice to opponents of atomic energy. WISE praised the March, 1979, bombing of a reactor in Spain by Basque terrorists.

Most of those trained as lawyers at IPS are members of the National Lawyers Guild. Since it was established with the aid of the Comintern in 1936,[44] the Guild has expanded to include radicals of various stripes. It remains, however, affiliated with the Soviet-controlled International Association of Democratic Lawyers.[45]

And yet, intent to promote the interests of foreign powers does not have to be assumed to explain what IPS does. If we take seriously Raskin's assumptions, the Soviet Union, scarcely an anarchist's paradise, is no better than the United States. (It may have a slight edge in its failure to produce as much of the things people do not "really need.") The problem is that for IPS to have any hope of moving forward toward building the "reconstructed" society, it must allay fears about the Soviet Union, since if the Soviet Union were building up its own national-security system, we would need intelligence agencies, an army, advanced technology, etc.

IPS is forced, accordingly, to explain aggressive Soviet behavior by the Soviets' perception of threat from the United States. In the IPS analysis, unilateral U.S. disarmament and acceptance of Soviet actions in Africa, Asia, Europe, or Latin America actually enhance United States security. By easing Soviet fears, such acceptance reduces the likelihood of further seemingly aggressive Soviet moves. Dismantling the national-security state thus becomes the best security option, ensuring the possibility of peaceful utopian collectivism in the land mass now organized as the United States.

But there may be another explanation for the carelessness of IPS concerning the background—and present actions—of its Fellows.

Footnotes at end of article.

In the perspective of IPS Fellows, they are oppressed by a brutal, criminal, and senseless empire, the United States of America. A colonized people has the right to rebel against imperial power. All laws are the laws of empire, hence unworthy of respect. Once alienation has reached that point, treason becomes meaningless. The colonized will cooperate with those who can help to free them, even if the colonized may recognize that the aid is given to achieve goals that may not be their own.

The success of IPS is frightening. In a free society fringe groups of all sorts can and do appear. If a group receives Kropotkin and argues, to use the words of IPS Fellow Karl Hess, that "there should be only the villages and then the world as units of political and social organization—nothing in between, such as nations," [40] a free society can listen and—one would expect at this stage of human experience—smile tolerantly. What is frightening is the way in which the political elite of this country has confronted the challenge laid down by IPS, which has made no secret that its target is dismantling all American institutions, economic, political, social, and cultural.

Surely in retrospect one of the most remarkable features of the 1970s will be that an organization with such a target could convince a significant number of American legislators to pursue legislation designed to advance it; that supporters of the IPS perspective could move into key positions in the government bureaucracy; that IPS could become the source of trusted "experts" whose input into policy was seen as serving the public interest; and that "Establishment" media could regard IPS as a source of a significant perspective on public policy.

The success of the Institute for Policy Studies reveals far less about the Institute than it does about United States leadership in the political realm, in the universities, and in the powerful fourth estate of journalism. There is a lack of trained intelligence within this leadership—or the puerile fantasies of IPS would never have been accorded serious attention. There is a lack of faith—one suspects even elementary knowledge of—traditional American values and their intellectual underpinnings.

IPS is supremely self-confident in the nostrums that it offers. It confronts a leadership without faith in itself or in its traditions. The real lesson of IPS is the extent to which that faith has been lost—and thus how intensely vulnerable this society has become to what a speaker at an IPS conference on March 18, 1980 proudly called "our own political wreckers groups."

[43] This writer, following a long article in *The New York Times* in October, 1979, on Letelier and the effort to extradite from Chile individuals wanted in connection with his murder, sent a letter to the editor mentioning the contents of the briefcase as a factor that might help to explain why he had been murdered. The letter was not published. An answer came from George Palmer, Assistant to the Executive Editor of *The Times*, saying that *The Times* had kept readers fully informed of the "significant elements of the Orlando Letelier case." The letter went on to acknowledge the existence of the documents and said that while "they might have" indicated that Mr. Letelier "had some contact with Cuban authorities" *The Times* did not believe they "established that he had been a paid agent of Cuban intelligence." But what is interesting about this is that while *The Times* could have summarized the documents for its readers allowing them to form their own conclusions, instead it has simply refused to mention them, providing an excellent example of what Reed Irvine calls "The Pinsky Principle": if the facts in a story conflict with a reporter's political predilections, he doesn't bend or twist the facts, he just doesn't write the story.

A K.G.B. AGENT IN WASHINGTON

(By John Rees)

Orlando Letelier refuses to stay put among the gray ranks of "Liberal" martyrs. Dismembered by a car bomb on September 21, 1976, as he drove along Washington's embassy row, and memorialized five days later at St. Matthew's Cathedral, the former Cabinet Minister and Ambassador to the U.S. from the Communist Allende Government of Chile is now buried in Caracas, Venezuela. Dead, memorialized and buried, Letelier's legacy of international Communist intrigue, conspir-

acy, subversion, and armed insurrection—all suspected in his lifetime—has nonetheless exploded into a major scandal. Hard proof of his activities fell into the hands of law-enforcement agencies with the contents of the attaché case full of documents that Letelier had with him at the time of his murder. These included his contact book and appointments calendar.

From the contents of his attaché case it has been established that Letelier was disbursing money provided to him from Soviet and Cuban intelligence services; that he was working to overthrow the present anti-Communist Government of Chile and replace it with a Castro-style totalitarian regime; and, that he had numerous contacts on Capitol Hill and in Executive branch agencies—some of whom he provided with Soviet funds.

The contents of Communist agent Letelier's brief case have caused his memory to haunt those with whom he was in contact—Senators Abourezk, Humphrey, Kennedy, and McGovern; Representatives Abzug, Conyers, Fraser, Harkin, Helstoski, G. Miller, and Moffett; together with high-ranking Executive branch officials including William D. Rogers, Assistant Secretary of State for Inter-American Affairs, with whom Letelier lunched "from time to time"; and, such "Liberal" Establishment figures as Sol Linowitz, then head of the Commission on United States-Latin American Relations, which is financed by the Ford Foundation and the Rockefeller Brothers Fund.

Linowitz was a registered foreign agent for the Marxist Allende Government of Chile during the period Letelier was Allende's U.S. Ambassador. During 1976, as the private Linowitz Commission was preparing its second report urging U.S. withdrawal from Latin America and abandonment of the Panama Canal, the leading Commission staffers were meeting with Castroite Communists at the Institute for Policy Studies under the general supervision of Communist agent Letelier. The Comrades supplied ample input to the Linowitz Commission's second report.

Evidence thus far developed indicates that, in February 1975, agent Letelier passed "expense money" to Representative Michael Harrington (D.-Massachusetts) to ensure his participation in the Third Session of the so-called International Commission of Inquiry into the Crimes of the Chilean Military Junta. This was a Helsinki-based offshoot of the U.S.S.R.-controlled World Peace Council, which coordinates international campaigns for Western disarmament while providing logistical support for Soviet-sponsored terrorist movements.

Letelier used his "special political funds" not only to underwrite Congressman Harrington's attendance at the Commission's Mexico City meetings, but also to assist Senator James Abourezk's travel to the same meetings, along with representatives of the U.S. academic Left.[1] While they did not personally attend the Commission's anti-anti-Communist propaganda sessions, Senator Edward Kennedy of Massachusetts and Representative Ronald V. Dellums of California sent messages of support to the Red-financed Commission. Certainly Letelier's success in obtaining congressional support for an international Communist Front operation only weeks after being expelled from Chile as a Communist revolutionary indicates the skill with which he was able to manipulate his Capitol Hill contacts.

Letelier boasted of his manipulative skill in mobilizing "Liberal" Congressmen against Chile and other friendly countries in a March 29, 1976, letter to Beatrice Allende, daughter of the deposed President and wife of Luis Fernandez Ona, the second-ranking official of the Cuban secret police (D.G.I.). Beatrice Allende is herself an official of her late father's Unidad Popular in exile, and of the Havana-based Chilean Anti-Fascist Resistance. When Salvador Allende was President, Luis Fernandez was attached to the Cuban Embassy in Santiago. The press in Chile reports that Fernandez murdered political opponents for his father-in-law.

In the above-cited letter, contained in the brief case, Letelier told "Tati" Allende that for the present his strategy was to present "an apolitical character, oriented exclusively to the problems of human rights." He wrote: "The object is to mobilize the 'liberals' and other persons, who if they don't identify with us from an ideological point of view, are in it for what human rights reflects." Letelier was worried that the connections between his "human rights" movement and the Communists might become known. "You know how these 'liberals' are," he wrote. "It's possible that one of the sponsoring congressmen might fear they might be connected with Cuba, etc. and eventually stop giving his support to the committee." Comrade Letelier was referring to the National Coordinating Committee in Solidarity with Chile, operated by the Castroites and the Communist Party, U.S.A.

And, when manipulation falters, there is always the chance that bribery may succeed. Letelier clearly had the resources for bribery. In the brief case was a letter dated May 8, 1975, from "Tati" Allende in Havana. It referred to an accompanying $5,000 in cash, which it said was to be followed each month by $1,000 "for your work."

In Letelier's address book were the telephone numbers for former Congressman Henry Helstoski's office on Capitol Hill. The former Congressman is currently under indictment for allegedly taking payoffs from Latin American aliens to introduce private bills on their behalf enabling them to avoid deportation. Helstoski denies any knowledge of why his name was in agent Letelier's address book.

Letelier's "week-at-a-glance" appointment book has an entry for September 16, 1976, which reads "Carter-Brzezinski" and apparently indicates that the Chilean Marxist expected to see the Presidential candidate and his national security advisor that evening. Later, after their names, Communist agent Letelier found it necessary or convenient to write in Spanish, "I sent regrets." One finds it difficult to believe that a Communist agent of influence would pass up such an opportunity. On September 16th, Carter campaigned in Detroit; in the evening both Carter and President Ford attended an Italian-American dinner in Washington. The Carter White House has to date been unwilling to comment on this matter.

We are not, after all, talking about an innocent. In January 1976, Letelier traveled to San Juan, Puerto Rico, to consult with Juan Mari Bras, founder and secretary-general of the Castroite Communist Puerto Rican Socialist Party (P.S.P.). Mari Bras and other P.S.P. leaders have repeatedly stated that an armed revolution must be developed in Puerto Rico, and expressed their support of bombings by such pro-Castro terrorist groups as the Armed Commandos of Liberation (C.A.L.) and the notorious F.A.L.N. (Armed Forces of National Liberation) which killed four and seriously wounded over fifty in the January 1975 Fraunces Tavern bombings in New York.

The documents in Letelier's brief case show that from the time of his arrival in Washington in January 1975, Orlando Letelier had been in contact with officials of the Soviet, East German, and Cuban governments, including some with known intelligence duties. They included Yuly M. Vorontsov, Minister Counsellor of the Soviet Embassy in Washington; Rolf Sieber, the East German Ambassador; Oleg Ignatsiev of *Pravda*, the official Soviet Communist Party newspaper; Stephen Shalaev, president of the Moscow Soviet; Carlos Altamirano and Clodomiro Almeyda, two top leaders of his Chilean Socialist Party who live in East Berlin; and, Raul Roa, the Cuban Foreign Minister.

Letelier was planning to leave Washington for a trip to Havana on the day he was murdered, possibly explaining why he was carrying such damning documents. Among those he was to meet in Cuba was Roa. On September 27th, after his return to Washington, his appointment book shows Letelier was to have had luncheon with Valeriy D. Nikolayenko, First Secretary of the Soviet Embassy in Washington and an expert on Latin American affairs. In the Soviet diplomatic world, the First Secretary of an Embassy is traditionally an espionage kingpin.

The bomb which tore off Letelier's legs also slashed the throat of his assistant, Ronnie Moffit, who was riding in the front passenger's seat. Mrs. Moffit drowned in her own blood within minutes of the blast while her husband, Michael, also an employee of the Institute for Policy Studies, escaped virtually uninjured but was unable to retrieve the incriminating Letelier documents. Investigation of the murder of Letelier, a former diplomat, is being conducted by the FBI. The murder of Mrs. Moffit is being investigated by Washington's Metropolitan Police Department.

These investigations are to determine who planted the bomb. But murder requires a motive, and the investigations of Letelier's activities prior to his murder have opened up for examination the Chilean's web of contacts with Soviet officials and KGB agents, Cuban espionage chiefs, Chilean Marxist-Leninist terrorists, American academics, Senators and Congressmen, and congressional and Administration staffers with access to U.S. intelligence secrets.

The question of Letelier's activities as a top-level "agent of influence" and conduit for information and funds responsive to the requirements of the Soviet Union may or may not be answered by solving his murder. But the questions raised as to how he operated, who were his contacts, and whom he may have compromised, certainly demand answers. Let us start with a brief review of Letelier's public career.

THE BACKGROUND

Orlando Letelier was born in Chile in 1932. He was for many years a member of the Chilean Socialist Party (P.S.C.), which is not of the social democratic or Fabian variety but openly militant and avowedly Marxist-Leninist. The leaders of the Chilean Socialist Party took their cues from Moscow

[1] In the fall of 1976, Senator Abourezk and Joe Stork of I.P.S. both participated in an Iraqi-sponsored Palestine Liberation Organization conference in Baghdad. In the fall of 1973, shortly after the overthrow of Allende and the subsequent jailing of Letelier, I.P.S.'s Joe Collins, then on Representative Harrington's staff, flew to Santiago; upon his return Collins spoke at various anti-Chile rallies. In late 1975, Congressmen Toby Moffett, Tom Harkin, and George E. Brown Jr. went to Chile on a National Council of Churches junket. Congressman Harkin had earlier accompanied Congressman Augustus Hawkins and anti-Vietnam activists on a special "guided tour" of South Vietnam complete with secret maps and messages doubtless provided by the Vietcong which led to the "tigercage" exposé. Former Congresswoman Bella Abzug, another Letelier contact, has been a member and officer of the National Lawyers Guild, a cited Communist Party Front, since the 1940s; and, prior to her election, was legislative director of Women Strike for Peace, a group described by the House Committee on Un-American Activities as thoroughly penetrated by the Communist Party and which works with the Soviet's World Peace Council.

†Largely composed of members of the terrorist M.I.R. group led by her cousin, Andres Pascal Allende.

through Havana, while the large and well-organized Chilean Communist Party took orders directly from its mentors in Moscow. The leaders of the two groups have worked in close cooperation since 1958, their differences being those of style and not of purpose.

A trained economist, Letelier moved to Washington, D.C., in 1960 and worked for the Inter-American Development Bank (I.A.D.B.) until 1970, becoming I.A.D.B.'s Chief of the Economic Division, Director of Loans, in charge of all loans for developmental projects in Latin America.

During the next decade the tall, redheaded Chilean Marxist cultivated the political and academic contacts which were to serve him well as Allende's Ambassador and as leader of the Chilean Marxists in North America. At the I.A.D.B., Letelier had access to important economic and financial intelligence information, and security sources report that even in the mid-1960s he was considered a probable Soviet agent.

Upon the election late in 1970 of the Marxist minority Unidad Popular Government, Letelier returned to Santiago to aid his Comrade and party leader, President Salvador Allende. By March 1971, Letelier was back in Washington as Ambassador to the United States, a position he held until May 1973, when he was recalled by Allende to help shore up the collapsing Marxist Government. Letelier returned to Santiago to become Foreign Minister, then Interior Minister (with responsibility for internal security and the secret police). Just 12 days before the coup, he was made Minister of Defense, apparently preparing to make full personal use of the two Ingram 9 mm. submachine guns—fitted with silencers—he had brought with him from the United States.

Documents released by the anti-Communist Chilean Government since the fall of Allende indicate that Letelier, while serving as Chile's Ambassador, was linked with a cocaine smuggling ring through which money was raised for the illegal importation of arms to Chile. The weapons were used to equip Allende's private army—a "popular militia" with which the revolutionaries of Unidad Popular intended to stage an "auto-coup" later in 1973. The cocaine smuggling ring was led by Oscar Squella Avendano, arrested in the U.S. in possession of 203 pounds of cocaine with a street-sale value of millions of dollars. Squella Avendano was at the time heavily involved in Allende's Presidential campaign, and was scheduled for a Cabinet post which his U.S. arrest aborted. Letelier was involved in the negotiations with U.S. authorities in obtaining Squella Avendano's release. Among the proposals reported at the time was that he be exchanged for U.S. Black Panther and Republic of New Africa members then in Cuba.

Minister of Defense Letelier was arrested in Chile on September 11, 1973, the day of the preemptive anti-Communist coup, and held until September 9, 1974. Letelier's release was aggressively sought by the world Communist movement, U.S. groups such as Women's International League for Peace and Freedom, the pro-Castro "Chile solidarity" movement, Amnesty International, and various Leftist and "Liberal" academics. Later, U.S. Secretary of State Henry Kissinger stated that he was "not uninvolved" in pressuring the Chilean authorities for release of Letelier.

Letelier's friend, General Diego Arias of Caracas, flew to Santiago to escort him to Venezuela upon his release. Letelier's wife and four sons followed. In January 1975, agent Orlando Letelier came to the United States on a Venezuelan passport. He was provided with a visiting professorship in political science at American University and joined the staff of the Marxist Institute for Policy Studies, where the following year he became director of I.P.S.'s foreign affairs project, the Transnational Institute (T.N.I.).

INSTITUTE FOR POLICY STUDIES

For a top-level "agent of influence," Washington's Institute for Policy Studies provided a near ideal location. Founded in 1963, I.P.S. is a consortium of New Left Marxists (with a sprinkling of old Stalinists) pushing for a socialist America by a variety of tactics. One tactic involves a sort of lobbying or subversion from the top by which the Institute attempts to gain influence in Congress through seminars for staff aides and direct contacts with legislators. Another tactic involves attempting to break down the political and economic fabric of society into community-based collectives which would own and operate all property and resources in an area. Yet another tactic involves setting up a resource center and clearinghouse for New Left elected and appointed officials and sending them to observe the tactics of the Italian "Eurocommunists," Eastern European Soviet satellites, and Communist Cuba.

Like Letelier, the Institute for Policy Studies has never discounted the role of violence and terrorism in what it terms "social change." In the 1960s and 1970s, I.P.S. numbered among its staff—the I.P.S. calls them fellows—such known contacts of the terrorist Weather Underground Organization as Andrew Kopkind and Robert "Bo" Burlingham; the Algerian terrorist Cheriff Guellal; assorted Castroites including Saul Landau; and, other revolutionaries such as Eqbal Ahmad.

The I.P.S. devised and circulated the scenario for the 1971 Mayday disruptions which attempted to blockade the streets of Washington and, as the demonstrators then said, "shut down the government." The Institute for Policy Studies and its Transnational Institute boast among their leading fellows Paul Jacobs, an admitted member of the Communist Party, U.S.A.; Roberta Salper, a 1973 member of the Central Committee of the Castroite Communist Puerto Rican Socialist Party (P.S.P.) who worked with Letelier; Baskir Vashee, a member of the Marxist terrorist Zimbabwe African People's Union of Rhodesia; and, Tariq Ali, head of International Marxist Group (I.M.G.), the British section of the Trotskyite terrorist Fourth International which is now doing its ugly work in Ireland. Also the I.P.S. has run several operations in support of the terrorist Palestine Liberation Organization: One directly in contact with the P.L.O. is the Middle East Research and Information Project, with which Michael Moffitt is involved; another, called Breira ("Alternative" in Hebrew), works to develop radical Jewish support for the P.L.O.

What could be more natural than for I.P.S. to make the dynamic Letelier director of T.N.I., its fledgling international operation?

LETELIER IN ACTION

When Orlando Letelier first returned to the United States he lived "furtively" for a time in a friend's house in suburban Bethesda, Maryland, "receiving only trusted visitors." Among those visitors were several staffers of the Senate Select Committee on Intelligence, the so-called Church Committee.

Following leads from the Letelier papers, it has been established that Church Committee staffers preparing the Hearings on C.I.A. covert operations against Allende in Chile received information from Letelier during at least three meetings. Two of those staffers, Rick Inderfurth and Greg Trevita, are now on the staff of the National Security Council.

Others involved have told investigative reporters that they were unaware of Letelier's long connections with hostile Communist governments, did not know of his arms imports into Chile, and had seen no reason to question his credibility. As I write the National Security Council has refused comment.

Letelier's interest in learning about the intelligence-gathering capability of the U.S. was not confined to contacts with Senate staffers. Material in his brief case shows that he was in contact with the Center for National Security Studies (C.N.S.S.), a Washington group heavily interlocked with I.P.S. that has as its prime stated object the abolition of the C.I.A. and a drastic curtailment of F.B.I. activities. At C.N.S.S., Letelier would have been able to meet all levels of those working to destroy our intelligence capability, from Morton Halperin, a former National Security Council staffer, through members of the National Lawyers Guild and the American Civil Liberties Union, to staffers of the Organizing Committee for a Fifth Estate (OC5).[1]

In addition to serving as an active member of the board of governors of the (Fund for peace's) Center for International Policy (C.I.P.), Letelier also developed close ties with the North American Congress on Latin America (N.A.C.L.A.). The N.A.C.L.A. was formed early in 1967 by the S.D.S. Radical Education Project in response to Castro's establishment of the Tricontinental apparatus for the export of Communist subversion and terrorism throughout the "Third World." The North American Congress on Latin America was described at its birth by S.D.S. national leaders as the "intelligence-gathering arm" of the New Left. Its researchers concentrate on obtaining economic intelligence, publicly and by trick, on important U.S. businesses (particularly defense contractors) as well as the U.S. Government. Michael Klare of Princeton, the N.A.C.L.A. founder and also an I.P.S./T.N.I. fellow, provided information on U.S. arms export policies in 1975 to the Soviets' World Peace Council, to Cuban experts in Havana, and at the Fund for Peace offices in Washington. Philip Agee, the C.I.A. defector, credited N.A.C.L.A. staffers, the Cuban government, and the Cuban Communist Party with providing him with material for his anti-C.I.A. exposé. The Cuban government reprints N.A.C.L.A. materials and uses N.A.C.L.A. studies to "document" its anti-American attacks Many of the N.A.C.L.A. staffers are veterans of the Venceremos Brigade.

During the late summer of 1976, a N.A.C.L.A. task force led by Steve Volk and Elizabeth Farnsworth was working with Letelier in the production of pro-Allende economic propaganda. A letter from Ms. Farnsworth to Letelier dated August 25, 1976, read in part:

"I have a strong feeling that you could help us a great deal with certain parts of the December report. In about three weeks, Richard Feinberg (who is coauthoring our report with me) will contact you basically for an interview. Do not tell anyone else that he is working on the project, please. It would not help his work at Treasury (obviously)."

The Richard Feinberg to whom Ms. Farnsworth's letter refers is a former Peace Corps volunteer who now works as an economist in the Treasury Department's Office of Development Policy. The article which Ms. Farnsworth said Feinberg would coauthor was published by N.A.C.L.A. three months

[1] It is interesting to recall that members of OC5 are active supporters of the German terrorist group known as the Baader-Meinhof gang. Ramsey Clark, perhaps our least distinguished Attorney General, has sought to represent these Communist thugs in West Germany's courts; he was unsuccessful. However, he had more success in negotiating "guidelines" for the F.B.I. to observe at I.P.S. while investigating Letelier's death. The I.P.S. staffers, obviously with something to conceal, would not be interviewed by the Bureau until aided by legal talent working to Clark's guidelines.

after Letelier's death and was entitled "Time of Reckoning: The U.S. and Chile."

Feinberg now claims that he was "too busy" to cooperate with N.A.C.L.A.; however, the article indicates that considerable help was received from a government official who, according to the footnotes, "must remain anonymous."

In a telephone interview, Mr. Feinberg stressed that he had never met Orlando Letelier, had not coauthored the article, and was a "junior economist" without access to the higher levels of the U.S. Treasury. He refused to talk about his ties to N.A.C.L.A. or to explain why a N.A.C.L.A. functionary, Ms. Farnsworth, would put him in contact with Communist intelligence agent Letelier.

What should be done?

The F.B.I. should conduct a thorough investigation of the employees of Federal agencies who collaborated with or received money from Orlando Letelier. The Congress of the United States, however, has the responsibility to determine whether any of its Members or staff have been used by this man, whether they have received any money or other thing of value from him, provided any information to him, or acted in any way at the initiative of agent Letelier or any Communist power or entity. The matter is obviously very serious and deserves immediate official attention.

Mr. HELMS. Mr. President, yesterday, on this floor, I heard the distinguished and able Senator from Massachusetts criticize the terrorist operations of the Government of Libya, and their worldwide terrorist network. Yet Letelier and the IPS are very closely associated with that network. It is a matter of record that Mr. Letelier consulted with terrorist leaders, and the IPS has provided the arguments supporting terrorism and revolutionary movements of every kind, including those supported by Libya. With all due respect to the distinguished Senator, I find an inconsistency. If Letelier was a victim of terrorism, he was also an agent of terrorism.

I say that murder is murder; but let us keep it in perspective. Letelier was a man using the facade of the human rights movement to dupe the supporters of that movement. He was using the human rights movement to conceal the goals of terrorism, and he boasted of it to his Cuban connections.

He who lives by the sword shall die by the sword. Letelier was the knowing agent and participant in the plots and plans of international terrorism and international communism. It is not surprising that a man who lives by the deeds of terrorism should call down upon himself a terrorist's death.

Mr. PELL addressed the Chair.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. KENNEDY. Mr. President, I hope the Senator from Rhode Island will permit me to make a brief response, since my name was used in the course of this brief debate.

Mr. PELL. I yield to the Senator from Massachusetts.

Mr. KENNEDY. Mr. President, the Senator from North Carolina has been around the Senate long enough to know good, if somewhat questionable, debating techniques. One of the debating techniques familiar to him and many others is to say something that another Senator has not said and then dissociate himself with that. That is just what the Senator from North Carolina has done here.

All I mentioned was that there was an assassination of two individuals here in Washington, D.C. The name of one was Mr. Letelier. The name of the other was Ronni Moffett. Ronni Moffett, an American citizen—and Orlando Letelier, a former Foreign Minister of Chile and Ambassador to the United States. If he had violated the laws here in the United States, we should have taken the necessary actions against him. If he were an evil man or a bad man, that is something that can be said; but it has absolutely nothing to do with this particular amendment.

Why does the Senator from North Carolina not defame Ronni Moffett, an American citizen? She was entitled to the protection of American law. She was entitled to walk around Washington, D.C., without fear of assassination. Why does the Senator from North Carolina not defame her if that is what we are attempting to do? But the fact of the matter is that she had recently been married, and was living here in Washington. Her parents are a middle-class family from New Jersey; she worked as a research assistant.

Mr. President, what we are talking about here is a government that has been found by American courts to be involved in international terrorism and paid funds to assassinate individuals here, in Washington, D.C. If the Senator from North Carolina wants to lift the restrictions on military aid and sales, that is what his amendment would do. It would say that their record had so much improved that we are now going to permit sales and credits—credits in American taxpayers' money—to Chile.

I find it somewhat difficult to understand the rationale and the reasoning of the Senator from North Carolina in another sense as well. What possible sense does it make for the United States to arm Argentina to the teeth and arm Chile to the teeth so they can go out and kill themselves, with American weapons? Mr. President, if Mr. Pinochet or the Chilean Government want to buy military equipment, let it not be done with American military aid.

A final point, Mr. President, is that this amendment does not affect humanitarian aid and assistance. Despite my strong differences with the Chilean Government and the junta, if there are hungry children in Chile, they certainly should not be implicated for the outrageous, inexcusable actions of the Chilean Government. I would not, certainly, interfere with what has been the food assistance program to those individuals.

Mr. President, we have heard a lot of pious statements about trying to deal with international terrorism and the Hart amendment yesterday, I think, offered the opportunity for the Senate to go on record in one way, to say "No" on the issue of international terrorism. The tabling motion that I will soon offer on the amendment of the Senator from North Carolina will give Senators an opportunity to say "No" again.

The PRESIDING OFFICER. The Chair recognizes the Senator from Rhode Island.

Mr. PELL. Mr. President, I think the point that the Senator from Massachusetts made was very correct in that it is not in the American national interest to give weapons to conflicting parties around the world as we do. We have seen wars fought, as happened in the India-Pakistan War some years back, with American-furnished weapons on both sides. The same argument would apply here. The only country against which Chile would want to apply these weapons is with Argentina or vice versa. I think the question of what military assistance to these countries would be used for could well be asked.

We come to the case at hand and I find myself in a difficult position, because I do believe that the vicious government that was Chile's, and the autocratic government that it still is, has improved its treatment of people in the last few months and that fact should be recognized. There is no excusing, no condoning the hideous treatment of the past—the torture, the abuse. I have read some of the records of Amnesty International and I have heard reports directly of what human beings have suffered in the past. There is no excuse whatsoever. But the condition has improved a certain amount.

Nevertheless, I do not believe that a few months of improved behavior on the part of Chile is sufficient to warrant a change in the current policy prohibiting military assistance to that country. I believe that we should wait and see if recently improved conditions continue. Then when we consider next year's foreign assistance bill we will be in a better position to judge whether military aid to Chile should be resumed.

I think it would have been good, perhaps, if we had more time to consider this amendment of the Senator from North Carolina and have a hearing on the state of affairs in Chile. On balance, while I had hoped to be able to vote first on a compromise amendment, my understanding is that will not come up until after the vote on the tabling motion. Therefore, I shall support the motion of the Senator from Massachusetts.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. PERCY. Mr. President, I commend my distinguished colleague from Massachusetts for raising this issue, but I urge my colleagues to vote against the tabling amendment of the Senator from Massachusetts.

If the tabling amendment fails, I shall offer a perfecting amendment to the Helms amendment. The perfecting amendment will repeal the prohibitions on Chile. It will require that no assistance be furnished, no sales of defense articles or services may be made, no credits extended, no export licenses may be issued unless there is a certification from the President of the United States that the Government of Chile has made significant progress in complying with internationally recognized principles of human rights and that the provision of such assistance, articles, or services is in the national interest of the United States.

Mr. President, though there is much to be desired in the human rights policy of the Chilean Government, progress has

been made. Specifically, there have been no disappearances since October 1977, no indefinite detentions without charges since 1976, and amnesty in 1978 that freed most persons serving sentences for political reasons.

Therefore, I ask unanimous consent that following the tabling motion of the Senator from Massachusetts, and in the event that tabling motion fails—and I urge my colleagues to vote aaginst it—that I may offer at this time, for immediate consideration and without further debate, a perfecting amendment, and I would ask for the yeas and nays on that perfecting amendment at that time; that there be no debate; that it be voted on immediately, following the vote on the tabling motion of the Senator from Massachusetts, in the event that the tabling motion fails.

The PRESIDING OFFICER. Is the Senator from Illinois now putting the unanimous-consent request?

Mr. PERCY. The Senator from Illinois is.

Mr. KENNEDY. Mr. President, reserving the right to object, I express to the chairman and the ranking minority member of the Foreign Relations Committee my appreciation for the openness of the negotiations and discussions we have had over the period of several weeks on this subject.

This debate comes as no surprise to either of them. They have been frank and open in what they intended to do on this subject, and they made that clear to other Members of the Senate. As a legislator, I express appreciation for the way that has been handled.

I have no objection. At an appropriate time, when there is no further discussion, I will make my other motion.

Mr. HART. Mr. President, reserving the right to object, I wonder if it might be in order for there to be 5 or 10 minutes of explanation of the so-called compromise. I believe it is extraordinary to order a situation in which an amendment is offered and there is no debate on it. I do not believe that every Senator is in the Chamber to hear the chairman's 30-second explanation of his amendment. I think it might be in order for Senators to know what the subsequent vote will be.

Mr. PERCY. Mr. President, I respect such a request. I did summarize it. It is a short perfecting amendment. I will read the entire perfecting amendment that will be offered.

On page 1, line 4, of the amendment proposed by the Senator from North Carolina, after "Sec. 716.", insert "(a)".

On page 1, line 6, after the words "is repealed.", add the following words:

"(b) Notwithstanding any other provision of law—

"(1) No assistance may be furnished under chapters 2, 4, 5 or 6 of part II of the Foreign Assistance Act of 1961 to Chile;

"(2) no sale of defense articles or services may be made under the Arms Export Control Act to Chile;

"(3) no credits (including participation in credits) may be extended and no loan may be guaranteed under the Arms Export Control Act with respect to Chile; and

"(4) no export licenses may be issued under section 38 of the Arms Export Control Act to or for the Government of Chile, unless and until the President submits to the Speaker of the House of Representatives and the Chairman of the Committee on Foreign Relations of the Senate a detailed report certifying—

"(A) that the Government of Chile has made significant progress in complying with internationally recognized principles of human rights;

"(B) that the provision of such assistance, articles or services is in the national interest of the United States, and

"(C) that the Government of Chile is not aiding or abetting international terrorism.

"(5) It is the sense of the Congress that the Government of Chile should take steps to bring to justice by all legal means available in the United States or Chile those indicted by a U.S. grand jury in connection with the murders of Orlando Letelier and Ronni Moffitt."

Mr. HART. Mr. President, reserving the right to object, I am afraid that the Senator from Illinois did not quite understand what I was saying.

The point is that we are going to vote on a tabling motion. If that motion fails, under the unanimous-consent request, immediately after Senators coming to the floor and voting up or down on the tabling motion, they will vote on the substitute.

I think we can take judicial notice of the fact that six Senators are in the Chamber, and I doubt that many of them are listening to the Senator's reading of the amendment.

Could we have 10 minutes of discussion? I say that because yesterday we had some confusion about votes that were stacked up, and Senators came to the floor thinking there was general compromise and agreement on things, and there was not. I do not understand why we have to have one vote right after the other.

Mr. PERCY. The Senator from Illinois was smiply attempting to cooperate with the leadership and a number of Senators who are preparing to leave and who wish to be here for final passage. I thought it was a reasonable request.

Mr. President, I withdraw my unanimous-consent request.

I ask unanimous consent that in the event the Kennedy tabling motion fails, there be a period of 10 minutes, equally divided, to debate a perfecting amendment I shall send to the desk, and I shall ask for its immediate consideration. At the end of that 10 minutes, 5 minutes on a side, we would vote immediately, on a rollcall vote, on the so-called Percy perfecting amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, today I rise in support of the amendment by Senator HELMS from North Carolina. This amendment would repeal the statutory provision which prohibits U.S. military assistance, training, and commercial sale of arms to Chile.

Chile is a longtime ally of the United States and has supported major U.S. policies in this hemisphere. A continued good relationship with this South American country is a definite asset to our Nation at this time.

Mr. President, because of the export of communism by the Soviets and by Castro, this area of the globe has become increasingly unstable in recent years. Marxist factions have attempted to take advantage of problems in the economically depressed nations of South America.

It is my firm belief that we should do what we can to help Chile resist Communist aggression. Chile controls a strategically important position at the tip of the South American continent adjacent to key shipping lanes. For this and other reasons, Mr. President, it is important to the United States and other countries in the free world that Chile not come under Communist domination.

We should not unnecessarily restrict the President if he decides it is in the best interest of the United States to supply assistance to friendly countries such as Chile, who may desperately need it to maintain their freedom. It is time for the United States to uphold the Monroe Doctrine, and protect our interest in this hemisphere. Mr. President, for these reasons I fully support the amendment, and I hope my colleagues will do likewise.

UNANIMOUS CONSENT AGREEMENT ON S. 1503, CALENDAR NO. 290—THE STANDBY PETROLEUM ALLOCATION ACT

Mr. HELMS. Mr. President, on behalf of the majority leader, I ask unanimous consent that the Senate proceed to the consideration of S. 1503 following disposition of S. 1196, the Foreign Assistance Authorization Act.

I further ask unanimous consent that S. 1503 be temporarily laid aside by 12 noon on Friday, October 23.

Provided, further, that consideration of S. 1503 resume on Thursday, October 29.

Provided further, that when consideration is resumed on Thursday, October 29, there be the following time agreement:

Two hours on the bill to be equally divided between Senator MCCLURE and Senator JACKSON;

One hour equally divided on amendments in the first degree;

Thirty minutes equally divided on amendments in the second degree;

Twenty minutes equally divided on any debatable motions, appeals or points of order, if so submitted to the Senate and that the agreement be in the usual form, with the following exceptions:

A Bradley amendment as a substitute for the bill.

A Bradley amendment dealing with revenue recycling.

A Robert Byrd amendment dealing with energy budgets with 2 hours equally divided.

Provided, further, that Senator BRADLEY have 3 hours under his control, during which time he be permitted to offer the two Bradley specified nongermane amendments already identified and one germane amendment, and that Senator MCCLURE have 2 hours under his control in opposition to the Bradley amendments.

Mr. KENNEDY. Mr. President, reserving the right to object, if there is no objection from the minority leader on this, I will not object.

Mr. ROBERT C. BYRD. Mr. President, I will reserve the right to object, and I

thank the distinguished Senator from Massachusetts for protecting the leadership and the Members on our side of the aisle.

Mr. President, would it be the intention to lay this bill, S. 1503, before the Senate tonight and then lay it aside until Friday?

Mr. HELMS. That is correct.

Mr. ROBERT C. BYRD. I have no objection.

Mr. PERCY. That is, as soon as we have final passage tonight. Is that correct?

Mr. PELL. Is that assuming final passage of the foreign aid bill, first?

Mr. PERCY. That is correct. We are aiming for final passage tonight.

Mr. PELL. And if we do not achieve final passage tonight, then what happens?

Mr. PERCY. It would be the desire of the managers of the bill that the pending business tomorrow morning be the foreign aid bill, so that we do finish it. We are struggling very hard today. It now appears that it will be a timeframe of 9 o'clock tonight, unless Senators can cut down their time.

Mr. ROBERT C. BYRD. The request read by Mr. HELMS provides for temporarily laying before the Senate S. 1503, the Standby Petroleum Allocation Act, following the disposition of the pending business, and that then S. 1503 be temporarily laid aside by noon tomorrow until Thursday, the 29th. So there is no objection on this side.

The PRESIDING OFFICER. Is there objection to the request of the Senator from North Carolina? The Chair hears none, and it is so ordered.

Mr. HELMS. I thank the Chair.

The text of the agreement follows:

Ordered, That following the disposition of S. 1196, the Senate proceed to the consideration of S. 1503 (Order No. 290), a bill to authorize the President to allocate supplies of crude oil and petroleum products during a severe petroleum supply shortage: *Provided,* That on Friday, October 23, 1981, at no later than 12:00 noon, the Senate temporarily lay aside S. 1503.

Ordered further, That on Thursday, October 29, 1981, the Senate resume consideration of S. 1503 and that thereafter debate on any amendment in the first degree be limited to 1 hour (except for a Bradley substitute amendment for the bill, a Bradley amendment dealing with revenue recycling, and a further Bradley amendment which is germane, on which the Senator from New Jersey (Mr. Bradley) shall have a total of 3 hours, and the Senator from Idaho (Mr. McClure) shall have 2 hours in opposition to the 3 Bradley amendments; and a Robert C. Byrd amendment dealing with energy budgets, on which there shall be 2 hours), to be equally divided and controlled by the mover of such and the manager of the bill; debate on any amendment in the second degree be limited to 30 minutes, to be equally divided and controlled by the mover of such and the manager of the bill; and debate on any debatable motion, appeal, or point of order which is submitted or on which the Chair entertains debate be limited to 20 minutes, to be equally divided and controlled by the mover of such and the manager of the bill: Provided, That in the event the manager of the bill is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or his designee: Provided further, That no amendment that is not germane to the provisions of the said bill shall be received.

Ordered further, That on the question of final passage of the said bill, debate shall be limited to 2 hours, to be equally divided and controlled, respectively, by the Senator from Idaho (Mr. McClure) and the Senator from Washington (Mr. Jackson): Provided further, That the said Senators, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, debatable motion, appeal, or point of order.

INTERNATIONAL SECURITY AND DEVELOPMENT COOPERATION ACT OF 1981

The Senate resumed consideration of S. 1196.

The PRESIDING OFFICER. The Senator from California is recognized.

Mr. CRANSTON. Mr. President, I understand the Senator from Massachusetts (Mr. KENNEDY) will offer a motion to table the pending matter proposed by the Senator from North Carolina. I wish to speak to that matter. I urge my colleagues to support the motion to table when it is offered by the Senator from Massachusetts. I believe it extremely unwise for the United States to lift the ban on military sales to Chile at this time.

The Reagan administration has issued some strong rhetoric pledging an international campaign against terrorism. It is consistent with this to maintain our opposition to military sales to the Government of Chile, a government which has plotted and carried out an act of terrorism here in the streets of Washington.

The Reagan administration has also issued strong rhetoric pledging not to diminish our commitment to human rights. It is consistent with this to oppose lifting restrictions on sales to Chile, since the human rights situation in that country has deteriorated in the past year. Particularly outrageous was the summary expulsion of Jaime Castillo Velasco of the Chilean Committee on Human Rights, the former Chilean Minister of Justice, and the Chilean attorney for the family of Orlando Letelier.

As the Senator from Massachusetts has noted, such actions by the Chilean junta and summary detention of Chilean citizens by the secret police are taking place without authority under the Chilean Constitution, the same Constitution which has been put in place to insure General Pinochet's maintenance of dictatorial power until nearly the end of this decade.

I do not see how it would advance American interests or American ideals to funnel arms to such a dictatorship. We see daily press reports about the Reagan administration policy of shipping arms to every trouble spot around the world. I do not believe selling arms to Chile would advance our stature in the international community or advance our national security.

Thus, I will support and urge others to support the tabling motion to be offered by Senator KENNEDY.

Mr. KENNEDY. Mr. President, I make a motion to table the amendment of the Senator from North Carolina, and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Massachusetts to lay on the table the amendment of the Senator from North Carolina. On this motion, the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BAKER. I announce that the Senator from Rhode Island (Mr. CHAFEE), the Senator from New York (Mr. D'AMATO), the Senator from Alabama (Mr. DENTON), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), the Senator from South Dakota (Mr. PRESSLER), the Senator from Alaska (Mr. STEVENS), and the Senator from Connecticut (Mr. WEICKER), are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arkansas (Mr. BUMPERS), the Senator from Arizona (Mr. DECONCINI), the Senator from Connecticut (Mr. DODD), and the Senator from Massachusetts (Mr. TSONGAS), are necessarily absent.

The PRESIDING OFFICER (Mr. DANFORTH). Is there any other Senator who wishes to vote?

The result was announced—yeas 30, nays 57, as follows:

[Rollcall Vote No. 324 Leg.]

YEAS—30

Baucus	Glenn	Metzenbaum
Biden	Hart	Mitchell
Bradley	Huddleston	Moynihan
Burdick	Inouye	Pell
Byrd, Robert C.	Jackson	Proxmire
Cannon	Kennedy	Pryor
Cranston	Leahy	Randolph
Eagleton	Levin	Riegle
Exon	Matsunaga	Sarbanes
Ford	Melcher	Williams

NAYS—57

Abdnor	Hatch	Nunn
Andrews	Hatfield	Packwood
Armstrong	Hawkins	Percy
Baker	Heflin	Quayle
Bentsen	Heinz	Roth
Boren	Helms	Rudman
Boschwitz	Hollings	Sasser
Byrd, Harry F., Jr.	Humphrey	Schmitt
	Jepsen	Simpson
Chiles	Johnston	Specter
Cochran	Kassebaum	Stafford
Cohen	Kasten	Stennis
Danforth	Laxalt	Symms
Dixon	Long	Thurmond
Dole	Lugar	Tower
Domenici	Mathias	Wallop
East	Mattingly	Warner
Garn	McClure	Zorinsky
Gorton	Murkowski	
Grassley	Nickles	

NOT VOTING—13

Bumpers	Dodd	Stevens
Chafee	Durenberger	Tsongas
D'Amato	Goldwater	Weicker
DeConcini	Hayakawa	
Denton	Pressler	

So the motion to lay on the table Mr. HELMS's amendment (UP No. 502) was rejected.

Mr. KENNEDY. Mr. President, may we have order?

The PRESIDING OFFICER. The Sen-

ator is correct. The Senate is not in order.

Mr. KENNEDY. Mr. President, will the Chair state the parliamentary situation?

The PRESIDING OFFICER. Under the previous order, the Senator from Illinois (Mr. PERCY) is to be recognized to offer an amendment to the amendment of the Senator from North Carolina, with debate limited to 10 minutes, equally divided.

UP AMENDMENT NO. 503

Mr. PERCY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 503 to amendment No. 502.

Mr. PERCY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, line 4, of the amendment proposed by the Senator from North Carolina, after "Sec. 716.", insert "(a)".

On page 1, line 6, after the words "is repealed.", add the following words:

"(b) Notwithstanding any other provision of law—

(1) No assistance may be furnished under chapters 2, 4, 5 or 6 of part II of the Foreign Assistance Act of 1961 to Chile;

(2) no sale of defense articles or services may be made under the Arms Export Control Act to Chile;

(3) no credits (including participation in credits) may be extended and no loan may be guaranteed under the Arms Export Control Act with respect to Chile; and

(4) no export licenses may be issued under section 38 of the Arms Export Control Act to or for the Government of Chile, unless and until the President submits to the Speaker of the House of Representatives and the Chairman of the Committee on Foreign Relations of the Senate a detailed report certifying—

(A) that the Government of Chile has made significant progress in complying with internationally recognized principles of human rights,

(B) that the provision of such assistance, articles or services is in the national interest of the United States, and

(C) that the Government of Chile is not aiding or abetting international terrorism.

(D) It is the sense of the Congress that the Government of Chile should take steps to bring to justice by all legal means available in the United States or Chile those indicted by a U.S. grand jury in connection with the murders of Orlando Letelier and Ronni Moffitt."

Mr. PERCY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PERCY. Mr. President, I ask unanimous consent that this be a 10-minute rollcall vote.

The PRESIDING OFFICER. Is there objection to the rollcall being a 10-minute rollcall?

Mr. BAKER. Mr. President, reserving the right to object, I will be pleased to try to get consent to go to 10-minute rollcalls, but at this moment I would be constrained to object.

Mr. PERCY. Mr. President, I withdraw my request and ask for the yeas and nays.

The PRESIDING OFFICER. The yeas and nays have been ordered.

Mr. PERCY. Mr. President, it is my understanding that there is 10 minutes on this discussion, equally divided. The Senator from Illinois does not intend to take the full 5 minutes.

I would be happy to yield to the ranking minority Member at this time.

The PRESIDING OFFICER. Will the Senator suspend for a moment? The Senate is not in order.

The Senator from Rhode Island.

Mr. PELL. Mr. President, while, personally, I am disappointed that the Kennedy motion went down, I do believe that the amendment before us is an excellent one, carefully drafted and wisely drafted, the product of the chairman of our committee seeking to achieve the objective of the Kennedy amendment without the elements in it that may have caused it not to pass in the Senate.

If the administration is really intent on repealing the restrictions on military assistance to Chile, we should at least do what we did in the case of Argentina. We should receive a Presidential certification that Chile is making progress in the human rights area and we should be sure that Chile is doing all it can to extradite and bring to justice those indicted by the U.S. grand jury in connection with the assassination of Ambassador Letelier and Ronni Moffitt. And they are specifically mentioned in this amendment.

I congratulate my chairman for the amendment and look forward to its passage.

Mr. PERCY. Mr. President, I congratulate my distinguished colleague and also Senator KENNEDY and Senator HELMS for the discussion which has been extremely important, I think, on a vital issue.

Mr. President, these restrictions on arms sales and deliveries to Chile were adopted in fiscal year 1976 to demonstrate the Congress' sharp disapproval of the excesses of the Pinochet regime in Chile. The situation is not perfect in Chile. While I recognize that, I think there are several reasons why it is appropriate to remove restrictions now.

Since 1976, there have been significant improvements in the human rights situation in Chile. Specifically, there have been—No disappearances since October 1977; no indefinite detentions without charges since 1976; and amnesty in 1978 that freed most persons still serving sentences for political reasons.

The human rights performance record is not perfect. It is unfortunate that the Chilean Government will not restore elections until 1990—congressional elections, and 1997, Presidential elections. Nevertheless, the human rights performance, according to the criteria set down by the Congress in section 502B of the FAA, is substantially better than it was in 1976 and has been so for a number of years.

We have recently removed restrictions on sales of defense items to Argentina. Chile's human rights record has recently been better than Argentina's by the criteria of section 502B. It is therefore appropriate that this be recognized if restrictions on assistance to Argentina are lifted.

On another dimension, Chile and Argentina have been close to armed conflict over territorial questions in the Beagle Channel. It is not in the U.S. interest to appear to favor one party over the other in this region.

My perfecting amendment to Senator HELMS' amendment would repeal section 406 of the International Security Assistance and Arms Export Control Act of 1976 in its entirety and requires a Presidential report certifying that—

First, the Government of Chile has made progress in observance of internationally recognized human rights;

Second, the provision of such materiel is in the U.S. national interest; and

Third, the Government of Chile is not aiding international terrorism.

I believe the President will be able to review the facts of the situation in Chile and make a determination on these questions.

With respect to section (c) of my amendment, the sense of Congress language with respect to the Letelier case, let me say that there continue to be serious concerns in this country about the Letelier case. My understanding of that case is that in accordance with the terms of our bilateral treaty with Chile, the United States requested extradition of three Chilean nationals indicted by the U.S. district court in August 1978. The President of the Chilean Supreme Court turned down the extradition request because under Chilean law, evidence obtained under plea bargain is not acceptable.

A review of the decision was conducted and again the extradition request was turned down. The U.S. Government role in the case ended in October 1979, when the review panel upheld the Supreme Court President's ruling.

The case has continued in the Chilean military judicial system, but no new evidence—other than that provided by Michael Townley—has been introduced, and on September 17, 1981, a Chilean Appeals Court confirmed earlier court decisions to close the case against the three Chilean nationals. The Letelier family had 5 to 15 days to appeal the closing of the case, but was not expected to be successful as no new evidence has thus far been found with respect to the assassination charges.

I must say that we in this country have been disappointed that the Chilean Government has not been more cooperative in seeking justice in this case. The assassination of Orlando Letelier was a heinous act, and one that leaves an indelible mark on relations with Chile.

But there are limits to the effectiveness of clubs. Our concerns are well known to Chile. There are other issues we would like to pursue with Chile. It is perhaps time to step back and consider new ways to deal with the questions of human rights with Chile. Our concerns are not changed. They are stated in the certification language and in a strong

sense-of-Congress language of section (c). But we open the door for new initiatives. I hope we can accomplish all our purposes with this compromise.

I offer this perfecting amendment to Senator HELMS' proposal to repeal restrictions on sales to Chile as a compromise that will permit bipartisan action in this case.

Mr. President, I am happy to yield to my distinguished colleague from North Carolina.

Mr. HELMS. Mr. President, I really do not see the necessity of having a rollcall vote on this, but I know there are some who want it.

I wish to commend the Senator and I appreciate being able to work with him in this connection. I fully support the perfecting amendment.

I ask if the Senator would honor me by listing me as a cosponsor of the amendment.

Mr. PERCY. Mr. President, I ask unanimous consent that the distinguished Senator from North Carolina (Mr. HELMS) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I will take just 2 minutes.

I regret, Mr. President, that we were not successful in being able to table the Helms amendment. The language now being offered resembles the language which the Senate accepted in the case of Argentina. It also expresses the sense of the Congress that the Government of Chile should take the step by all means available to bring to justice all those indicted by the grand jury on the murders of Orlando Letelier and Ronni Moffitt.

I think this is a very powerful expression by the Members of this body. I will support the substitute.

The Senate has now decided to consider our assistance relationship with Chile. As I have previously stated, I strongly believe that the United States should not have such a relationship. The Government of Chile continues to violate the human rights of its citizens; it has failed to take clear and convincing actions to bring to justice its secret police who conspired to assassinate an American resident in Washington; and it has aided and abetted such terrorist acts not only in the United States but in other countries as well.

I welcome the extensive consultations which the chairman and ranking member of the committee, Senator PERCY and Senator PELL, have conducted with me on this issue. As a result of these consultations they have introduced language setting out clear conditions which must be met before assistance is provided. To clarify the intent and the effect of this proposed amendment, I request unanimous consent that a colloquy agreed with the chairman and the ranking member of the committee appear at this point in the RECORD, and that our remarks follow as they would be delivered on the floor.

I would like to pose several questions to my colleagues.

Mr. PERCY. I would be glad to respond to the questions from my friend the senior Senator from Massachusetts. As he has pointed out, we have consulted extensively on this issue, and the compromise language we have developed is the result of consultations with Senator KENNEDY and other members of the committee.

Mr. PELL. I have also discussed the issue of Chile extensively with Senator KENNEDY. I share his deep concerns about human rights violations in Chile and terrorist actions by its Government, and particularly the tragic assassinations of Orlando Letelier and Ronni Moffitt. I believe that the compromise language we now offer goes to a considerable extent to satisfy the legitimate concerns expressed by Senator KENNEDY.

Mr. KENNEDY. I thank Senator PERCY and Senator PELL. May I ask the Senators whether they share my view that when we talk about "significant progress in complying with internationally recognized principles of human rights," we are talking about significant progress on important matters such as protection against internal and external exile, freedom of speech, freedom of press, and the right to organize and operate political parties and free labor unions.

Mr. PERCY. Yes, I share your view that complying with "internationally recognized principles of human rights" should include these very important matters.

Mr. PELL. I share the views of both Senator KENNEDY and Senator PERCY that "significant progress" in these areas is of particular importance and should be carefully considered before there is any change in our present policy toward Chile.

Mr. KENNEDY. Do you share my judgment that the Government of Chile is not presently fulfilling these conditions and the United States should be working to obtain these conditions in Chile?

Mr. PERCY. I believe that the executive branch, as provided in this amendment, should make any determination on actual conditions in Chile. The Congress should then carefully review any finding received from the executive branch, and I can assure Senator KENNEDY that the committee will take into account in our review each of the matters he has suggested.

Mr. PELL. Senator KENNEDY makes a very good point and it seems to me that these conditions are not presently fulfilled in Chile and our Government should be making every effort to achieve these conditions. Clearly these conditions should be fulfilled if there is to be consideration of a security assistance relationship with Chile, and I strongly support the chairman's commitments to this effect.

Mr. KENNEDY. The Senators will understand that I do not believe that there is an acceptable basis for Presidential certification permitting any form of security assistance to Chile at this time. If there is a Presidential certification, will the Foreign Relations Committee hold hearings since there have been none before and since these are conditions taken extremely seriously by the Congress?

Mr. PERCY. Yes, I can assure the Senator that the Foreign Relations Committee will hold full hearings on any certification received from the President regarding Chile.

Mr. PELL. I agree that the committee should hold hearings to see if there is any basis for Presidential certification, and it seems to me that there is no present basis for such a certification.

Mr. KENNEDY. I believe it is very important for the United States to be clearly on the record against international terrorism and for the rule of law. In the case of Chile, the Pinochet government must clearly understand that it cannot repeat terrorist acts such as the murders of Orlando Letelier and Ronni Moffitt. The Government of Chile has failed to cooperate in bringing to justice all those responsible for these murders, and we expect new steps designed to bring them to justice. Do you agree that that is the clear intent and effect of this amendment?

Mr. PERCY. I do agree that our Government should press the Government of Chile to insure that justice is done.

Mr. PELL. There can be no question on this point. Over the years the U.S. Government and, in the past several months, this administration has reiterated in no uncertain terms our opposition to terrorism. The murders of Orlando Letelier and Ronnie Moffit here in the streets of Washington fall clearly into this category and we must not diminish our efforts to get the Government of Chile to bring to justice those persons responsible for those assassinations. Without progress on this issue, I do not see how any assistance could be justified for Chile.

Mr. KENNEDY. In fact, it is my understanding that there are no present plans for any security assistance or arms sales to Chile. Do the chairman and the ranking member share my view that any moves toward such assistance or sales should be only on the basis of the most careful and detailed advance consultations with the committee? Do they further share my view that no funds should be reprogramed under this legislation for these purposes?

Mr. PERCY. I am aware of no such plans, and I am prepared to assure the Senator that the committee will consult with him on any steps that may be contemplated, in addition to our earlier undertaking to hold full committee hearings on any Presidential certification on Chile.

Mr. PELL. I welcome these further assurances by the chairman. They are entirely appropriate in the case of Chile. For all the reasons indicated by Senator KENNEDY, Chile should be considered as a case separate from others covered by this bill. Senator KENNEDY has had a deep personal interest on this issue since authoring the original prohibitions on security assistance to Chile in 1976, and I am pleased that we are able to offer him these assurances which we take extremely seriously.

Mr. PERCY. I believe that our Government should approach with the utmost care and seriousness any proposed changes in our assistance relationship

with Chile, to insure that these are in our national interest.

Mr. President, I thank the senior Senator from Massachusetts for his thoughtful comments. Again, I commend him for the deep feeling with which he has expressed his strongly felt convictions in this area.

Mr. President, I ask unanimous consent that the distinguished Senator from Rhode Island (Mr. PELL) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, I yield back the remainder of my time. I think we are ready for the vote.

The PRESIDING OFFICER. All time is yielded back. The question is on agreeing to the amendment of the Senator from Illinois. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BAKER. I announce that the Senator from Rhode Island (Mr. CHAFEE), the Senator from New York (Mr. D'AMATO), the Senator from Alabama (Mr. DENTON), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), the Senator from South Dakota (Mr. PRESSLER), the Senator from Alaska (Mr. STEVENS), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arkansas (Mr. BUMPERS), the Senator from Arizona (Mr. DECONCINI), the Senator from Connecticut (Mr. DODD), the Senator from Massachusetts (Mr. TSONGAS), and the Senator from Ohio (Mr. METZENBAUM) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 86, nays 0, as follows:

[Rollcall Vote No. 325 Leg.]

YEAS—86

Abdnor	Gorton	Mitchell
Andrews	Grassley	Moynihan
Armstrong	Hart	Murkowski
Baker	Hatch	Nickles
Baucus	Hatfield	Nunn
Bentsen	Hawkins	Packwood

NOT VOTING—14

Bumpers	Dodd	Pressler
Chafee	Durenberger	Stevens
D'Amato	Goldwater	Tsongas
DeConcini	Hayakawa	Weicker
Denton	Metzenbaum	

So Mr. PERCY's amendment (UP No. 503) was agreed to.

Mr. BAKER. Mr. President, what I am about to say is in no way critical of any Senator, and certainly not the sponsor of the amendment which has just been agreed to by a vote of 86 to 0. It seems to me that it might have been done by voice vote.

I hope that Senators not only will come to the floor soon and offer their amendments, or relinquish their opportunity to do so, but as well would forego the opportunity to have rollcall votes. They inevitably consume at least 15 minutes, and usually longer than that.

Mr. President, according to the list I have, amendments remaining are as follows: Two amendments that may be offered by the Senator from North Carolina. I hope he will be his usual soul of brevity.

Mr. HELMS. I guarantee it.

Mr. BAKER. There are three amendments to be offered by the Senator from Texas (Mr. TOWER). He is in the Chamber at this moment, and I urge him, as well, to use restraint.

The Senator from Oregon (Mr. HATFIELD) has an amendment. The Senator from Ohio (Mr. GLENN) has an amendment. The Senator from Wisconsin (Mr. KASTEN) has an amendment. Senator ZORINSKY wishes to engage in a colloquy.

Mr. President, what I am about to say is in no wise meant to be anything other than inducement. It certainly should not be thought of as legislative coercion.

If we can finish this bill tonight—and we can, if we really put our shoulder to the wheel—I think it will vastly decrease the chances that we will have any rollcall votes tomorrow. If anybody feels coerced by that, I apologize. If we finish this bill tonight and do not have to carry it over until tomorrow, it is unlikely that we will require rollcall votes on either the Emergency Petroleum Allocation Act or the Interior appropriation bill on tomorrow. We will be on both those measures. After opening statements and initial debate on both of them, I doubt that we would have to have rollcall votes.

So, with this incentive, I hope we will try to complete this bill as soon as possible. If we do have final passage tonight, I pledge that I will do my best to see that we do not have rollcall votes tomorrow.

Mr. PERCY. Mr. President, will the majority leader yield?

Mr. BAKER. I yield.

Mr. PERCY. I would not call that legislative coercion. That is the good old American incentive system. We get the message.

We had no idea we were going to have such a lopsided vote as we had, or we would not have had a rollcall vote.

We will try to avoid future rollcall votes. We will ask Senators, as much as possible, to insert their comments in the RECORD and move along with the greatest possible dispatch.

I am delighted to see my distinguished colleague from North Carolina in the Chamber, prepared to offer his amendments with dispatch, taking into account the incentive system that has been mentioned.

Without further ado, I yield the floor.

The PRESIDING OFFICER. The question now occurs on the amendment of the Senator from North Carolina, as amended by the amendment of the Senator from Illinois.

The amendment (UP No. 502), as amended, was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PERCY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 504

(Purpose: To retain authority for leases of defense articles to foreign countries or international organizations in title 10, section 2667 and to eliminate the requirement for legislative review of these leases.)

Mr. TOWER. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Texas (Mr. TOWER) proposes an unprinted amendment numbered 504.

Mr TOWER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 13, beginning with line 1, strike out all down through line 17 on page 18 and insert in lieu thereof the following:

SEC. 110. (a) Section 2667 of title 10, United States Code, relating to leases of non-excess property, is amended by adding at the end thereof the following new subsections:

"(g) Not less than thirty days before entering into or renewing any agreement with a foreign country or international organization to lease under this section any major defense equipment (as defined in Section 47(6) of the Arms Export Control Act) valued at $14,000,000 or more and any other property valued at $50,000,000 or more for a period of more than one year, the Secretary of Defense shall transmit to the Speaker of the House of Representatives, and to the Chairman of the Committee on Foreign Relations of the Senate and the Chairman of the Committee on Armed Services of the Senate, a written notification which specifies—

"(1) the country or international organization to which the defense article is to be leased;

"(2) the type, quantity, and value (in terms of replacement cost) of the defense article to be leased;

"(3) the terms and duration of the lease; and

"(4) a justification for the lease, including an explanation of why the defense article is being leased rather than sold under the Arms Export Control Act.

The Secretary of Defense may waive the requirements of this section if he determines, and immediately reports to the Congress, that an emergency exists which requires that the lease be entered into immediately in the national security interests of the United States.

"(h) The Secretary of Defense shall transmit to the Sepaker of the House of Representatives and to the Chairman of the Committee on Armed Services of the Senate not more than sixty days after the end of each quarter a listing (classified if necessary) of all property valued at $1,000,000 or

more which was leased, during the quarter for which such report is submitted, to a foreign government for a period of more than one year under this section.

"(1) Any reference to sales of defense articles under the Arms Export Control Act in any provision of law restricting the countries or organizations to which such sales may be made shall be deemed to include a reference to leases of defense articles under this section.".

(b) Section 109 of the International Security and Development Cooperation Act of 1980 is repealed.

(c) Section 36(a) of the Arms Export Control Act is amended by deleting paragraph (10).

Mr. TOWER. Mr. President, I am offering this amendment on behalf of the Armed Services Committee. This can be regarded as a committee amendment from the Armed Services Committee.

Section 110 deals with leases of defense articles, a legislative authority currently embodied in title 10, section 2667 under the jurisdiction of the Armed Services Committee.

Section 110, as currently written, would change the jurisdiction over this authority from the Armed Services Committee to the Foreign Relations Committee.

This would be done by eliminating the authority of the Department of Defense to enter into leases of defense articles to foreign countries or international organizations from title 10 under the Armed Services Committee's jurisdiction and establishing it in the Arms Export Control Act under the jurisdiction of the Foreign Relations Committee.

This jurisdictional change, in my view, makes no sense, and that is why the Armed Services Committee has proposed this amendment to section 110. The defense articles that can be leased under current authority must be temporarily in excess of the needs of U.S. military forces. Only the Armed Services Committee can evaluate what is in excess of current U.S. military needs.

The leases that have been entered into with foreign countries and international organizations are largely for the following purposes:

Cooperative defense research and development programs;

Short-term military training;

Allied use of sensitive U.S. equipment in joint exercises;

Allied use of an item on a temporary basis for test and evaluation prior to a purchase decision; and

Allied use of equipment not required in peacetime by the U.S. forces, but required for war.

These cooperative defense programs and efforts with foreign countries are clearly the day-to-day business of the Armed Services Committee. The committee has been extensively involved in cooperative defense programs with allies and friends, an increasingly important effort in today's world. In my view, it is ludicrous to even consider the removal of the Armed Services Committee from review of defense leases for these purposes.

The amendment that the Armed Services Committee has offered retains the defense leasing authority in title 10 where it currently resides.

The committee is also distressed by another portion of section 110 which calls for a legislative review and congressional veto of defense leases, identical to that required for foreign military sales. While certain dollar and lease period thresholds have been established for this legislative review, this requirement is an excessive burden on Congress which is overtaxed by its current workload.

I simply remind our colleagues of how much time, effort, energy, intellect, and emotion have been spent on the AWACS deal to Saudi Arabia.

In fact, what this does is to establish congressional veto over all military leasing, and we will be bogged down forever in that kind of thing and be imposing an unnecessary proscription in terms of activity in the field of international relations and formulation and implementation of foreign policy on the President, whoever he might be. The committee's amendment removes the requirement for this legislative review.

There are two portions of section 110 which are retained in the Armed Services Committee's amendment. The first requires a report by the Secretary of Defense 30 days prior to entering into a major lease. This requirement will substantially assist congressional oversight of the leasing authority.

The second portion of section 110 retained in the committee's amendment is the application of other provisions of law to defense leases. This would provide that restrictions on countries or organizations for defense sales would also apply for defense leases.

Mr. President, the proposed amendment includes the major policy objectives of the current section 110. It eliminates the unacceptable removal of the expertise of the Armed Services Committee from review of defense leasing. It also eliminates the unnecessary burden of a time-consuming legislative review of defense leasing.

The Armed Services Committee's amendment meets the needs of Congress without overburdening Congress. I urge our colleagues to adopt this amendment.

Mr. PERCY. Mr. President, this amendment involves one member of the Foreign Relations Committee who is unfortunately not in the Chamber yet. We have sent an urgent message to Senator ZORINSKY to come to the Chamber and I hope that he will be here shortly.

On April 27, 1981, the General Accounting Office prepared a study at Senator ZORINSKY's request concerning defense leasing. The GAO study concluded that this legislation was "originally intended to permit the lease of military equipment within the United States." Increasingly, however, this authority has been misused to provide leases for defense equipment to foreign countries without review by the Foreign Relations Committee.

GAO's final conclusion is that—

Transfer of military equipments on this (leasing) basis is tantamount to grant aid which should be authorized only under the Foreign Assistance Act.

Section 110, introduced by Senator ZORINSKY and adopted unanimously by the committee, simply implements the GAO recommendation.

The amendment does not prohibit defense leasing to foreign countries, it simply provides explicit authority for the President to do this in the act that authorizes similar arms transfers.

This amendment seeks to place the growing practice of defense leasing under congressional controls similar to those now in place on other forms of arms transfers.

Under successive administrations, the Defense Department has employed a provision of law, originally intended for domestic leases of defense stocks, to implement controversial arms transfers. For instance, jets were leased to Pakistan in 1979 and helicopters to El Salvador in 1981 outside the reporting and approval restrictions of the Arms Export Control Act.

There just is not anyone who can say, when we go into a very delicate situation such as we are in El Salvador, that putting equipment down there does not involve foreign relations.

This caused an uproar not only in the United States and virtually every major city, but my own office was stormed by the loveliest people wearing the cloaks of the church and they absolutely refused to leave that office at closing time and had to be evicted by U.S. marshals in accordance with the ordinances of the Federal building, but the emotion was very deep on this foreign policy issue.

The question they had was "Were we or were we not going to give in to the business of providing one way or another—in this case by lease—military equipment with attack capability to El Salvador?"

Many people in this country felt we were getting into another Vietnam. Lest we think it was confined to just the United States, and protest groups all over the country in the United States, President Reagan very early in his term of office developed intelligence and study committees and sent these committees out after a study was made to countries all over Europe and Latin America, special missions from the President in order to explain to these countries what we were doing.

What arms were coming in, wherever they were coming from, the fact that American-made weapons captured by the Vietcong in Vietnam were being sent into El Salvador, we have the obligation, the duty, to interdict, cut off the supply of arms. But there is not anyone who can say that we were not deeply embroiled in a foreign relations matter that falls clearly within the jurisdiction of the Committee on Foreign Relations.

For that reason leasing equipment, sending equipment around the world, whether it is to El Salvador, as I mentioned, in 1981 or whether it is sent to Pakistan in 1979, an area that is a highly volatile area, with which we are dealing intensively day after day, working closely with the administration, these are matters that are clearly within the jurisdiction of the Committee on Foreign Relations.

The International Security and Development Cooperation Act of 1980 now

requires a reporting of all defense leases to Congress. The provision in the current aid bill builds upon previous legislation and gives Congress a review power similar to that available over all other forms of arms transfers.

Defense leasing practices are the proper concern of this bill under the jurisdiction of the Committee on Foreign Relations. This legislation seeks to establish congressional control over practices which often amount to major foreign policy commitments. As such, these leases fall under the national security oversight concerns delegated by the rules of the Senate to the Senate Committee on Foreign Relations.

The Committee on Armed Services certainly has an interest in those leases which could draw down defense stocks. However, nothing in this provision would prevent additional legislation being referred to the Committee on Armed Services to place an annual ceiling on the amount of property to be leased.

The Senator from Illinois would be the first to say that the cooperation between the Committee on Armed Services, its chairman, its membership, and the Committee on Foreign Relations has been unusually close in this session of Congress. We have reached out to each other where we each have areas of expertise. We have readily recognized there is a close correlation between foreign policy and defense. In fact, I have long felt and thought that there is no possibility of having a credible foreign policy without having a strong national defense.

It is for this reason that I voted time and time again against any effort to undercut our budget. I have supported the requests and the buildup of our defense establishment, and have applauded the work of the Committee on Armed Services in this area.

I would be the first to say that as the leader of the free world, our defense is of paramount and highest priority. But no leases should be made, no grants of equipment, no cut should be made in our own national defense in order to provide for the defense of others unless it is determined by our own Joint Chiefs, by our Department of Defense, by our Committee on Armed Services that the equipment is so necessary that it ought to have priority because it is put in the hands of people who can act out in the first line, and the first line of defense for us many times is a strong ally abroad that is right in the frontline.

But I think we certainly can work out these kinds of decisions cooperatively. Certainly the committee would have no objection whatsoever to having ceilings placed on drawdowns, to make absolutely certain that we never undercut, never endanger, never shortchange the requirements of our own armed services. Throughout the free world we have a dual role: We must provide not only for the national security of the United States, but having accepted the responsibility of being a leader of the free world, our defense responsibilities have foreign policy implications too. We feel jurisdiction lines are clear, and the report of the GAO is a report that must be respected.

Since this amendment was introduced by Senator ZORINSKY I should like to yield to him at this time or at any proper time so that he may expand on the point of view. I am very pleased that he has arrived now and can explain his amendment and the way in which, hopefully, he would like to reach out and work with the Committee on Armed Services so that we have a comity of interests, that we have a cooperative interest with the Committee on Armed Services, and not working at odds in any way, but strongly feeling that we do have a jurisdictional right here that we as committee members must and should protect because this has been the jurisdiction of the Committee on Foreign Relations for many years.

I yield the floor to my distinguished colleague, the ranking minority member, Senator PELL.

Mr. PELL. Mr. President, as passed by the Foreign Relations Committee, the defense leasing amendment seeks to place foreign leases of defense articles under congressional controls, similar to those now in place for all other types of arms transfers.

Such a provision is particularly necessary since defense leases, with increasing frequency, have come to represent major foreign policy commitments.

For instance, helicopters were leased to El Salvador in early 1981 as a showing of U.S. support for President Duarte—all outside the reporting and approval restrictions of the Arms Export Control Act.

As a growing and significant form of military assistance, leases of defense articles fall directly under the established jurisdiction of the Foreign Relations Committee.

Further, it is not the case that only the Armed Services Committee can assess the impact of military transfers on defense cooperation. Such concerns also come under the national security oversight responsibilities assigned, by the Senate rules, to the Foreign Relations Committee.

The defense leasing amendment of the bill is not unfairly burdensome to the President. Over the years, successive administrations have decided to employ leasing as a significant arms transfer device. This provision only recognizes what has become fact, and subjects defense leases to exactly the same controls as on all other forms of arms transfers.

It is true that the Armed Services Committee has a special interest in maintaining adequate procurement and inventories of defense stocks. However, the committee provision already includes a reporting requirement to the Armed Services Committee. At the same time, there is nothing in the committee provision to prevent additionl legislation to place an annual ceiling on the amount of defense property that can be leased.

Mr. President, the chairman and ranking member of the Senate Appropriations Committee have recently written to Senator ZORINSKY and expressed enthusiastic support for the defense leasing amendment.

I ask unanimous consent that this letter from Senators HATFIELD and PROXMIRE be printed in the RECORD immediately following my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COMMITTEE ON APPROPRIATIONS,
Washington, D.C., October 20, 1981.

Hon. EDWARD ZORINSKY,
Russell Senate Office Building,
Washington, D.C.

DEAR ED: We have reviewed S. 1196, the FY 82 foreign aid authorization, and wish to commend you for offering an amendment, during the Senate Foreign Relations Committee's consideration of the bill, to bring the practice of defense leasing to foreign governments under adequate Congressional review and control. It is our understanding that your amendment was based on the finding of the General Accounting Office that Section 2667 of title 10, United States Code, intended to provide for domestic leases only, has been consistently and inappropriately used to lease military equipment to foreign governments. The GAO concluded that this practice was a circumvention of the Arms Export Control Act and the Foreign Assistance Act. From our perspective, we would add that it is a circumvention of the appropriations process as well.

We believe that the Senate Foreign Relations Committee acted wisely when it decided to adopt your amendment, and we wish to add our names in support of this important proposal. In our view, the Senate owes you a debt of gratitude for spotting this loophole and for working in such a prudent and effective way to close it.

Sincerely,

MARK O. HATFIELD,
Chairman.
WILLIAM PROXMIRE,
U.S. Senator.

Mr. PELL. I yield to the Senator from Nebraska.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. ZORINSKY. I thank the Chair.

Mr. President, seven U.S. ships worth $14 million are out on the seas somewhere, but the U.S. Government, and that includes the Congress, lost track of them 8 years ago when the lease for the ships expired.

Three million dollars worth of U.S. radar equipment leased rent-free in 1974 was not returned at the expiration date of the lease in 1979, and we still do not have the equipment.

A rent of more than $40,000 was supposed to have been received on a lease of military equipment. The case was closed in 1976, and it was not discovered until this year that the rent still remained unpaid.

Twenty-two jet fighters were leased to one foreign country by the United States after the U.S. Government had cut off all military assistance to that country.

Managers for leases of military equipment to foreign countries are uncertain how payments for rent, maintenance, and spare parts are collected. They cannot provide evidence that rent payments have been deposited in the U.S. Treasury account as required by law. They use an accounting system which makes it difficult, if not impossible, to compare billings with receipts, and the U.S. General Accounting Office has reported to Congress that the authority under which these leases were made should never have been used for the purpose of leasing military equipment to a foreign

country. The authority was designed for domestic purposes only.

Mr. President, does it sound like a scandal? It is. The purpose of the Committee on Foreign Relations' amendment regarding these leases is only to put a stop to this slipshod arrangement and to bring the practice of defense leasing under congressional controls the same as those required for other forms of arms transfers to foreign countries.

Administration after administration, Democrat and Republican alike, have misused a provision of law clearly intended only for domestic leases of defense stocks to carry out the transfer of military equipment to foreign countries with complete disregard for all other laws controlling such transfers and with no congressional oversight.

The misused authority is so broadly written that under the executive branch interpretation the Secretary of the Air Force—not the Secretary of Defense or the President but the Secretary of the Air Force—would be empowered to lease AWACS to Saudi Arabia or jet airplanes to the People's Republic of China.

In dozens of cases military equipment paid for by the American taxpayers has been leased free of charge to foreign countries while our own military suffers shortages.

In a recent study requested by the Senate Foreign Relations Committee, the General Accounting Office concluded that the practice of defense leasing was "tantamount to grant aid which should be authorized only under the Foreign Assistance Act." It is the GAO's recommendation that such leasing of military equipment to foreign countries be discontinued entirely.

Mr. President, the committee's amendment does not do that. It is not designed to be punitive. Rather, it establishes a Presidential authority to lease under the Arms Export Control Act. The committee's amendment simply seeks to rationalize the process, and to bring defense leases to foreign governments under the same controls, no more—no less, as those for other types of transfers of military equipment to foreign governments. The committee's amendment builds on the work accomplished last year when the Congress required, for the first time, a reporting of leases of military equipment to foreign governments.

It also builds on the careful and important study by the GAO which went into its report to the Congress on the practice of defense leasing. The committee's amendment provides a tool with which the Congress can fulfill its obligations to oversee programs of military assistance to foreign nations and to protect the national security interests of the United States.

Finally, Mr. President, my colleagues should know that the language of the committee's amendment is compromise language, hammered out by a bipartisan consensus in the House Foreign Affairs Committee, where the amendment was initially adopted some months ago. The language takes into account—and makes adjustment for—the views of the administration and of Members on both sides of the aisle. Although a compromise, I recognize it as a fair, bipartisan and good faith effort to address the issues raised by the GAO report, and as such, I recommend the Senate's enthusiastic endorsement of the committee's amendment.

JURISDICTION

Section 2667 of title 10, United States Code, was intended as an authority for domestic leasing only. GAO reported to the Congress that the Department of Defense has improperly and increasingly used this leasing authority for military assistance to foreign governments, thereby circumventing the Foreign Assistance Act and the Arms Export Control Act. Both of these laws are under the sole jurisdiction of the Senate Foreign Relations Committee. The amendment adopted by the committee deals only with leases to foreign governments and does not touch the area of domestic leasing, which was the original intent of this particular law.

The committee amendment seeks only to place the leasing of military equipment under the same requirements as the transfer of military equipment by sale or loan.

If military assistance, whether by a sale, loan, or lease, to a foreign government is not under the jurisdiction of the Foreign Relations Committee, then what is? The Standing Rules of the U.S. Senate give the Foreign Relations Committee specific jurisdiction over foreign military assistance and national security policy. All other transfers of military equipment to foreign countries is under the jurisdiction of the Foreign Relations Committee.

The Armed Services Committee certainly has an interest in avoiding the depletion of U.S. defense stocks, but the committee provision only allows leasing of articles "not for the time needed for public use."

Other legislative authority relating to U.S. defense stocks is already under the sole jurisdiction of the Foreign Relations Committee, such as the drawdown authority, under which the President can provide military assistance to foreign countries from U.S. defense stocks in emergency situations, and the authority under which the President can loan defense articles to foreign countries.

Nothing in this committee provision would prevent additional legislation by the Armed Services Committee placing an annual ceiling on the amount of property to be leased. Moreover, under the leasing provision adopted by the Foreign Relations Committee, prenotification of leases will be made to the Armed Services Committee for the first time. Presently there is no reporting on such leases to the Armed Services Committee, and leasing from defense stocks has been on the increase.

The Foreign Relations Committee has already exercised jurisdiction over defense leasing practices by placing a reporting requirement in last year's International Security and Development Cooperation Act. The Armed Services Committee did not object to either the jurisdiction or the substance of that amendment last year.

The House Foreign Affairs Committee adopted this identical amendment some months ago. It is my understanding that the House Armed Services Committee has not objected to the amendment on the grounds of jurisdiction or substance. Although the Senate operates under its own rules, the parallel is very interesting.

If the Armed Services Committee claims jurisdiction over leases to foreign governments then perhaps they can explain what they were doing in 1976 when Security Assistance officials closed the case of a $40,836 lease to Saudi Arabia without having ever received the first nickel in payment. And where were they in 1979 when the lease for $3 million worth of Army radar equipment to Argentina expired. The radar equipment still has not been returned. And where was the Armed Services Committee during the last 8 years while seven U.S. ships, valued at $14 million and leased to Chile, were not returned as provided in the lease, and perhaps only God knows where these ships currently are. It is incomprehensible that any member on the Armed Services Committee would want to claim responsibility for such oversight. The only answer is that administration after administration, Democrat and Republican alike, sought to avoid congressional oversight by misusing a domestic authority—and they have succeeded.

Thank you, Mr. President.

Mr. TOWER addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas.

Mr. TOWER. Mr. President, the Senator from Nebraska has just accused the Armed Services Committee of dereliction of its responsibility and, therefore, proposes to relieve us of jurisdiction over a matter in which we currently exercise jurisdiction.

In my view, Mr. President, the Armed Services Committee has exercised adequate oversight. If it has failed to act in some instances, it felt no action was necessary.

But, the Senator from Nebraska says we have been derelict, we have been neglectful, and, in fact, sugested that we have been incompetent.

I really would have to defend my predecessors—Senator Russell of Georgia, a great towering figure in this Senate; and Senator STENNIS, currently the ranking minority Member—because I believe they were always very diligent in exercising the oversight responsibility of the Armed Services Committee.

And I think that this attempt to take jurisdiction away from that committee because of what somebody might perceive of as neglect on the part of the Armed Services Committee should be rejected by this body.

Now, it is sugested that all of a sudden we find ourselves, greatly to our surprise, confronted by the fact that the organizational act was designed to authorize domestic leases and not foreign leases and, therefore, we must rush to do something about it.

Well, Mr. President, as far back as 10 years ago, in the State Department circular 175, in May, 1971, the authority to lease property under the act to foreign governments was acknowledged and there has been no legal challenge to that.

Now let me just review what most leasing goes for. It is always good to pull out

a scare case like El Salvador—it is terrible that we permitted the sending of helicopters to El Salvador.

I think we should not get into a debate on the administration's actions in that respect. The fact that Soviet proxies have been active in that country would not be too hard to understand.

Let us note that most of the leasing we do is not giveaway stuff. In fact, it is for cooperative research, defense, and development programs. It is for short-term military training. It is to provide some of our allies the use of sensitive equipment for joint exercises, allied use of an item on a temporary basis for test and evaluation which is usually helpful to us prior to purchasing, and allied use for use in wartime but not required for use in peace.

In other words, it will be available, after testing, if we want to acquire that kind of equipment.

Let me note that of 58 leases from 1975 through 1980, some 22 have gone to NATO, some 6 to other European countries, some 9 have gone to allies in East Asia and 1 to one other country, and some 13 have gone to the Near East and Southeast.

What is proposed here, too, is that we have a congressional veto over every military lease. This is symptomatic of what is wrong right now. This is symptomatic of why it is difficult for any President, Democrat or Republican, to formulate foreign policy and to implement that policy on a day-to-day basis.

We just simply must get involved in the day-to-day business of the conduct of foreign policy.

Let me point out, Mr. President, that in the Senate we pass domestic legislation, formulate domestic policy, shifting coalitions, which reflect various domestic policies. The application of that kind of technique in the implementation of foreign policy in this world of today is hazardous in the extreme.

Let us impose more inhibitions, more restrictions on the President, make him powerless to move.

He would have less flexibility to move than the Prime Minister of Great Britain, the President of France, the Chancellor of Germany and, of course, far, far less flexibility than Mr. Brezhnev does.

We are trying to move toward peace and stability in this world. It is the concern of our leadership to achieve those objectives. How can they do it with one hand tied behind them because of the way we hamstring our Presidents? We propose to hamstring him still more by this piece of legislation.

Mr. President, needless to say, it is my belief that the Armed Services Committee should retain jurisdiction over military leasing.

I apologize for any dereliction in the past to my friend from Nebraska, saying we will try to do better. But, quite frankly, I would have to say that I do not see any such dereliction. I have only been chairman of this committee for a few months. But, I think, again, that other chairmen I have served with, Russell from Georgia and JOHN STENNIS from Mississippi, have done a splendid job in exercising oversight for all for which my committee is responsible.

Mr. President, I am prepared to bring this matter to a vote.

Mr. PERCY addressed the Chair.

The PRESIDING OFFICER (Mr. MURKOWSKI). The Senator from Illinois.

Mr. PERCY. Mr. President, I ask unanimous consent to place in the RECORD at this point a 7-page legal document which clearly shows the jurisdiction of the Foreign Relations Committee over all military aid and arms sales in accordance with rule 25 of the Standing Rules of the Senate. I ask unanimous consent that that be printed in the RECORD.

There being no objection, the document was ordered to be printed in the RECORD, as follows:

COMMITTEE JURISDICTION OVER MILITARY ASSISTANCE AND ARMS SALES

Rule XXV of the Standing Rules of the Senate confers on the Foreign Relations Committee jurisdiction over "foreign economic, military, technical, and humanitarian assistance," and charges the Committee to study and review, on a comprehensive basis, "matters relating to the national security policy of the United States." The Armed Services Committee, on the other hand, is generally responsible for matters relating to "the common defense policy of the United States" and U.S. military forces.

The basis for this allocation of responsibilities was the comprehensive review of Committee operations carried out by the Temporary Select Committee to Study the Senate Committee System and the Committee on Rules and Administration which resulted in S. Res. 4 in 1977. The main recommendations of those committees which were overwhelmingly endorsed by the full Senate, drew upon years of experience in the handling of political-military issues by Senate committees. A brief review of this experience and of the legislative history of S. Res. 4 on these questions provides instructive insight into the rationale for the present distribution of legislative and oversight responsibilities.

MUTUAL SECURITY AND DEFENSE ASSISTANCE ACTS: 1949–59

The original authorizations for foreign aid under the Marshall Plan were referred to the Committee on Foreign Relations. However, as military components were added to reconstruction assistance, the Armed Services Committee became involved. After a floor debate on jurisdiction, the Mutual Defense Assistance Act of 1949—providing military assistance arrangements under the NATO Treaty—was referred jointly to the Foreign Relations and Armed Services Committees. Amendments to this act in 1950 received similar joint referral and reporting. However, when Senator Russell became chairman of the Armed Services Committee in 1952, joint referral of military assistance legislation was rejected as unwiedly. Instead, such legislation was referred from 1952 through 1954 first to Foreign Relations and then to Armed Services. During this period, Armed Services consideration and reporting of these measures became progressively more perfunctory. The 1954 Mutual Security Act, consolidating all foreign economic and military assistance legislation, was referred to the Foreign Relations Committee and then sequentially referred to Armed Services, which took only three days and reported the bill without amendment. In 1955 the Armed Services Committee itself voted not to request referral of the assistance bill and an effort to require such referral was defeated on the Senate floor by a vote of 62 to 18.

FOREIGN ASSISTANCE AND ARMS EXPORT CONTROL ACTS: 1961–76

The next omnibus aid measure—the Foreign Assistance Act of 1961—was referred exclusively to the Committee on Foreign Relations. Security assistance programs authorized under that Act and amending legislation—including the Military Assistance Program, International Military Education and Training Program, Foreign Military Sales, Economic Support Fund, and Peacekeeping Operations—were similarly authorized only by the Foreign Relations Committee and subject to Foreign Relations oversight. Location of these programs within the Committee's jurisdiction tracked a corresponding development within the Executive Branch to assign the lead role in security assistance policy and review to the Department of State (itself within the oversight responsibilities of the Foreign Relations Committee).

As for jurisdiction over arms sales, the Congress did not assert jurisdiction over such sales until the provisions on "foreign military sales" were added to the Foreign Assistance bill by the Foreign Relations Committee in the late 1960's. Review of such sales continued to be in the exclusive jurisdiction of Foreign Relations even after the provision for Congressional resolutions of disapproval for particular sales was added in 1974.

Instead of formal referrals to both Committees, other arrangements have been used to facilitate coordination and cooperation between the two committees. Thus, in 1963, members of the Armed Services and Joint Committee on Atomic Energy were invited to sit with the Foreign Relations Committee in considering the nuclear test ban treaty. In 1974, the Chairman of the Armed Services Committee was invited to testify before the Foreign Relations Committee in a hearing reviewing the role of the U.S. in international affairs. In 1977, Members of the Armed Services Committee were invited to participate in the Foreign Relations Committee consideration of the nomination of Paul Warnke to head ACDA. In 1980, the chairmen of both Committees agreed to a careful division of jurisdiction in reviewing the unsuccessful hostage rescue attempt in Iran.

More recently, during debate on the nomination of Caspar Weinberger as Secretary of Defense, Senator Percy acknowledged the "close intertwining" of concerns between the Foreign Relations and Armed Services Committees. However, in a subsequent letter to Senator Biden, the Chairman stated that, while he endorsed informal cooperation on issues of mutual interest, there could be no "erosion or fuzzing" of jurisdictional rules and lines of authority. Those jurisdictional rules were scrutinized and set during consideration of S. Res. 4 of 1977.

SENATE COMMITTEE REORGANIZATION, 1976–77

The reorganization of Senate Committees which took place in 1976–77 was intended to consolidate and rationalize the subject matter of Committee jurisdictions. The Temporary Select Committee to study the Senate Committee System, chaired by Adlai Stevenson, held extensive hearings and made the initial recommendations, embodied in Senate Resolution 4. These recommendations were then followed by hearings and revised recommendations by the Rules Committee. They were further debated by the full Senate and approved on February 4, 1977.

The issues of jurisdiction over military assistance and arms sales were confronted directly during those deliberations. Senator Stennis, chairman of the Armed Services Committee (and a member of that committee since 1951) testified on September 15, 1976 before the Select Committee. On the question of military assistance, he made the following point:

The question of foreign military aid has always been handled by the Foreign Relations Committee. For a while it was referred to both the Foreign Relations and Armed Services Committees, but after several years of hearings it became very clear that our committee was not making much of a contribution in this field. It was primarily a foreign relations policy matter, and by common consent we dropped the idea of holding further hearings until there was a special request.

I can't give you the year, but I remember it all, and it was by common consent.

Similarly, he noted his disagreement with Senator Barry Goldwater on the question of who should have jurisdiction over arms sales:

Let me answer on the sales of arms and equipment. I have been in and out in my thinking. I have gone into it several times, but I always come up with the idea that that it more a Foreign Relations matter than it is an Armed Services matter.

Senator GOLDWATER. But we have interest in it.

Senator STENNIS. We do. We are related to it.

Senator GOLDWATER. That is right.

Senator STENNIS. You are exactly right. We are related to it, but predominantly in my thinking, it is for the Foreign Relations Committee. That is the way I see it.

While agreeing with Stennis on military assistance, the Select Committee did recommend joint jurisdiction between Foreign Relations and Armed Services over foreign military sales. However, it did so apparently under the mistaken assumption that, to quote the Committee's report,

"Jurisdiction over foreign military sales, which Armed Services and Foreign Relations currently held jointly, would continue as at present."

In fact, such joint jurisdiction was not the case, as Senator Church noted in his testimony before the Rules Committee on January 13. Even Senator Stennis, who said he would not object to such joint jurisdiction, noted before Rules on January 11 that it would be a departure from past practice and would be "unnecessary" since "over the years" the two Committees "have cooperated on the subject of arms sales without the necessity of an explicit jurisdictional basis in the Senate rules."

During the Rules Committee mark-up, Senator Clark offered an amendment to delete the reference to joint jurisdiction. Senator Tower objected:

Senator TOWER. Wait a minute.

Now, your original amendment was to strike both. Is it your suggestion that military sales be deleted entirely from Armed Services jurisdiction?

Senator STEVENSON. That is my understanding. It was so long as it was understood that oversight jurisdiction was in Armed Services and continues the present practice.

Senator TOWER. I could not agree to that.

Senator CLARK. I will withdraw that amendment then pending further study of it. I do not want to go into conflict on the amendments here.

Senator TOWER. No; for example, the Armed Services Committee ought to be in on any decision on sales that would be a draw down on American resources, for equipment in Western Europe or something of that sort that would affect our combat readiness.

Senator STEVENSON. The Senator is right and the understanding is that the interest of Armed Services would be continued by preserving oversight jurisdiction with respect to arms sales.

I believe, Senator, it has that jurisdiction now, the fact that it would just, under this, remain.

Senator CLARK. I think the point that I intended is that the understanding would be—so that there is no misunderstanding on this—that the report emphasize that the present practice of the Armed Services Committee oversight on effect of these sales on military preparedness and sales would be continued. That would be the report language to accompany it.

Senator STEVENSON. If the Senator would yield I would point out also that under the jurisdiction of the Armed Services Committee that is the general legislative jurisdiction with respect to the Department of Defense which gives that committee a large handle.

Senator TOWER. I have no objection to policy matters relating to military sales being exclusive jurisdiction of Foreign Relations. But once the determination is made that it is policy to allow such sales or even order such sales I think that the Armed Services really has to sign off on it. But it could seriously impact on our combat readiness which it did some years ago on our Western European capability which we have not built up yet.

Senator CLARK. That is clearly the intent of the amendment. In other words, what happened in the bill that was reported, as you can see, it was described here as foreign military sales, jointly. So that under that circumstance, as I understand it, every bill on military sales would have to be referred to both committees and it was the intent of both committees and the select committee, rather, to maintain the present jurisdiction where not every bill would be referred jointly but rather to maintain the present jurisdiction, those involving oversight and the effect of these sales on our inventory and military preparedness would continue to go to the Armed Services and those dealing with foreign policy to go to the Foreign Relations Committee.

Senator TOWER. That would include any legislative measure that provided for the sale of systems that are currently in use or currently in our inventory even if you take out of our inventory and divert our production lines, for example, and in some way disturb our schedule for delivery of inventory. All of these things would have to come under our jurisdiction.

Senator CLARK. That is why I suggested that the record would say the effect of these sales on our inventory and military preparedness so that any impact on our military preparedness in any way would clearly be with Armed Services.

Senator TOWER. I think I can buy that.

The CHAIRMAN. Let me give you Senator Stennis' views on this; it was discussed at some length.

He feels that the present Senate rules are written adequately to cover the subject and has written that they do not precisely specify with respect to military sales.

Now the jurisdiction would remain at the present time as it is, in which case Foreign Relations has jurisdiction over the military sales. Armed Services has jurisdiction insofar as it relates to our defense posture, to the draw down on equipment, the sale of our equipment and so on. And if we were to get in a crisis type situation the Armed Services Committee obviously would have to step in on jurisdiction over all military sales in that type of situation.

But there has been no problem with it in the past and Senator Stennis has suggested so here. He says: "I feel the Senate rules as presently written satisfactorily cover the matter of military sales, and is covered in that respect." He is perfectly satisfied.

Senator TOWER. Why chance it? It gives the Foreign Relations Committee policy over such matters.

Senator CLARK. That is what this amendment does. The select committee had added foreign military sales to the jurisdiction of the Armed Services and placed it jointly and we are simply bringing it back to where it was before by this amendment.

Senator TOWER. Mr. Chairman, let us insist on report language that makes this adequately clear.

The report of the Rules Committee in fact contained a specific reference to the foreign military sales issue in a section which began with the following introduction:

CLARIFICATION OF CERTAIN JURISDICTIONAL REFERENCES IN SENATE RESOLUTION 4, AND OTHER MATTERS

In many cases, the definition for specific references as to the jurisdictional boundaries of the various committees of the Senate cannot be found in Rule XXV, as reported by the Rules Committee. Such references were deleted in order to make Rule XXV as concise and workable as possible. During the proceedings of the markup on this resolution, Members of the Rules Committee specifically requested that language be included in the Rules Committee Report to clarify such references when they were not set forth in Rule XXV. The narrative which follows reflects the various requests of the Rules Committee Members, and it is intended to clear up any questions which might arise in the future as to the scope of jurisdiction of the various committees of the Senate.

Since Senator Tower was a member of the Rules Committee, he therefore endorsed the narrative which followed:

FOREIGN MILITARY SALES

The intention of the reorganization, though no explicit mention is made in Rule XXV, is to retain the existing jurisdictional arrangement involving foreign military sales. Under existing practice, the Foreign Relations Committee maintains authorizing jurisdiction over foreign military sales, including foreign military sales policy. The Armed Services Committee retains an oversight power on the effect such sales have on military preparedness, combat readiness, and on existing inventories.

The reference to "oversight power" is of course distinct from legislative jurisdiction.

With respect to military assistance, there do not seem to have been any proposals during the consideration of S. Res. 4 that it should be dealt with in the Armed Service Committee.

The Select Committee described the broader responsibilities of the two Committees as follows:

NATIONAL SECURITY AND COMMON DEFENSE

The Committee recommends that the Committees on Foreign Relations and Armed Services remain separate entities, but would assign to the Committee on Foreign Relations comprehensive policy oversight for national security, and to the Armed Services Committee the same responsibility for the common defense. In this fashion, for these areas, the Select Committee hopes to provide the overview necessary for the formulation of integrated policy while still preserving manageable workloads, jurisdictional competition, and efficient division of labor in subjects which are interrelated but not unitary.

The Foreign Relations Committee's broader mandate for oversight jurisdiction over national security policy was the subject of some discussion. The Select Committee's report described its rationale as follows:

COMPREHENSIVE POLICY RESPONSIBILITIES

To augment its jurisdiction over the full range of policies, programs and activities related to the foreign relations of the United States, the report assigns to the Committee on Foreign Relations responsibility to study and review, on a comprehensive basis, the national security policy of the United States. The oversight responsibility for national security policy would extend to the study of military strategy and policy. This assignment, which serves some purposes advanced by advocates of a combined foreign relations-armed services committee, would encourage integrated policymaking that takes account of the direct relationships among

diplomatic, political, economic, and military policies.

During the hearings in the Rules Committee, Senator Stennis expressed vague misgivings about this arrangement. In the mark-up, Senator Tower also expressed concerns about the implications.

Senator TOWER. Page 12, line 18, relating to national security policy of the United States and report thereon time to time.

My question is, now, how does that impact on the jurisdiction of the Armed Services Committee and Intelligence?

Senator STEVENSON. It is similar to the jurisdiction the Armed Services Committee has with respect to national defense. It is largely an oversight jurisdiction to indicate that Foreign Relations can do what it already does anyway, consider foreign relations, foreign aspects with some military assistance programs. It is a general oversight jurisdiction. It is just intended to make it clear that the Foreign Relations Committee has a broader aspect of responsibility in foreign policy just as the Armed Services Committee does with respect to national defense.

As I say, it is purely oversight; it does not append legislative jurisdiction.

Senator TOWER. It says national security policy and requires report from time to time, what does that mean? Getting into the nature of the Soviet threat and that sort of thing which is generally the purview of the military and intelligence community?

Senator STEVENSON. That would be in the Foreign Relations Committee.

Senator TOWER. Yes; but I am talking about a military threat to the security of the country.

Senator PELL. If the Senator would yield on that point. We spent all morning on the Foreign Relations, getting the military capability between the Soviet Union and the United States.

Senator TOWER. What does "report" mean?

Senator PELL. To fill us in.

Senator TOWER. As I say, the requirement that the Foreign Relations Committee report from time to time.

Senator STEVENSON. This comes out of the Senate boiler plate, that is used almost always in describing an oversight jurisdiction.

Senator TOWER. That still gives me some concern, Mr. Chairman, and I would like to talk to Senator Stennis on that.

However, while other jurisdictional determinations were debated on the floor, there was no further discussion of the appropriate spheres of responsibility for the Foreign Relations and Armed Services Committees. Floor debate on S. Res. 4 stressed the exhaustive series of hearings and consultations going into the formulation of the measure and resulting in a "delicate balance." Senators also stressed the need to avoid perpetuation of a "fragmented committee system, with its propensity to slice broad questions into tiny pieces," and to insure appropriate consolidation and realignment of Committee responsibilities for the good of the institution and of the nation.

Mr. PERCY. As far as I am concerned, I am ready to vote.

Mr. ZORINSKY. I would like to say to my distinguished colleague from Texas, whom I respect and whom I acknowledge has been a good leader of the Armed Services Committee, as were all those who preceded him, I do not believe I used the word "dereliction." In order to be derelict, one must avoid responsibility in an area of assigned responsibility. I have never said the Armed Services has jurisdiction in this area. Obviously, that is the whole key to this amendment, to obtain that jurisdiction.

Certainly, it was not my intent to impugn the integrity or any individual or associate any Senator with dereliction of duty inasmuch as it was not their duty or assigned task to make that supervision but was, in our estimation, that of the Foreign Relations Committee. The Armed Services Committee has no jurisdiction in this area.

In response to the charge that a minimal amount of military assistance is being given to countries through this leasing arrangement, I might point out that I have here a list of leases from 1960 to 1974: to Brazil, Bolivia, Chile, Paraguay, Dominican Republic, on and on. And they are all listed as military assistance items. And also from the year 1975 through January of 1981 there is an additional list wherein 40 out of 58 leases are for military assistance, according to the General Accounting Office.

So I think the record bears out that this leasing arrangement has not been principally used for defense cooperation or test and evaluation, but actually for military assistance.

With that, I do apologize if I have misrepresented in any way any dereliction on the part of anybody. However, I feel that one must have authority in an area and then not exercise that authority in order to be derelict. I do not feel the Armed Services Committee ever had such authority with respect to leasing military equipment to foreign governments.

Mr. TOWER. Mr. President, I would say that the Armed Services Committee has specific authority to disapprove the transfer of ships. We have acted on that from time to time.

I want to make this point, and I have no more to say but I am prepared to vote after I make the point. That is, first, defense needs are not a grant military authority. We believe that the Defense Department should have this authority. Very often they are for our benefit, not for the benefit of some other country. They are for our own benefit or the mutual benefit of allies.

Second, without judging whether restrictions have been circumvented in the past, and I will not try to make that judgment, the amendment offered by the Armed Services Committee would apply, to defense leasing, all restrictions on countries that are not eligible for defense sales.

So it does apply those restrictions and is restrictive.

On that point, Mr. President, I am prepared to let the case rest.

Mr. PERCY. Mr. President, I am prepared to vote, but I would like to make this point for the record. This is not, in the judgment of the Senator from Illinois, a question of dereliction of duty. By no stretch of the imagination has there been any impugning of that.

I have felt that the chairmen of the committee, Senator TOWER and Senator STENNIS before him, have done an outstanding job.

This is not a question of Presidential policy, either. It is simply a question of jurisdiction. The legal document that I have just submitted clearly shows that the Foreign Relations Committee has jurisdiction.

If we are ready to vote, at this time I move to table the amendment of the Senator from Texas.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Texas.

Mr. TOWER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The question is on agreeing to the motion to lay on the table the amendment of the Senator from Texas. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. RANDOLPH (after having voted in the negative). On this vote I have a live pair with the Senator from North Dakota (Mr. BURDICK). If he were present and voting, he would vote "yea." I have voted "nay." I therefore withdraw my vote.

Mr. TOWER. I announce that the Senator from North Dakota (Mr. ANDREWS), the Senator from Tennessee (Mr. BAKER), the Senator from Rhode Island (Mr. CHAFEE), the Senator from New York (Mr. D'AMATO), the Senator from Alabama (Mr. DENTON), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Utah (Mr. GARN), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), the Senator from South Dakota (Mr. PRESSLER), the Senator from Wyoming (Mr. SIMPSON), the Senator from Alaska (Mr. STEVENS), the Senator from Idaho (Mr. SYMMS), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Arkansas (Mr. BUMPERS), the Senator from West Virginia (Mr. ROBERT C. BYRD), the Senator from Arizona (Mr. DECONCINI), the Senator from Connecticut (Mr. DODD), the Senator from Ohio (Mr. METZENBAUM), the Senator from Tennessee (Mr. SASSER), the Senator from Massachusetts (Mr. TSONGAS), the Senator from North Dakota (Mr. BURDICK), and the Senator from New Jersey (Mr. BRADLEY), are necessarily absent.

I further announce that, if present and voting, the Senator from Connecticut (Mr. DODD) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 33, nays 43, as follows:

[Rollcall Vote No. 326 Leg.]

YEAS—33

Baucus	Helms	Packwood
Biden	Huddleston	Pell
Boschwitz	Inouye	Percy
Cranston	Kassebaum	Proxmire
Danforth	Kennedy	Pryor
Dixon	Leahy	Riegle
Eagleton	Lugar	Sarbanes
Glenn	Mathias	Specter
Hatfield	Matsunaga	Stafford
Heflin	Mitchell	Williams
Heinz	Moynihan	Zorinsky

NAYS—43

Abdnor	Gorton	McClure
Armstrong	Grassley	Melcher
Bentsen	Hart	Murkowski
Boren	Hatch	Nickles
Byrd, Harry F., Jr.	Hawkins	Nunn
	Hollings	Quayle
Cannon	Humphrey	Roth
Chiles	Jackson	Rudman
Cochran	Jepsen	Schmitt
Cohen	Johnston	Stennis
Dole	Kasten	Thurmond
Domenici	Laxalt	Tower
East	Levin	Wallop
Exon	Long	Warner
Ford	Mattingly	

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Randolph, against.

NOT VOTING—23

Andrews	DeConcini	Pressler
Baker	Denton	Sasser
Bradley	Dodd	Simpson
Bumpers	Durenberger	Stevens
Burdick	Garn	Symms
Byrd, Robert C.	Goldwater	Tsongas
Chafee	Hayakawa	Weicker
D'Amato	Metzenbaum	

So the motion to lay on the table was rejected.

The PRESIDING OFFICER. The Senator from Maryland is recognized.

Mr. MATHIAS. Mr. President, the vote that just occurred I think is an extremely significant vote and it has implications that may be more far-reaching than has fully been contemplated by Members of the Senate as we made that vote.

It is a subject which may well have an impact on the formulation of foreign policy and on the execution of foreign policy.

After all, foreign policy is not so much made in speeches. Foreign policy is not necessarily made because a memorandum issues from the State Department or the National Security Council.

Foreign policy results from what we do and, if we deploy military equipment by way of lease instead of by way of sale, that can have a profound impact on at least the world's perception of what our foreign policy is, whether or not we consciously do it as an act of foreign policy ourselves.

So, I am wondering if the author of the amendment could tell us whether the debate on the AWACS sale might have been avoided if instead of proposing to sell AWACS planes to Saudi Arabia the administration was just going to lease them. Would we then not be voting on AWACS? What would be the situation with the enhancement package? Could we just lease that equipment and then not have the debate on it?

I am wondering if the author of the amendment could tell us whether or not that would be the effect of the amendment.

Mr. PERCY. Mr. President, if the Senator will yield, I do believe that Senators are really not aware of the fact, as there were so few of us in the Chamber of the Senate, that Senator ZORINSKY asked the GAO to make a study of what has happened with the lease of military equipment.

The report, addressed to me by the Comptroller General of the United States, dated April 27, 1981, is entitled "Appropriateness of Procedures for Leasing Defense Property to Foreign Governments." Let me quote the summary on the face of that report:

> The Department of Defense and the military departments have used the authority of Title 10, United States Code, Section 2667 to lease property to foreign governments. This legislation was originally intended to permit the lease of military equipment within the United States.
>
> In 1980, military equipment valued at $48.4 million was leased rent free to Turkey, Honduras, and the Dominican Republic. In January 1981, six helicopers valued at $5.9 million were leased rent free to El Salvador. GAO believes that transfer of military equipments on this basis is tantamount to grant aid which should be authorized only under the Foreign Assistance Act.
>
> The use, care, and maintenance of leased property has not been routinely verified during the time it is leased and because there is no standard policy for billing and collecting lease payments, their status cannot always be determined.

The point that some of us made in the Committee on Foreign Relations is that we do not doubt at all the responsibility of the Committee on Armed Services, which we said has been carried out in an exemplary manner by the present chairman, Senator TOWER, and by the previous chairman and current ranking member, Senator STENNIS.

At no time would we want to lease equipment to other governments when it would endanger in any way the security of the United States.

But there is no one to dispute the fact that if we were leasing AWACS, as in the illustration raised by the distinguished Senator from Maryland, to any country, be it Saudi Arabia, Israel, or any other country, this would have profound implications for the foreign policy of the United States as regards that country.

Mr. TOWER. Mr. President, will the Senator yield? Let me respond to this AWACS bugaboo.

Mr. PERCY. Will the Senator respond to the question of the Senator from Maryland?

Mr. TOWER. Let me respond to that. You know, here we are, you want to intrude us more and more in the foreign policymaking process. This is the syndrome of the 1970's, and every time we have done it it has been with disastrous results.

Vietnam was lost right here under this dome not in Vietnam. The Turkish arms embargo precluded a settlement of the Greek-Turkish dispute, and the Clark amendment cost us Angola. Now we want to keep on. Let us have more Senate intrusion into the foreign policymaking process.

Let us talk about AWACS for a minute. I do not believe the Defense Department is going to declare an AWACS aircraft or an F–15 that is currently in our inventory is in excess of our requirements. If they should decide that they are in excess of our requirements they will be required to report to the Committee on Armed Services, and we can prevent the lease if we chose to do so. It certainly could be done by appropriate legislation here.

Here is what you are doing. Let me point out something else in the Zorinsky amendment. You are going to have to pass on every lease, that is what it says here. We have got a veto power. So all somebody has to do if we want to lease a radar set to the British or something like that, somebody could bring up a resolution of disapproval here.

Now, how much do we really want to involve ourselves in that process? We have got an adequate check. We could by positive action prevent a sale if we chose to do so and if it were that serious.

So let us be somewhat conscious of the myths that we are raising in this amendment here that is in the bill reported from the Committee on Foreign Relations.

Mr. MATHIAS. The answer to the question though really is that in the AWACS sale, which I have favored, and which I voted to report favorably from the Committee on Foreign Relations, so it is not an issue with me, but that kind of a transaction, if the equipment were to be excess, would be leased under the Tower amendment.

Mr. TOWER. Well, what we mean is it could be under current law to the extent that it can be at all. But now let us not kid each other here. To begin with, the AWACS that is being sold to Saudi Arabia, if indeed it is approved, is not one in excess to our requirements; it is not one out of our own inventory, but one that they will buy from the manufacturer.

Do not tell me that absent some restriction or legislative veto on a lease arrangement that the Congress is going to sit around and let them lease an aircraft carrier to somebody, a CVN or AWACS or any other system of that magnitude.

It just is not going to happen. Nobody has ever proposed that an AWACS be leased. There is certainly no surplus of AWACS in our own inventory. As a matter of fact, we need more of them. So there has been no declaration that an AWACS is in excess of our requirements.

If that time comes then I will say to the Senator from Maryland he should get word about it and see whether we cannot devise some legislation to deal with it.

Mr. MATHIAS. Until this year the Senator from Texas and I were on the same side on the AWACS, but until this year nobody had proposed that we would sell an AWACS. So the fact that nobody has yet proposed we are going to lease an AWACS does not mean that somebody may not someday. I think it is our job to anticipate problems.

Mr. TOWER. I might say as a practical matter to the Senator from Maryland that on the day there is an AWACS in our inventory that is in excess of our requirements it will be obsolete by that time and it probably will not make much difference.

Mr. MATHIAS. One of the questions I would like to ask the distinguished chairman of the Committee on Armed Services is with respect to the language of the amendment. It refers to section 110 or in section 110 it refers to section 2667 of title 10, United States Code, relating to leases of nonexcess property.

Most of our discussion is centered around the excess property. What about the nonexcess property to which the language of the amendment refers?

Mr. TOWER. Temporary excess is equipment we do not require in peacetime but may require in wartime. It is a good arrangement we have where we can transfer some of this equipment to allies, and particularly NATO Allies, and it remains in operation without having to pay the operating cost of it. It is that simple.

Mr. MATHIAS. So we could send them the AWACS—say we had an extra, we could send them the AWACS, and say, "But if we really need it you have to send it back to us."

Mr. TOWER. Well, the AWACS that currently NATO has is one that NATO is purchasing. It is not a lease arrangement.

Mr. MATHIAS. But I am talking about what might be done under this arrangement. It would not have to be——

Mr. TOWER. Senator, this AWACS thing is really probably the most intellectually dishonest argument I have heard here today.

Mr. MATHIAS. I am trying to get to the bottom of it.

Mr. TOWER. No, you are trying to get all the opponents of AWACS to vote with you on this particular measure. That is the whole example of that. In fact, there is no AWACS——

Mr. MATHIAS. Well, they ought to, as a matter of fact they ought to, because that is exactly where their interests lie. They ought to vote with me.

Mr. TOWER. No AWACS is going to be surplus.

SEVERAL SENATORS. Vote! Vote!

UP AMENDMENT NO. 505

Mr. PERCY addressed the Chair.

The PRESIDING OFFICER. The Senator from Maryland has the floor.

Mr. MATHIAS. I yield to the Senator from Illinois.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. PERCY. Mr. President, I have discussed this very informally and briefly with the distinguished Senator from Texas, the chairman of the Committee on Armed Services, and the amendment I would offer would provide that the Foreign Relations Committee shall have concurrent jurisdiction over the lease to foreign governments of defense equipment, and that the Foreign Relations Committee shall receive all reports required by this section of the law.

I send this amendment, this perfecting amendment, to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 505.

Mr. PERCY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the amendment introduced by the Senator from Texas, add the following:

(d) The Foreign Relations Committee shall have concurrent jurisdiction over the lease to foreign governments of defense equipment. The Foreign Relations Committee shall receive all reports required by this section of law.

Mr. PERCY. The purpose of the amendment is clear indeed. The members of the Committee on Foreign Relations feel very strongly, and I believe the American public would feel very strongly, that the increasing practice of the Department of Defense to enter into military equipment leases with foreign governments does have implications for the foreign policy of this country.

We are having a heated debate on AWACS. Whichever side one may be on, we must agree that it has become an emotional issue for a number of countries and millions of Americans.

As I said before, the leasing of equipment, armed helicopters, to El Salvador has touched a nerve in this country. People are determined that we shall not get back into another Vietnam. We know that we are not getting into another Vietnam with our El Salvador policy, but we must proceed with due caution. It has taken a tremendous amount of time and effort to think this through. The Committee on Foreign Relations has had to work on this legislation for a long period to be certain that we do this in such a way that we do not end up backing a government that is simply not supported by the people of El Salvador.

The leasing of that equipment to El Salvador and to its government does deeply involve foreign policy issues. I would feel that the best way to handle this matter would be to have joint jurisdiction. We can both study it and share information back and forth so we do not duplicate one another's work. Wherever we can assist one another, we should.

The 7-page legal opinion is clear. I did not take the time to read the entire report, but the report is available. You can read the entire report.

It clearly states that:

Rule XXV of the Standing Rules of the Senate confers on the Foreign Relations Committee jurisdiction over "foreign economic, military, technical, and humanitarian assistance," and charges the Committee to study and review, on a comprehensive basis, "matters relating to the national security policy of the United States." The Armed Services Committee, on the other hand, is generally responsible for matters relating to "the common defense policy of the United States" and U.S. military forces.

The leasing of equipment does have an effect upon U.S. Forces. We are the first to say we do not want to see, in any way, such equipment taken away from U.S. Forces if it is vitally needed to protect our security interests.

But we have never asked that equipment be diverted, other than the Commander in Chief himself occasionally diverting equipment to a friendly nation for their own defense, which is for the common defense. We have not had that problem.

But we sometimes do have a very delicate problem involving our relations with nations who may wish to lease equipment.

For that reason, we do feel that copies of the reports made on leasing arrangements should be sent concurrently to the Armed Services Committee and the Foreign Relations Committee for our joint review.

I am offering, in the spirit of comity, this amendment on behalf of the members of our committee as a way of resolving this particular problem.

(Mr. JEPSEN assumed the chair.)

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. I wonder if the Senator from Illinois or the Senator from Maryland might answer a question.

My understanding is that this amendment would preserve existing law in the area of lease and waiver. Will the Senator comment on that? What is the existing law, in the absence of this amendment, on the lease issue and on the waiver issue?

My understanding is that this amendment of the Senator from Texas—and I voted against tabling because I wanted further explanation on this. What is the existing law on the question of leasing and the question of waiver?

Mr. PERCY. Mr. President, I would ask my distinguished colleague, Senator ZORINSKY, who submitted the original amendment in committee to respond to that question.

Mr. LEVIN. That would be fine.

Mr. ZORINSKY. It is my opinion that this broadens the jurisdiction of the Armed Services Committee and certainly authority of the Secretary of Defense, since he would be able to waive the requirements of the section if he determines and immediately reports to the Congress that an emergency exists that requires a lease to be entered into immediately in the national security interest of the United States.

I have been informed that that is not existing law.

Mr. MATHIAS. Mr. President, if the Senator would like me to reply further, I did not hear all of the colloquy which took place on that side of the Chamber. But I am advised that section 2667 was enacted in 1947 to enable the military services to lease real and personal property to domestic corporations. It was domestic leasing that was contemplated. And that in 1971 the State Department, by Circular No. 175, a memorandum of that year, approved the use of this authority to lease defense property to foreign governments.

As the distinguished chairman of the Armed Services Committee has accurately said, this is a process that has existed for some time. But when it was originally enacted into the statutes, it was a domestic transaction that was contemplated.

Mr. LEVIN. Would the Senator agree with the following summary: Since 1971, by Defense Department interpretation, this power to lease has existed and this waiver provision would have gone along with it in the way that it is presently phrased in the Tower amendment?

Mr. MATHIAS. I suspect—and this is just my surmise, and I am subject to correction by the chairman of the Armed Services Committee—but I suspect that what has happened in this area is very much like what has happened in the rest of our economy; that probably back in 1947, and even through 1971, there was

not a great deal of leasing, just as there was not among people at large. But today there is a lot of leasing going on. People lease cars, they lease office equipment, and they lease almost everything.

Probably this leasing business has slowly developed into a pretty substantial volume.

Now, I say again, I am not speaking on the basis of any expert knowledge on this. If I am wrong, I would be happy to have the chairman of the Armed Services Committee correct me.

Mr. LEVIN. Would my friend from Maryland, then, agree that since 1971 this amendment reflects the practice that has existed?

Mr. MATHIAS. I think this reflects a slowly enlarging practice which may have been of little consequence at its outset but which could, as we have described in our conversation here this afternoon, have enormous consequences as it is carried into the future.

Mr. LEVIN. One further question of the Senator from Maryland. Has there been any legal opinion that he knows of written by the Justice Department or by other counsel relative to that 1971 practice as to whether or not, in fact, that practice of the Defense Department is authorized under the 1947 law?

Mr. MATHIAS. I do not know, but I think it is an excellent question.

Mr. ZORINSKY. If the Senator from Maryland would yield, this GAO report indicates that their attorneys are of the opinion that the intent of the original law was not for foreign assistance, only for domestic leasing.

Mr. MATHIAS. So that, in fact, the Tower amendment would alter the existing law as it is viewed by the Comptroller General.

Mr. ZORINSKY. That is correct, according to the attorneys for the Comptroller General.

Mr. LEVIN. I wonder if my friend from Texas would agree with that description of the issue; that the attorneys for GAO have said the 1971 analysis of DOD upon which they based their practice is not authorized by the earlier statute and that, therefore, this amendment would be needed in order to proceed in the way the Department of Defense has proceeded since 1971?

Mr. TOWER. I disagree with that. I might add further that what is included also in our amendment is the reporting requirement that is not in the law now. So we are providing for better capability for oversight by requiring this reporting procedure.

The amendment states:

Not less than thirty days before entering into or renewing any agreement with a foreign country or international organization to lease under this section any major defense equipment (as defined in section 47(6) of the Arms Export Control Act) valued at $14,000,000 or more and any other property valued at $50,000,000 or more for a period of more than one year, the Secretary of Defense shall transmit to the Speaker of the House of Representatives, and to the chairman of the Committee on Foreign Relations of the Senate and the chairman of the Committee on Armed Services of the Senate.

So it is required to go to both committees, both the Foreign Relations and Armed Services.

Mr. LEVIN. Mr. President, I wonder if the Senator from Texas could answer this question: How important to his amendment is that waiver provision?

Mr. TOWER. Would the Senator from Michigan clarify his question? What waiver provision?

Mr. LEVIN. The provision at the top of page 1 of the amendment. There is a paragraph——

Mr. TOWER. Yes. I see it. What was the question?

Mr. LEVIN. How important is that waiver provision? I was wondering if the Senate might consider just that part of the amendment. That might satisfy part of the opposition. I am not sure.

Mr. TOWER. This is part of the original legislation of the Senator from Nebraska, so he has that in his legislation.

Mr. ZORINSKY. That is not in it at all.

Mr. TOWER. The Senator's amendment has no waiver requirement?

Mr. ZORINSKY. No, not for the Secretary of Defense.

Mr. TOWER. I am sorry. I thought it did.

The difference is the Secretary of Defense may waiver in this instance and the rest requires a Presidential waiver. There is a provision for the Presidential waiver. This requires agreement of the Congress in case an emergency exists. I think that is appropriate. If someone is trying to help us out, we ought to be able to find some equipment that they need.

I would like to ask a question of the distinguished chairman of the Foreign Relations Committee.

If, indeed, in offering his amendment, he wants the Foreign Relations Committee to have concurrent jurisdiction with the Armed Services Committee on the foreign leases, let me ask him, would he be willing then to also have concurrent jurisdiction between Armed Services and Foreign Relations on the special defense acquisition fund? That is our money that is being used.

Mr. PERCY. As the distinguished Senator knows——

Mr. TOWER. Maybe we can make a swap. Give us concurrent jurisdiction over the special defense acquisition fund.

Mr. PERCY. As the distinguished chairman of the Armed Services Committee knows, there are some members of the Foreign Relations Committee who feel very strongly about that particular fund. We will attempt to contact them immediately and see if we can get a consensus in the committee on this. I would imagine it would take 5 or 10 minutes, probably, to do that. Possibly we can set this aside. I do not know if we are ready to take up anything else.

Does the distinguished Senator from Ohio have an amendment that could be proposed and take up the time interval while we are contacting other members of the Foreign Relations Committee?

Mr. GLENN. I have an amendment, which I believe the floor manager would be willing to accept, which would take 10 or 15 minutes.

Mr. TOWER. Mr. President, I ask unanimous consent that the pending business be temporarily laid aside for the purpose of the Senator from Ohio offering an amendment, with the understanding that we will return to the pending business.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 506

Mr. GLENN. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Ohio (Mr. GLENN) proposes an unprinted amendment numbered 506.

Mr. GLENN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 84, between lines 2 and 3, insert the following new section:

SEC. 715B. (a) It is the sense of the Congress that the spread of international terrorism poses a grave and growing danger for world peace and for the national security of the United States. As a part of its vigorous opposition to the activities of international terrorist leaders and the increase of international terrorism, the United States should take all steps necessary to ensure that no U.S. citizen is acting in the service of terrorism or of the proponents of terrorism.

(b) Within six months after the enactment of the International Security and Development Cooperation Act of 1981, the President shall submit to the Speaker of the House of Representatives and the Chairman of the Committee on Foreign Relations of the Senate a report including the following:

(1) a description of all legislation, currently in force, and of all administrative remedies, presently available, which can be employed to prevent the involvement, service, or participation by U.S. citizens in activities in support of international terrorism or terrorist leaders;

(2) an assessment of the adequacy of such legislation and remedies, and of the enforcement resources available to carry out such measures, to prevent the involvement, service, or participation by U.S. citizens in activities in support of international terrorism or terrorist leaders; and

(3) a descrption of available legislative and administrative alternatives, together with an assessment of their potential impact and effectiveness, which could be enacted or employed to put an end to the participation by U.S. citizens in activities in support of international terrorism or terrorist leaders.

Mr. GLENN. With increasing frequency over the last few months and the last few years, in fact, we have all become aware of the grave danger to world peace posed by international terrorism. This administration in particular has articulated its firm and active opposition to the spread of international terrorism. The administration has given special attention to the escalating and destabilizing activities of particularly Libya's Colonel Qadhafi throughout Africa and the Middle East. Yet even as the United States is advancing policy, it seems that some U.S. citizens are literally fighting against it—literally fighting.

There are news reports today of American mercenaries fighting for Qadhafi in Chad as part of his grand destabilizing scheme for the Middle East.

I am sure most Members of the Senate and the staff read the New York Times this morning and saw the front

page article entitled "American Pilots Reported Flying in Libyan Forces."

I will read probably not more than 10 percent of it. It is a lengthy article, based on reporting by Jeff Gerth and Bill Taubman, but was written by Mr. Gerth. I want to compliment them on the job they did.

American pilots and aircraft mechanics, including military veterans, are flying and maintaining Libyan air force planes.

On down:

Dozens of pilots and mechanics have participated in operation for Libya, a militant Arab nation in North Africa, although the precise number could not be determined.

Listen to this:

Their role apparently violates no United States law.

On down further:

Recent administration have regarded Libya, a supporter of international terrorism, as an increasingly disruptive force in the Middle East.

Further down:

American officials said the presence of American pilots and mechanics in Libya helped explain what until now had been a mystery to them: who was maintaining the American planes that were sold to Libya years ago, when that country's relationship with the United States was not belligerent. Past speculation had centered on North Koreans and others from Communist countries.

Further down:

The involvement of the Americans in Libya does not appear to violate American law, according to Justice Department officials.

I will read that again:

The involvement of the Americans in Libya does not appear to violate American law, according to Justice Department officials.

E. Lawrence Barcella, Jr., Assistant United States Attorney for the District of Columbia, is overseeing the federal investigation of Mr. Wilson.

A man who has been recruiting these pilots and crew members.

He said the neutrality laws, which prohibit Americans from enlisting in the military service of a foreign nation, apparently do not cover the recruitment scheme organized by Mr. Wilson.

Further down in the article:

The recruitment of former military aircraft personnel illustrates for American law enforcement officials some of the same issues posed by Mr. Wilson's earlier activities, especially the lack of laws governing the private business activities of former American servicemen and intelligence agents.

There is more to the article.

Mr. President, I think it is time that we put a stop to this, one way or another.

We sought this morning a way that we could put into legislation on this bill a means of giving the President of the United States more power, which he apparently does not have, according to this article, so that this type of thing can be prevented. I cannot imagine there would be many Americans who would support Americans being hired by the likes of Qadhafi for his military operations wherever they might occur in Africa.

Other recent press reports have chronicled the deep, unchecked involvement of former U.S. Government officials in the destructive activities of not only Qadhafi but of Idi Amin earlier.

The violence of terrorism is often widespread, deliberately disorganized, and thus difficult to anticipate and to oppose. However, terrorist activities of our own citizens should be much easier to seek out and to stop.

There may be laws to do this—laws of which I am not aware; we could not find any this morning. Certainly, there ought to be laws to do this. But no one in the executive branch has given us a definite reading. In a recent hearing before the Foreign Relations Committee, the State Department's Acting Director of the Office for Combating Terrorism proposed that the FBI should review the adequacy of existing legislation and the need for new laws to prevent U.S. citizen support of terrorism abroad.

My amendment seeks to put this sound proposed for the study of what law is needed into law and leaves the particulars of control where they belong, with the executive branch. This amendment mandates that, within 6 months, the President, as a part of his antiterrorism policy, report to the Congress on what we are doing and what we can do to put an end to the disturbing incidents of involvement by U.S. citizens in support of international terrorism or terrorist leaders.

Mr. President, this amendment states that it is the sense of the Congress that the spread of international terrorism poses a grave and growing danger for world peace and for the national security of the United States. It says that, as a part of its vigorous opposition to the activities of international terrorist leaders and the increase of international terrorism, the United States should take all steps necessary to insure that no U.S. citizen is acting in the service of terrorism or of the proponents of terrorism.

Within 6 months after the enactment of the International Security and Development Cooperation Act of 1981, the President shall submit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report including the following:

First, a description of all legislation, currently in force, and of all administrative remedies presently available, which can be employed to prevent the involvement, service, or participation by U.S. citizens in activities in support of international terrorism or terrorist leaders;

Second, an assessment of the adequacy of such legislation and remedies and of the enforcement resources available to carry out such measures, to prevent the involvement, service, or participation by U.S. citizens in activities in support of international terrorism or terrorist leaders; and

Third, a description of available legislative and administrative alternatives, together with an assessment of their potential impact and effectiveness, which could be enacted or employed to put an end to the participation by U.S. citizens in activities in support of international terrorism or terrorist leaders.

Mr. President, we are not trying in this amendment to detail what those remedies might be. What I am doing is hoping that we can get the administration to come forward with what legislative proposals their 6-month study will indicate is necessary. So there can be no misunderstanding, the wording of this was deliberately left to define those activities in support of international terrorist leaders with the idea that it is a difficult area to define. We know that there has not been a really sufficient definition of terrorism, but I will state, as part of the legislative history, that I would want to help guide the administration in their deliberations; that I am specifically referring to Colonel Qadhafi and his activities as being terrorist activities. I do not think anyone has any doubt about that; in fact, I think our Government has specifically pointed him out as a terrorist leader before.

Whatever legislation comes up, I hope, would enable the Government of the United States to have a policy and legislative remedies and control over Americans acting in support of Libyan forces which have been judged to be terrorists as well as any other terrorist activities around the world.

Mr. President, the distinguished floor manager of the bill (Mr. PERCY) asked to be included as a cosponsor. I ask unanimous consent that he be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, I do not think something like this would need to be brought to a record vote. I shall be happy to have a voice vote on this.

I yield for whatever comments anyone wishes to make.

Before I yield the floor, Mr. President, I ask unanimous consent that the complete New York Times article be printed in the RECORD as part of my statement.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

AMERICAN PILOTS REPORTED FLYING IN LIBYAN FORCES—EX-C.I.A. AGENT RECRUITING

LONDON, October 21, 1981.—American pilots and aircraft mechanics, including military veterans, are flying and maintaining Libyan Air Force planes in an operation organized by Edwin P. Wilson, a former American intelligence agent, according to associates of Mr. Wilson.

The American flight personnel, as well as pilots from Canada and Britain, have been recruited and paid by companies controlled by Mr. Wilson and, at least since last year, have flown a Libyan fleet of American-made cargo and transport aircraft and helicopters, the associates said.

One Western pilot recruited by Mr. Wilson said that American pilots flew helicopters in support of the Libyan invasion of Chad this year, but the extent to which Western recruits are involved directly in Libyan combat missions could not be determined. The pilot said he was paid about $3,000 a month.

COORDINATION IN LONDON

Some of the American pilots and mechanics have been recruited in the United States by other Americans. Most of the operation is coordinated through a London office that represents several African and European companies controlled by Mr. Wilson, according to his associates.

Dozens of pilots and mechanics have participated in the operation for Libya, a mili-

tant Arab nation in North Africa, although the precise number could not be determined. Their role apparently violates no United States law.

Earlier this week, an American aircraft mechanic, Richard L. Love, visited the London office, waiting for a visa and airplane connections to Libya. Mr. Love told a former Wilson associate that he had been recruited in Alabama and had signed a one-year contract to service Libyan military aircraft, according to the former associate.

RECRUITS HELD WELL PAID

Mr. Love said he and the other recruits were well paid for their services but was not specific, the associate added.

Mr. Wilson, a former covert agent for the Central Intelligence Agency, now lives in Libya, where he is a fugitive from a Federal indictment last year that charged him with illegally shipping explosives to Libya to help train terrorists.

Mr. Wilson did not return a telephone call placed today to his office in Tripoli. A reporter left a message with an associate of Mr. Wilson seeking a reply to questions about the pilot recruitment program.

The unofficial involvement of Americans in Libyan military activity contrasts sharply with United States foreign policy toward the Arab nation, led by Col. Muammar el-Qadhafi. Recent Administrations have regarded Libya, a supporter of international terrorism, as an increasingly disruptive force in the Middle East.

Last summer, the United States reported that two Navy jets had shot down two Libyan fighter planes after being fired on by one of them.

After the assassination of President Anwar el-Sadat of Egypt this month and amid reports of hostile Libyan activity against the Sudan, the Reagan Administration sent two AWACS radar surveillance planes to Egypt to monitor Libyan aircraft activity in the area.

American officials said the presence of American pilots and mechanics in Libya helped explain what until now had been a mystery to them: who was maintaining the American planes that were sold to Libya years ago, when that country's relationship with the United States was not belligerent. Past speculation had centered on North Koreans and other Communist countries.

A White House spokesman had no immediate comment today on whether high-level Reagan Administration officials were aware that Americans were flying and maintaining planes for the Libyan Air Force, although law enforcement officials knew of the recruitment operation.

The involvement of the Americans in Libya does not appear to violate American law, according to Justice Department officials.

E. Lawrence Barcella Jr., Assisstant United States Attorney for the District of Columbia, is overseeing the Federal investigation of Mr. Wilson. He said the neutrality laws, which prohibit Americans from enlisting in the military service of a foreign nation, apparently do not cover the recruitment scheme organized by Mr. Wilson.

F.B.I. INQUIRY ON RECRUITING

Federal law enforcement officials say that, nevertheless, earlier this month the Federal Bureau of Investigation began a full investigation of the recruitment operation.

The recruitment of Western pilots and mechanics is the first current operation of Mr. Wilson to emerge publicly. In last year's indictment and other reports, details were disclosed about Mr. Wilson's private business activities in 1976 and 1977, his help in training terrorists in Libya by shipping explosives and his hiring of former Army Special Forces troops for the training operation.

The recruitment of former military aircaft personnel illustrates for American law enforcement officials some of the same issues posed by Mr. Wilson's earlier activities, especially the lack of laws governing the private business activities of former American servicemen and intelligence agents. It also demonstrates Mr. Wilson's capacity to continue to operate within the United States even though he has been out of the country for several years.

HOUSE PANEL SEEKS REMEDIES

The House Select Committee on Intelligence is considering possible legislative remedies as part of its investigation into Mr. Wilson's activities.

In 1976, shortly after ending his employment with the Office of Naval Intelligence, which he had joined after leaving the C.I.A., Mr. Wilson closed a business deal with Colonel Qadhafi to sell his expertise in intelligence, arms and explosives to Libya for the training of terrorists.

A few years later, after Federal investigators began examining his activities in the United States, Mr. Wilson shifted his base of business operations from Washington to Europe and Libya. About the same time, several companies controlled by Mr. Wilson began using the London office of Brilhurst Ltd., a British company, according to associates of Mr. Wilson and company documents.

SCOPE OF RECRUITING PROGRAM

The recruitment program, which started about two years, ago includes dozens of pilots, flight engineers and aircraft mechanics from the United States, Britain and Canada with both civilian and military backgrounds, according to associates of Mr. Wilson familiar with the plan. Among those recruited were British paratroopers.

According to spokesmen for American aircraft companies, the Libyan Air Force has eight C-130's, 20 CH-47 helicopters, known as Chinooks, 10 727's, nine C-47's and one 707.

Western diplomatic sources have said that many of the Libyan pilots flying military aircraft are inexperienced, and a report of the London-based International Institute for Strategic Studies notes that Soviet, Pakistani and Palestinian pilots also fly Libyan military aircraft.

Federal law enforcement officials said that the F.B.I. and Scotland Yard had been aware for some time of Mr. Wilson's recruitment operations in London but that an active investigation was not undertaken until recently because officials placed a greater priority on apprehending Mr. Wilson on the 1980 charges.

CHECK BY SCOTLAND YARD

Earlier this year, for example, Scotland Yard checked a report that Mr. Wilson, a fugitive since April 1980, was staying at a fashionable London hotel, according to a former Wilson associate. That inquiry turned up nothing, but two former London associates of Mr. Wilson, David and Anne Shortt, said they saw him last spring in the departure lounge of London's Heathrow Airport bound for Geneva.

Because most of the actual work done by the American recruits takes place in Libya and their finances and travel plans are arranged in London, American authorities originally concluded that they had little legal jurisdiction to investigate the scheme. They said they were aware that Mr. Wilson had been recruiting former military personnel in the United States for "mercenary type" work in Libya and that this would be the focus of the recently begun investigation of Mr. Wilson's current activities.

Diana Byrne, who met Mr. Wilson in Libya several years ago and who says she controls Brilhurst, declined to talk about her activities on behalf of Mr. Wilson. In a brief interview outside Brilhurst's current office, at 28 Knox Street, Mrs. Byrne, a native of Wales, described Brilhurst as a "service company" that represents several European companies, many of which operate in Libya. When asked specifically about her work on behalf of Mr. Wilson and his companies, Mrs. Byrne terminated the conversation.

COORDINATION IN LONDON

But several businessmen in London who have worked with Mrs. Byrne and Mr. Wilson's companies said that Brilhurst appeared to operate as the London branch of Mr. Wilson's businesses. Among the specific activities cited by those sources and documented in company papers are: payment of travel expenses and salaries of pilots working in Libya, obtaining Libyan visas for persons doing business with Mr. Wilson and his companies, managing his investments and handling his telephone, mail, telex and telegram messages.

In the last three years, Brilhurst has operated out of four separate London locations, often moving abruptly and functioning in a secretive fashion, the business associates added.

J. Steffan, an exporter who rented office space to Brilhurst at 18 Hans Road, in a fashionable section of London near Hyde Park and across from Harrods department store, said the company departed abruptly one weekend in July 1980 and still owed him several thousand dollars in back rent.

MYSTERIOUS OPERATIONS

Angela O'Toole, who rented office space in the Halkin Arcade to Brilhurst until December 1980 said Brilhurst personnel had operated mysteriously, sending coded telex messages and removing typewriter ribbons before leaving the office.

Both former landlords said they often saw Western pilots who had just arrived in London waiting at Brilhurst's offices for Libyan visas or for flights to Libya.

Further details on the pilot program were provided by other associates of Mr. Wilson. They said that two of the companies used by Mr. Wilson to pay and recruit the aircraft personnel were OSI S.A., a Swiss corporation that serves as a Tripoli office for Mr. Wilson, and Western Recruitment Inc., which has a Swiss post office box number. Both of these companies currently operate in London out of Brilhurst's office on Knox Street, according to a travel agent who booked flights to Libya for OSI S.A. and Mrs. Bryne, who acknowledged handling banking affairs for Western Recruitment.

Mr. Love, the aircraft mechanic from Alabama who was in London earlier this week on his way to Libya, spoke of being recruited in the United States, according to a former Wilson associate. Mr. Love answered the door at Brilhurst's Knox Street offices but declined to speak to a reporter. Shortly thereafter, an Arab driver pulled up to Brilhurst's offices and handed Mrs. Byrne what looked like an American passport and a Libyan visa.

Mr. PERCY. Mr. President, I support this amendment and I thank Senator GLENN for permitting me to be a cosponsor of it. I thoroughly endorse the principles which he has espoused. We should in every way possible indicate our abhorrence of international terrorism. Gangsterism in one form or another, whether it is domestic or international, should be abhorred and must be fought in every way possible. Certainly, if we have evidence of the involvement of our own citizens, we should act with the strongest and firmest hands.

Mr. President, I feel this resolution is very much in the national interest. I am ready for a vote on it.

Mr. GLENN. Mr. President, I ask unanimous consent that Senator JEPSEN also be added as a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PELL. Mr. President, I ask unanimous consent that I may be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, I move the adoption of the amendment.

Mr. PERCY. Mr. President, I am ready for a vote on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 506) was agreed to.

Mr. GLENN. I move to reconsider the vote.

Mr. PERCY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PERCY UP AMENDMENT 505 TO TOWER UP AMENDMENT 504

Mr. TOWER. Mr. President, a parliamentary inquiry. There is an amendment pending to my amendment.

The PRESIDING OFFICER. The Senator is correct.

Mr. TOWER. Therefore, another amendment would not be in order at this time. However, does the fact that this amendment is pending to my amendment preclude my modifying my original amendment?

The PRESIDING OFFICER. It does not.

Mr. TOWER. Then, Mr. President, I modify my amendment at the bottom of the page, where is reads, "The Secretary of Defense may waive the requirements of this section." In other words, I delete "The Secretary of Defense" and substitute therefor "The President." The modification would read, "The President may waive the requirements of this section if he determines," and so forth.

The PRESIDING OFFICER. The amendment is so modified.

Will the Senator from Texas please send the modification to the desk?

The modified amendment is as follows:

On page 13, beginning with line 1, strike out all down through line 17 on page 18 and insert in lieu thereof the following:

SEC. 110. (a) Section 2667 of title 10, United States Code, relating to leases of non-excess property, is amended by adding at the end thereof the following new subsections:

"(g) Not less than thirty days before entering into or renewing any agreement with a foreign country or international organization to lease under this section any major defense equipment (as defined in Section 47(6) of the Arms Export Control Act) valued at $14,000,000 or more and any other property valued at $50,000,000 or more for a period of more than one year, the Secretary of Defense shall transmit to the Speaker of the House of Representatives, and to the Chairman of the Committee on Foreign Relations of the Senate and the Chairman of the Committee on Armed Services of the Senate, a written notification which specifies—

"(1) the country or international organization to which the defense article is to be leased;

"(2) the type, quantity, and value (in terms of replacement cost) of the defense article to be leased;

"(3) the terms and duration of the lease; and

"(4) a justification for the lease, including an explanation of why the defense article is being leased rather than sold under the Arms Export Control Act.

The President may waive the requirements of this section if he determines, and immediately reports to the Congress, that an emergency exists which requires that the lease be entered into immediately in the national security interests of the United States.

"(h) The Secretary of Defense shall transmit to the Speaker of the House of Representatives and to the Chairman of the Committee on Armed Services of the Senate not more than sixty days after the end of each quarter a listing (classified if necessary) of all property valued at $1,000,000 or more which was leased, during the quarter for which such report is submitted, to a foreign government for a period of more than one year under this section.

"(i) Any reference to sales of defense articles under the Arms Export Control Act in any provision of law restricting the countries or organizations to which such sales may be made shall be deemed to include a reference to leases of defense articles under this section.".

(b) Section 109 of the International Security and Development Cooperation Act of 1980 is repealed.

(c) Section 36(a) of the Arms Export Control Act is amended by deleting paragraph (10).

Mr. TOWER. Mr. President, I inquire of the distinguished chairman of the Foreign Relations Committee if he has anything to report on the question I raised earlier about shared jurisdiction on the Special Defense Acquisition Fund.

Mr. PERCY. Mr. President, I appreciate very much the offer that has been made by the chairman of the Armed Services Committee, Senator TOWER.

Members of the Foreign Relations Committee have had a deep interest in the Special Defense Acquisition Fund. On May 8, 1981, Senator TOWER wrote a letter to me, as chairman of the Foreign Relations Committee, fully supporting the position that we have taken and preparing to offer his assistance in securing Senate approval of this very important program. It is a program that I have felt is absolutely in the vital interests of the country.

I have never hesitated to agree that some items be put in an inventory so that ultimate delivery of some important equipment would not be held up simply because a long leadtime is required. We do not want to have to be in a position unable to offer equipment to our allies simply because we are not prepared and do not have an inventory.

So I believe that the question that has been raised is one which legitimately involves both the responsibility of the Armed Services Committee and the Foreign Relations Committee.

However, at this time, I should like to recognize Senator BIDEN, who I believe is the only member of the committee who has not yet given his concurrence on having joint jurisdiction provided for the Special Defense Acquisition Fund to the Armed Services Committee and to the Foreign Relations Committee, to see if he has any questions he would like to put to either me or the distinguished chairman of the Armed Services Committee, and to see if he concurs in this arrangement.

Mr. BIDEN. Mr. President, I should like to ask a question to make sure I understand what we are compromising to and from.

As I understand it, under the leasing arrangements that exist, for example, the case where we leased four Huey helicopters to El Salvador—the way the law now reads, as I understand it, or as it is interpreted, is that a report needs to be made to the Foreign Relations Committee, but merely a report. There is no action the Foreign Relations Committee is required to take or allowed to take. It is just to inform us. Is that correct?

Mr. TOWER. That is correct, so far as my amendment is concerned.

As the Senator from Delaware knows, Senator PERCY has offered an amendment to my amendment which would give the Foreign Relations Committee concurrent jurisdiction over leasing. I am prepared to look somewhat favorably on that, if there could be perhaps a suggestion that would be endorsed by members of the Foreign Relations Committee that the Armed Services Committee exercise concurrent jurisdiction over the Special Defense Acquisition Fund, which I must say comes out of our hide moneywise.

Mr. BIDEN. I would be prepared to go back to my hamburger in the dining room and not talk all night on this.

I am not sure I understand what "concurrent jurisdiction" means. I understand that the Senator from Nebraska recognizes, as I believe is that case, that this is an exception we never really contemplated, whereby we would transfer military equipment abroad under the leasing provisions of the law that were designed for domestic leases. He has found a way in which to transfer to foreign governments, through the lease process, items such as helicopters.

I understand that the Senator from Nebraska intends to close that loophole, if you will, so that it would require more than merely a statement to Congress that this is what we are doing. It would require some concurrence from Congress if a certain threshold were reached.

If the Senator from Texas means by "jurisdiction" that he would like to have the Foreign Relations Committee and the Armed Services Committee be required to concur in such a transfer, to give it jurisdiction over that transfer, then I think that is an amiable compromise and one to which I have no objection. But if we merely mean that it is going to be business as usual, which is that you need only report—only in this case, you make an additional report to the Armed Services Committee—then it seems to me that there is a compromise in jurisdiction of the Foreign Relations Committee without any commensurate benefit gained to control this leasing process.

Maybe the Senator can explain to me what we are talking about, because I do not have a copy of the amendment.

Mr. TOWER. The Armed Services Committee concurrently has jurisdiction

on leasing. It is a jurisdiction that I have some disposition to share with the Foreign Relations Committee.

Mr. BIDEN. I appreciate that generosity.

Mr. TOWER. In exchange for a similar disposition on the part of the Foreign Relations Committee to share jurisdiction over the Special Defense Acquisition Fund. Then we will all be one, big, happy family.

Mr. PERCY. Perhaps Senator BIDEN will allow me to give my interpretation of how this would work, and then we will see if it concurs with the feeling of the Armed Services Committee.

At this particular time, the Foreign Relations Committee does not have jurisdiction over leasing. This is something that we—particularly Senator ZORINSKY and Senator BIDEN—have felt strongly about, because it does clearly have foreign policy implications. This amendment—the perfecting amendment I have developed and sent to the desk and is the pending business—clearly gives new jurisdiction to the Foreign Relations Committee.

Mr. BIDEN. What does that mean—"jurisdiction"?

Mr. PERCY. In other words, that clear jurisdiction is that the Foreign Relations Committee would receive, concurrently with the Armed Services Committee, a notification from the Secretary of Defense that a leasing arrangement is being proposed. Hearings could be held on it, and a report could be made.

And the committee could either concur or disagree with such action, and it could be sent to the Chamber in that way. We could either concur together and jointly agree or jointly disagree or we could come up with differing opinions which then would have to be argued out in the Chamber.

In the case of the special defense acquisition fund, here the Foreign Relations Committee has clear jurisdiction. The Defense Department asked for a special defense acquisition fund of $350 million. The chairman of the Armed Services Committee, recognizing the importance of this to our own national security defense, wrote a letter to me urging that we adopt this provision and indicated that he would support it.

We would then by this action clearly give jurisdiction to the Armed Services Committee to have joint jurisdiction. They would then receive joint notification of such fund increases, decreases, and modifications. They could have hearings on it. They could come up with a report. They could send their report and we would hope we would cooperate, combine if possible in hearings, not duplicate constantly as we seem to do or proliferate, but if we come up with differing opinions, then we simply have to bring these differing opinions and report to the Chamber.

But both committees would be involved in something that has implications for Armed Services and has implications for Foreign Relations.

Mr. BIDEN. The generosity of the Senator from Texas is well known to us and his willingness to compromise is well known to us all.

Mr. TOWER. I thank the Senator so much. He makes me feel very humble.

Mr. BIDEN. And his humility is well known to us all.

But I wish to suggest that if the Senator is willing or if our colleagues are willing, I do not believe I would object to this. But could I have 15 minutes to review it with my staff and we could move on to another subject in the meantime? And if it is as I believe it to be, I do not see why I would object to it.

Is that reasonable? Is there something else that could come up? Or allow me 5 minutes, a few minutes, or otherwise keep talking for an hour.

We can resolve it. I wish to make sure the generosity of the Senator is as deep as I understand it to be.

Mr. TOWER. It is an even swap.

Mr. BIDEN. Yes. I think we have the text.

Mr. TOWER. I accept Senator PERCY's amendment to my amendment. We will voice vote that. Then we will go to another amendment that will give concurrent jurisdiction to the Armed Services Committee, and Foreign Relations Committee.

Mr. BIDEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. TOWER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, I ask unanimous consent that the pending amendment be temporarily set aside so that I might propose another amendment to the pending bill with the understanding that we return immediately to the pending business once the amendment I intend to propose has been disposed of.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 507

(Purpose: To restore administration's budget request for international military education and training)

Mr. TOWER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Texas (Mr. TOWER), for himself and Mr. MOYNIHAN, proposes an unprinted amendment numbered 507.

Mr. TOWER. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 21, line 13, strike out "$41,700,000" and insert in lieu thereof "$47,700,000."

Mr. TOWER. Mr. President, I propose this amendment on behalf of Senator MOYNIHAN and myself. It would restore the international military education and training (IMET) program to the $47.7 million level requested by the administration. IMET is a critical security assistance program, one which warrants the wholehearted support of the Senate.

If there is any one security assistance program which, dollar for dollar, pays for itself many times over, it is the training of military personnel of our allies and friends. For a relatively small investment in this program, the United States makes a major contribution to American security. Further, the IMET program helps to reduce the likelihood that American soldiers will be required to protect the political and territorial integrity of U.S. friends and allies. This program is a prudent investment in our future.

If the $6 million reduction in the administration's request were restored, the United States would be able to train an additional 2,300 foreign military students—many of whom will some day occupy important positions of leadership in their respective armed forces or governments. The IMET program helps the United States to establish military-to-military contacts which are so important to effective cooperation and communication with friendly and allied nations. Even through domestic political upheavals in the host country, these contacts provide continued influence with the most durable institutions in many countries—the military.

The IMET program also enables foreign military personnel to acquire the skills and knowledge necessary to more effectively utilize and absorb the military equipment, services, and support that the United States sells under other security assistance and cash sales programs. Without a fully funded military education and training program, the United States will be handicapped when it comes to introducing U.S. military doctrine and tactics to the foreign military personnel upon whom we may need to rely in times of crisis. Moreover, the United States would be unable to engender the kind of commonality in military thinking with foreign military officials that is crucial to the implementation of our own force planning and strategy abroad.

U.S. worldwide requirements, in recent years, have been expanding, particularly in the Persian Gulf region, in Central America and the Caribbean, and in Southeast Asia. The elimination of $6 million in IMET funding will not only jeopardize our ability to respond positively and effectively to these new requirements, but will also inhibit our ability to keep pace with the burgeoning Soviet military training effort. In 1980, the Soviets trained more than three times the number of foreign military students in the U.S.S.R. than we did in the United States. Moreover, the trends are highly unfavorable for the United States. In the past 5 years, the number of foreign military students trained in the United States has decreased by 48 percent while the Soviet numbers have increased by 38 percent. Failure to restore the $6 million in the IMET program will sustain, and possibly widen, the Soviet lead in international military training.

I should like to make one additional comment in this regard. While the Sovi-

ets have been expanding their training programs markedly, the United States has been underfunding this important program. In fiscal year 1975, 8,449 foreign students were trained in the United States under the IMET program. In fiscal year 1981, only 4,448 students were in the United States receiving training. The fiscal year 1982 budget request contains sufficient funding to restore the number of students to the fiscal year 1975 level.

If we are going to compete successfully with the Soviets in peacetime, we need the opportunity to train and influence those 2,300 students. Coming to America for a course of instruction may be their only chance to see America, to see democracy in action.

Mr. President, I think it is absolutely essential that this amendment be adopted and that we restore the IMET program to the level requested by the administration.

Mr. President, I believe that Senator MOYNIHAN, the cosponsor of this amendment, would like to speak on behalf of the amendment.

I have discussed this amendment with the managers of the bill. It is my understanding that they have some favorable disposition toward it.

Mr. PERCY. Mr. President, the Foreign Relations Committee has strongly supported the growth of the international military education and training program.

Last year the committee changed the basic casting of the IMET programs, so that only the incremental costs of the program and not all the costs were charged to this program. Administration officials estimated that this will increase the number of students in the program by about 50 percent, without requiring any additional appropriations in this program.

This year the committee authorized $41.7 million for the IMET program, nearly a 50-percent increase over the $28.4 million authorized last year.

Thus, the Foreign Relations Committee not only increased the effectiveness of each dollar spent on this program, but it also increased significantly the level authorized for these programs.

The increased authorization suggested by Senator TOWER would most likely be a wasted authorization. After confirming with the Appropriations Committee staff, our staff has concluded that it is unlikely that more than $41.7 million will be appropriated for IMET in 1982.

Therefore, because of the generally austere budget situation, the committee decided to reduce this program by about $6 million. It was not a reduction that we wanted to make but we had to spread the burden evenly.

I understand that the ranking minority member and the minority side has no objection at all. I, therefore, suggest the acceptance of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Texas.

The amendment (UP No. 507) was agreed to.

Mr. PERCY. Mr. President, I believe the distinguished Senator from Oregon (Mr. HATFIELD) has an amendment that we can dispose of.

Mr. TOWER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. HATFIELD. I yield.

Mr. TOWER. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside to permit the Senator from Oregon to propose an amendment and that immediately following disposition of his amendment the Senate return to the pending amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 508

(Purpose: To require the President to prepare and transmit to the Congress a report regarding the Salvadoran conflict)

Mr. HATFIELD. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Oregon (Mr. HATFIELD), on his behalf and Mr. CHAFEE, Mr. MITCHELL, Mr. EAGLETON, Mr. SPECTER, Mr. KENNEDY, Mr. PELL, Mr. ZORINSKY, Mr. RIEGLE, and Mr. DURENBERGER, proposes an unprinted amendment numbered 508.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 84, between lines 2 and 3, insert the following:

REPORTING REQUIREMENT RELATING TO EL SALVADOR

SEC. 716. (a) Not later than 90 days after the date of enactment of this section, the President shall prepare and transmit to the Speaker of the House of Representatives and to the chairman of the Committee on Foreign Relations of the Senate a report and a briefing in closed session setting forth—

The viewpoints of all major parties to the conflict in El Salvador and of the influential actors in the Salvadoran political system regarding the potential for and interest in, negotiations, elections, and to a settlement of the conflict.

The views of democratic Latin American nations, Canada, the Organization of American States, and European allies of the United States regarding a negotiated settlement to such conflict.

It is the sense of the Senate that the President shall, as soon as possible, send a special envoy to consult with and gather information from appropriate representatives of the parties to the Salvadoran conflict, the democratic governments of Latin America, Canada, and European allies of the United States regarding the attainment of a negotiated settlement in El Salvador.

On page 84, line 4, strike out "Sec. 716." and insert in lieu thereof "Sec. 717.".

Mr. HATFIELD. Mr. President, along with my good friends and colleagues Senator CHAFEE, Senator MITCHELL, Senator EAGLETON, Senator SPECTER, Senator KENNEDY, Senator PELL, Senator ZORINSKY, Senator RIEGLE, and Senator DURENBERGER, I send to the desk an amendment. Our amendment, Mr. President, is designed to actively explore prospects for a political settlement to the violent conflict which continues to rage in El Salvador. The amendment urges the President to appoint a special information-gathering envoy. This individual will be directed to meet with our European allies, Canada, the Organization of American States, our democratic friends in the Southern Hemisphere, and all major parties to the conflict to seek their views on how to best achieve a political resolution to the conflict. The President is further asked to convey this information in a report to Congress.

There are two points that I wish to stress at the outset. First, this amendment does not prejudge, endorse or condemn present American policy toward El Salvador. In fact, there are significant differences of opinion among the cosponsors of this bill. It simply reflects Congress intention to be fully aware of the views held by various nations and parties whose ideas may be critical to the attainment of a peaceful and stable solution to the El Salvador conflict. Second, Mr. President, this amendment does not direct the President to appoint an envoy; it urges him to do so as the most appropriate means of gathering information for a report.

The tiny and beleaguered country of El Salvador stands at a crossroads. Depending, to a very large extent, on the path which President Reagan and this Congress choose in the months ahead, either severe tragedy or democratic evolution will take place. The central objective, Mr. President, must be long-term stability for El Salvador. The question this amendment poses is "How serious is our willingness to seek it?"

Assistant Secretary for Latin American Affairs Thomas Enders recently outlined the administration's policy toward El Salvador. His speech is notable for its mention of several points of departure from previous policy.

First, there was a hint of acknowledgement that the Salvadorean security forces are not exempt from responsibility for the senseless violence which endures in El Salvador. Formerly, blame was focused exclusively on the insurgents and groups that supposedly act independently of the military.

Second, the administration now appears to recognize that certain factions within the opposition might be worthy of participation in a democratic process.

Third, and perhaps most importantly, the administration has admitted that the United States is capable of facilitating a peace process. In the past we have operated on the hollow pretense that the United States has no political role to play, while at the same time conducting unilateral military operations. We now have a posture which yields itself to new incentives for political communication between the warring factions.

But El Salvador's economic foundation is deteriorating at an incredible rate. According to U.S. Ambassador to El Salvador Hinton's conservative figures,

over the last 3 years El Salvador's GNP declined by more than 16 percent. Capital flight since 1978 will soon reach $625 million. Imports have declined dramatically. This leaves critical questions dangling. Will the course we now pursue ultimately result in a level of Western economic support sufficient to sustain a viable democratic state? Or will we be left with a ghost nation; a sea of hate and suffering with little reason to exist?

The administration and the Duarte government have responded by offering elections in the spring of 1982. This process is moving along rapidly. Some of us had the privilege of visiting Mr. Duarte on his last trip to the United States and received additional reassurances of that election commitment. It stems from the best of intentions, and I do not believe anyone questions that and I believe no one, Mr. President, can question President Duarte's credentials or his sincere desire for real democracy in El Salvador. A serious legitimate electoral process, and one that is internationally recognized, is critically important for President Duarte and those who are honestly seeking peace and stability.

Factions within the administration and the State Department hope that the prospect of fair elections will entice the moderates in the opposition from to join. This would leave only portions of the military arm, and the extreme ideological element at odds with the democratic process. If this were to occur, the government's ability to control violence and insurgency would be enhanced and legitimated. Clearly, Congress ability to justify actions necessary to control insurgency would also be enhanced.

Though this approach holds great promise, it could also present a dangerous gamble if the necessary prerequisites for free and fair elections do not exist. For if the proponents of this course are grossly miscalculating the realities, this could be a tragic lost opportunity for a nation which has experienced fraudulent elections for decades. To recover from this experience and attempt to start over will entail further cost to human life, the economy, and the national psyche. In Latin America, El Salvador is already approaching what Uganda is to Africa: A nation so racked by fear and terror that it is unable to even function as a society.

President Duarte has signaled his willingness to communicate with the opposition forces only to find his efforts undermined by the Salvadorean military. He recently indicated that the offices of the Mexican Government could be used as a conduit for communication with the opposition forces.

The hope of splintering the opposition represents a healthy departure from myopic East-West confrontationalism. But the approach is unlikely to achieve the desired result. The election carrot may work, Mr. President, but it must have greater reach and substance if it is to entice the opposition into the process. There is reason to believe that many nations will not endorse this effort if serious attempts at dialog are not forthcoming. To date, there is not one ally capable of helping to reconstruct El Salvador which believes that these elections are sufficient. Ambassador Hinton himself has verified this to my office.

Despite the foreboding and seemingly endless nature of the conflict, there is a curious optimism which can be detected among respected observers of the situation. Indeed, there is a consistency of positive thought among those who are close to the conflict. Regardless of their choice of victor, they believe that a solution is possible, and that, given the will, the United States could be the key to such a solution.

A death list has been issued which includes the names of probable negotiators for the opposition. It also may be unrealistic to assume that the moderate element of the opposition will embrace an election process designed exclusively by its opponents and with no guarantee of security or the means with which to organize a political effort effectively. It does now appear that violence will cease if it is held up as a precondition to negotiation, but it could cease as a result of political communication. I suggest that my colleagues ask themselves how secure they would feel while campaigning in El Salvador. I do not believe that I would feel secure, regardless of my respect for President Duarte.

So what can be done? Congress must have the information it needs to make sound decisions, and it must have the information quickly. A number of Latin American countries have been intensely involved in the El Salvador conflict. Mexico and Venezuela stand as the two most predominant countries in this respect. Each takes a different side, but both favor negotiation. It is no secret that the United States cannot afford to estrange these nations because they are increasingly vital to our security for energy related and other reasons.

A number of our West European allies have demonstrated a deep concern for events in El Salvador. The British can provide invaluable advice from their successful orchestration of a political solution to Rhodesia's seemingly hopeless conflict. The Zimbabwe model, while not fully applicable, provides both hope and concrete instruction on how to conduct an internationally recognized election process. The Organization of American States is also in a pivotal position to lend assistance.

The President must send an envoy to Latin America and to Europe to solicit recommendations and determine what willingness exists for nurturing a meaningful political process in El Salvador. All parties to the conflict, including the Catholic church and the opposition, must be included. This information should be made available to the public and to Congress in an open fashion. The envoy should be an individual who is known for his objectivity and is respected by governments everywhere.

Mr. President, I am not aware of an instance where more information was detrimental or where better communication was unhelpful. We cannot afford to do otherwise.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter from the Embassy of Mexico in Washington, D.C., signed by Ambassador Hugo B. Margáin in which the discusses this amendment in the form of a procedure.

I also ask unanimous consent that a letter from the Canadian Embassy in Washington, D.C., signed by Mr. Peter M. Towe, Ambassador, also be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

EMBAJADA DE MÉXICO,
Washington, D.C., April 6, 1981.

Hon. MARK HATFIELD,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR HATFIELD: I am very grateful for the interview you granted me on March 26, and during which you had the kindness to inform me about your bill to amend the Foreign Assistance Act of 1961 pertaining particularly to El Salvador.

I would like to reiterate that since the beginning of the conflict, my Government has been in favor of a political solution to the problem: one that would embrace all the opposing forces now in search of an answer which would be approved by the people.

Mexico is concerned about the involvement of the United States by its support to the Junta. This is the reason why we consider that the idea of your project is a good one: To find a political solution of the conflict in order to put an end to the terrible bloodshed in that country. Instead of violence, the country needs social progress through projects backed by international funds from the I.M.F. and the I.D.B.

The approach of your legislative initiative is constructive and one which I would like to see adopted.

My congratulations and best regards,

HUGO B. MARGÁIN,
Ambassador.

AMBASSADE DU CANADA,
Washington, D.C., April 14, 1981.

MARK O. HATFIELD,
U.S. Senate,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR HATFIELD: I greatly appreciated the opportunity to discuss with you on April 1 the situation pertaining in El Salvador. I was especially sensitive to your offer to provide me with an advance copy and a thorough explanation of your proposed legislation to bring about a negotiated settlement in that troubled country.

Canada's position has been clearly stated for the record, as I indicated to you during our discussion. The problems of El Salvador can be resolved in the final analysis only through political discussion and negotiation by the Salvadoran parties directly concerned. As the Canadian Secretary of State for External Affairs, Mr. MacGuigan, pointed out in the House of Commons on March 9, "We believe there is an urgent need for a political settlement which will enable the moderate democratic elements in the Government of El Salvador and in the revolutionary forces to coalesce".

As I pointed out, however, Canada has no special expertise or capability in Central American affairs and we rely therefore on the views of those countries who have a closer understanding of the situation. For this reason, I believe that consultations among representatives of neighbouring countries are constructive. Your endeavours to assist in these consultations are laudable, as are the hearings you have been chairing on this issue.

Yours sincerely,

PETER M. TOWE,
Ambassador.

Mr. HATFIELD. I would like at this time to yield to the chairman of the Committee on Foreign Relations for a response, because I believe this has been worked out with the leadership of the committee and the staff of the committee for acceptance.

Mr. PERCY. Mr. President, I concur with the basic purpose of Senator HATFIELD's amendment.

The report and briefing it requests will provide a useful review of the political situation in El Salvador, of the prospects for solution to the ongoing crisis there and of the views of U.S. allies on these critical issues.

The situation in El Salvador is complex and changing, and the political environment is especially highly charged today, with all factions seeming to be jockeying and testing the prospects for elections or other political solution.

Certainly, as the distinguished Senator well knows, a member of the committee, Senator CHRIS DODD of Connecticut, was authorized to just recently go to El Salvador and specifically supported his intention to stop off in Mexico and to talk with the dissident groups there to get the total comprehensive picture up to date of the situation. He came back and announced that there was an agreement by all parties that they get together and, in a sense, in a face-to-face period of negotiation try to resolve the problems that are just wracking their country, costing hundreds of lives, and expending tremendous treasure at this time.

But in our desire to lead the parties to a political solution, we must be very cautious that we not make it more, rather than less, difficult to achieve. In the past administration there was an effort to use a special ambassador to coordinate relations with Mexico. The effort failed miserably and seemed really only to have confused the role of our own Ambassador.

I have discussed this at great length with the distinguished chairman of the Appropriations Committee. We went through the agony that we had on it. I questioned the wisdom of it originally. The administration just insisted it would work, and it just fell flat on its face. Everyone was confused, particularly the Government. They just did not know with whom they were dealing. Given the already difficult situation in El Salvador, we would not want to do anything that would confuse or appear to undercut the negotiating and other diplomatic efforts of Ambassador Deane Hinton.

In El Salvador, too, one of the principal impediments to political dialog among the parties seems to be that they do not talk to each other. A special envoy meeting and talking with all the parties that claim a role and stake in this situation might further delay dialog between the parties themselves or preempt efforts, perhaps already underway, to bring the parties together. He would seem to be a go-between, a negotiator, even if that were not our intent.

A political solution in El Salvador must be worked out by Salvadorans. We can encourage that, and our friends and allies in Latin America and Europe can encourage that, and I think we are. Deputy Assistant Secretary of State Ted Briggs has said that his door is always open to any Salvadorans who are interested in a political solution to the conflict there.

At the same time, I believe we in the Congress must also keep well informed on this issue. Therefore, I welcome Senator HATFIELD's language requesting that the executive report to us on this issue. I would add that they have been responsive with consultations with us, and we recently met with Deputy Assistant Secretary Briggs, who reported on his own trip to El Salvador to explore the prospects for political solution and elections there.

Furthermore, I would certainly pledge on the floor of the Senate, as I have privately, to my distinguished colleague, my classmate, my friend and the esteemed chairman of the Appropriations Committee, that because of his deep interest in this issue, because it is a moral issue, because he fought so valiantly and won on the Vietnam issue, and because he does not want to see us dragged back into that—nor do the 230 million Americans want to see us dragged back into Vietnam—I would cordially invite him every single time we meet in a group or individually with the Department of State on El Salvador to have him join us, to have his input, to have his question, and to have his audit of that particular program which is so important. Because, certainly, as chairman of the Appropriations Committee, every penny we spend down there is a responsibility of his in the appropriations process. We would welcome having his consultation, his advice, and his expertise and his deep concern on what is a very grave moral issue.

I think it would be reassuring to the American public if we do have that sense of cooperation and comity.

Mr. HATFIELD. Mr. President, I thank the chairman of the Foreign Relations Committee. It has been a pleasure always to work with him on these mutual concerns that we share.

I would like to underscore some of the comments that the Senator made as a clarification of the intent of this amendment, what it does and what it does not do.

Mr. President, I would like to underscore some of the comments made by the Senator in his explicitly stating that this role is not a mediating role that we are suggesting at all. It is a factfinding and information-gathering role.

The Senator suggested that we not make this exclusively a role for an "envoy" but that the phrase "or by other appropriate means" be added to the amendment, we have acceded to that wish on the part of the Senator from Illinois.

I assume, though, that when we inject the words "or other appropriate means," it does not indicate that the President is merely free to ignore the envoy idea but, rather, that he should consult or at least ascertain with the Senate that we are demonstrating that other means are preferable to that of an envoy.

That is all I am suggesting here in accepting the Senator's words; that we are not deleting the word "envoy" as a possibility, but if the President chooses some other means, he must indicate the reasons why it is more preferable to use other means.

Mr. PERCY. I think the Senator's amendment is very clear. It says, "a special envoy or other appropriate means." If the special envoy is used, I would think that the administration would, just as a matter of course, report to the Foreign Relations Committee on the results of that special envoy's work. If, in the event other means are used, I would expect the Department of State to come in and talk with the Foreign Relations Committee and justify what other means are more appropriate and the reason they have not selected a special envoy.

If such a discussion is necessary, I would cordially invite the distinguished Senator from Oregon to be with us at that time. And I would alert the State Department that they will be subject to questioning as to their reasoning if they choose other means and that they will be asked why.

Mr. HATFIELD. I appreciate the Senator's response. Those are precisely the ideas that are embodied in the purpose of this amendment.

I would also like to underscore what the Senator from Illinois indicated, that such a person, if it is an envoy or if there are other means the State Department should utilize, that the perception of the amendment is that there would be eyeball to eyeball contact, including contact with the opposition forces, to gather information.

What I am getting at here is that I do not feel that we need a further assessment from a distance or that an assessment may be transmitted purely through existing forces. What we are really looking at here is an attempt to get direct information. And that would include the possibility of information directly from opposition forces or parties to the conflict, which include those representatives stationed outside of the Nation altogether.

As we know, there are such forces outside of El Salvador, as well as within El Salvador.

I just wanted to clarify that particular point.

Mr. PERCY. Mr. President, when the Senator from Illinois was in the field of marketing, we used to call it "belly to belly selling." Whether you call it eyeball to eyeball or whether you call it across the table, there is no substitute for personal contact.

Certainly, President Reagan has found that, as he sat down with different chiefs of state, some of whom he was not sure he would relate to as closely as others, he has found that that intimate contact was essential. You can send all the cables and make all the telephone calls in the world, but there is no substitute for personal contact.

Parenthetically, I do hope, by the way, that at the appropriate time the leaders of the two superpowers, Chairman Brezhnev and President Reagan, will have talks. I think that the world is waiting for this. It is appropriate that they at some time sit down and not use the

foreign ministers or other representatives, but meet together as chief executive officers. Only they make the most serious commitments for their countries.

But, in this case, we would do everything to encourage the contacts Senator HATFIELD suggests. Certainly Senator DODD has made a significant effort in this direction.

(Mr. COCHRAN assumed the chair.)

Mr. HATFIELD. Mr. President, I wish to thank the chairman again for his very eloquent response. Also, I would like at this time to take notice of the excellent support and assistance we have received from the staff members of the Senate Foreign Relations Committee in working out this amendment. I really appreciate the support we have received.

Mr. PERCY. Mr. President, speaking on behalf of the majority side, we find the amendment acceptable. I will defer to my distinguished colleague from Rhode Island.

Mr. CHAFEE. Mr. President, will the distinguished chairman of the Foreign Relations Committee yield to me for a few minutes?

Mr. PERCY. Of course.

Mr. CHAFEE. Mr. President, the need to end the violence in El Salvador and the urgency of seeking a settlement to the political conflicts in that country are, I believe, widely recognized by my colleagues. The Senate has, in its previous actions concerning El Salvador during consideration of the foreign assistance bill, expressed its desire that El Salvador move as rapidly as possible toward meaningful economic and political reforms and representative government. My purpose in cosponsoring the present amendment and in requesting my colleagues to support its adoption is to reemphasize the sense of the Senate that progress toward a political settlement in El Salvador must remain the overriding goal of U.S. policy.

Mr. President, the events of the past few months convince me that a military solution is not the answer to the problems facing El Salvador. Violence, whether instigated from the extreme left or the extreme right, can only increase the suffering of the Salvadoran people and make less likely the achievement of democracy in El Salvador. Therefore, I believe that it is now more important than ever that the U.S. Government declare itself strongly in favor of a political settlement and that we take active measures to demonstrate our position.

This particular amendment requires that the President provide the Congress with a comprehensive report concerning the efforts being made to achieve a political settlement in El Salvador. The report would take into account the views of all interested parties, including the views of our allies in Latin America. The amendment expresses the sense of the Senate that an envoy should be appointed to conduct a factfinding mission and to gather information to be used in preparing the report. The appointment of an envoy would provide the extra measure of visibility and effort which, I believe, would be likely to produce a comprehensive and useful report.

I would like to stress that this amendment is independent of our other actions with regard to El Salvador. It is intended neither to diminish their importance nor to dilute their effects. I view this amendment as supportive of the Duarte government and its efforts and as supportive of the administration's announced policy goals regarding El Salvador. The report which is called for by the amendment is designed to insure that the Senate is fully apprised of the political situation in El Salvador and of the views and opinions of our allies and of the other interested parties. This information should aid us in our consideration of any further measures regarding El Salvador which may come before the Senate. It will also enable us to evaluate the success of our other aid efforts in promoting a resolution of the conflicts in El Salvador.

Mr. President, I wish to pay tribute to Senator HATFIELD for the amendment that he has proposed. I support it completely. The suggestions that have been made to revise it, I believe, are wise, as the senior Senator from Oregon has pointed out.

I would like to express my enthusiastic support for the efforts that are underway here. I think what is happening in El Salvador is a terrible tragedy and somehow we have to use our influence to find a true settlement to the problems there.

I thank the Chair, my colleague from Rhode Island, and the Senator from Illinois for his graciousness in yielding to me.

Mr. HATFIELD. Mr. President, I would like to express my gratitude to my good friend Senator CHAFEE, the distinguished Senator from Rhode Island, for his collaboration on behalf of this amendment. He and I have been on this matter for a number of months and have worked very closely. Really, it is as much a product of his thinking as it is of mine. I am very happy that he is a major cosponsor of this amendment.

Mr. PELL. Mr. President, I think this is an excellent amendment. I am very glad to be part of it. From this side of the aisle it should enjoy the support of all of my colleagues and we recommend its passage.

The PRESIDING OFFICER. Without objection, the amendment of the Senator from Oregon is agreed to.

The amendment (UP No. 508) was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PERCY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Illinois to the amendment of the Senator from Texas.

Mr. TOWER. Mr. President, I ask unanimous consent that the pending business be temporarily set aside to permit the Senator from North Carolina to offer an amendment, and that immediately following the disposition of the amendment of the Senator from North Carolina, we return to the pending business.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from North Carolina.

UP AMENDMENT NO. 509

(Purpose: To impose a restriction on the furnishing of assistance for Zimbabwe)

Mr. HELMS. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 509.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 84, between lines 2 and 3, insert the following:

RESTRICTION ON THE FURNISHING OF ASSISTANCE FOR ZIMBABWE

SEC. 716. None of the funds authorized to be appropriated under this Act may be made available for the purpose of furnishing assistance for Zimbabwe unless the President prepares and transmits to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report certifying that no military adviser or technician or other military personnel of the Democratic People's Republic of Korea has been present in Zimbabwe during any period after January 1, 1982.

On Page 84, line 4, strike out "SEC. 716." and insert in lieu thereof "SEC. 717.".

Mr. HELMS. Mr. President, in early July the first contingent of North Korean military advisers arrived in Zimbabwe to give their support and their encouragement to the government of Robert Mugabe. That first contingent approximated 200. Then it moved up to 500. It is now expected to grow as large as 900. As a matter of fact, nobody knows what the total number ultimately will be.

It scarcely needs saying, Mr. President, that this is a significant event, an alarming event. It is the first time that North Korean military personnel have gone to Africa. They have gone to Zimbabwe to train Zimbabwe's forces to put down internal dissent, and we all know what that means.

They have also come to set up training camps to train guerrillas for the invasion of South Africa. Each of us can speculate as to Mr. Mugabe's intentions and his motivations. Perhaps Mr. Mugabe called on the North Koreans because he particularly admires their uniquely harsh brand of Asiatic communism, or perhaps it is also because the North Koreans are allied to the Soviet Union. The Soviet Union has found that the Cubans do not make good surrogates when it comes to fighting. The East Germans, meanwhile, are already spread thin. It is reasonable to speculate that the Soviets may need the East Germans in Central Europe for whatever desires the Soviet Union may have on Poland.

The North Koreans, therefore, are the new serfs.

Now, Mr. President, the U.S. Government has promised to send $75 million of the taxpayers' money in aid to Zimbabwe, to this government of Robert Mugabe. I will be candid with the Senate. This Senator from North Carolina does not believe that the taxpayers' money should be sent to a country that calls in North Korean Communists to maintain its regime in power.

I noticed an article or two in the Washington Post, recently, stating that the North Koreans are supposed to stay only 6 months in Zimbabwe. That is 6 months too long.

The United States should not send one penny in aid as long as the North Koreans are in Zimbabwe, in my judgment. That is why, Mr. President, I have sent forward the pending amendment. This amendment is as forthright as it can be.

It would require that the President certify before any aid is sent to Zimbabwe that the North Koreans were no longer in Zimbabwe after January 1, 1982.

Why did I select January 1, 1982, Mr. President? It is simple. I chose it because that is the end of the approximately 6-month period which is supposed to be the duration of the North Koreans' stay in Zimbabwe.

So the amendment is very simple. We will have given the North Koreans their 6 months in Zimbabwe, which is more than I think we ought to give them in terms of committing or sending the U.S. taxpayers' money to Zimbabwe.

Through this amendment we are giving Zimbabwe the benefit of the doubt. But, Mr. President, if the North Koreans are not out of Zimbabwe by January 1, 1982, then Zimbabwe gets no aid from the taxpayers of the United States.

Mr. President, I ask unanimous consent that at this point in the RECORD an article from the August 10, 1981, edition of the Washington Post entitled "North Korean Advisers Arrive To Train Force in Zimbabwe" be printed.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NORTH KOREAN ADVISERS ARRIVE TO TRAIN FORCE IN ZIMBABWE

(By Jay Ross)

SALISBURY, ZIMBABWE, August 10.—More than 100 North Korean military advisers have arrived here to train a brigade of about 5,000 Zimbabwean troops in a program that could touch off political repercussions in the United States and South Africa.

Salisbury airport personnel witnessed 102 North Korean troops disembark in the predawn hours Saturday. The government has made no announcement and declined comment on the troops' arrival.

Western diplomats, so far adopting a low-key approach, said the North Koreans will train the brigade to use military equipment that the Pyongyang government is giving to Zimbabwe.

The materiel, which has not yet arrived, is said to include tanks, armored vehicles and light weapons. It is believed that the training program, to be carried out at Inyanga about 100 miles southeast of Salisbury near the border with Mozambique, will last about six months.

Diplomats dismissed as speculation reports that the Korean troops will be involved in combating South African-backed rebels in neighboring Mozambique or would act as a political security force. They said they had been informed that the program will be limited to training with the North Korean-provided weapons.

Another diplomat said, "The critical matters are the numbers, the length of their stay and the purpose for being here." So far, he added, the situation "is not all that grave."

The United States, among Zimbabwe's major aid donors, may not regard the North Korean presence, which is believed to be Pyongyang's largest overseas military training program, with such equanimity. To the United States, North Korea is a hard-line Communist enemy it once fought in a war.

Zimbabwe Prime Minister Robert Mugabe sees North Korea as a non-aligned country that was one of his key suppliers of armaments during the seven-year guerrilla war for black majority rule.

Mugabe has never hidden his high regard for North Korea. He made his first official visit as prime minister to Pyongyang last October, where he signed treaties of friendship and cooperation. After his visit the media here lavished praise on North Korea and its publications began to appear in government offices.

Mugabe has criticized the presence of American troops in South Korea, and his government barred a South Korean exhibit at the country's major trade fair last year while giving prominence to the North Korean exhibit.

For Mugabe, an analyst said, North Korea is just as nonaligned as Yugoslavia, a communist country with which the United States enjoys good relations. Pyongyang has criticized the Soviet invasion of Afghanistan and the Vietnamese occupation of Cambodia, but it also maintains some diplomatic distance from neighboring China.

Such distinctions are certainly lost on neighboring South Africa, which fears being surrounded by communist nations and is likely to regard the North Korean move as a step in that direction. The presence of the communist troops could lead to economic retaliation by South Africa, which controls most of Zimbabwe's trade.

Mugabe is likely to feel that bringing in North Korean advisers balances out the military training program being carried out here by Britain, whose advisers are helping integrate Zimbabwe's three wartime forces into a national Army.

Sources said the British have been kept informed for months about Zimbabwe's plans. At first the British were apprehensive about the impending arrival of advisers uesd to a different system and tradition. But Sir Edwin Brammall, British Army chief of staff, said during a visit to Zimbabwe last month that if other countries become involved in the training it will not have any effect on the British program.

North Korea trained troops in U.S.-supported Zaire in the 1970s. The program was abandoned when Katangese rebels invaded the area, and the half-trained troops are reputed to be among the worst in the country.

The Mediterranean island of Malta currently has six Pyongyang military advisers.

[In Washington, a State Department official said North Korea has been active in recent years in providing military equipment and training, including "a substantial military presence until recently in Libya." Current clients include Madagascar and Iran, where sales of relatively unsophisticated equipment are not believed to have been accompanied by military advisers, he said.

["The list of countries that at one time or another had some North Korean military advisers would extend to at least a dozen," he said, adding that Pyongyang seems to be motivated by a desire to bolster its non-aligned status and to earn much-needed hard currency.]

Mr. HELMS. Mr. President, those North Korean military advisers went to Zimbabwe at the invitation of Robert Mugabe. They did not just happen to go there on a vacation. They went there at his invitation and for a specific purpose.

According to intelligence sources, the North Koreans joined a significant number of Cuban advisers who are already manning a very important communications and training center in Zimbabwe, and otherwise making themselves useful to Zimbabwe's new Marxist Prime Minister, Mr. Mugabe.

The British military advisers, still several hundred strong, are reported in the media to be in a state of acute demoralization. Tours of duty have been necessarily reduced to 6 months per man, and only volunteers are deployed.

They have been given the least effective members of the Zimbabwe Army to train and it is widely believed that the British advisers will gradually be phased out of the marginal role to which they have been relegated by Mr. Mugabe as the East Bloc forces assume an even larger role in the training and advising of the army of Prime Minister Mugabe.

Mr. President, look at what is happenign in Africa. Recently, the Government of North Korea donated $21 million worth of weapons to Mr. Mugabe's forces, supplementing other East Bloc military and police contributions. And more and more frequently, Mr. President, Prime Minister Mugabe is speaking out about the importance of imposing a one-party state upon the people of Zimbabwe. That, Mr. President, is the whirlwind that the United States, in its ill-advised policy, will reap.

Meanwhile, the exodus of the most skilled white Zimbabweans and their families is taking place at an ever-accelerating rate despite efforts by the government to prevent such departures by forbidding those leaving from taking even their household goods and furniture. Yet there are some who would say, "Well, we shall go ahead and send the U.S. taxpayers' dollars to Mr. Mugabe in Zimbabwe."

This Senator says no.

Why is that exodus taking place, Mr. President? For several reasons. It is not because white citizens do not love their country. Zimbabwe is a magnificent country, with striking mountains and high waterfalls and rich plains. And, of course, leaving their homeland is an extremely painful decision for the citizens of Zimbabwe. These citizens are leaving not because they cannot stand to have blacks in government. That was settled long ago. Those who could not abide blacks in government were the ones who departed immediately after the arrival of Mr. Mugabe.

No, Mr. President, the people who are leaving now in ever-increasing numbers are those who decided to give Mugabe's government a fair chance to show what it could do, and now they are leaving in utter despair.

The whites are not leaving Zimbabwe because the country lacks economic potential. To the contrary. Zimbabwe's economic potential is visible to all. The whites are leaving because they, like

the international investment community, clearly see the future, and know that the economic potential of Zimbabwe is not likely to be achieved. Not now, and not in the foreseeable future.

The educated people of Zimbabwe know that Marxism and North Korean soldiers are a recipe for economic and political disaster, not development. These educated people see a locomotive coming down the railroad tracks upon which they are standing, and they lack the power to stop the train. So they are getting off the tracks, and out of the country, at an ever increasing rate.

The educated people of Zimbabwe know the meaning of the fact that Prime Minister Mugabe has closed off a vast region of Zimbabwe, and permitted the establishment of four training camps for ANC guerrillas poised against South Africa.

Today, inflation is running at an unprecedented rate as the printing press runs to finance Mr. Mugabe's vision of socialism, and his enoromus 60,000 man army. Instead of creating the conditions that would attract investment, and producing jobs and wealth, Mr. Mugabe has announced that every fit male leaving school will be henceforth given military training.

Vast increases in public spending have sapped the strength from the Zimbabwe economy. Only enormous foreign aid infusions from the United States and Europe have prevented utter chaos. But while disaster has been averted, living conditions are falling, for both blacks and whites. And while the whites have increasingly decided to leave, black Zimbabweans have no place to go. Discontent with Mr. Mugabe's rule and prospects is rising.

To contain this dissatisfaction, and to end speculation on the role of the North Korean advisors, Mr. Mugabe has publicly stated that the North Korean forces would be used to control internal dissent. All this was discussed at length in a recent article from the Economist, entitled "Shots From the Hip." Mr. President, I ask unanimous consent that this article from the September 19 issue of the Economist be included in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HELMS. Mr. President, I also ask unanimous consent that an article by Dr. Hans Germani which appeared in Die Welt on July 30, entitled: "Mugabe's Way to Socialism, Economic Disaster, and Disintegration," be included in the RECORD at the conclusion of my remarks. This article discusses in detail the conditions inside of Zimbabwe that have produced the unprecedented white flight from Zimbabwe.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

I am, of course, not surprised by any of these developments. They were predicted by this Senator from North Carolina and by others many times during the debates in the Senate on Rhodesian policy. My purpose today, however, is not to talk about the past, or about what might have been in Rhodesia if another policy had prevailed.

But distressing things are happening inside Zimbabwe today. If the trends are not somehow reversed, tragedy lies ahead, not only for the people of Zimbabwe, but for people throughout the region.

The question we need to ask ourselves is this: is there anything that we can do to influence developments in that country in a positive way? Or must we simply stand by while our millions of dollars of aid money helps a Marxist regime consolidate itself, and prepares to join in a race war against South Africa as soon as it feels strong enough to do so.

I think it would be important for us to determine the answer to these questions sooner rather than later. And I believe that I have found a clear way of determining at least a partial answer.

Through my amendment the Congress would make it clear to Mr. Mugabe that if the North Korean military advisors are not out of Zimbabwe permanently by January 1, 1982, American economic aid to Zimbabwe will be immediately terminated.

I would personally recommend that such aid funds be transferred to the Government of Sudan, which is struggling against Mr. Qadhafi's intrigues and forces. Such congressional action would have many advantages, to the people of Zimbabwe, and to the free world as a whole.

First, this amendment will make Mr. Mugabe realize that there is an important price to be paid for bringing North Korean forces into Southern Africa. This price tag might cause him to step back from the abyss.

The British are likely to continue their aid for some time to come, regardless of the real situation inside of Zimbabwe. The British Government has an important stake in preserving appearances for as long as possible in Zimbabwe. But the loss of American aid would be painful to Mr. Mugabe. And it should be.

There is no overriding reason why American tax dollars should be thrown away merely to help a Marxist regime consolidate itself with the assistance of North Korean military personnel. Possibly if the American Senate speaks out clearly, in a way which is meaningful to Mr. Mugabe, he will reconsider his policies before it is too late for him to turn back.

A second reason for an amendment of this nature is the fact that the United States has limited aid dollars. My feeling is that these scarce dollars ought to be used in as cost effective way as possible. And I can think of a lot more cost effective places for these dollars than subsidizing the Marxist consolidation of Zimbabwe.

Finally, this amendment will focus attention on the broader problem, the presence of tens of thousands of East Bloc military personnel in various parts of Africa. Again, the Economist magazine describes this process as "The New Scramble for Africa" a reference to a similar process in the late 19th century. Let us examine the numbers of East Bloc military forces on a country by country basis in Africa:

Angola—18,000 Cubans, 850 Russians, 1,000 East Germans;

Ethiopia—11,000 Cubans, 2,000 Russians, 180 East Germans;

Mozambique—500 Russians and other East Europeans;

Madagascar—300 East Europeans;

Benin—1,200 Russians and East Europeans;

Congo—220 Russians and East Germans;

Equatorial Guinea—100 Russian military advisers; and there are thousands more nonmilitary personnel from the East Bloc in Africa carrying out various roles. I do not mention in this list the 11,000 Libyan troops in Chad and their East Bloc advisers.

The point is that the Soviets and their friends are very actively involved in Africa in a military sense, as well as in a political sense. And, sooner or later, we are going to have to face up to the implications of this activism, destabilization, and aggression.

The time has come for the U.S. Senate to take a modest step in the direction of recognizing the seriousness of this problem. Possibly if we act now, we can prevent yet another country in Africa from becoming the permanent host to a new contingent of Communist bloc military personnel.

Let us send a clear signal to Mr. Mugabe that unless his Korean contingent departs from Zimbabwe by the first of January, the price will be the suspension of all American military assistance.

(EXHIBIT 1)

[From the Economist, Sept. 19, 1981]

SHOTS FROM THE HIP

In his first year in office Zimbabwe's prime minister, Mr. Robert Mugabe, earned a reputation as a sensible and practical leader. He was conciliatory at the right time and with the right people, and tough with those who strayed too far out of line. In the past few months he seems to have lost his touch—Zimbabwe has been plunged into greater uncertainty than at any time since independence.

First there was the strange affair of up to 200 North Korean advisers, which Mr. Mugabe said were needed to train a new 5,000-man army brigade in the use of military equipment supplied from North Korea. Mr. Mugabe now adds that the North Koreans are training the brigade to handle internal dissent. This has upset his old rival, Mr. Joshua Nkomo, especially since the brigade is to be made up almost exclusively of former guerrillas from the prime minister's own party. The rest of Zimbabwe's army is a mixture of the old Rhodesian army and the two former guerrilla forces.

Mr. Mugabe's repeated references to the desirability of a one-party state have alarmed the opposition. Mr. Nkomo seems to have concluded that the new brigade may be used to help usher this in. Mr. Mugabe also recently announced that unemployed school leavers will be given military training to help defend the country against South African efforts to destabilise it. Yet the government is supposedly trying to demobilise 20,000 members of the country's 60,000-strong army.

Mr. Mugabe's ministers have been saying some discomfiting things. Whites have been told they can no longer take their furniture with them when they emigrate. White farmers in the south have been accused of smuggling cattle into South Africa. With the euphoria of independence fading the prime minister may think that taking an

occasional slug at the whites will help him to remain popular with the rest.

Squatters impatient at the pace of land resettlement have in several areas moved on to government-owned or white-owned property. Workers in towns are beginning to feel the effects of inflation, and are pressing for wage increases well above the levels fixed by the government. Mr. Mugabe, unable to keep the promises he made during his election campaign, sees his support dwindling. The danger is that he could come to believe that force is a substitute for popularity.

(EXHIBIT 2)

[From Die Welt, July 30, 1981]

MUGABE'S WAY TO SOCIALISM, ECONOMIC DISASTER, AND DISINTEGRATION

(By Hans Germani)

In Zimbabwe, even the blacks are asking: When will former white Prime Minister Smith return?

I was having tea with Germans in Salisbury, the capital of Zimbabwe. Beside the growing political and economic difficulties, the talk also turned to the topic of public order. I heard that one of my best friends, the 68-year-old Bavarian missionary Edmar Sommerreisser, was murdered on April 25, 1981, almost exactly a year after the country gained independence. This murder can serve as a symbol for what is happening here.

For 30 years, this priest of the Order of Mariannhill, who was born in the Bavarian part of Swabia, had dedicated his life to the blacks of Rhodesia, which is now Zimbabwe. The Mariannhill priests and the "Sisters of the Precious Blood of Jesus Christ" had created a network of Christian testimony and medical and social care in Western Rhodesia. The patres did not lack priestly courage before the thrones of modern tyrants.

When in the beginning of 1977, about 500 students of a Lutheran school in Western Rhodesia were abducted by guerrillas to Botswana to be pressed into military service there, two Catholic priests, the Bavarian Sommerreisser, and Kowalski from Upper Silesia, went to Botswana with hundreds of black Lutheran parents to try to have the children released.

They courageously protested to the world press. It was probably then that the guerrillas decided to kill Sommerreisser. He brought back 100 children. Parents of the other 400 children who did not return, like Mr. and Mrs. Dube from Bulawayo, asked me in desperation: "Why won't the West help us?" In Sommerreisser's mission, Gwanda, I often met desperate parents of newly abducted children. A bishop of the mission and two priests, a doctor, and some nuns were murdered by guerrillas.

When the war was over, Sommerreisser and some nuns set about to restore the mission "Regina Mundi", which had been abandoned during the upheavals. It was there that his fate overtook him, even though it was now peacetime. His provincial superior, Odilo Weger from Nuremberg, reconstructed his death from eyewitness reports and other evidence:

THE COUNTRY HAS NOT FOUND PEACE

Three former guerrillas came to the mission and demanded money from the old, poverty-stricken missionary and beat him with iron bars. But the old man was still as strong as a bear and chased them away with a slap in the face: "What, you want to steal, you scoundrels?" Then he got on the telephone and warned the nuns not to leave their house and to call the police. As a precaution, he got his old blunderbuss out of the cupboard, but he forgot to draw the curtains. The deadly salvo of a Kalashnikov hit him through the window.

Zimbabwe has not found peace. "It is true that public safety has improved somewhat during the last six months", Western diplomats and white farmers admit, but the latter do have some reservations. Traffic is unhindered on the country's main roads, even in the formerly dangerous North. But at a tea party on a farm in the North, I also heard the other side: farmers are often ambushed, beaten, and robbed on the roads by the now unified Zimbabwe army (a combination of Nkomo's Zipra guerillas and Mugabe's Zanla warriors commanded by Soviet puppet Masuku, a former Zipra general).

And there are worse things still: Near Fort Victoria in Southern Zimbabwe, a female witch doctor who claims to be the reincarnation of the famous witch doctor "Mbuya Nchanda" (who led the 1896 uprising against the whites), is ordering the killing of white farmers in the area. It is rumored that the police investigation has turned up evidence of complicity on the part of the health minister and friend of witch doctors, Dr. Ushewokunze. This evidence is held under lock and key by Mugabe, who is using it to keep his rival Ushewokunze in line.

At a tea party on the farm in the North, I met two of the last farmers of the area: in Mount Darwin, all 22 farmers, who were still there at the time the country gained independence, have sold out, one of them to the state cooperative, whose paid "socialist" manager he has become. With the help of Mugabe's party organization, he is now forcing his former hired help to fulfill their prescribed work quota.

In Centenary East, the farmers are disappearing. My hosts are among the last ones. One of them wants to leave. The reason: no spare parts for machines, drastically increased prices for gasoline and machines, and no chances for further credits. Like he, many are abandoning the land, leaving it to the mortgage institutions. Both farmers say: "What bothers us is the desperation of our black help. We hear nothing more of wage demands, work stoppages, or references to Mugabe's party as in 1980. Now they ask that we give them work on weekends, so they don't have to go to the party meetings."

A black foreman, who came in to discuss a job, told us: "Formerly, when the Smith government called us together, we got money. Now, when Mugabe's party calls us together, it wants money. They have doubled our wages but abolished payment in food because they said it was against human dignity. But the prices are three or four times what they used to be. How can we get enough to eat? He cautiously asked: "Isn't Smith coming back?"

The second white farmer said: "I am trying to stay on. So far, my workers are on my side. If need be, we'll turn into guerrillas and fight against Mugabe and his domestic and international supporters."

Whether to stay or to leave is being debated in every white household. Emigration has been made more difficult. Any family that leaves may take only DM 3,700, a used car, if it has owned it for at least three years, and (for the time being) its furniture. The rich find ways to circumvent these restrictions. An industrialist told me of a trick that allows you to get half of what you own out of the country, and an ambassador knew still another trick, but I had to promise not to publish them.

The people who emigrate nowadays are different from their predecessors: the first wave consisted of skilled workers, technicians, employees, civil servants, small farmers weighed down by large mortgages. Now, there are also rich farmers and industrialists. Some of the farmers have already bought new farms in South Africa. The reason: there are no more skilled workers and no more honest civilian servants left.

The official number of whites who have emigrated since April 1980 is almost 30,000, but the unofficial number is much higher. Many left in the guise of tourists, taking along a new car, their boat, and DM 7.500 per family. It can be seen from the numbers of people who voted in runoff elections: even if we assume that only 50 percent of the voters went to the polls, it becomes clear that in urban upper-class districts, where emigration has been lightest, more than one third of the whites has left since the last voter registration in 1975. In middle and lower-middle-class districts and in the country it is still worse. At least half out of ten of my personal acquaintances have left since 1980. At best, there are now only 140,000 to 150,000 whites left in Zimbabwe and by the end of the year, this figure will have dropped to less than 100,000.

The catastrophic situation in the field of medical care is contributing to the exodus. The chief doctor of the hospital of Umtali, the third largest city in the country, Dr. von Fürstenberg, a German who has been working in this country for 30 years as a doctor, will be replaced in September by a totally inexperienced young black doctor with a low membership number in the party. Health minister Ushewonkunze employs only party members and witch doctors.

The following incident is typical: in the pediatric department of Andrew Felming Hospital, which used to be one of the best-integrated hospitals in Africa, experienced Scottish nurse Sue McIntyre was passed over in the appointment to head nurse by an inexperienced black nurse who is a party member. Under the latter's aegis, another black nurse beat a black child (it could just as well have been a white one) to death. Proceedings were instituted against nurse McIntyre, who had nothing to do with the whole thing, "for not having prevented it, being a (powerless) white woman". The next day, the proceedings were dropped: Sue's best friend is a black nurse who, in private life, is the minister's girlfriend. But nurse McIntyre, one of 40 white nurses left of the 240 in 1980, has had enough; she is going back to Scotland.

Even those Western diplomats who still preserve a measure of goodwill towards Mugabe admit that the state is incompetent and corrupt. They say that he has done everything in his power to discourage foreign investors. They are allowed to take home only 50 percent of their profits, and they are "encouraged" to leave half of that in the country. A state sales organization for minerals, chromium, asbestos, coal, and gold has been set up. This is as much as nationalizing the entire mining industry. Waste and corruption are rampant: scores of party functionaries come along free of charge on all official trips.

The two new governing cliques, former guerrillas and mostly Western-educated Marxist intellectuals, are dividing the spoils of the state. The state budget is drastically increased: alone for the creation of a state youth organization, the "Mugabe Youth", it projects DM 8 million. Formerly, only DM 200,000 were spent on youth sports programs.

The last attempts at foreign investment were cut off by Mugabe at the beginning of June, when he propagated state ownership of land, minerals, and the means of production. It is a strange product of two European intellectual movements, which have influenced the fanatically racist African Mugabe (his racism is apparent even though he skillfully hides it): Marxism, which he taught himself and fanatically adheres to, and left-wing Catholicism. According to his own testimony, the first to teach him "purely social Gospel" were revolutionary Irish priests.

TWO CLIQUES ARE DIVIDING THE STATE BETWEEN THEM

In spite of this, Western diplomats continue to stick to Mugabe because "he has forced the Soviet Union and the GDR to sign long treaties of submission, in which they renounce all interference in Zimbabwe's af-

fairs". According to information received from the Zimbabwean foreign ministry, this is nothing but a pious tale. In reality, these were routine treaties of three paragraphs. The economy seems much clearer: Mugabe is steering a socialist course.

During the OAU Nairobi Conference, he said "unfortunately" he could not abolish the free-trade structure of the country, which he had inherited, over night. But he wanted to create a one-party state and liquidate the white "Republican Front" of former Prime Minister Ian Smith through his supporters in the "Democratic Party" of former MP Holland. The latter part of this plan did not succeed. In two by-elections, the whites, hard-nosed Anglo-Saxons, stuck by the "Republican Front".

The economic situation is that of a state in the process of socialization: shortages are spreading. The surplus harvest of 900,000t corn cannot be exported because of chaotic transportation and is beginning to rot. The supplies of diesel fuel, which Smith and Muzorewa had carefully assembled, have been thoughtlessly used up. Now, even the domestic food supply is breaking down. Butchers are closing down, meat is a luxury item, and there is not enough milk for the children.

In this atmosphere of decay, only the wheat of the Soviet Union is flourishing. It has assured the chief KGB agent in the country, former Nkomo general Dimissa Dibengue, of a place close to Mugabe. He is promising Mugabe to make attractive offers to his former companions to bring them into the Party. It will not be the Chinese, as originally planned, who will train the army, but the North Koreans, who are much more acceptable to the Soviets (the British advisors have been completely pushed aside).

In Southeastern Zimbabwe, across from Pafuri, the main stronghold of the anti-South African communist terror organization ANC in Mozambique, and close to the South African border, there are once again "forbidden zones". I was told by the colleagues of one of the last white officers of the army that he once ran into a group of armed men there and killed one of them. In his pocket he found ANC documents. The white officer had to flee the country.

An industrialist told me: "I know from a reliable [communist] party source that the first East German secret police experts have arrived. That's how it started in Mozambique, too."

Mr. HELMS. Mr. President, I do not desire to detain the Senate long on this amendment. I hope that the managers of the bill will accept this amendment. Certainly, this is the least the Senate can do, if we are interested in trying to preserve and protect freedom in Africa. If we do not perceive what is happening, then surely, we are blind.

I yield the floor, Mr. President.

Mrs. KASSEBAUM. Mr. President, as chairman of the African Affairs Subcommittee, I oppose this amendment. I greatly respect the observations of the Senator from North Carolina on African matters. We share, both of us, a concern for the stability and success of the developing nations in Africa. Our relations with the newly independent nation Zimbabwe have been a matter of special interest to me. In addition to my official responsibilities, my interest in Zimbabwe was heightened when my daughter spent this past summer working there to help reestablish Zimbabwe's livestock industry as a veterinary student. The country she described to me on her return was a nation that was making great strides to overcome the damage, both physical and psychological, of a very long civil war.

The U.S. relationship with Zimbabwe is based on this administration's understanding of the strategic importance of southern Africa to American security and prosperity. There is a consistent, and well thought out, policy that has been approved by the President and which applies to the entire region. One of the principal goals of that policy is to halt the spread of Soviet influence in the region. For the Senate to suggest, as this amendment clearly suggests, that the present administration's policy toward meeting the security interests of the United States in Southern Africa is flawed will be construed, both in Africa and in other regions, as a vote of no confidence in the President's policies.

Mr. President, I have followed the evolution of American policy in the region closely, and I have found not one shred of evidence to suggest that such a vote of no confidence is warranted.

I share with the Senator from North Carolina his concern about North Korean troops if, indeed, they were escalated as his projections tend to show. But the Department of State has said that approximately 100 North Korean soldiers have arrived in Zimbabwe to train Zimbabwe troops in the operation and maintenance of North Korean equipment which is being supplied. This is clearly a matter of concern to the President, but it must be seen in perspective. By far the largest military aid program in Zimbabwe is that of the United Kingdom. Our allies and I have been assured by reliable sources that the British are likely to remain the largest military aid provider in Zimbabwe.

I think it is misleading to assume that there is going to be a withdrawal of those support troops and advisers from the United Kingdom. The number of British advisers is double, and perhaps triple, the number of North Koreans. Zimbabwe, as a nonalined nation, is trying to balance its military assistance in order to maintain its nonalined stance.

Prime Minister Mugabe will have to play an important role in our search for a Namibian settlement and an end to foreign military presence in southern Africa. In order to gain his cooperation in achieving our foreign policy goals, a careful diplomacy must be practiced. Foreign policy by legislation in sensitive political negotiations is dangerous, as it clearly undermines the President's credibility in dealing with foreign leaders.

Mr. President, last month the Senate voted overwhelmingly to free the President's hand in another country in southern Africa. Our action had an impact in his ability to negotiate with the parties in the region because it demonstrated to the world that he had the full confidence of the Senate in his regional strategy. To vote now no confidence in those policies would be, I believe, a tragic mistake.

Mr. President, again, I certainly share with the distinguished Senator from North Carolina his concern about tax dollars going to a country where he would question the policies of that country. But there are a number of nations where our tax dollars go on which we all would have some reservation, but believe that the overriding risk that might be inherent is important in the long run for the stabilization of policy in that particular region. For these reasons, I certainly hope this amendment will not be successful.

Mr. HARRY F. BYRD, JR. Mr. President, I commend the able Senator from North Carolina for the amendment which he has presented to the Senate this evening. The Senator from North Carolina, I feel, has made a very strong case for his amendment.

I think we need to remember, Mr. President, that for 30 years now, the United States has kept thousands of troops in South Korea to help bolster the South Korean defenses against aggression from the North Koreans.

Now we find that North Korea is exporting military advisers into the Continent of Africa. The Senator from North Carolina brought out earlier that the North Korean military advisers came to Zimbabwe at the request of the Marxist Prime Minister.

I know of no logical reason why American tax dollars should be sent to a nation such as Zimbabwe so long as it is having its military forces trained by the North Koreans, when we all know that North Korea has been an aggressor nation and that as the result of its aggression, the United States has been required to send American troops into South Korea to help keep the aggressiveness of the North Koreans to a minimum.

So I support the amendment offered by the able Senator from North Carolina. It makes good sense. It is something Congress should do.

Mr. Mugabe, the Prime Minister of Zimbabwe, is a self-proclaimed Marxist. He is proud of it. That is all right, if that is what his convictions are. But I know of no reason why the United States should help finance, by tax funds, that country, so long as its military troops are being trained by the North Koreans. That is what the amendment provides, as I understand it—that no U.S. tax funds should be transferred to Zimbabwe so long as the North Korean military advisers are there, training the Zimbabweans, presumably training them in the Communist way of doing things.

Mr. HELMS. Mr. President, I am grateful to my friend, the able senior Senator from Virginia, who has been in the forefront of trying to alert the Senate and this Nation for years about what was happening in Rhodesia, which is now named Zimbabwe.

I recall the Senator's valiant fights—one that he won, all of which he should have won. I thank him for his comments, and I appreciate his support for this amendment.

Mr. President, the distinguished Senator from Kansas raised the question of British advisers. I am glad she did, because I say to her, and for the record, that in terms of the numbers of the North Korean personnel versus British personnel, my information is that there are now 450 British personnel, soon to be reduced to 350. The North Koreans now number somewhere between 200 to 400; and, as I said earlier, at least 900 are expected shortly.

Mr. President, Mr. Mugabe is already providing a base area for the training

of ANC guerrillas. He has already invited Cuban advisers, and he has already invited North Korean advisers. He has announced his intention to form a one-party state, Marxist style. He is, as the distinguished Senator from Virginia (Mr. HARRY F. BYRD, JR.) has just said, a self-proclaimed, proud Marxist. He has said that he intends to use Korean troops to help control what he calls internal dissent, and I say again that we all know what that means. If we do not know, ask the Poles. He has announced that he intends to turn his nation into a socialist country on a Marxist model, step by step.

So it is almost irrelevant to even discuss what influence we may have with Mr. Mugabe one way or another. He is a Marxist and proud of it, as the Senator from Virginia has said.

Mr. Mugabe is merely using the tax dollars of the American people as a means to consolidate the Marxist system in Africa. As long as we continue to hand out money to him and his regime with no strings attached, he will continue to lead his nation down the garden path toward Marxism.

I reiterate that the purpose of this amendment is to see if we can send a message to Mr. Mugabe. If we send this message, with a little luck the North Koreans will go. If the North Koreans do not go, certainly the Senate should cut our losses now and save those millions of dollars of the taxpayers' money.

Mr. President, a recent issue of the foreign policy newsletter, American Relations, published by the Institute of American Relations, contains a very perceptive article on the deteriorating situation in Zimbabwe, with particular emphasis on the fundamental contributions to the welfare of all Zimbabweans made by the British and other European settlers. As usual, American Relations continues to enhance its reputation as one of the foremost foreign policy newsletters published in Washington.

Mr. President, I ask unanimous consent that the article, "Is Zimbabwe the Model We Want?" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

IS ZIMBABWE THE MODEL WE WANT?

In the short post-World War II period of seven years between 1946 and 1953, when the Federation of Rhodesia was proclaimed, some 112,000 British citizens migrated to Rhodesia, including men, women and children. Each family was required to bring with them 2,000 pounds sterling; each single individual, 1,000 pounds sterling. The total brought by these emigrants in that period was 31.2 million pounds sterling, worth today about 250 million pounds sterling, or 450 million Zimbabwean dollars, or about 700 million U.S. dollars.

The effect of this great infusion of private capital was enormous. In Northern Rhodesia (now Zambia) the growth rate was about 40 percent in that period; in Rhodesia proper, it was about 30 percent. Most of those who were coming were the brightest and the most venturesome, those most anxious to escape the socialism of Britain, and to make a better life. Significantly, they were not colonialists expecting to make a quick killing and retire "home" to the hills of Devon; nor were they investors directing the manipulation of huge sums of capital from their club rooms on St. James Street in London. They intended to stay.

They found a country that was still primitive, as only Africa can be primitive. As late as 1947, water supply even in the city of Salisbury was inadequate, medical facilities were at a minimum, and a disastrous crop failure required the importation of thousands of tons of grain to feed the black population. Roads had to be built, dams surveyed and constructed, airports developed, and an educational system built up from scratch. To all of this, Great Britain contributed no aid; it did not even provide a Colonial Service for administration. The Civil Service was paid for entirely by the immigrants, and perhaps for that reason, became universally recognized as the most efficient and most competent in all of Africa.

These were primarily the people who, grown to 200,000, supported Ian Smith in his Unilateral Declaration of Independence in 1965. They were reluctant to hand over their capital, their economy, and their country to the black nationalists and Marxists, on the one hand, and the financial moguls of Britain, in alliance with the Foreign Office, on the other. Their farms, for example, had been purchased at prices equivalent to $100,000 or $300,000 today. For the most part, they were situated in the arid highlands, tillable only with the irrigation systems which they developed. Their factories and businesses had been built up by skillful management and administration under their day-to-day supervision.

By 1979/80, there were 87,000 taxpayers in Zimbabwe, of whom nearly 34,000 were women (hardly fulfilling the image of indolent matrons lolling on the edge of the swimming pool). Less than 1 percent of these were black. Indeed, 94 percent of the gross domestic product was earned by the white population. Of the eight million total population, about 900,000 worked in a wage economy. The rest were engaged in subsistence agriculture, mostly on tribal lands, and engaged in no productive activities from a modern standpoint.

It is fashionable, since Zimbabwe became independent, to regard these statistics as evidence of inequity. But inequity to whom? A mere 87,000 people were supporting the basic needs of seven million. Although the disparity in incomes was great, so too was the investment of capital, the level of education, and the level of understanding of a modern economy. In short, the disparity of responsibilities was greater than the disparity of rewards.

The Tribal Trust Territories were the homelands of the black nations that originally lived in the region. The Shona peoples were the majority (about 80 percent), but they were subdued by the fierce Matabele. Long before the white man came, they chose the lowlands and the river valleys where they had water and vegetation to hide them from their enemies. They stayed away from the arid plateaus where there was no cover, little water, and where the soil was too hard to be broken by their stick plows.

In the lowlands, the Shona followed the tribal custom of communal tribal ownership, with a small plot of six or eight acres assigned to every male at the age of 18. In the past 30 or 40 years, an explosion in the birth rate has tripled the number of persons living in these areas, with each male expecting his small plot at 18. With great efforts, the former Rhodesian government sought to provide sheep-dips, education, agricultural extension, and cooperative services; but the backward farming techniques and the depredations of Robert Mugabe's terrorists resulted in exhaustion and erosion of the soil, and the production of crops too inferior to market even if there were a surplus.

That is why today a mere 3,500 white farmers, with their own capital, modern seeds, steel plows, and tractors, and advanced irrigation techniques produce Zimbabwe's only marketable surpluses on the highland.

ZIMCORD AND THE U.S. TAXPAYER

On March 23, 1981, representatives of some 40 nations and international banks met in Salisbury for ZIMCORD, the Zimbabwe Conference on Reconstruction and Development. This conference was held in response to what Prime Minister Mugabe conceived to be commitments from the western world to support his Marxist program. In October 1979, the Patriotic Front proclaimed:

"We have now obtained assurances that depending on a successful outcome of the Lancaster House Conference, Britain, the United States of America and other countries will participate in a multinational financial donor effort to assist in land, agricultural and economic development programs.

'Those assurances go a long way in allaying the great concern we have over the whole land question arising from the great need our people have for land and our commitment to satisfy that need when in government."

In the document produced for the ZIMCORD conferees, the Mugabee government immediately proceeded to implement its Marxist program. The ZIMCORD document opened with declarations that the standard of living of the white minority "before independence relied on the supply of cheap black labour and resources appropriated from the indigenous population." It announced that "Government's policies are based on socialist, egalitarian and democratic principles. . . . In particular Government intends to re-establish justice and equity in the ownership of land. . . ."

Moreover, Mugabe announced that its claim upon the world community was not the claim of charity or good will, but the claim of right. The document states:

"There is indeed a strong and just claim on the resources of friends in the international community in the light of the urgent problems the country faces. Central to Government's objectives and strategy is the question of land distribution, ownership and development. It was recognized at the time of the Lancaster House talks that land was and would remain at the heart of Zimbabwe's political future and that the cost of its reform and development, pivotal elements in the strategy to attain an egalitarian society, would be far beyond the new nation's means. Failure to win international support for land reform would not only undermine the confidence of the citizens of Zimbabwe, but also possible reactions to such failure would have disastrous consequences for the serious ramifications in the region as a whole."

The Reagan administration at this conference pledged $75 million for FY '83, with the promise of $225 million over three years. The aid was pledged on the basis of a document prepared by the Carter administration, the "Country Development Strategy Statement" of the Agency for International Development. The only alteration made in the Carter program for Zimbabwe was a reduction of the total three-year program from $275 million to $225 million. Despite the fact that the United States was not a participant at the Lancaster House talks, the U.S. AID document says:

"We believe that the proposed U.S. assistance program of $275 million over three years should be the minimal U.S. contribution to meeting that shortfall. The Mugabe government and the people of Zimbabwe believe that the West (especially the U.S. and U.K.) entered certain commitments at Lancaster House, and there will likely be a very strong sense of reneging on promises

and betrayal if fairly large levels of assistance are not promised and provided."

The document does not rebut this expectation, and, indeed, by implication, seems to support this concept of a "commitment." In point of fact, the document was prepared by the same AID team that performed bureaucratic miracles to move emergency aid to Mugabe immediately after independence in 1980. Moving with unaccustomed speed and flexibility, AID—

Drastically abbreviated the documentation process, authorizing $22 million in grants in a few weeks, instead of the normal 6 to 18 months;

Eliminated most of the "strings" such as required conditions and tied procurement;

Telescoped the formal negotiation-signing steps into a matter of days, instead of weeks, signing the grant on Independence Day (April 18, 1980);

Accelerated dollar disbursements, made available to Mugabe as free foreign exchange; and

Facilitated rapid implementation by relying on the internal procedures of Mugabe's government for procurement and monitoring.

This zeal to support the program described as "socialist" by Mugabe's own government is often clothed in rhetoric which suggests that Mugabe's Marxism is "pragmatic" and content to allow the "capitalist sector" to flourish. It also is based upon rosy projections of growth in the Zimbabwean economy, and hopes to boost Zimbabwe as a model for the rest of Africa.

Yet the AID document itself is plainly socialist in its tone and implications. The document repeats the propaganda statements of the Patriotic Front during the Lancaster House negotiations when Mugabe and Joshua Nkomo were rejecting democratic elections, and continuing their campaign of terrorism. It speaks of redressing "the inequities of the past," noting that "the Mugabe government is dedicated to a restructuring of the economy, to a redistribution of land, to an increase in the opportunities and government services available to the black majority."

It pays some lip service to Mugabe's rhetoric about preserving the capitalist sector, but in reality it lays out a program devoted exclusively to the socialist sector and to Mugabe's redistribution plans.

At the March session in Salisbury appealing to international donors, the Mugabe government states that redistribution and welfare plans will consume 50 percent of Zimbabwe's GNP. The information presented to the Congress by the Reagan Administration officials estimates that Mugabe's Marxist programs will result in a deficit approaching $900 million, or 37 percent of total expenditures. Inflation in Zimbabwe is currently 15 percent and, according to recent estimates, will hit 30 percent by the end of the year.

In spite of this, AID optimistically prognosticates that the rate of economic growth in Zimbabwe will reach 8 percent per year. The future of the skilled and professional classes in Zimbabwe is in serious jeopardy.

The claims of some officials that emigration is not increasing is based on net emigration figures with skilled and professional emigrants balanced off against the reentry of untrained and unskilled remnants of the former guerrilla units. But the actual emigration of 17,240 for 1980 should be compared with 12,951 for 1979, or an increase of nearly 50 percent—the highest growth ever. The figures for January and February of 1981 show new records, almost twice as high as for the same period of 1980.

Observers from Salisbury report that the majority of whites are either over 50 or under 20—either too old to start a new life or too young to have acquired any skills or assets. Assets control laws limit the emigrant family to a $1,400 emigration fund. Thus, the emigrants to Rhodesia of the forties and fifties who were required to bring in an equivalent of $32,000 in today's dollars can take out only $1,400 now. They are literally trapped in a Marxist country.

But those with marketable skills not requiring assets are not staying. The U.S. Embassy in Salisbury, in an official cable, tells the story:

"Figures produced by the central statistical office show that vital skills are being lost through emigration. For the year 1980, Zimbabwe lost 6,445 skilled people and gained 3,017. Administrative, clerical, teaching and engineering staff are leaving the country . . . Zimbabwe had a net loss of 69 engineers in 1980. Departures of accountants and auditors left a deficit of 70, while production supervisors and general foremen left a gap of 35 in industry. More than 1,500 clerical workers and 431 adminstrative and managerial staff left the country while 480 new clerks and 279 managers arrived."

The people who can get an easy start with a salaried position elsewhere move fast, which explains why 15,000 have gone to South Africa alone. Many of these do not show up in the statistics, since they simply left "on vacation," leaving their assets behind or in the hands of friends.

The ZIMCORD session fulfilled the wildest dreams of Mugabe's managers. Against the hoped for pledges of $1.7 billion, they got over $2 billion, including the $225 million from the United States and $442 million from the World Bank, and $61.3 million from the African Development Bank, to both of which the United States is a major contributor. The Soviet Union was invited, but did not attend or make any pledges.

The official view is that Mugabe was supported by the Chinese Communists and Nkomo by the Soviets, leading to a disinclination of the Soviets to now become involved.

But the Soviets have already been allowed to open an embassy in Salisbury. Some sources report that Mugabe's secret chief adviser is Dimiss Dibengue, who was formerly the KGB's liaison with Nkomo. Dibengue spent four years in the KGB academy in Moscow and knows how to be flexible. Now he has dropped Nkomo and has already arranged for the delivery of Soviet equipment to Zimbabwe.

Moreover, Mugabe has invited the Cubans and North Koreans to come to train his forces, and he in turn has opened bases to the Moscow-supported ANC (African National Congress) in southeast Zimbabwe to train for guerrilla warfare in South Africa. He has also sent Zimbabwean troops to Mozambique to join with Cubans and East Germans in training the ANC troops for future operations in South Africa.

In the first extensive operation in South Africa the ANC terrorists fired rocket rounds into a major South African Army base near Pretoria. The Soviet-made rocket launcher and cartridges from AK-47 Soviet machine guns intensified the origin of this attack. President of the ANC, Oliver Tambo, announced from his headquarters in Zimbabwe that this attack marks the beginning of a new intensified military campaign against the targets in South Africa.

Zimbabwe may be turning into a good Marxist model for Africa but with the financial assistance of the West.

Mr. HELMS. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. PELL. Mr. President, I have the greatest respect for the author of the amendment, but I must oppose it, on behalf of at least myself and I believe a good many of my colleagues.

As we know, aid to Zimbabwe was among the first major assistance commitments of the new administration, the Reagan administration. I believe they accorded $75 million for fiscal year 1982. The administration, too, is being very vigilant with regard to the activities of Soviet proxies around the world. The administration supports—not only proposes but also supports—the $75 million in aid to Zimbabwe at this time.

In the past, while Prime Minister Mugabe has obvious socialist leanings, he has been cool to dealing with the Soviet bloc. It is important to recall that when Zimbabwe became independent, our Nation, the United States, was the very first nation to establish an embassy there, and the Soviet Union, I believe, was the very last to establish an embassy.

In the past, Zimbabwe has approached the West, not the East, for all forms of support, economic and military. I believe that the way to continue to influence events in Zimbabwe, to be sure the Soviets do not gain a foothold there, is for us to be on the ground floor of Zimbabwe's development.

These North Koreans who have come there, presumably to train pilots, or whatever their purpose, will come and be gone before long, I imagine; but we do not want to see the American influence and the Western influence withdrawn or lessened in any way.

SEVERAL SENATORS. Vote! Vote!

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BAKER. I announce that the Senator from North Dakota (Mr. ANDREWS), the Senator from New York (Mr. D'AMATO), the Senator from Alabama (Mr. DENTON), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Utah (Mr. GARN), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), the Senator from South Dakota (Mr. PRESSLER), the Senator from Wyoming (Mr. SIMPSON), the Senator from Alaska (Mr. STEVENS), the Senator from Utah (Mr. SYMMS), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I further announce that, if present and voting, the Senator from Utah (Mr. SYMMS) would vote "yea."

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from Arkansas (Mr. BUMPERS), the Senator from North Dakota (Mr. BURDICK), the Senator from West Virginia (Mr. ROBERT C. BYRD), the Senator from Arizona (Mr. DECONCINI), the Senator from Connecticut (Mr. DODD), the Senator from Ohio (Mr. METZENBAUM), the Senator from Tennessee (Mr. SASSER), the Senator from Massachusetts (Mr. TSONGAS), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Maryland (Mr. SAR-

BANES), and the Senator from New Jersey (Mr. WILLIAMS), are necessarily absent.

I further announce that, if present and voting, the Senator from Massachusetts (Mr. KENNEDY), would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 14, nays 61, as follows:

[Rollcall Vote No. 327 Leg.]

YEAS—14

Armstrong	Grassley	Nickles
Byrd, Harry F., Jr.	Hawkins	Pro'mire
East	Helms	Randolph
Ford	Humphrey	Thurmond
	McClure	Warner

NAYS—61

Abdnor	Hart	Mitchell
Baker	Hatch	Moynihan
Baucus	Hatfield	Murkowski
Bentsen	Heflin	Nunn
Biden	Heinz	Packwood
Boren	Hollings	Pell
Boschwitz	Huddleston	Percy
Cannon	Inouye	Pryor
Chafee	Jackson	Quayle
Chiles	Jepsen	Riegle
Cochran	Kassebaum	Roth
Cohen	Kasten	Rudman
Cranston	Lavalt	Schmitt
Danforth	Leahy	Specter
Dixon	Levin	Stafford
Dole	Long	Stennis
Domenici	Lugar	Tower
Eagleton	Mathias	Wallop
Exon	Matsunaga	Zorinsky
Glenn	Mattingly	
Gorton	Melcher	

NOT VOTING—25

Andrews	Durenberger	Sasser
Bradley	Garn	Simpson
Bumpers	Goldwater	Stevens
Burdick	Hayakawa	Symms
Byrd, Robert C.	Johnston	Tsongas
D'Amato	Kennedy	Weicker
DeConcini	Metzenbaum	Williams
Denton	Pressler	
Dodd	Sarbanes	

So Mr. HELMS' amendment (UP No. 509) was rejected.

The PRESIDING OFFICER. The question now recurs on the amendment of the Senator from Illinois (Mr. PERCY) to the amendment of the Senator from Texas (Mr. TOWER). The Senator from Illinois is recognized.

ORDER OF PROCEDURE ON AMENDMENTS

Mr. PERCY. Mr. President, with the concurrence of my distinguished colleague, the ranking minority member, and for the advice of the Senate so that we know just where we stand, I would appreciate very much any Senators who have other amendments than those I am about to list with time agreements to advise me.

Mr. President, I ask unanimous consent that the following amendments be taken up in this order: The Tower amendment, which is the pending business, which can be disposed of in——

Mr. TOWER. I think, considering the fact that we have had quite a caucus among the members of the Armed Services Committee and the members of the Foreign Relations Committee, that we can actually dispose of the pending amendment very quickly and then move to the amendment pertaining to special defense acquisition funds, and whatever time—I need only 2 or 3 minutes.

Mr. PERCY. So that we would take 2 minutes for the original pending Tower amendment, which will be voice-voted and accepted by both sides; then 5 minutes equally divided for the contingency fund amendment of Senator TOWER, and Senator HELMS has a——

Mr. TOWER. Mr. President, will the Senator yield at that point? I do not anticipate, since we have arrived at an agreement on this, that there will be a record vote on the defense acquisition. If the Senator from Delaware has any objection he can voice it.

Mr. PERCY. I would not require a record vote on it. A voice vote would be adequate.

Then we have Senator HELMS with an amendment on the Japan treaty for 5 minutes; Senator HELMS with an amendment on funding for a maximum of 10 minutes and an amendment on El Salvador for 5 minutes.

Following that, Senator KASTEN has an amendment for 5 minutes on a contingency fund; a technical amendment by myself, 1 minute; Poland, 1 minute; and then final passage.

I ask unanimous consent that the amendments be taken in that sequence.

Mr. FORD. Mr. President, reserving the right to object, and I will not object, is the chairman anticipating all of these amendments to be handled by voice vote?

Mr. PERCY. To the best of the knowledge of the managers of the bill, they will all be done by voice vote and final passage will be by——

Mr. BAKER. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I congratulate the distinguished chairman of the committee for attempting to expedite this bill. May I suggest that we proceed with the next amendment while we go through the clearance process and try to get the rather extensive unanimous-consent request that the chairman has now put. I urge Senators to give him this consent, but I understand the necessity for Members to consider it.

So I would urge that the managers of the bill proceed to the next amendment while we set in motion the clearance process on both sides.

Mr. PERCY. We would also ask unanimous consent that no further amendments be in order as a part of the unanimous-consent request.

Mr. President, I, therefore, withdraw the unanimous-consent request at this time and will reframe it as soon as we dispose of the Tower amendment.

Mr. TOWER addressed the Chair.

The PRESIDING OFFICER (Mr. WARNER). The Senator from Texas.

Mr. TOWER. Mr. President, it is my understanding that the Senator from Illinois is prepared to withdraw his amendment to the Tower amendment.

Mr. PERCY. That is correct. I do withdraw the perfecting amendment to the Tower amendment.

The PRESIDING OFFICER. The amendment (UP No. 505) is withdrawn.

Mr. TOWER. Mr. President, I believe we can act on my amendment now.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Texas (Mr. TOWER).

The amendment (UP No. 504) was agreed to.

Mr. TOWER. I move to reconsider the vote by which the amendment was agreed to.

Mr. PELL. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 510

(Purpose: To amend the Special Defense Acquisition Fund to make technical changes, to establish a ceiling for the Special Defense Acquisition Fund (SDAF) in title 10 section 138 and to recognize the interest of the Armed Services Committee in the SDAF)

Mr. TOWER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Texas (Mr. TOWER) proposes an unprinted amendment numbered 510.

Mr. TOWER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 9, line 20, insert "(a)" after "Sec. 109.".

On page 10, line 1, strike out "may" and insert in lieu thereof "shall".

On page 10, lines 10 and 11, strike out "in short supply within the Department of Defense".

On page 10, line 12, insert "have not been fulfilled and" after "Forces".

On page 11, line 19, strike out "$350,000,000" and insert in lieu thereof "such dollar amount as is prescribed in title 10, United States Code, section 138(g)".

On page 11, line 21, insert "on security assistance" after "material".

On page 11, line 21, insert "and as part of the annual written report to the Congress required by section 139(a) of title 10, United States Code, regarding procurement schedules for each weapon system for which funding authorization is required" after "Congress".

On page 12, after line 22, add the following new subsections (b) and (c):

(b) Section 138, title 10, United States Code is amended by adding immediately following subsection (f) the following new subsection:

"(g) the size of the Special Defense Acquisition Fund established pursuant to Chapter 5 of the Arms Export Control Act may not exceed $350,000,000 in fiscal year 1982 and $700,000,000 in fiscal year 1983."

Mr. TOWER. Mr. President, this amendment is to that section that establishes the special defense acquisition fund, which is a special revolving fund for the procurement of materiel and services in advance of foreign orders for military sales and to enhance the President's ability to fulfill urgent requirements of allied and friendly forces while minimizing adverse impacts on the readiness of U.S. forces.

I think both of our committees—the Foreign Relations Committee and the Armed Services Committee—strongly recognize the need and the importance of establishing the special defense acquisition fund.

I would offer my commendation and

my congratulations to the Senator from Illinois, the distinguished chairman of the Foreign Relations Committee, and to the ranking minority member, the distinguished Senator from Rhode Island (Mr. PELL) for having crafted this legislation to establish this fund. It is enormously important.

The amendment that I propose makes some minor technical changes. The thrust of it is simply this, Mr. President—and I want to select my words carefully here because we are establishing legislative history and I want to make sure that what I say is not inconsonant with the understanding that Senator BIDEN has, who has been particularly active in this.

The chairman of the Foreign Relations Committee and I have agreed, along with other members of the committee—a number of us have been involved—that, in terms of jurisdiction over the special defense acquisition fund, the Foreign Relations Committee will continue to have its present review of transfers to foreign countries of defense equipment and articles procured by the special defense acquisition fund. The Armed Services Committee would have legislative jurisdiction over the special defense acquisition fund, including the ceiling of the fund and procurements to be made with the fund.

Now, let me further clarify that. What this simply means is that the Armed Services Committee will have jurisdiction over the funds themselves, will establish the ceiling for the fund, will decide what will be procured under the fund, but the Foreign Relations Committee will retain its traditional jurisdiction over the transfer of any equipment or materiel that is purchased by that fund. That would remain the legislative jurisdiction of the Foreign Relations Committee.

Mr. BIDEN. Will the Senator yield?

Mr. TOWER. I yield.

Mr. BIDEN. Mr. President, I think that the statement by the Senator from Texas, is a very succinct manner, explains what we have agreed to. I think that is how we all agree that it should be.

I do not believe that we in the Foreign Relations Committee should be in the business of determining whether or not, with those funds, we should be buying a tank or a bazooka or an airplane. That is within the province and expertise of the Armed Services Committee.

This is new legislative territory. It is a brand new fund. It is a new idea and, I think, a necessary idea to help give the Chief Executive Officer of the United States of America the flexibility to deal with emergencies.

The second half of this agreement in this new legislation that we are setting out here today is that the foreign policy aspect of that fund comes into play once one decides where that tank, bazooka, or airplane is to go, to whom it will be transferred or sold. And that is within the traditional province and jurisdiction of the Foreign Relations Committee.

This agreement, as we all understand it, would keep it where it is.

I emphasize, again, I do not think the special defense acquisition fund ceiling should be set by us in the Foreign Relations Committee, what procurement will take place under it, nor how it will be housed and the accounting for it, because, and I emphasize again, that expertise lies within the Armed Services Committee.

One last point to my colleagues who may not be familiar with the way in which the fund would work. Essentially, what happens is a foreign military sale takes place, and the receipts, those dollars that we make on the sale, are what make up this fund that we are establishing. So, instead of that money being under the jurisdiction of the Foreign Relations Committee, which has jurisdiction over foreign military sales, that money is going to go into this fund which will be totally under the jurisdiction of the Armed Services Committee.

I would like to—and I mean this sincerely—thank the chairman of the Armed Services Committee for being so amenable and cooperative. I think we have reached a reasonable understanding that keeps the traditional jurisdiction, but, more importantly, facilitates the interest of this country by the establishment of the fund.

I yield the floor.

Mr. PERCY addressed the Chair.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. PERCY. Mr. President, I should also like to indicate to all members of the Armed Services Committee and the Foreign Relations Committee that this has been a very harmonious working out of the situation, which I think facilitates greatly our ability to be prepared to help our allies and our friends and be in a position where we can deliver it. We will have the jurisdiction over where it goes.

But I can assure the chairman of the Armed Services Committee that I feel strongly about the necessity for this special defense acquisition fund. We have hurt ourselves in the past and looked bad to our allies and our friends, in comparison with the Soviet Union.

So the necessity for this fund is very great. The members of the Foreign Relations will not have jurisdiction over the amount. That is entirely the jurisdiction of the Armed Services Committee. We will certainly support the creation of that fund and we will benefit as a result of it by not drawing out of inventory the equipment which is needed for our own forces. We will have this special fund and we will make it much more readily available, then, when it is needed by our friends and allies and those nations that we wish to support abroad. I support the amendment and suggest that we are ready for a vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 510) was agreed to.

Mr. TOWER. I move to reconsider the vote by which the amendment was agreed to.

Mr. PERCY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The majority leader is recognized.

TIME LIMITATION AGREEMENT

Mr. BAKER. Mr. President, if I could have the attention of Senators, I wonder—could I have the attention of Members? Would the Chair ask for order, please?

The PRESIDING OFFICER. The Senate will be in order.

Mr. BAKER. Mr. President, I will advise the distinguished managers of the bill that our clearance process is complete on this side. Let me restate the request as I understand it to have been put by the distinguished chairman of the committee.

That the following amendments would be in order and no other amendments would be in order: A Helms amendment dealing with the Japanese treaty; a Helms amendment dealing with the funding cut; a Helms amendment dealing with El Salvador; a Kasten amendment dealing with contingency; a Percy technical amendment; and a Percy Poland amendment.

Mr. PERCY. And amendments in the second degree to those amendments.

Mr. BAKER. All right.

Mr. President, no other amendments would be in order except the second-degree amendments to the amendments stated.

Mr. President, I do not have with me time limitations.

Mr. PERCY. We have reached time agreements. Japan, 5 minutes; El Salvador, 5 minutes; cut in aid dollars, 10 minutes; Percy technical, 1 minute; Percy Poland, 1 minute; Kasten, 5 minutes; and final passage can be at the leader's discretion, either by a rollcall vote or a voice vote.

Mr. BAKER. Mr. President, I include in my unanimous consent request the time limitations just described to be equally divided and controlled in the usual form. In the case of second degree amendments, I provide for the same amount of time as the first degree amendments.

Mr. PERCY. Does the leader wish a rollcall vote on final passage?

Mr. BAKER. I do not, but I believe another Member may request it.

The PRESIDING OFFICER. Is there objection?

Mr. PELL. Reserving the right to object in connection with the Kasten amendment, we may want to have a rollcall vote on that.

Mr. BAKER. The request does not touch the question of rollcall votes. I suggest that we proceed to consider that item by item.

Mr. PERCY. Mr. President, would the distinguished majority leader add to his unanimous consent request that all rollcall votes, if held, would be limited to 10 minutes, except that if there is a rollcall vote on final passage it would be 15 minutes?

Mr. BAKER. Mr. President, I genuinely regret I cannot. I have an objection and Members are some distance from the floor in some cases. Five minutes will not make a lot of difference. I would like to accommodate that request. That would be my personal preference. But I cannot include it.

Mr. PERCY. At least I can try.

The PRESIDING OFFICER. Is there objection?

Mr. HELMS. Reserving the right to object, I wish to inquire if the El Salvador amendment was included.

Mr. BAKER. It is included.

The PRESIDING OFFICER. Is there objection? There being no objection, it is so ordered.

Mr. BAKER. I thank the Chair and all Senators.

The PRESIDING OFFICER. The Senator from North Carolina.

UP AMENDMENT NO. 511

(Purpose: To limit the total amount of funds authorized to be appropriated by this Act which may be obligated or expended)

Mr. HELMS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 511.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 84, between lines 2 and 3, insert the following:

LIMITATION ON THE OBLIGATION OR EXPENDITURE OF FUNDS

SEC. 716. (a) Notwithstanding any other provision of this Act, not more than 94 per centum of the funds authorized to be appropriated by this Act shall be obligated or expended.

(b) In order to comply with the limitation contained in subsection (a), the head of each agency to which funds are appropriated pursuant to this Act shall determine the extent to which funds available to such agency for any activity, program, project, type of materiel assistance, or country will not be obligated or expended.

(c) Nothing in this section authorizes an increase in the amount available for any activity, program, project, type of materiel assistance, or country.

On page 84, line 4, strike out "SEC. 716." and insert in lieu thereof "SEC. 717.".

Mr. HELMS. Mr. President, this amendment would simply go half as far with respect to spending in the foreign aid bill as the President has asked us to do on other programs. It proposes a 6-percent reduction. If the truth be known, and if a poll could be taken of the American people, the vast majority of them, I believe, would prefer that the $5,770,000,000 authorized by this legislation would remain at home and would be returned to the taxpayers so they could spend the money or save it as they see fit.

All this amendment does, Mr. President, is to suggest that the Congress reduce foreign aid by 6 percent. At least we can give America some relief from the economic burden with which they are faced. I think we can dip into the foreign aid account to give that much relief to our citizens.

I commend Bill Fulbright's book, "The New Myths and Old Realities," in connection with this amendment.

Mr. President, one of the former Members of this body, J. William Fulbright, who served as chairman of the Committee on Foreign Relations, once wrote a book entitled "New Myths and Old Realities." In that book, of course, he identified his point of view with reality, and that of his opponents' with myth. And while reality often has a number of interpretations, the myths of our society tend to be cast as great, unassailable principles that politicians attack only at great risk.

One of the most sacred myths of our age is foreign aid. To disparage the massive transfer of wealth from the so-called developed nations to the undeveloped ones is to risk at least the sarcastic wit of the New York Times staff.

The ideologs of the foreign aid establishment have developed their own set of arguments in an effort to explain away the failures of more than three decades of foreign aid. The first response to failure is their favorite: It failed because it was too meager. If only a few billion more dollars had been pumped in project "A", "B", or "C", it would have been a grand success.

The second favorite argument is that there were too many strings attached to the foreign aid which prevented local initiative, and thus success. Frankly, I can sympathize more with that argument, for I have seen closeup examples of massive Federal bureaucracy stifling the success of seemingly worthwhile projects. The incompetence of bureaucratic hierarchy to deal with simple problems is not confined to boondoggles funded here at home.

There are other arguments which have varying degrees of truth to them. For example, some apologists for foreign aid claim that the United States was dispensing money for foreign policy purposes and not to promote development. That certainly seems to ring true, though I do not know if our policy-oriented giveaways have proven any more successful than our so-called development-oriented giveaways.

An interesting aspect of the debate over the validity of foreign aid today is that it is being joined not only by those who have received largess from various foreign aid organizations and lobbying groups, but also by such eminent scholars as Prof. Peter T. Bauer of the London School of Economics and Dr. Robert Nairn, presently in Thailand working on a development project.

Their concerns are not too different from ones I have heard expressed by a wide number of individuals who worry that foreign aid is simply not an effective foreign policy tool. Drs. Bauer and Nairn contend that if capital should be provided to the so-called less developed nations, there should be good reason to believe that such capital will be put to productive use—and not simply to provide a fillip of consumption. In other words, in order to justify taking resources from the United States and putting them in another nation, there should be a rational economic reason: that is, there must be a decent return on investment.

Perhaps a simple analogy might be instructive. If I have a thousand dollars and I seek to invest it, it makes good sense that I will place it where it makes the best return on that investment, with certain allowances for safety and liquidity.

If, instead, I were to put my thousand dollars elsewhere in a less secure investment, the future becomes poorer for me and my family. In addition, poorly investing my thousand dollars has another important economic impact. If I do not put my resources where they provide the best return, what happens to those enterprising and productive businessmen who need the money I might have lent? What happens to those who would have most efficiently used my money and because of their efficiency could have paid me the best return on it? Economic activity that otherwise would have taken place does not because of my decision to allocate my resources in a less sound investment.

Well, what happens with foreign aid? The Congress of the United States and the State Department make the grandiose asertion that they can make decisions concerning foreign investment better than the marketplace. In effect, Congress and the administration say "We will use the taxing power of the Federal Government to usurp the market's decision over the use of more than $5 billion worth of American resources and we will send them to various places as we see fit."

The impact is clear: Resources are not only being put to uses which are less productive for ourselves and our Nation; those resources therefore are not available for use in efficient economic operations that might have claimed that capital had it been allowed to stay in the private sector.

Now, it is a fair guess that somewhere in the hundreds of schemes that will be funded by this legislation before us today, there are a few projects that will provide a good return on the American taxpayers' investment. Chances are, too, that those projects could be financed through the private sector. Chances are that somebody else, perhaps in the private sector in each country now receiving U.S. aid, would pick up the tab for those high return projects that exist if Uncle Sam were not so ready with the checkbook.

There are other side effects involved with the misallocating of capital. It is not only the misallocation of capital which will leave our Nation poorer in the long run—who can deny that American enterprise could more productively make use of the billions in this bill?

It is not only the fact that down the road the lack of production that results from the misallocation of these resources will mean a smaller tax base in the future and smaller Federal revenues in the future. It is also that the world as a whole will be poorer.

With ever-increasing misallocation of resources, we sacrifice the future of the poor worldwide.

Dr. Bauer, to whom I referred earlier, contends that the foreign aid establishment has made recipient nations poorer for their experience. Foreign aid has encouraged and in effect subsidized practices in various nations which has driven capital from their shores.

Is it surprising that there is investment in certain countries, with an accompanying economic growth and a rising standard of living, while in others, there is stagnation and starvation? To perhaps oversimplify the problem faced,

there is generally little or no encouragement for investment in the poorest nations. There is no encouragement for local investment, no incentives for the nation's populace to do anything except subsist on the dole.

Mr. President, if the truth be known, the American people—the vast majority of them—would prefer that the $5.77 billion authorized by this legislation remain at home, to be returned to the taxpayers so that they can spend the money or save it as they see fit.

Perhaps they will invest that money so that it will increase the ability of American companies to do business abroad. This would benefit the private sector in foreign countries, and give more long lasting benefits than any dole that the United States may decide to hand out at its whim.

We could give Americans a much welcomed "tax cut," if you will, by not authorizing any foreign aid at all. I am not so naive as to believe that the Senate will go that far—yet. But it may be that some day the Senate will authorize no money for foreign aid, when the public becomes sufficiently fed up with such giveaways and demands that Congress stop them.

No, today, all I suggest is that the Congress cut foreign aid by 6 percent. At least we can give Americans some relief from the economic burdens they are faced with. Can we not dip into the foreign aid account to give relief to our citizens? Surely, we can do that. Surely, we in the Senate can see fit to cut this authorization by 6 percent. I urge my colleagues to support this amendment.

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HELMS. Mr. President, I ask unanimous consent that the distinguished Senator from West Virginia (Mr. RANDOLPH) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who seeks recognition?

The Senator from Rhode Island.

Mr. PELL. How much time remains to the opposition?

The PRESIDING OFFICER. Five minutes.

Mr. PELL. Mr. President, I think this across-the-board 6-percent cut is a substantial cut from the President's own request.

I believe strongly that we have to reduce Federal expenditures but we ought to do it not in a slashing way but in a highly selective way. The foreign policy interests of the United States are at stake. I would hope that we would offer a substitute amendment which would be more selective in its approach.

Mr. PERCY. Mr. President, I send to the desk a substitute amendment on behalf of myself and cosponsored by Senator PELL and ask for its immediate consideration.

The PRESIDING OFFICER. The Chair is advised by the Parliamentarian that until such time as all time has expired, a second-degree amendment would not be in order.

Mr. PERCY. Mr. President, I yield back the remainder of my time.

Mr. PELL. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back.

The Chair is informed that it is a perfecting amendment and is not in proper form.

Mr. BAKER. Mr. President, I suggest the absence of a quorum and ask unanimous consent that it not be charged against either side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside so the Chair may recognize another Senator to call up another amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The Senator from North Carolina is recognized.

UP AMENDMENT NO. 512

(Purpose: To restrict the provision of assistance to land reform in El Salvador)

Mr. HELMS. Mr. President, I send an unprinted amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 512.

Mr. HELMS. I ask unanimous consent that further reading be dispended with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 84, between lines 2 and 3, insert the following:

RESTRICTION ON AID TO EL SALVADOR

SEC. 716. None of the funds authorized to be appropriated in this Act or any other provision of law may be made available, directly or indirectly, for the provision of assistance to El Salvador for the purpose of providing technical assistance or credit assistance to any stage of planning and implementation of the program for land expropriation and/or reform, or assistance for any programs for publicity, promotion, legal assistance and services, education, or any technical assistance for land reform programs, or for the purpose of planning or executing the confiscation, nationalization, acquisition, or expropriation of any agricultural or banking enterprise, or the properties or stock shares which may be pertaining thereto.
